

School of Graduate Studies (SGS)

We enjoyed another busy but very productive and successful year in the School of Graduate Studies! We welcomed two new staff members, Stella Park and Aimee Hughes (pictured below), replacing predecessors in their roles as Graduate Program Officers. And we will soon welcome a new Associate Dean on the Saint John campus as we bid a reluctant but very fond farewell to Dr. Bruce MacDonald who served previously in that role (Bon Vive, Bruce!). The cycle thus continues and part of the SGS refresh this year entailed an overhaul of our website to better serve the student, faculty and staff communities. Check out our new SGS Blog – [the Gradosphere](#) – dedicated to the Universe of Graduate and Research activities, where we feature news on the exciting research accomplishments of our many talented students and faculty. Speaking of talented students, the second photo on the right features this year’s top finishers in our 2nd Annual [3MT](#) (Three-Minute-Thesis) Challenge. From left-to-right they are Mohit Bhargav from Civil Engineering, Ogbogu Kalu from Mechanical Engineering, and Carla Culligan from Education. They’re smiling, in part, because of the cheques they earned for their excellent presentations. The top finisher (Ogbogu Kalu) is travelling now to McGill University to represent UNB in the Eastern Regional 3MT Challenge (all the best, Ogbogu!). Congratulations to all who participated in the 3MT! In support of this year’s event, the SGS hosted a number of workshops and coaching sessions on general communication and presentation skills, aided by dedicated UNB faculty who pitched-in again this year (Dr. John Ball and Dr. David Creelman, many thanks!) and we look forward to continuing this tradition next year, so follow the SGS website

for news on this and other important grad-related activities.

Another student highlight of the year was the Graduate Research Conference – this year being the GSA’s 25th Annual instalment of the conference, a tremendous accomplishment. Hat’s off to the many students, faculty and staff who helped organize the event, possibly the largest ever GRC, with particular thanks to Brittany Dixon (MSc Biology) and Bipin Kumar (MSc Computer Science) who spear-headed planning and implementation.

There were many other exciting developments for our students this year, including a prestigious Vanier Scholarship awarded to Lucy Huang (PhD candidate in Psychology), and a host of Canada Graduate and other Scholarships from NSERC, SSHRC and CIHR and many, MANY other awards besides. Please see subsequent pages for details on some of these.

