

### Message from the Dean School of Graduate Studies (SGS)

The 2018/19 academic year was another busy and productive one for the School of Graduate Studies! We welcomed Dr. Jim Kieffer as Associate Dean on the Saint John campus and Dr. Kevin Englehart as Associate Dean in Fredericton, both replacing predecessors in these roles. And soon we will welcome Dr. Sasha Mullally to the decanal team in Fredericton, replacing Dr. Heather Sears who this year completes her very successful tenure in the SGS.

Critically for our students, we secured significant additional funding from a variety of sources, including PETL, NBIF and UNB, for a combined total of approximately \$1 million in new graduate student support. And the graduate students themselves enjoyed excep-

tional success in the annual Tri-Council scholarship competitions obtaining approximately \$1.5 million in scholarship support across the SSHRC, NSERC and CIHR programs. Please see subsequent pages for details on these and other awards and recognitions for our many talented students.

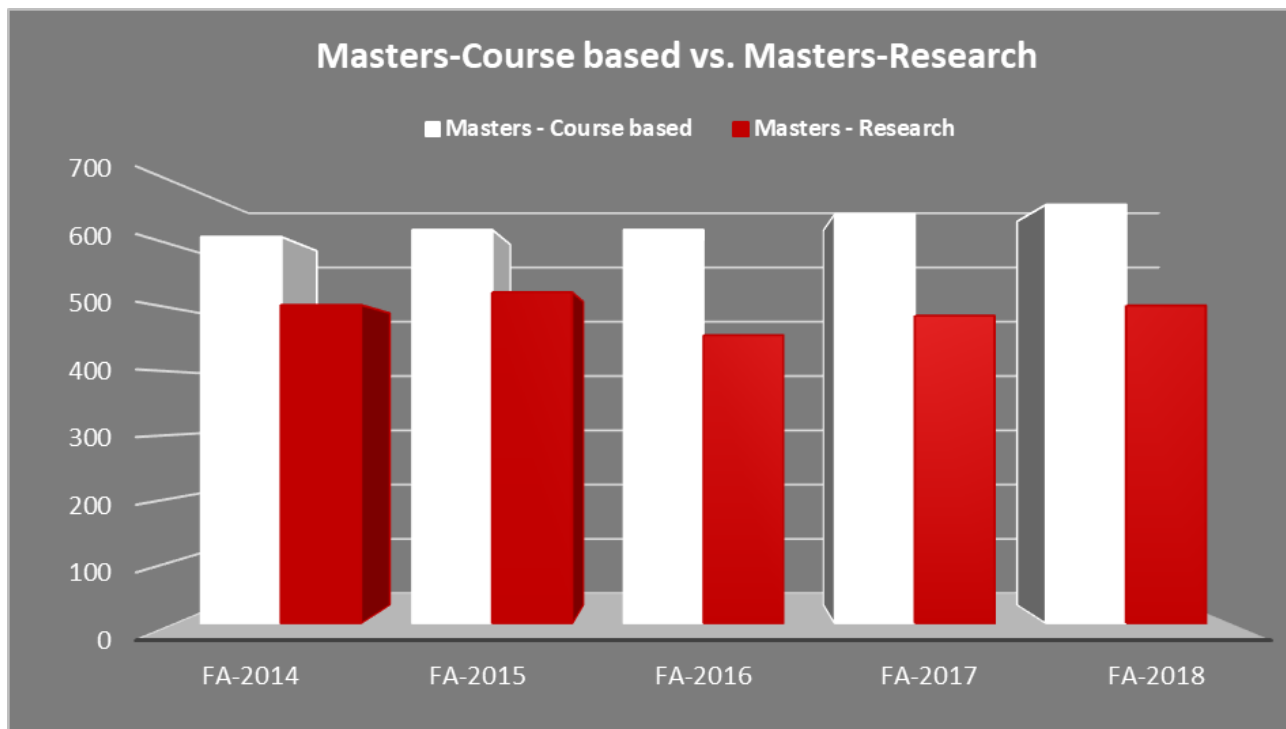

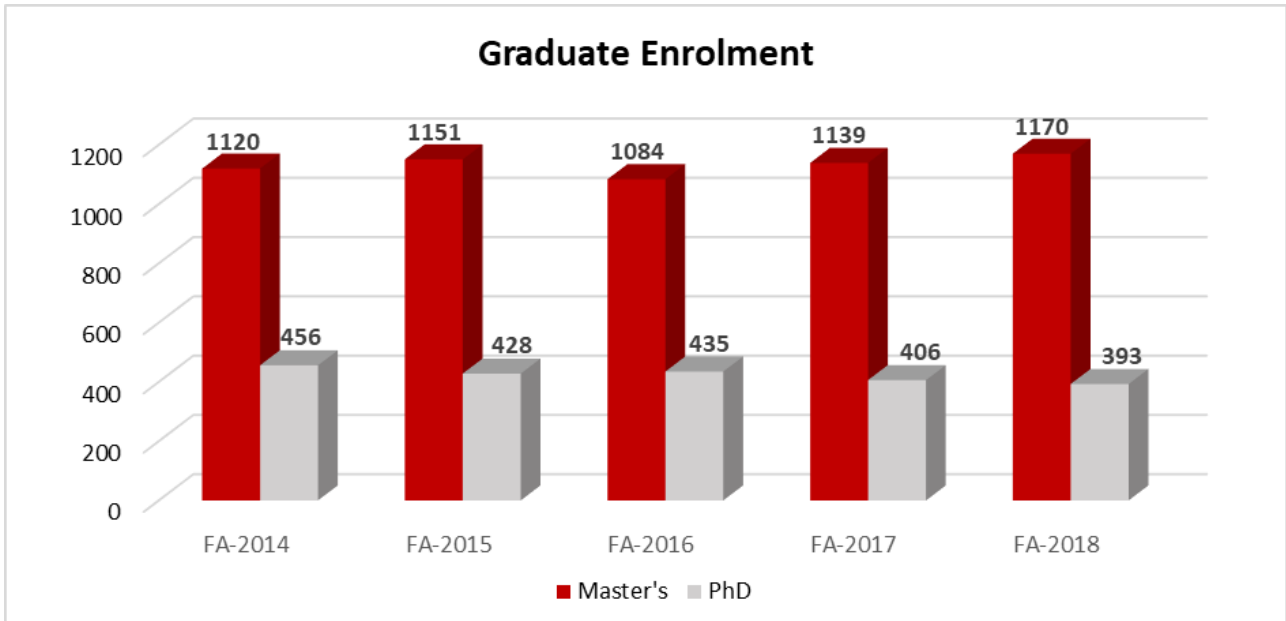

Speaking of talented students, the photo on the left features this year's six student finalists in our annual [3MT \(Three-Minute-Thesis\) Challenge](#) alongside President Eddy Campbell and the members of the SGS Decanal team. The students are smiling, in part, because of the cheques they earned for their excellent presentations! [The top finisher](#) (Barbora Balanova – PhD candidate in Chemistry: back row, second from left) went on to represent UNB at the Eastern Regional 3MT Challenge held at McGill University. Congratulations to all who participated in the 3MT! And many thanks to Dr. Heather Sears (front right) who, once again, coordinated this year's successful instalment of the 3MT. This year, the 3MT event was paired with the [26th annual Graduate Research Conference](#) (aka, the GRC), which was itself another excellent event, showcasing the exceptional research being done by the wider graduate student community at UNB. Congratulations to all the students who participated in the GRC and to the many students, faculty and staff who helped organize it, with special thanks to Andrea Rivera, Brittany Dixon and Bipin Kumar from the Graduate Student Association (GSA) who spear-headed planning and implementation of this year's GRC.

