Safe Spot is a quarterly newsletter written and distributed by the Environmental Health and Safety Office

Orientation and Your UNB Safety Card

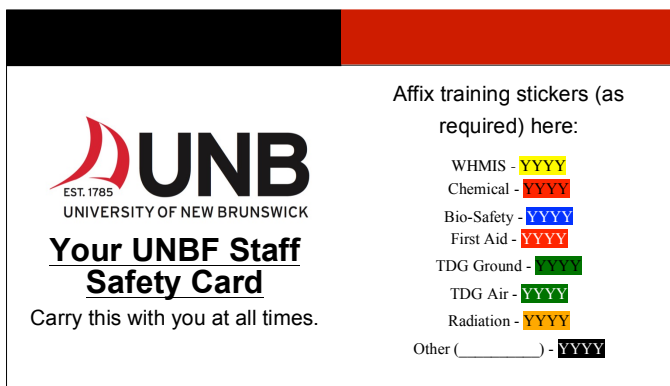

As part of our ongoing commitment to improving safety and education on campus, everyone has received an Orientation Package by email. After reading and understanding all items contained therein, employees will pick up their UNB Safety Card at their department office.

The new approach to orientation will ensure that all members of our community are informed of their responsibilities, and will set expectations with regard to ongoing training during their time at UNB.

The package marks the beginning of each person's safety training at UNB; covering many topics and FAQs of a new employee, and directing them to seek further instruction and training from their supervisor as required.

The package also offers an opportunity to distribute information to those already at the university; not only to provide a refresher, but also to inform those who may not be familiar with changes on campus and in New Brunswick.

The UNB Safety Card (example below) will allow for easy identification of the training a person has received, and provide a place to affix your training stickers for quick reference.

ONLINE Accident Report Form

We are pleased to announce that with the support of ITS, the EHS office has made the Employee and Student Accident Report Form available online:

<https://es.unb.ca/apps/accident-report/>

This report must be completed any time a person is injured, or near injured on campus.

New Fire Extinguisher Training

This summer, EHS began offering revamped and FREE fire extinguisher training on campus which makes use of a live fire (in a fire pan) and an 'off the wall' extinguisher.

This training should provide a true to life fire-fighting experience, and will reinforce previous training methods.

Upcoming Activities

Training sessions available:

- Fire Extinguisher Training – By request
- Radiation Safety Training – By request

Waste Pick-ups:

- Regular Hazardous Waste – October

*The Environmental Health and Safety Office is a resource available to the UNB Community.
Please never hesitate to seek help or advice.*