Stella Park and Aimee Hughes, Graduate Program Officers

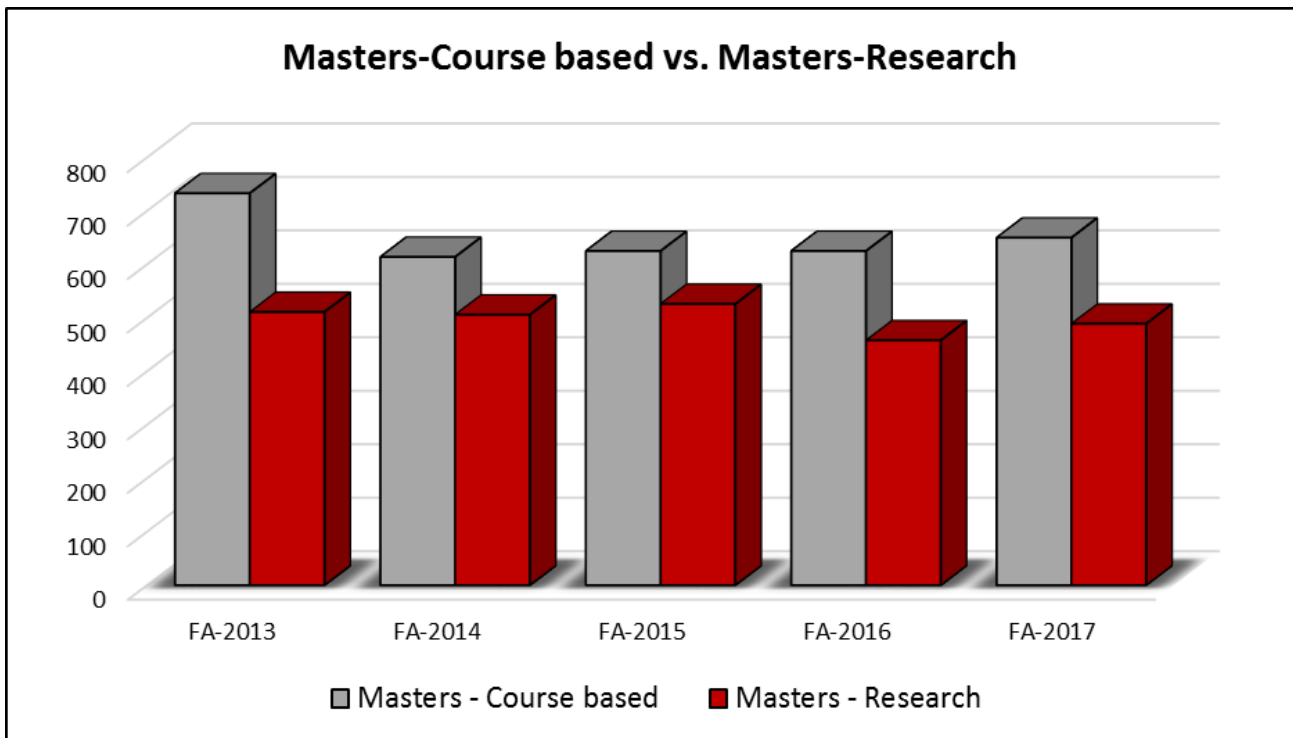

L-R: Mohit Bhargav from Civil Engineering, Ogbogu Kalu from Mechanical Engineering, and Carla Culligan from Education

Table of Contents:

Graduate Enrolment	2
Postdoctoral Fellows	3 – 4
Research Expenditures	5
Grad Student Success Stories	6
Grad Student Tri-Council Awards	9
Grad Student Awards	10

