The Calendar is available in electronic form on the UNB website: www.unb.ca/academics/calendar/undergraduate/current/index.html
Important Notices

This Calendar is printed some months before the year for which it is intended to provide
guidance, and students are advised that matters dealt with in it are under continuing
review and revision. The content of this Calendar is subject to change without notice,
and every student accepted for registration in the University shall be deemed to have
agreed to any such deletion, revision or addition whether made before or after said
acceptance.

The University will make every reasonable effort to offer courses as required within
programs. Prospective students should note that admission to a degree or other
program does not guarantee admission to any given course except those specified as
required within that program. Students should select elective courses so as to ensure
that courses are taken at the most appropriate time within their schedu
le control of the
University of New Brunswick.

* Except for essential services, most university offices will be closed on the dates indicated as "University Holiday". Essential functions, for example, Security, Heating Plant and the Residences will be staffed and operational. Emergency maintenance may be arranged through the Security Department. A few departments and facilities such as the libraries, computer labs, Financial Services, Registrar’s Offices may offer some services on certain holidays. Those wishing to use such services on a holiday are advised to check with the specific department about operations for that day.*

Mayor of Saint John
His Worship, Don Darling
Executive Director of Alumni Affairs
Margaret Grant-McGivney
University Secretary (Secretary of the Board)
Sarah J. DeVarenne

MEMBERS APPOINTED BY THE LIEUTENANT-GOVERNOR-COUNCIL

- COOLING, Phyllis
- GRIBBONS, Tom
- HACHEY, Larry (Chair)
- HOYT, Janet
- KLOHN, Hans O.
- MORRISON, Paul
- PAUL, Gillian
- TINGLEY, Robyn (Vice-Chair)
- WILSON, Kelly
- TBA

APPOINTED BY ASSOCIATED ALUMNI

- BEDARD, Marc
- MALLORY, Norah
- REID, Penny
- SUTHERLAND-GREEN, Jennifer
- WOOLNOUGH, David
- YEATES, Brooke

APPOINTED BY THE BOARD OF GOVERNORS

- BAXTER, Brian
- BRITTAIN, Scott A.
- GRAVES-BROWN, Deanna
- PROSSER, Catherine
- SQUIBB, Wayne

ELECTED BY FACULTY MEMBERS, FREDERICTON

- ANDREWS, Jennifer
- BETTS, Norman
- HUSAIN, Viqar
- O’BRYNE, Nicole

ELECTED BY FACULTY MEMBERS, SAINT JOHN

- GOUD, Tom
- KIEFFER, Jim

APPOINTED BY THE NEW BRUNSWICK TEACHERS’ ASSOCIATION

- DALEY, George

ELECTED BY STUDENTS, FREDERICTON

- DU, Richard
- JARDINE, Chloe

ELECTED BY STUDENTS, SAINT JOHN

- PALMER, Samuel

GOVERNORS EMERITI

- FAIRWEATHER, Roxanne
- GANONG, David
- McCAIN, Kathryn
- O’BRIEN, David
- STEVENSON, David

CHANCELLOR EMERITUS

- CURRIE, Richard J.
SECTION A: PEOPLE AT UNB

FREDERICTON SENATE 2018-2019

EX-OFFICIO MEMBERS
The President: H.E.A (Eddy) Campbell
Vice President Academic (Fredericton): George MacLean
Vice President (Administration and Finance): Karen Cunningham
Vice President (Research): David MacGee
Vice President (Saint John): Robert MacKinnon
President, St. Thomas University: Dawn Russell

Dean of Arts: Joanne Wright
Dean of Business Administration: Devashis Mitra
Dean of Computer Science: Luigi Benedicenti
Dean of Education: Sharon Wahl
Dean of Engineering: Chris Diduch
Dean of Forestry & Environmental Management: Van Lantz
Dean of Graduate Studies: Drew Rendall
Dean of Law: John Kiefeled
Acting Dean of Nursing: Lorna Butler
Acting Dean of Renaissance College: Paul Howe
Acting Dean of Science: Gary Saunders
Assistant of Vice-President (Student Services): Mark Walma
Exec. Director of Associated Alumni: Margaret Grant-McGivney
Exec. Director of the College of Extended Learning: Ian Allen
Dean of Libraries (Fredericton): Lesley Balcom
Registrar (Fredericton): Shawna Bergin
Assoc. VP Academic (Learning Environment): Kathy Wilson
Secretary of the Senate: Sarah DeVarenne

FACULTY REPRESENTATIVES, ELECTED BY FACULTIES

Faculty of Arts
- BROWN, Jeffrey
- CANITZ, Christa
- HARDY, Nick
- HORNE, Christine
- SEARS, Matthew

Faculty of Business Administration
- ROY, Judy
- SHEPPARD, Reg

Faculty of Computer Science
- EVANS, Patricia

Faculty of Education
- KRISTAMANSON, Paula
- RANDALL, Lynn

Faculty of Engineering
- COLLINS, Frank
- ENGLEHART, Kevin
- TERVO, Richard

Faculty of Forestry and Environmental Management
- NEEDHAM, Ted

Faculty of Kinesiology
- EDWARDS, Jonathan

Faculty of Law
- MCEVEOY, John

Faculty of Nursing
- WEAVER, Kate

Renaissance College
- BACHVAROVA, Mira

Faculty of Science
- BENTON, J. Bruce
- CACIC, Branimir
- CALHOUN, Larry Calhoun
- MAYES, Charlene

Alumni Representative
- DELONG, Quinn

Library Representative
- SMYTH, Joanne

THE ELECTED FACULTY MEMBERS OF THE BOARD (FREDERICTON)
- ANDREWS, Jennifer
- BETTS, Norman
- HUSAIN, Viqar
- O’BRYNE, Nicole

TWO MEMBERS APPOINTMENT BY THE BOARD FROM THE MEMBERS OF THE BOARD EXCLUSIVE OF THE ELECTED FACULTY MEMBERS OF THE BOARD
- MALLORY, Nora
- COOLING, Phyllis

SIX FACULTY MEMBERS ELECTED AT-LARGE
- AMIRAULT, Debbi
- BRENNER, David
- HOLLOWAY, Gordan
- HUGHES, Julia
- O’SULLIVAN, Lucia
- WAUGH, Lloyd

TWO MEMBERS ELECTED BY AND FROM AMONG THE PART-TIME INSTRUCTORS AND LIBRARIANS
- KING, Sarah
- TBA

SIX STUDENT REPRESENTATIVES ELECTED AT-LARGE
- BALCOM, Ali
- CRETE, Sam
- HANZAL, Zakaria
- MANGUSSO, Grace
- SHRESTHA, Srijain
- SLAYTER, Jeremy

PART- TIME STUDENT REPRESENTATIVE
- TBA

GRADUATE STUDENT REPRESENTATIVE
- Liang, Kang
SAINT JOHN SENATE 2018-2019

EX-OFFICIO MEMBERS
The President (Chair of Senate):
H.E.A (Eddy) Campbell
Vice President (Saint John) (Vice-Chair of Senate):
Robert MacKinnon
Vice President Fredericton (Academic):
George MacLean
Vice President (Administration and Finance):
Karen Cunningham
Vice President (Research):
David Magee
Associate Vice President (Saint John):
Laurelle LeVert
Dean of Graduate Studies:
Drew Rendall
Acting Dean of Arts:
Dann Downes
Acting Dean Faculty of Business:
Rob Moir
Dean Faculty of Science, Applied Science & Engineering:
Michael Van Zyll de Jong
Dean of Libraries:
Lesley Balcom
Registrar (Saint John):
Wahkuna Lisik
Director Student Services:
Sheldon MacLeod
Secretary:
Sarah J. DeVarenne

FACULTY REPRESENTATIVES, ELECTED BY FACULTIES
Faculty of Arts:
- GALBO, Joe
- JEFFRYE, Leslie

Faculty of Business:
- DOIRON, Dan
- FLEET, Greg

Faculty of Science, Applied, Science & Engineering:
- HOULAHAN, Jeff
- STEWART, Connie

ALUMNI REPRESENTATIVE
- JOLLINEAU, Jill

ELECTED FACULTY MEMBERS OF THE BOARD
- GOUD, Tom
- KIEFFER, Jim

ONE MEMBER APPOINTED BY AND FROM MEMBERS OF THE BOARD EXCLUSIVE OF ELECTED FACULTY MEMBERS
- WILSON, Kelly

NINE FACULTY MEMBERS ELECTED-AT-LARGE
- ALDERSON, Tim (SASE)
- BACKMAN, Phil (SASE)
- BEST, Lisa (SASE)
- CHOPIN, Thierry (SASE)
- JONES, Miriam (Arts)
- LEWIS, JP (Arts)
- MARQUIS, Greg (Arts)
- LARIVEE, Cathy O'Brien (SASE)

ONE FULL-TIME LIBRARIAN, ELECTED BY AND FROM THE FULL-TIME LIBRARIANS
- ROSS, David

ONE MEMBER ELECTED BY AND FROM THE CONTRACT ACADEMIC INSTRUCTORS AND CONTRACT ACADEMIC LIBRARIANS (NON-VOTING PENDING AMENDMENT TO THE UNB ACT)
- MCNALLY, Jeff

THREE STUDENT REPRESENTATIVES ELECTED-AT-LARGE
- TBA
- TBA
- ROGERS, Kyle
SECTION A: PEOPLE AT UNB

OFFICERS OF THE UNIVERSITY

President and Vice-Chancellor:
H.E.A (Eddy) Campbell, BSc, MSc, PhD

Acting Vice-President (Research):
David Magee, BSc, PhD

Vice-President (Administration and Finance):
Karen Cunningham, CA, BComm

Vice-President Fredericton (Academic):
George MacLean, BA, MA, PhD

Vice-President (Saint John):
Robert MacKinnon, BA, MA, PhD

Associate Vice-President Academic (Learning Environment):
Kathryn Wilson, BN, MN, PhD

Associate Vice-President (Campus Planning and Property Development):
Barbara A.W. Nicholson, AANB, MRAIC

Associate Vice President (Human Resources and Organizational Development):
Peter McDougall, BA, MIR, CHRP

Associate Vice-President (Information Technology Services):
Terry Nikkel, BA, MLIS, MBA

Dean, Graduate Studies:
Drew Rendall, BSc, MA, PhD

Dean, Faculty of Arts:
Joanne Wright

Dean, Faculty of Business Administration:
Davashis Mitra, BA, PhD, CA, FCA

Dean, Faculty of Science:
Gary Saunders, BSc, MSc, PhD

Dean, Faculty of Computer Science:
Luigi Benedicenti, BEng, MACS, PhD

Dean, Faculty of Education:
Katherine Winslow, BSc, MS, PhD

Dean, Faculty of Engineering:
Chris Diduch, BScE, MScE, PhD

Dean, School of Graduate Studies (Assoc. Dean (UNBF)):
John Kershaw, BSc, MSc, PhD

Dean, School of Graduate Studies (Assoc. Dean (UNBSJ)):
Bruce MacDonald

Dean, Faculty of Forestry and Environmental Management:
Van Lantz, BA, MA, PhD

Dean, Faculty of Kinesiology:
Wayne Albert, BSc, MA, PhD

Dean, Faculty of Law:
John Kleefeld, BA, LLB, LLM

Dean, Faculty of Nursing:
Lorna Butler

Renaissance College (Acting):
Paul Howe

Saint John

Dean, Faculty of Arts:
Dann Downes

Dean, Faculty of Business:
Fazley Saddiq, BA, MA, PhD

Dean, Faculty of Science, Applied Science & Engineering:
Michael Van Zyll de Jong, BSc, MSc, PhD

Registrar (UNBF):
Lesley Balcom, BA, MLIS

Registrar (UNBSJ):
Wahkuna Lisik

University Secretary:
Sarah DeVarenne, BSc

University Treasurer:
Jennifer Morrison, CPA, CA

University Comptroller:
Larry J. Guitard, CPA, CA, BA

Assistant Comptroller:
Cindy Flann, BBA, CGA

DEANS OF FACULTIES

Fredericton

Faculty of Arts:
Joanne Wright

Faculty of Business Administration:
Davashis Mitra, BA, PhD, CA, FCA

Michael Van Zyll de Jong, BSc, MSc, PhD
**EMERITOUS HONOUREES**

**President Emeritus:**
John McLaughlin, BScE, MScE, PhD, PEng

**Vice-President (Academic) Emeritus:**
Robert E. Burnidge, BScE, MS, PhD, PEng

**Vice-President (Finance and Administration) Emeritus:**
James O’Sullivan, BSc,E.L.L.D

**Vice-President (Research and International Cooperation) Emeritus:**
Frank Wilson, BScE, MScE, PhD, FCAE, FCSCPE, FEIC, PEng

**NOTE:** Only living Emeritus Honorees are listed.

### Professors and Dean Emeriti:
- Christina, John A., BEng, PhD, FICE, FCSCPE, FEIC, PEng, CEng
- Davis, Gwendolyne, BA, CertEd, MA, PhD
- Ericson, Penelope, BSCh, MScN
- Faig, Wolfgang, Dipl Ing, MScE, Dring, PEng
- Kent, Peter C., BA, MA, PhD
- Methven, Ivan, BScF, PhD
- Nair, K.P.K., BE, MTech, PhD
- Small, Marian, BA, MA, EdD
- Stevenson, Christopher, BSc, MA, MPE, PhD
- Unger, Israel, BSc, MSc, PhD
- Wasson, W. Dana, BSc(EE), SM, PhD

### Professors Emeriti:
- Acheson, T. William, BA, MA, PhD - History
- Alcoe, Shirley, BA, BEd, MA, Med, EdD - Nursing
- Allarduce, Gilbert D., BA, MA, PhD - History
- Arcules, Francisco, BA, MS, PhD - Administration
- Askansas, Viktor, BA, MA, MBA - Administration
- Austin, Diana, BA, MA, MPhil - English
- Bonham, David - BSc, MEng, PhD, PEng - Mechanical Engineering
- Bottomley, Frank, BSc, MSc, PhD, DSc, FCIC - Chemistry
- Bray, Dale I., BScE, MScE, PhD - Civil Engineering
- Bremner Theodore W., BScE, MSc, DIC, PhD, FCSE, FACI, PEng - Civil Engineering
- Brown Wallace, BA, MA, PhD - History
- Buckner, Phillip, BA, PhD - History
- Cameron, Ann C., BA, MA, PhD - Psychology
- Cameron, Ian R., BSc, PhD - Physics, Saint John
- Campbell, Gail, BA, MA, PhD - History
- Carusetta, Ellen
- Chrzanowski, Adam J., BScE, MScE, D Eng - Geodesy & Geomatics Engineering
- Clark, David, BSc, MA, MPhil - Psychology
- Cockburn, Robert, Hood, BA, MA - English
- Croll James C., BA, BA, BEd, BA, MA - Education
- Davies, Huw, BSc, PEng - Mechanical Engineering
- Doraiswami, Rajamani, BEE, MEE, PhD - Electrical & Computer Engineering
- Edwards, Vivianne, M, BA, BEd, MED - Education
- Eppert, Franz, Wissenschaftliche Profungen fur das Lehramt an den Universitat Scholen, Zweite Philologische Staatsprufung, DPhil - Culture and Language Studies
- Fritz, Jane, BSc, MSc, DPhil - Computer Science
- Garey, Lawrence, BSc, MA, PhD - Computer Science & Applied Statistics, Saint John
- Gentreau, Paul E., BA, MA, PhD - Psychology - Saint John
- Gibbs, Robert J., BA, MA, PhD - English
- Gibson, Cheryl, BN, MScN, PhD - Nursing
- Grein, Friedrich, BSc, MSc, PhD, FCIC - Chemistry
- Guetty, Grace, BN, MA, PhD - Nursing
- Gupta, Rameshwar, BSc, MSc, MA, PhD - Statistics
- Hamilton, Angus C., BASc, MASC - Surveying Engineering
- Hamilton, Willis D., BA, MA, BEd - Education
- Hawkes, Robert E., BA, BEd, MA - Education
- Hussain, Esam, MA, BSc, MSc, PhD, PEng
- Jollineau, R. Wayne, CS, BSc, MBA, CMA - Business, Saint John
- Kaiser, Reinhold, BSc, MSc, PhD - Physics
- Kealey, Gregory
- Kealey, Linda
- Krause, Margarida, Licenciature, MSc, PhD - Biology
- Kurz, Bernd - Computer Science
- Leavitt, Robert - Education
- Leckie, Irene, BScN, MScN - Nursing
- Lees, Ronald, BSc, MSc, PhD - Physics

### Librarian Emeriti:
- Crocker, Anne, BA, BLS
- Gunn, Gertrude E., BA, MA, MLS, PhD
- Keyes, John, BA, MLS

### Registrar Emeritus:
- Beckett, Barry, BSc, Dip Ed, PhD

### Governor Emeriti:
- O’Brien, David, BBA, LLB, MSc, QC
- Vanier, David, BBA, MBA

### Chancellor Emeritus:
- Currie, Richard J., OC, CBHF, MBA, LLD, PEng
### Recipients of the Dr. Allan P. Stuart Memorial Award for Excellence in Teaching

The Associated Alumni was founded in 1862 for “the advancement of the interests of the University of New Brunswick by all honourable means.” Its membership consists of all those who have attended at least one semester at UNB and numbers over 40,000.

**The Alumni Council**

Each spring the membership of the Associated Alumni elects a representative group of individuals to act as a council for the Alumni Association. This council meets at least three times a year and conducts the business of the Associated Alumni through the various committees. The Office of Alumni Affairs, an office of the University, works with the Council of the Associated Alumni in attaining its objectives.

**Associated Alumni Objectives**

1. The Association strives to enhance the image of the University in the eyes of the general public.
2. The Association is a liaison between the University administration and the student body.
3. The Association fosters good relations among the student body, the Fredericton and Saint John communities and the Alumni Association.
4. The Association endeavours to make students’ stay at UNB as rewarding as possible, developing an “Alumni conscious” student body.
5. The Association assists the University in its fundraising activities with (a) governments, (b) private corporations and (c) individuals, be they Alumni or others.
6. The Association encourages, through personal contact and through its scholarship program, top-quality prospective students to attend UNB and maintains an interest in their welfare during their University careers.

**Associated Alumni Council**

**EXECUTIVE**

- President: Jill Jollineau, Med’02 - SJ, Saint John, NB
- Vice-President: Peter Syroid, BScME’98, ME’98, DTME’98, MBA’03 - Fredericton, NB
- Treasurer: Robert Sharpe, BScCE’95, MScCE’02, Fredericton, NB
- Secretary: Karen Taylor, BA’72, MPA’88, Woodstock, NB
- Past President: Brooke Yeates, BA’95 - Sudbury, ON

**REPRESENTATIVES TO BOARD OF GOVERNORS**

- David Woolnough, MSc’70, PhD’74, Fredericton, NB (June 2021)
- Penny Reid, BBA’91, Oakville, ON (June 2019)
- Brooke Yeates, BA’95, Sudbury, ON (June 2020)

**ELECTED COUNCILLORS**

- Quinn DeLong, BA’05, Fredericton, NB (June 2019)
- Weldon LeBlanc, BBA’86, West Kelowna, NB
- Gary Leslie, BBA’85, BPE’88, Saint John, NB
- Nathan Munroe, BBA’12, MBA’14, Saint John

**APPOINTED COUNCILLORS**

- Travis Bergin, BScCE’02, D-TME’02, MScCE’04, Fredericton, NB
- Rory Barnable, LLB’01, Toronto, On
- TBA

**STUDENT REPRESENTATIVES**

- Benjamin Palmer, Fredericton, NB
- Sam Palmer, Saint John, NB

**OTHER MEMBERS**

- UNB President: Eddy Campbell, Fredericton, NB
- President of the Associated Alumni: Jennifer Sutherland-Green
- LLB’99, Fredericton, NB
- Association Executive Director: Margaret Grant-McGivney, BScCE’88, New Maryland, NB

**Associated Alumnae**

The Associated Alumnae was founded in 1910 and incorporated in 1919. The object of the Association is to promote, directly and indirectly, the educational and financial interests of the University, especially as such interests are related to the women graduates and undergraduates of the University. Membership in the Associated Alumnae consists of women graduates and former women students of the University who have successfully completed on year.

The Association furnished and equipped UNB’s first residence for women, the Maggie Jean Chestnut House, generously donated to the Alumnae by Lord Beaverbrook. In May 1952, this residence was transferred to the University. The Alumnae Memorial Library, located in Lady Dunn Hall, and libraries in other residences for women students, were established and are maintained by the Association.

The Associated Alumni annually awards several scholarships to women students, including: an Entrance Scholarship in Education named in honour of Muriel Farris Bird; the Zula V. Hall Scholarship, awarded to a woman student entering third-year Physical Education, the Marion Fleet Rogers Scholarship to a woman student entering third year at UNB Saint John; and an award for part-time students. The total annual value of all scholarships provided exceeds $18,000. Two prizes, the Dorothy Elson Prize and the Agnes Grey Wilson Prize, are also donated by the Associated Alumnae.

**Associated Alumnae Council**

**EXECUTIVE**

- President: Jennifer Sutherland-Green, LLB’99, Fredericton, NB
- Past President: Norah Mallory, BA’69, Fredericton, NB

the 1790s, it functioned less as a college and more as a symbol of New Brunswick and such sentiments seemed to recall the recent American notion in the eighteenth century. Unfortunately, times were changing in New Brunswick and such sentiments seemed to recall the recent American Revolution. Therefore, while the academy had commenced operations by the 1790s, it functioned less as a college and more as a symbol of Carleton's governmental policy for the promotion of twin tenets of the Anglican religion and the British Constitution. As the provincial leaders of the opposition dismissed the academy of as nothing but a "country school," Carleton realized he must more actively and effectively offer its support. On 12 February 1800, over the signature of Provincial Secretary Jonathan Odell, the College of New Brunswick received the Provincial Charter, the first college in Canada to be so honored. It was intended that the academy would serve as the College's preparatory school and that the two would be governed by a Common College Council drawn almost entirely from the ranks of a governmental hierarchy. As for the professors, they were all to be Anglicans.

For a number of years, the history of the future University continued to lie with the academy. A series of masters came and went until 1811 when the Reverend James Somerville, an ex-patriate Scotsman, took the position of Principal Preceptor. There can be no question that Somerville, a graduate of the University of Aberdeen, was a superb teacher who guided the Board of Council and New Brunswick with their first chance to have a real college. In 1820, Somerville, was formally named president of the College of New Brunswick and, in April 1822, he held the very first college classes in Fredericton. This demonstrated officially that the institution had taken on a firmer footing. A new Charter for "Brunswick College" was proposed in 1823, asking for permanent and substantial funding directly from the King. Lieutenant Governor Sir Howard Douglas quickly threw his influence behind the scheme. Douglas viewed the welfare of the College to be of prime importance to the success of New Brunswick. To this end, he pressed for a Royal Charter and urged the erection of a fine stone building to house the institution.

Three designs for the building were submitted in 1825 to the Council, which selected that drawn J.E. Woolford. There was, of course, a great deal more involved in the transformation of the neglected College of New Brunswick into King's College, Fredericton. Douglas spent the next four years keeping a wary eye on the growth of his "child. In 1826, having chosen the site for the building himself, Douglas laid the cornerstone. In December 1827, largely through Douglas' efforts in Great Britain, King's College, Fredericton, received a Royal Charter nearly identical to that granted to King's College, Toronto. Before allowing the new Charter to take effect, the College of New Brunswick performed one final, official act, on 21 February 1828, by awarding degrees to its first and last three graduates.

On 1 January 1829, King's College and the structure (now known as Sir Howard Douglas Hall, formerly referred to as the Old Arts Building) erected to house it were officially opened. In one way, King's was a failure. In its thirty-year tenure it graduated fewer than 125 students, in large measure because its classical curriculum was not well suited to the needs of New Brunswickers. Yet, it was at King's that many of the courses offered in later years by the University of New Brunswick had their start. In 1834, for example, three of the professors proposed admitting "young men of good abilities and diligence" to a special, one-year course entitled each to a teacher's certificate. Even after the creation of the Provincial Normal School this kind of university training continued sporadically and in various forms until the Faculty of Education emerged in the twentieth century.

It was also in the 1830s that King's introduced "public lectures," more formally known today's study classes. These early lectures dealt with subjects such as geology, chemistry, physics and astronomy. Much to the disgust of one professor, James Robb, some of his lectures at the College were open to the general public, including the young women of Fredericton. Some years later, Mr. McMahon Cregan, an engineer from England who was brought to New Brunswick on a contract for the European and North American Railway, offered "instruction of a really practical and useful character" in the field of engineering to students and non-students alike.

King's spent several tumultuous periods in conflict with members of the New Brunswick Legislature. Ostensibly, they were arguing over the issues of the curriculum and religion but the real issue was probably the cost of higher education. Fortunately, King's did have defenders, in particular, the elegant debater William Needham who, in the face of threats to burn down the College or to turn it into an agricultural school, made an impassioned speech that saved the institution from such ignominious fates. Through the efforts of Needham, Lieutenant Governor Sir Edmund Head and a few others, the Legislature was persuaded to reform rather than destroy the College. On 13 April 1853, the act creating the secular, provincial University of New Brunswick was passed.

At first, the UNB charter seemed to promise more than the University could deliver but, slowly, under the guidance and tutelage of several innovative professors, both the University's attitude and curriculum blossomed. In 1885, UNB began offering a certificate to those women who performed well in entrance (matriculation) examinations, though women were not permitted to enrol at the University. In 1885 a brilliant young woman named Mary Kingsley Tibbits met head-on the University's stricture against women and, in 1886, became one of UNB's first, regularly admitted, woman students. The racial barrier had been broken earlier with the non-controversial entry of you Arthur St. George Richardson, a black who came to UNB via Bermuda and Saint John. Gradually, the University expanded its educational horizons. In 1867 the four-year program was introduced and in 1891 a Bachelor of Science degree was added to complement the traditional BA. Just after the turn of the century, when Ceci Charles Jones

**FREDERICTON CAMPUS HISTORY**

As the American Revolutionary war drew to a close, thousands of Loyalists gathered in New York City to await transportation to homes in other British Colonies. Among these Loyalists were Charles Inglis, a former interim President of King's College, New York (Columbia University); Benjamin Moore, later President of Columbia; and Jonathan Odell, minister, poet and pamphleteer. These men were the visionaries of their day. In the midst of war, privation and exile, they drew up a plan for the future education of their sons in the Nova Scotia wilderness. Recognizing that the new American nation would provide instruction only in revolutionary "Principles contrary to the British Constitution" and that the cost of an overseas education would be prohibitive, they urged the representatives of the British government to consider the "founding of a College...where Youth may receive a liberal Education" in such things as "Religion, Literature, Loyalty, & good Morals."

Initially, these gentlemen intended that the area of Nova Scotia have only one college. However, in 1784 when the Province of New Brunswick was created from a part of Nova Scotia, New Brunswickers began a clamour for their own school which led to the foundation of two of Canada's oldest institutions of higher learning - King's College, Windsor. Nova Scotia (now affiliated with Dalhousie University) and the academy which became the University of New Brunswick.

UNB began with a petition presented to Governor Thomas Carleton on 13 December 1785. Headed by William Paine, the seven memorialists asked Carleton to grant a charter of incorporation for an "academy of school or liberal arts and sciences," which they maintained would result in many "public advantages and...conveniences." In addition, the "principal Officers of disbanded Corps and other Inhabitants in and around the provincial capital of Fredericton asked that the Governor reserve a substantial grant of land in support of this academy.

Despite the approval of Carleton, it was many months before the academy opened. During this period a draft charter was written, based on the 1754 Charter of King's College, New York, urging that the college never "exclude or restrain any Person...of any religious Denomination, Sect, or Profession...from equal..Liberties, Privileges, [or] Degrees" - a very liberal notion in the eighteenth century. Unfortunately, times were changing in New Brunswick and such sentiments seemed to recall the recent American Revolution. Therefore, while the academy had commenced operations by the 1790s, it functioned less as a college and more as a symbol of Carleton's governmental policy for the promotion of twin tenets of the

took over as Chancellor of the institution, whose title subsequently was changed to that of President, the foundations were laid for three major faculties: Law, Engineering and Forestry.

The post-World War I era brought the first great expansion of the physical facilities of the campus. In 1920, UNB consisted of the Sir Howard Douglas Hall (Old Arts Building), the Science Building, the small Observatory, a small gymnasium and the Dominion Entomological Laboratory. By 1931, Memorial Hall, a modern Library and a Forestry and Geology Building had been added. The first university residence was a gift from Lord Beaverbrook who, growing up in New Brunswick as William Maxwell Aitken, studied law, and over the succeeding years developed an increasing interest in the welfare of the university. Other buildings brought into being through his efforts and those of his family were the Lady Beaverbrook Gymnasium, Aitken House, Ludlow Hall, for the Faculty of Law, and the Aitken Centre. In 1947, his Lordship became the University’s Chancellor, to be succeeded by his son, Sir Max Aitken, in 1966 and in turn by Lady Violet Aitken, the wife of Sir Max, who served until 1993.

After World War II, returning veterans pushed registration to over 770 in 1946, almost double the number enrolled in 1941. With this increased student population came a commensurate increase in faculty and course offerings, and a surge of building activity from 1953 to 1977 that transformed the campus. The year 1964 brought three important developments. Teachers’ College (the old Provincial Normal School) was relocated on the campus, to become incorporated into an enlarged Faculty of Education in 1973; St. Thomas University also relocated on campus, moving from Chatham and affiliating with UNB; and a second UNB campus was established in Saint John.

UNB reached the end of its second century as a major provincial and national institution, offering a wide range of graduate and undergraduate programs in administration, arts, commerce, engineering, forestry, law, nursing, physical education and science: the University enters its third century proudly treasuring its past and eagerly facing the challenges of the future.

SAINT JOHN CAMPUS HISTORY

The University of New Brunswick Saint John was established in September 1911 following the recommendation of the Royal Commission on Higher Education, chaired by the late Dr. John J. Deutsch of Queen’s University. The Deutsch Commission emphasized the need for facilities for higher education in this metropolitan community of over 100,000 persons.

During the first five years of operation, classes were offered in the first two years of degree programs in Arts and Science, Business, Engineering, Physical Education, Forestry and Nursing. Classes took place at various locations in the city of Saint John, including Beaverbrook House, formerly the home of the UNB Faculty of Law. In the fall of 1969, the new campus at Tucker Park was opened consisting of three buildings - Sir Douglas Hazen Hall, William Ganong Hall and the Ward Chipman Library Building. This site, proposed by the City Council as early as 1963, was originally bequeathed to the City of Saint John for park purposes. At the request of the City, the New Brunswick Legislature authorized the conveyance of a portion of this land for the new campus.

In 1975 the G. Forbes Elliot Athletics Centre was added to the physical plant. Since its opening, the versatile, well-equipped building has served the recreational needs of both the campus and greater Saint John communities. In 1985 the Jexx Canada Games Stadium was constructed on campus, and in 1986 the Thomas J. Condron Student Centre was opened.

A special feature of UNB Saint John is the fact that many of the permanent buildings on the campus are connected by a series of tunnels and walkways, allowing comfortable access to all facilities during inclement weather and the months of winter.

UNB Saint John now offers full four-year degree programs in Applied Management, Arts, Business Administration, Computer Science, Data Analysis, Economics, Education, Financial Mathematics, Health Sciences, Information Sciences and Science. Students now enroll in the first two years of Engineering programs on the Saint John campus, after which they would transfer to the Fredericton campus to complete the degree. The campus is also home to a number of Masters students whose research is contributing to regional, national, and international endeavours. In addition to the full-time enrolment, many of part-time students are now pursuing their studies at the Saint John campus.

FREDERICTON HISTORIC BUILDINGS

Burden Academy

As a Centennial project, the University brought to the campus and restored a one-room New Brunswick schoolhouse, located more than a hundred years at Burden in York County. The schoolhouse, located at the King’s College Road entrance, was officially opened in May 1967.

McCord Hall

McCord Hall located at the east entrance of the Sir Howard Douglas Hall (Old Arts Building), was once used as the University’s ice house. The nineteenth-century structure was restored in 1963 and named in honour of David T.W. McCord, the distinguished writer and former executive director of the Harvard University Fund Council, and honorary graduate of UNB.

The Neville Homestead

The Neville Homestead, a small white clapboard house on the east side of the campus, dates back to 1876. It was the home of Fred Neville, University groundskeeper for 42 years, who lived in the house from his birth in 1878 to his death in 1969. The Neville family first settled the land in 1850 with a purchase from Hon. William Odell. In its 84th year, the house was moved a short distance to its present location to make way for a new men’s residence, named to honour Mr. Neville. The Homestead now houses the Student Employment Service.

Sir Howard Douglas Hall

The building that housed King’s College is now known as the Sir Howard Douglas Hall (Old Arts Building) and is the oldest university building in Canada still functioning as a viable part of a university campus. In the Great Hall are portraits of past president and two memorial stained glass windows. Immediately to the left of the front entrance is the Edwin Jacob Chapel, named in memory of Vice-President and Principal of King’s College. A permanent display illustrating the history of the University is located in the Great Hall, including the cornerstone of the building, laid in 1826 and excavated in 1978 prior to the sesquicentennial celebrations.

William Brydone Jack Observatory

The Observatory, located at the east entrance to the Sir Howard Douglas Hall (Old Arts Building), was built in 1851 through the efforts of William Brydone Jack, Professor of Mathematics and Natural Philosophy at King’s College and later President of UNB. Constructed of wood, it has an octagonal tower especially designed to house its equatorial telescope. It now houses a small museum.

Richard J. Currie Center

The Richard J. Currie Center is named after UNB’s Chancellor (Richard J. Currie) a UNB alumnus, and generous supporter of the University.

The five story 139,000 square foot building is among the single largest construction projects in Fredericton’s History. Officially opened in October 2011 the Currie Center was designed to address the integrated wellness needs of the University of New Brunswick and the greater Fredericton Community. It provides facilities for fitness, recreation and high-performance athletics as well as new space for community research activities and services.

SAINT JOHN CAMPUS BUILDINGS

Sir Douglas Hazen Hall

This building is named for Sir Douglas Hazen (1860-1937), a prominent former premier, member of the federal cabinet and Chief Justice of the province. Hazen Hall houses the offices of all departments in the Faculty of Arts, the campus computing centre, classrooms and a 240-seat lecture theatre.

William Ganong Hall

The Science building, William Ganong, is named after Francis William Ganong (1864-1941), a graduate of UNB, longtime faculty member at Smith College and a former president of the Botanical Society of America. The four-storey building is designed to provide facilities for Biology, Chemistry, Geology and Physics. Ganong Hall houses the largest lecture theatre on the campus, a micro-lab, a spacious display area, student laboratories, and facilities of a more specialized nature, such as a large greenhouse, a controlled environment room and research laboratories.

Phillip W. Oland Hall

W. Oland Hall opened in December, 1992 at UNB Saint John and houses the Faculty of Business and most of its administrative offices, including the Registrar’s Office, the Business Office, the President’s Office, the Vice-President’s Office, the Advancement Office, the Alumni Office, and Student Services. Five classrooms, an audio-visual theatre, a business case room
classroom, lounge, games room, and conditioning room. Upstairs, there are a suite of offices and a reception area, shower rooms, equipment storage rooms, a trainer's room, and an officials' room. Overlooking the main court surface. The ground floor includes lockers for UNB Saint John students, faculty and staff, as well as several community groups.

Ward Chipman Building
The Ward Chipman building, one of the three original buildings on campus, is named in honor of Ward Chipman (1754-1824), a Massachusetts Loyalist who was deputy muster-master general to the British forces during the American Revolution; thereafter, he settled in Saint John where he culminated a distinguished legal career in being named to the New Brunswick Supreme Court. As of 2011, the Ward Chipman building is being renovated to reflect the current needs of the campus.

K.C. Irving Hall
The K.C. Irving Hall is one UNB Saint John’s newest academic buildings, opened in fall 1999. The home of the campus’s Biology, Engineering and Nursing Departments, Irving hall features modern classrooms and state-of-the-art research and computer laboratories. The building is named for Kenneth Colin Irving, in recognition of his family’s significant contribution to the economy of New Brunswick and to the lives, culture and education of New Brunswickers. The Irving’s have provided generous support to the university as well as numerous community groups and initiatives.

Thomas J. Condon Student Centre
UNB Saint John’s Student Centre, located adjacent to the Athletics Centre, is interconnected to the other buildings on campus by an overhead walkway and an underground tunnel. The centre houses the cafeteria, Student Representative Council offices, a social club and lounge. The building was named in honour of Vice-President Emeritus Thomas J. Condon.

G. Forbes Elliot Athletics Centre
UNB Saint John’s Athletics Centre features a 30,000 square foot surface with an all-purpose synthetic floor. The Athletics Centre includes space for four basketball courts, four tennis courts, four volleyball courts, six badminton courts and a four-lane running track. There is also plenty of space for activities such as soccer and flag football. Spectators can enjoy the University’s athletic teams, the Seawolves, from the 900 bleacher seats overlooking the main court surface. The ground floor includes locker and shower rooms, equipment storage rooms, a trainer’s room, and an officials’ room. Upstairs, there are a suite of offices and a reception area, a classroom, lounge, games room, and conditioning room.

The Athletics Centre serves the recreational and physical education needs of UNB Saint John students, faculty and staff, as well as several community groups. The Centre bears the name of the founding principal of UNB Saint John.

Canada Games Stadium
UNB Saint John offers two residences on campus overlooking the beautiful Kennebecasis River. The Dr. Colin B. Mackay residence, opening September 2003 and was designed with input from our own students. It offers 168 beds in the form of spacious double suites for independent style living. Suites include two single bedrooms, kitchenette, complete with microwave and fridge and private three-piece bath. At UNB Saint John, housing is non-smoking, co-ed and security locked. Each room is furnished and standard house amenities include furnished TV rooms and study lounges, high-speed Internet and cable TV connections and laundry facilities.

Sir James Dunn and Dr. Colin B. Mackay Residences
UNB Saint John offers two residences on campus overlooking the beautiful Kennebecasis River. The Dr. Colin B. Mackay residence, opening September 2003 and was designed with input from our own students. It offers 168 beds in the form of spacious double suites for independent style living. Suites include two single bedrooms, kitchenette, complete with microwave and fridge and private three-piece bath. At UNB Saint John, housing is non-smoking, co-ed and security locked. Each room is furnished and standard house amenities include furnished TV rooms and study lounges, high-speed Internet and cable TV connections and laundry facilities.

Sir James Dunn Residence, which opened in September 1993, offers 71 beds and an indoor connection to the campus. Single and Double rooms are available. Construction of the Dunn was made possible by a generous donation from the Sir James Dunn Foundation. It is named in honour of the noted Canadian industrialist and philanthropist, Sir James Dunn, who was a native of Bathurst, NB.

Hans W. Klohn Commons
Hans W. Klohn Commons opened in September 2011. The commons offers students the latest in technology, writing and library services. It houses a student technology centre; writing, math and statistics tutoring centres; and classroom and conference rooms. It integrates IT, information services, the computing centre and library in a single place.

The Commons is named for prominent New Brunswick businessman Hans W. Klohn who is well known for his many contributions to the steel fabrication and construction industry in Atlantic Canada and beyond.

Annexes
The annexes house facilities for the International Office, International Recruiting, the Student Health Centre, and for part-time faculty and graduate students.

All admissions are on a competitive basis; satisfaction of the minimum requirements does not guarantee admission. If a higher level Math course in the pre-calculus stream is presented, the math course with the highest grade will be considered for admission purposes.

Ontario applicants may present PSK4U as a Group 1 elective for Nursing only.

All admissions are to the Faculty are on a competitive basis; satisfaction of the minimum requirements does not guarantee admission. All first-year Bachelor of Science in Engineering students begin study in a common first term of courses (ENG-1). Subsequent admission to one of the specific disciplines (Civil, Chemical, Electrical, Geological, Mechanical, and Geomatics) is competitive and is based on academic performance in first year. Only the first two years of the Bachelor of Science in Engineering program are offered at UNB Saint John.

All admissions to the program are on a competitive basis; satisfaction of the minimum requirements does not guarantee admission.

**Important Information**

All admissions are on a competitive basis; satisfaction of the minimum requirements does not guarantee admission. Ontario applicants may present PSE4U Exercise Science to satisfy the senior Biology requirement.

Applicants who do not meet the admission requirements for direct entry to the Bachelor of Science may be considered for conditional admission. See note #11

Prospective students with Grade 12 English, Grade 12 Math and any combination of two Grade 12 sciences (Biology, Chemistry, Geology or Physics) will be considered for admission at the discretion of the faculty, and are encouraged to apply. Please note: Admission to the Bachelor of Science in Financial Mathematics degree program has been suspended effective September 16, 2015.

NOTES TO ADMISSION CHART

1. A pass at the high school level is required for each subject counted for admission (unless otherwise specified).
2. To count for admission a subject must be taken at the Grade 12 "academic" level (N.B. Level 2) unless otherwise specified; level 1, French Immersion, and advanced courses are satisfactory substitutes (where they exist). Courses taken at the "general" or "open" levels will not be accepted for admission purposes.
3. Students intending to enter the Science program (BSc), the following concurrent programs - BA/BSc, BCSc/BSc; the Bachelor of Medical Laboratory Science program (BMLS), the Bachelor of Arts and Sciences program (BAcSc), the Engineering programs (BScEng), and the Bachelor of Computer Science/Engineering concurrent program (BCSSc/BScEng) should note that two years each of high school sciences (as indicated) will normally be required.
4. Students whose first language is French may offer senior French in place of English to fulfill the English admission requirement and may then offer English as a Group 1 elective.
5. Meeting the minimum admission requirement does not guarantee admission to a UNB program.
6. The faculties of Arts and Science and Computer Science (Fredericton) offer a number of combined programs. These faculties offer a concurrent BA/BSc program (5 years of study leading to both a BA and a BSc degree) and a BAsc (4 years of study leading to a Bachelor of Arts and Science degree). See Admission Chart for admission requirements to these programs.
7. The Faculty of Arts (Fredericton) offers the Bachelor of Applied Arts (Craft and Design) (BAA). This degree program is design for students who wish to combine practical work in craft and design with elements of the Bachelor of Arts academic program. Students will complete two years at each of the University of New Brunswick and the New Brunswick College of Craft and Design. Students must also meet the admission requirements as listed in the Admissions chart. For further information, contact the Admissions Office.
8. The Faculty of Science offers a Bachelor of Medical Laboratory Science (BMLS). This program consists of courses offered at UNB (Fredericton and Saint John) and at the New Brunswick Community College. Admission requirements are the same as for the BSc program.
9. A concurrent program in Arts and Computer Science is available on the Fredericton campus in which both a Bachelor of Arts and a Bachelor of Computer Science degree can be completed in 5 years.
10. A concurrent program in Computer Science and Science (BSC/BSc) is available on the Fredericton campus in which both a Bachelor of Computer Science and a Bachelor of Science degree can be completed in 5 years. Admission requirements are the same as the BSc program, with the additional requirement that students take a course from Group 2 above.
11. Students who do not meet the admission requirements for direct entry to the Bachelor of Science degree program, but offer a minimum admission average of 70% may be given conditional admission in an entrance program to the extent that capacity allows. Students presenting only Chemistry will be considered at the discretion of the Faculty. Students who do not meet the admission requirements for direct entry to the Bachelor of Science in Forestry degree program, but have a minimum admission average of 60% (and other conditions as may be required by the admitting faculty) may be given conditional admission to the appropriate faculty in an entrance program. Applicants to the Bachelor of Science in Engineering Program with Grade 12 English, Math and only one of Chemistry or Physics will be considered for admission into an entrance program at the discretion of the faculty, and are encouraged to apply.
12. Students intending to enroll in Math 1003/1002, Introduction to Calculus I and MATH 1001, Calculus for Life Sciences, may take a Math Placement Test which will be administered during Orientation week in September. Materials to prepare for this test are available on the web at http://www.math.unb.ca/ready as well as from the Mathematics Departments in New Brunswick High Schools and UNB. Based on their test scores, and the regulations set out by the Mathematics Department, students may be required to take a Pre-Calculus course (Math 0863 UNBF or Math 1863 UNBJS) or a special section of Math 1003 that covers the material of the course over two semesters, or a regular (one semester) section of Math 1003.
13. (1) Ontario applicants may present Math MCB4U and Math MGA4U wherever Math MCV4U and MHF4U are required. (2) Ontario applicants presenting 3A and 4A courses from the old curriculum should contact the Registrar's Office for clarification regarding specific program requirements.
14. Science 122 is an approved Group 1 elective but it will not be accepted as a substitute for Chemistry 122 or Physics 122 for admission to programs requiring either of these courses.
15. New Brunswick students should present the following Mathematics courses:
   (a) For programs not requiring calculus (Nursing, Renaissance College, and Recreation and Sport Studies), UNB will require either Pre-Calculus 11 or Foundations 12 (b). For programs requiring a calculus course (including Business Administration), UNB will require Pre-Calculus 12A and Pre-Calculus 12B. The grades earned in both courses will be used to determine the admission average.
16. Information about admission to the Faculty of Education, Faculty of Law, Bachelor of Integrated Studies, Bachelor of Applied Management, Bachelor of Applied Management in Accounting, Bachelor of Applied Management in Electronic Commerce, Bachelor of Applied Management in Hospitality and Tourism, and the Bachelor of Health Sciences programs are in appropriate sections of the Calendar. Please consult the Table of contents for page numbers.
17. The Faculty of Engineering is committed to fostering diversity - including gender, racial, and ethnic diversity - in its programs. The Faculty welcomes and encourages applications from all qualified individuals.