<b>Table of Contents:</b>	Graduate Enrolment	2

	Grad Student Awards	10

## Graduate Enrolment

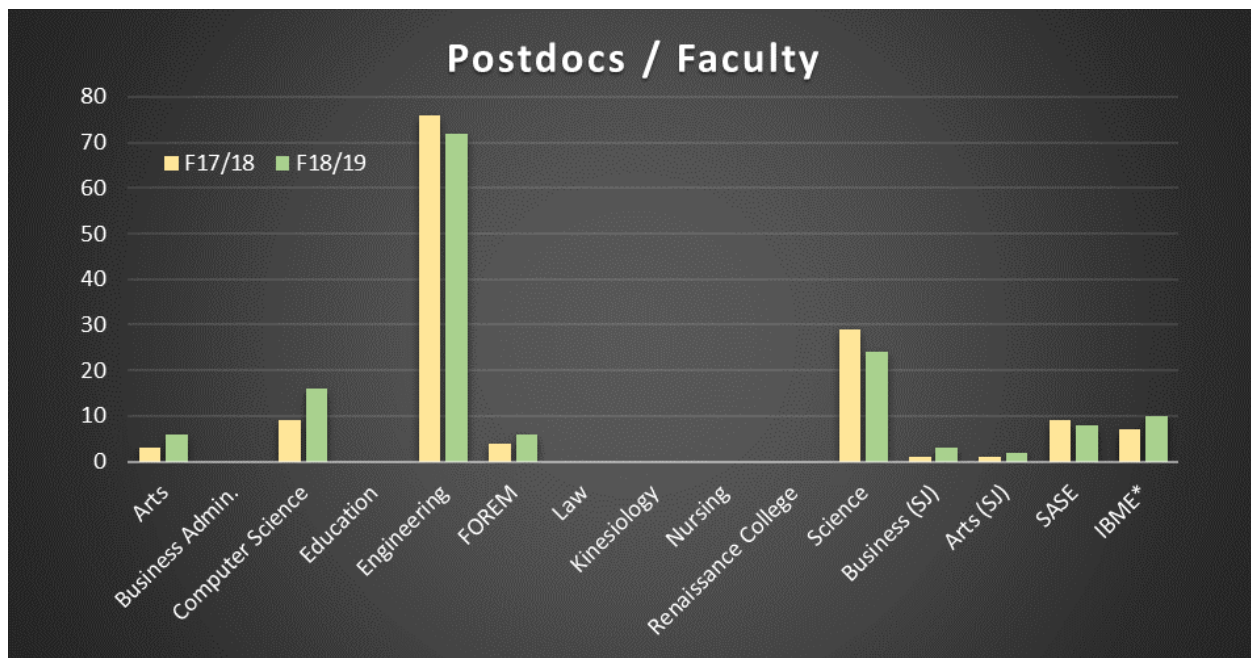

Overall graduate enrolment slightly increased this year compared to last year. Masters students enrolled totalled 1170, up from 1139 the previous year. Doctoral student numbers decreased from 406 to 393. Masters-Research and Masters-Course based both saw a small increase.

## Postdoctoral Fellows - Faculty

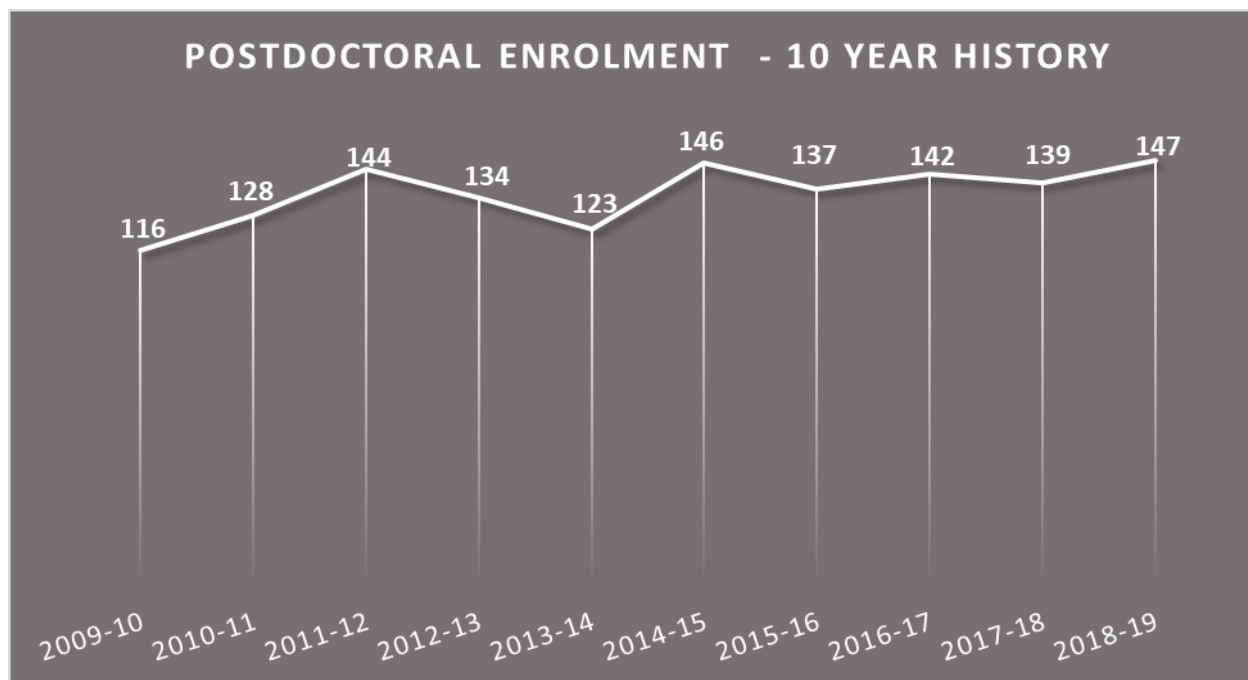

The following two diagrams show the number of post-docs across all Faculties for F18-19 and F17-18, with highest numbers in Engineering and Science for both years in the [Postdoctoral Fellowship Program](#).

