

Community Engaged Learning

Community engaged learning opportunities are activities designed to promote learning and development, while addressing our human and community needs. This opportunity engages a community organization as an external partner. Through the EngagedUNB program, these opportunities allow students to do hands-on, meaningful work that helps solve real, immediate issues.

Exceptional learning experiences offer more than just a degree

Experiential education, including community engaged learning, helps students to create knowledge while reflecting on experiences.

Community engaged learning success stories:

- As part of the EngagedUNB Summer Internship Program, Jacqueline Nsubuga completed an internship with UNB Sustainability as a Sustainability Engagement & Education Intern, where she collaborated with students, faculty and staff to promote and foster sustainable communities at UNB.
- [Alexis Grant](#), a business administration student, worked with the New Brunswick Association for Community Living to provide strategic insights to strengthen their revenue generating program.