TABLE OF CONTENTS

New Brunswick Courses shown below; equivalent courses from other provinces and the United States will be accepted.

NOTE: Ontario course HRT3M is an approved elective; HRE4M is not. SES4U, SNC4M, HSE4M, TPJ4M and PSE4U are approved electives.

Admission Regulations for the Academic Year 2019-2020

A. General Information

1. Admission inquiries can be directed to the appropriate campus Registrar’s Office: phone (506) 453-4865, admissions@unb.ca. Fredericton International Admission inquiries can be directed to int-unbf@unb.ca, phone (506) 458-7386. Saint John Admission inquiries can be directed to unbsjreg@unb.ca, phone (506) 648-5670.

Applicants are encouraged to consult UNB’s website for up to date developments, including how to apply online and PDF applications for download at http://www.unb.ca/admissions/undergraduate/

2. A student applying for entrance to the University of New Brunswick (UNB) must submit an application form including the non-refundable $65 application processing fee for domestic applicants and $125 for International applicants. A non-refundable tuition deposit of $100 is required from all applicants after they have been accepted excluding the Bachelor of Nursing and Education (Fredericton campus) programs. Students admitted to the Bachelor of Nursing program must submit a non-refundable admissions deposit of $250. Students admitted to the Bachelor of Education program (Fredericton campus) must submit a non-refundable admissions deposit of $300.

3. The final date for application, including required supporting documentation, for the 2019-2020 session is 31 March (15 December for BEd programs - Fredericton campus, February 15th for BN and BPHIL programs, and November 15 for BNASP and BHS programs). Applications received after that date may be considered, provided that space is available, but late applicants are cautioned that their applications will not be processed until the earlier applications are assessed, and that they may not necessarily be accepted to their program of primary choice. This application deadline does not apply to applications for Graduate Studies. It is recommended that applications for programs with enrollment limits, be submitted early.

4. Meeting the minimum admission requirements does not guarantee admission to any program.

5. Applicants who wish to be considered for entrance scholarships need to complete the general online scholarship application (http://www.unb.ca/scholarships/highschool/index.html) by March 1.

6. Given the lead time required for visa processing, international students are encouraged to apply early. Offers of admission can be made throughout the year, until such time as programs are declared closed.

7. Students will normally follow the regulations in the Calendar for the year of their admission.

8. The University reserves the right to refuse admission.

B. Non Public-Schooled Applicants

Applicants in this category may have been home-schooled or may have attended a private school that does not follow a regular provincial curriculum. These applicants must provide the following:

1. A complete online Admission Application form including the non-refundable $65 application processing fee for domestic applicants and $125 for International applicants. A non-refundable tuition deposit of $100 is required from all applicants after they have been accepted excluding the Bachelor of Nursing and Education (Fredericton campus) programs. Students admitted to the Bachelor of Nursing program must submit a non-refundable admissions deposit of $250. Students admitted to the Bachelor of Education program (Fredericton campus) must submit a non-refundable admissions deposit of $300.

2. A letter identifying the applicant’s "non-public-schooled" status, and if possible, a transcript detailing grade 11 and grade 12 courses. Course outlines, syllabi, evaluation and criteria, and a list of resource materials should be provided for each course.

3. Evidence of a minimum score of 1100 in the SAT I
SECTION B: ADMISSION AND UNIVERSITY REGULATIONS

For programs requiring specific grades in particular courses, evidence of achievement can be provided as follows:

a. Complete SAT 2 test in required courses and achieve a minimum of 550 out of 800, or
b. Complete the Grade 12 Adult High School Certification Provincial exam for that subject and achieve the grade specified in the program Prerequisites (e.g. a minimum grade of 60% is required in English 122 for admission to the Faculty of Arts), or
c. Achieve a minimum grade of 4 in an approved Advanced Placement (AP) course.

4. Submit evidence of achievement as outlined above having official documents (transcripts/statements of results) sent directly from the testing agency to the Admissions Office. Documents will not be accepted directly from applicants.

C. Mature Applicants

1. Canadian citizens and permanent residents who do not meet the usual entrance requirements and who are 21 years of age or older by the session for which acceptance is sought may be considered for admission. In addition to the documentation normally requested, such applicants are encouraged to submit a letter indicating why they feel they are likely to profit from a university education.

2. Normally admission to an undergraduate program will be assessed after a mature applicant has completed UNB courses on a part-time basis approved for the purpose; high school graduates, adult high school diploma recipients, and holders of high school equivalency certificates (GED) may be exempted from this requirement. Since some Faculties specifically require certain courses in Mathematics and Science, qualifying course work may also be required; proof of successful completion in the specified course, as offered by the N.B. Department of Post-Secondary Education & Training and/or the NBCC network, is acceptable. All applicants should consult the Registrar's Office before registering.

3. Applicants who have attended another college or university but who have been away from formal education for a minimum of five years may make application under this regulation. However, clear evidence of ability to handle university-level studies, or of extenuating circumstances, will be required. In select cases, qualifying course work may not be required.

D. Academic Probation for Transfer Students

1. When students transferring from another Faculty, University, or post-secondary institution are admitted on Academic Probation, that placement on Academic Probation will be considered to be the one allowable placement under these regulations.

E. Admission from Community College

Graduates from Community College Programs and students who have successfully completed study in community college programs should request that official transcripts of their work be forwarded to the Registrar's Office.

1. Such transcripts will be considered for transfer credit provided:
   a. The courses being considered for credit satisfy the program requirements at the University of New Brunswick.
   b. The courses being considered meet the standard of grade required within the program at the University of New Brunswick.

F. Admission with Advanced Standing

1. The University of New Brunswick welcomes and encourages applications from International Baccalaureate (IB) students. UNB offers transfer credits for select successfully completed Higher Level IB courses (minimum grade of 5)
2. Credit may be given for appropriate courses if an applicant has completed at least one full year of CEGEP. Normally, a minimum mark of 65% will be required in each subject for which credit is sought.
3. Applicants from overseas who already possess entrance requirements as stated on GCE 'O' level or its equivalent may be considered for transfer credit, for appropriate courses in the program they propose to enter, on the basis of GCE 'A' level passes with at least a minimum grade of 'C'.
4. Applicants who have written AP exams may be eligible for advance credit. Minimum grade requirements and specific transfer courses will depend upon the particular AP course and program applied for. Applicants should have official results forwarded to the Admissions Office for assessment.
5. An admitted applicant who has taken recognized OAC credits may be considered for transfer credit in appropriate courses. Normally a mark of 65% will be required in each subject for which credit is sought. In some subjects a higher grade may be required.
6. The maximum amount of transfer credit which may be allowed will not be more than the normal number of credit hours in first year of the program to which the student is admitted.

G. International Applicants

1. For applicants from Great Britain and countries with GCE equivalent examinations, GCE "O" level at "B" or grade three level in English, and five academic options is required.
2. Applicants from other countries should consult the UNB web http://www.unb.ca/prospective/international/ page for detailed admission requirements that can differ between countries.
3. International students and permanent residents whose native language is not English must submit the results of an English language proficiency test: TOEFL, MELAB, IELTS, CAEL and Pearson Vue Test have been approved for this purpose. This requirement may be waived in cases where the applicant has been in Canada for three or more years or other approved proof of English Language proficiency as outlined at https://www.unb.ca/international/admission/english.html In all cases, the University reserves the right to require proof of language proficiency before permission will be granted to register in academic courses.
4. Academically admissible applicants, who are unable to provide the required English proficiency score for direct admission, may be conditionally accepted to most degree programs. Applicants will be tested upon arrival to UNB. For further information, please visit: http://www.unb.ca/prospective/international/.

H. Applicants from the United States of America or from High Schools Using American - Based High School Curriculum

1. Applicants from Grade 12 of an accredited American-based high school curriculum must offer a rigorous program of required university preparatory courses and receive a favorable recommendation from a high school official. Criteria such as academic standing, rank in class, and SAT score will also be used to determine a candidate's admissibility.

I. Bachelor of Education Program

Admission is granted in consultation with the Faculty of Education. The number of places available in the program are limited and admission is competitive. As not all recognized teachable subject areas are possible for study at UNB, applicants are encouraged to verify with the Faculty prior to application.

Criteria for Admission

Minimum requirement for admission to the Bachelor of Education Degree Program is the successful completion of an undergraduate degree with teachable subjects from a recognized university, college or other post-secondary institution. A minimum cumulative grade point average (CGPA) of 2.7 is required.

To be admitted to the BEd Elementary Program, applicants must have completed at least 30 credit hours (10 term courses) in teachable subjects. Choose a minimum of three credit hours of course work from the first category (English) listed below and the remaining 27 credit hours from at least four different categories (Items 1 through 8 below).

1. English
2. Science and Technology (biology, chemistry, physics, general science, environmental science, or computer science)
3. Humanities (history, geography, political science)
4. Mathematics (algebra, calculus, geometry)
5. Languages
6. The Arts (music, visual arts, drama, theatre, creative writing)
7. Physical and health education
8. Social Science (anthropology, psychology, sociology)

In addition to the above, applicants must complete an application package that includes:

1. List of activities relevant to teaching
2. Brief response to how education related experiences and previous academic experience has prepared them for teaching (300 word max each)
3. Two goals while in the program (300 word max)
4. Three references
5. Individual interview for applicants meeting minimum admission requirements

Secondary Program
Secondary school students should complete the following steps:

1. List of activities relevant to teaching
2. Bried responses to how education related experiences and previous academic experience has prepared them for teaching (300 word max each)
3. Two goals while in the program (300 word max)
4. Three references
5. Individual interview for applicants meeting minimum admission requirements.

Selection of the applicants for the after-degrees program is competitive, so meeting the minimum requirements does not guarantee admission to the program.

Significant weight will be given to the academic record. Consideration will also be given to the applicant’s suitability for, and interest in, education.

**Required Documentation**

The following documents will be submitted by December 15th prior to the beginning of the academic year for which the applicant is seeking admission:

1. Application form, and education supplementary forms which include evidence of experience and education indicating a suitability for and an interest in education, and a personal statement of intent and purpose.
2. Official transcript(s) of academic record to date, other than University of New Brunswick transcripts. Applicants must arrange for an official transcript at each university, college, or other post-secondary institution attended to be sent directly to the Admissions Office by the academic records department of the institution. Applicants must also arrange for an official transcript of all grades received after the time of application to be sent directly to the Admissions Office as soon as it becomes available. The Admissions Office cannot accept the applicant’s copy of any transcript.
3. Three references, submitted directly to the Admissions Office by persons able to comment on matters relevant to the criteria for admission.

**J. Faculty of Education Admission Advantage - FEAA.**

For high school applicants and applicants currently in a first year UNB degree program.

The Faculty of Education Admission Advantage extends conditional offers of acceptance into the Bachelor of Education program to exceptional high school students and first year UNB students. Faculty of Education Admission Advantage students apply to the Bachelor of Education program as well as the University of New Brunswick undergraduate program of their choice during the final year of secondary school, or apply to the Bachelor of Education program during the first year of their UNB program.

Faculty of Education Admission Advantage status has the following benefits:

1. A place in the Bachelor of Education program, conditional upon meeting process requirements.
2. A Faculty of Education counselor to assist you with questions or concerns.
3. Access to the Education Society to keep you informed about events, activities, and other involvements that could enhance your admissibility to the education degree program.

If you are currently in, or approaching your senior year of high school, or are in the first year of study at UNB, you will want to see the details in the Undergraduate Calendar online. For this route, you are conditionally admitted to the Bachelor of Education degree and must complete your first degree at the University of New Brunswick.

Secondary school students should complete the following steps:

1. Apply to an undergraduate program at UNB, and indicate interest in FEAA by the application deadline of March 31st.
2. Complete and return the Faculty of Education advance application package by March 31st.

The application for the Faculty of Education Admission Advantage requires that the high school applicant presents all courses necessary for admission to their first program choice (e.g. Bachelor of Arts) with an admission average of 80%.
SECTION B: ADMISSION AND UNIVERSITY REGULATIONS

An Admissions Committee of faculty members, in cooperation with the UNB Admissions Office, will review the applications. In admitting students, the Admissions Committee will strive to assemble a diverse cohort of highly capable learners and match the student to the program by determining what the College can contribute to the individual, what the individual can contribute to the College, and what the individuals can contribute to each other.

M. Bachelor of Integrated Studies

Criteria for Admission

Normally, applicants to the Bachelor of Integrated Studies program without a prior degree must meet the following requirements:

- Minimum of 25 years of age.
- Complete an interview with the Bachelor of Integrated Studies program advisor to assess their suitability for the program.
- Have completed a minimum of 30 credit hours or transferable credit (or the equivalent through prior learning assessment) of post-secondary study.

Potential applicants with a degree should refer to existing regulations in the UNB Calendar regarding second degrees and should consult the BIS coordinator.

Other Special Requirements

Personal Learning Portfolio.

As part of the application process, the applicant will begin development of a personal learning portfolio that will be used as the basis for the assessment of prior learning. The portfolio will continue to be developed throughout the course of study through a Renaissance College portfolio course and will be submitted as a graduation requirement for the program.

The BIS portfolio documents formative understanding of how and to what degree students achieve the learning outcomes. It is a "meta-analysis" where students engage in a reflective critique that, when written, conveys development and competency in each of the BIS outcomes. Examples from experiences that were not part of BIS courses or other academic courses such as workplace or community activities should also be included where appropriate. The portfolio is not merely a list of "things done," but things done and how the student has grown and developed as a result.

N. Certificate of Proficiency in French

Successful completion of New Brunswick Grade XII French, or the Certificate of Proficiency in French, or the UNB French Proficiency Examination, or the equivalent, is a graduation requirement for the program. Students may apply for an exemption from this requirement.

Students wishing to transfer from a recognized university or college to UNB will be considered for admission subject to the following University of New Brunswick regulations:

1. Undergraduate students who at the time of application fail to provide required information regarding attendance at another post-secondary institution will normally be required to withdraw from the University for a period of at least twelve months. Where a student is required to withdraw,
   a. Work taken during the period after the failure to disclose will be considered for credit only if the student is readmitted and after consultation with the Faculty concerned.
   b. The notation "Required to Withdraw" will be a permanent statement on the student's transcript of record.

2. Where the Registrar has reason to believe that a student failed at the time of application to disclose attendance at another post-secondary institution as required, the Registrar, where possible, shall discuss the matter with the student. Where the Registrar determines that the student failed to disclose such information as required, the Registrar shall impose such penalty as considered appropriate in the circumstances. By registered mail, the Registrar shall:
   a. Notify the student of the decision and penalty imposed;
   b. Provide the student with the basis and reasons for the decision;
   c. Advise the student of the right to appeal to the appropriate Senate Admissions Committee; and
   d. In the event of an appeal, request that the student submit a written statement regarding the case within three weeks, and encourage the student to be present when the case is heard.

3. The regulations with respect to a student's right to appeal on an academic matter shall apply with any necessary modifications to a case referred to the Committee involving a failure to disclose attendance at another post-secondary institution.

R. Transfer Students

University of New Brunswick Students

University of New Brunswick students wishing to transfer to another degree program must complete a Transfer Request form, preferably before March 31st. Applications received after that date will be considered, provided that space is available. It is recommended that transfer applications for degree programs requiring special forms, i.e. BN and Kinesiology, be submitted in January or February. Applications to transfer are available at the Registrar's Office on both campuses or at the following links www.unb.ca/fredericton/registrar/students/forms.html (Fredericton campus) or http://www.unb.ca/saintjohn/registrar/students/index.html (Saint John campus). The record to date will be assessed by the Registrar in consultation with the administrative head of the degree program concerned.

Students wishing to transfer to another degree program for a winter term (beginning in January of the academic year) must complete a Transfer Request form before November 15th.

Students will normally be required to have completed at least one full year of academic work before applying to transfer.

Students from other Universities or Post Secondary Institutions

A student wishing to transfer from a recognized university or college to UNB will be considered for admission subject to the following University of New Brunswick regulations:

1. Students should apply by completing the online application by March 31st (unless otherwise specified). Applications received after that date will be considered, provided that space is available.
2. Students who for academic reasons are not eligible for readmission to the university at which they last registered will not be admitted to UNB.
3. A transfer student eligible to continue at the university last attended will be considered on the same basis as UNB students. NOTE: The Faculty of Law is excluded from these regulations.
4. Courses for which credit has been awarded at the transferring institution will be accepted provided that:
   a. The courses being considered for credit satisfy the program requirements at the University of New Brunswick.
   b. The courses being considered meet the standard of grade required within the program at the University of New Brunswick.
5. Official records will be evaluated and notification will be forwarded from the Registrar's Office concerning the student's position in the program at the University of New Brunswick, including the number of transfer credits awarded.

Applications for transfer to UNB must be submitted to the Admissions Office. They will be reviewed by the Dean of the Faculty concerned.
who, together with appropriate University authorities, will determine the position of the applicant.

In Faculties where the credit system is used, at least half the credits for a degree, diploma or certificate must be taken at this University; in Faculties where the year-system is used, two years must be taken at this University.

It is normally expected that the final year of study be completed at this University.

Applicants wishing to transfer to UNB are advised to address their request to the Admissions Office.

6. A student accepted as a transfer student from another AUCC recognized university or post-secondary institution may be given credit hours towards a degree for acceptable previous courses, but the cumulative grade point average, will be based only on courses taken at this University (i.e. those listed in the UNB Undergraduate Calendar, including certain approved St. Thomas University courses).

7. Students who transfer from another post-secondary institution to a Concurrent Degree program at UNB must complete at least half the total credit hours for that concurrent program and at least half of the credit hours normally required for each included program at this University.

8. Current University regulations governing the number of credits that must be taken at the University of New Brunswick apply.

9. From time to time and in special circumstances, Faculties may recommend that credits in addition to the normal 50 per cent of the degree program be transferred. Such recommendation will be considered by the Registrar. In situations where approval is denied, and at the request of the Faculty, the matter will be referred to the Senate Admissions Committee for resolution.

S. Challenge for Credit

A significant number of students are entering university having acquired, by work experience and/or forms of study other than attendance at university, a high level of competence in certain areas closely related to courses offered at this University. The Challenge for Credit scheme makes it possible for the University to give recognition to such attainment.

The regulations which follow provide a mechanism for Departments to offer Challenge for Credit examinations in courses which they consider appropriate.

Regulations

The Challenge for Credit scheme does not apply to the School of Graduate Studies, Faculty of Law, or the Faculty of Education.

1. a. Only students who have been admitted to a degree, diploma, or certificate program at the University of New Brunswick may challenge for credit.
   b. The result of Challenge examinations will be recorded subsequent to registration.

2. Normally, a request for challenge for credit will not be considered after one year from the date of the student's first registration in a degree, diploma, or certificate program at UNB.

3. A student may receive credit by Challenge only when registered in a formal degree, diploma, or certificate program, i.e. no credit for students in "no degree", "visiting", or "qualifying" programs.

4. A student shall not be allowed to challenge for credit more than once in any course.

5. No student may challenge for credit in a course for which the student has previously registered (including registration for an audit) either at UNB or any other university or equivalent institution.

6. a. The maximum credit which a student may obtain by challenge is whichever is the lesser of the 30 credit hours or 25% of the requirements of the program. (Please note certain Faculties may have a more restrictive policy.)
   b. Students must still complete at least 50% of the program at UNB excluding credits obtained by Challenge.

7. A student on "academic probation" or "required to withdraw" may not challenge for credit.

8. A student may not challenge for credit in a course of a lower level than one already attempted.

9. Courses challenged will be identified as such on the student's transcript and will be shown as "credit" (CR), or "No Credit" (NCR). A grade of 'C' must be allowed for coursework to be allowed.

10. The challenge for credit will normally be in the form of a comprehensive examination. In some cases additional proof of
I. General Course Regulations

A. Class Attendance

1. Students are expected to attend all classes, laboratories, tutorials, or other class meetings officially designated for a particular course. They are expected, also, to complete all assignments. Departments, or individual instructors, may make specific requirements about attendance and class participation. An instructor may assign a final grade of F in the course to a student who fails to meet any one of these requirements, including failure to maintain the stipulated attendance policy. Such requirements must be communicated in writing to students within the first two weeks of the course (see item A (4) under III. Examination, Standing and Promotion). It is the responsibility of a student who is absent during the first two weeks to ascertain the requirements of the course.

2. Students are advised to check course restrictions to determine the policy in effect concerning class attendance during the first week of lectures. In some courses, for example, those with limited enrolment, failure to attend during the first week or to make arrangements with the instructor may result in the cancellation of the registration. Approval of the Departmental Chair, or the Dean in Faculties where there is no Chair, is required.

3. It is expected that most problems caused by a student’s absence from classes, including absence from mid-term tests, can be resolved with the instructor concerned. If through sickness or other unavoidable cause, a student is absent from classes, the student must advise the instructor immediately upon return to classes. The instructor may request suitable documentation if such confirmation is considered necessary. Health certificates will be accepted for consideration only from the health care professionals who attended the student during the period of absence.

B. Classroom, Lab, Clinical and Fieldwork Safety Decorum

Consistent with the General Regulations on Conduct as set out in the Undergraduate Calendar, faculty, staff, and students are entitled to a classroom, laboratory, clinical, practicum and fieldwork environment which affords respect and dignity to those in attendance, and is free from threats to personal safety, discrimination, harassment, intimidation and behaviour which is destructive, disruptive, disorderly and offensive. The instructor may enforce standards of decorum within the classroom, laboratory, clinical, practicum or fieldwork setting which are consistent with these regulations and has authority to ensure that all health and safety policies are observed in these settings. The instructor is encouraged to refer students to the relevant regulations and policies, including this regulation.

Where a student engages in behaviour which is inconsistent with the General Regulations on Conduct or University health and safety policies, the instructor may take reasonable steps to deal with the situation including immediate removal of the student from the classroom, laboratory, clinical, practicum or fieldwork setting. Should it prove necessary, the instructor may call Campus Security to assist with removing a student.

Following such removal, the instructor, in consultation with the Dean and Registrar, will determine whether further action should be taken, including the possible compulsory withdrawal of the student from the course, consideration of an academic offence, or disciplinary action pursuant to the General Regulations on Conduct. Any further action will be conducted in accordance with the normal procedural provisions under the applicable University regulation.

C. Adding Courses

Students have until the second Friday of Fall Term to add fall term or full year courses and the second Friday from the commencement of winter term for the addition of winter term courses. A student adding a course is responsible for ascertaining the requirements of the course and for completing them.

D. Dropping Courses

1. Students may drop term or full-year courses up to the second Friday following the commencement of classes in those courses and those courses will be deleted from the student’s record.

2. Students may withdraw from term or full-year courses after the second Friday of classes in accordance with the regulations set out below.

   a. Students are entitled to make decisions to withdraw from courses after the second Friday of classes on an informed basis. An informed basis means that students shall have a reasonable opportunity to assess their progress in each course and to receive feedback on their performance in each course before making a decision. Students have the responsibility to seek information on which to make their decisions to withdraw.

   b. In courses where the final grade is based in part on term work such as, but not limited to, essays, reports, assignments, projects including group work, problem solving, tests including mid-term examinations, seminar presentations and/or participation, attendance, students are entitled to receive feedback on the portion of this work completed prior to the deadline for withdrawal from courses without academic penalty. Such feedback normally will include, but is not limited to, the instructor’s evaluation of the student’s work. Students also are entitled to consult with the course instructor and/or their advisor to obtain feedback on their performance in a course and are encouraged to do so before withdrawing from a course after the second Friday of classes.

   c. After the second Friday of classes, students may withdraw from courses without academic penalty at any time up to and including the deadlines set out in the Undergraduate Calendar of Academic Dates approved annually by the Senate.

   d. The last date to withdraw without academic penalty from courses of duration shorter or longer than the usual one term or full-year period is the point where approximately two-thirds of the course time has elapsed.

   e. Withdrawal from courses after the first ten (10) teaching days of classes and no later than the deadlines indicated in iv above will carry no academic penalty and will be shown as “W” on the transcript.

   f. Withdrawal from courses after the deadlines indicated in iv above will be recorded as “WF” on the transcript and a grade of zero (0) will be carried into the calculation of the GPA.

   a. Notwithstanding the above, a student may petition the Chair, or in the case of Faculties without departments, the Dean or Dean’s designate, of the Department/Faculty which offers the course, to withdraw from a course without academic penalty after the applicable deadline in iv and before the last date of classes for that course. No petition regarding withdrawal shall be considered after the submission of the final grade for the course.

   b. The grounds for this petition are restricted to:

      i. the student made reasonable efforts to obtain feedback on his/her performance in the course prior to deadline for withdrawal in iv, but was unable to do so;

      ii. compassionate, health-related or extenuating circumstances beyond the control of the student demonstrably had a direct impact on the academic performance of the student in the course.

   c. The student shall submit the petition in writing no later than the last date of classes in the course, explaining the grounds on which the petition is based. It is the student’s responsibility to provide documentation in support of the petition which demonstrates the grounds cited. The Chair, Dean or Dean’s designate, as the case may be, has the option, but is not required to meet with the student. It is expected that a decision on the petition will be made expeditiously.

   d. The Chair, Dean or Dean’s designate, as the case may be, shall have the sole and only discretion to grant the petition, and, where satisfied that the student has established either grounds as set out in b), normally will grant the petition.

   e. Where the decision of the Chair, Dean or Dean’s designate to grant the petition, the course in question will be shown as “W” on the transcript.

   f. The decision of the Chair, Dean or Dean’s designate on the petition is final and not subject to appeal. However, students may have recourse to appeal to the relevant appeals committee on related matters as set out elsewhere in these regulations (see for example the section headed “Right of Appeal”).

E. Repeating Courses

Students may without special permission register for a course already taken in order to meet a prerequisite or other degree requirement, or in order to improve their grade point average. However, both the original grade and the new grade will each be counted separately towards a grade point average. Students should note that while the credit hours of a repeated course will be used each time in calculating a grade point average and in the totals of courses attempted and passed, they can only be counted once towards the minimum number of credit hours required for a degree.

A student may attempt a course a maximum of three times (including withdrawals but excluding course attempts designated with the # notation). Beyond that, the student must obtain the permission of the Dean of the student’s Faculty to register again in the repeated course.
III. Examination, Standing and Promotion

A. Course Syllabus

1. It is the function of the instructor to evaluate and assess a student's work in a course and to award interim and final course grades.

2. The final standing of each student, in each course is assessed on the final examination, if one is held, and term work (essays, reports, assignments, tests [including lab and field work tests], mid-course examinations, practicums or internships, attendance and participation requirements and any other work contributes to the final grade).

B. Examinations and Evaluation of Course Work

1. The method of examination in a course is determined by the instructor.

2. Final examinations, if any, for fall term courses, and mid-course examinations, are held in December. Final examinations, if any, for winter term courses and for all-year courses (fall and winter term) are normally held in April.

3. Instructors must notify students, preferably within the first two weeks of classes and by no later than the mid-point of a course, if the final examination is to be a take-home examination or one that is to be included in the University’s official examination schedule. Students must be informed if the final examination is an open or closed book format by the mid-point of the course. Such notification shall be:
   a. in writing distributed to the class in a regular class period or,
   b. by any electronic means which has been established as a method of communication within in the course and for which student access and support are provided to the University.

SECTION B: ADMISSION AND UNIVERSITY REGULATIONS

3. No later than the second (2nd) Friday of the term the instructor must provide the students attending with a course syllabus that includes:
   a. a full explanation of the basis on which the final grade will be calculated, that is: the weighting of tests, examinations, assignments, practicums or internships, attendance, and participation requirements, and any other work which contributes to the final grade.
   b. information on the approximate scheduling of term work which contributes to the final grade and an indication of when and how the final scheduling will be determined.
   c. The University of New Brunswick places a high value on academic integrity and has a policy on plagiarism, cheating and other academic offences.

Plagiarism includes:
   i. quoting verbatim or almost verbatim from any source, including all electronic sources, without acknowledgement;
   ii. adopting someone else’s line of thought, argument, arrangement, or supporting evidence without acknowledgement;
   iii. submitting someone else’s work, in whatever form without acknowledgement;
   iv. knowingly representing as one’s own work any ideas of another.

Examples of other academic offences include: cheating on exams, tests, assignments or reports; impersonating somebody at a test or exam; obtaining an exam, test or other course materials through theft, collusion, purchase or other improper manner, submitting course work that is identical or substantially similar to work that has been submitted for another course; and more as set out in the Academic Regulations found in the Undergraduate Calendar.

Penalties for plagiarism and other academic offences range from a minimum of F (zero) in the assignment, exam or test to a maximum of suspension or expulsion from the University, plus a notation of the academic offence on the student’s transcript.

For more information, please see the Undergraduate Calendar, Section B. Regulation VIII.A., or visit http://www.unb.ca/academics/calendar/undergraduate/2013/regulations/universitywideacademicregulations/viii-academicoffences/index.html. It is the student’s responsibility to know the regulations.
SECTION B: ADMISSION AND UNIVERSITY REGULATIONS

9. The final examination in any course may be waived by the instructor. Notice that an examination has been waived must be communicated to the students attending the course within two weeks of the first date.

5. No examination or test may be held in the last 10 lecture days of any term or during the reading period, but see d) below.

b. All term work is due no later than the last day of lectures.

c. A paper, assignment or take-home examination given in lieu of final examination shall be provided to the students by the last day of classes and is due the last day of the examination schedule.

d. The following may be exceptions to the regulations (a) and (c):

i. courses with regular, usually weekly, tests,

ii. course requiring laboratory examinations of a practical nature;

iii. courses in which oral examinations are given. In such cases a mutually agreeable time may be arranged between the student and the instructor.

In the case of the exceptions i) and ii) the tests or examinations must be held during the regular class period. A student or faculty member reports instances of contravention of this regulation to the Registrar.

6. Normally, tests held during the regular lecture period (other than final examinations scheduled by the Registrar) are to be conducted during a regularly scheduled class time. In exceptional circumstances and with the approval of the Dean, an instructor may schedule a test for another time. Such a test is to replace, rather than add to, the regularly scheduled class periods for the course and it must not interrupt other regularly scheduled classes or tests for students.

7. The time period for an official examination scheduled during the final examination period shall not exceed three (3) hours. There will be at least two (2) hours between the end of one examination period and the start of the next period, allowing for three (3) examination periods each day (Monday to Saturday) during the final examination period.

Students normally may not leave the examination room during the first half hour (30 minutes) of the examination period. Students may be permitted to enter the examination room during the first half hour and will only be permitted to enter after that time with approval of the course instructor or designate. In such cases the instructor or designate may provide additional writing time in response to the circumstances.

Students who wish to write their examinations in French rather than English or who feel that their performance was affected seriously by illness, even if they do not withdraw, must, if they wish to be eligible to take a final examination at an alternate time (deferred final examination), notify their instructor or an invigilator before leaving the examination room. They should then go immediately to be examined medically. They may then apply to the Registrar within two weeks of the original date of the final examination to write at an alternate time (deferred final examination). Students who know that they will be unable to attend can apply before the originally posted date.

When a request to write a final examination at an alternate time is approved and will be written on campus, the student must contact the instructor in the course to determine a mutually agreeable time and place for the examination.

The designation incomplete (INC) is recorded for the course in which approval has been granted for the final examination to be written at an alternate time. It is expected that the alternate examination will be written and a final grade submitted by the instructor to the Registrar’s Office within two months after the final date for classes in the course in question. This period may be extended upon the recommendation of the course instructor and with the approval of the Registrar.

It is expected that such examinations will be written after the date and time of the regularly scheduled final examination. Students who, because of documented extenuating circumstances, wish to write the final examination before the date and time of the scheduled final examination should submit their request and supporting documentation to the Registrar. If the alternate examination is approved then the student should contact the instructor and to see if an arrangement to write early is possible. Instructors have no obligation to permit a student to write an examination ahead of the schedule.

Normally examinations will be written on campus. Should students find it necessary to write the examinations off campus, they are required to submit their request and supporting documentation to the Registrar. The request will be reviewed with the instructor and when it is agreed that the final examination is to be written off campus, the student will be advised. All arrangements are made through the Registrar’s Office. Students are responsible for all charges incurred for final examinations written off-campus.

12. Students may see their own examinations and papers, by arrangement with instructor, after the grades have been released.

C. Language of Examination

Students who wish to write their examinations in French rather than English must apply in writing to the Registrar one month in advance of the examination date. Permission may be denied in certain courses, particularly in courses where language is part of the course content.

Students admitted without having passed the appropriate high school or equivalent English course, or who were not required to demonstrate on admission an acceptable level of English usage on an approved English text, may, at the discretion of the instructor in consultation with the Registrar, be given special consideration in writing examinations, tests and assignments. Such special consideration may include oral examinations and/or extension of the time to write an examination. Consideration will not be granted after two years at UNB or any other English speaking institution.

Students who wish to be considered under this provision must make the request to the instructor no later than the mid point of the term.

D. Supplemental Examination

Supplemental examinations are not offered in any Faculty of the University, except the Faculty of Law.

E. Final Examinations Written at an Alternate Time

1. Students, who by reason of illness or extenuating circumstances, are unable to write a final examination at the posted times may apply to the Registrar for permission to write a final examination at an alternate time. A final examination written at an alternate time takes the place of the regularly scheduled final examinations which the student was unable to write. Applications for a final examination at an alternate time, supported by the health certificate or other supporting documentation, must reach the Registrar within two weeks of the posted date of the final examinations which the student was unable to write.

2. Students who become ill and withdraw for this reason during a final examination, or who feel that their performance was affected seriously by illness, even if they do not withdraw, must, if they wish to be eligible to take a final examination at an alternate time (deferred final examination), notify their instructor or an invigilator before leaving the examination room. They should then go immediately to be examined medically. They may then apply to the Registrar within two weeks of the original date of the final examination to write at an alternate time (deferred final examination). Students who know that they will be unable to attend can apply before the originally posted date.

3. When a request to write a final examination at an alternate time is approved and will be written on campus, the student must contact the instructor in the course to determine a mutually agreeable time and place for the examination.

4. The designation incomplete (INC) is recorded for the course in which approval has been granted for the final examination to be written at an alternate time. It is expected that the alternate examination will be written and a final grade submitted by the instructor to the Registrar’s Office within two months after the final date for classes in the course in question. This period may be extended upon the recommendation of the course instructor and with the approval of the Registrar. If the final grade is not received by the appropriate date the Registrar will assign a grade of “F” on the student’s record. Refer to the regulations on Incomplete for a further explanation of “INC” grades.

5. It is expected that such examinations will be written after the date and time of the regularly scheduled final examination. Students who, because of documented extenuating circumstances, wish to write the final examination before the date and time of the scheduled final examination should submit their request and supporting documentation to the Registrar. If the alternate examination is approved then the student should contact the instructor and to see if an arrangement to write early is possible. Instructors have no obligation to permit a student to write an examination ahead of the scheduled date.

6. Normally examinations will be written on campus. Should students find it necessary to write the examinations off campus, they are required to submit their request and supporting documentation to the Registrar. The request will be reviewed with the instructor and when it is agreed that the final examination is to be written off campus, the student will be advised. All arrangements are made through the Registrar’s Office. Students are responsible for all charges incurred for final examinations written off-campus.
7. In the rare instance when a student is scheduled to write three final examinations in one 24-hour period during the final examination period, the student may apply to the Registrar to write one of the examinations at another time during the examination period.

8. Applications to take a final examination at an alternate time on grounds not considered acceptable by the Registrar may be referred to the appropriate Senate Committee. The student must make such request to the Registrar within two weeks from the date of the Registrar’s letter of notification of this decision.

F. Students with Disabilities

The University of New Brunswick is committed to ensuring students with disabilities receive appropriate academic accommodations in accordance with the New Brunswick Human Rights Act and applicable UNB Policies and Procedures. Students with disabilities may request reasonable accommodations to enable them to complete academic requirements by

providing the applicable campus centre, UNB Fredericton Student Accessibility Centre or the UNB Saint John Student Accessibility Centre, with satisfactory professional reports containing specific recommendations necessary for the student to achieve the course, examination and program completion. Documentation may need to be renewed as appropriate to reflect the students’ ongoing need for academic accommodation.

G. Grading System and Classification

Courses

Courses in the University are offered in a classroom setting, laboratory setting or through some method of distance education. The regular academic session year is September - December and January - April. Within this session, there are two terms, 15 weeks each (including the examination period) September - December and January - April. In addition, there is a Summer Term for both Fredericton and Saint John Campuses that runs from May 1-Aug 31. Within this term there are six sessions that have specific start and end dates. Details are listed under the Important Academic Dates by visiting http://www.unb.ca/academics/calendars.html. All course offered by the University are referred to as term courses or full-year courses.

Full-Year Courses: Those courses that are normally completed over the two terms associated with regular academic session year.

Term Courses: Those courses that are normally completed in one term during the regular academic session.

Competence in English Courses

The University places great importance on its students achieving competence in English. To this end, students are required to complete successfully with a mark of C or above a minimum of 12 ch of courses that contain a significant amount of writing in English. Students should consult their Faculty advisors to determine which courses satisfy this requirement. The courses which satisfy this requirement are identified by [W].

Credit Hours

1. Each Faculty is responsible for assigning credit values to courses within jurisdiction. These credit values are approved by the appropriate University Senate. Credit hour values may range from 1-6 although the typical term course has a 3 credit hour weight and a typical full-year course has a 6 credit hour weight.

Students should consult the Financial Information Section of this calendar for information on tuition charges and full-time/part-time status based on the credit value of courses taken.

2. Most Faculties, in their own regulation, state the minimum number of credit hours which must be successfully completed for graduation in each degree program. Credit hour requirements for degree programs in Saint John are given in Section E, and in Fredericton are given in Section G.

3. Students accumulate credit hours, as assigned, for courses completed with a grade of D or better (see below).

4. Faculties may consider courses offered by other Faculties to have satisfied a half-course (normally 3 credit hours) or a full course (normally 6 credit hours) regardless of credit hours attached to the course in the calendar and recorded on the student’s transcript of record. Students should consult the relevant sections of this calendar for Faculty policies.

Grades

With the exception of the School of Graduate Studies and Faculty of Law, a candidate’s final standing in a course is indicated by the following letter grades:

- A+ 4.3 grade points
- A 4.0 grade points
- A- 3.7 grade points
- B+ 3.3 grade points

SECTION B: ADMISSION AND UNIVERSITY REGULATIONS

B  good performance 3.0 grade points
B- 2.7 grade points
C+ 2.3 grade points
C  satisfactory performance 2.0 grade points
D less than satisfactory performance 1.0 grade points
F  failure 0.0 grade points
WF failure 0.0 grade points

A grade of “D” will be considered for program credit only in certain circumstances. See Faculty regulations and refer to program descriptions in this Calendar.

Departments have the right to decide whether or not a “D” meets prerequisite or Major requirements. See appropriate departmental listings.

Credit hours for courses with an “F” or “WF” grade may not be counted towards graduation, but will be used as credit hours attempted in assessing grade point average.

Courses taken at St. Thomas University as part of a student’s regular course load in which the final grade is “C-” will normally not be accepted for credit if a grade of at least “C” in the course in question is required in the student’s program of study.

Notations

1. INC (Incomplete)

Issued on the recommendation of the instructor and approved by the Registrar, in situations where students present written evidence of medical or extenuating circumstances which prevent completion of the work within the stated time period. It is expected that the work will be completed within two months after the final date for classes in the course. A grade of F will normally be assigned if the work is not completed. The period for completion may be extended upon recommendation of the instructor and with the approval of the Registrar. It is the responsibility of the student to seek such an extension before the expiration of the two month period. Evidence of medical or compassionate grounds to substantiate such a request must be submitted to the Registrar.

The designation incomplete (INC) is recorded for courses in which deferred examinations are to be written.

2. Aegrotat (AEG) Standing

Used rarely. The student has been unable to complete the course because of a serious illness or compassionate situation but has been given pass standing on the basis of previous work. Requests should be addressed to the Registrar.

3. AUD (Audit)

A student wishing to attend classes in a given degree credit course without being assigned a grade may register to “audit” the course, subject to the following regulations:

a. Registration for audit will not be accepted without permission of the course instructor.

b. The degree of class participation allowed to an auditor is at the discretion of course instructor. No grade is assigned for each course and such a course is not a credit.

c. The normal regulations and deadlines regarding course adds and drops apply.

d. A ‘credit registration’ in a course may not normally be changed to an ‘audit’ after the first two weeks of the term. Similarly a registration for ‘audit’ may be changed to a ‘credit registration’ only with the support of the faculty, and with the permission of the Registrar.

e. In courses with enrollment requirements and/or restrictions, priority for registration will be given to individuals taking the courses as full fee-paying registrants.

f. For a part-time student the audit fee will be one-half of the regular course fee (see Fees, Section C).

The following actions may also appear on the student transcript in lieu of or adjacent to the grade.

4. CR (credit) NCR (no credit)

5. X (Extra)

Extra course, not credited to the program the student is enrolled in during that session and the grade is not included in the calculation of grade point averages. Such a notation must be requested by the mid-point of the term.

6. ¦ On the basis of an appeal, the grade shown but not included in grade point average calculations.

7. W (Withdraw without academic penalty)
SECTION B: ADMISSION AND UNIVERSITY REGULATIONS

8. CTN (Course continues next term)

H. Calculation of Grade Point Averages

Grade point averages are calculated by dividing the total number of grade points obtained (credit hours x grade point weight) by the number of credit hours attempted during the period in question in the program. Grade point averages are shown to one decimal place. The University calculates two grade point averages, which form part of the student's official record: the Assessment Grade Point Average; and the Cumulative Grade Point Average.

With the approval of their faculty advisor, a student may specify that a course is "extra" to the program and should not be included in their grade point average. Such a notation must be requested by the mid-point of the term.

Assessment GPA: For all students, the assessment GPA is calculated at the end of the assessment period, May - April, provided that 24 credit hours or more have been attempted in the program since the last assessment in that program. All work attempted toward the current program of study (including the no degree program) is included in the assessment with the exception of courses designated with the "W", "F", or "X" notation.

Cumulative GPA: It is based on all work taken toward a degree program. The cumulative grade point average is used to determine the student's divisional standing algorithm at graduation.

Scholarship GPA: In addition, for the purpose of awarding scholarships, a Scholarship GPA is calculated at the end of the assessment year (May to April) provided that 24 credit hours or more have been attempted, regardless of program. For students involved in work placement programs such as Co-op or PEP, the scholarship average is calculated using Dean's List criteria. This GPA is held internally and is not displayed on the student’s transcript of record.

I. Standing and Promotion Requirements

1. In order to continue in good academic standing, a student must achieve an assessment GPA of at least 2.0 for the assessment period. A transcript notation "In good academic standing", appears at the end of the term record.
   a. A student whose assessment GPA falls below 2.0 but above 1.0 in an assessment period is placed on academic probation. A student is allowed to go on academic probation only once in a program.
   b. Academic probation constitutes a notice of unsatisfactory performance and is a warning that the student must improve to meet the grade point average requirements of the program in order to avoid being required to withdraw from the University.
   c. A student who has previously been placed on academic probation and whose GPA in any subsequent assessment period falls below 2.0 is, subject to review by the Faculty concerned, required to withdraw from the University for at least 12 months. If such a student is readmitted, it is normally on academic probation.
   d. A student whose GPA falls to 1.0 or below in any assessment period is required to withdraw from the University for at least 12 months. If such a student is readmitted, it is normally on academic probation.