Graduate Enrolment

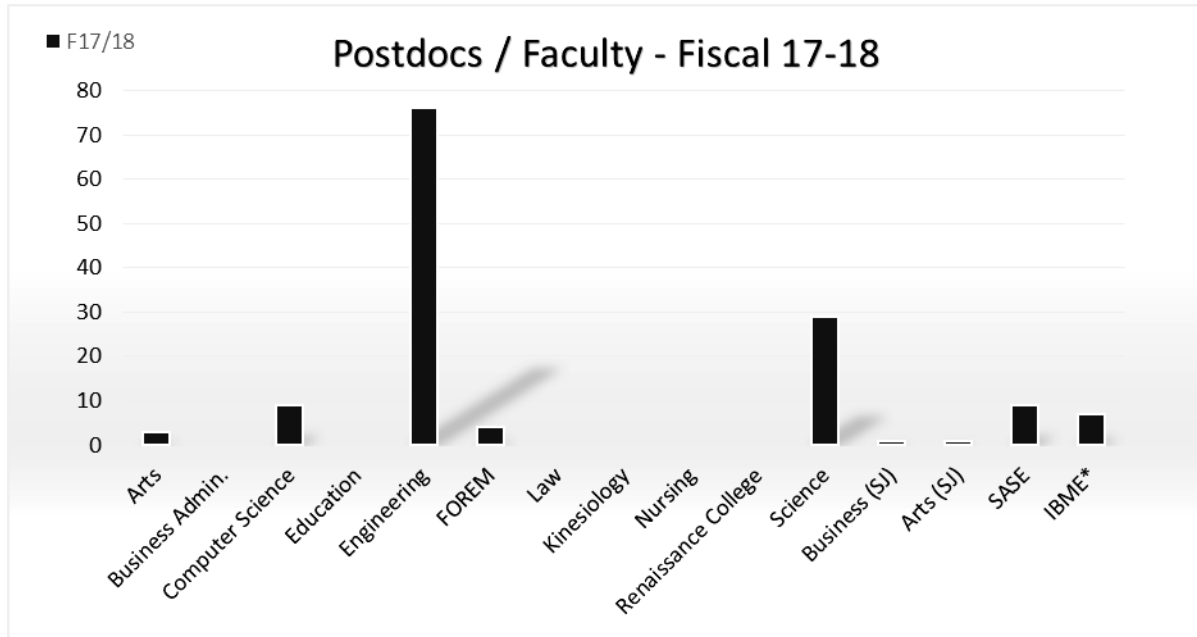

Overall graduate enrolment slightly increased this year compared to last year. Masters students enrolled totalled 1139, up from 1084 the previous year. Doctoral student numbers decreased from 435 in 2015-16 to 406 in 2016-17. Masters-Research slightly increased from 458 to 489. Increased recruitment activities and additional funding opportunities such as the NBIF (New Brunswick Innovation Foundation) top-up scholarships are expected to improve enrolments going forward.

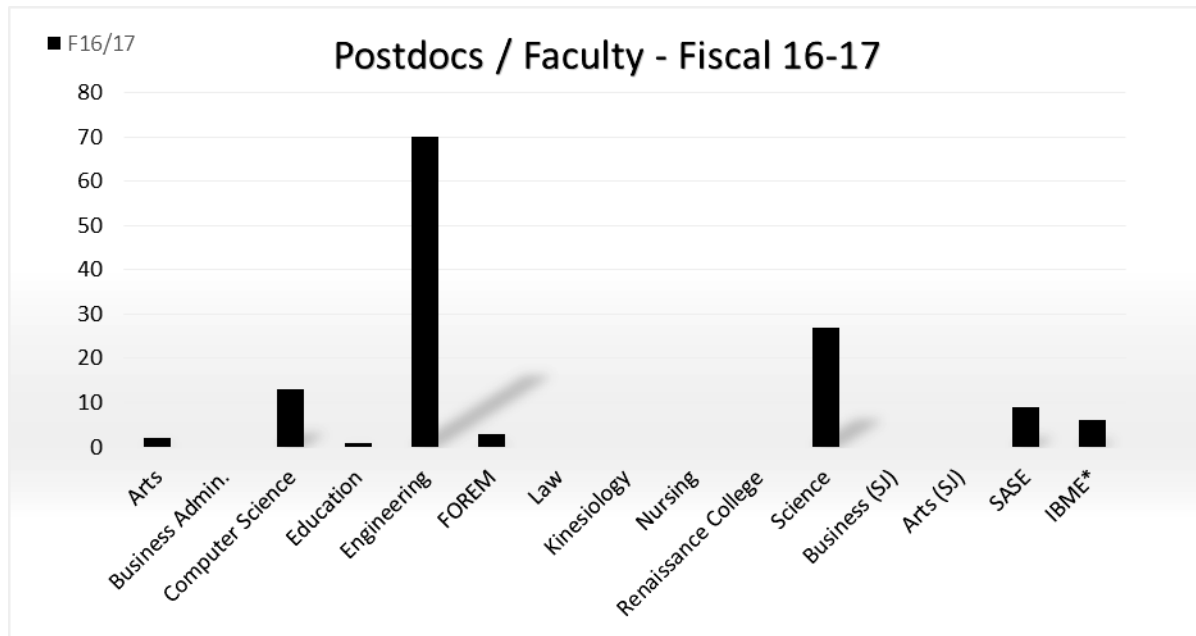

Postdoctoral Fellows—Faculty

The following two diagrams show the number of post-docs across all faculties for F17-18 and F16-17, with highest numbers in Engineering and Science for both years. To view the history of the Postdoctoral Fellows, please visit the refreshed [Postdoctoral Program](#) website.

There were 139 Postdoctoral Fellows at the university in F2017-18 compared to 131 in F2016-17.