There were 147 Postdoctoral Fellows at the university in F2018-19 compared to 139 in F2017-18.

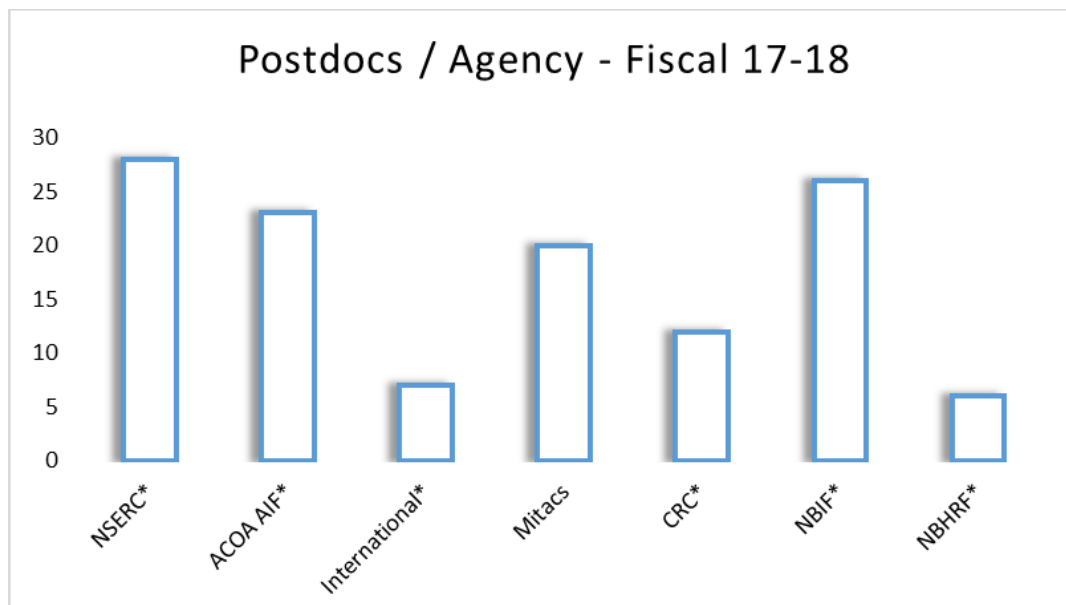

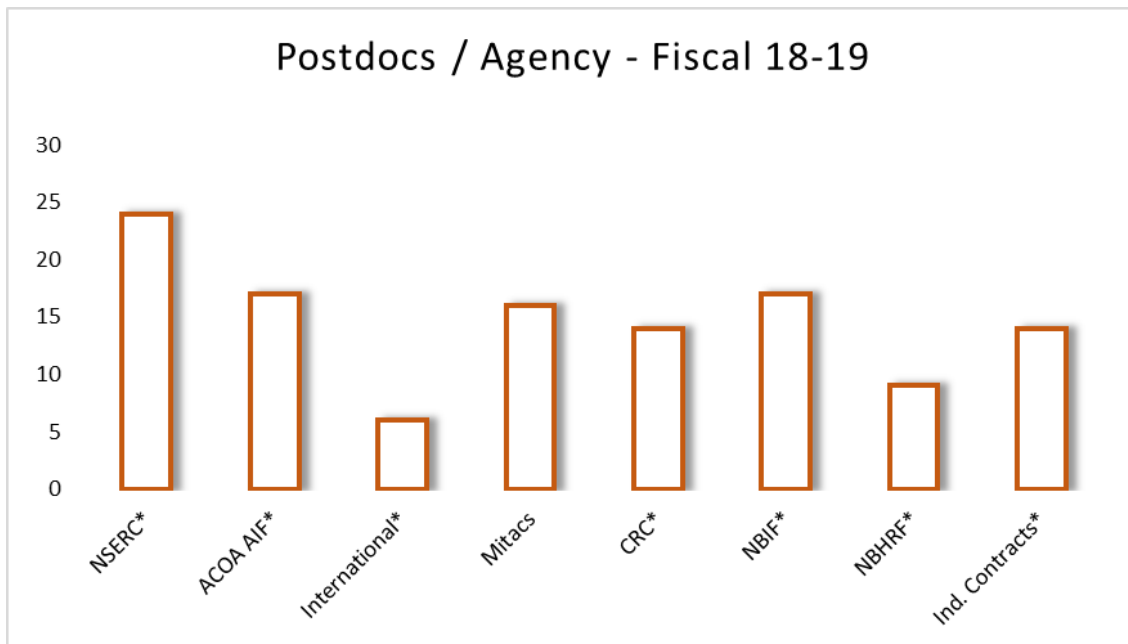

\*IBME—Institute of Biomedical Engineering

The following diagrams depicts the 10 year history of Postdoctoral Fellows at UNB.

## Postdoctoral Fellows - Agency

The following 2 diagrams depict the top funding agencies who have contributed either in full or in part to Postdoctoral Fellowships at UNB in 2017-18 and 2018-19