NOTE: No credit is granted for courses taken during the 12 month period during which a student is required to withdraw.

2. Students whose GPA on assessment is such that they would normally be placed on academic probation, or be required to withdraw from the University, will be allowed to graduate if all other requirements of the program have been completed at that time. Law students should refer to the Faculty regulation in the Faculty of Law Calendar.

3. If, at the end of the term in which a student has completed all the other requirements of the program, the student has not reached the end of an assessment interval, the student will be allowed to graduate without reference to the GPA in that session.

J. Dean's List Criteria

The Faculties of the University publicly recognize superior academic performance for their students by publishing Dean's lists. Such distinction is also noted on the transcript of record. Criteria for inclusion on a Dean’s list are as follows:

1. Students must be enrolled in a degree, diploma or certificate program.

2. In all Faculties an assessment grade point average of 3.7 or higher must be achieved, except in the Faculty of Law where the minimum assessment grade point average for inclusion on the Dean’s list is 3.3 and the student stands among the top 10 percent of their class.
   a. Decisions for full-time and part-time students are based on assessment grade point average calculated in May of each year subject to provisions for the determination of the assessment GPA as outlined in Section III. H. Calculation of Grade Point Averages.
   b. Students enrolled in a concurrent or joint degree program will be considered for the Dean’s list in both Faculties represented and the decision will be based on the single assessment grade point average for the concurrent or joint degree program.
   c. Students may also be considered for inclusion on the Dean’s List in the following special circumstances. In all instances, the applicable minimum of 3.7 grade point average (or 3.3 GPA for the Faculty of Law) must be achieved.
      a. Graduating students who in their final year of study do not have any assessment grade point calculation will be considered provided at least 12 credit hours or work must have been undertaken since the last assessment; have a minimum 3.7 GPA over the courses completed since the last assessment; and are not on Dean’s List at the last assessment.
      b. Co-op students and students on a professional experience program (PEP) will be considered provided at least 12 credit hours have been completed in one study term since their last assessment and have a minimum 3.7 GPA over the courses completed.
      c. Course work done off-campus with permission, including courses completed as part of an exchange program, will not form part of the assessment grade point average and subsequent decision concerning inclusion on Dean’s list. The Dean has the right to add such students to the Dean’s List where deemed appropriate.
      d. Students who transfer from one UNB degree program to another in January may request consideration for Dean’s List provided they have completed at least 12 credit hours in the new program with a minimum 3.7 GPA over the courses in the new program and have completed at least 24 credit hours since their first admission to UNB or since their last assessment.

K. Submission of Final Course Grades

1. The work term in a course (excluding any work given in lieu of a final examination, see Examination, Standing and Promotion regulations, item A [6]) must be submitted by the last day of lectures or earlier as required by the instructor. The instructor must submit a final grade based on the work submitted by the student, including term work and examination, as determined by the instructor.

2. Once a grade has been submitted a student is not permitted to do extra work or additional to that required of other students in a course in order to gain a better grade in the course.

3. A request to change a recorded grade in a course is to be made to the Registrar via the instructor's secure web grade change form. An explanation of the reason(s) for the change must be included at the time of the submission.

L. Review of Grades

1. Review of Grades on an Individual Piece of Work
   a. Students may discuss with the course instructor the grade on any piece of work regardless of its value. For a course that is not the responsibility of a single academic unit, the coordinator of the course will replace the Department Chair in the review process.
   b. For purposes of the formal review process, individual pieces of work may include: Term tests, computerized tests, examinations other than final examinations, term papers, essays, reports, group projects and oral tests/examinations worth at least 20 percent in the calculation of the final grade in the course.
   c. Students have the right to request a formal review of graded assignments such as those listed above. The grounds are restricted to: the overall assessment of the evaluation is demonstrably unfair; the evaluation was not consistent within the class; there was a miscalculation of the grade.
   d. There are two steps to follow for the formal review process:
      i. The student must discuss the piece of work with the instructor involved within two weeks of the receipt of the grade for the individual item.
      ii. After the first step and if requested by the student in writing or by e-mail to the Chair of the Department, or Dean of the Faculty if there is no Department or Chair, a review will be conducted with such Chair, the instructor and the student. If desired, a student has the right to meet with the Chair without the instructor present prior to this review. The review must be conducted within 7 days after the review with the instructor. The decision of this review
is final and the reasons for this decision will be provided to the student in writing by the Chair.

iii. A student who has not requested a grade review of an individual piece of work that is reviewable, or who has requested a grade review of an individual piece of work and is not satisfied with the result, may not ask for a review of a final grade on the basis of that individual piece of work.

2. General Information

a. In all reviews, it is expected that every effort will be made to carry out the process expeditiously. In extraordinary circumstances that extend the review timeline, the Dean (or designate) in consultation with the Registrar, may provide the student with alternate options(s).

b. Graded materials held by the instructor must be retained for twelve months after the end of the term.

c. Students requesting a review are expected to provide reviewers with original graded assignments returned to them by the instructor. Such assignments must not have been altered (please refer to the section on university regulations governing academic offences).

d. Work will be reviewed, as requested, in a manner that ensures that all concerns raised by the student have been properly addressed, taking into account the course outline and that the total of the grades and other items contributing to the grade were done accurately. In instances when consistency in grading is being considered, a minimum of three other pieces of class work completed by other students will be examined by the reviewer(s). Graded materials in the custody of the instructor will be provided to the reviewers by the instructor in a manner that ensures identifying information has been removed. Where the graded work has been returned to students, the student requesting the review must provide graded work for comparison.

e. The grade originally assigned may be raised, remain the same or be lowered as a result of the review.

3. Review of the Final Course Grade

a. Prior to requesting a formal review of a final grade, students will discuss the grade with the instructor. For a team-taught course the coordinator of the course will replace the instructor in the review process. Where no course coordinator exists, the Dean of the Faculty or Chair of the Department will designate one of the course instructors as course coordinator.

b. Students who are not satisfied with the decision of the instructor or course coordinator have the right to review a request of the official final grade received in a course on the proper form (available in the Office of the Registrar or online at http://www.unb.ca/fredericton/registrar/students/currstuforms.html). Such requests must be received by the Registrar, in writing, within 90 days after the end of the course or examination period, where applicable. A fee of $50.00 must accompany the request. The fee will be refunded if the grade is subsequently raised.

c. Students should clearly outline the grounds for the request to review the final grade. Normally the grounds are restricted to one or more of the following:
   i. the final grade of is demonstrably unfair;
   ii. the calculation of the final grade was not consistent with the class;
   iii. the calculation of the final grade was not based on all the work completed; or
   iv. there was miscalculation of the final grade;

d. The Registrar shall refer the request for formal review to a committee consisting of:
   i. one member who is selected by the student and who is a member of the Department or Faculty involved;
   ii. one member who is selected by the instructor and who is a member of the Department of the Faculty involved; and
   iii. the Chair of the Department or Dean of the Faculty or a designate selected by the Chair or Dean, provided that the Chair, Dean or designate shall be a member of the Faculty or Department. In the event that the student or instructor is unable to select a member for the review committee, the Dean or Chair will select.

e. If the review is a class action involving two or more students enrolled in a course:
   i. the students who are in the course requesting the review will collectively select one member of the Committee; and

SECTION B: ADMISSION AND UNIVERSITY REGULATIONS 9

i. if more than one instructor, the instructors involved in the
teaching of the course will collectively select one member of
the Committee.

ii. The criteria for a grade review for a class action are as follows:
   1. the grade of all class members requesting the
      review must be at issue;
   2. the grounds for the review must be the same for all
      class members requesting the review; and
   3. the requested outcome of the review must produce
      a consistent result for all class members.

f. Grades assigned in practicum courses, in co-op courses, or
   final examinations in any course shall be subject to review only
   under the final course grade review process.

g. Students who intend to appeal the results of a review of final
   course grade must do so within 4 weeks after the date of
   notification by the Registrar’s Office. The procedures for filling
   an appeal must be followed and reasons for appeal are to be
   clearly outlined.

IV. Right of Appeal - Standing and Promotion Decisions

Students on the Fredericton Campus will submit appeals to the Senate Student Standings and Promotions Committee; on the Saint John Campus, appeals will be submitted to the Student Appeals Committee. The term ‘appeals committee’ as used in this section refers to both of these committees. Appeals are to be submitted via the Office of the Registrar on the respective campus.

1. Entitlement and Jurisdiction

1. If one year or more has elapsed since the academic decision in question was made, student appeals will be considered by the appropriate campus Senate Appeals Committee only in exceptional circumstances.

2. Student appeals on the Fredericton Campus are considered by the Senate Committee on Student Standings and Promotions, and on the Saint John Campus by the Senate Student Appeals Committee. Appeals pertaining to admissions are heard on the Fredericton Campus by the Senate Admissions Committee and on the Saint John Campus by the Senate Student Appeals Committee. Appeals are submitted via the Registrar’s Office on the respective campus.

3. The University reserves the right to withhold notification of an academic decision if a student has not satisfied his or her financial obligations to the University. The Senate Student Standings and Promotions Committee in Fredericton, or the Senate Student Appeals Committee in Saint John, may refuse to hear appeals submitted after the deadline because the notification of an academic decision was withheld for failure to satisfy financial obligations or because notification of an academic decision was not received as a result of a failure to provide the University with an accurate mailing address.

4. Subject to the following regulations, students may appeal academic decisions.

NOTE: Most reviews concerning grades assigned for individual pieces of work or final grades are subject to the Grade Review Process. An appeal to the appropriate appeals committee is permissible only if the review was conducted without due regard to proper procedure, or in a manner which is not fair in all of the circumstances. Students may appeal final grades only after all steps of the grade review process have been completed.

2. Grounds for Appeal

1. The appropriate appeals committee may grant an exemption from the application of a University Regulation or from the effect of an academic decision, on the grounds of compassion, health, or other extenuating circumstances beyond the control of the student. A student requesting such an exemption must state the grounds on which the request is based and provide pertinent documentation.

2. The Committee may grant relief on the grounds that an academic decision has been made without due regard to proper procedure, or in such a manner which is unfair in all of the circumstances. A student requesting such relief on appeal must state the grounds on which the request is based and provide pertinent documentation.

3. Appeals Procedure

1. A student is entitled to seek the advice of the Executive Director of Student Affairs and Services or designate (for Fredericton appeals) or the Director of Student Services (for Saint John appeals) concerning the right of appeal.

2. Where so requested in writing by a student, the Executive Director of Student Affairs and Services (for Fredericton appeals) or the Director of Student Services (for Saint John appeals), shall act on behalf of the student.

35
SECTION B: ADMISSION AND UNIVERSITY REGULATIONS

3. Appeals are to be made in writing, addressed to the appropriate committee by way of letter to the campus registrar.

4. Appeals pertaining to academic status at the end of an assessment period must be filed on or before July 15 of that year. Where circumstances warrant, the Committee may consider student appeals which do not meet the normal deadline requirement.

5. Appeals shall state the grounds on which the appeal is based, provide supporting documentation and evidence and state whether the student will attend the hearing and whether the Executive Director of Student Affairs and Services (Fredericton appeals) or the Director of Student Services (Saint John appeals) will represent the student at the hearing.

6. The Committee may receive documentation in support of an appeal after the July 15th deadline set for the filing of appeal itself. The late filing of such supporting documentation may result in delay in the determination of the case.

7. After receiving an appeal, the Secretary of the Committee shall:
   a. make a reasonable attempt to give notice to the student, or the person acting on the student’s behalf, of the time, place and manner in which the Committee will proceed, and further shall give access to the student or the person acting on the student’s behalf to the materials relevant to the appeal;
   b. give notice to the instructor, Chair of the Department and Dean of the Faculty concerned of the time, place and manner in which the Committee will proceed, and request that any written materials relevant to the appeal be filed with the Committee in such a manner that the right of access provided in a) is observed.

8. The Committee hears and determines the matter. The decision of the Committee, which is provided to the student in writing, is final (see below). No re-appeal of the decision will be heard by the Committee unless new evidence is presented and deemed by the Committee to be of sufficient importance to justify the reopening of the case.

4. Senate Review

A student may request that the relevant Senate review a decision of the appropriate appeals committee.

The only grounds for such a request are:
   a. the decision was made without due regard to proper procedures, with the result that the student was materially disadvantaged; and/or
   b. the decision was made in a manner which is not fair in any of the circumstances.

Advice and Assistance

A student is entitled to seek the advice of the Director of Student Affairs and Services (Fredericton appeals) or the Director of Student Services (Saint John appeals) with respect to an application for Senate review. Where so requested in writing by a student, the Director of Student Affairs and Services (Fredericton) or the Director of Student Services (Saint John) shall act on behalf of the student to the extent requested in application for Review.

Procedures

1. An application for Senate Review shall:
   a. be filed in the Office of the Secretary of Senate within thirty (30) days of the date of the letter of notification of the decision of the appeals committee made under provisions of the Appeal Procedures;
   b. be made in writing, addressed to the Secretary of the Senate, and state the grounds on which the application is based.

2. On receiving an Application for Senate Review, the Secretary of Senate shall:
   a. notify the student or person acting on the student’s behalf of the time, place and manner in which the Review will proceed, and further shall ensure access by the student, or the person acting on the student’s behalf, to the materials relevant to application;
   b. give notice to the appropriate appeals committee of the time, place and manner in which the Review will proceed and request that any written material relevant to the application be filed with Senate in such a manner as that the right of access stipulated in 2a) is observed;
   c. ask the Senate Nominating Committee and the President to establish a Review Committee.

V. Minor Programs

The University offers students an opportunity to broaden and complement their programs of study by completing the requirements for a Minor. A complete list of approved Minor Programs is available in the Registrar’s Office. A Minor program can be a University interdisciplinary Minor or one offered through a faculty or department.

1. Students interested in pursuing a Minor Program should consult with their program advisor to determine if a Minor will be permitted and to discuss its relation to their program of study. Advice and course approval must then be obtained from the coordinator, committee or individual responsible for the Minor. Normally, a student must declare a Minor on or before registration for final year. A student may declare a Minor after this date only with the approval of the Registrar, with the concurrence of the Department(s) concerned.

2. A Minor can be taken only in conjunction with a degree program and must be completed while the student is qualifying for the degree. Successful completion of the Minor will be recorded on the student’s transcript of record. The same procedure must be followed for each successive Minor.

3. A Minor shall consist of eight term courses or the equivalent (a minimum of 24 credit hours) and shall be selected to form a coherent set or sequence of courses. The student must achieve a grade of “C” or better in each course for it to be counted as part of the Minor.

4. A student who has completed a Minor located in one degree program may apply to and, if admitted, enter a second degree program to obtain a second bachelor’s degree. Such a student could obtain the Majors or Honours designation in the same field as the Minor if the requirements for are completed successfully under the regulations governing a “Second Undergraduate Bachelor’s Degree”.

5. Students interested in pursuing more than one minor program must have permission from their faculty advisor. All above regulations apply.

VI. Application to Graduate and Listing of Graduates

A. APPLICATION TO GRADUATE

1. Students must make application to graduate by 1 March, for May graduation and 1 September for October graduation. Such application is done either by submitting an electronic “Application to Graduate” form available from the UNB Homepage (www.unb.ca) or by completing an “Application to Graduate” card available from the Registrar’s Office.

Courses that are attached to a distinct section that ends after the January 15th deadline set for the filing of appeal itself. The late filing of such supporting documentation may result in delay in the determination of the case.

Procedures

1. An application for Senate Review shall:
   a. be filed in the Office of the Secretary of Senate within thirty (30) days of the date of the letter of notification of the decision of the appeals committee made under provisions of the Appeal Procedures;
   b. be made in writing, addressed to the Secretary of the Senate, and state the grounds on which the application is based.

2. On receiving an Application for Senate Review, the Secretary of Senate shall:
   a. notify the student or person acting on the student’s behalf of the time, place and manner in which the Review will proceed, and further shall ensure access by the student, or the person acting on the student’s behalf, to the materials relevant to application;
   b. give notice to the appropriate appeals committee of the time, place and manner in which the Review will proceed and request that any written material relevant to the application be filed with Senate in such a manner as that the right of access stipulated in 2a) is observed;
   c. ask the Senate Nominating Committee and the President to establish a Review Committee.

VII. Requirements for a Second Undergraduate Degree

Second Different Undergraduate Bachelor Degree

1. The general regulations of the University and the regulations of the degree program concerned must be satisfied. Refer to the appropriate section of this calendar for the regulations of the degree program.

2. Degree and departmental regulations concerning option, concentration, Major or Honours must be satisfied. *Throughout these regulations, the use of terms “option”, “concentration”, “major”, and “honours” vary by faculty. All of these terms denote some degree of specialization.

3. The minimum number of credit hours, or courses, which must be successfully completed beyond the work required for the previous degree must not be less than the normal load of the final academic
year in the degree program concerned. More than the minimum number of credit hours, or courses, may be required.

4. The courses taken must be approved by the Dean and the Department, or Departments, under which the option, concentration, Major, or Honours, falls.

5. In Faculties where the credit system is used, at least half the credits for a degree, diploma or certificate must be taken at the University; in Faculties where the year-system is used, two years must be taken at this University. It is normally expected that the final year of study be completed at this University.

6. Candidates for a second different degree may not normally choose the same major, honours, option or concentration as in the first undergraduate degree.

7. Students must make specific application to the Associate Registrar/Admissions for entry to the second different degree program.

8. Only in special circumstances will students be admitted to a third different undergraduate degree program.

9. The final decision on the course work requirements for a second different undergraduate bachelor degree shall be a matter of agreement between the Registrar and the Dean, after consultation with the Chairs of Departments concerned.

Second Same Undergraduate Bachelor Degree

1. A second same degree is permitted in limited cases. The general regulations of the University and the regulations of the degree program concerned must be satisfied. Refer to appropriate section of this calendar for the regulations of the degree.

a. On the Fredericton Campus, the Faculty of Arts and the Faculty of Science permit in a second same undergraduate Bachelor degree.

b. On the Saint John Campus, the Faculty of Arts and the Faculty of Science, Applied Science and Engineering permit a second same undergraduate Bachelor degree.

2. Degree and Departmental regulations concerning option, concentration, Major or Honours must be satisfied.*

*Throughout these regulations, the use of terms "option", "concentration", "major", and "honours" vary by faculty. All these terms denote some degree of specialization.

3. The minimum number of credit hours, or courses, which must be successfully completed beyond the work required for the previous degree must not be less than the normal load of the final academic year of the degree in the program concerned. More than the minimum number of credit hours, or courses may be required.

4. The courses taken must be approved by the Dean and the Department, or Departments, under which the option, concentration, Major, or Honours, falls.

5. In Faculties where the credit system is used, at least half of the credits for a degree, diploma or certificate must be taken at this University; in Faculties where the year-system is used, two years must be taken at this University. It is normally expected that the final year of study be completed at this University.

6. Candidates for a second degree may not normally choose the same major, honours, option or concentration as in the first undergraduate degree.

Students may be permitted to upgrade a Minor or a Major from the first degree under the following Conditions:

a. A minor from the first degree may be upgraded to a Major or Honours after completion of the first degree.

b. A Major from the first degree may be upgraded to an Honours after completion of the first degree.

c. In either case, a notation only will be included on the student record and a second degree will not be awarded.

Students will not be permitted to include a Minor in the second degree.

7. Students must make specific application to the Associate Registrar (Admissions) for entry to the second degree program.

8. Only in special circumstances will students be admitted to a third undergraduate degree program.

9. The final decision on the course work requirements for a second different undergraduate bachelor degree shall be a matter of agreement between the Registrar and the Dean, after consultation with the Chairs of the Departments concerned.

Graduates of other Universities are not eligible to apply under these regulations. Applications from such candidates will be considered for possible acceptance and advance standing on receipt of official transcripts submitted to the Associate Registrar (Admissions).

SECTION B: ADMISSION AND UNIVERSITY REGULATIONS

Students who desire to complete requirements for two different Bachelor Degrees at the same time will be granted such permission provided approval from both Faculties concerned has been granted. If permission is granted, students must be admitted to the second program by the Admissions Office. Requirements for each degree program are determined by each Faculty. This arrangement is separate from the Concurrent Degree Programs offered by the University.

VIII. Academic Offences

NOTE: Consideration of a request to withdraw from a course or courses involved in an academic offence will not be granted until the case is resolved.

Academic offences include, but are not limited to, the following:

A. PLAGIARISM

Plagiarism includes:

1. quoting verbatim or almost verbatim from any source, regardless of format, without acknowledgement;

2. adopting someone else's line of thought; argument, arrangement, or support evidence (such as, statistics, bibliographies, etc.) without indicating such dependence;

3. submitting someone else's work, in whatever form (essay, film, workbook, artwork, computer materials, etc.) without acknowledgement;

4. knowingly representing as one's own work any idea of another.

NOTE: In courses which include group work, a penalty may be imposed on all members of the group unless an act of plagiarism is identified clearly with an individual student or students.

Procedures

In the case of plagiarism, the instructor must make every reasonable effort to discuss the case with student or group and follow one of two courses of action:

1. If the instructor is satisfied that the plagiarism was the result of a genuine misunderstanding, the instructor shall complete an academic offence incident report in a form approved by the Registrar's Office, containing the student's name and the particulars of the incident, and submit to the Registrar who shall advise the appropriate Dean, and the Chair of the student's program or Department where applicable. The Registrar shall notify the student by registered letter; or electronic mail of the regulations governing plagiarism, the possible consequences, the student's right to appeal, the right to appear before the appropriate appeals committee (Concurrent Standing and Promotions Committee on the Fredericton campus, and Senate Appeals Committee on the Saint John campus), and the procedures involved. The Registrar shall make available to the student a copy of the academic offence incident report and supporting documentation. While a case of plagiarism resulting from a genuine misunderstanding will not be considered a student's first offence, a second plea of ignorance by the same student in response to a subsequent allegation of plagiarism will not be accepted; similarly, a subsequent incident report indicating that the alleged plagiarism is a result of genuine misunderstanding responding will be treated as an allegation of deliberate plagiarism. A student responding to the instructor's allegation must do so in writing within three weeks of the date of the Registrar's notification. The student is urged to submit to the appropriate appeals committee a written statement regarding the case.

In a first incident of plagiarism resulting from genuine misunderstanding, the instructor may permit the student to submit a genuine piece of work to be graded in place of the one plagiarized. If the student does not appeal, the time allowed for submission of work is three weeks from the date of the Registrar's letter of notification. In the case of an appeal, where the instructor's allegation is upheld, the period of time allowed for submission is as determined by the appropriate appeals committee.

2. If, in the view of the instructor the plagiarism was deliberate, the instructor shall complete an incident report in a form approved by the Office of the Registrar, containing the student's name and the particulars of the incident, and shall submit to the Registrar who will advise the Dean of the Faculty concerned and the Chair of the student's program or Department where applicable. The Registrar shall notify the student by registered letter and/or electronic mail of the regulations governing plagiarism, the possible consequences, the student's right to appeal, the right to appear before the appropriate appeals committee, and the procedures involved. A student appealing the charge of an academic offence must do so in writing within three weeks of the date of the Registrar's letter of notification. On receiving an incident report alleging an act of deliberate plagiarism, or on receiving an incident report alleging a second commission of plagiarism by the student which is determined viewed by the instructor to be as a result of genuine misunderstanding, the Registrar shall refer the matter for a hearing to the appropriate
SECTION B: ADMISSION AND UNIVERSITY REGULATIONS

Penalties for Deliberate Plagiarism

In case of deliberate plagiarism, the penalties are:

**First Offence:** If the student does not appeal or if, on appeal, the Committee upholds the instructor’s allegation:

1. A notation will be placed on the student’s transcript of academic record concerning the academic offence. The length of time of the notation appears on the student’s transcript of academic record is to be decided when the penalty is imposed and will depend on the severity of the offence.

2. The student may be required to submit a satisfactory and genuine piece of work to replace the one involving plagiarism. If the assignment is not resubmitted or is unsatisfactory, the student will receive a grade of F (zero) in the course. **NOTE:** If this penalty is assessed, the period of time allowed for the submission of the work will be determined by the Registrar in consultation with the faculty member making the charge and, where appropriate, the Committee.

3. The student will receive a grade of F (zero) for the piece of work and, depending on the severity of the offence, may receive a grade of F for the course.

4. Other penalties as outlined in penalties for Other Academic Offences may be imposed.

**Subsequent Offence:** In cases where the Committee considers that the student has plagiarized again:

1. The student will receive a grade of F (zero) for the course, and a notation of the academic offence will appear on the student’s transcript of record. The length of time the notation appears on the student’s transcript of academic record is to be decided when the penalty is imposed.

2. Other penalties as outlined in penalties for Other Academic Offences may be imposed.

**B. OTHER ACADEMIC OFFENCES**

1. Cheating on examination, tests, assignments or reports, including but not limited to:
   - Impersonating a candidate at an examination or test or in connection with any assignment in a course or availing oneself of the results of impersonation.
   - Obtaining, through theft, bribery, collusion, purchase, or other improper manner:
     a. an examination or test paper prior to the date and time for writing the examination or test;
     b. academic materials belonging to another person, e.g. laboratory reports, assignments, papers, computer materials, datasets.

2. Fabricating or knowingly submitting false assignments or credentials, records, transcripts, or other academic documents.

3. Submitting a false health or other certificate.

4. Submitting identical or substantially similar work for one course or program of study, which has been or is being submitted for another course or program of study, without the prior express knowledge and approval of the instructors.

5. Interfering with the right of other students to pursue their studies.

6. Knowingly aiding or abetting any of the above offences.

7. Tampering with, or altering, in any deceptive way, work subsequently presented for a review of the grade awarded.

**Procedures**

The instructor and, where applicable, the invigilator or other appropriate person shall, where practical, discuss the matter with the student concerned.

The instructor or the instructor’s representatives, if satisfied that an academic offence has been committed, shall complete an academic offence incident report and shall submit it, together with attached information, to the Registrar. The Registrar shall report it to the Chair of the Department (where applicable) and the Dean of the Faculty concerned. Each case will be referred by the Registrar to the appropriate Committee for review and appropriate action. The Registrar shall inform the student by registered letter and/or electronic mail of the referral to the appeals committee, the student’s right to respond, the wish of the Committee that the student be present when the case is heard, and the procedures involved. A copy of the academic offence report and attached information will be provided to the student in a timely manner. The student is urged to submit to the Committee a written statement regarding the case. A student responding to the decision, shall do so in writing within three weeks of the date of the Registrar’s letter of notification.

**Penalties**

A student who is found guilty of an academic offence will have two penalties imposed:

1. A notation on the student’s transcript of academic record concerning the academic offence. The length of time the notation appears on the student’s transcript of academic record is to be decided when the penalty is imposed.

2. A grade of F (zero) in an examination, test or course. One of the following penalties may also be imposed.

3. A recommendation to the President for suspension for a specified period. The recommendation is to include the length of time the notation is to appear on the student’s transcript of academic record.

4. A recommendation to the President for expulsion from the University. If the student is expelled, a permanent notation will appear on the student’s transcript of academic record.

**C. GENERAL**

1. Consideration of a request to withdraw from a course or courses involved in an academic offence will not be given until the case is resolved.

2. Students on the Fredericton Campus will submit appeals to the Senate Student Standings and Promotions Committee; on the Saint John Campus, appeals will be submitted to the Students Appeals Committee.

**IX. Official Withdrawal (Voluntary) From University**

A student who is considering withdrawing from study is strongly advised to consult with his or her faculty advisor. If the student decides to withdraw from University, the Registrar’s Office must be notified in writing and the necessary process on the computerized registration system must be completed to avoid failing grades. The official date of withdrawal will be the date written communication is received in the Registrar’s Office or the date recorded on the computerized system. Notifying instructors or ceasing to attend lectures does not constitute official withdrawal.

**X. Confidentiality, Security and Release of Student Academic Records**

The term “official academic record” when used in these policies means the information concerning admission and academic performance of students as it is contained in any record of information however recorded or stored.

**A.** The official records of students are the property of the University.

**B.** The Registrars and any designated officer, where applicable, shall retain custody of the official student academic records, however recorded or stored, in the Office of the Registrar, the School of Graduate Studies, and the Faculty of Law, all of the University of New Brunswick Fredericton and Saint John (“the University”), and shall be responsible for the security and maintenance of all such records. The security and maintenance of the electronic and student information system used to retain student records shall be the responsibility of the Department of Information Technology Services.

**C.** Students desiring to have their names changed on their official student record be it by means of alteration, deletion, substitution or
addition must submit appropriate supporting documentation to the Office of the Registrar.

**D. RELEASE OF INFORMATION**

1. Except as provided herein, official academic records are confidential and shall not be divulged to any third party, including parents or guardians, except as noted in this statement, without the written consent of the student concerned.

2. Students have the right to official copies of their University of New Brunswick transcripts of record. Official transcripts issued to students are identified as such on the transcript. Official transcript order information is found on the transcript request webpage (https://eservices.unb.ca/ecommerce/transcript). Any requests should be submitted to the Registrar’s office with the required fee. Transcripts and degree parchments will be withheld for students, including former students, who have failed to meet their financial obligations to the University. Students have the right to access their transcripts of record as held in the computerized file and to print unofficial copies of their transcripts of record.

3. Partial transcripts will not be issued.

4. Transcripts and personal information contained in the official student records shall be released only in accordance with University policy:
   a. Where the person to whom the information relates has identified that information in particular and has consented to its disclosure;
   b. For the purpose for which it was obtained or compiled or for a purpose consistent therewith;
   c. To an officer or employee of the University who needs the record in the performance of his or her duties;
   d. For the purpose of complying with a requirement to provide information lawfully imposed upon the University by a federal/provincial government authority;
   e. Where the disclosure is necessary to aid in the investigation of allegations that individuals have made false statements or engaged in other misleading conduct concerning their attendance or performance or status within or completion of an academic program of the University;
   f. In compelling circumstances affecting the health or safety of an individual, if upon disclosure, notification thereof is mailed to the last known address of the individual to whom the information relates;
   g. In compassionate circumstances, to facilitate contact with the next of kin or a friend of an individual who is injured, ill or deceased; or
   h. To a person who has been authorized by the individual to whom the information is related to make an enquiry on that individual’s behalf or, where that individual is incapacitated, has been authorized by the next of kin or legal representative of that individual.

5. The Campus Registrar may authorize access to academic records for the purpose of research. Students of the University may examine their personal official academic records held in paper files, with the exception of letters of reference provided to the University in confidence. A member of the Registrar’s Office or a designated officer on the campus where the record is held will be present during such an inspection. Students may examine letters of reference or other information provided to the University in confidence only with the written permission of the referee or writer being the first requested and received by the appropriate Registrar or designated officer holding the file.

6. The Office of the Registrar will not normally provide students or third parties, except as noted below, with copies of documents on file, such as transcripts from other institutions, or correspondence provided to the University in confidence. In the case of a request for copies of documents made to a Campus Registrar’s Office, an exception may be made in severe situations such as where an international student is unable to obtain copies of original documents. If the request is approved, the Registrar will authorize copies of such documents to be forwarded to another institution marked “copy of the original documents on file”.

7. The University considers certain information, that is, a student’s name, dates of university attendance, verification of degrees obtained, to be public information. Such information may be disclosed by the Campus Registrar or designated officer without the consent of the student. Students who object to the release of such information shall notify the Registrar of the campus where the information is held in writing, giving the specific objection or objections. The Registrar shall then determine what action, if any, will be taken and advise the student and the Designated Officer where necessary.

**SECTION B: ADMISSION AND UNIVERSITY REGULATIONS**

8. The University routinely releases student e-mail identifiers while the student is enrolled at the University. Students who object to such release must notify the Campus Registrar.

9. The University routinely provides, through secure on-line access a digitized image of the student identification photograph to individual instructors during the period the student is registered in the instructor’s course. The Deans or their designates, Associates and Assistant Deans where specifically authorized by the Dean, the Director of the College of Extended Learning, Directors of Student Services, the Student Advocate, the Director, Associate and Assistant Directors of Residential Life, and the University’s security personnel also will have access to such images. Residence Coordinators, House Dons and Associate Dons of the residence administrative team on the Fredericton campus and the Residence Academic Leaders, Residence Coordinators and Manager of Residence and Conference Services on the Saint John campus will have access to such images during the period when a student is living within a house or residence for which the persons holding these positions are responsible. Students who object to such access to their student identification photograph should notify the Campus Registrar.

10. Deans, Associate/Assistant Deans, faculty Student Advisors and the Director of College of Extended Learning shall have unrestricted electronic access to academic student records.

   a. Full-time faculty members shall have electronic access to academic student records of students registered or formally seeking registration in their courses as may be required in the performance of the faculty members’ duties.

   b. Contract Academic Instructors may be granted electronic access to academic student records of students registered or formally seeking registration in their courses if such access is required in the performance of the Instructor’s duties as authorized by the Dean or Director of College of Extended Learning.

   iii. Normally, Contract Academic Instructors who are students at UNB should not have access to student academic records. Access is provided during the period the student is registered or formally seeking registration in the Instructor’s course and for 45 days following the end of term in which the course is scheduled.

11. Other Faculty and College personnel may be granted electronic access to academic student records required in the performance of their duties as authorized by the Dean or Director of the College of Extended Learning on such specific terms as the Dean or Director shall determine.

12. Members of administrative and other academic units may be granted electronic access to academic student records required in the performance of their duties upon a request to and as authorized by the Campus Registrar or designate on such specific terms as the Registrar or designate shall determine.

Access is provided on the explicit condition that such information in the electronic academic student records shall not be released to others except as may be permitted in accordance with these regulations.

**Statistics Canada**

The Federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used only for statistical purposes, and the confidentiality provisions of the Statistics Act prevent the information from being released in any way that would identify a student. Students who do not wish to have their information used can ask Statistics Canada to remove their identifying information from the national database. To make such a request or for further information please contact Statistics Canada by email at: PSIS-SIEP. contact@statcan.gc.ca or by mail: Institutional Surveys Section, Centre for Education Statistics, Statistics Canada, 150 Tunney’s Pasture Driveway, Main Building, 2100-K, Ottawa, Ontario, K1A 0T6.

b. **Maritime Provinces Higher Education Commission (MPHEC)**

The University discloses personal information such as name, date of birth, address(es), telephone and email address to the Maritime Provinces Higher Education Commission (MPHEC). MPHEC collects data on behalf of Statistics Canada, and uses the data for similar purposes to Statistics Canada. Students who do not wish to have their personal information used by MPHEC for reporting purposes can choose to opt out of the MPHEC reporting contacting the appropriate Registrar’s Office.
XI. Procedure for Dealing with Student Gifts

As a matter of principle, the University discourages the practice of students giving gifts to faculty members. However, from time to time faculty members may be presented with a gift from one or more students or an entire class that expresses appreciation. Such gifts may range from flowers to items of considerable value. In some cases the offering of a gift may reflect a cultural custom on the part of the student(s) concerned. Faculty members should use their professional judgement to decide whether or not to accept such gifts from students, and may wish to consider the following alternatives, especially when only one or two gift givers are involved:

a. Students offering gifts of money could be encourage to make a donation to a University scholarship, bursary or prize fund, or some other University purpose. The gift could be designated “in appreciation of Professor xxxx”, and sent directly, or through the faculty member’s Dean, to the Development Office on the Fredericton Campus, or the Office of Advancement, Communications, and Recognition on the Saint John campus (the student would receive a tax receipt for a charitable donation).

b. Students offering gifts “in kind” which are inappropriate or have a significant monetary value could be referred to the faculty member’s Dean, the Development Office on the Fredericton Campus, or the Office of Advancement, Communications, and Recognition on the Saint John campus.

c. In lieu of gifts of money or “in kind,” students who wish to express thanks or appreciation to a faculty member could be encouraged to:
   i. Nominate the faculty member for a Faculty or University teaching award.
   ii. Write a letter of appreciation to the faculty member’s Dean or the Vice-President.
   iii. Send a card or note of thanks to the faculty member.

Under any circumstances, faculty members should avoid accepting gifts from students prior to submission of final grades of those student’s, or completion of supervision.

XII. Academic Dress

A. GOWNS

Undergraduate: Plain black stuff material, sleeveless.

Bachelors: Black stuff gown falling below the knee, with full sleeves reaching to the wrist and terminating in a point.

Masters: Black silk or stuff gown, falling below the knees, with long sleeve with semi-circular cut bottom.

Doctors: A scarlet cloth robe, faced with silk of the same color as the lining of the hood worn.

B. UNB ACADEMIC HOODS

Each degree has its distinctive hood as follows:

<table>
<thead>
<tr>

</table>
GENERAL REGULATIONS ON STUDENT NON-ACADEMIC CONDUCT

The following general regulations have been approved by the Board of Governors of the University and are now in effect until such time as they may be revised by the Board.

A. The University of New Brunswick is a community of faculty, staff, students and administrators involved in teaching, learning, research and related activities. The University assumes that students come to the University for a serious purpose and accept responsibilities as members of the University community.

B. In accordance with the commitment set out in the University’s Mission Statement to provide an environment conducive to the development of the whole person, all members of the University community - staff, faculty, students and administrators - have the right to work and/or study in an environment which affords them respect and dignity, and is free from danger, discrimination, harassment, intimidation, and behaviour which is destructive, disruptive or unlawful.

C. The University recognizes students’ freedom to manage their personal lives, behaviour and interpersonal relations in a manner consistent with the above principles, with the laws of Canada and New Brunswick, and with University regulations. In exercising their entitlement to participate in University programs and activities, students are expected to:

1. abide by University regulations;
2. respect the integrity of University programs and activities;
3. acknowledge the diversity of the University community and freedom of all members to participate in University programs and activities;
4. promote the peaceful and safe enjoyment of the University facilities by other members of the University and public;
5. conduct themselves at all times in a manner that will reflect credit on themselves and the University.

D. The University has defined standards of student behaviour and made provisions for student discipline when they engage in conduct that is inconsistent with the foregoing principles. It shall be deemed, and the Board considers, that each of the following types of conduct is breach of University regulations, and is grounds for consideration of discipline up to and including suspension or expulsion.

Unacceptable types of behaviour include, but are not limited to:

1. violence, harm or threat of harm to any person or the person’s property;
2. unnecessarily endangering the health or safety of other persons;
3. possession of a firearm or other weapon on University premises without specific University permission;
4. acting or speaking in a disruptive, disorderly, indecent or offensive manner, or in a way that might reasonably cause fear;
5. unauthorized infringement or prevention of access by others to University classes, services, events, facilities, and property;
6. disruption or obstruction of any authorized activity, event, class or service of the University, or interference with any person’s rights to carry out legitimate activities, speak or associate with others;
7. refusal to comply with a reasonable request by authorized University officials including Security and the Student Campus Police.
8. failure to provide identification to authorized University officials when asked, or providing false identification or information;
9. obstruction of Security or Student Campus Police in the performance of their duties;
10. unauthorized use or occupation of any University property;
11. conduct that results directly or indirectly in damage, misuse, defacing, or theft of University property;
12. improper use or consumption of alcoholic beverages, restricted drugs, or intoxication or impairment in a public place;
13. other conduct that is prohibited or proscribed by University rule, regulation or policy;
14. contravention of any provision of any federal, provincial or municipal, statute on University premises or while engaged in University authorized events or activities.

E. The University of New Brunswick Act provides broad authority for dealing with non-academic student conduct. For example:

1. the President has broad discretionary disciplinary powers including suspension for dealing with academic and non-academic disciplinary matters;
2. the Board of Deans has jurisdiction for matters of student discipline;
3. the Board of Governors may approve the expulsion of a student from the University;
4. the Board of Governors may make rules and regulations for the discipline of students and the imposition of fines and other penalties and sanctions; the Student Disciplinary Code and the Internal Residence Discipline Policy are examples.

F. As a general principle, the various authorities for dealing with student discipline shall be exercised so as to avoid the imposition of punishment by more than one authority for the same or an included offence. This principle shall not preclude University authority being exercised to suspend a student from the University, or to suspend or evict a student from a University residence, pending or following the imposition of discipline, where such action is deemed to be in the best interests of the University community.

This principle is not intended to preclude a student organization from taking action against a student in accordance with its constitution and bylaws on the same facts giving rise to disciplinary action under University authority.

G. Information regarding University disciplinary regulations and procedures is available from the offices of the Director of Student Affairs and Services, the Director of Security and Traffic, the Chief of Student Campus Police, and the Commissioner of Student Discipline on the UNBF campus, and from the Director of Student Services and the Manager of Safety and Security on the UNBSJ Campus. When students believe that a member of the University community has violated the principles stated in B above in relation to them, or where students are uncertain about whether behaviour they are contemplating may violate University regulations, they should consult the Chair of their Department, or the Dean of their Faculty, or the Director of Student Affairs and Services (UNBF), or the Director of Student Services (UNBSJ), or the Director of Security and Traffic (UNBF), or the Manager of Safety and Security (UNBSJ), or the Chief of Student Campus Police, or the Commissioner of Student Discipline, as appropriate.
SECTION C: UNDERGRADUATE FEES AND FINANCIAL INFORMATION

The University reserves the right to make changes, without notice, in its published rates of tuition, residence and other fees including regulations for payment thereof.

NOTE:
1. Complete 2019-2020 tuition residence, and other fees are available online at: https://www.unb.ca/financialservices/students/undergraduate_tuition_and_fees/index.html as soon as the Board of Governors approves the schedules in the Spring of 2019.
2. Fees are applicable to both Fredericton and Saint John Campuses.
3. The University will waive tuition fees only for both full and part-time students that are considered by the CNIB as legally blind, upon presentation of proof to the Financial Services Office.
4. For graduate fees, see School of Graduate Studies Calendar, or the Graduate School website at http://www.unb.ca/gradschl

**FEE PAYMENT OPTIONS FOR UNB STUDENTS**

WHEN CAN FEES BE PAID?
Payment of fees can be made at any time during the month of May, June, July, August and until September 9, 2019 for Fall Term and January 9, 2020 for Winter term. Students who have not paid or made satisfactory arrangements with Financial Services by the due date will be charged a Late Payment Fee of $75 and may have their course selections and IT services cancelled. Such students will be required to register again once fees have been paid. There is a $125 re-registration fee to have you added back into your courses after payment has been made. To avoid line ups you are encouraged to settle your account as early as possible using one of the options below:

**For All Students:**

**Credit Card:**
Payment by Visa or Mastercard can be made for residence and other related fees with a convenience fee applied. Please click here for details.

**Online/Telephone Banking Through Your Financial Institution:**
1. You may pay your student tuition through Online or Telephone Banking as if you are paying a utility bill:
   a. Contact your bank to ensure you are set up for online/telephone banking if you are not currently using the service.
   b. Use your Student ID Number as your account number.
   c. Enter the amount to be paid and the date on which you would like to pay
   d. Complete the transaction as if you are paying a utility bill
2. Online, telephone and bank teller payments take 2-3 business days to be received by the university and posted to your student account. For this reason, payment should be made in advance of the tuition payment deadline to ensure it has been processed by the tuition payment deadline.
3. If you do not pay your tuition by the deadline, your student account will be assessed a Late Payment Fee of $75 as well as an interest charge of 12% per annum.
4. Online banking is available at the following institutions: Royal Bank, BMO, CIBC, Scotia, TD/Canada Trust, HSBC, Capital, Credit Union, and others.
5. If you are having difficulties setting up your payee account, your bank will be able to assist you.
6. If you do not pay your tuition by the deadline, your student account will be assessed a Late Payment Fee of $75 as well as an interest charge of 12% per annum.

**International Payments (RECOMMENDED for International Students):**
1. International students can now pay using CIBC International Student Pay.
2. This is a fast, safe, and easy way to pay.
3. To use this option, visit the following website at http://www.unb.ca/financialservices/students/paymentoptions/internationalpayments.html

**Cheque / Money Order / Bank Draft:**
1. Please make all payments payable to “University of New Brunswick”. You must include student name and student number with your payment.
2. Please complete the Fee Payment form if you are mailing in a payment. This form is located at: http://www.unb.ca/financialservices/resources/pdf/students-accounts/fee_payment_form.pdf
3. To send payment through regular mail to the campus where you are registered:

5. Payment due in our office no later than the payment deadline.
6. Any cheque returned by the bank must be replaced by cash, certified cheque, or money order and must include payment of a $25.00 NSF charge that will be placed on the account.