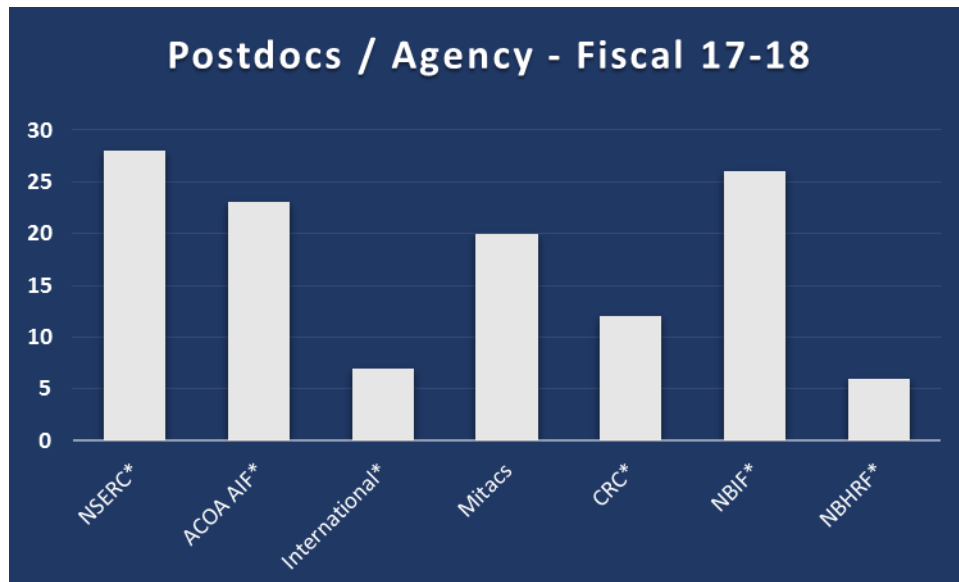

There were 131 Postdoctoral Fellows at the university in F2016-17 compared to 137 in F2015-16

*IBME—Institute of Biomedical Engineering

Postdoctoral Fellows—Agency

The following 2 diagrams depict the top 7 funding agencies who have contributed either in full or in part to Postdoctoral Fellowships at UNB in 2016-17 and 2017-18

*NSERC—Natural Sciences and Engineering Research Council of Canada

*ACOA—Atlantic Canada Opportunities Agency

*International Scholarships/Fellowships

*CRC—Canada Research Chair

*NBIF—New Brunswick Innovation Foundation

*NBHRF—New Brunswick Health Research Foundation

Research Expenditures

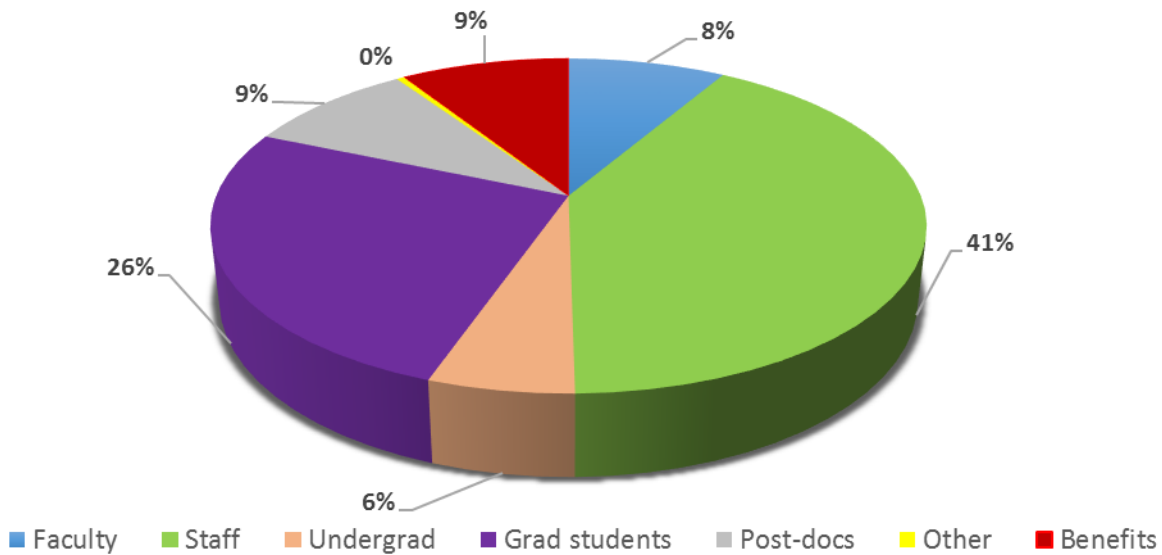

The majority of the research funding received by UNB goes back into the New Brunswick economy through salaries. In F2016-17, \$19.7 million (51%) was spent on Post-doc, Graduate student and non-student salaries.

