

PRIVACY SECURITY TRUST 2008

SIXTH ANNUAL CONFERENCE ON
PRIVACY, SECURITY AND TRUST

OCTOBER 1-3, 2008 DELTA FREDERICTON
FREDERICTON, NEW BRUNSWICK, CANADA

PRIVACY, SECURITY AND TRUST - ENABLING INNOVATION

General Chair

Ali Ghorbani
University of New Brunswick, Canada

Program Co-Chairs

Rei Safavi-Naini
University of Calgary, Canada

Larry Korba
National Research Council, Canada

Steve Marsh
National Research Council, Canada

Workshop and Tutorial Chairs

Mohammad Zulkernine
Queen's University, Canada

Hongyu Liu
National Research Council, Canada

Publication Chair

Liqiang Geng
National Research Council, Canada

Publicity Chair

Patrick Hung
*University of Ontario Institute of
Technology, Canada*

Conference Manager

Greg Sprague
National Research Council, Canada

Web Chair

Iliia Goldfarb
National Research Council, Canada

Call for Papers

The 2008 International Conference on Privacy, Security and Trust (PST 2008) is the SIXTH such annual conference focusing on PST technologies. PST 2008 will be affiliated with IFIP WG11.11. New technologies and new applications are not likely to be widely adopted until they can demonstrate that the security of the underlying ICT infrastructure and the privacy of the information being processed are fully protected. Only then will users trust and therefore use these innovations and then, and only then, will the developers and society as a whole reap the benefits of the innovation. PST 2008 provides a forum for researchers world-wide to unveil their latest work in privacy, security and trust and to show how this research can be used to enable innovation and defeat the "dark side" of the Internet. The theme of PST 2008 is "PST - Enabling Innovation." As in the past, PST 2008 will continue to feature high-quality research papers, whose topics include, but are *NOT* limited to, the following:

- Privacy Preserving/Enhancing Technologies
- Critical Infrastructure Protection
- Identity and Trust management
- Network and Wireless Security
- Operating Systems Security
- Intrusion Detection Systems and Technologies
- Secure Software Development and Architecture
- Representations and Formalizations of Trust in Electronic and Physical Social Systems
- PST Challenges in e-Services, e.g. e-Health, e-Government, e-Banking, e-Commerce, and e-Marketing
- Information Filtering, Recommendation, Reputation and Delivery Technologies, Spam Handling Technologies
- Trust Technologies, Technologies for Building Trust in e-Business Strategy
- Observations of PST in Practice, Society, Policy and Legislation
- Digital Rights Management
- Human Computer Interaction and PST
- Implications of, and Technologies for, Lawful Surveillance
- Biometrics, National ID Cards, Identity Theft
- PST and Web Services/SOA
- Privacy, Traceability, and Anonymity
- Trust and Reputation in Self-Organizing Environments
- Anonymity and Privacy vs. Accountability
- Access Control and Capability Delegation

High-quality papers in all PST related areas that at the time of submission are not under review or have not already been published or accepted for publication elsewhere are solicited. All accepted papers will be published in the conference proceedings in hardcopy (to be printed by IEEE/ACM) and on-line (via the IEEE/ACM). There will be *Best Paper* and *Best Student Paper* awards. Submissions are encouraged as long papers (8-12 pages), short papers (4-5 pages) and posters. Paper submissions should be in the IEEE format, with the first page bearing authors' affiliations, names, and contact details. Details are at: <http://pstnet.unb.ca/pst2008>

Papers

Submission Deadline: May 12, 2008
Notification of Acceptance: June 30, 2008
Final Manuscript Due: August 1, 2008
Conference: October 1-3, 2008