**In Person Debit Card/Cash:**
1. If you prefer to pay in person with a debit card or cash, visit our cashier at the above locations. Please have your student ID card with you.
2. For debit card payments, be sure to check with your bank to ensure your card has the appropriate limit in order to pay your fees. Most Financial Institutions are able to increase your daily limit temporarily.

**Federal and Provincial Student Loans:**
Students who apply for and are granted federal or provincial student loans can use these funds to pay their tuition and fees. For information on how to apply for student loans, please visit the following website: http://www.canlearn.ca/eng/index.shtml

Most Provincial and Federal loans are now being processed online. This allows the University to electronically deduct the amount owing to the University from your loan as long as your course registration is complete. Fees will be deducted based on your course registration at the time your loan is electronically received. If you are aware that your loan is going to be delayed for any reason, and that you may not make the payment deadline, it is your responsibility to provide proof of assessment notice confirming your funding or a down payment to the appropriate campus to avoid applicable fees and/or penalties.

**Payment Arrangements:**
SECTION C: UNDERGRADUATE FEES AND FINANCIAL INFORMATION

1. UNB will consider down payment and monthly payment arrangements for those students experiencing financial difficulties.
2. All payment plans MUST be arranged by the fee payment deadlines.
3. Please visit Financial Services on either campus and speak to a cashier about setting up a payment plan. At that point, you may be referred to see a Supervisor or Financial Aid.
4. You will be required to make a down payment and sign a payment plan agreement at that time.
5. Monthly interest is charged on outstanding balances.
6. Failure to comply with payment arrangements will result in late fees being charged to the account and can result in cancellation of IT services without notice and subsequent deletion of courses.

Contacts for Questions about Fees or Payments:

UNB FREDERICAON and SAINT JOHN Tuition and Fees 2019 - 2020

For details on the various tuition and fees for both the Frederickton and Saint John campuses, please visit the link below. Should you have any questions or concerns after viewing, please contact the Student Receivables at stufees@unb.ca or 453-4624. All due dates within this section are in relation to the 2019-2020 academic year.

https://www.unb.ca/financialservices/students/undergraduate_tuition_and_fees/index.html

Student Union Health and Dental

Health and Dental Insurance is a mandatory fee unless you already have your own insurance coverage. Health and Dental Insurance opt-outs must be done online each new academic year at http://www.wespeaksstudent.com/. For more information please visit their website or contact the Student Union Office at (506) 453-4955. Opt-outs must be completed by September 21, 2018 for the fall term or January 25, 2019 for the winter term. Additional Family Health and Family Dental can be arranged by contacting the Student Union.

International Health Insurance

It is mandatory for International Students to participate in the UNB offered International Student Emergency Health plan, including Travel Insurance. Only students who have a Medicare Card, or students who are in a mandatory Sponsored Program insurance plan can ask for an exemption of the Emergency Plan only. *The International Health Travel Insurance is a mandatory fee that cannot be opted out of and is $64.50 for the academic year payable with first term of study. An international Health Application form must be completed each year and forwarded to Financial Services, Frederickton, IUC Physics & Administration Building, 8 Bailey Drive, Room 001. Opt-outs must be completed by September 21, 2018 for the fall term or January 25, 2019 for the winter term.

CANADA STUDENT LOANS FOR NEW BRUNSWICK STUDENTS

Canada Student Loans for New Brunswick students will be processed online mid-August. Course registration process MUST be completed. If a loan has not been electronically received by the payment due date, the student must provide an assessment notice and/or a down payment to avoid the Late Payment fee charge and/or losing IT Access and course deletion.

SCHOLARSHIPS

Scholarships, awarded by the University, will be applied to the student’s account as a credit, in equal amounts, by the term. Any student paying fees by the term should reduce the amount paid at Registration by half the amount of the scholarship.

- Summer Term is charged per course; please refer to the Summer Course Fees.
- For financial purposes, full-time fees apply to students registered in the equivalent of four or more courses per term. Part-time fees apply to students registered in the equivalent of three or fewer courses per term. (The Registrar’s definition of these terms differ)
- For inquiries on undergraduate fees or tuition, e-mail Student Fees or phone (506) 453-4624
2019-2020 Residence Fees Fredericton and Saint John Campus

All residence information contained in the below link are for 2019-2020. Residence fees are due on or before September 9, 2019 for the fall term and on or before January 9th, 2020 for the winter term. Should you have any questions or concerns after viewing, please contact the Student Receivables at stufees@unb.ca or 453-4624.

(Note: A deposit of $60 is required for use of graduation regalia. Upon return of the regalia, $25 is refunded.)

Tuition Fees cover all the normal costs of the University registration, libraries, creative arts, athletics and regular examinations during a full academic year. Part-time students may pay fees by the course, to a maximum of three courses per term. (See Definition of Full-time and Part-time Student below.)

Definition of Full-Time and Part-time Student. Determination of a student’s status as a full-time in a term will be based on the following criteria:

1. A student carrying the equivalent of four or more courses in a term is a full-time student;
2. A student carrying less than the equivalent of four courses in a term is a part-time student:
   a. a term course, weighted at 0-5 credit hours, is the equivalent of one course;
   b. a term course, weighted at 6-11 credit hours, is the equivalent of two courses;
   c. a term course, weighted at 12 or more credit hours, is the equivalent of four courses;
   d. a full-year course, weighted at 0-5 credit hours, is the equivalent of one-half course in each of the two terms;
   e. a full-year course, weighted at 6-11 credit hours, is the equivalent of one course in each of the two terms;
   f. a full-year course, weighted at 12-17 credit hours, is the equivalent of two courses in each of the two terms;
   g. a full-year course, weighted at 18 or more credit hours, is the equivalent of three courses in each of the two terms;
   h. an audited course is one-half the course equivalent of the same course taken for credit.

Audit. Part-time students may audit courses with registration and payment of 50% of the undergraduate tuition and 100% of mandatory fees unless auditing with enrolment restrictions. (Where priority is given to the student wanting to take the course for credit.)

Differential Fees. Full-time students who are not Canadian citizens or landed immigrants will be required to pay a fee differential of $9469.00. Part-time non-Canadian or non-resident students must pay a fee of $947.00 per term course payable in full at registration. Students who receive landed immigrant status will have their differential fees adjusted for the term in which the landed status occurs.

Work Term Fees. Students participating in a Co-op Program or Professional Experience Program (Engineering) will be required to register and pay work term fees. Participants will be required to pay the student health insurance fee at the time of registration. The PEP work term fee and Co-op work term fee are due at the end of the second month. Payments for both work terms received after the applicable date will be subject to late fees and interest charge.

Faculty of Education Out-of-Provence Internship. The Faculty of Education may make arrangements for students seeking out-of-province Field Studies practicums. Students undertaking out-of-province placements will be assessed an out-of-province intern differential fee of $500.00. Further information is available from the Chair of Student Teaching.

Application Fee. An application fee of $65.00 must accompany all applications. The fee is non-refundable.

Admission Deposit. A non-refundable confirmation deposit of ($100) in the form of a certified cheque, money order, Visa, Master Card, or American Express is payable to Admission Office, UNB, as a confirmation of acceptance. The first term tuition payment can be reduced as a result of this advance payment. The admission deposit for the Nursing Program is $250. The deposit will be forfeited if the student decides not to attend UNB, but it would be reimbursed if proof is provided that a student visa could not be obtained.

Late Payment Fee. A Late Payment Fee of $75.00 will be charged to all students who fail to pay fees or to negotiate their student loans by the published payment due dates.

Re Registration Fee. Course registrations may be cancelled if a student fails to negotiate his/her student loan or make payment arrangements by the required payment due dates. A Re Registration Fee of $125.00 will be applied to the student’s account when the student’s course registrations have been deleted and the student requires re-registration into their courses.

Non-Sufficient Funds (NSF) Fee. An NSF Fee $25 will apply to any cheque or financial transactions which is returned by the bank (for any reason).

Health and Accident Insurance. Students should refer to “Section D - Accommodations and Services” - of this calendar for details of available health and dental coverage.

Student Organization Fees. Full-time undergraduate students in Fredericton and Saint John will pay student association fees for 2019-2020, in the amounts of $37.50 per term and $70.00 per term respectively. Part-time students in Fredericton will be represented by ALPS (Adult Learners and Part-Time Students). The
SECTION C: UNDERGRADUATE FEES AND FINANCIAL INFORMATION

compulsory fee for all Fredericton part-time students will be $12 per term course. The compulsory fee for all Saint John part-time students will be $13.50 per term course.

Residence Fees - Fredericton: The Fredericton Residence Fees include both room and dining (various dining plans including structured meals and some discretionary dining cash) and cover a period from the day the residence open in the fall and (date differs for new and returning students) until the last day after the students last regularly scheduled examination in December, and from the day before classes start in January until the day after the student’s last regularly scheduled examination in the spring. Residence meals are served in (one dining hall only) during holiday weekends, during the fall or winter term reading weeks, and during exam periods. There is no dining food service between terms (i.e. Christmas break).

The University has a limited number of 1, 2 and 3 bedroom apartments restricted to full-time UNB students. All tenants are required to sign a lease, pay a damage deposit, and issue post-dated cheques for monthly rent. Interested persons should contact the Residence Administration Office, UNB, P.O. Box 4400, 20 Bailey Dr., Fredericton, NB., E3B 5A3.

Residence Fees - Saint John: The Saint John Residence fees includes a declining balance food plan and covers the period from Labour Day until the day after the students last examination in December, and the day before classes start in January until the day after the students last regularly scheduled examination in the Spring. All holidays during each term will follow the weekend hourly meal schedule. There is no meal plan food service over the Christmas Break. During March Break the students who remain in residence may continue to use their meal card during the operational hours of food service.

REGULATIONS FOR PAYMENT OF UNIVERSITY FEES

Payment of Fees: Tuition, residence, and applicable fees, are payable on Sept 9, 2019 in the Fall term and on Jan 9, 2020 in the winter term for all Fredericton and Saint John Undergraduate Students. Full time students may pay in two instalments. When such option is exercised, refer to http://www.unb.ca/financialservices/students/index.html.

Late Payment Fee: A Late Payment Fee of $75 will be charged to all students who fail to pay fees or to negotiate their student loan by the published payment due dates.

Re Registration Fee: Course registrations may be cancelled if a student fails to negotiate his/her student loan or make a payment arrangements by the required payment due dates. A Re Registration Fee of $125 will be applied to the student's account when the student's course registrations have been deleted and the student requires re-registration into their courses.

Cancellation of IT Services & Courses: Registration is not complete until all fees have been paid or satisfactory arrangements have been made with Financial Services. Any student who fails to pay the required fees or to make satisfactory arrangements by the payment due dates will have his/her IT Access frozen and course selections cancelled; such students will be required to register once again once fees have been paid. The Re Registration fee of $125 will apply.

Interest on Student Accounts: Interest is calculated at an annual rate of 12.0%. Interest may be incurred any time after the due date. Interest is calculated based on the daily account balance and charged monthly.

Delinquent Account: Degrees, grades and transcripts will be withheld for students and former students who have failed to meet their financial obligations. Such students will not be permitted to register once again until all overdue accounts have been paid. At the discretion of Financial Services, delinquent student accounts will be referred to a collection agency.

Scholarships: University awards and scholarships will be applied to the student’s account as a credit, in equal amounts, by the term. The full dollar value of awards and scholarships may be used by students paying the entire year's fees in the first term. Any scholarships amount greater than the fees due will be refunded upon request.

Government Student Loans: Most Provincial and Federal loans are now being processed on-line. This allows the University to electronically deduct the amount owing to the University from your loan as your course registration is complete. Fees will be deducted based on your course registration at the time your loan is electronically received.

• In Fredericton, advise Financial Services in person or call (506) 453-4624
• In Saint John, advise Financial Services or Financial Aid (506) 648-5501

Students are encouraged to check their UNB student web statements regularly in order to monitor that their tuition is paid.

If a loan has not been electronically received by the fee payment due date, the student must provide an assessment notice and/or a down payment to avoid applicable late fees and/or losing IT access and course deletion.

Tax Receipts: For tax purposes, Revenue Canada Tuition and Education Credit Certificates (T2022A) will be available through the student web portal before the end of February. T2022As will only be mailed to those students who do not have an active PIN. IT access remains active for a period of one year after the last term of attended courses.

UNIVERSITY REFUND POLICY

A student who wishes to withdraw from a course(s) must do so on-line or notify the Registrar is writing. Ceasing to attend the lectures or notifying the instructor does not constitute official withdrawal. The effective date will be the on-line withdrawal date or the approved date as indicated by the Registrar. Students will be charged the appropriate pro-rated fee up to the drop date as outlined below.

Students may drop and add courses up to the last day to add the term without being charged a pro-rated fee. Courses dropped after the last day to add will be subject to pro-rated tuition fees from the first week of classes up to the withdrawal date shown on the student academic record. The Technology Fee, Facility Improvement fee and Health fee are pro-rated. All other compulsory fees are not pro-rated and are non-refundable.

For students enrolled in online courses, please be aware that refund rules vary from regular term courses due to the extra timeframe allowed to complete. For more information on OALP refunds, please visit the College of Extended Learning website at http://extend.unb.ca/oalp/oalp_gen_info.php

The minimum administrative charge for all refunds will be $25 for full-time students and $10 per three-credit hour course, to a maximum of $25 for part-time students.

Students who are funded by government student loans should be aware that dropping courses may impact loan funding.

The minimum administrative charge for processing International refunds.

NOTE: Please refer to Summer Session calendar for relevant add/drop dates.

REGULATIONS FOR PAYMENT OF UNIVERSITY FEES

FREDERICTON
1. To reserve a room, all students will be required to pay a non-refundable $500.00 residence application fee by May 15th, by cheque, money order, MasterCard, American Express or VISA. Students who have paid their residence application fee but send written notice of cancellation to Residence Administration receive funds as follows:
2. Any student who occupies their room late for any reason, with a room reservation and the application fee paid, will be responsible for full Fall Term payment.
3. Except as in 2 above, residence fees for students moving into residence 10 or more days after the beginning of fall term will be the application fee plus the amount due on September 9, 2019 less the appropriate per diem from the 1st day to the date of occupancy. This is due in full before moving into residence.
4. Residence fees for students who enter the residence in the Fall Term and are permitted to withdraw from the residence before the beginning of the Winter Term will be responsible for the application fee plus the residence charges resulting from the Residence Refund Policy being applied as of the date of withdrawal, plus any resulting cancellation fee.
5. Residence fees for students who enter residence in the Fall Term and are permitted to withdraw from residence during the Winter Term will be the application fee plus the Fall Term residence charges plus the Winter Term residence charges resulting from the Residence Refund Policy being applied as of the date of withdrawal, plus any resulting cancellation fee.
6. Students who leave residence during either term, but who continue as students at the University, may be liable for the room rent portion of the residence fees for the remainder of their residence agreement.

SAINT JOHN
1. To reserve a room, all students will be required to pay a non-refundable deposit of $500, in the form of a certified cheque, money order, MasterCard, American Express or Visa.
2. On or before the 1st day of classes in September all students in residence will be required to pay their first term fees plus $500 advance deposit. The balance will be payable by January 10, 2019. Interest will be added to overdue accounts at the rate of 12.0% per annum or 1.00% per month.
3. The date of occupancy will normally be Labour Day. There will be no residence fee adjustments for late arrivals.
4. For students without a room reservation and advance deposit prepaid, there will be no adjustments of fees for arrivals up to 10 days after Labour Day. Residence fees for students moving into residence 11 days or more after Labour Day will be the advance deposit plus the appropriate per diem from the date occupancy. This is due in full and payable at Financial Services/Students Accounts.
5. Residence fees for students who enter residence in the fall term and withdraw from the university before the end of the fall term will be the advance deposit plus the appropriate per diem rate from the date of occupancy to the date of withdrawal.
6. Residence fees for students who enter residence in the fall term and withdraw from university during the winter term will be the advance deposit plus the amount due in September, plus the appropriate per diem rate room the beginning of the winter term to the date of withdrawal.
7. Residence fees for students who enter residence in the fall term who request and are granted permission to leave residence at Christmas will be the advance deposit plus the amount due in September. No adjustment to the residence fee will be made. Students wanting such permission should apply in writing no later than December 1, 2018. Failure to do so will result in a $100 surcharge in addition to the above described Fall Term Residence fees if student is given permission to leave residence. Permission is usually granted if the student is required to be away from campus for a co-op work term outside the city limits, or they complete their academic program and leave the university, or they withdraw from university as well as residence.
8. Students who leave residence during either term, but who continue as students at the University, may be liable for the room rent portion of the residence fees for the remainder of the term.

GOVERNMENTAL STUDENT LOANS
Applications, for the current academic year, are available through most Provincial Student Loan Departments any time after March/April. For information on Government Student Loans please visit the following website: http://www.canlearn.ca
For information on Government Loan Assistance for the Province of New Brunswick, please contact Student Financial Services, Department of Post-Secondary Education, Training and Labour, P.O. Box 6000, 5th Floor, TD Tower, 77 Westmorland Street, Fredericton, New Brunswick, E3B 5H1, Toll-Free: 1-800-667-5626/Fax (506)444-4333, Web site: http://www.studentaid.gnb.ca
Please contact the Fredericton Financial Aid Office by telephone at (506) 453-4796 or link to the Office website at: http://www.unb.ca/financialaid/ to http://www.unbsj.ca/prospective/finances.html, to review resources and services.
Students who withdraw from UNB after the refund date will retain their scholarship for the term in question, up to the tuition and compulsory fees owed by the student. Each recipient will be notified of the terms and conditions of the award. If additional information is required, recipients are encouraged to contact the Director, Undergraduate Awards, University of New Brunswick, at (506) 453-4894 or email: awards@unb.ca.

Scholarships Open to High School Students

The University of New Brunswick provides scholarships to high school students with superior academic achievement (preference given to students who have an 80% scholarship average and above) who are admitted to a UNB undergraduate degree program on the basis of their high school marks and who have not attended another post-secondary institution prior to coming to UNB.

High school students with high averages who would like to be considered for scholarship support should submit their scholarship application by March 1st. The one application form covers the majority of UNB scholarships on both campuses for students applying to UNB directly from high school.

High school students will find the general scholarship application form online at http://www.unb.ca/scholarships/. On the same webpage, special application forms can be found for the Currie Undergraduate Scholarships and the H. Harrison McCain Bursaries.

All students who have been admitted to a UNB degree program on the basis of their high school marks are considered for scholarship support ranging from $500 to $100,000. For more information please visit: http://www.unb.ca/scholarships/

UNB calculates a Scholarship Average which is the Admission Average plus bonus points for Grade 11 and 12 enriched courses. Bonus points are added directly to the Scholarship Average, as long as a mark of 75% or higher is achieved in the course.

- one bonus point for 1 to 3 enriched courses;
- a maximum of two bonus points for 4 to 6 enriched courses;
- a maximum of three bonus points for 7 to 9 enriched courses, and
- a maximum of four bonus points for 10 or more enriched courses.

The Scholarship Average is not rounded. The Scholarship Average may be recalculated using Grade 12 final marks, upon request.

Renewable Scholarships

Students holding renewable awards are expected to maintain the academic standing specified in the recipient’s original awarding notification. Normally, a 3.7 scholarship grade point average is required for renewal. Failure to maintain the required grade point average will normally result in the loss of the scholarship. In exceptional circumstances, the Senate Undergraduate Scholarship Committee may consider an exemption from the academic requirement to renew the scholarship on the grounds of compassion, health or other extenuating circumstances beyond the control of the student. A student requesting such an exemption must state the grounds on which the request is based and provide documentation to support the grounds cited. A Scholarship GPA is held internally and is not displayed on the student’s transcript of record.

If an international student is enrolled full-time in English language training in the first year, they will have their scholarship renewed in the second year, as long as s/he enrolls in at least one academic course in the second year. For international students who are enrolled in English language training and academic courses but have less than 24 credit hours of academic courses in one year, the scholarship grade point average will be the average of the academic courses completed in that year.

One year of a renewable scholarship may be postponed while the recipient is studying at another post-secondary institution, as long as the recipient returns to UNB as a student in an undergraduate degree program. Unless otherwise stated, renewable scholarships are awarded for a maximum of eight terms. Requests for the renewal or deferral of a renewable scholarship under other circumstances may be considered on an individual basis.

Scholarships Open to Second Entry Students

Students transferring to UNB from another post-secondary institution to consider their first undergraduate degree as well as students beginning the Bachelor of Education program on the Fredericton campus may be considered for scholarship support on the basis of their recent academic
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

achievement. The scholarship application is found online at www.unb.ca/scholarships.

Students who are admitted to UNB on a basis OTHER THAN their high school marks (such as degree holders, mature students, adult learners, etc.) may be considered for scholarship support when they have completed 24 credit hours at UNB, unless otherwise specified in the scholarship description.

Scholarships Open to Continuing UNB Students

The University of New Brunswick provides scholarships to continuing UNB students who have completed at least 24 credit hours of undergraduate courses at UNB in the previous year and are planning to return to full-time study at UNB.

Preference is given to Dean's List students, or students who have at least a 3.7 Scholarship GPA, enrolled in a graduate degree program.

Part-time students who plan to attend on a full-time basis and students with a documented disability who are taking a reduced course load recommended by a UNB Accessibility Counsellor are encouraged to contact the Undergraduate Awards Office for consideration for scholarship support since they may be considered if they have achieved at least a 3.7 GPA on their last 24 credit hours of UNB courses and plan to return to UNB in the Fall.

For the purposes of awarding scholarships, a Scholarship GPA is calculated at the end of the assessment year (May to April) provided that 24 credit hours or more have been attempted, regardless of program. For students involved in work placement programs, such as Co-op or PEP, the scholarship GPA is calculated using the Dean's List criteria. For PEP, Articulated Degree students or students on an official exchange program, or letter of permission who have been away from UNB from May to April in the previous year as part of their degree program, the Scholarship GPA will be based on their most recent work at UNB. This GPA is held internally and is not displayed on the student's transcript.

Students currently enrolled at UNB in an undergraduate degree program are encouraged to apply for scholarship support each year between January 15th and April 15th, using the application form found on the UNB website, through My UNB E-Services, under the Academic tab. Unless otherwise specified, the online scholarship application covers all scholarships open to continuing UNB students on both campuses awarded by the University. Successful recipients are notified during the summer.

Students Enrolled in Articulated Degree Programs

Students who begin an articulated degree program at UNB directly from high school are considered for Scholarships Open to High School Students. Students who are enrolled in articulated degree programs at UNB and attend the partnering institution (and not enrolled in 12 ch or 4 courses at UNB) may be considered for scholarships as follows -

Eligibility

The student must begin the program of study at UNB.

The student must have completed at least 24 credit hours at UNB (for assessment purposes).

The student attending the partnering institution for one year of full-time study will be eligible for scholarship support based on the previous year's work at UNB.

If the program requires a second year of study at a partnering institution, consideration for scholarship will be given on the basis of a recommendation from the Faculty.

Upon the student’s return to UNB, consideration for scholarship will be given on the basis of a recommendation from the Faculty.

Consideration will be given to the level of support by the partnering institution in the final decision of UNB scholarship support provided to the student.

Funding

These students will not be eligible to retain donor-funded scholarships for the year that they are at the partnering institution, unless the scholarship is open to the articulated degree program.

Scholarships for students who are enrolled in articulated degree programs, but attending the partnering institution (and not enrolled in at least 12 ch or 4 courses at UNB) will be available using scholarship funds budgeted by the University, awarded using the scale approved by the Scholarship Committee each year and prorated according to the tuition paid by the student.

Donor-funded scholarships for these specific programs will be established using new monies. The scholarship description will contain a sentence indicating that, “The recipient may retain this scholarship while enrolled in a UNB articulated degree program and attending the partnering institution.”

Students must apply to be considered for scholarship support.

Scholarships for Part-Time Students

Part-time students are encouraged to contact the College of Extended Learning UNB Fredericton or Student Services, UNB Saint John, for scholarship applications.

Prizes and Awards

Prizes are awarded for specific academic achievement based on the recommendation from the appropriate department or faculty. Prizes restricted to Fredericton campus students are awarded by the Undergraduate Awards Office. Prizes restricted to Saint John campus students are awarded by the Registrar's Office.

A selected group of University-level and Faculty-level prizes are presented to the recipients at Encaenia or Convocation, as appropriate. These include:

- Lieutenant-Governor's Medals
- Governor General's Academic Medal
- Governor General’s Gold Medal
- Douglas Gold Medal

The presentation of the remaining prizes is at the discretion of the Faculties involved. Many Faculties organize award ceremonies to make these presentations. However, if the Faculty does not choose to present the prize at an award ceremony, the prize is sent to the recipient along with a congratulatory email. All prizes are listed in the appropriate prize ceremony bulletins. All graduation prizes are listed in the appropriate programs at either Convocation or Encaenia

Off-Campus Study Awards

The University of New Brunswick encourages international experiences for our students and provides limited support for full-time UNB students while they are studying elsewhere, within an approved program.

To be eligible for an Off-Campus Study Award, a student must be a Canadian citizen or landed immigrant who is in good academic standing at UNB. The recipient must be accepted to another university which has established a formal exchange agreement with UNB or is involved in an approved off-campus study program.

The Off-Campus Study Award is paid to the recipient in the form of a credit against the student's full-time UNB tuition and other compulsory fees for the term that the student is studying elsewhere. Once UNB tuition and compulsory fees have been paid and a balance remains available, the recipient can request a refund from Financial Services on their respective campus.

A student can retain an Off-Campus Study Award as long as s/he completes the off-campus study and shows satisfactory evidence of merit. In the event that a student returns before the completion of the term, the Off-Campus Study Award is reduced from the student's account. The Off-Campus Study Award does not appear on the student's transcript.

The RHB McLaughlin Trust

Established through the generosity of Robert H.B. McLaughlin, long-time professor of Civil Engineering, former President of the UNB Associated Alumni and graduate of the Class of 1943, this Trust annually supports the R.H.B. McLaughlin Prize in Civil Engineering, the R.H.B. McLaughlin Graduate Fellowship in Civil Engineering, the Beaverbrook Scholars Award, and the R.H.B. McLaughlin Athletic Recognition Fund.

HIGH SCHOOL STUDENT SCHOLARSHIPS

G. Wayne Squibb Scholarship

field: Arts; value: $10,000; number: 1; duration: Up to 4 years; conditions: Awarded to a student beginning the Bachelor of Arts degree program directly from high school. Selection is made on the basis of academic achievement and financial need with consideration given to involvement in extracurricular activities. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. donor: G. Wayne Squibb and the New Brunswick University Opportunities Fund.

Jayanti Datta Memorial Scholarship

field: Arts; value: Variable; number: 1; duration: 1 year; conditions: Awarded to a student beginning undergraduate student enrolled in the Faculty of Arts program on the Fredericton campus. Selection is made primarily on the basis of scholastic attainment. donor: Professor Arun Datta, friends and family of Jayanti Datta.
Dr. W. Allan G. And Constance Young McAndrew Scholarship  
**field:** Arts.  
**value:** Variable.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to a Fredericton campus student who has graduated from a Gloucester County high school and is beginning an Arts degree program at UNB. Preference may be given to a student who has demonstrated scholastic achievement in French.  
**donor:** Mrs. Constance Young McAndrew in memory of her husband, Dr. W. Allan G. McAndrew.

Faculty of Arts Entrance Scholarship  
**field:** Arts.  
**value:** Variable.  
**number:** Variable.  
**duration:** 1 year.  
**conditions:** Awarded to students who are entering the Bachelor of Arts degree program on the Fredericton campus. Selections are made on the basis of scholastic attainment; financial need and/or extracurricular activities may be taken into consideration.  
**donor:** Faculty, Staff, Alumni and Friends of the Faculty of Arts.

Alvin Shaw Memorial Scholarship in Theatre  
**field:** Arts.  
**value:** Variable.  
**number:** 1 or more.  
**duration:** Up to 4 years.  
**conditions:** Awarded to a Fredericton campus student with preference given to a student enrolled in an Arts Faculty degree program who intends to complete a Drama Minor or a Major in English (drama). The recipient must enroll in ENGL/DRAM 1173 or 2173, 2174 or 2175 during his/her first year at UNB. Theatre experience, grades and awards earned for work in drama will be the primary consideration in the selection of the recipient. The renewal of the scholarship is contingent on satisfactory academic performance and progress through the program.  
**donor:** Alvin Shaw.

McLean Budden Entrance Scholarship  
**field:** Arts.  
**value:** $1,250.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to a student entering the Bachelor of Arts degree program on the Fredericton campus. Selection will be made on the basis of scholastic attainment and financial need.  
**donor:** McLean Budden Investment Managers.

Lester Hoar Memorial Scholarship in Arts  
**field:** Arts.  
**value:** $4,000.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to a student beginning the Bachelor of Arts undergraduate degree program upon graduation from a Saint John high school. Selection is based on academic achievement. Preference will be given to a student who has been actively involved in writing or editing for his or her school newspaper.  
**donor:** The late Lester Hoar.

Ashoki Sujanani Scholarship  
**field:** Arts.  
**value:** $5,000.  
**number:** 1.  
**duration:** 4 years.  
**conditions:** Awarded to a Fredericton campus student enrolled in the Bachelor of Arts degree program on the Fredericton campus. Selection is based on academic achievement and financial need. Consideration will be given to community involvement. One scholarship is awarded every 4 years.  
**donor:** The friends and family of Ashoki Sujanani, BScEngSE 1978.

Dr. Charles K. and Mickie Bowman Scholarship  
**field:** Arts.  
**value:** $5,000.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to a student beginning the Bachelor of Arts degree on the Fredericton campus directly from Minto High School, Chipman Forest Avenue School, or Oromocto High School. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Selection will be based on academic achievement and financial need.  
**donor:** Mickie Bowman, the late Dr. Charles (Chad) Bowman, former professor of sociology at UNB, and the New Brunswick University Opportunities Fund.

Pius King Memorial Scholarship in Business  
**field:** Business.  
**value:** $1,000.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to a student beginning the Bachelor of Business Administration on the Saint John Campus upon graduating from a Saint John area high school, with preference given to graduates of Kennebecasis Valley High School. Selection is made on the basis of academic achievement, financial need and volunteer activities.  
**donor:** The family of the late Pius King.

Arthur D. Ganong Scholarship  
**field:** Business.  
**value:** $2,000 per year.  
**number:** 1.  
**duration:** 4 years.  
**conditions:** Awarded to an outstanding graduate of a New Brunswick high school who is beginning an undergraduate Business Administration degree program at UNB. Preference will be given to students who graduate from a Charlotte County high school. Selection is made on the basis of academic performance and financial need. The applicants must compose a short essay on Arthur D. Ganong to accompany the application.  
**donor:** The Arthur D. Ganong Foundation and the New Brunswick University Opportunities Fund.

SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Leadership Development Award  
**field:** Business.  
**value:** Min. $850.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to a Saint John campus student entering the Business Administration degree program. Selection will be based on academic achievement and significant involvement in extra-curricular activities at high school and/or in the community. This award is to be given to a student who will continue to make a positive contribution to the life and spirit of the university and community.  
**donor:** Faculty, staff and friends of the Faculty of Business.

Clifford G. Warner Scholarship  
**field:** Business.  
**value:** Variable.  
**number:** 1.  
**duration:** 4 years.  
**conditions:** Awarded to a Saint John campus student who has been accepted to a degree program in the Faculty of Business. Selection is based on academic achievement, financial need and substantial involvement in community activities. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services Guidelines. Transfer students are eligible to be considered. The recipient may retain this scholarship while enrolled in a UNB articulated degree program and attending the partnering institution.  
**donor:** Family and friends of Clifford G. Warner, a distinguished citizen of Saint John who died in 2010. A contribution was also received from the New Brunswick University Opportunities Fund.

Mary Goggin Scholarship  
**field:** Computer Science.  
**value:** $1,000.  
**number:** 1.  
**duration:** 4 years.  
**conditions:** Awarded to a Fredericton campus student beginning a Bachelor of Computer Science degree program. Selection will be based on academic achievement.  
**donor:** Mary (Hanley) (BSc CS 1982) and Kenneth Goggin (BBA 1981, BSc CS 1984).

Accreon Entrance Scholarship  
**field:** Computer Science.  
**value:** $3,000.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to a Fredericton campus student beginning an undergraduate degree program in the Faculty of Computer Science. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services Guidelines. Selection will be based on academic achievement and financial need. Preference is given to a student who does not hold other scholarships.  
**donor:** Accreon and the New Brunswick University Opportunities Fund.

Alastair and Jennifer Grant Scholarship in Computer Science  
**field:** Computer Science.  
**value:** $500.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to a Fredericton campus student beginning a degree in the Faculty of Computer Science directly after graduating from a New Brunswick high school. Selection is based on academic achievement.  
**donor:** Alastair Grant (BCS 2005) and Jennifer Grant (BEd 2006).

Mahin and Ali Ghorbani Scholarship  
**field:** Computer Science.  
**value:** $1,000.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to a student from New Brunswick or an international student who is beginning the first year of undergraduate degree program in the Faculty of Computer Science on the Fredericton campus. Selection will be based on academic achievement and financial need. Preference will be given to a student from a Third World or developing country.  
**donor:** Mahin and Ali Ghorbani.

Computer Science Alumni Entrance Scholarship  
**field:** Computer Science.  
**value:** Variable.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded to full-time students who are entering an undergraduate degree program in the Faculty of Computer Science on the Fredericton campus. Selections are made on the basis of scholastic attainment; financial need may be taken into consideration.  
**donor:** Computer Science Alumni.

Rodney Cooper Bursary in Computer Science  
**field:** Computer Science.  
**value:** Min. $2,500.  
**number:** 1.  
**duration:** 1 year.  
**conditions:** Awarded on the basis of financial need to a Fredericton campus student who is a graduate of a New Brunswick high school and is beginning an undergraduate degree program in the Faculty of Computer Science. The student must demonstrate successful academic performance and be a New Brunswick resident, according to the definition of the
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Uday Gujar Scholarship for Excellence in Computer Science field: Computer Science. Value: $500. Number: 1. Duration: 1 year. Conditions: Awarded to a Fredericton campus student who is beginning the Bachelor of Computer Science degree program directly from a New Brunswick high school. Selection will be based on scholastic attainment and financial need. Donor: Established by Sarita Gujar for her husband Uday Gujar, Professor, Faculty of Computer Science.

Eldon and Maxine Clair Faculty of Computer Science Scholarship field: Computer Science. Value: $5,000. Number: 1 or more. Duration: 4 years. Conditions: Awarded to a student entering the Bachelor of Science in Engineering degree program on the Fredericton campus. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Selection will be based on academic achievement. Consideration may be given to financial need and/or extracurricular activities. Donor: The estate of Eldon and Maxine Clair.

Brent Fillmore Family Scholarship field: Engineering. Value: $5,000. Number: 1. Duration: 4 years. Conditions: Awarded to a student beginning the Bachelor of Science in Engineering degree program in the Faculty of Computer Science directly from high school. Selection is based on academic achievement. Consideration may be given to financial need and/or extracurricular activities. Donor: Brent Fillmore (BSc CE 1977) and Terry (McBride) Fillmore (BN 1977) and the New Brunswick University Opportunities Fund.

Kathryn & John Richardson Memorial Scholarship field: Engineering. Value: $8,000. Number: 3. Duration: 4 years. Conditions: Awarded to a student beginning the Bachelor of Science in Engineering program directly upon graduation from high school. Selection is based on academic achievement. Consideration may be given to financial need and/or extracurricular activities. Donor: The estates of John (BSE EE 1941) and Kay Richardson.

Bishop Family Scholarship field: Engineering. Value: $1,000. Number: 1. Duration: 1 year. Conditions: Awarded to a student from Queen's County who has graduated from a New Brunswick high school, is beginning the Bachelor of Science in Engineering degree program and does not hold any major scholarships. Selection is based on academic achievement with consideration given to extracurricular activities. Donor: Darrell Bishop (BSE 1970) and family.

Ivan F. Ronalds Engineering Scholarship field: Engineering. Value: Min. $535. Number: 1. Duration: 1 year. Conditions: To be awarded annually to a graduate of Bathurst High School who is beginning an engineering undergraduate degree program. Selection is made on the basis of scholastic attainment and financial need. Consideration will be given to participation in extracurricular activities. Donor: Mr. Ivan F. Ronalds in memory of his mother.

M. Patrick Gillin Ottawa Engineering Scholarship field: Engineering. Value: $4,000 yr1; $3,000 yr2; $2,000 yr3; $1,000 yr4. Number: 5. Duration: Up to 5 years. Conditions: Awarded to students enrolled in the Engineering degree program who have graduated from an Ottawa-area high school. Selection will be made on the basis of scholastic achievement. Financial need may be taken into consideration. Donor: The Gillin Family.

Currie Undergraduate Scholarship in Engineering field: Engineering. Value: Total - $65,000. Number: Up to 4 duration: 4 years. Conditions: Awarded to students beginning a Bachelor of Engineering degree program upon graduation from a high school in any of the four Atlantic Provinces. The scholarships are intended to support the education of future leaders. The applicants are therefore asked to submit an essay (not less than 250 words) giving the Selection Committee an indication of their leadership capabilities to date, including (but not limited to) school and extra-curricular activities. Required in the essay is evidence of overcoming barriers or difficult situations. Financial need is an important consideration. Recipients are required to live in residence for the first year of their degree program. Donor: Richard James Currie, Richard James Currie, O.C., O.N.B., C.H.F., M.B.A., D.Litt., P.Eng. installed as Chancellor of the University of New Brunswick in May 2003 and named Chancellor Emeritus in May 2013.

W. Frederick Merrithew, BSE(CE) 1961, Memorial Scholarship field: Engineering. Value: $3,000 per year. Number: 1. Duration: 4 years. Conditions: Awarded to a student beginning the Bachelor of Science in Engineering degree program (any discipline) directly from high school. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government’s Student Financial Services guidelines. Selections are made on the basis of scholastic attainment, financial need and extracurricular involvement. One scholarship will be awarded every 4 years. Donor: The family and friends of the late W. Frederick Merrithew, BSE(CE) 1961, and the New Brunswick University Opportunities Fund.

John R. Dean Scholarship field: Engineering. Value: $2,000. Number: 1. Duration: 1 year. Conditions: Awarded to a student, who has graduated from a New Brunswick high school, and is beginning an undergraduate degree program in Engineering on the Fredericton campus. Selection is made with consideration to scholastic attainment and financial need. Donor: The family of the late John R. Dean, B.Sc., M.Sc., D.Sc., P.Eng. And the New Brunswick University Opportunities Fund.

James M. Saunders Scholarship field: Engineering. Value: $6,000. Number: 2. Duration: 1 year. Conditions: Awarded to a student from Nova Scotia beginning the Bachelor of Science in Engineering (any discipline) degree program directly from high school. Preference will be given to a student from Cape Breton. Selection is based on academic achievement and financial need. Donor: James M. Saunders (BSE CE 1982).

exp Otis Logue Scholarship field: Engineering. Value: $2,500. Number: 1. Duration: 1 year. Conditions: Awarded to a student from the Atlantic Provinces who is beginning the Bachelor of Science in Engineering degree program. Selection will be based on scholastic attainment and financial need. Donor: exp Services Inc.

Paul and Andrea Bragdon Scholarship field: Engineering. Value: $1,000. Number: 1. Duration: 1 year. Conditions: Awarded to a student beginning the Bachelor of Science in Engineering (any discipline). Selection will be based on academic achievement and financial need. Preference will be given to students from Millville, Hainesville or Nackawic area. Donor: Paul (BSE CE 1993, MSc CE 1996) & Andrea Bragdon.

APEGNB Entrance Scholarship field: Engineering. Value: $5,000. Number: 2 or more. Duration: 1 year. Conditions: Open to students entering the Engineering or Geoscience degree program directly from a New Brunswick high school. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Selections are made on the basis of scholastic attainment and financial need. Donor: The Association of Professional Engineers and Geoscientists of New Brunswick Foundation for Education and the New Brunswick University Opportunities Fund.

Ian MacKay Anderson & Family Scholarship field: Forestry. Value: $3,000. Number: 1. Duration: 4 years. Conditions: Awarded to a Fredericton campus student who is beginning an undergraduate degree program in the Faculty of Forestry directly upon graduation from a high school. Preference will be given to a student who is a graduate of a high school in Northumberland County, New Brunswick. Selection is based on academic achievement and financial need. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government’s Student Financial Services guidelines. Donor: Stephanie Anderson (BSC 1984), in honour of her father, and the New Brunswick University Opportunities Fund.

Ken Maybee Memorial Scholarship field: Forestry and Environmental Management. Value: $1,000. Number: 1. Duration: 1 year. Conditions: Awarded to a New Brunswick student entering the Bachelor of Science in Environment and Natural Resources program. Selection is based on academic achievement. Consideration may be given to the student’s involvement in extracurricular activities and/or financial need. Donor: Kim Maybee (BA 1985, MEd 1990).

75th Anniversary Scholarship in Forestry field: Forestry or Forest Engineering. Value: Approx. $2,200. Number: 1. Duration: 1 year. Conditions: Awarded to a student beginning an undergraduate degree program in Forestry or Forest Engineering who has
graduated from high school with a high academic standing and who has demonstrated scholastic achievement in math and science. **donor:** Alumni of the Faculty of Forestry and Environmental Management.

**William MacNeill Scholarship**
- **field:** Forestry or Forest Engineering
- **value:** $2,000
- **number:** 1
- **duration:** 1 year
- **conditions:** A student with high academic standing who is beginning a program leading either to the degree of Bachelor of Science in Forestry or Bachelor of Science in Forest Engineering. **donor:** The late William MacNeill.

**Hon C.D. Richards Scholarship**
- **field:** Forestry or Forest Engineering
- **value:** Min. $1,200
- **number:** 1
- **duration:** 1 year
- **conditions:** Awarded to a needy and deserving student beginning a program leading either to the degree of Bachelor of Science in Forestry or the degree of Bachelor of Science in Forest Engineering. **donor:** The late Hon. C.D. Richards.

**Mark Way Memorial Scholarship in Forestry and Environmental Management**
- **field:** Forestry and Environmental Management
- **value:** Variable
- **number:** 1
- **duration:** 4 years
- **conditions:** Awarded every four years, on the basis of scholastic attainment and financial need, to a student in the Fredericton campus in the Faculty of Forestry and Environmental Management. **donor:** The late Mark Way, BA, UNB 1972.

**Dr. Ivan H. Crowell Scholarship in Forestry**
- **field:** Forestry
- **value:** Variable
- **number:** 2
- **duration:** 1 year
- **conditions:** Awarded to a student entering the Faculty of Kinesiology. Recipient must be a graduate of Sussex Regional High School. Selection will be based on academic achievement. **donor:** Stella Keays.

**Michael Douglas Scholarship**
- **field:** Business Administration
- **value:** $4,000
- **number:** 1
- **duration:** 4 years
- **conditions:** Awarded to a Fredericton campus student who is beginning the Bachelor of Business Administration degree program directly from high school. Selection will be based on academic achievement and financial need. The recipient must be a New Brunswick resident, according to the Provincial Government’s Student Financial Services guidelines. Consideration may be given to extracurricular activities. One scholarship will be active in any given year. **donor:** Michael Douglas (BBA 1965).

**Michael J. Millie Scholarship**
- **field:** Business Administration
- **value:** $1,500
- **number:** 1
- **duration:** 4 years
- **conditions:** Awarded to a student entering the Bachelor of Business Administration degree program on the Fredericton campus. Preference will be given to students from Carleton County, NB. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government’s Student Financial Services guidelines. Selection will be based on academic achievement and financial need. **donor:** Michael Millie, BBA 1996 and the New Brunswick University Opportunities Fund.

**Robert and Susan Little Scholarship**
- **field:** Business Administration
- **value:** $1,900
- **number:** 1
- **duration:** 1 year
- **conditions:** Awarded on the basis of financial need to a Fredericton campus student from Westmorland County who is beginning the Bachelor of Business Administration degree program. The recipient must demonstrate successful academic performance. **donor:** Robert and Susan Little - Class of 1966.