Research Expenditures UNB 2016-2017

The \$19.7M (51%) salary portion of the Research Expenditures pie chart (above) is broken down as per the following diagram:

Salary Breakdown F16-17 Research Expenditures

Grad Student Success Stories

The inaugural Bud and Peggy Bird Scholarship for wild Atlantic salmon research

Canadian Rivers Institute (CRI) student Antóin O’Sullivan, PhD candidate in the Faculty of Forestry and Environmental Management at the University of New Brunswick Fredericton campus won the inaugural Bud and Peggy Bird Scholarship for wild Atlantic salmon research, and the Arthur Van Slyke graduate scholarship for applying statistics to forestry, during 2017.

Antóin went to school in Limerick, Republic of Ireland, and later attended Napier Edinburgh University where he graduated with a degree in civil engineering. He then graduated from Engineering Geomorphology at the University of Sussex, Brighton.

He came to the [CRI](#) at UNB Fredericton in 2015 to begin his PhD with Dr. Allen Curry, studying how landscapes shape rivers and regulate their temperatures, and then how these riverscapes create habitats for Atlantic salmon. He is spending many hours on the Miramichi River from headwaters to the mainstem recording water temperatures and searching for salmon. He also uses >500km of thermal infrared imagery and new hyperspectral cameras on drones to create very detailed, 3-dimensional habitat maps where salmon are located.

Antóin is also working closely with the industry to help them develop tools to better manage forestry activities to protect the special temperature refugia that are becoming ever increasingly, critical habitats for wild Atlantic salmon.

Recent doctoral graduates from the Department of Sociology

Two recent doctoral graduates from the Department of Sociology are showcasing their new qualifications. Dr. Kathryn Asher has moved from her SSHRC Bombardier funded doctoral studies into employment with an interest group specializing in studying food consumption and animal welfare. Dr. Alekya Das won the QE Diamond Jubilee Scholar Program funding, and is currently travelling in the region of Dehli to examine the [Jindal Centre for Social Innovation & Entrepreneurship](#) (JSIE) activities as it regards to women empowerment and health impact.

Lillian MacNeill, Department of Psychology

Ms. MacNeill, Department of Psychology, UNB Saint John is completing her PhD in Experimental Psychology but she is also a mom to a seven month old baby boy. Just back from maternity leave, she has jumped with vigor into her data collection exploring client experiences receiving treatment for opioid use disorder. This research would not be possible had she not been successful in getting a \$17,000 grant from [MindCare New Brunswick!](#)

Grad Student Success Stories

Vanessa Johnson, Masters student, Faculty of Education

Master of Education student Vanessa Johnson came to UNB in 2017, in order to work with Alan Sears (Education) and Lee Windsor (History). Her research focuses on how the Royal Newfoundland Regiment's experiences at Beaumont-Hamel, France during the 1916 Battle of the Somme are represented at three public education sites: Newfoundland's The Rooms, the Canadian government-maintained memorial in France, and the British National Archives.

Supported by a SSHRC fellowship, a [Pam and John Little Overseas Scholarship](#), a New Brunswick Innovation Foundation (NBIF) award, and a Magee-Third Century Postgraduate Merit Award, Vanessa will begin her travels to these sites this spring. At each site, she will examine exhibits, participate in guided tours, and conduct interviews with curators and others who work at the sites, as well as visitors, to gain insight into the similarities and differences among the dominant narratives and interpretations of the Newfoundland Regiment's experiences at Beaumont-Hamel.