\*NSERC—Natural Sciences and Engineering Research Council of Canada

\*ACOA—Atlantic Canada Opportunities Agency

\*International Scholarships/Fellowships

\*CRC—Canada Research Chair

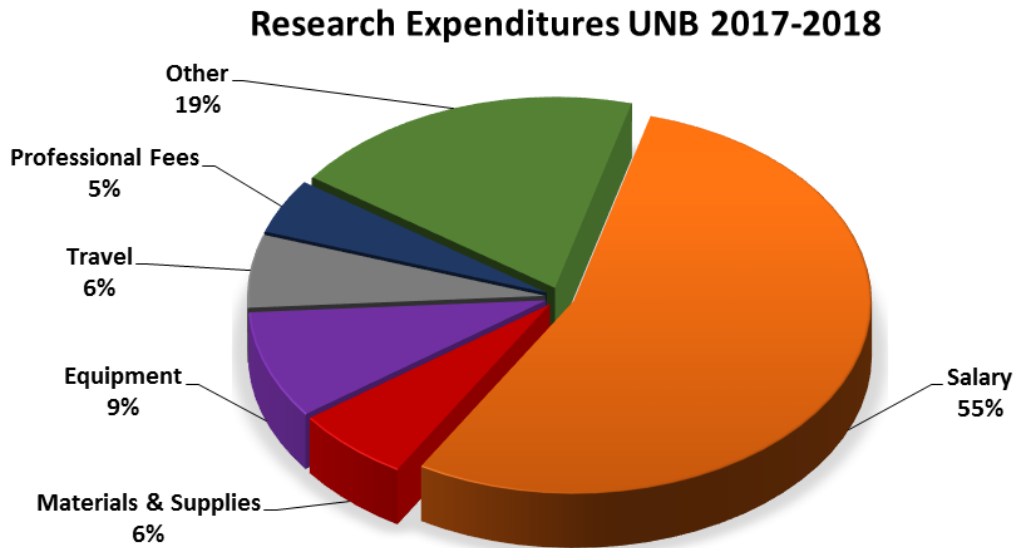

\*NBIF—New Brunswick Innovation Foundation

\*NBHRF—New Brunswick Health Research Foundation

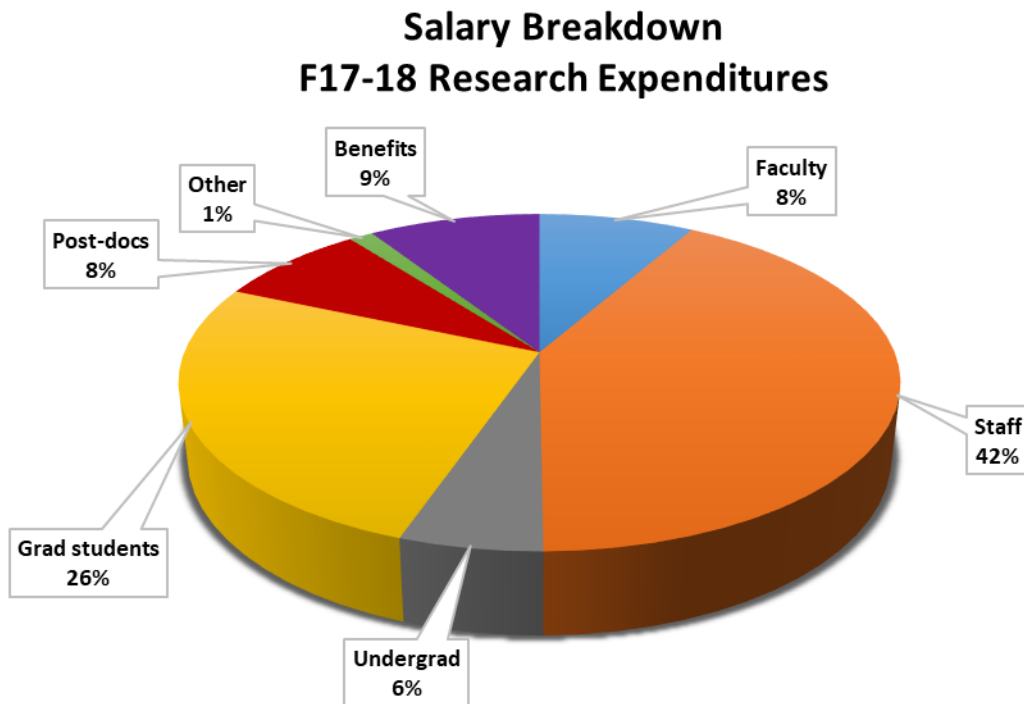

\*Ind. Contracts—Industry Contracts

## Research Expenditures

The majority of the research funding received by UNB goes back into the New Brunswick economy through salaries. In F2017-18, \$20.6 million (55%) was spent on Post-doc, Graduate student and non-student salaries.

The \$20.6M (55%) salary portion of the Research Expenditures pie chart (above) is broken down as per the following diagram:

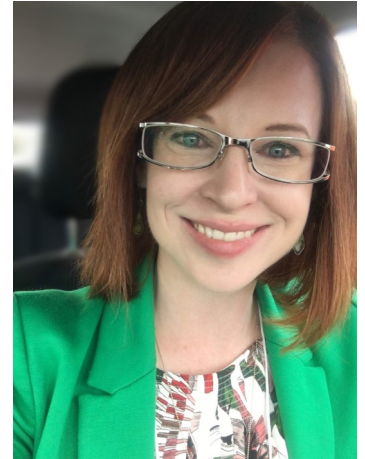

\*Note: Preliminary Numbers from Datatel System

## Grad Student Success Stories

### Kathy Whynot, MEd

Kathy Whynot (pictured), who graduated with her MEd in May 2019 from the Faculty of Education, currently works as the Learning Specialist for Culturally and Linguistically Diverse Classrooms and English as an Additional Language (EAL) for the Department of Education and Early Childhood Development (EECD). Her personal and professional dedication to supporting newcomers in New Brunswick was exemplified in her master's research on "Affirming Identity in Culturally and Linguistically Diverse Classrooms: The Role of Self in the Understanding of Equity." A recent recipient of the [NB Multicultural Council "Champions for Cultural Diversity" award](#), Kathy is community-minded, forward-thinking, and embodies the concept of collegiality. Her collaborative nature has been demonstrated in both her graduate work and her