ATTENTION: POSSIBLE COVID-19 EXPOSURE

An individual with COVID-19 was at the Engineering Building at the University of New Brunswick on Monday October 11th and Tuesday October 12th.

If you have not been contacted directly by Public Health, then read carefully and follow the instructions provided in the table below. Guidance is based on your COVID-19 vaccine status (ie. not vaccinated, partially or fully):

<i>Vaccine status:</i>	No vaccination	Partial vaccination	Full vaccination
<i>Definition:</i>	Has not received any COVID-19 vaccine	Has received 1 dose more than 14 days prior to an exposure (note: those that have received 2 doses, but the 2 nd dose was received <u>less than</u> 14 days prior to an exposure, are considered partially vaccinated)	Has received 2 doses, with last dose received more than 14 days prior to an exposure
<i>Testing requirement:</i>	Recommend getting tested immediately Test again if symptom(s) develop; isolate while waiting for results	Recommend getting tested immediately Test again if symptom(s) develop; isolate while waiting for results	No immediate testing required Test if symptom(s) develop; no isolation required while waiting for results
<i>Isolation requirements:</i>	Not unless symptomatic Recommend wearing a mask, maintaining distance from others when in public.	Not unless symptomatic Recommend wearing a mask, maintaining distance from others when in public.	Not required
<i>Self monitoring for symptoms:</i>	Yes for 14 days from last possible contact with a case	Yes for 14 days from last possible contact with a case	Yes for 14 days from last possible contact with a case

Irrespective of your vaccine status, I urge you to [monitor for COVID-19 symptoms](#) for 14 days following the date indicate above. Should you develop **one or more** of the described

symptoms and **are not fully vaccinated**, you should isolate at home immediately and book a COVID-19 test.

Additionally, I would strongly urge you to [begin or complete your COVID-19 immunization](#), if you have not done so yet. This will greatly reduce your risk of infection and may prevent you from being isolated in the future if you are re-exposed.

For any questions related to this matter, you may reach a member of the communicable disease team at your local Public Health office.

I thank you for your cooperation in helping us to keep New Brunswickers safe from COVID-19.