**Maureen McCarthy Memorial Bursary**
- **field:** Business Administration
- **value:** Variable
- **number:** 1
- **duration:** 1 year
- **conditions:** Awarded on the basis of financial need to a Fredericton campus student from Westmorland County who is beginning the Bachelor of Business Administration degree program. The recipient must demonstrate successful academic performance. **donor:** Family and friends of Maureen McCarthy and the New Brunswick University Opportunities Fund.

**SECTION C: SCHOLARSHIPS, PRIZES AND AWARD**

**JDI NB Scholarship at UNB**
- **field:** Business, Computer Science, Engineering, or Forestry
- **value:** $8,000
- **number:** 2 to 4
- **duration:** Up to 4 years
- **conditions:** Awarded to students who are enrolled in an undergraduate degree program in the field of Business, Computer Science, Engineering or Forestry. A list of eligible degree programs can be found on the UNB Scholarship webpage. Selection is made on the basis of academic achievement, self-motivation, contribution to community/extra-curricular activities and financial need. A shortlist of candidates will be interviewed by representatives of J.D. Irving Limited. The recipients must be New Brunswick residents, according to the definition of the Provincial Government’s Student Financial Services guidelines, and may also be offered employment opportunities with J.D. Irving Limited throughout their degree program and/or upon graduation. **donor:** J.D. Irving Limited.

**Class of 1966 Engineering Scholarship**
- **field:** Engineering
- **value:** $1,000
- **number:** 1
- **duration:** 4 years
- **conditions:** Awarded to students entering the Bachelor of Science in Engineering degree program directly from high school. Selection is made on the basis of academic achievement and financial need. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government’s Student Financial Services guidelines. Only one scholarship will be awarded every 4 years. **donor:** Class of 1966 Engineering and the New Brunswick University Opportunities Fund.

**Ruth Laurie Nursing Bursary**
- **field:** Nursing
- **value:** $3,500
- **number:** 2
- **duration:** 4 years
- **conditions:** Awarded on the basis of financial need to students who are beginning the Bachelor of Nursing degree program directly from high school. The recipient must demonstrate successful academic performance. **donor:** Ms. Laurie.

**D. Ross Peebles Scholarship**
- **field:** Engineering
- **value:** $2,000
- **number:** 1
- **duration:** 4 years
- **conditions:** Awarded to a Canadian or British student beginning the Bachelor of Science in Engineering degree program (any discipline). Selection is based on academic achievement and financial need. One scholarship will be active in any given year. **donor:** Ross Peebles (BSE CE 1968).

**Marlene Perkins Memorial Scholarship**
- **field:** Engineering, Computer Science or Science
- **value:** $7,000
- **number:** 1
- **duration:** 4 years
- **conditions:** Awarded to a female student beginning the Bachelor of Science in Engineering, Bachelor of Computer Science or the Bachelor of Science degree program. Preference will be given to a student beginning the Bachelor of Engineering degree program. Selection is based on academic achievement and financial need. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government’s Student Financial Services guidelines. One scholarship will be active in any given year. **donor:** Malcolm Perkins (BSc/EE 1958) and family, and the New Brunswick University Opportunities Fund.

**P. William Bishop Memorial Scholarship**
- **field:** Engineering
- **value:** Variable
- **number:** 1
- **duration:** 1 year
- **conditions:** Awarded on the basis of scholastic attainment and financial need to a student who has graduated from a high school in Canada, and is entering the Engineering degree program. **donor:** Mrs. Bethia G. Bishop and family in memory of her husband and their father, Mr. P. William Bishop, BSc.Eng.CE 1942, recipient of the Ketchum Medal 1942.

**Maggie Jean Chestnut Scholarship**
- **field:** Arts or Science
- **value:** Variable
- **number:** 1 or more
- **duration:** Up to 4 years
- **conditions:** Students are registered in either the Faculty of Arts or the Faculty of Science. Students in Home Economics or similar courses are not eligible. Preference will be given to students in residence at the Maggie Jean Chestnut House. Scholarship is also open to Fredericton women living at home. Selection will be made on the basis of good academic standing with consideration being given to financial need. **donor:** The late Mrs. Annie T. Chestnut.

**Randolph E. Cox Scholarship**
- **field:** Science
- **value:** $4,000
- **number:** 1
- **duration:** 1 year
- **conditions:** Worthy student beginning the undergraduate program leading to a Bachelor of Science degree. Academic merit and need will be considered. **donor:** The late Randolph E. Cox.

**Kirkpatrick Scholarship**
- **field:** Engineering
- **value:** $500
- **number:** 1
- **duration:** 1 year
- **conditions:**
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Awarded to a female student who is graduating from a Saint John area high school and beginning the Bachelor of Science in Engineering degree program. Selection will be based on academic achievement and extracurricular involvement.donor: Leah Kirkpatrick, BScChE 2000.

Gordon S. Robinson Scholarship
field: Engineering.value: $1,250.number: 1.duration: 1.year.conditions: Awarded to a student who is entering the Bachelor of Science in Engineering (any discipline) directly upon graduation from Sussex High School. Selection is based on academic achievement and financial need. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services Guidelines.donor: Donald Robinson, BSc EE 1984 and the New Brunswick University Opportunities Fund.

Catherine Earle and her parents Dr. Thomas and his wife Mary (West) Earle Scholarship for Full-time Students
field: Arts or Science.value: Variable.number: 1.duration: 1.year.conditions: Awarded to a student who is enrolled in a Saint John campus degree program and is beginning an undergraduate degree program on the Fredericton campus. value: $6,000
number: 1
duration: 1 year
conditions: Awarded to a student who is enrolled in Bachelor of Science in Engineering degree program (any discipline). Selections are made on the basis of scholastic attainment and financial need.

either donor: The family and friends of Sydney Acker, BScEng (Civil) 1944.

UNB Engineering Alumni Scholarship
field: Engineering
value: $500
number: 1 or more
duration: 1 year
conditions: Awarded to students enrolled in the Bachelor of Science in Engineering (Mechanical) degree program. Selection is based on academic achievement and financial need.

either donor: UNB Engineering Alumni and Friends.

UNB Mechanical Engineering Alumni Scholarship
field: Mechanical Engineering
value: Variable
number: 1 or more
duration: 1 year
conditions: Awarded to students enrolled in the Bachelor of Science in Engineering (Mechanical) degree program. Selection is based on academic achievement and financial need.

either donor: UNB Mechanical Engineering Alumni.

William and Edward Akerley Memorial Scholarship
field: Civil Engineering
value: Variable
number: 1
duration: 1 year
conditions: Awarded primarily on the basis of scholastic attainment to Fredericton campus Civil Engineering students.

either donor: Mrs. B.E. Akerley and family, in memory of her late husband, William (BScCE 1932) and his late brother, Edward (BScCE 1923).

William Godfrey Scholarship
field: Engineering
value: Variable
number: 1
duration: 1 year
conditions: Awarded to a student who has graduated from a New Brunswick High School and is enrolled in the Bachelor of Engineering degree program. Selection will be made on the basis of scholastic attainment and financial need.

either donor: William Godfrey and the New Brunswick University Opportunities Fund.

Bird Construction Scholarship
field: Engineering
value: $3,000
number: 1
duration: 1 year
conditions:
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Awarded to a student enrolled in the Bachelor of Science in Engineering degree program. Selection will be based on academic achievement. Preference will be given to a female indigenous student.donor: Bird Construction.

Lino Celeste Scholarship
field: Engineering or Forestry.value: $2,000.number: 1.duraton: 1.year: conditions: Awarded to a student who is enrolled in the Bachelor of Science in Engineering (any discipline) or Bachelor of Science in Forestry degree program. Selection will be based on academic achievement and financial need.donor: Dr. Lino Celeste (BSE EE 1960, DSC 1996).

- **Conditions:** Open to Civil Engineering students from the Province of New Brunswick who have completed at least half of the requirements for the Civil Engineering program. The recipient will be selected on the basis of involvement in student affairs and/or athletics. Financial need will be a consideration and the student must have maintained an academic standing of at or above a B average. **Donor:** Family and friends of the late Walter J. Dohaney, Assistant Dean of Engineering 1981-1985 and the New Brunswick University Opportunities Fund.

**WSP | Focus Scholarship**
- **Field:** Geodesy and Geomatics Engineering
- **Value:** $2,000
- **Number:** 1
- **Duration:** 1 year
- **Conditions:** Awarded to a Fredericton campus student who has completed the requirements for the third year and is beginning the fourth year of the Bachelor of Engineering (Geodesy and Geomatics) degree program. Selection is based on academic achievement and financial need. **Donor:** WSP Canada.

**Frank Wilson Scholarship**
- **Field:** Civil Engineering
- **Value:** $5,000
- **Number:** 1
- **Duration:** 1 year
- **Conditions:** Awarded to a student who is entering the third or fourth year of the Bachelor of Science in Engineering (Civil) degree program.
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Selection is made on the basis of a demonstrated practical interest in civil engineering with consideration given to financial need, extracurricular activities, practical potential, and ethical standards. donor: Family, friends, colleagues and former students of Dr. Frank R. Wilson B.Sc. CE 1962, M.Sc. CE 1963, former professor of civil engineering, dean of engineering, dean of graduate students, dean of students and vice president research at the University of New Brunswick.

Randolph and Anne Fairley Memorial Scholarship
field: Engineering.value: $1,000.number: 1.duration: 1.condition: Awarded to a female student on the Fredericton campus who has completed at least the minimum requirements of the first year of the Bachelor of Science in Engineering degree program (any discipline). Selection is based on scholastic achievement and financial need.donor: Randolph Fairley, Class of 1944.

Dwight Scott ASHRAE Scholarship
field: Mechanical Engineering.value: Variable.number: 1.duration: 1.condition: Awarded to a student enrolled in or graduate of the Bachelor of Science in Mechanical Engineering (ME 4263) or Electrical and Mechanical Equipment for Buildings (ME 4263).donor: The New Brunswick Chapter of the American Society of Heating, Refrigerating and Air Conditioning Engineers.

Levesque Electrical Engineering Scholarship
field: Electrical Engineering.value: $2,375.number: 1.duration: 1.condition: Awarded to a student who has completed at least the normal requirements for the first year of the Bachelor of Science in Engineering (Electrical) degree program. Selection will be based on academic achievement and financial need. The recipient must be a New Brunswick resident, according to the Provincial Government's Student Financial Services guidelines.donor: Brian and Dalia Wood.

Brian and Dalia Wood Scholarship
field: Engineering.value: $1,000.number: 1.duration: 1.condition: Awarded to a Fredericton campus student who has completed at least the requirements for the first year of the Bachelor of Science in Engineering degree program. Selection will be on the basis of scholastic attainment and financial need. The recipient must be a New Brunswick resident, according to the Provincial Government's Student Financial Services guidelines.donor: Brian (BSc Eng EE 1987) and Dalia Wood.

Jacqueline and Gerard Breau Memorial Scholarship
field: Engineering.value: Min. $2,000.number: 1.duration: 1.condition: Awarded to a student who has completed at least the minimum requirements of the first year of the Bachelor of Science in Engineering degree program who is entering third or fourth year. The recipient must be a Canadian citizen, Selection will be based on academic achievement. The recipient must be a New Brunswick resident, according to the Provincial Government's Student Financial Services guidelines.donor: Mrs. Jacqueline Breau.

Tom and Wanda Doyle Scholarship
field: Engineering.value: $4,000.number: 1.duration: 1.condition: Awarded to a student enrolled in the Bachelor of Science in Engineering degree program who is entering third or fourth year. The recipient must be a Canadian citizen, Selection will be based on academic achievement. The recipient must be a New Brunswick resident, according to the Provincial Government's Student Financial Services guidelines.donor: Tom (BSc ME 1960) and Wanda Doyle.

George Stephenson Wheatley Engineering Scholarship
field: Engineering.value: Min. $1,000.number: 1.duration: 1.condition: Awarded to a Fredericton campus student who has completed at least the normal requirements for the first year of the Bachelor of Science in Engineering (Civil) degree program. Selection is based on the basis of scholastic attainment and financial need.donor: George Stephenson Wheatley (BSc EE 1967).

Robin W. Gough Scholarship in Civil Engineering
field: Civil Engineering.value: Min. $1,500.number: 1.duration: 1.condition: Awarded to a Fredericton campus student who has completed at least the normal requirements for the first year of the Bachelor of Science in Engineering (Civil) degree program. Selections are made on the basis of scholastic attainment and financial need.donor: Robin W. Gough, BScEE 1926, BSc-CE 1932.

Maritimes & Northeast Pipeline Scholarship in Engineering
field: Civil, Chemical, or Mechanical Engineering.value: $5,000.number: 1.duration: 1.condition: Awarded to students who have completed at least the requirements for the first year of the Civil, Chemical or Mechanical Engineering degree program. Selection will be based on academic achievement.donor: Maritimes & Northeast Pipeline

De Reeleader Scholarship
field: Engineering.value: $3,000.number: 1.duration: 1.condition: Awarded to a New Brunswick student on the Fredericton campus who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering degree program (any discipline). Selection will be based on academic achievement and financial need. Preference will be given to students from Carleton County.donor: G. Delmar Reeler (BSE CE 1949).

Richard F. Dee Memorial Scholarship
field: Civil, Engineering.value: Variable.number: 1.duration: 1.condition: Awarded primarily on the basis of academic performance to students who have successfully completed at least one year of study (a minimum of 35 ch) in the Electrical Engineering program at UNB.donor: The late John H. Fulton.

Grandy, Gibson, Holmes Memorial Scholarship
field: Engineering.value: $3,000.number: 1.duration: 1.condition: Awarded to a student who has completed at least the normal requirements for the first year of the Bachelor of Science in Engineering (Civil). Selection is based on academic achievement. The recipient must be New Brunswick resident, according to the Provincial Government's Student Financial Services guidelines.donor: Robert Dee.

John H. Fulton Memorial Scholarship in Electrical Engineering
field: Electrical Engineering.value: Variable.number: 1.duration: 1.condition: Awarded to a student who has completed at least the normal requirements for the first year of the Bachelor of Science in Engineering (Civil). Selection is based on academic achievement. The recipient must be New Brunswick resident, according to the Provincial Government's Student Financial Services guidelines.donor: Robert Dee.

Leica Geosystems Limited Scholarship
field: Geodesy and Geomatics Engineering.value: $500.number: 1.duration: 1.condition: Awarded primarily on the basis of academic performance to students who have successfully completed at least one year of study (a minimum of 35 ch) in the Electrical Engineering program at UNB.donor: Leica Geosystems Ltd.

Woodrow P. London Scholarship
field: Civil, Electrical, or Mechanical Engineering.value: $2,000.number: 1.duration: 1.condition: Selection is made on the basis of scholastic attainment and financial need.donor: W. P. London and Associates Limited, as well as friends, in honour of Mr. Woodrow P. London.

Donald MacFadyen BScSE Memorial Scholarship
field: Geodesy and Geomatics Engineering.value: $1,250.number: 1.condition: Awarded to a student from the Maritime Provinces who has completed 130 ch in the Surveying Engineering Program. The recipient who has at least a B- average will be selected on the basis of financial need, involvement in student and community activities.donor: Jean, Malcolm, family and friends of the late Donald MacFadyen.

J. Naim McCaffrey Memorial Scholarship
field: Civil Engineering.value: Variable.number: 1.duration: 1.condition: Awarded on the basis of scholastic attainment and financial need to Civil Engineering students.donor: The late Catherine Phyllis McCaffrey.

D. O. Turnbull Memorial Scholarship
field: Engineering.value: $3,000.number: 1.duration: 1.condition: May be awarded annually to a New Brunswick student who has completed his or her penultimate year of Engineering with high academic standing.donor: Association of Professional Engineers of the Province of NB.
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

A.R. Mearle Smith Bursary
field: Engineering value: Variable number: Variable duration: 1 year
conditions: Open to graduates of Bathurst High School requiring financial assistance who are currently enrolled in Engineering at UNB, and who have completed at least the normal requirements for the first year of the Engineering program at UNB. Preference will be given to Mechanical Engineering students. donor: The late A.R. Mearle Smith.

Sutton-Wilkinson Memorial Bursary
field: Engineering value: Approx. $500 number: 1 duration: 1 year
conditions: Awarded on the basis of financial need to a Fredericton campus Engineering student, with preference given to a student in Civil Engineering. The recipient must have demonstrated successful academic performance. donor: Friends of the late Wade Sutton and the late Kevin Wilkinson.

Paul C.C. Ting Memorial Scholarship
field: Electrical Engineering value: Approx. $1,700 number: 1 duration: 1 year
conditions: Open to students who have completed the normal requirements for the first two years of the Electrical Engineering degree program and who have demonstrated outstanding performance in the study of electric circuits. donor: Family and friends of Paul Ting.

Ken Vaughan Memorial Bursary
field: Civil Engineering value: Variable number: Variable duration: 1 year
conditions: Open to Civil Engineering students who have completed at least the normal requirements for the first year of the Civil Engineering degree program (minimum 40 ch). Selections are made on the basis of scholastic attainment and financial need. donor: The Moncton Motor Sport Club.

Lorenzo N. Wadlin Scholarship
field: Mechanical Engineering & Unrestricted value: Approx. $525 number: 2 duration: 1 year
conditions: One scholarship to a student entering the fifth term of Mechanical Engineering, who is a native of Charlotte County, and who makes a grade of at least B in the final examination in Mathematics for the year in which the scholarship is given. In the event that in any one year there should not be a Mechanical Engineering student from Charlotte County, then the scholarship shall be given to such student from any other county in the Province of New Brunswick who obtains a standing of B in Mathematics in the final examination for that year. The second scholarship is to be awarded to a student entering the third term in any faculty, who obtains high academic standing of B+ or more. donor: The late Lorenzo N. Wadlin.

Johann Wording Scholarship
field: Civil Engineering value: Variable number: Variable duration: 1 year
conditions: Awarded to a student who has completed at UNB the minimum requirements for the first year of the BScME degree program. Selection will be made on the basis of scholastic attainment. donor: Mrs. Joyce M. Lowe.

Louis and Montoura Debly Undergraduate Scholarship
field: Civil Engineering value: Min. $1,000 number: 1 duration: 1 year
conditions: Awarded to a Fredericton campus student who is entering the final year of the Bachelor of Engineering (Civil Eng) degree program and who has shown a high level of achievement in the structural engineering courses. Selection is based on scholastic attainment. donor: Louis Debly, CE 47.

Robin W. Gough Scholarship in Electrical Engineering
field: Electrical Engineering value: Variable number: 1 duration: 1 year
conditions: Awarded to a Fredericton campus student who has completed at UNB at least the normal requirements for the first year of the Bachelor of Science in Engineering (Electrical Engineering) degree program. Selections are made on the basis of scholastic attainment and financial need. donor: Robin W. Gough, BScEE'26, BScCE'32.

Alberta Land Surveyors Association Academic Achievement Scholarship
field: Geodesy and Geomatics Engineering value: $1,900 number: 1 duration: 1 year
conditions: Awarded to a Geodesy and Geomatics Engineering student who has completed or has enrolled in the two cadastral surveying option courses: GGE5521 Survey Law, GGE5833 Land Use Planning for Geomatics. Selection will be based on academic achievement. donor: Alberta Land Surveyors Association.

Earl J. Grant Memorial Scholarship
field: Civil Engineering value: $1,750 number: 1 duration: 1 year
conditions: Awarded to Fredericton campus student who has completed the requirements for first year in the Bachelor of Science in Engineering (Civil Engineering) degree program and has a demonstrated interest in the area of structural engineering. Selection will be based on scholastic attainment; consideration may be given to financial need. donor: Family and friends of Earl J. Grant, P. Eng., a former Civil Engineering professor at UNB from 1958 until his untimely death in 1987.

McElhanney Geomatics Engineering Ltd. Scholarship
field: Geodesy and Geomatics Engineering value: $2,500 number: 1 duration: 1 year
conditions: Awarded to a Geodesy and Geomatics Engineering student who has completed or has enrolled in the two cadastral surveying option courses: GGE5521 Survey Law and GGE5833 Land Use Planning for Geomatics. Selection will be based on academic achievement (minimum 3.2 scholarship GPA). Donated leadership and innovative skills will also be taken into consideration in selecting the recipient for this award. donor: McElhanney Geomatics Engineering Ltd.

Thomas D. Doyle Award
field: Engineering value: Variable, min. $1,000 number: 1 duration: 1 year
conditions: Awarded to a student who is a graduate of a New Brunswick high school and has completed at least the first-year of the Engineering degree program on the Fredericton campus. Awarded on the basis of active involvement in an Engineering Undergraduate Society, scholastic attainment and financial need. donor: Trans Mountain Pipe Line Company in honour of Thomas D. Doyle, BSc Engineering, 1960, and the New Brunswick University Opportunities Fund.

Dr. Douglas G. Pincock Electrical Engineering Scholarship
field: Electrical Engineering value: $5,000 number: 1 duration: 1 year
conditions: Awarded to a student who is entering the third or fourth year of study in the Bachelor of Engineering (Electrical) degree program. Selection will be based on academic achievement. donor: AMIRIX Systems Inc.

John Gilchrist Associated Alumni Engineering Scholarship
field: Engineering value: Approx. $500 number: 2 duration: 1 year
conditions: Awarded to a Fredericton campus student who has completed or has enrolled in at least the two required courses: GGE5521 Survey Law and GGE5833 Land Use Planning for Geomatics. Selection will be based on academic achievement. The recipient must be a graduate of a New Brunswick high school. Selection is based on scholastic attainment and financial need. donor: The late John Gilchrist, BSc EE 1932 and the New Brunswick University Opportunities Fund.

M. Patrick Gillin Award in Engineering
field: Engineering value: Variable number: Multiple duration: 1 year
conditions: Awarded to deserving undergraduate students who have completed their high school education in New Brunswick, have demonstrated involvement in the community, have achieved a satisfactory academic record and require financial assistance. Students are not eligible for a Gillin Award in an academic year during which they have a co-op or PEP term. donor: The Gillin Family and the New Brunswick University Opportunities Fund.

Colter/Avva Canada Scholarship
field: Civil Engineering value: Variable number: 1 duration: 1 year
conditions: Awarded to Fredericton campus Civil Engineering students who have graduated from a high school in the Atlantic provinces. Selections are made on the basis of scholastic attainment and financial need. donor: Colter/Avva Canada, in honour of their 50 year business relationship with Diamond Construction.
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Dr. Y. C. Lee Memorial Scholarship
field: Geodesy and Geomatics Engineering
value: $2,000.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student enrolled in the Bachelor of Science in Engineering (Geomatics) degree program, who has shown special interest and promise in the study of Geographic Information Systems (GIS).
donor: Family and friends of the late Dr. Y. C. Lee, PhD, P.Eng, who was a faculty member of the Department of Geodesy and Geomatics Engineering.

Hart Family Scholarship in Geological Engineering
field: Geological Engineering
value: $2,500.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (Geological) and has demonstrated a keen interest in making a career within the earth sciences. Selection is based on academic achievement and financial need.
donor: Faculty members and friends of the Department of Civil Engineering UNB Fredericton.

Ron Covill Memorial Scholarship
field: Civil or Geological Engineering
value: $3,500.
number: 1.
duration: 1 year.
conditions: Awarded to Fredericton campus students who have graduated from a high school in Atlantic Canada and have completed at least the first year of the Bachelor of Science in Engineering (Civil or Geological) degree program. Preference will be given to students entering the second year of the Bachelor of Science in Engineering (Civil or Geological) degree program. Selection is based on academic attainment and financial need.
donor: Family of the late Ron Covill, BScEng (Civil) '69.

Association of New Brunswick Land Surveyors Scholarship
field: Geodesy and Geomatics
value: $1,000.
number: 1.
duration: 1 year.
conditions: Awarded to a student who has completed at least the requirements for the first year of the Bachelor of Science in Engineering (Geodesy and Geomatics) degree program. Preference will be given to the student who has completed or has enrolled in the two cadastral surveying option courses: GGE5521 Survey Law; GGE5833 Land Use Planning for Geomatics. The recipient must be a resident of New Brunswick, according to the NB Provincial Government Student Financial Services Guidelines. Selection will be based on academic attainment and financial need.
donor: Association of New Brunswick Land Surveyors and the New Brunswick University Opportunities Fund.

Neill and Gunter Scholarship
field: Engineering
value: $3,000.
number: 2.
duration: 1 year.
conditions: Awarded to Fredericton campus students (1 male and 1 female) who have completed the minimum requirements for the first year of the Bachelor of Science in Engineering degree program. Selection will be based on scholastic attainment.
donor: Neil and Gunter.

Dr. Varagur S.V. Rajan & Mrs. Savithri Rajan Scholarship
field: Chemical Engineering
value: $1,200.
number: 1.
duration: 1 year.
conditions: Awarded to Fredericton campus students who have completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (Chemical) degree program. The recipients must be New Brunswick residents, according to the definition of the Provincial Government's Student Financial Services guidelines. Selection is based on scholastic attainment and financial need.
donor: Dr. & Mrs. Rajan and the New Brunswick University Opportunities Fund.

Lorne Berggren Scholarship
field: Mechanical Engineering
value: $10,000.
number: 3.
duration: 1 year.
conditions: Awarded to Fredericton campus students who are Canadian citizens enrolled in the Bachelor of Science in Engineering degree program with preference to those in mechanical engineering. Selection will be based on academic achievement and demonstration of good practical training and entrepreneurial spirit as demonstrated, for instance, by students who intend to complete the Diploma in Technology Management and Entrepreneurship.
donor: Lorne Berggren.

William P. Cooper Scholarship
field: Civil Engineering
value: Variable.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (Civil) degree program with a minimum 3.5 scholarship grade point average. One $3,000 scholarship will be awarded annually to a student who is enrolled in CE 5612 Construction: Financial and Industry Issues and one $3,000 scholarship awarded annually to a student who is enrolled in CE 5623 Project Management. In the years when these courses are not offered, one $3,000 scholarship is to be awarded to a student who is enrolled in CE 3603 Construction Engineering. Selection will be based on scholastic achievement and a demonstrated interest in building construction. Consideration may be given to the student's involvement in extracurricular activities in high school or at university.
donor: William P. Cooper.

Fluor Scholarship in Engineering
field: Chemical, Electrical, Mechanical or Civil Engineering
value: $2,500.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who is enrolled in the Bachelor of Science in Engineering (Chemical, Electrical, Mechanical or Civil) degree program. The candidates must not hold a major scholarship at the same time as this one. Selection will be based on academic achievement.
donor: Fluor Canada Ltd.

BC Land Surveyors Foundation UNB Scholarship
field: Geodesy and Geomatics Engineering
value: $2,375.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who is enrolled in the Bachelor of Science in Engineering (Geodesy and Geomatics) degree program. Preference will be given to a student who has transferred from the Nova Scotia Community College COGS Geomatics program. Selection is based on scholastic achievement and demonstrated commitment towards becoming a registered land surveyor.

E. Nelson Macnab Memorial Scholarship
field: Engineering
value: Variable.
number: 1 or more.
duration: 1 year.
conditions: Awarded to students who have completed at least the minimum requirements of the first year of the Bachelor of Science in Engineering degree program. Selection will be based on academic achievement and financial need. Preference will be given to students who demonstrate an interest in sports.
donor: The family of E. Nelson Macnab, BScEng 1943.

Margaret & Ronald Costar Scholarship
field: Electrical Engineering
value: $7,000.
number: 1.
duration: 1 year.
conditions: Awarded to students who have completed at least the normal requirements for the first year of the Bachelor of Science in Engineering (Electrical) degree program. Selection will be based on academic achievement and financial need. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines.
donor: Margaret and Ronald Costar and the New Brunswick University Opportunities Fund.

Dr. Willis F. Roberts Scholarship
field: Geodesy and Geomatics Engineering
value: $4,000.
number: 1.
duration: 1 year.
conditions: Awarded to a student who is a graduate of a New Brunswick high school, has completed the requirements for the first year of the Bachelor of Science in Engineering (Geodesy and Geomatics) degree program. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Selection is based on scholastic attainment and financial need.
donor: Dr. Willis F. Roberts, B.Sc.For. 1940, D.Sc. 2005 and the New Brunswick University Opportunities Fund.

Ira and Gladys Beattle Memorial Scholarship in Civil Engineering
field: Civil Engineering
value: Variable.
number: 1.
duration: 1 year.
conditions: Awarded to a student who is enrolled in CE 3603 Construction: Financial and Industry Issues and one $3,000 scholarship awarded annually to a student who is enrolled in CE 5623 Project Management. In the years when these courses are not offered, one $3,000 scholarship is to be awarded to a student who is enrolled in CE 3603 Construction Engineering. Selection will be based on scholastic achievement and a demonstrated interest in building construction. Consideration may be given to the student's involvement in extracurricular activities in high school or at university.
donor: Ira and Gladys Beattle and the New Brunswick University Opportunities Fund.

Jones Geomatics Scholarship
field: Geodesy and Geomatics Engineering
value: $500.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who is enrolled in the Bachelor of Science in Engineering (Geodesy and Geomatics) degree program. Preference will be given to a student who has transferred from the Nova Scotia Community College COGS Geomatics program. Selection is based on scholastic achievement and demonstrated commitment towards becoming a registered land surveyor.
who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (Chemical) degree program. Preference will be given to students from British Columbia and or students who are registered as a student or member of the Association of BC Land Surveyors. Selection will be based on academic achievement. This scholarship is also open to transfer students. **donor:** Association of BC Land Surveyors.

**R.J. Collier Memorial Scholarship**

**field:** Electrical Engineering. **value:** $3,000. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a Fredericton campus student who has completed at least the minimum requirements for the third year of the Bachelor of Science in Engineering degree program (all disciplines). Selection will be made on the basis of scholastic attainment and financial need. **donor:** Class of 1958 Engineering Alumni.

**Class of 1958 Engineering Alumni Scholarship**

**field:** Engineering. **value:** $3,300. **number:** 1. **duration:** 1 year. **conditions:** Open to Fredericton campus students who have completed at least the minimum requirements for the third year of the Bachelor of Science in Engineering degree program (all disciplines). Selection will be made on the basis of scholastic attainment and financial need. **donor:** Friends and students of the late Professor R.J. Collier.

**H. E. McKeen Scholarship**

**field:** Engineering. **value:** $1,500. **number:** Multiple. **duration:** 1 year. **conditions:** Awarded to students enrolled in any discipline of the Bachelor of Science in Engineering. Selection will be based on academic achievement and financial need. **donor:** The McKeen Foundation.

**Jack Howell OCI Scholarship**

**field:** Chemical, Mechanical or Electrical Engineering. **value:** $2,500. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a Fredericton campus student who has completed at least the requirements for the third year of the Bachelor of Science in Engineering (Chemical, Mechanical or Electrical) degree program. The recipient must demonstrate a solid aptitude and interest in the field of nuclear engineering. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Selection is based on scholastic attainment and financial need. **donor:** The Organization of CANDU Industries (OCI) and the New Brunswick University Opportunities Fund.

**David Kent Plummer Memorial Scholarship**

**field:** Electrical Engineering. **value:** $1,000. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a student who has completed the requirements for the first year of the Bachelor of Science in Engineering (Electrical) and is beginning second year. Preference will be given to a graduate of Saint John High School. Selection will be based on scholastic attainment and financial need. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. **donor:** Arthur Plummer and the New Brunswick University Opportunities Fund.

**Leslie W. Shenk Scholarship**

**field:** Chemical Engineering. **value:** Up to $5,000. **number:** Multiple. **duration:** 1 year. **conditions:** Awarded to a Fredericton campus student who is enrolled in the Bachelor of Science in Engineering (Chemical) and is a graduate of an Atlantic Canadian high school. Selection is based on academic achievement. Consideration may be given to financial need. Students transferring from another Canadian institution may be considered for this scholarship. **donor:** Dr. Desmond J. Green (MSE CHE '67, DSC '95), engineer, entrepreneur and community leader.

**Ajay Cariappa Bursary**

**field:** Civil Engineering. **value:** $2,000. **number:** 1. **duration:** 1 year. **conditions:** Awarded on the basis of financial need to a Fredericton campus student who is enrolled in the third or fourth year of the Bachelor of Science in Engineering (Civil) degree program. The recipient must have successful academic performance and, in keeping with the professional experience of Ajay Cariappa have a demonstrated interest in construction engineering. **donor:** Peter Kiewit Sons' Inc., and the friends and family of the late Ajay Cariappa (MSE CE '00).

**Professor Howard McFarlane Bursary**

**field:** Civil Engineering. **value:** $2,000. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a student specializing in Soils Mechanics. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines, and demonstrate successful academic performance. **donor:** Association of BC Land Surveyors.

**SECTION C: SCHOLARSHIPS, PRIZES AND AWARD**

**Professor Ralph Francis Bursary**

**field:** Civil Engineering. **value:** $1,500. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a Fredericton campus student who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (Civil) degree program and is a graduate of a New Brunswick high school. Preference will be given to a student specializing in Soils Mechanics. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Selection is based on academic achievement and financial need. **donor:** The estate of John S. Watt.

**Jonathan Fullarton CBCL Engineering Scholarship**

**field:** Engineering. **value:** $2,000. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a student who is entering the final year of the Bachelor of Science in Engineering degree program. Selection will be based on scholastic attainment. **donor:** CBCL Limited.

**John S. Watt Memorial Scholarship**

**field:** Civil Engineering. **value:** $500. **number:** 1. **duration:** 1 year. **conditions:** Awarded on the basis of financial need to a Fredericton campus student who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (Civil) degree program and is a graduate of a New Brunswick high school. Preference will be given to a student specializing in Soils Mechanics. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines, and demonstrate successful academic performance. **donor:** The estate of John S. Watt.

**Joseph Edward Thomas Memorial Scholarship**

**field:** Engineering. **value:** $3,500. **number:** 2. **duration:** 1 year. **conditions:** Awarded to two students on the Fredericton campus who have a good academic standing (GPA 3.0 or better) and have demonstrated involvement in student activities at the University, Faculty of Engineering or community level. In making the award, consideration will be given to students considered to have potential for developing a successful career in engineering. Preference will be given to students who meet the criteria and do not hold another major award. One scholarship will be awarded to a student who is beginning the third year of the Bachelor of Science in Engineering (Civil) degree program and one scholarship to be awarded to a student who is entering the final year of the Bachelor of Science in Engineering (Civil) degree program. **donor:** Family, friends, classmates of the late Nels Anderson II.

**Nels Anderson II Scholarship**

**field:** Civil Engineering. **value:** $6,500. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a student who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (Civil) degree program and is a graduate of a New Brunswick high school. Preference will be given to a student specializing in Soils Mechanics. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Selection is based on academic achievement and financial need. **donor:** Mark Joseph Thomas (BScCHE 1982) and Rena Alberta Thomas.

**Wilson W. Abernethy Award in Construction Engineering**

**field:** Civil Engineering. **value:** $1,000. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a Canadian student who is entering the final year of the Bachelor of Science in Engineering (Civil) degree program. Selection is made on the basis of a demonstrated interest in construction engineering as well as work experience on construction projects, with consideration given to financial need, extracurricular activities, practical potential, and ethical standards. In any given year the scholarship may not be awarded if a suitable candidate is not found. **donor:** John W. and Gail L. Abernethy.

**Midwest Surveys Scholarship**

**field:** Geodesy and Geomatics. **value:** $2,000. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a student who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (Geodesy and Geomatics) degree program and has demonstrated an interest in cadastral studies. Selection is based on academic achievement and demonstrated leadership. **donor:** Midwest Surveys.

**Malcolm and Lorna McNeill Scholarship**

**field:** Engineering. **value:** $2,000. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a student from the Maritime Provinces who has completed at
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

least the minimum requirements for second year of the Bachelor of Science in Engineering (any discipline). Selection is based on academic achievement and financial need. donor: Malcolm and Lorna MacNeil

Procter & Gamble TME Scholarship
field: Engineering.value: $2,000.number: 1.duration: 1.year.conditions: Awarded to a student who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering and is pursuing a Diploma in Technology Management and Entrepreneurship. Selection is based on academic achievement.donor: Procter & Gamble

Rory Reardon Memorial Scholarship
field: Engineering.value: $3,000.number: 2.duration: 1 year (may be renewed).conditions: Awarded to a student who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (any discipline). Selection is based on academic achievement and financial need. field: Electrical Engineering. value: Variable. number: Variable. duration: 1 year. conditions: Awarded to undergraduate students in the Electrical Engineering degree program who have graduated from a high school in New Brunswick. Selections are made on the basis of scholastic attainment and financial need, with consideration given to the recipients' qualities of leadership. donor: Mrs. Marion C. Cuthbertson.

Dixon Family Foundation Scholarship
field: Engineering. value: $7,500. number: 1. duration: 1 year. conditions: Awarded to a student who is a graduate of a New Brunswick high school and has completed the requirements for the first year of the Bachelor of Science in Engineering program. Selection will be based on scholastic...
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

attainment and financial need. Preference will be given to a student studying civil engineering. The recipient must be a New Brunswick resident according to the definition of the Provincial Government's Student Financial Services guidelines. donor: Greg (BSE CE 1980) and Shelli Dixon and the New Brunswick University Opportunities Fund.

UNB Environmental Studies Scholarship
field: Environmental Studies value: $2,500 number: 1 duration: 1 conditions: Awarded to a student who has completed at least the minimum requirements for the first year of an undergraduate degree program and has a demonstrated interest in the environment. Selection is based on academic achievement. donor: Marie-Paule Boucher (Godin) and the New Brunswick Universities Opportunities Fund.

Philip J. Whalen Memorial Scholarship
field: Chemical Engineering value: $3,000 number: 1 duration: 1 conditions: Awarded to a student who has completed at least the minimum requirements for the first year of the Bachelor of Science degree program. Preference will be given to a female student and consideration given to financial need. donor: Colleen Northcott (BSC 1977, PHD 1983)

Brian W. Boucher Scholarship
field: Forestry or Biology value: $500 number: 1 duration: 1 conditions: Awarded to a Fredericton campus student who has completed at least the minimum requirements for the first year of an undergraduate degree program in the Faculty of Forestry and is a graduate of a New Brunswick High School. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Preference will be given to graduates of Bathurst High School. If there is no qualified student available, then a student from the Faculty of Business Administration may be selected. Selection is based on academic achievement, financial need, extracurricular activities and community involvement. donor: Brian W. Boucher and the New Brunswick University Opportunities Fund.

Marie-Paule F. Boucher (Godin) Scholarship
field: Forestry or Biology value: $500 number: 1 duration: 1 conditions: Awarded to a female student on the Fredericton campus who has completed at least the minimum requirements for the first year of an undergraduate degree program in the Faculty of Forestry. The recipient must be a graduate of a New Brunswick High School with preference given to graduates of Mathieu Martin High School. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. If there is no qualified student available, one may be chosen from the Bachelor of Science program who has declared a major in Biology. Selection is based on academic achievement, financial need, extracurricular activities and community involvement. donor: Marie-Paule Boucher (Godin) and the New Brunswick Universities Opportunities Fund.

Heather Locking-Cusolito and John Cusolito Scholarship
field: Nursing value: $2,500 number: 1 duration: 1 conditions: Awarded to a student who is beginning the final or penultimate year of the Bachelor of Nursing or the Bachelor of Nursing Advanced Standing Program. Selection is based on academic performance. Consideration may be given to financial need. donor: Heather Locking-Cusolito and John Cusolito.

CNP Scholarship
field: Business Administration value: $500 number: 1 duration: 1 conditions: Awarded to a student who has completed at least the minimum requirements for the second year of the Bachelor of Business Administration degree program and has selected a major in accounting. Selection is based on academic achievement and financial need. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. donor: CPA New Brunswick and the New Brunswick University Opportunities Fund

Asa Dow Scholarship
field: Education value: $1,500 number: 1 duration: 1 conditions: Awarded on the basis of financial need to a male student in the Bachelor of Education degree program. The recipient must be a New Brunswick resident and must not be residing at home while attending university. donor: The late Asa Dow

William L. Barrett Engineering and Geoscience Scholarship
field: Engineering or Earth Science value: $1,000 number: 1 duration: 1 conditions: Awarded annually to a student in the Engineering or Earth Sciences (Geoscience) program at UNB on the Fredericton campus who has successfully completed one year of study (a minimum of 35 ch) leading to the degree of Bachelor of Science in Engineering or Earth Sciences. Preference will be given to students who have graduated from a high school within the City of Fredericton. donor: APEGNB Fredericton Branch.

Gary Govett Geoscience Scholarship
field: Earth Science and Geological Engineering value: $1,000 number: 1 duration: 1 conditions: Awarded to a fourth year student who has declared a major or honours in Earth Sciences or Geological Engineering. Selection will be based on academic achievement. Preference will be given to student whose thesis focuses on geochemistry. donor: Family and friends of Prof. Gary Govett.

Gary F. Mitton Scholarship in Civil Engineering
field: Civil Engineering value: $10,000 number: 1 duration: 1 (may be renewed) conditions: Awarded to a student who is enrolled in the Bachelor of Science in Engineering (Chemical) degree program. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services. Selection is based on academic achievement and financial need. donor: LuminUltra Technologies Ltd and the New Brunswick University Opportunities Fund.

Katherine (Valenta) Darvesh Scholarship
field: Engineering or Earth Science (GeoScience) program at UNB on the Fredericton campus number: 1 duration: 1 conditions: Awarded to a student enrolled in the Bachelor of Science in Engineering or Earth Sciences program. Preference will be given to a Chemistry major. donor: Family of the late Della Sansom

Gary F. Mitton Scholarship
field: Civil Engineering value: $10,000 number: 1 duration: 1 (may be renewed) conditions: Awarded to a student who has completed at least the minimum requirements for the first year of the Bachelor of Science in Engineering (Civil) degree program. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Selection is based on academic achievement and financial need. Preference will be given to a graduate of Moncton High School. donor: Gary F. Mitton, BScEng (Civil) 1974 and the New Brunswick University Opportunities Fund.

Teck Resources Scholarship
field: Computer Science, Earth Science & Engineering value: $1,900 number: 1 duration: 4 conditions: Awarded to students who have completed at least the minimum requirements for the first year in one
of the following degree programs: Bachelor of Science in Engineering (Chemical, Geological or Mechanical), Bachelor of Computer Science, Bachelor of Science in Computer Science or Bachelor of Science majoring in Earth Sciences. Selection will be based on academic achievement. Preference will be given to female students.

Ronald G. Pearce Memorial Bursary
field: Arts or Science. value: Variable. number: 1. duration: 1 year. conditions: Awarded on the basis of financial need to a Fredericton campus student who has completed at least the minimum requirements for the first year of the concurrent Bachelor of Arts/Bachelor of Science degree program. The recipient must demonstrate successful academic achievement. The scholarship is in memory of Ronald G. Pearce, who graduated in Electrical Engineering at UNB in 1962. Throughout his life, Ron had an interest in the arts, photography, music and travel, as well as engineering.

Aliant Scholarship
field: Business Administration. value: $1,500. number: 2. duration: 1 year. conditions: Awarded primarily on the basis of academic performance to students in the Business Administration degree program who have completed at least the normal requirements for the first year of the degree program. Eligible candidates must be residents of the Province of New Brunswick. The Aliant Telecommunications Scholarship.

R. W. Gilbert Memorial Scholarship
field: Engineering, Computer Science or Forestry. value: Variable. number: 1. duration: 1 year. conditions: A deserving student in the Faculties of Engineering, including Computer Science, or Forestry and/or Forset Engineering. The late Mrs. R.W. Gilbert.

Louis Joseph Godbout Memorial Scholarship
field: Geology or Geological Engineering. value: Variable. number: 1. duration: 1 year. conditions: Awarded to a UNB student who has completed at least the normal requirements for first year of the Science or Geological Engineering degree program. Selection is made on the basis of scholastic attainment and financial need to a student who in a tangible way has demonstrated he/she will bring to the Geology profession a high degree of dedication and enthusiasm. Co-workers at Utah Mines Ltd./Utah International Inc. and the Company.

Preference will be given to residents of New Brunswick who have demonstrated excellence in mathematics and have completed at least 9 credit hours in mathematics. **donor:** Family, friends and colleagues of the late Dr. Ken Ireland, Professor of Mathematics and Statistics.

**John J. McCaffrey Scholarship**

**field:** Biology. **value:** Variable. **number:** Variable. **duration:** 1 year. **conditions:** Awarded primarily on the basis of academic performance to students in the Science degree program who have demonstrated excellence in at least nine credit hours in Biology. **donor:** The late Catherine Pheilis McCaffrey.