involvement in a variety of projects with UNB colleagues: a new EAL curriculum, a long-term-integration committee, national Languages without Borders conference, and a series of animated pedagogical videos produced by the Second Language Research Institute of Canada. Given the changing demographics in New Brunswick, Kathy's unique and significant contribution to UNB and to our province is indeed a graduate success story!

### Preventing Domestic Homicide

In November 2018, Mary Aspinall (pictured), a Sociology PhD Candidate in the Faculty of Arts, Fredericton, presented a section of preliminary findings to a unique, five-year Tri-Council funded project aimed at preventing domestic homicides in high-risk populations. Mary is continuing her work, alongside Dr. Catherine Holtmann, Director, MMFC, into the project's final stage of conducting in-depth interviews across Atlantic Canada with survivors of domestic violence and friends and relatives of victims of domestic homicide.

### Justin Kamerman, MSc in Statistics

Justin Kamerman (pictured) completed his MSc in Statistics from the department of Mathematics and Statistics, Faculty of Science, Applied Science and Engineering (SASE), May 2019. With a Master of CS degree from U of South Africa, Justin combined his CS and Statistics knowledge to develop an R package for biologists using QFASA, a popular diet estimation method. Justin has worked as a software engineer and data scientist in Canada, US, UK, and South Africa. He entered the program on a part-time basis to increase his proficiency in Statistics and Machine Learning. Justin is currently employed at Eigen Innovations in Fredericton as a technical architect for AI vision systems for industrial process control.