Alexander Graham Bell Canada Graduate Scholarships Doctoral

Faith Penny, a PhD student with Dr. Scott Pavey, was awarded an Alexander Graham Bell Canada Graduate Scholarships Doctoral from the Natural Sciences and Engineering Research Council (NSERC). This scholarship was accompanied by additional funding from the School of Graduate Studies, the New Brunswick Innovation Foundation (NBIF) and a Vaughan fellowship to support her research. Faith's graduate work utilizes cutting edge RNAseq technology to help understand the processes underlying responses to environmental factors in anadromous fishes.

Yumi Araki, MScE student in Civil Engineering

Yumi Araki is a MScE student in the Department of Civil Engineering. Her area of research is structural health monitoring of cable-stayed bridges. Collaborating with the New Brunswick Department of Transportation and Infrastructure ([NBDTI](#)), she evaluated a case-study of a cable-stayed bridge. Yumi has received the Esterbauer Civil Engineering Graduate Award, New Brunswick Innovation Foundation (NBIF) scholarship, and School of Graduate Studies Student Travel Award to support her research and conference presentations.

Genesis Infante awarded David M. Armstrong Doctoral Fellowship

Genesis Infante is a fourth year PhD student in the Chemistry Department at UNB Fredericton. He was awarded the David M. Armstrong Doctoral Fellowship (\$25 000/year for 3 years). As part of the [Fisler Research Group](#), Genesis explores the synthesis of a class of organic molecules that are typically difficult to access via standard techniques. By combining computational simulations and conventional chemistry techniques, he studies the accessibility of unique molecules that have applications in the materials and pharmaceutical industries. Genesis has recently published his first paper as lead author, and he regularly communicates his research results to the National and International chemical communities at the [Canadian Chemistry Conference and Exhibition](#), which he has attended annually since 2015.

Grad Student Success Stories

Seasonal migration of American lobsters

Over the past few years, Bryan Morse (recent PhD graduate) and Patricia Hanley (MSc candidate), both in the Department of Biological Sciences at UNB SJ, have been studying the seasonal migration of American lobsters using pop-up satellite archival tags. They have tagged 13 large egg-bearing females in the shallow waters off Grand Manan, at the mouth of the Bay of Fundy, and recorded information on the depth and temperature these lobsters experienced during their shallow-to-deep (~20-200 m) migrations in the fall and deep-to-shallow migrations in the spring, while brooding their embryos. This information is relayed to the researchers via satellite, when the tag rises to the surface following its programmed detachment from the female.

In February 2018, one of their tags was found on a beach in Scalloway, in the Shetland Islands of the United Kingdom, presumably after catching a trans-Atlantic ride on the Gulf Stream! The tag was found by a beachcomber, who brought it to Mark Hamilton at the NAFC Marine Centre of the University of the Highlands and Islands, where it created a bit of a [buzz](#). The tag is on its way back home, and hopefully holds additional information on the route it took during its two-year journey drifting across the Atlantic!

L-R: Brent Wilson, Patricia Hanley, Marie-Josée Maltais, Bryan Morse

Sarah Mary Filiatreault, Master of Nursing program

Sarah has practiced as a registered nurse for over 15 years, with a career in critical care spanning three continents (Canada, Australia, and the United Kingdom). She believes her strong clinical background has given her the experience and insight to ask relevant and meaningful research questions. Her specific area of interest is the development, validation, and evaluation of evidence-based measures of quality care in the emergency department. Thus far in her Master of Nursing program, Sarah has successfully published an evidence synthesis: "An umbrella review of clinical practice guidelines for the management of patients with hip fractures and a synthesis of recommendations for the pre-operative period" in the *Journal of Advanced Nursing*. This evidence synthesis informed the development of a set of quality measures relevant to the emergency department. For her thesis research she plans to test the feasibility of using this set of quality measures using clinical data from one tertiary care centre in New Brunswick. She hopes this work

will not only provide regional stakeholders with information to inform decisions about the quality of care in the emergency department, but also provide her with the foundation for a program of research she can continue to build on in her PhD studies. Sarah has had the opportunity to present her work to date at one regional conference (New Brunswick Health Research Foundation Conference), and has been accepted to present at one national conference in May (Canadian Association for Health Policy and Research Conference). Her passion for health policy and ethics is also evidenced by her involvement as the student representative on the Faculty of Nursing Research Ethics Committee. For the 2017-2018 academic year, Sarah has also been successful receiving: 3 scholarships, 2 bursaries, and 2 travel awards.