**Walker H. Rideout Scholarship**

**field:** Chemistry or Biochemistry. **value:** Variable. **number:** Variable. **duration:** 1 year. **conditions:** Awarded on the basis of scholastic attainment and financial need to Fredericton campus students in the Science degree program who are entering the penultimate year in the Honours or Majors program in Chemistry or Biochemistry. **donor:** Mr. Walker H. Rideout.

**Dr. G.F.M. Smith Memorial Scholarship**

**field:** Biological Sciences. **value:** Approx. $2,000. **number:** 1. **duration:** 1 year. **conditions:** Awarded to an UNBF student in the Faculty of Science who has completed a minimum of 75 ch, who is majoring or honouring in Biology (including interdisciplinary programs) and who has good academic standing, high personal integrity and an apparent aptitude for research. **donor:** The family of the late G.F.M. Smith.

**Michael Christian Branscombe Memorial Scholarship**

**field:** Biology. **value:** Variable. **number:** 1. **duration:** 1 year. **conditions:** Awarded to Fredericton campus students in the Faculty of Science who are majoring in Biology and who have graduated from a New Brunswick high school. The scholarship is intended to assist students whose career plans have the potential to ease the suffering of human beings. Selections are made on the basis of scholastic attainment and financial need. **donor:** Family and friends of the late Michael Christian Branscombe, a former UNB Science student and the New Brunswick University Opportunities Fund.

**A.L. McAllister Scholarship**

**field:** Applied Earth Sciences. **value:** Approx. $2,500. **number:** 1. **duration:** 1 year. **conditions:** Open to students entering their final year of the undergraduate Earth Sciences degree program. Selection will be made on the basis of scholastic attainment and involvement in extracurricular activities. **donor:** Friends, students and colleagues in honour of Dr. A.McAllister on the occasion of his retirement.

**Clayton-Wilkinson Scholarship**

**field:** Science. **value:** Variable. **number:** 1. **duration:** 1 year. **conditions:** Awarded to a Fredericton campus student from New Brunswick who has completed the normal requirements for the first year of the Bachelor of Science degree program. Preference will be given to students majoring in Chemistry. Selection will be made on scholastic attainment and financial need. **donor:** Mrs. Jane Clayton Morrissey and the New Brunswick University Opportunities Fund.
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Dr. Haider R. Zaidi Memorial Scholarship
field: Physics or Mathematics.
value: Approx. $500.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student majoring in Physics or Mathematics who has successfully completed the minimum credit hour requirements for two years of study and has achieved a minimum GPA of 3.7. Selection will be based on scholastic attainment and financial need. Preference will be given to Physics students.
donor: Family of the late Dr. Haider R. Zaidi.

Dr. C. Lutze-Wallace Scholarship
field: Chemistry, Biology/Chemistry, or Medical Laboratory Science.
value: Variable.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who has graduated from a New Brunswick high school and has completed the normal requirements for the first year of the Bachelor of Science degree program demonstrating excellence in the Chemistry or Biology/Chemistry fields, or is enrolled in the Bachelor of Medical Laboratory Science. Selection will be made on scholastic attainment and financial need.
donor: Dr. Cyril Lutze-Wallace, BSc. ‘82, PhD ‘88 and the New Brunswick University Opportunities Fund.

Dorothy and Kenneth Langmaid Scholarship
field: Science.
value: Variable.
number: 1.
duration: 1 year.
conditions: Awarded to a student who has graduated from a Charlotte County High School and has completed at least the requirements for the first year of the Bachelor of Science degree program, with preference given to a student who has a major in Chemistry or Geology. Preference will also be given to a Sir James Dunn Academy graduate. Selection will be based on academic achievement with consideration given to financial need and the student's level of involvement in his/her community.
donor: Fundy Community Foundation.

Margaree Scholarship in Geology
field: Geology.
value: $2,500.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who has completed at least the minimum requirements for the first year of the Bachelor of Science, has declared a major in Geology and has demonstrated a keen interest in making a career within the earth sciences. Selection is made on the basis of scholastic attainment and financial need to a student who in a tangible way has demonstrated that s/he will bring to the Geology profession a high degree of dedication and enthusiasm. Preference will be given to a student from Cape Breton Highland Academy.
donor: John Hart.

Dr. Margot R. Roach Scholarship
field: Physics.
value: $1,000.
number: Up to 3.
duration: 1 year (may be renewed).
conditions: Awarded to a Fredericton campus student who has completed the minimum requirements for the second year of an undergraduate degree program and is beginning the third year. Preference will be given to a student who has declared a major in Physics. Selection will be based on scholastic attainment. Consideration will be given to renewing the scholarship for the recipient's fourth year of study as long as the student has achieved Dean's List status in the third year and has declared a major in Physics. In any one year, there may be two scholarships awarded: one renewed for the fourth year student and one for the third year student.
donor: Established in 2005 by Dr. Margot R. Roach in celebration of the 50th anniversary of her graduation in Math and Physics in the Class of 1955.

Dr. John W. Purdy Scholarship
field: Physics.
value: $8,000.
number: 1.
duration: 1 year.
conditions: Awarded to a student who has graduated from a New Brunswick high school, and has declared a major in Physics. Selection will be based on scholastic attainment and financial need.
donor: Family and friends of Dr. John W. Purdy (B.Sc. 1962) and the New Brunswick University Opportunities Fund.

UNB Foundations of Medicine Scholarship
field: Science.
value: $1,000.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who has completed the requirements for the third year of the Bachelor of Science degree program and has indicated the intention to pursue studies toward obtaining a degree in medicine. Selection is based on scholastic attainment and financial need.
donor: UNB Alumni in the Dalhousie University Medical School Graduating Class of 1981.

Robert Quartermain Geology Scholarship
field: Geology.
value: $5,000.
number: 2 or more.
duration: 3 years.
conditions: Awarded to Fredericton campus students who have completed at least the requirements for the first year of their Bachelor program and have declared a major in Geology (Geosciences or Geoengineering). Selection is based on scholastic attainment and financial need. Renewal of the scholarship is contingent on academic performance in Geology subjects (minimum 3.5 GPA) and progress through the program. Transfer students are eligible to be considered.
donor: Robert Quartermain, Chairman & CEO, Preylum Resources Inc.

Ward Family Scholarship
field: Science.
value: $11,000.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who is a graduate of a Maritime high school (NB, NS, PEI) enrolled in the third or fourth year of the Bachelor of Science program intending to attend medical school. Selection is based on academic achievement.
donor: David Ward.

G. Vernon and Leila M. Ashfield Memorial Scholarship
field: Physics.
value: $2,500.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who has completed the requirements for the third year of the Bachelor of Science degree program and has indicated the intention to pursue studies toward obtaining a degree in medicine. The recipients must be a graduate of a New Brunswick high school. Selection is based on academic achievement and financial need.
donor: Mr. & Mrs. Dale Ashfield in memory of his father and mother, G. Vernon and Leila M. Ashfield, and the New Brunswick University Opportunities Fund.

Dr. Ker-Ping Lee Memorial Scholarship
field: Physics.
value: $2,000.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who has completed at least the minimum requirements for the first year of the Bachelor of Science degree and has declared a major in Physics. The recipient must be a New Brunswick resident, according to the definition of the Provincial government's Student Financial Services Guidelines. Selection will be based on academic achievement and financial need.
donor: Family of the late Dr. Ker-Ping Lee, who was an instructor at UNB Fredericton, and the New Brunswick University Opportunities Fund.

Michael (Mike) McAlloon Memorial Scholarship in Physics
field: Physics.
value: $1,500.
number: 1.
duration: 1 year.
conditions: Awarded to a Fredericton campus student who has completed at least the minimum requirements for the first year of the Bachelor of Science degree and has declared a major in Physics. Selection is based on academic achievement.
donor: Family and friends of the late Mike McAlloon, BSc. 2007.

Joyce E. Baker Memorial Bursary
field: Science.
value: $5,000.
number: 1.
duration: 1 year.
conditions: Awarded on the basis of financial need to a Fredericton campus student with a spouse. The recipient must have demonstrated successful academic performance. Preference will be given to a student who has completed at least the minimum requirements for the first year of the Bachelor of Science degree program.

New Brunswick Dental Society Scholarship
field: Science.
value: $1,000.
number: 1.
duration: 1 year.
conditions: Awarded to a student who has completed at least the minimum requirements for the first year of the Bachelor of Science degree program and intends to continue his/her studies in the field of dentistry after graduation. Selection is based on scholastic achievement and financial need. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines.
donor: New Brunswick Dental Society and the New Brunswick University Opportunities Fund

Rosemary A. Wilcox Memorial Scholarship in Earth Sciences
field: Earth Sciences.
value: Variable.
number: 1.
duration: 2 years.
conditions: Awarded to a Fredericton campus student who has completed at least the minimum requirements for the second year of the Bachelor of Science and has declared a major in Earth Sciences. Selection is made on academic achievement. Only one scholarship will be awarded every two years.
donor: Donald Wilcox, BSc. 1947.

Lorraine Dee Memorial Scholarship
field: Health Sciences.
value: Approx. $500.
number: 1.
duration: 3 years.
conditions: Open to Saint John campus students who are graduates of a New Brunswick high school and have completed at least the minimum requirements for the first year of the Bachelor of Health Sciences (Radiography) degree program. Selection is based on scholastic
attainment and financial need. **donor:** Dr. Gerry Clayden and the New Brunswick University Opportunities Fund.

**Eileen Handa Nursing Bursary**

**field:** Nursing

**value:** $1,000

**number:** 1

**duration:** 1 year

**conditions:** Awarded on the basis of financial need to a Saint John campus student who has completed the minimum requirements for the second year of the Bachelor of Nursing degree program and has demonstrated successful academic performance. 

**Mitton Memorial Scholarship**

**field:** Science

**value:** $1,500

**number:** 1

**duration:** 1 year

**conditions:** Awarded on the basis of financial need to a Saint John campus student who has completed at least the minimum requirements for the first year of the Bachelor of Nursing degree program. The recipients must be New Brunswick residents, according to the definition of the Provincial Government's Student Financial Services guidelines. **donor:** The family of Eleanor MacKenzie and the New Brunswick University Opportunities Fund.

**Eleanor Grace (Vincent) MacKenzie Memorial Bursary**

**field:** Health Sciences or Nursing

**value:** $2,500

**number:** 4

**duration:** 1 year

**conditions:** Awarded on the basis of financial need to Saint John campus students who demonstrate successful academic performance. At least one bursary will be awarded to a student who has completed at least the minimum requirements for the first year of the Bachelor of Nursing degree program and has a Concurrent program involving one of these. Selection will be based on demonstrated excellence in the area of geriatrics. The recipient must demonstrate successful academic performance. **donor:** William John Ayerst and the New Brunswick University Opportunities Fund.

**SECTION C: SCHOLARSHIPS, PRIZES AND AWARD**

Awarded to a Saint John campus student who has completed at least the requirements for the second year of the Bachelor of Nursing degree program. Selection will be based on demonstrated excellence in the area of geriatrics. The recipient must demonstrate successful academic performance. **donor:** Alumni of the Saint John General Hospital School of Nursing.

**Margaret Benoit Ayerst IODE Memorial Nursing Scholarship**

**field:** Nursing

**value:** Variable

**number:** 1 or more

**duration:** 1 year

**conditions:** Awarded to a Saint John campus student who has completed at least the minimum requirements for the first year of the Bachelor of Nursing degree program. Fred Magee Prize in Technology Education
field: EDUCATION
conditions: A prize of approximately $1,000 to be awarded annually, on the recommendation of the Faculty of Education, to a graduating student in the, Faculty of Education, who has demonstrated academic excellence, qualities of leadership, and professional promise in technology, science or mathematics education. The prize is funded by the Fred Magee endowment fund to the NB Department of Education.

Ingrid J. Peterson Memorial Prize
field: EDUCATION
conditions: A prize of $100 to be awarded annually on the recommendation of the Faculty of Education, to the graduating student specializing in English of Literacy, who has maintained the highest grade point average. Funded by friends of the late Ingrid J. Peterson.

Anne & Allen Selby Prize for the Performing Arts
field: EDUCATION
conditions: A prize of variable value (minimum $1,000) to be awarded annually on the recommendation of the Faculty of Education to a Fredericton campus student in the Bachelor of Education program, who demonstrates outstanding achievement in the study and presentation of one of the categories of written, movement, spoken, musical and dramatic arts. This prize is funded by Anne and Allen Selby.

Agnea Nevers Shaw Memorial Award
field: EDUCATION
conditions: An annual prize of $250 established by Mr. Wendell B. Shaw to be given to an undergraduate student in the Faculty of Education for the best essay on the Magna Carta.

Lorne Joseph Simon Prize
field: EDUCATION
conditions: A prize of $1,750 to be awarded annually on the recommendation of the Faculty of Education to an outstanding full-time Fredericton campus First Nations student, with preference given to a promising writer. The prize will be awarded on the recommendation of the Faculty of Education (Mi’kmaw-Wolastoqey Institute) in consultation (where appropriate) with the Prize Committee of the Department of English. The prize has been funded by family and friends of the late Lorne Joseph Simon, an outstanding student in the Faculty of Education, and an accomplished writer.

Second Language Research Institute Prize
field: EDUCATION
conditions: Two prizes of $200 each to be awarded annually on the recommendation of the Second Language Research Institute of the Faculty of Education to two graduating students on the Fredericton campus who have demonstrated outstanding ability in the field of English Second Language (ESL) or French Second Language (FSL) Education. The recipients will have attained a high overall academic standard, will have excelled in second language courses, and will have completed a successful practicum in a FSL or ESL context. The prizes are funded by the Second Language Research Institute.

Roberta M. Scott Prize
field: EDUCATION
conditions: A $1,000 prize to be awarded annually on the recommendation of the Faculty of Education to an outstanding graduating student who combines high academic achievement with demonstrated leadership in non-academic activities, whether within the university community or beyond. The prize was established by Richard J. Scott, QC, FEC (Hon), BBA 1974, LLB 1976, in memory of his mother, Roberta M. Scott, BA, Bt.

The Late Richard Laurence Weldon Prize in Mechanical Eng.
field: ENGINEERING
conditions: A $1,715 prize awarded annually on the recommendation of the Department of Mechanical Engineering to a student with high academic standing who is entering the seventh term of a Mechanical Engineering program. The applicant is not eligible should he/she hold another major award tenable during his/her final year. The prize is funded by the late Mr. Richard Laurence Weldon.

Sam Budovitch Memorial Prize
field: ENGINEERING
conditions: A prize of $600 to be awarded annually on the recommendation of the Department of Civil Engineering to the student with the highest standing in first year Civil Engineering (35-40 ch). Funded by the late Mr. Sam Budovitch.

Chemical Engineering Faculty Prize
field: ENGINEERING
conditions: An annual prize of $500 has been established by the faculty members of the Department of Chemical Engineering to be awarded to the student who has attained the highest standing in the final year of Chemical Engineering.

K. R. Chestnut Memorial Prize
field: ENGINEERING
conditions: An annual prize of $1,650 was bequeathed to UNB by the late Mrs. Annie H. Chestnut. It is to be awarded to an outstanding student in the Faculty of Engineering on the recommendation of the Engineering Awards Committee.

L.A. Gale Prize
field: ENGINEERING
conditions: A $545 prize awarded annually on the recommendation of the Department of Geodesy and Geomatics Engineering to a Canadian student, upon completion of six terms of Geodesy and Geomatics Engineering, who shows academic promise and is in need of financial assistance.

Garson Memorial Prize
field: ENGINEERING
conditions: The late Abram I. Garson bequeathed the sum of $2,000 to the University, the investment earnings therefrom to be awarded annually to the student registered in the Faculty of Engineering who, in the first year, attains the highest standing. The amount will be approximately $300.
A book to be selected by the Chair will be presented to the recipient and a highest grade point average within the first year of the TME Diploma Program of Dr. Alan Y. McLean Memorial Prize Loggie Engineering to the student having the highest standing in the introductory field:

Demonstrates the qualities of tenacity and fellowship. The Chemical Engineering student on the Fredericton Campus who is entering recommendation of the Department of Geodesy and Geomatics field:

Gottfried Konecny Survey Award

An award of $500 per year of Chemical Engineering with the highest standing. The award is pro

Dr. E. O. Turner Prize

A medal and $500 prize to be awarded annually on the recommendation of the Department of Civil Engineering to a Fredericton campus student who demonstrates qualities of leadership and breadth of horizon, coupled with a good academic standing, that should lead to a high station in future life. One candidate from each of the Departments of Civil, Electrical and Mechanical Engineering shall be nominated by each of the departments. This prize is funded by the Associated Alumni in honour of Dr. E. O. Turner, former Head of the Department of Civil Engineering and Dean of the Faculty of Engineering at UNB.

Eric E. Wheatley Memorial Medal

A medal and $500 prize to be awarded annually on the recommendation of the Faculty of Engineering to a Fredericton campus student who demonstrates qualities of leadership and breadth of horizon, coupled with a good academic standing, that should lead to a high station in future life. One candidate from each of the Departments of Civil, Electrical and Mechanical Engineering shall be nominated by each of the departments. This prize is funded by the Associated Alumni in honour of Dr. E. O. Turner, former Head of the Department of Civil Engineering and Dean of the Faculty of Engineering at UNB.

SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Gerhard Gloss Prize in Cartography

An award of $1,000 to be awarded annually on the recommendation of the Department of Geodesy and Geomatics Engineering to a student in any faculty on the Fredericton campus who has designed and published a map of high technical and artistic merit. The map may be produced using traditional or computer-assisted cartographic techniques. The prize has been funded by friends and colleagues of Professor Gerhard Gloss.

Allan K. Grimmer Prize

Four prizes of $1,200 each awarded annually on the recommendation of the Chair of the Department of Civil Engineering to students who have completed two years of study of the regular program in the Department of Civil Engineering. Preference will be given to applicants with high academic qualifications, who are not already in receipt of a major scholarship. The prize is funded by the late Allan K. Grimmer.

Ronald C. Hurley Award in Chemical Engineering

An award of $1,000 to be awarded annually on the recommendation of the students and faculty members of the Department of Chemical Engineering to a graduating student in the Department of Chemical Engineering, Made on the basis of scholastic attainment and participation in department, university and community activities. Donated by family members as well as students and faculty members in the Department of Chemical Engineering.

Brydone Jack Prize

An annual prize of $540 donated by the Associated Alumni of the University of New Brunswick. It is to be awarded to the full time student who obtains the highest standing in the final two terms of the Electrical or Computer Engineering program.

D. Malcolm Jeffrey Memorial Prize

The family of the late D. Malcolm Jeffrey has established a prize of $225 to be awarded annually to the Civil Engineering student who obtains the second highest standing based on the regular (full-time) student work in the final two years of the student's regular program.

Ketchum Memorial Medal

A silver medal to be known as the Ketchum Medal has been founded according to the will of the late H.G.C. Ketchum, Esq., and is to be awarded to the top graduating student in Civil Engineering based on the regular (full time student) work in the final two terms of the student's regular program.

Gottfried Konecny Survey Award

A $1,500 prize awarded annually on the recommendation of the Department of Geodesy and Geomatics Engineering to a student with high academic standing, creative abilities, and a constructive attitude towards the surveying profession who has completed six terms of the Geodesy and Geomatics Engineering program. Financial need will also be considered. The prize is funded by the Gottfried Konecny Survey Award Fund.

Duane Logan Award

An award to be made annually on the recommendation of the Department of Chemical Engineering to the Chemical Engineering student on the Fredericton Campus who is entering fourth year in the program, and who in the opinion of the Department best demonstrates the qualities of tenacity and fellowship. The award has been funded by the Chemical Engineering Class of 1966 in memory of their fellow classmate, Duane Logan.

Purves Loggie Prize

A $250 prize awarded annually on the recommendation of the Department of Geodesy and Geomatics Engineering to the student having the highest standing in the introductory surveying course. The prize is funded by the family of the late Mr. Purves Loggie.

Dr. Alan Y. McLean Memorial Prize

A prize of $550 to be awarded annually on the recommendation of the Chair of the J. Herbert Smith/ACOA Chair in Technology Management and Entrepreneurship to the student attaining the highest grade point average within the 15 ch of the TME Diploma Program. A book to be selected by the Chair will be presented to the recipient and a copy placed in the library in the Centre. The name of the student will be placed on a plaque in the Dr. J. Herbert Smith Seminar Room.

Sasi Mohan Pal Prize

A prize of approximately $200 to be awarded annually on the recommendation of the Department of Chemical Engineering to a Fredericton campus student who achieves the highest standing at the completion of second or third year of the Chemical Engineering degree program at UNB (minimum B+ ch). The prize has been funded by Mrs. Purabi Pal in memory of her husband, Sasi Mohan Pal, a graduate of UNB.

Samuel Leonard Peters Prize

The late Miss Marianne Grey Otty has endowed $900 to UNB, the income therefrom to be used to establish a prize in memory of Flying Officer S. Leonard Peters, of Queenstown, N.B., who was killed in action, August 1944, while serving with the RCAF over France. The prize will be awarded to the student who has the highest standing in the first year of the Mechanical Engineering program.

Louis R. Seheult Prize

A prize of $1,500 to be awarded annually on the recommendation of the Department of Civil Engineering to a UNB student who is a Canadian high school graduate and, upon the completion of the penultimate year of the Bachelor of Science in Engineering, exhibits: academic excellence, qualities of leadership, managerial potential, and a demonstrated understanding of the interactions of finance, human resources and technology required for a prominent role in the design, and/or construction of quality Canadian infrastructure. The prize will not be awarded to a student who is the current beneficiary of a prize or scholarship with an annual value exceeding $2,000 dollars. The prize has been funded by family and friends of the late Professor Louis R. Seheult.

John Stephens Memorial Prize

The late Dr. John Stephens, a graduate of Trinity College, Dublin, was an eminent engineer and for many years the distinguished and beloved professor of Mechanical Engineering at this University. In 1954 the Associated Alumni established the John Stephens Memorial Prize to perpetuate his memory and to encourage scholarship in the Department of Mechanical Engineering. This prize, which has a cash value of $250, is awarded annually upon the recommendation of the head of the department to the leader of the graduating Mechanical Engineering students.

Canadian Society for Chemical Engineering Prize

A certificate of merit, engraved medal and a cash award of $50 are donated annually by the Canadian Society for Chemical Engineering, to be awarded to a student completing the penultimate year of Chemical Engineering with the highest standing.

Canadian Society for Civil Eng. Certificate of Achievement

An award of a certificate and a one week scholarship to the Canadian Society for Engineering students.

Dr. E. O. Turner Prize

A $250 prize awarded annually on the recommendation of the Faculty of Engineering to a Fredericton campus student who demonstrates qualities of leadership and breadth of horizon, coupled with a good academic standing, that should lead to a high station in future life. One candidate from each of the Departments of Civil, Electrical and Mechanical Engineering shall be nominated by each of the departments. This prize is funded by the Associated Alumni in honour of Dr. E. O. Turner, former Head of the Department of Civil Engineering and Dean of the Faculty of Engineering at UNB.

Dr. E. O. Turner Prize
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

professor and developer of Mechanical Engineering at UNB from 1945 to 1973.

Francis Vanicek Prize in Civil Engineering field: ENGINEERING
Conditions: An annual prize of $100 to be awarded, on the recommendation of the Department of Civil Engineering, to a student who has shown a high level of achievement in structural analysis and design and has completed between 90-120 ch. of the regular program. The prize has been funded by colleagues of Professor Ralph M. Francis.

Andrin-Mathis Prize in Management field: ENGINEERING
Conditions: A $250 prize to be awarded annually on the recommendation of the Faculty of Engineering to the student who has successfully completed the Technology Management and Entrepreneurship Diploma program who demonstrates repeated leadership skills in the area of conflict resolution and situational management amongst their peers during the TME diploma program. Graduate students as well as undergraduate students may be considered for this prize. The prize is funded by George Andrin, BScEng (Mechanical), Class of ’58 with supporting funds from 3M, Mathis Instruments and others.

R.H.B. McLaughlin Prize in Civil Engineering field: ENGINEERING
Conditions: A prize of $750 to be awarded to the graduating student who has obtained the highest average in the courses in building and construction offered by the Department of Civil Engineering. Only those who have successfully completed 75 per cent of the electives in the designated areas will be eligible. Donor: Prof. R.H.B. McLaughlin, Class of 1943.

Ian Scott MacDonald Prize field: ENGINEERING
Conditions: A prize of $800 is awarded each term to the student enrolled in Bachelor of Science in Engineering (Civil Engineering) degree program on the Fredericton campus who has submitted the Senior Report which is judged to be best in terms of creativity in design. Selection is made by a panel of judges consisting of faculty members within the Department of Civil Engineering. The prize is funded by an endowment established by the late Ira M. Beattie.

Paul Stewart Prize field: ENGINEERING
Conditions: A prize of $500 to be awarded to the graduating student who has obtained the highest average in courses in transportation offered by the Department of Civil Engineering. Only those students who have completed at least two technical electives in transportation will be eligible. The prize is funded by an endowment established by Paul Stewart.

Dr. Rudolf Starkermann Prizes in Mechanical Engineering field: ENGINEERING
Conditions: Six prizes are to be awarded annually on the recommendation of the Department of Mechanical Engineering to Fredericton campus students as follows: Two prizes of $1,000 each are to be awarded to students who have the highest Cumulative Grade Point Averages after completing between 100 and 135 credit hours in the Bachelor of Science in Engineering (Mechanical) degree program; two prizes of $1,000 each to be awarded to students who have the highest Cumulative Grade Point Averages after completing between 75 and 100 credit hours in the Bachelor of Science in Engineering (Mechanical) degree program; one prize of $500 is to be awarded to a student who has the highest standing in Automatic Controls I; one prize of $500 is to be awarded to a student who has the highest standing in System Dynamics. The prizes are funded by Dr. Rudolf Starkermann, professor of Mechanical Engineering at UNB from 1970 to 1989.

Eugene E. Derenyi Alumni Prize in Remote Sensing field: ENGINEERING
Conditions: A $500 prize to be awarded annually on the recommendation of the Department of Geodesy and Geomatics to the Fredericton campus student who achieves the highest grade in the remote sensing course GGE 3342: Imaging and Mapping I. The prize is funded by contributions from Alumni at the GGE (SE) 40th Anniversary Reunion held June 22-23, 2001.

John F. Murphy Prize in Electrical & Computer Engineering field: ENGINEERING
Conditions: A $1,500 prize to be awarded annually on the recommendation of the Department of Electrical and Computer Engineering to the Fredericton campus student in the Electrical, Computer or Software Engineering programs whose senior undergraduate project best displays outstanding technical merit. The prize has been funded by friends of John Murphy, an Electronics Technologist who served the University with distinction for 26 years, 1968-1994.

AECL Pilkington Prize field: ENGINEERING
Conditions: A $500 prize to be awarded annually on the recommendation of the Departments of Chemical or Mechanical Engineering to a Fredericton campus student enrolled in the Nuclear Option program or the Energy Conversion Engineering Option program who has achieved the highest grade point average in two or more nuclear-related courses. This prize is funded by the AECL and the friends of Bill Pilkington.

Mannarroll A Gopala Iyengar Ponnuamal Memorial Prize field: ENGINEERING
Conditions: A prize of $500 to be awarded annually on the recommendation of the Department of Civil Engineering to the winning entry of the UNB Popsicle Stick Bridge Building Competition. The prize has been donated by Dr. Gopalan Srinivasan.

David & Joan Lynch Chemical Engineering Sr. Design Award field: ENGINEERING
Conditions: A prize of $1,000 to be awarded annually on the recommendation of the Department of Chemical Engineering to the best undergraduate student or undergraduate student group final report in the senior design course. The prize has been donated by Dr. David T. Lynch (BScEngCHE 1977) and Mrs. Joan Lynch.

R. Gordon Scott Electrical and Computer Engineering Prize field: ENGINEERING
Conditions: A $1,000 prize to be awarded annually on the recommendation of the Department of Electrical and Computer Engineering to an outstanding graduating student student who combines high academic achievement with demonstrated leadership in non-academic activities, whether within the university community or beyond. The prize was established by Richard J. Scott, QC, FEC (Hon), BBA 1974, LLB 1976, in memory of his father, R. Gordon Scott, P.Eng., BScEE 1949.

APEGNB Prize I field: ENGINEERING & SASE
Conditions: Two prizes of $2,000 each, one prize may be awarded annually on each campus, on the recommendation of the Faculty of Engineering and Geoscience to a student who has completed the first year of the Engineering or Geoscience degree program, and has attained a high academic standing. The prize is funded by the Association of Professional Engineers and Geoscientists of New Brunswick Foundation for Education.

Harold H. Bulmer Memorial Prize field: ENGINEERING & SASE
Conditions: Two prizes are awarded annually to students participating in the Technology Innovation Pitch (TIP) competition hosted by the Dr. J. Herbert Smith Centre in Technology Management and Entrepreneurship (TME), Faculty of Engineering. First place prize is valued at $500, second place $200. A book selected by the TME Chair will also be presented to the prize recipients. The prize is open to students from all participating institutions. The prize is funded by members of the Bulmer family, the Dr. J. Herbert Smith Centre, Radian6 Technologies, and others.

G.D. Estey Memorial Prize field: FORESTRY
Conditions: A book prize was established by the late Mrs. Estey in memory of her husband Gerald D. (Jake) Estey of the class of 1949. This prize is awarded to a deserving graduating student in Forestry or Forest Engineering, who, in the opinion of the Faculty of Forestry and Environmental Management, is most interested in practicing sound principles of forestry.

B. W. (Barney) Flieger Memorial Prize field: FORESTRY
Conditions: One prize of at least $2,000 to be awarded annually on the recommendation of the Faculty of Forestry and Environmental Management to an outstanding student in the third year of the program leading to the degree of Bachelor of Science in Forestry who achieved high academic standing in the second year. The prize has been funded by Forest Protection Limited.

Lucien J. Forcier Prize in Silviculture field: FORESTRY
Conditions: A prize of $175 is offered from a fund established in memory of Lucien J. Forcier by his friends and colleagues to be awarded annually on the recommendation of the Faculty of Forestry and Environmental Management to an outstanding graduating student who has demonstrated achievement in Silviculture.
Forest Products Research Society Award
field: FORESTRY
conditions: A prize of $100 and a one year society membership established by the Forest Products Research Society, Eastern Canadian Section, to be awarded annually, on the recommendation of the Faculty of Forestry and Environmental Management, to an undergraduate student for academic achievement in the field of wood science.

Videto-Hadley Memorial Prize
field: FORESTRY
conditions: Friends of the late Mr. B.W. Flieger of the Canadian International Paper Company, Montreal and Professor of Forest Engineering at the University of New Brunswick from 1927 to 1950, have offered a prize of $250 in memory of Professors H.E.D. Videto and C. Graham Hadley of the Forestry Faculty, who lost their lives in a drowning accident in October 1951. This prize will be awarded by the Students Forestry Association to a member for outstanding performance during the year.

Viscount Richard Bedford Bennett Prize (Forestry
field: FORESTRY
conditions: Two annual prizes of $500 has been established by the late Viscount Bennett to be given to two outstanding students selected by the Faculty of Forestry and Environmental Management, one to be entering third year and one to be entering fourth year.

CIF/UNB Joint Professional Development Forestry Award
field: FORESTRY
conditions: Awards to be used to help defray travel expenses for attending the Annual General Meeting of the Canadian Institute of Forestry, to be awarded annually on the recommendation of a committee made up of representatives of the CIF Maritime Section and the Faculty of Forestry and Environmental Management, to continuing students after completion of at least 30 ch in the BScF or BScFE degree programs. The award has been funded by the Maritime Section of the CIF and the Faculty of Forestry and Environmental Management.

J. Miles Gibson Forestry Award
field: FORESTRY
conditions: A prize awarded annually on the recommendation of the Gibson Award Committee to one or more students entering the second year of a program leading to the degree of Bachelor of Science in Forestry or Forest Engineering. The prize is funded by the friends of J. Miles Gibson.

Peter J. Hughes Sustainable Forestry Award
field: FORESTRY
conditions: Awarded on the recommendation of the Faculty of Forestry and Environmental Management to a full time student on the Fredericton campus in the Faculty of Forestry and Environmental Management after the completion of at least 60 ch in the BScF or BScFE degree program. The recipient must have demonstrated a commitment to sustainable forestry practices. Preference will be given to students from Atlantic Canada who have been involved in private woodlot management. The award has been funded by friends, family and business associates in memory of the late Peter J. Hughes who was a long-time employee of the NB Federation of Woodlot Owners.

Schlich Memorial Prize
field: FORESTRY
conditions: The trustees of the Sir William Schlich Memorial Prize fund offer an annual prize to a graduating forester or forest engineer at one of the Canadian forestry schools. The recipient is to be a deserving student selected by the Dean of the Faculty of Forestry and Environmental Management.

Dr. L. P. Sebastian Prize
field: FORESTRY
conditions: Awarded annually based on the recommendation of the Faculty of Forestry and Environmental Management to an outstanding full-time student in the Faculty of Forestry and Environmental Management on the Fredericton campus who displays excellence in wood technology, wood products or wood engineering upon entering the final year of the Forestry program (approximately 140 ch completed) or the Forest Engineering degree program (approximately 163 ch completed). The prize has been funded by G. and M. Daugharty with matching funds from Northern Telecom, and friends of L.P. Sebastian.

Meryn Stillwell Memorial Prize
field: FORESTRY
conditions: A prize to be awarded annually upon the recommendation of the Faculty of Forestry and Environmental Management to a Forestry student with high academic standing and creative abilities who has demonstrated an interest in bioethics in forestry. The award is funded by family and friends of the late Meryn A. Stillwell, a graduate of UNB in Science (Bio), 1949 and Masters in Science (Arts) 1957. Mr. Stillwell was a research scientist with the Canadian Forestry Service, and a part-time lecturer in the Faculty of Forestry at UNB until his untimely death in 1977. His research was aimed at gaining a better understanding of the forest environment with emphasis on tree diseases.

W. T. Whitehead Memorial Prize
field: FORESTRY
conditions: An annual prize of $195 was established by Mrs. W.T. Whitehead to be awarded to the student having the highest standing in the third year of a program leading to a bachelor's degree in the Faculty of Forestry and Environmental Management.

Faculty of Forestry Senior Project Award
field: FORESTRY
conditions: A book prize given to the student who presents the best senior project in Forestry or Forest Engineering. The recipient will be determined by a committee of the Faculty of Forestry and Environmental Management. The book is provided by courtesy of John Wiley & Sons Canada Ltd.

Simon and Dora Chippin Award
field: FORESTRY
conditions: A prize of $250 awarded to a worthy student in need of financial assistance entering the second year of a program leading to a bachelor's degree in the Faculty of Forestry and Environmental Management. The prize is funded by the late Simon and Dora Chippin.

Jason Herron Memorial Award
field: FORESTRY
conditions: A prize with a minimum value of $1,500 to be awarded annually to a student in good academic standing who has completed at least 90 credit hours in the Bachelor of Forest Engineering or Bachelor of Forestry degree program on the Fredericton campus. The recipient must have demonstrated professionalism, commitment to fellow students, and academic leadership. Nominations from students, staff and faculty will be received by the Faculty Scholarship committee. This award is funded by family, friends and colleagues of Jason Herron, Forest Manager for Georgia-Pacific in New Brunswick for many years, and a UNB lecturer, 2000-03.

Foresters' Excellence Award
field: FORESTRY
conditions: A $1,000 prize to be awarded annually to a student enrolled in the fourth or fifth year of the Bachelor of Science in Forestry or Bachelor of Science in Forest Engineering degree program. Candidates are required to submit an essay on the role of the professional forester. The prize is funded by alumni and friends of the Faculty of Forestry.

Canadian Institute of Forestry Gold Medal Award
field: FORESTRY
conditions: A CIF gold medal is awarded annually to the student graduating with either a Bachelor of Science in Forestry degree or a Bachelor of Science in Forest Engineering degree who, in the opinion of the Committee of Award, has been outstanding in his class, taking into consideration academic standing and participation in faculty activities.

Robert F. Watters Memorial Award
field: KINESIOLOGY
conditions: A prize of $200 to be awarded annually on the recommendation of a committee from the Faculty of Kinesiology to a student with special needs, or a student pursuing a career working with individuals with special needs such as those who are physically or mentally challenged or the elderly. The prize is funded by friends of the late Robert F. Watters.

Agnes Grey Wilson Prize
field: KINESIOLOGY
conditions: A prize of $250 to be awarded annually on the recommendation of the Faculty of Kinesiology to an outstanding female student who has completed the normal requirements for the first two years of the Bachelor of Science in Kinesiology degree program at UNB. The prize has been funded by the Associated Alumni.

Amby Legere - Pete Kelly Prize
field: KINESIOLOGY
conditions: A prize of $2,000 is awarded to the student who has completed three years (at least 75%) of the Bachelor of Recreation and Sport Studies. The award will be made to the student who has demonstrated the highest academic achievement (Cumulative Grade Point Average). The student can receive this award only once. The prize is funded by Physical Education and Recreation/ Kinesiology Alumni and Supporters.
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

John Meagher Prize
field: KINESIOLOGY
conditions: A prize of $2,000 is awarded annually on the recommendation of the Faculty of Kinesiology to the student who has completed three years (at least 75%) of an undergraduate degree program in the Faculty of Kinesiology and who intends to pursue a Bachelor of Education degree. The award will be made to the student who has demonstrated the highest academic achievement (Cumulative Grade Point Average). The student can receive this award only once. The prize is funded by Physical Education and Recreation/ Kinesiology Alumni and Supporters.

Anne Murray Prize
field: KINESIOLOGY
conditions: A prize of $2,000 is awarded to the student who has completed three years (at least 75%) of the Bachelor of Science in Kinesiology Program. The award will be made to the student who has demonstrated the highest academic achievement (Cumulative Grade Point Average). The student can receive this award only once. Donor: Physical Education and Recreation/ Kinesiology Alumni and Supporters.

CSEP/SCPE Undergraduate Student Award
field: KINESIOLOGY
conditions: A medal and a citation is awarded annually on the recommendation of the Faculty of Kinesiology to the student graduating with a Bachelor of Science in Kinesiology who has achieved the highest academic standing in the scientific portion of the curriculum. This award is provided by the Canadian Society for Exercise Physiology/Société Canadienne de Physiologie de l’Exercice.

Barry Thompson Prize
field: KINESIOLOGY
conditions: A prize of $1,000 is awarded annually to the student who has completed 2 years (between 50% and 74%) of the Bachelor of Recreation and Sport Studies Program. The award will be made to the student who has demonstrated the highest academic achievement (Cumulative Grade Point Average). The student can receive this award only once. The prize is funded by Physical Education and Recreation/ Kinesiology Alumni and Supporters.

Bill MacGillivray Prize
field: KINESIOLOGY
conditions: A prize of $1,000 is awarded annually to the student who has completed 2 years (between 50% and 74%) of the Bachelor of Science in Kinesiology Program. The award will be made to the student who has demonstrated the highest academic achievement (Cumulative Grade Point Average). The student can receive this award only once. The prize is funded by Physical Education and Recreation/ Kinesiology Alumni and Supporters.

Exmoor Prize
field: MANAGEMENT
conditions: A prize of $500 is awarded annually to the Fredericton campus student enrolled in the Business Administration (BBA) program who attains the highest grade point average in the required courses in Finance and in Managerial Accounting. (Currently these are ADM 2413, ADM 3415 and ADM 2223). The courses must be taken at UNB but may be taken at any time during the year. All students who complete the final course of the group in the twelve months ending in May will be considered for this prize. (In the event of a tie, the student with the highest cumulative grade point average will be selected.) The prize has been funded by Mr. S.S. Mullin.

Business Administration Society Outstanding Student Award
field: MANAGEMENT
conditions: A prize donated by UNB Business Administration Society to be awarded annually to the outstanding student, studying on the Fredericton campus, in the fourth year of Business Administration. The prize is awarded on the basis of the student's participation in campus activities, scholastic standing, character and attitude.

Paul Hazlehurst Memorial Prize
field: MANAGEMENT
conditions: A prize of $110 to be awarded annually on the recommendation of the Faculty of Business Administration, to a student entering the second year of the Bachelor of Business Administration degree program on the Fredericton campus. This award will be made to an outstanding student who, at the end of the regular academic year in which he or she completes 30 ch, has achieved the highest sessional grade point average. This prize has been funded by the friends of the late Paul Edward Hazlehurst.

Blanche and Percy M. Levine Memorial Prize
field: MANAGEMENT
conditions: A prize of $500 to be awarded annually on the recommendation of the Faculty of Business Administration to the full-time Fredericton campus student in the Business Administration degree program who attains the highest assessment year grade point average in the penultimate year of the degree program. The prize has been donated by the family of the late Mr. & Mrs. P. M. Levine.

E. D. Maher Prize
field: MANAGEMENT
conditions: A prize of $400 to be awarded annually to a full-time student enrolled in the penultimate year of the undergraduate Business Administration program on the Fredericton campus. (The recipient must have successfully completed a minimum of 60 ch toward the BBA degree.) The award is made to the student who attained the highest grade point average in the business courses required in the first 60 ch of the business program. The prize has been funded by graduates, faculty, staff, organizations, and friends in recognition of E.D. Maher's many contributions to the University community and, in particular, to the undergraduate business program.

Xiaoqing Prize
field: MANAGEMENT
conditions: A prize of $400 is awarded annually on the recommendation of the Faculty of Business Administration to a student graduating from the Bachelor of Business Administration program on the Fredericton campus who has completed honours in Finance and has the highest grade point average computed using the mandatory Finance courses. In case of a tie, the prize is awarded to the student with the highest grade point average computed using all Finance courses. If the tie is still not resolved then the prize is awarded to the student with the highest cumulative grade point average in the program. The prize is funded by Xiaoqing Fang, BBA 2005.

Bernard and Lillian Freeman Prize
field: MANAGEMENT
conditions: A $1,000 prize to be awarded annually on the recommendation of the Faculty of Business Administration to the Fredericton campus student who achieves the highest standing after completing the first year of studies in the Bachelor of Business Administration degree program. The prize is funded by the estate of Lillian Freeman.

CPA Prize UNB Fredericton
field: MANAGEMENT
conditions: One prize of $1,000 will be awarded to a student in the Business Administration degree program on the Fredericton campus who has declared honours in accounting and has the highest combined GPA in ADM 3215, ADM 3216, ADM 3225, and ADM 3415. The prize is funded by CPA New Brunswick.

City of Fredericton Award
field: MULTIPLE
conditions: The City of Fredericton offers a sum of money, not less than $200, for competition in the Department of Civil Engineering and Chemistry and in the Faculty of Forestry and Environmental Management in rotation. The prize, which heretofore took the form of a gold medal, was offered for the first time in 1908.

Deloitte Prize in Accounting
field: MULTIPLE
conditions: Two prizes of $1,000 each for students in the Business Administration degree program: one prize awarded to a full-time student on the Fredericton campus, and one prize awarded to a full-time student on the Saint John campus. Recipients must have high standing in Accounting courses, including Intermediate Accounting I (ADM 3215 - UNBF, BA 3235 - UNBSJ), and Intermediate Accounting II (ADM 3216 - UNBF, BA 3236 - UNBSJ), and have completed 90 ch of the BBA degree program at UNB. The prize is funded by Deloitte & Touche.

Society of Chemical Industry Merit Award
field: MULTIPLE
conditions: The Canadian Section of the Society of Chemical Industry will award three plaques, one each for Chemistry, Biochemistry and Chemical Engineering, to students with the highest standing in the final year of their course. In the case of a conflict, the award may be given to the student with the highest standing in an alternate Chemistry course, e.g. Environmental Geo-Chemistry, Physics/Chemistry. In the event that a student performs exceptionally well in an alternate Chemistry course, he/she may be considered as a candidate for one of the three awards. There will be only three categories and only one nomination in each "category". Awards apply only for four year programs.

Fanny Velensky Memorial Prize in Nursing
field: NURSING
conditions: Mr. Nathan Velensky has established an endowment fund of $1,000 in memory of his wife, Fanny Velensky. The
Margaret Burton Innes Award

**Field:** NURSING

**Conditions:** An award of $250 to be awarded annually on the recommendation of the Faculty of Nursing to a full-time student enrolled in the Bachelor of Nursing Advanced Standing degree program at the Moncton site. The recipient is selected on the basis of academic ability and demonstrated excellence in nursing. The award has been funded by the family of the late Margaret Burton Innes, a graduate of the former Moncton Hospital School of Nursing.