## Grad Student Success Stories

### Learning investment benefits of quantitative methods first hand

A team of five students enrolled in UNB's new [Master in Quantitative Investment Management \(MQIM\) program](#) learned the benefits of using quantitative and data rich methods first hand this year by competing in the [global Chicago Quantitative Alliance \(CQA\) Investment Challenge](#). The team, which included Huang Xu, Jiaji (Justin) Feng, Justin Arsenault, Lowry Zhu and Joseph MacCallum, used the quantitative investment tools they're learning in their courses to manage a portfolio and placed 6th out of 48 schools from around the world. Among the Canadian teams that participated, they placed first. This is the first year of the MQIM program and the first time UNB students have ever participated in the Challenge.

The CQA Investment Challenge is an online equity portfolio management competition that runs throughout the school year and offers students the opportunity to learn and apply stock selection and portfolio management skills in a simulated, real life hedge fund experience. The purpose of the Challenge is to provide students with first-hand experience of being a portfolio manager by managing money, explaining their investment process and discussing performance. The students started working on the investment challenge in October and have been researching and applying their quantitative investment management skills and knowledge throughout the year to handle all aspects of portfolio management, including stock selection, portfolio construction, and risk management.

The team spent a lot of time and research at the beginning with setting up a factor investing portfolio using Bloomberg and R. They followed a consistent strategy and rebalanced the portfolio regularly throughout the year. Feng told us, "The scope and requirement for maintaining a portfolio during the competition is quite intensive, but using quantitative tools such as factor-investing models, R and GARCH made managing the portfolio much more efficient, something we learned to appreciate first hand when we had to spend time focusing more on exams and course requirements instead of the portfolio."

The team learned their results as the school year came to close. "Lack of market place experience is a real barrier to many fresh graduates who are looking for their first job in portfolio management," said Dr. Devashis Mitra, dean of the Faculty of Management. "By enabling students to apply their research methods to an investment portfolio in this manner, the CQA Investment Challenge has helped this group of students in the first year of our MQIM program stand out in the crowd."

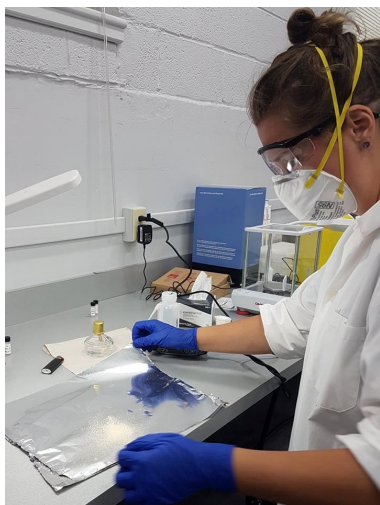

*Photo: Four of the five members of UNB's CQA Investment Challenge team (L-R): Huang Xu, Jiaji (Justin) Feng, Justin Arsenault and Lowry Zhu. Joseph McCallum, the fifth member, is missing.*

## Grad Student Success Stories

### Assessing the 'Gladue' court system

In January 2019, Frank Lavandier (pictured), Department of Sociology, Faculty of Arts, defended his PhD dissertation which examined the role and operation of the specialist 'Gladue' court system for Indigenous defendants. Focusing on Prince Edward Island (PEI) as a case study, Frank's dissertation and research has been welcomed by groups spanning the Judges, Lawyers, and Probation Officers to local PEI Indigenous Elders and communities.

### Ancient skeletal proteins

Nicole Hughes (pictured in the BART lab) is a Master's student in the department of Anthropology, Faculty of Arts, Fredericton, who is interested in ancient skeletal proteins and what they can tell us about health in the past. She is currently collecting her samples from the 18<sup>th</sup> century [Fortress of Louisbourg](#) skeletal collection housed in the [UNB Bioarchaeology Research and Teaching Lab](#) (BART). Nicole went abroad this past Spring to analyze her samples at the University of Copenhagen's paleoproteomics lab.