**Grad Student Tri-Council
Awarded in 2017/18 Academic Year**

 NSERC—Natural Sciences and Engineering Research Council of Canada
 SSHRC—Social Sciences and Humanities Research Council
 CIHR—Canadian Institutes of Health Research

Grad Student Awards (page 1 of 9)

Name	Award / Prize Title	Description
Brittany Rioux, Faculty of Kinesiology	Rising Star Award	Ms. Rioux is a Masters student who received the NBHRF Rising Star Award. Dr. Danielle Bouchard and Dr. Martin Sehechal supervised Ms. Rioux.
Dipsikha Biswas, PDF	Rising Star Award	Dr. Biswas is a Post-Doc Fellow who received the NBHRF Rising Star Award. Dr. Thomas Pulinilkunnil is her supervisor.
Jordan Bartlett, PhD candidate	Rising Star Award	Mr. Bartlett is a Doctoral candidate who received the NBHRF Rising Star Award. Dr. Thomas Pulinilkunnil is his supervisor.
Aaron Tabor, Masters student	Rising Star Award	Mr. Tabor is a Masters student who received the NBHRF Rising Star Award. Dr. Erik Scheme is his supervisor.
Jason Roberston, PhD candidate	Rising Star Award	Mr. Robertson is Doctoral candidate who received the NBHRF Rising Star Award. Dr. Erik Scheme is his supervisor.
Ahmed Shehata, PhD candidate	Rising Star Award	Mr. Shehata is Doctoral candidate who received the NBHRF Rising Star Award. Dr. Erik Scheme and Dr. Jon Sensinger are his supervisors.
Daniel Bluestein, PDF	Rising Star Award	Dr. Bluestein is a Post-Doc Fellow who received the NBHRF. Rising Start Award. Dr. Jon Sensinger is his supervisor.
Anthony McCaffrey, Dept. of Physics	International Union of Radio Science (URSI) young scientist award	Anthony McCaffrey (Graduate student in the Physics Department) will receive this prestigious award and present his work at the URSI Atlantic Radio Science Meeting being held at Gran Canaria during May 28-June 1, 2018. Mr. McCaffrey was one of the two Canadians to receive this award. He was the recipient of Dr. David Armstrong Scholarship.
Yvonne Anisimowicz, Dept. of Psychology	Arts Assistantship	
Yvonne Anisimowicz, Dept. of Psychology	New Brunswick Innovation Foundation (NBIF) Alternate	New Brunswick Innovation Fund Award - Alternate
Jordan Best, Dept. of Psychology	NBIF Alternate	New Brunswick Innovation Fund Award - Alternate
Frances Churcher, Dept. of Psychology	Arts Assistantship	
Frances Churcher, Dept. of Psychology	NBIF - SI	New Brunswick Innovation Fund Award - Social Innovation
Lauren Cormier, Dept. of Psychology	Arts Discretionary Award	
Lauren Cormier, Dept. of Psychology	NBIF - SI	New Brunswick Innovation Fund Award - Social Innovation
Jeff Foshay, Dept. of Psychology	Doctoral Tuition Award	
Jeff Foshay, Dept. of Psychology	NBIF Alternate	New Brunswick Innovation Fund Award -Alternate
Mandy Fulton, Dept. of Psychology	Department of Psychology Discretionary Award	Awarded for scholarly merit of research
Mandy Fulton, Dept. of Psychology	Faculty of Arts Discretionary Award	Awarded for scholarly merit of research
Mandy Fulton, Dept. of Psychology	School of Graduate Studies Discretionary Award	Awarded for scholarly merit of research
Catherine Gallagher, Dept. of Psychology	Board of Governors Merit Award for Graduate Studies	Awarded to present research at a scientific conference.
Catherine Gallagher, Dept. of Psychology	Maecenas Graduate Scholarship	Awarded based on academic achievement to outstanding graduate students at UNB.