Dr. Katherine MacLaggen Memorial Prize

**Field:** NURSING

**Conditions:** A $2,000 prize awarded annually on the recommendation of the Faculty of Nursing to the student obtaining a high academic average in their third year of the Bachelor of Nursing degree program with demonstrated excellence in nursing practice and who is enrolling in their fourth year of full-time study. The prize is funded by friends of the late Dr. Katherine MacLaggen.

Theresa P. Totton Memorial Prize

**Field:** NURSING

**Conditions:** A prize of $2,000 to be awarded annually on the recommendation of the Faculty of Nursing for clinical and academic competency in Nursing at the completion of the second year of the Bachelor of Nursing degree program. Funded by the Nursing Class of 1982 and friends of Theresa.

C.H. Gibson Prize for Biology in Nursing

**Field:** NURSING

**Conditions:** A $500 prize to be awarded annually to the graduating student at the Fredericton site who has the highest overall standing in Biology courses completed as part of his/her Bachelor of Nursing degree. This prize is funded by Andy S. Didyk.

M.D.B. Burt Prize for Biology in Nursing

**Field:** NURSING

**Conditions:** A $500 prize to be awarded annually to the graduating student at the Moncton site who has the highest overall standing in Biology courses completed as part of his/her Bachelor of Nursing degree. This prize is funded by Andy S. Didyk.

T. G. Dilworth Prize for Biology in Nursing

**Field:** NURSING

**Conditions:** At least one $500 prize to be awarded annually to the graduating student at the Bathurst site who has the highest overall standing in Biology courses completed as part of his/her Bachelor of Nursing degree. This prize is funded by Andy S. Didyk.

Elsie Dianne Younker Longley Memorial Prize

**Field:** NURSING

**Conditions:** A $400 prize awarded annually on the recommendation of the Faculty of Nursing to a Fredericton campus student who best demonstrates leadership in the area of maternal child nursing. The prize is funded by the family and friends of Elsie Dianne Younker Longley, BN 1985.

Margaret McPhedran Prize

**Field:** NURSING & SASE

**Conditions:** Two annual prizes of $450 each awarded to students, one on the Fredericton campus and one on the Saint John campus, enrolled full-time in the Bachelor of Nursing degree program who have obtained the highest standing in the Theory and Practice of Nursing in third year.

New Brunswick Nurses’ Union Prize

**Field:** NURSING & SASE

**Conditions:** Eight prizes of $800 each to be awarded annually on the recommendation of graduating Nursing students, to graduating Nursing students exemplifying high academic standards, leadership skills, involvement in extracurricular activities, and commitment to enhancing the interests and status of classmates. Two prizes will be awarded to each of the four UNB nursing sites. The prize has been provided by NBNU and will be presented at the Pin Dinner for Nursing graduates.

James Patak Memorial Award

**Field:** RENAISSANCE COLLEGE

**Conditions:** A $500 prize awarded annually to a student who has just completed the requirements for the first year of the Bachelor of Philosophy degree program and has developed and demonstrated his/her interest in musical or visual arts with plans to improve, promote and/or pursue their chosen artistic endeavors. The prize is funded by the family and friends of the late James Patak.

SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

**Louis Weisner Memorial Prize in Mathematics**

**Field:** SCIENCE

**Conditions:** A prize dedicated to the memory of Louis Weisner, Professor of Mathematics at the University from 1955-1988. It is to be awarded on the recommendation of the Department of Mathematics and Statistics to an outstanding student on the Fredericton campus graduating in Mathematics. The Prize has been established by the family, students, friends, and colleagues of the late Dr. Weisner.

**C. W. Argue Prize**

**Field:** SCIENCE

**Conditions:** One or more prizes of up to $2,500 to be awarded to a Science student having high academic standing and entering either the third or the fourth year. (*Year* refers to the particular year of the program as specified in the calendar description of the various BSc degree options.) When two scholarships are given, they will be awarded as follows: (a) the first one to a Science student, other than one majoring in Biology, (b) the second one to a Biology Major student. The selection of the recipient(s) will be made by the Dean of Science and the heads of the Science Departments.

**Loring Woart Bailey Prize in Science**

**Field:** SCIENCE

**Conditions:** This prize of $500 was established by the late Joseph Whitman Bailey of the class of 1884 in memory of his father, Loring Woart Bailey, LL.D., Professor of Science in the University for nearly fifty years (1881-1907). It is awarded on the recommendation of the Department of Physics to a deserving student graduating in Physics. The number of the awards and their value will be at the discretion of the department but there will normally be one prize annually to the value of $100.

**John Storm Brookfield Prize**

**Field:** SCIENCE

**Conditions:** A prize of $1,400 has been established by the late Dr. J.S. Brookfield to be given to a student entering the third year deemed by the professors of Science to be the most promising student in Natural Science. (*Year* refers to the particular year of the program as specified in the calendar descriptions of the various BSc degree options.)

**Kingsbury Browne Sr. Memorial Prize**

**Field:** SCIENCE

**Conditions:** An annual award valued at approximately $800 has been established in memory of Kingsbury Browne Sr., a founding director of the Miramichi Salmon Association, Inc., by the Browne family, friends, and members of the Association. It is awarded to a student, majoring in Biology, entering the final year, who has excelled in the general area of vertebrate zoology. Preference is given to a resident of New Brunswick.

**Canadian Society for Chemistry Silver Medal**

**Field:** SCIENCE

**Conditions:** A certificate of merit and an engraved medal are donated annually by the Canadian Society for Chemistry, to be awarded to the student with the highest standing in Chemistry and related subjects in the penultimate year.

**Dr. Philip Cox Memorial Prize**

**Field:** SCIENCE

**Conditions:** A $200 prize awarded annually to a student entering the third year and majoring in Biology who, in the opinion of the staff of the Department of Biology, shows the greatest promise. (*Year* refers to the particular year of the program as specified in the calendar descriptions of the various BSc degree options.)

**Dr. A. Wilmer Duff Memorial Prize**

**Field:** SCIENCE

**Conditions:** Dr. Ella Duff Good has given a prize of $100 in memory of her father, Dr. A. Wilmer Duff, who was a graduate of the University and later taught with distinction at the institution. It is to be awarded to a deserving student in the final year of Physics, but may be given in any other science if there is not a qualified student in Physics.
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Norman S. Fraser Prize in Science
**field:** SCIENCE
**conditions:** A prize of $500 to be awarded annually on the recommendation of the Faculty of Science to the student with the highest standing in the Junior and Senior years of the Bachelor of Science program. The prize has been funded by the late Norman S. Fraser.

Thomas Harrison Memorial Prize
**field:** SCIENCE
**conditions:** An annual prize of $750, given to a student who has completed two years (at least 60 ch) of the program in which the student is registered, and in the opinion of the Mathematics Department, shows the greatest promise in Mathematics. This prize was established by the late Mrs. Ida G.W. Harrison.

Herbert S. Lipsett Memorial Award in Biology
**field:** SCIENCE
**conditions:** This award has been given by Mr. And Mrs. Nathan Lipshets in memory of the late Herbert S. Lipsett, a graduate of UNB. This award is made annually to a student in Biology, who has demonstrated academic excellence. The amount of the award is approximately $250.

Derek L. Livesey Memorial Prize in Physics
**field:** SCIENCE
**conditions:** A prize of a minimum of $2,000 to be awarded annually on the recommendation of the Department of Physics to an outstanding Science student on the Fredericton campus who achieves high standing in first year physics. The prize has been funded by the family of the late Derek L. Livesey, a former UNB Physics Professor and Department Chair, who extensively developed first year instruction during his time in the department.

Prize in Actuarial Science
**field:** SCIENCE
**conditions:** A prize of $300 to be awarded annually on the recommendation of the Department of Mathematics and Statistics to a Fredericton campus student who has passed at least one examination given by the Society of Actuaries and is taking appropriate courses. Students should have demonstrated a continuing interest in actuarial science. The prize has been funded in part by a grant from the Society of Actuaries.

Dr. Stefan Rinco Memorial Prize in Statistics
**field:** SCIENCE
**conditions:** A prize of approximately $1,000 dedicated to the memory of Stefan Rinco, Professor of Statistics at UNB, 1974-87. The prize is to be awarded annually on the recommendation of the Department of Statistics to a student who has excelled in statistics courses and is on the Dean's List. The student must have completed a minimum of 12 ch of upper-level statistics courses. In the event that no undergraduate student is eligible for this prize, graduate students may be considered. The prize is being funded by the family, friends and colleagues of the late Dr. Stefan Rinco.

Noel Stone Memorial Prize
**field:** SCIENCE
**conditions:** An annual prize of $485, donated by the late Dr. H.S. Stone, to be given to a student of the fourth year who, during the third year, has shown the most promise in the study of Biology and Chemistry. (*Year* refers to the particular year of the program as specified in the calendar description of the various BSc degree options.)

Lowell Trembath Memorial Award
**field:** SCIENCE
**conditions:** The Lowell Trembath award, comprised of a book and a monetary component for the purchase of textbooks, is presented, on recommendation of the Department of Earth Sciences, to the student exhibiting the highest scientific and professional potential in mineralogy and the theory of solid-state materials through achievement in courses previously taught by Professor Trembath. It has been made possible through the support of Lowell’s students and friends who remember his humour and devotion to teaching, as well as his enduring interest in personal and professional development. The award is intended to encourage the continuation of his standards of learning and fundamental scientific endeavor.

Department of Mathematics Prizes in Enriched Calculus
**field:** SCIENCE
**conditions:** Two prizes of $450 each to be awarded annually to students enrolled in enriched calculus on the Fredericton campus. The prizes will be awarded to the top students who, in the opinion of the Department of Mathematics and Statistics, show the greatest promise in Mathematics. The prize has been established by Dr. Kuldir Singh.

Shuyuan Meng Prize
**field:** SCIENCE
**conditions:** A $1,000 prize awarded annually on the recommendation of the Faculty of Science to a Fredericton campus student who is graduating from the Bachelor of Science degree program and has been accepted to Medical School. Selection is based on scholastic attainment and financial need. The recipient must be a New Brunswick resident, according to the definition of the Provincial Government's Student Financial Services guidelines. Proof of acceptance to Medical School must be received by the Faculty of Science before April 25. The prize is funded by friends and family of the late Shuyuan Meng and the New Brunswick University Opportunities Fund.

Dr. Donald “Digger” Gorman Prize in Earth Sciences
**field:** SCIENCE
**conditions:** A $500 prize to be awarded annually on the recommendation of the Department of Earth Sciences to an outstanding Fredericton campus student entering the second year of the Bachelor of Science degree program who has achieved high standing in Earth Sciences. The prize has been funded by Donald “Digger” Gorman.

Science Atlantic-CIC Chemistry Conference (ChemCon) Award
**field:** SCIENCE
**conditions:** A $100 award is provided on the recommendation of the Chair of the Chemistry Department to each undergraduate student presenting at the Science Atlantic - CIC Chemistry Conference (ChemCon). The prize is funded by Dr. James, P.K. Tong.

Dr. John A. Findley Chemistry Prize
**field:** SCIENCE
**conditions:** A prize of $1,000 to be awarded annually on the recommendation of the Dean of Science in consultation with the Chair of the Chemistry Department to a student who has attained the highest standing in second year Science who is majoring or honouring in Chemistry. The prize is funded by Dr. Chok Ngke Chong (BSc 1967; BEd 1968), Kok Kiang Chua (BSc 1967; Bed 1968) and Cyril Tang (BSc 1967).

Dr. H. Wouter and Charlotte D.S. van de Poll Prize
**field:** SCIENCE
**conditions:** A $2,000 prize to be awarded annually on the recommendation of the Department of Earth Sciences to a Fredericton campus student entering third year of the Bachelor of Science or Bachelor of Science in Engineering (Geological), who showed outstanding academic achievement in the second year field school. In the event that the Department of Geology includes computer based geological map making and data management in its second year field school, the selection of the recipient of this prize may include a second year geology or geological engineering student with a demonstrated interest and aptitude in this aspect of geological mapping. The prize has been funded by Dr. H. Wouter van de Poll (BSc 1961, MSc 1963), retired UNB Professor of Geology (1973-1995).

Friedrich Grein Prize in Chemistry
**field:** SCIENCE
**conditions:** A prize of at least $100 is awarded to a graduating student from the Bachelor of Science degree program (Chemistry or Medicinal Chemistry) with the highest standing. Three prizes are awarded on the recommendation of the Department of Chemistry. The number of awards and their value will be decided upon each year at the discretion of the department. This prize has been established by faculty members of the Department of Chemistry in honour of Professor Emeritus Friedrich (Fritz) Grein, whose distinguished career at the University began with his initial appointment in 1962 and continued as Professor Emeritus from 1995. Dr. Grein’s research in theoretical chemistry has resulted in over 200 publications and earned international distinction, while his award-winning skill as an undergraduate and graduate teacher was widely respected.

Dr. C. C. Jones Prize
**field:** SCIENCE & SASA
**conditions:** Two $125 prizes, one on each campus, are awarded on the recommendations of the Mathematics Departments at UNB to a student who has completed the normal requirements for the first year of the program in which he/she is registered. Awarded on the basis of the record of the student in first year at the University as follows: (1) First division standing in either Mathematics 1003/1013 or 1053/1063. (2) General standing in all other subjects of the first year. (3) The worthiness of the student. Holders of a major scholarship are ineligible. The prize is funded by the UNB Associated Alumni.

William Somerville Prize
**field:** SCIENCE & SASA
**conditions:** Two $200 prizes, one on each campus, are awarded annually on the recommendation of the Department of Mathematics and Statistics to outstanding students enrolled in a degree or joint degree program in Mathematics. The student should have successfully
completed a minimum of 90 ch toward meeting the degree requirement. The prize was funded by the late Elia Somerville Foster.

Jean Crawford Flemming Memorial Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $750 to be awarded in the Fall term on the recommendation of the Dean of SASE to a Saint John campus student who has completed the minimum requirements for the first year of the BCS, BScCS or BiSc. Students who have completed the minimum requirements for the first year of Arts or Science and have indicated their intention to Major in Mathematics or Statistics will also be considered. Selection will be based on academic achievement. The prize is funded by J. Archie Flemming, a former Professor of Mathematics and Statistics at UNBSJ Saint John.

UNB Saint John Engineering Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $1,750 to be awarded annually on the recommendation of UNBSJ Engineering faculty members to an academically outstanding student who has completed the normal four terms of Civil, Chemical, Electrical, Software or Mechanical Engineering (approximately 90-95 credit hours) at UNBSJ and who will continue the degree at UNB. The prize has been funded by the Department of Engineering, alumni and friends.

UNB Saint John Science Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $500 to be awarded annually to the Saint John campus student with the highest assessment year grade point average at the completion of the normal requirements for the first year of a B.Sc. Program in the Faculty of Science, Applied Science and Engineering. The student must continue in Science on the Saint John campus. The prize has been funded by the Science faculty members.

Cherry Brook Zoo Prize in Zoology
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
An annual prize of $200 awarded to the student entering the final year of the BSc Biology major program at UNBSJ who has achieved the highest grade point average in at least 14 credit hours of the upper-level Zoology courses completed at UNBSJ. The prize is funded by the Cherry Brook Zoo, Saint John, and will be awarded on the recommendation of faculty teaching Zoology courses.

Miles A. Kelinstead Prize in Physics
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $350 to be awarded annually on the recommendation of the Physics faculty members on the Saint John campus to an outstanding student who achieves high standing in a full-year Freshman level Physics course on the Saint John campus. The prize has been funded through the University Faculty Fund.

Leslie Kelly Memorial Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $500 to be awarded annually on the recommendation of the Biology faculty members to the graduating student with the highest standing in a Biology program at UNBSJ. Preference will be given to a student in the Marine Biology option. The prize has been funded by Miss Mary Louise Lynch, a long-time member of the Board of Governors of the University, in memory of her late wife.

Prize in Memory of Ellen J. and M. Josephine Lynch
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $500 to be awarded annually on the recommendation of the Biology faculty members to the graduating student with the highest standing in a Biology program at UNBSJ. Preference will be given to a student in the Marine Biology option. The prize has been funded by Miss Mary Louise Lynch, a long-time member of the Board of Governors of the University, in honour of her aunts.

Dr. John F. H. Teed, Q.C. Memorial Prize in Science
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of not less than $250 to be awarded annually to a student on the Saint John campus who achieves the highest standing in one of the following courses, in this order of preference: GEOl 2212 (Sedimentology I), GEOl 2201 (Biogeology I), GEOl 2045 (Introductory Geology for Biologists), or BIOL 2585 (Introductory Ecology). The prize is funded by the family of the late Dr. Teed from moneys obtained for the use of Mary's Point Island, N.B., sandstone quarry for historical reconstruction of buildings in Nova Scotia.

SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

Walter C. & Marion (Waring) White Biology Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of the annual earnings of the endowment to be awarded annually on the recommendation of the Department of Biological Sciences to a UNBSJ student who has shown promise in first year Biology in theoretical and laboratory studies. The prize is established in memory of Walter C. and Marion J. (Waring) White by their daughter, Nancy W. MacLeod.

Dr. Carl K. Tompkins Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
An annual prize to be awarded on the Saint John campus to the student with the highest mark in 1st year Science Chemistry lecture (term 2 CHEM 1072). The prize has been funded by colleagues & friends upon the retirement in 1999 of Dr. C.K. Tompkins, who taught Chemistry at UNB for over 30 years.

Organic Chemistry Prize UNBSJ
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $200 to be awarded to a Saint John campus student who achieves high standing in CHEM 2401/2422 (Organic Chemistry I & II). The prize is funded by Saint John Laboratory Services Ltd.

UNBSJ Nursing Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $500 to be awarded annually to an outstanding BN or BN/RN student on the recommendation of the Department of Nursing and Health Science, UNB Saint John.

Saint John Computer Science Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $200 to be awarded annually on the recommendation of the Department of Computer Science and Applied Statistics to a Saint John campus student enrolled in the Bachelor of Information Sciences or Bachelor of Science in Computer Science degree who has completed at least 60 credit hours of required courses and has demonstrated superior academic achievement in computer-related and statistics courses. The prize is funded by the members and staff of the Department of CSAS.

Christopher Cusack Computer Science & Data Analysis Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $500 to be awarded annually on the recommendation of the Department of Computer Science and Applied Statistics to a Saint John campus student graduating with a Bachelor of Information Sciences or a Bachelor of Science in Computer Science degree who has demonstrated academic excellence in upper-level courses in data analysis, statistics, mathematics and computer science. The prize is funded by friends of the late Christopher Cusack BSc(IA) 1981.

APEGNB Saint John Branch Wallace Rupert Turnbull Memorial Prize
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $1,000 to be awarded annually to a deserving student who is enrolled in the second year of studies in the Engineering program at UNB Saint John, who is from the A.P.E.G.N.B. Saint John district (Sussex to St. Stephen), who has received high academic standing and who has not received a major prize. An award presentation may be made at an A.P.E.G.N.B. event in addition to the UNBSJ ceremony. The prize is funded by the Saint John Branch of the Association of Professional Engineers & Geoscientists of New Brunswick, and named to honour the late Wallace Rupert Turnbull, the Rothesay inventor of the variable pitch propeller and member of the Canadian Science and Engineering Hall of Fame.

Dr. Satya Paul Handa Prize in Medical Nursing
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A $500 prize to be awarded annually on the recommendation of the Department of Nursing to a Saint John campus student graduating from the Bachelor of Nursing degree program who has demonstrated excellence in the theory and practice of medical nursing in the care of patients and families experiencing kidney disease, hypertension, kidney transplantation or other chronic illnesses. The prize is funded by Dr. Satya Paul Handa, recipient of an Honorary Doctor of Science degree from UNB Saint John May 2003.

Dorrie Award for Nursing
field: SCIENCE, APPLIED SCIENCE & ENGINEERING
A prize of $1,000 to be awarded annually, on the recommendation of the Department of Nursing, to an outstanding graduating student who achieves the highest cumulative grade point average in the BN/RN Nursing Program.
SECTION C: SCHOLARSHIPS, PRIZES AND AWARD

on the Saint John campus. The prize has been funded by MindCare New Brunswick.

Microbiology Prize UNBSJ

field: SCIENCE, APPLIED SCIENCE & ENGINEERING

conditions: A prize of $200 to be awarded to a Saint John campus student who achieves high standing in BIOL 2485 Introduction to Microbiology. The prize is funded by the Saint John Laboratory Services.

Dr. Berton C. Foster Memorial Prize

field: SCIENCE, APPLIED SCIENCE & ENGINEERING

conditions: A $500 prize to be awarded annually on the recommendation of the Department of Biological Sciences on the Saint John campus to the student graduating at Spring Convocation with the highest CGPA in the Bachelor of Science (Marine Biology) degree program on the Saint John campus. This prize is funded by Dr. Terhune, as well as the Biology Department in recognition of his distinguished service to the Biology Department and UNBSJ, and his outstanding career as a Marine Biologist.

Pauline Graham Prize

field: SCIENCE, APPLIED SCIENCE & ENGINEERING

conditions: A $400 prize to be awarded in the Fall term for a student in the BiSc or BSc-CS program who upon completion of at least 30 ch has an outstanding average in the required first level Mathematics, Computer Science and Statistics courses. The award is made on the recommendation of the Dean of SASE. The prize has been funded by friends of Pauline Graham, former Professor of Mathematics and Statistics at UNB, Saint John.

Thyra Pearl Gander Prize in Pediatric Nursing

field: SCIENCE, APPLIED SCIENCE & ENGINEERING

conditions: A $500 prize awarded annually on the recommendation of the Department of Nursing and Health Sciences to a nursing student on the Saint John campus who is graduating from the Bachelor of Nursing degree program, who has demonstrated excellence in practice of pediatric nursing in the care of patients and exhibits a passion for the field of pediatric nursing. The prize is funded by Dr. Sarah Gander (BSc 2000), Department of Pediatrics, Saint John Regional Hospital in memory of her grandmother who was a registered nurse.

Dr. Sandee Hicks-Moore Prize in Gerontological Nursing

field: SCIENCE, APPLIED SCIENCE & ENGINEERING

conditions: A $250 prize awarded annually on the recommendation of the Department of Nursing and Health Sciences to a student graduating from the Bachelor of Nursing degree program, who has demonstrated excellence in practice of Gerontological Nursing. The prize is in memory of Dr. Sandee Hicks-Moore, a Faculty member within the Department of Nursing and Health Sciences. The prize is funded by Alzheimer's Society, colleagues, friends and family of Dr. Sandee Hicks-Moore.

Dr. Gustavus Huige Prize

field: SCIENCE, APPLIED SCIENCE & ENGINEERING

conditions: A prize of $400 to be awarded annually on the recommendation of the Department of Mathematics and Statistics to a student on the Saint John campus who has demonstrated excellence in mathematics and has completed at least 9 credit hours of upper level mathematics courses. Preference will be given to a student who has completed Math 3093. The prize has been funded by Dr. Paul C.S. Lin in honour of Dr. Gustavus Huige, Associate Professor of Mathematics at the UNB Saint John campus from 1971-1999.

Olive Keith Memorial Prize in Community Nursing

field: SCIENCE, APPLIED SCIENCE & ENGINEERING

conditions: A prize of $500 to be awarded annually on the recommendation of the Department of Nursing and Health Sciences on the Saint John campus. The recipient must be graduating from the Bachelor of Nursing degree program and have demonstrated outstanding interest and ability in theory and practice coursework focused on community as client. The prize has been funded by colleagues, family and friends of the late Olive Keith who practiced community nursing in Saint John and who taught the first nursing course offered on the Saint John campus, a practice course in community nursing. The prize may be split. The prize will be awarded at Spring Encaenia.

Dr. Berton C. Foster Memorial Prize

field: UNRESTRICTED

conditions: An annual prize of $1,000 to be given to a student from a Fredericton high school other than a Beaverbrook Scholar who has made the highest standing in the work of the Freshman year. The scholarship has been established by Mrs. Agnes S. Foster.

UNBSJ Student Leadership Award

field: UNRESTRICTED

conditions: Awards to be given annually at spring convocation to students on the Saint John campus who have demonstrated outstanding campus leadership in student activities and/or university activities. Notation to appear on student transcript. Nominations received and selections made by a committee of students and administration, headed by Student Services.

Alumni Prize

field: UNRESTRICTED

conditions: Up to four prizes of $250 each awarded to the students on both campuses who make the highest grade point average on the examinations in the required subjects of the Freshman year. The prize is funded by the UNB Associated Alumni.

City of Saint John Award

field: UNRESTRICTED

conditions: A prize of $500 and a plaque to be awarded annually at Spring Convocation on the Saint John Campus to the academically outstanding graduating student who completes his/her degree while registered in a Saint John Campus program. The prize has been funded by the Saint John Faculty.

Class of 1909 Prize

field: UNRESTRICTED

conditions: Through the generosity of graduates of the class of 1909, a prize of $400 will be given annually to a member of the graduating class who has shown distinction in the final year, but who has not qualified for an award otherwise.

Douglas Gold Medal

field: UNRESTRICTED

conditions: A gold medal is offered for competition every year among undergraduates. This medal was founded by the late Sir Howard Douglas, Lieutenant-Governor of the Province of New Brunswick and first Chancellor of King's College. It is awarded for the best composition in prose or verse in the Greek, Latin or English languages, on any subject within the regular course of study pursued in the university. Undergraduate theses or reports may be considered along with essays or verse compositions produced as part of regular class work. They may be revised by the student on the basis of instructors' comments. Compositions are submitted by instructors, with the consent of the student, through the department to a committee appointed by the Dean of Graduate Studies and Research. The medal is awarded at Encaenia.

Mary Louise Lynch Prize in Memory of Annie McGuigan

field: UNRESTRICTED

conditions: A prize of $500 to be awarded annually on the recommendation of the Registrar to a graduate of St. Vincent's High School or St. Malachy's High School, with preference given to the St. Vincent's graduate, who has the highest standing after completing the first and second years of full-time study at the Saint John Campus of the University of New Brunswick. The prize has been funded by Miss Mary Louise Lynch, a long-time member of the Board of Governors of the University, in honour of her former teacher at St. Vincent's, who was an inspiring teacher over her many years of distinguished service.

Saint John Campus Silver Anniversary Prize

field: UNRESTRICTED

conditions: The $1,000 Saint John Campus Silver Anniversary Prize is to be awarded on the recommendation of the Faculty to an exceptional student who has completed 90 credit hours of courses at the Saint John Campus. The prize is to be awarded to one student each year on a rotating Faculty basis. Each Faculty will elect its own selection committee with the Registrar as an ex-officio member. The funding for this prize was provided by members of the Saint John Faculty in commemoration of the 25th Anniversary of the campus in 1989.

Governor General's Silver Medal

field: UNRESTRICTED

conditions: A silver medal to be awarded annually to the undergraduate student who achieves the highest academic standing in an undergraduate Bachelor's degree program. The medal is awarded at Encaenia.

Dr. James Downey Student Leadership Award

field: UNRESTRICTED

conditions: Awarded on the basis of "outstanding contribution to student life" to a student who is a member of the UNB Student union (i.e. Paid the student activity fee). The recipient must be in good academic standing. The award is made on the basis of nominations. Advertisements for the award and a call for nominations or applications will be made annually by the Office of the Assistant Vice-President, Student Services. Ideally, the award is to be presented at the Annual Student Union
Governor General's Gold Medal field: UNRESTRICTED conditions: One gold medal is awarded to the student who achieves the highest academic standing at the graduate level.

Carl Fraser (BBA 1974) Student Awards field: UNRESTRICTED conditions: Ten awards of $1,000 to be awarded annually on the recommendation of the Selection Committee. The student must complete at least the minimum requirements for the first year. Recipients must demonstrate successful academic performance. Selection will be based on involvement in student activities, university activities and/or community activities. Consideration may be given to financial need. This award is funded by Carl Fraser BBA 1974.

U SPORTS Academic All-Canadian field: UNRESTRICTED conditions: Certificates and a monetary prize will be awarded annually on the recommendation of the Director of Athletics to the student-athletes who have achieved at least a 3.5 assessment grade point average and have contributed significantly to a varsity sport on the Fredericton campus. This prize is supported by U SPORTS and funded by the Friends of the Varsity Reds.

Lieutenant Governor of New Brunswick Silver Medal field: UNRESTRICTED conditions: Fourteen medals are to be awarded annually to the outstanding senior students at Fredericton. The selection is to be made in each case by the appropriate Faculty. **SCHOLARSHIPS, PRIZES AND AWARD**

The University of New Brunswick, a provincial university, offers a variety of programs and awards to support students. These programs are designed to be accessible to both domestic and international students. Both new and returning students are eligible; however, preference will be given to Canadian citizens and permanent residents. Selection will be based on academic achievement. Consideration may be given to financial need and the demonstration of interest in participating in the Travel Study Program. When completing the online application form, students are required to submit a letter of no more than 500 words explaining how they would benefit from the scholarship.

FREDERICTON CAMPUS

The descriptions below are brief summaries of the service provided for students. Individuals interested in any of these services are encouraged to contact the relevant department for further information.

Accommodation

This section provides information about University residences, and off-campus housing as available in Fredericton and Saint John.

RESIDENCES

The University maintains thirteen residence halls, including men’s, women’s, co-ed, style (one, two and three bedroom furnished suites) and apartment style houses (one, two and three bedroom unfurnished apartments). UNB believes in a developmental residential living experience, supporting both academic success and personal development. Living to Learn fosters an academic context within the Residence Community and assist students in their transition to more independent living and the development of transferable skills. As a peer-supported learning environment, Leading to Learn also seeks to develop student leadership skills through wellness programming. High speed internet is available in all UNB-F residences. UNB further fosters a positive living environment through attractive common areas, recent infrastructure improvements, and policies such as all residences being non-smoking.

Residence dining is available in two main residence dining halls offering ultimate dining (greater freshness, variety, and personalization of food) through several different dining plans intended to match each individual students’ preferences and dietary needs. UNB also offers several retail food outlets on campus to provide students with a wide variety of dining options. The residences are administered by Residential Life, a division within Student Services. Each residence house is supported by a House Team consisting of Student Leaders, both elected by the House (House President and Committee) and selected by the university (Proctors and Lead Proctors). These House Teams work closely with residence professional support resources including the Residence Coordinators, Residence Office Team, and ResNet Support Administrator. The Director, Residential Life is a full-time professional responsible for leadership, overall management, governance, quality, development, food quality, and long-term vision of Residential Life. The Director, Finance & Operations is a full-time professional responsible for the physical operation of the residences (including janitorial services, maintenance, repairs, and capital improvements), finance and administration, and vending contracts.

RESIDENCE ADMISSIONS

General

Since residence space at UNB is limited, no one can be guaranteed admission or readmission to residence until a formal offer of residence is issued, accepted, and confirmed by the payment of the non-refundable residence application fee.

1. The University recognizes the desirability and value of Students living in residence in their first undergraduate year as well as having senior students remain in residence. Hence, every effort is made to ensure a reasonable balance between new admission and returning students.

2. Although consideration is given to the student’s preferences, admission/readmission to residence guarantees a student a place in residence as opposed to a particular room. Initial room assignments or later changes are at the sole discretion of the University.

1. Room assignment information is available in late July via the UNB Website (www.unb.ca) with students selecting “My UNB e-Services”, entering their Login ID and PIN, and selecting the “Residence” tab. Students experiencing problems should contact Residential Life.

New Residents

2. Students requesting residence must complete and submit a UNB Residences Application Form. Please note that this is a separate form from the University of New Brunswick Application for Admission.

3. New residence applicants should note that admission to residence will not be offered until admission to a UNB Fredericton program has been granted by the University Registrar and that acceptance to the University does not guarantee a place in residence.

All further information on the residence application process, how to apply, residence fees, refunds and the residence contract, can be found on the UNB residence website at https://www.unb.ca/fredericton/residence/

Aboriginal Student Services and Programs

Special services and programs for Indigenous students are provided on the Fredericton campus through the Mi’kmaq-Wolastoqey Centre (mwc@unb.ca) (Marshall d’Avray Hall, Rooms 343–344). The Centre is an academic unit of the University which administers UNB Academic programs for Indigenous students and engages in research and publication in Indigenous Studies and Indigenous Education. The Centre’s goal is to maintain the high quality of UNB programs for Indigenous students and to broaden the Aboriginal content and perspectives in these programs. In addition, MWC develops new programs which meet the stated needs of the Wabanaki communities of the region and contribute to their educational and professional growth.

MWC services, which are intended for the use of Indigenous students in all Faculties, include academic counseling and tutoring, access to the Mi’kmaq-Wolastoqey Resource Collection in the Harriet Irving Library, a Wabanaki student lounge, and opportunities to participate in social and other group events.

Degree credit courses are available in the Mi’kmaq and Wolastoqey languages and cultures, and in First Nations Education.

For information on the special BEG Program for First Nations students, see the Fredericton Programs Section of this Calendar.

Bridging Year Program

The Faculty of Education offers a Bridging Year Program for Indigenous students who are preparing for admission to a UNB degree program. See the program description in the Fredericton Programs section of this Calendar (Section G) under Bachelor of Education.

Associated Alumni of the University of New Brunswick

The Associated Alumni of the University of New Brunswick has 62,000+ alumni (graduates) around the world. The Associated Alumni keeps graduates connected with each other and the University, and provides opportunities for alumni to contribute to UNB’s well-being. The Associated Alumni is governed by an elected and appointed council of 30 former students from various graduating classes, geographical areas and faculties.

Our Alumni are “energized and involved” in the life of the University of New Brunswick. Alumni help with governing the University, advocating on behalf of the university, volunteering, recruiting students, and making financial donations. Alumni give time, talent and treasures to their alma mater. One valuable contribution the Associated Alumni makes to current UNB students is by providing scholarships and merit awards.

You are a student for a defined period of time, but, you will be an alumnus or alumna of the University of New Brunswick for life! UNB’s alumni are an integral part of the future of this University. So, what do you call yourself when you graduate? A UNB...

Definitions:

• Alumni- all graduates both males and females
• Alumnae - plural, females
• Alumnus - singular, male
• Alumna - singular female

The Associated Alumni of the University of New Brunswick began in 1862 when seven of the approximately 200 UNB graduates met. They subsequently formed an “alumni society” based on the following motion by Mr. G.S. Smith (class of 1854): “that the objects of such a society be - first, the advancement of the interests of the University of New Brunswick by all graduates both males and females – singular, male and female - and second, the advancement of the institution by such means as may be expedient.” The objects of the Associated Alumni are to promote the advancement of the University of New Brunswick.

May the Alma Mater Prosper”

Athletics

The University, through its Faculty of Kinesiology, provides opportunities for participation in a wide variety of recreational and competitive varsity athletic activities. The offices of the Faculty, together with classrooms and laboratories are located in the new Kinesiology Building. The recently completed (2011) Currie Center offers three gymnasium floors (one with spectator accommodation for 1,400), track, a dance studio, free weight room, fitness studio, spin room, strength (cario) room), and team and equipment issue rooms. The Lady Beaver Gymnasium building has the Sir Max Aitken Pool (500 spectators), 2 squash courts, and climbing wall.

The Education Gym contains a full gymnasium plus facilities for gymnastics and the material arts. There are playing fields adjacent to both gyms and to the Aitken Gymnasium. The Centre is the home of the UNB Varsity Reds and the administrative offices for this athletics program are located there. The building is widely used by the University and includes classrooms and training room facilities, noon hour skating, as well as an indoor walking area (no jogging).

Thus, with the facilities of three gymnasias, one swimming pool, four playing fields, an arena, and specialty rooms, supplemented by changing facilities
SECTION D: ACCOMMODATIONS, FACILITIES, AND SERVICES
and a program that ranges from highly organized intercollegiate competition to casual recreation, the UNB is able to provide sport and recreational activities for all members of the University community. For more information, see http://www.unb.ca/studentlife/fitness-recreation.html.

The Varsity Reds Athletic Program competes in the Atlantic University Sport (AUS) Conference and U SPORTS in the sports men's and women's basketball, volleyball, soccer, cross country, track and field, and men's hockey. In 2018, the program will add women's hockey. For more information about varsity sports, see http://www.unb.ca/studentlife/varsity-sports.html.

Undergraduate Awards Office
The Undergraduate Awards Office administers scholarships for entering and continuing undergraduate students on both campuses. The office is located in Sir Howard Douglas Hall on the Fredericton Campus.

For regulations, general information, and award descriptions please refer to the Awards section (Section 10).

Bank
A Bank of Montreal Financial Management Centre, specializing in credit, investment and financial management services, is located on Dineen Drive in the UNB Bookstore building. The branch offers two on site full service banking machines, passbook update and statement printer, telephone banking, centre and internet banking. There are three additional cash machines on campus (two located at the Student Union Building and a third at St. Thomas University.

Bookstores
There are well equipped bookstores on both campuses in central locations from which students may obtain books and supplies at a reasonable cost.

The University Bookstore offers a wide variety of services to the student community. It is a well-stocked retail operation selling textbooks and reference books for all courses taught at UNB and STU, general interest books, special order books, a full line of stationary and office supplies, computer hardware, software and peripherals, as well as university crest clothing and gift items.

Visit the Bookstore Online at https://www.bkstr.com/newbrunswickstore/home/en or contact them by telephone at 453-4664 or e-mail to: unb@bkstr.com.

Campus Ministry
The UNB Campus Ministry service is offered by a Protestant Ecumenical Chaplain. The chaplain's role on campus is to minister to the religious and spiritual needs of all members of the university community (this includes all those who either do or do not identify themselves as a participant in a specific religious or spiritual tradition). The chaplaincy offers spiritual counselling, mentorship and guidance, and a listening ear and non-judgmental presence. Our chaplaincy service is also a sounding board for students as they begin to integrate their university learning experiences with their life of faith. The chaplain also conducts memorial services and offers prayers at convocations and other special events. At the same time, the chaplaincy actively initiates meaningful contact with many faith groups from a wide variety of traditions. In doing so, we aim to foster a spirit of unity, understanding, respect, and solidarity with all those who pursue a life of spiritual grounding.

Students, staff, faculty, and members of the greater community can contact UNB Campus Ministry at the Campus Ministry Office (Harrison House, Room 124) or by calling (506) 458-7009. Chaplain Brett Anningson email chaplain.fredericton@unb.ca.

Campus Ministry website can be found at http://www.unb.ca/fredericton/studentservices/health-wellness/spirituality/ministry.html.

Childcare Services
College Hill Daycare Co-op Ltd.
The College Hill Daycare Cooperative Ltd. is a non-profit early learning and childcare centre which provides service for UNB and STU faculty, staff, and students. This educational and play-based program enrolls children aged six month to eight years old. For more information: Phone: (506) 458-2883.

Email: chdc@unb.ca Website: www.unb.ca/fredericton/chdc.

Communications Office
Communications is a bi-campus office which works with media, community interest groups, government officials, and many others. Staff provide strategic counsel, writing support for university publications, assist with ceremonies, news conferences and events, and provide media relations support to faculty and staff. The Communications Office manages UNB's daily electronic newsletters, myUNB News, and its Events Calendar, providing subscribers with current information regarding what is happening on both campuses. Website: http://www.unb.ca/advancement/communications/

Continuing Education Programs for Part-Time Students
The University provides a variety of courses, programs and services for individuals who need or prefer to study on a part-time basis at either campus or online. These learning opportunities are designed to meet the variety of roles of the individual whether occupational, professional, personal, familial or communal.

The following types of programs and services are offered through the UNB College of Extended Learning (CEL). Further information is available through the Fall/Winter and Summer Term schedules published by CEL, as well as its website (http://www.unb.ca/cel/index.php).

1. Part-time and Certificate Courses: Credit courses are offered in many disciplines that can be applied towards a variety of degree programs or certificate programs (e.g. Applied Behaviour Analysis Certificate, Certificate in Family Violence Issues; Certificate in Administration; Certificate in Leadership Studies; Certificate in Adult Education). UNB's degree completion program, the Bachelor of Integrated Studies (BIS) offered in partnership with UNB's Renaissance College and the College of Extended Learning, is designed for adult learners and part-time study. Academic sessions are offered throughout the calendar year, and part-time students can elect to take courses on campus or online according to their interests and needs. Responsibility for the degree/certificate courses rests with the respective academic units, which are also responsible for the academic advising. The academic advising for Bachelor of Integrated Studies students and students not enrolled in a specific program rests with the College of Extended Learning.

2. Non-Degree Certificates and Workshops: The College of Extended Learning offers a number of specialized certificate programs to enhance career and personal achievement. Professional development certificate programs include Management Development; Certificate in Management Essentials, Human Resources Management; Project Management; and Occupational Health and Safety. The College offers various seminars on management and leadership, human resources, project management, workplace health and wellness, conflict resolution, and behavioural intervention and autism. A wide range of courses are offered that are designed to enhance the personal and cultural enrichment of learners including leisure learning courses in writing and literature, photography, painting and drawing, languages, food and wine, and technology as well as Design Works March Break and summer programs for youth.

3. Online Courses: CEL, in partnership with departments and faculties, administers a variety of online courses for academic credit. CEL also offers professional development programs online.

4. Visual Arts and Music: The UNB Art Centre and the Centre for Musical Arts offer a variety of participation and learning (credit and non-credit) opportunities to UNB students and community members. See Fine Arts section for further detail.

5. Financial Assistance: Advice and information, bursaries and scholarships for part-time students is offered through the College of Extended Learning (506) 447-34.

6. Adult Learner Services: Advice and Information for adults considering or enrolled in academic studies at UNB (506) 447-3449.

7. Prior Learning Assessment: In some circumstances, students/potential students may have attained university-level learning through means other than formal university courses. Information and guidelines related to UNB's Prior Learning Assessment policy are available to students, prospective students and faculty from CEL (506) 458-7976. See Section B for additional details.

8. Adult Learners and Part-Time Students (ALPS): ALPS, UNB's student union for part-time undergraduate students, was established to respond to these student's unique concerns and issues, to provide a support network, to help create an enriched University environment, and to act as an advocate for all part-time and undergraduate students.

For additional information, contact the College of Extended Learning, P.O. Box 4400, Fredericton, NB, E3B 5A3; (506) 453-4646 (phone); toll-free 1-866-599-4646; (506) 453-3572 (fax); extend@unb.ca (email); http://www.unb.ca/cel/index.php (website).
Counselling Services

UNB Counselling Services offers free and confidential services to help students deal with a wide range of issues they may be struggling with. Examples of issues that we can help with include, shyness, self-esteem, assertiveness, anxiety, depression, anger, stress management, consequences of traumatic events, relationship problems, procrastination, concentration, exam anxiety, self-injury, thoughts of suicide, eating issues, alcohol and drug problems, and many others. Additionally we can provide consultation regarding concerns a friend, staff or faculty member, or other individual may have about a student or situation.

Our services are available to all part- and full-time UNB and St. Thomas University students who are registered in a degree program.

Our counselling team is composed of well-trained and experienced counsellors and psychologists, as well as Doctoral- and Master's-level interns and practicum students.

When you meet with a member of our team for an initial consultation, one of the goals for the session will be to help you create a treatment plan that will meet your needs. Some of our treatment options include:

- Referral and assistance in accessing other campus and community resources
- Self-directing resources like apps, websites, and self-help books
- Supported online psycho-education and self-study
- Group counselling
- Short-term individual counselling

With a student’s permission Counselling Services also works closely with the UNB Student Health Centre and the Student Accessibility Centre (UNB) and Accessibility Services (STU) to ensure that students receive coordinated and collaborative support.

All staff maintain strict confidentiality in their interactions with students except in rare circumstances where disclosure of confidential information is mandated, e.g., imminent risk of harm to self or others.

Counselling Services is located on the 2nd floor of the C.C. Jones Student Services Centre. Fall and winter semester office hours are weekdays: 8:15 a.m. - 12 noon and 1:00 p.m. - 4:30 p.m. Summer hours are weekdays: 7:45 a.m. - 12:00 noon, and 1:00 p.m. - 4:00 p.m. For information or to make an appointment call 453-4820. If you need help after-hours or on weekends, call 453-4820 and you will be given the option to be connected to the 24/7 CHIMO Helpline.

For additional information please visit our website at: http://www.unb.ca/fredericton/counselling

Creative and Performing Arts

UNB has a long tradition of encouraging the fine arts and has directed its resources into sustaining diversified cultural activities.