Grad Student Awards (page 1 of 8)

Name	Award / Prize Title	Description
Rebecca Agnew, Faculty of Nursing	Cutler Nursing Scholarship	Full or part-time MN student; Working or previously worked in the Mental Health Nursing Field; Intending to work in the Mental Health Nursing field in the future; Scholastic achievement.
Amy Fanjoy, Faculty of Nursing	3 <sup>rd</sup> Place	Oral presentation at the 2019 Social Sciences and Humanities Graduate Conference.
Sarah Filiatrault, Faculty of Nursing	CAHSPR/CIHR-IHSPR Student Poster Competition, Second Prize	National competition involving masters, doctoral, and post-doctoral students at the annual Canadian Association for Health Services and Policy Research (CAHSPR) conference.
Sarah Filiatrault, Faculty of Nursing	NBHRF Rising Star Research Award for April 2018 - Master's Level	Award for an outstanding publication in health research.
Sarah Filiatrault, Faculty of Nursing	NANB Monnex Scholarship	Awarded for academic excellence and involvement in professional nursing activities.
Sarah Filiatrault, Faculty of Nursing	Graduate Academic Unit Graduate Student Travel Award-Nursing	Awarded to support travel to academic conferences and disseminate research.
Shelley Francis, Faculty of Nursing	McPhedran Nursing Faculty Development Graduate Scholarship	This scholarship is intended to provide funding for registered nurses employed by UNB Faculty of Nursing in Fredericton in a continuing or term appointment who are pursuing graduate degrees at any university approved by the selection committee.
Nicole Hughes, Dept. of Anthropology	SSHRC Michael Smith Foreign Study Supplement	To assist students currently funded by SSHRC with research and living expenses abroad during data collection.
Trevor Lamb, Dept. of Anthropology	Frederik and Catherine Eaton Graduate Fellowship	To support students with research and living expenses while engaged in research activities at Queens' University Belfast.
Michelle Adams, Faculty of Education	Dietz-Turner Bursary in Graduate Education	
Tiffany Bastin, Faculty of Education	Dr. William S. Lewis Doctoral Fellowships	
Tiffany Bastin, Faculty of Education	New Brunswick Innovation Foundation Award	
Mary Batty, Faculty of Education	McPhedran Nursing Faculty Development Graduate Scholarship

<b>Name</b>	<b>Award / Prize Title</b>	<b>Description</b>
Shitangshu Roy, Faculty of Management	Brydone deBlois Millidge Memorial Scholarship	Awarded on the basis of scholastic attainment and financial need to a full-time graduate student entering the final year of the MBA program.
Kevin Duchesne McCarthy, Faculty of Management	Singer Graduate Bursary	Awarded on the basis of financial need to a full-time student, who is in good standing and registered in the final year of the Master's Program in the Faculty of Administration.
Rajat Sharma, Faculty of Management	Singer Graduate Bursary	Awarded on the basis of financial need to a full-time student, who is in good standing and registered in the final year of the Master's Program in the Faculty of Administration.
Juntao Xu, Faculty of Management	Atkinson Prize in Accounting	Awarded annually each fall on the recommendation of the Faculty of Administration, to an outstanding MBA student with an aptitude for accounting.
David Michael Barr, Faculty of Management	MBA Graduate Award	Awarded based on recommendation to an outstanding graduate student within the MBA program on the Fredericton campus.
Rajat Sharma, Faculty of Management	MBA Community Leadership Award	Awarded in the winter term annually, based on the recommendation of the MBA Office, to any student enrolled in the MBA program on the Fredericton Campus who has completed at least 15 credit hours in the program. This award celebrates the values and characteristics of the MBA program on the UNB Fredericton campus including its diversity of students, close sense of community, the professional and personal growth students experience in the program and their social consciousness.
Juntao Xu, Faculty of Management	Dr. Santosh Kabadi Memorial Scholarship	Awarded to a student who is enrolled in the second year of the MBA program on the Fredericton campus, on the basis of financial need and a successful academic performance. Preference will be given to students who are enrolled in the Project Report or Thesis.
Juntao Xu, Faculty of Management	Dr. Francisco Arcelus Memorial Scholarship	Awarded to an international student who is enrolled in the second year of the MBA program on the Fredericton campus, on the basis proven academic performance and of financial need. Preference will be given to students who are enrolled in the Project Report or Thesis.
Karim Baccouche, Dept. of History	D.W.L. Earl Travel Fellowship	Awarded to those pursuing areas of special interest to Professor Earl himself, whose teaching were primarily in the areas of historiography; the history and culture of England, Scotland, and Ireland; and European studies.
Ian Baird, Dept. of History	NBIF Alternate	New Brunswick Innovation Award - Alternate
Ian Baird, Dept. of History	H.H. Stuart Fund	Given to defray travel and other research-related expenses