On the Fredericton campus, courses in the fine arts, offered in a variety of departments, reflect the philosophy that in a modern university the creative and intellectual aspects of life must be closely integrated. Fine arts facilities and activities include:

1. UNB Art Centre. Founded in 1941 by Pegi Nicol MacLeod and Lucy Jarvis, the UNB Art Centre is considered one of the oldest art centres in the Atlantic region. It remains a focus for a range of informative and stimulating exhibitions and programs. It is home to UNB's student art group, ARTZONE. The UNB Art Centre is the custodian of the UNB Permanent Collection, which totals more than 2000 artworks assembled through the generosity of alumni and benefactors. The collection is on display throughout the Fredericton and Saint John campuses. The Art Centre also houses two small gallery spaces with rotating exhibitions.

2. The Centre for Musical Arts. established in 1992, is under the direction of Richard Hornsby. It offers credit and non-credit courses, practice facilities, instruments for student use, a Concert series, a Young Musicians Program, Atlantic Sinfonia, and a Summer Music Camp and an affiliated professional Music Festival (New Brunswick Summer Music Festival). There are also many ensembles available to students such as the Concert Choir and instrumental ensembles (concert band, brass ensemble, flute choir, jazz band). The Musician-in-Residence program has existed since 1962. The most recent Musicians in residence have included: Robert Kortgaard, Richard Raymond, Peter Allen, Julien LeBlanc, Geoffrey McCausland, Greg Harrison, Olivia Brayley Quackenbush and Nadia Francavilla.

3. Drama at UNB. UNB offers a number of courses in Drama, providing students with training in acting, directing, design, set instruction, lighting and stage management. Theatre UNB produces up to 5 mainstage productions annually at Memorial Hall, including faculty-directed class productions and student-directed productions open to participation by anyone with an interest in theatre. The activities of Theatre UNB are organized by Len Falkenstein (Director of Drama).

Drama course can be found in the Drama and English sections of the Calendar.

4. Music on the Hill. Music on the Hill offers an annual concert series featuring international, national and regional artists. This is a cooperative endeavour of the Centre for Musical Arts and a cross- disciplinary committee of UNB and STU.

5. Film, Media, Game and Video. A series of courses in film, media, game, and video studies is offered by the Department of English and the Department of Culture and Media Studies. These may be taken as elective courses, as part of the Media Arts and Cultures Program (housed in the Department of Culture and Media Studies) or as part of the Interdisciplinary Film Studies Minor Program. State of the art digital facilities, including a student film production studio, can be found in the East Multimedia wing of d'Arry Hall, where faculty from the Media Arts and Cultures program are housed. Since 2012, the Department of Culture and Media Studies has housed an occasional Media Artist-in-Residence (filmmaker Ryan O’Toole, musician and performance artist Henry Svec, and videogame artist Chad Comeau).

6. Writer-in-Residence. Since the 1960s, the Department of English has hosted a Writer-in-Residence who is available to consult with writers from the university and the wider community. Early Writers-in-Residence included Norman Levine, Dorothy Livesay, Aidan Molony, and David Adams Richards. Since 2000 the position has been held by Colleen Wagner, George Fetherling, John Steffler, Anne Simpson, Ken McKoog, Erin Mouré, Catherine Bush, Karen Solie, Patricia Young, Gerard Beirne, Fred Stenson, John Barton, Sue Sinclair, Joan Clark, Douglas Glover, Jeramy Dodds, Naomi K. Lewis, Rabindranath Maharaj, Kerry-Lee Powell, and Colleen Murphy.

7. The Fiddlehead Magazine. Canada’s oldest continuing journal of poetry and short stories was conceived with representation from three decades ago by Alfred Bailey, and grew from a few mimeographed sheets of poems by students and some faculty to include short stories and book reviews. It has been called a Who’s Who of Canadian Literature, and various faculty members have edited it over the years, including Fred Cogswell, Kent Thompson, Roger Ploude, Peter Thomas, Robert Gibbs, Don McKay, and Ross Leckie. The editor as of July 2018 is Sue Sinclair. Although its emphasis is on Canadian prose and poetry, The Fiddlehead is open to good writing in English from contributors around the world.

8. Memorial Hall is the site for on-campus as well as touring drama and music productions. It also houses the UNB Art Centre and the Centre for Musical Arts.

9. Special events and programs. Concerts, music master classes and workshops, summer music programs, writer’s conferences, exhibitions, poetry-readings, and drama productions are arranged or sponsored by the UNB Art Centre, the Centre for Musical Arts, Theatre UNB and Music on the Hill. Readings by visiting Canadian writers occur throughout the academic year and are organized by the Department of English.

Discrimination, Sexual Harassment and Harassment Policy

The Office of Human Rights and Positive Environment provides confidential advice on matters related to discrimination, sexual harassment and harassment. You can contact the Human Rights Officer for support and information on the options available to you including assistance with resolving an issue informally, voluntary mediation or a formal complaint. Website: http://www.unb.ca/humanrights/index.html.

The complete Policy including definitions and complaints procedures can be accessed at: http://es.unb.ca/apps/policy-repository/. Search for “harassment”.

See also: http://www.unb.ca/humanrights/rights Responsibilities.html.

Employment Services

The Career Development and Employment Centre located in historic Neville Homestead, helps students find full-time degree-related employment during the academic year, as well as summer jobs and internships. We support students in developing strong skills in career development by providing in-depth resume and cover letter review, interview guidance and on-going employment and career strategy advising. There are approximately 2,000 employment opportunities and over 40 company information sessions held on campus each year. All students are encouraged to contact the Career Development and Employment Centre at the beginning of the academic year to review the many opportunities and to take part in the fall recruitment campaigns as well as our 3 annual Career Fairs and Work-study Program (part-time on-campus employment). Make a one-on-one appointment, or attend one of our many presentations and workshops on campus.

Student employment opportunities and other helpful tips and job search information can be seen on our website: http://www.unb.ca/employment
SECTION D: ACCOMMODATIONS, FACILITIES, AND SERVICES

For information contact: Phone (506) 453-4620; email to: employment@unb.ca Please visit us at Neville Homestead, 58 Mackay Drive.

English as a Second Language

Established in 1950, the UNB English Language Programme (ELP) is one of the oldest English Second Language schools in Canada. ELP offers courses to assist non-Anglophones to function in an English milieu. In all formats, the language of instruction is English; all communication is to be carried on in English as well. Classes for all proficiency levels, beginner to advanced, are offered. Students are placed according to their levels. A proven way to learn English with over six decades of success.

A. (Total Intensive) SUBMARINE® IMMERSION FORMATS: This approach incorporates around the clock immersion, with classes and activities seven days a week. A Commitment Contract (Pledge) to function only in English for the duration of enrollment is the basis for success of these formats.

1. Executive Model: Three-week and two-week, small-group modules featuring individualized attention and personalized scheduling are offered throughout the year.
2. Large-group sessions held over the course of five weeks are offered May/June and July/August.

B. English for Academic Purposes: A variety of programs are available to equip students with the English language skills they need to function in a university setting.

2. Intensive English Term Format - 35+ hours per week from September-December January-April, and April-July.
3. Intensive English Term Segment - 35+ hours per week from September-October, January-February and April-May.
4. Evening classes, a three-hour block per week; undergraduate and graduate, credit and non-credit; September-December and January-April.

C. Daytime Personalized Formats: Private and small-group classes offer flexibility for busy schedules.

1. One-on-one tutorial classes are available to meet individual needs.
2. Week-long classes (choose from 10, 15, 25, and 35 hours per week).

ELP offers several specialized programs and services, such as assessment services, professional development workshops and custom-designed group programs.

For information and registration, please contact: UNB College of Extended Learning English Language Programme. Telephone: (506) 453-3564. Email: ELP@unb.ca Website: www.elp.unb.ca

Faculty Advisors

1. It is very important that students consult with their faculty in planning their program.
2. Faculty advisors are available to all students in the university, and are available for consultation during student's full stay on the campus.
3. If the students wish to see a faculty advisor they should contact their respective Faculty or Deans Office and ask to be assigned a faculty advisor. Each faculty has its own procedures for assigning students to faculty advisors.
4. In the faculty of Science, academic advising in the first two years is done primarily through the course ARTS 1000 course. ARTS 1000 tutorials leaders also provide academic advising. Students without an ARTS 1000 advisor will see an Associate Dean for counselling. When students select their field of study departmental advisors will be assigned.

Financial Aid

Contact the UNB Financial Aid Office for information on funding your educational experience. The Financial Aid Office can provide assistance to students on the provincial student loan application process, an explanation of their government's recoupment notice; wish to initiate an appeal for further student loan assistance; need information on Canada Student Grants, provincial grants, and terms of repayment.

Other services provided by the Financial Aid Office include, but are not limited to:

1. Bursary support (non-repayable assistance) at the undergraduate level for students with demonstrated financial need.
2. Limited bursary support for graduate students with demonstrated financial need.
3. Employment opportunities through a subsidized work program designed to assist students with the costs associated with post-secondary study. The program will also provide students with an opportunity to gain valuable skills/experience within an on-campus part-time employment situation.
4. University small loan program that offers low-interest loans to full-time students who have successfully completed one term at UNB. Maximum loan award for an academic year is $800.00. For application information and deadlines, please contact the Financial Aid Office of UNB, first floor C.C. Jones Student Services Centre, (506) 453-4796 or ptaward@unb.ca and website: http://www.unb.ca/fredericton/studentservices/financial-aid/.

For information and applications for part-time student's awards, please contact the College of Extended Learning at (506) 453-4818 or email to: ptaward@unb.ca.

Food Services

On-campus food services are provided:

1. In the three residence dining halls with residence students having the choice of dining plans with varying combinations of structured meals and discretionary cash.
2. Retail dining outlets are located in the Student Union Building, Head Hall, Harriet Irving Library, and in many university buildings.

General information regarding food services, vending and beverage contracts may be obtained by calling (506) 453-4800.

Information concerning planning an on-campus event involving food or beverage, or hosting a conference on campus may be obtained by emailing conferenceservices@unb.ca or the Event & Marketing coordinator of the Aitken Centre, (506) 458-7203, email: nick.eldjani@unb.ca.

Graduate Studies

The University offers a wide range of post-graduate programs through its School of Graduate Studies. The degree of Doctor of Philosophy is offered in Graduate Academic Units in the departments of Biology, Chemical Engineering, Chemistry, Civil Engineering, Computer Science, Earth Sciences, Education, Electrical Engineering, English, Forestry and Environmental Management, Geodesy and Geomatics Engineering, History, Interdisciplinary Studies, Mathematics and Statistics, Mechanical Engineering, Physics, Psychology, and Sociology.

Master's degrees are offered in Graduate Academic Units in almost all departments. Graduate studies are carried out on both campuses of the University.

Detailed information concerning the programs offered, financial assistance for graduate students, and regulations governing admission and degree requirements will be found in the School of Graduate Studies Calendar available on request from the School of Graduate Studies (email: gradsch@unb.ca) or on the Internet at http://www.unb.ca/gradstudies/.

Health Insurance, Student

Basic Health Coverage

Basic health and hospital benefits for Canadian students are provided by the Medicare Plan of their province of permanent residence. Students must ensure that they are registered and in good standing with the Hospital Commission of their province.

Beginning September 1, 2017 full-time international students with student visas qualify for New Brunswick Medicare coverage. Some exceptions apply. For those without or awaiting Medicare coverage, basic health coverage for international students is provided through an insured plan administered by the University. International students on both campuses should refer to the following website for information concerning opt-out options, refunds, etc.: http://www.unb.ca/financialservices/students/healthinsurance.html.

International students with landed immigrant status do qualify for Medicare and hospital benefits and must register with the Province immediately upon arrival. Please also refer to the above website for more information.

Supplementary Health and Dental Coverage

All full-time students on both campuses are automatically enrolled in the Student Health/Dental Plan. The Plan is designed to supplement the coverage provided by the provincial Medicare plans, or by the plan for international students. Administered by the Student Union on the Fredericton campus, and by the Student Representative Council (SRC) on the Saint John campus, the Plan provides students with a comprehensive set of extended health and dental benefits including 80% coverage on prescription drugs, paramedical services, ambulance services, etc. The coverage runs from September 1 through August 31. Students wishing to enroll dependents must contact the Student Union/SRC to make
arrangements (Fredericton students: 453-4955; Saint John students: 648-5684).

Students providing proof of alternate coverage may opt out of the Student Health/Dental Plan. To opt out, students must complete an online opt-out form (https://wespeakstudent.com/). Students who opt out will be credited for the Health/Dental fee. The deadline to complete the opt-out process is September 21, 2018 for both campuses, with no exceptions beyond this date. It is the responsibility for the student to follow all steps and adhere to the deadline in order to receive credit. Students must opt out annually as opting out does not automatically carry forward from year to year. The opt-out deadline for new students starting in January (those who were not full-time in September) will be January 25, 2019.

Please refer to the Financial Information section of this calendar for Health Insurance fees and payment deadlines. Information can also be found online at http://www.unb.ca/financialservices/students/healthinsurance.html.

For further information about the Plan, please contact:
Fredericton Student Union, Room 102, Student Union Building (506) 453-4955 or Saint John Student Representative Council, Room 213, T.J. Condon Student Centre (506) 648-5684.

Health Services

The Student Health Centre is located on the third floor of the C.C. Jones Student Services Centre (26 Bailey Drive). Phone; (506) 453-4837, fax: (506) 452-6087.

Student Health Centre services are available to full time UNB and STU students. These services include physical examinations, mental health care, sexual health care, nutrition counselling, sports medicine, referral to a specialist when necessary, sample collection (blood, urine, etc.), immunizations, flu shots and allergy injections.

Fall/Winter Hours: Monday to Thursday, 8:15 a.m. to 12:00 p.m. and 1:00 p.m. to 4:15 p.m.
Friday, 8:15 a.m. to 12:00 p.m. and 1:00 p.m. to 3:30 p.m.
Summer Hours: Monday to Thursday, 8:15 a.m. to 12:00 p.m. and 1:00 p.m. to 3:30 p.m.
Friday, 8:15 a.m. to 12:00 p.m. and 1:00 p.m. to 3:30 p.m.
CLOSED - Weekends and holidays.

After Hour Clinic and Emergency Department information can be found on our web site: http://www.unb.ca/fredericton/studentsservices/health-wellness/healthcentre/index.html.

Information Centres

Advocacy Centre

The UNB Student Union-run Advocacy Centre is a place where undergraduate students can access free, confidential legal information from student advocates. If they cannot provide you with specific information, they will find the information for you, or direct you to somewhere that the information can be provided. The advocates are your prime avenue to access Universal Legal Coverage. The Advocacy is located in room 301 in the SUB. Call 447-3088 or email to: univaff@unb.ca for more information.

Welcome Center

The Student Union-run Welcome Center is located in room 102 of the Student Union building. Photocopies, fax service, as well as stationary and other merchandise, are available. Also offered are Bus passes, campus maps, and tickets for most activities. Call (506) 447-4955 for hours and information.

University Women's Centre

Governed by a Board consisting of various members of the UNB, STU and Frederiction Community, the University Women's Centre opened in the fall 2002. Located in room 129 in the Student Union Building, the centre provides information, space and support for all members of the university community. For more information, phone (506) 452-6124 or email to: women@unb.ca.

Information Technology Services (ITS)

Information Technology Services (ITS) provides students with the technology support, information and services they need to live and study at UNB. This includes computer lab services, laptop support, wireless networking, email and calendaring services, and much more.

IT Service Desk

The IT Service Desk is there to help with any questions or issues related to your UNB IT accounts, email, wireless, software, printing, access to web services, spam or phishing emails, IT security or general IT questions.

SECTION D: ACCOMMODATIONS, FACILITIES, AND SERVICES

Fredericton campus - Phone (506) 457-2222, email itservicedesk@unb.ca or drop by in person at the Harriet Irving Library (HIL), Learning Commons from 8 a.m. to 10 p.m. daily (unless the HIL is closed).

Saint John campus - Visit the Student Technology Centre in the Hans W. Klohn Commons (first floor), phone (506) 657-2222, or email itservicedesk@unb.ca.

myUNB Portal

The myUNB Portal gives you single sign-on access to all your personal IT services at UNB, including your UNB email and calendar (O365), D2L Brightspace, class and exam schedule, and term marks. It also keeps you informed about UNB cancellations, upcoming events, and much more. Log in at https://my.unb.ca.

Using your Devices on Campus

For instructions on how to setup wireless, printing, email and more on your laptop, desktop, smartphone or tablet, visit the ITS website (http://unb.ca/its/). The site also provides details on the various IT services available to you through ITS, such as how to download Microsoft Office (Word, Excel, PowerPoint, etc.) for free on all your devices, upcoming scheduled IT outages, how to get IT Help, and more.

ITS on Twitter and Facebook

Want to stay in the loop about current and upcoming IT outages, news and events? The ITS Twitter and Facebook pages keep you up to speed on what's going on with technology on campus and also provide you with another way to send a quick question or comment to the IT Service Desk.

Twitter: https://twitter.com/UNB_ITS
Facebook: https://www.facebook.com/UNBITS

Print Services (Fredericton Campus)

Print Services is a full service, professional printing facility providing UNB students, faculty and staff with a wide variety of high quality printing services. Located in Marshall d’Avray Hall (room 106), their services and products include black & white and colour copying and printing, letterhead and business cards, brochures and flyers, laminating, posters and signage, and more. For more information, including a price list and contact information, visit www.unb.ca/printservices.

International Student Advisor

Website: www.unb.ca/fredericton/studentsservices/international/index.html

The International Student Advisor’s Office (ISAO) is on campus to provide advice and support to international students throughout their degree program. ISAO support services for international students include: information workshops to help students upon their arrival in Fredericton, personal, financial and cultural advising, International Student Success Guide and Workshops, information on Canadian immigration, and assistance with applications for work-permits, transit visa and renewal of study permits. The International Student Advisor’s Office is located in C.C. Jones Student Services Centre and is open during the regular campus office hours.

For more information contact: Phone: (506) 453-4860; Fax: (506) 453-5005; email to: isao@unb.ca.

Libraries

UNB Libraries offers access to a wealth of research materials in both electronic and print formats. There are four libraries on the Fredericton campus—Hamlet Irving Library, the Science & Forestry Library, the Engineering & Computer Science Library, and the Gerard V. LaForest Law Library. The campus library at UNB Saint John is located in the Hans W. Klohn Commons.

The current library collection comprises over one million print volumes, three million microforms, over 250,000 government documents (NB, Canada, and international) and maps, periodicals, DVDs, rare books, manuscripts, the University Archives, as well as a number of special collections. UNB Libraries also subscribes to electronic resources, including over 20,000 full-text journals, 100 major research databases (indexes & abstracts), over 200,000 electronic books, local and national newspapers, and a variety of reference materials. The online library catalogue, UNB WorldCat, provides access to materials held in any of UNB’s libraries, including materials at Hans W. Klohn Commons.

Services include research consultations with librarians, and assistance with electronic & print resources, either in person, by phone or online. Technical support is available via the IT Service Desk at Harriet Irving Library and in the Hans W. Klohn Commons. Instruction sessions are offered to support students in all levels of study, and library orientation tours are available upon request. All libraries offer group study rooms, wireless access, laptop computers, study tables and individual carrels. Harriet Irving Library’s John B. McNair Learning Commons offers a variety of learning environments including options such as comfortable group or individual seating.
Further information including opening hours is available on the library website https://lib.unb.ca/.

Math Learning Centre and Writing and Study Skills Centre

Math Learning Centre

The Math Learning Centre provides individual tutoring, group tutorials, workshops and exam review sessions for all students taking first year Math courses. Services are offered to full- and part-time UNB students. The centre is located in Tilley Hall 422. Call (506) 453-4768 for an appointment.

For more information please go to www.math.unb.ca/~mathehelp/

Writing and Study Skills Centre

The Writing and Study Skills Program (Harriet Irving Library, room 410) offers free individual and small group tutoring for full and part-time UNB Fredericton students. Topics include academic writing, examination preparation, effective reading strategies, and time management. The Program also offers evening drop-in tutoring. Monday through Thursday, from 6:00pm to 10:00, at both its Hil location and the Engineering and Computer Science Library. Appointments can be booked by phone (453-4557 or 452-6346), by email (wss@unb.ca), or web-based form (http://www.unb.ca/fredericton/studentservices/academics/writing-centre/).

Research

Seventy per cent of all university research in New Brunswick is conducted at UNB. There are many opportunities for undergraduate students to engage in research with faculty members, receive funding for their pursuits, and continue their research and education at UNB through graduate studies. A number of interdisciplinary research programs exist in which faculty members and students from various departments collaborate to investigate problems of mutual interest. Active research units include the Canadian Research Institute for Social Policy, Canadian Rivers Institute, Centre for Coastal Studies and Aquaculture, Canadian Centre for Geodetic Surveying, Muriel McQueen Fergusson Centre for Family Violence Research, and the Wood Science and Technology Centre, to name a few. The Office of Research Services, the research administration and development unit, facilitates the undertaking of research within the university on behalf of industry, government, and other clients and sponsors. It also promotes the application of research results to industrial problems and, where appropriate, the transfer of knowledge and technology through various types of transfer arrangements. Further information concerning research activities at the University may be obtained from the Office of the Vice-President (Research): www.unb.ca/research.

Residences

We are pleased you are considering living in residence at UNB Fredericton. Residence offers numerous opportunities to meet new people, become engaged in your new community, and access to a number of supports that are not available off-campus. Living in residence will provide you with valuable out-of-classroom experiences that will benefit you for years to come. Our residences are conveniently located to classes and all UNB services, and everything is included!

For more information on our residences, please visit our webpage at http://www.unb.ca/fredericton/residence.

Security and Traffic

Some of the services provided by our department include:

- Campus Patrols
- Campus Inspections
- Proactive Crime Prevention Strategies
- Residence Security

In addition to the physical security of the campuses, security is responsible for parking and traffic control. Parking regulations are in effect and students, faculty and staff and visitors must register their vehicles with the Security and Traffic office and purchase a parking permit to park on campus. The Security and Traffic Department personnel will gladly address questions relative to parking.

Parking violations will result in fines. Violation tickets that are not paid within seven days could result in having the violating vehicle towed from campus without notice and at the owner’s expense and risk. Vehicles left contrary to the parking regulations constitute or create a traffic hazard and may also be towed away at the owner’s expense and risk without prior notification.

Non-payment of parking fines may result in withholding of grades and transcripts or deductions from financial awards to students.

For further information on parking regulations, services provided, as well as information on safety and security tips, refer to the UNB website at http://www.unb.ca/fredericton/security/

Summer Sessions

Fredericton and Saint John Campuses

The University offers several academic sessions (3 and 6 week blocks) during Summer Term from May through August. Courses are offered in a variety of disciplines, durations, and formats.

Summer Term study allows current undergraduate and graduate students to progress throughout their program in a timely manner. New and visiting students can also participate in UNB offerings during Summer Term. Professional development opportunities exist for teachers, as well as specialized experiential programs.

As part of its overall Summer Term on the Fredericton campus the University also offers programs through the English Language Programme for those wishing to increase their facility in English: an academic preparation course, Intensive English Term Format (May-August), two five-week residential immersion sessions (Submarine® formats: May-June and July-August) for adult learners and one four-week residential language camp for high school students during July-August. Contact the English Language Programme, College of Extended Learning for further details.

In addition to the degree-credit courses, a variety of cultural and related educational activities (e.g. Summer Music Camp and Summer Music Festival) are provided.

Schedules for Summer Term are available in the spring of each year. Registration opens on March 1.

For further information, contact the College of Extended Learning, UNB Fredericton, P.O. Box 4400, Fredericton, N.B. E3B 5A3, (506) 453-4646 (phone), 1-866-599-4646 (toll-free), (506) 453-3572 (fax), extend@unb.ca (email), http://www.unb.ca/CEL/ (website). In Saint John, contact the Registrar’s Office, UNB Saint John, P.O. Box 5050, Tucker Park, Saint John, N.B. E2L 4L5, (506) 648-5670 (phone).

Student Centre

The Student Union Building (SUB), completed in January 1969, is the result of student-administration cooperation. The cost was shared among the students of the University of New Brunswick, Saint Thomas University, and the former Teachers College, with the University of New Brunswick matching the student contribution.

The SUB houses the offices of several student groups and organizations. Both the Saint Thomas University and the University of New Brunswick student newspaper offices and the student government offices are located in the office wing as well as CHSR-FM, the student radio station. In the main part of the building there are several meeting rooms, a lounge area, a large cafeteria, the College Hill Social Club, The Cellar Pub n’ Grill, the Information Centre, the PaperTrail, The Advocacy Centre, the University Women's Centre, the balloon and the main administrative office for the SUB. For the convenience of the students there are also several retail outlets such as a clothing store, hair styling salon, travel office, two automated banking machines, a sundry shop and a jewelry store.

The Student Union Building is advised by a Board made up of UNB and STU students and members of the Board of Governors of UNB who strive to provide the services and atmosphere which will make student life enjoyable.

Student Services

Student Services helps students to achieve academic and personal success and to develop in them the knowledge, skills, and attitudes that will empower them to live our motto “dare to be wise”. All students are encouraged to access all services that would help them succeed. Student Services includes the following units:

- Student Health Centre
- Counselling Services
- Student Advocate
- Writing and Study Skills Centre
- Career Development and Employment Centre
- Student Accessibility Centre
- Academic Support
- Residential Life
- International Student Advisor's Office
- Student Union Building
- Student Life

Festival) are provided.
Students with Disabilities

In accordance with both the Canadian and New Brunswick Human Rights Act, the University of New Brunswick provides reasonable accommodations to individuals with disabilities.

Physical Accessibility

Most buildings on the UNB Fredericton campus include accessible entrances and washrooms; however, due to their age, some buildings on campus are not fully accessible. Detailed information on building accessibility can be obtained from the Student Accessibility Centre at (506) 453-3515 or unbds@unb.ca

Academic Accommodations

The University provides Academic Accommodations necessary for students with disabilities to participate fully in their program of study. Please contact the Student Accessibility Centre at (506) 453-3515 for more detailed information, or visit the website at http://www.unb.ca/fredericton/studentservices/academics/accessibility/.

UCard (UNB Photo ID)

UCard is your official UNB Photo ID Card. Much more than a simple ID, this card gives you discounts around town, access to library resources and secure areas, entry to gym facilities, meal plans, printing, entrance to events on campus, purchases with UCard Cash and more. For more information, visit www.unb.ca/ucard or follow us on social media. www.facebook.com/UNBUCard www.twitter.com/UNBUCard.
SECTION D: ACCOMMODATIONS, FACILITIES, AND SERVICES

SAINT JOHN CAMPUS

Accommodation

Residences
UNB Saint John offers two residences on campus overlooking the beautiful Kennebecasis River.

The Dr. Colin B. Mackay Residence opened in September 2003 and was designed with input from our own students. It offers 170 beds in the form of spacious double suites for independent style living. Suites include two single bedrooms, kitchenette, complete with microwave and fridge and private three-piece bath. At UNB Saint John, housing is non-smoking, co-ed and security locked. Each room is furnished with a double bed, and desk set.

The Sir James Dunn Residence offers 72 beds with single and double rooms are available. Newly updated washrooms, Sir James Dunn gives you a modernized living in residence environment.

Both residences have standard house amenities include furnished TV rooms and study lounges, high-speed Internet and cable TV connections and free laundry facilities. If you prefer a more subdued, quiet lifestyle, the residences also has a section that offers a 24-hour quiet policy. Both residences have an indoor connection to the campus.

Food Services and Residence Fees
Sir James Dunn residents have a tax free meal plan which will be incorporated into the total residence fees as set out in the residence fees schedule. Students living in the Dr. Colin B. Mackay residence must purchase a $400.00 meal plan but may elect to purchase one of the regular meal plans. Meal plans are administered on a declining balance basis. For example, this means that if a meal plan that was valued at $1,300 per term were purchased, the student's account would be credited with this amount toward food services. The cost of any purchases at the Baird Dining Hall or Tim Horton's commons café during the term will be deducted from the balance until a zero balance is reached. Ideally, a zero balance is reached at the end of each term; however, food service accounts can be supplemented at any time in increments of $25 or greater. It is important to keep in mind when choosing a meal plan that although an account can be supplemented at any time, any balance remaining at the end of April is non-refundable.

Residence Activities
Living in residence is not just about studying and sleeping. Student house committees are elected each fall to plan social events such as Orientation Week, Winter Carnival, Holiday Formal and charity fundraisers. They also assist in establishing residence policy and procedures, administering the residence and student activities, and representing the residences in student government. The Committee uses house dues, which are collected from the students at registration time to provide Orientation activities, subscriptions to cable television, newspapers etc. for the common areas, and anything else they would like to sponsor. Residences are served by a Residence Life Co-ordinator in addition to a number of Residence Assistants who live on campus.

Applying to Residence
Applicants who are interested in living accommodations in the university residences must complete the application form, which is included in the UNB Saint John Application for Admission package or they may apply online at http://www.unb.ca/saintjohn/residence/index.html

Residence applicants should note that acceptance to UNB Saint John does not guarantee a place in residence; acceptance into residence will not be offered until admission to UNB Saint John has been granted. Upon acceptance, students will be sent a residence deposit form. The form must be returned with a confirmation deposit of $500.00 as quickly as possible to ensure a place in residence.

For information on the residences, please contact: Residence & Conference Services, Sir James Dunn Residence - e-mail to: res@unb.ca, telephone (506) 648-5755, fax (506) 648-5762, Monday - Friday 8:15 a.m. - 4:00 p.m. and also visit our website at http://www.unb.ca/saintjohn/resconf/ and proceed to Residence Admissions where you will find a virtual tour along with applicable forms and information.

Analytics

Athletics, Recreation and Wellness
The G. Forbes Elliot Athletics Centre features a 30,000 square foot playing surface with a versatile pulsatile floor and showcase hardwood main court. The Athletics Centre has space for six badminton courts, three basketball courts, three volleyball courts, two tennis courts and one-track & field training lane. The spacious layout is perfect for soccer, ultimate Frisbee, pickle ball and other activities. The bleachers have seating for 560 spectators to watch the Seawolves sports teams and other community events.

The ground floor includes a weight training room, men's and women's changing and shower areas, an equipment storage room, a medical room and a room for officials. Athletic and Safety & Security offices, a classroom, multipurpose room and fitness room are located on the second floor. The G. Forbes Elliot Athletics Centre serves the competitive and recreational sports and physical activity needs of UNB Saint John students, faculty and staff, as well as many community groups and events.

Canada Games Stadium
The Canada Games Stadium is one of the finest sports facilities in the Atlantic Canada. A legacy of the 1985 Jex Canada Games, the stadium features a 400-metre, eight-lane track, an artificial turf field, javelin and shot put throwing areas, an equipment storage building, a state of the art lighting system, spacious changing rooms with showers, an officials' room and medical room. There is permanent grandstand seating for 2,500 people. Many prestigious local, provincial, regional and national sports events take place at this facility.

Please consult the ARW Department's web-site for further information on the varsity programs. (http://www.unb.ca/saintjohn/athletics/)

Bank
A Bank of Nova Scotia banking machine is available in the lobby of the Student Centre.

Bookstores
The University Bookstore on the Saint John campus stocks all textbooks and course-related materials for students to purchase. In addition, it offers a full line of reference and general interest books (with a special order service for books not in stock), school and office supplies, computer hardware, software and peripherals, as well as Crested university clothing and giftware. The Bookstore is located on the main floor of the Ward Chipman Library building, and is open year-round: 8:30 am - 4:00 pm Monday to Friday. Visit the Bookstore online at: https://www.bkstr.com/newbrunswicksjohnstore/home or contact them by telephone (506) 648-5540.

Campus Ministry
The Campus Ministry is composed of a number of clergy and spiritual advisors of different faiths in the Saint John area. Their role on campus is to minister to the religious and spiritual needs of all members of the university community (this includes all those who either do or do not identify themselves as a participant in a specific religious or spiritual tradition). They offer spiritual counselling, mentorship and guidance, a listening ear and non-judgmental presence. The Campus Ministry sponsors various activities throughout the year.

Students, staff, and faculty can contact UNB Campus Ministry at the Campus Ministry Office (Oland Hall, G08) by emailing unbsj.multifaith@unb.ca, or by messaging us on Facebook @unbministry. The Campus Ministry website can be found at http://www.unb.ca/saintjohn/studentservices/health/ministry.html.

The Ministry motto is: "God cares, so do we."

Communications Office
Communications is a bi-campus office which works with media, community interest groups, government officials, and many others. Staff provide strategic counsel, writing support for university publications, assist with ceremonies, news conferences and events, and provide media relations support to faculty and staff. The Communications Office manages UNB's daily electronic newsletters, myUNB News and myUNB Student News, and its Events Calendar, providing subscribers with current information regarding what is happening on both campuses. Website: http://www.unb.ca/advancement/communications/

Continuing Education and Programs for Part-Time Students
The Saint John campus operates an integrated program which treats part-time students on essentially the same basis as full-time students. Credit courses are under the administrative control of the Faculties, and are scheduled at the time of day or evening which makes them most accessible to both the full-time and part-time clientele. Academic advising for part-time students is available through the Departments and Faculties, as it is for those in full-time studies.

In addition to degree programs, the campus offers certificate programs in Data Analysis, and in Business Administration, Human Resource Management, Accounting, Electronic Commerce, Economics, Financial Markets, Communication and Professional Writing and General Studies, which are of particular relevance to part-time students. All courses offered
towards a certificate are degree-credit courses and students who subsequently enroll in a degree program will normally be able to count courses taken towards the certificate as credits towards the degree. Another certificate program offered is the Certificate of Proficiency in French, Level I and II, which is open to students whether or not they are currently working towards a degree. A variety of non-degree courses is also offered to meet the needs of professional associations and other groups.

The Writing Centre; Counselling; Employment Liaison; information on scholarships and bursaries for part-time study; student success strategies; and financial advising for part-time students are available at the Student Services Centre, ground floor of Philip W. Oland Hall. Phone (506) 648-5501.

The campus offers a Math Centre available for all full-time and part-time students regardless of degree program. Phone (506) 648-5776.

Saint John College offers English-Second-Language Training Courses for those who require further instruction in English in order to become proficient and to communicate and function effectively in English at the post-secondary level. In addition its core programs, including English for Academic Purposes EAP, English as a Second Language Support, and the Pre-MBA Program, Saint John College offers the following courses and services:

1. Professional Development Programs which offer opportunities for professionals to develop their skills, to network, generate new ideas, build community connections, develop innovative practices and build professional and personal strength.
2. Custom Second Language Courses (non-credit) which are specially designed for groups of students and professionals with varying needs and interests. These courses range from off-site corporate training to on-site specialty programs such as English Immersion.
3. Official English Language Testing Saint John College is an official testing site for the CAEL (Canadian Academic English Language) Assessment, for students requiring an official test of English proficiency. The CAEL Assessment is given on-site at regular intervals and results are accepted at most Canadian post-secondary institutions.

Information about degree-credit courses/certificate programs may be obtained from the Chair of the appropriate Department, the Dean of the Faculty of Business or, for Education courses, from the Education Coordinator for the campus, (506) 648-5674.

Counselling Services
Offers free, professional, and confidential counselling to our university students. In particular, the following services are provided:

- Personal counselling is available for supportive and problem-solving assistance regarding emotional difficulties, interpersonal problems, or stressful life situations.
- Career counselling, testing, assessment, and planning are available.
- Consultations and referrals are available to staff and faculty to consult about concerns that pertain to the welfare of students.
- Outreach programming can be made available to various groups in the form of activities, presentations, and educational workshops, on a variety of topics.

To make an appointment with a counsellor, please e-mail sjcounsellor@unb.ca.

Discrimination, Sexual Harassment and Harassment Policy
The Office of Human Rights and Positive Environment provides confidential advice on matters related to discrimination, sexual harassment and harassment. You can contact the Human Rights Officer for support and information on the options available to you including assistance with resolving an issue informally, voluntary mediation or a formal complaint. Website: http://www.unb.ca/humanrights/index.html.

The complete Policy including definitions and complaints procedures can be accessed at: http://es.unb.ca/apps/policy/repository/. Search for “harassment”. See also: http://www.unb.ca/humanrights/rights_responsibilities.html.

Employment Services
The Student Employment Services on the Saint John Campus assists students and recent graduates in obtaining permanent, summer and part-time employment. Services for students include: assistance with resumes and cover letters, job search strategies, interview preparation, work-study programs, employment counselling, and labour market information. Employer services include posting job notices on-campus and assisting with employer information sessions for students and graduates. Students and graduates are encouraged to contact the Student Employment Centre early in the academic year to review job opportunities and take part in the fall recruiting campaigns offered by many employers. The Student Employment Centre provides service throughout the year and is located in Student Services, G18 and G19, Oland Hall. For information contact (506) 648-2308/2309 or e-mail ses.sj@unb.ca.

English as a Second Language
Saint John College offers English language training courses for students who need to improve their language skills in order to communicate and function effectively in English in university or college programs. In addition to its core programs, including English for Academic Purposes (EAP), English as a Second Language Support, and the Pre-MBA Program, Saint John College offers customized courses and programs such as English for specific purpose and immersion programs, upon request.

Saint John College is also an official testing centre for several tests, including the CELPIP (for immigration purposes), the CAEL (Canadian Academic English Language) Assessment (for university/college admission) and the IELTS (International English Language Testing System, both general and academic) test for students who need to take an official test of English proficiency. More information on testing services can be found at: http://www.unb.ca/saintjohn/sjcollege/language.html.

Financial Aid
The UNB Saint John Financial Aid Office provides advice and answers questions on all matters relating to financial aid including: government student loans, student line of credit, University and Emergency funding, bursaries and scholarships, as well as funding by outside agencies. Information is available for both full and part-time students. Budgeting and financial advising is another of our important services.

For more information or to make an appointment, contact Renea Leskie, Student Services, Oland Hall, G15, (506) 648-5765 or email: finaidsj@unb.ca.

Fine Arts
Fine Arts Cultural activities on the Saint John campus are presented under the auspices of the Lorenzo Society (http://www.unb.ca/saintjohn/arts/lorenzo). The Lorenzo Society organizes or sponsors special events and programs, concerts, writers' conferences, exhibitions, and a reading series.

The Lorenzo Reading Series hosts readings by major Canadian authors. Lorenzo readings typically take place on the UNB Saint John campus and are free of charge. See http://www.unb.ca/saintjohn/arts/lorenzo/readingseries.html.

The Lorenzo Music Series offer a series of recitals by the Saint John String Quartet and concerts throughout the academic year.

Food Services
On the Saint John campus, food services are located in the Thomas J. Condon Student Centre and Ward Chipman Library Building. Information regarding catering, food services or hosting a conference on campus may be obtained from the Residence & Conference Services by calling 468-5755 or http://www.unb.ca/saintjohn/conferenceservices/dining/index.html.

Chartwell's done on campus website: http://dineoncampus.ca/UNBSJ.

Health Services
The Student Health Centre is located behind the G Forbes Elliot Athletics Centre in the back parking lot. The Health Centre offers doctor and nurse practitioner/educational health services for students. Please contact the Health Centre at 648-5656 or email behealthy@unb.ca or visit the website at http://www.unb.ca/saintjohn/studentservices/services/health/healthsections/index.html for a list of clinics, services and hours of operation.

Information Centres
At the student-run Campus Information Centre, located in the Thomas J. Condon Student Centre, you can obtain general information, find out what is happening on campus, meet other students, send faxes, get photocopies, pick up bus schedules, maps, job postings and much more.

IT Help/Technical Support
The Student Technology Centre (on the first floor) can help with many technological needs including basic hardware setup and maintenance, software support (including Microsoft Office), etc. Email itservicedesk@unb.ca or call 1-506-657-2222.

International Student Advisor
International Student Advisor Office
SECTION D: ACCOMMODATIONS, FACILITIES, AND SERVICES

The International Student Advisor provide strong support services to ensure International Students are able to focus on their educational efforts and be successful while studying at UNB Saint John. We provide assistance to international students on:

- Immigration issues
- Orientation and pre-arrival information
- Workshops and social events

International Student Advisor Office is located in Oland Hall, Room G14. Email: internatsserv@unb.ca. Website: www.unb.ca/international

Student Abroad Coordinator

Go Further! Study Abroad! Information and advice on study and work abroad opportunities for UNB Saint John students are available. UNB Saint John offers a number of financial awards each year to financially assist Canadian students to study abroad. To find out more, check out the website at www.unb.ca/global, or phone (506) 648-5618 or email to: studentabroad@unb.ca.

International Development Project Coordinator

The International Office at UNB Saint John provides support to faculty, staff and students involved with international development projects. Present initiatives include projects in China, Vietnam, Africa and Cuba. The Coordinator is also available to assist faculty, staff and students wishing to develop opportunities and proposals to work, study or do research in developing countries. An active World Universities Services of Canada chapter is also coordinated in this office. For more information on international development, contact: (506) 648-5775 or email to: i.d@unbsj.ca.

Libraries

The UNB Saint John campus library is housed in the Hans W. Kohn Commons. The library provides access to a wealth of scholarly research materials in both print and electronic formats, including more than 130,000 print books, 700,000 eBooks, and 30,000 electronic journals. These can be accessed through the UNB Libraries catalogue and more than 100 research databases available on the UNB Libraries' website found at lib.unb.ca.

Through the library's Inter-Library Loan program, students at UNB Saint John have access to more than 1 million books from the libraries on the UNB Fredericton campus and, through the Document Delivery program, can request materials from other libraries throughout the world.

Students can also borrow course reserves as well as laptops, cameras, cables, and other IT equipment at the Library Services Desk. The library has a team of librarians and staff that are happy to help students learn how to use the library's resources to find the materials they need. Students are encouraged to contact librarians directly or to ask at the Library Services Desk for help.

The Commons is home to a number of other important services as well, including those offered at the Student Technology Centre, the Writing Centre, and the Math and Science Help Centre.

Students will also find more than 40 desktop computers, a cafe, and quiet and collaborative study spaces throughout the Commons as well as nine group study rooms that can be booked online.

Math Help and Writing and Study Skills Centre

Math and Science Help Centre

The Flora Beckett Math and Science Centre provides additional help to students encountering problems in their mathematics and intro science classes. The Help Centre comprises a team of qualified tutors coordinated by a faculty member from the Department of Mathematics and Statistics. Services provided through the Help Centre are free to all full time and part-time UNB students. The Centre is located on the main floor of the beautiful Hans W. Kohn Commons, rooms 133/134.

The Help Centre provides the following services throughout the academic year:

- Drop-in Tutoring Sessions
  Students may drop into the Help Centre and get one-on-one tutoring from a qualified tutor. Hours of operation are posted on the Help Centre's website. Tutoring is free of charge to all UNB students. No appointments are needed.

- Private Appointments
  Free Private and Small Group Tutoring is available for students. Email MathHelp@unb.ca for an appointment. All tutoring takes place in Hans W. Kohn Commons, rooms 133/134.

Midterm & Final Exam Reviews

Reviews are done before exams and midterms at the request of course instructors. Emails will be sent regarding time and place of reviews. You can also check out the events on our website for times and locations.

Writing Centre

The writing centre is located on the main floor of the Hans W. Kohn Commons. One-on-one tutoring provides help with any academic writing, including assistance with planning, organization, documentation, grammar, and punctuation's, and academic conventions. To make an appointment, book on-line at http://unbsj.mywconline.com.

Security and Traffic

Environmental Health, Safety and Security

Campus Security Services are available 24 hours a day - seven days a week, 365 days a year. A 24 hour Security Line is available by calling 648-5675. For pay phones on campus please pick up the receiver and push the security button, no coin required. The Environmental Health, Safety and Security Department provides the following services; Campus Patrols, Emergency Response, First aid/CPR and AED, Parking/Traffic Control, Investigations, Safe Walks, Key/Card Access Control, Lost and Found, Identification Cards, Emergency Notification Registration, Health and Safety, General Information. Please immediately report emergencies, incidents, or suspicious activity to Campus Security.

Parking

All vehicles on campus are required to have a valid parking permit. Student parking permits can be purchased at Financial Services in Oland Hall. Various options are available (note prices are subject to change without prior notice):

- Day pass available from Pay & Display Machine - $5.00
- Meter Parking - $1.25 / hour - max time limit one hour

Student Parking Permit Fees - Please refer to Safety & Security Website/Parking http://www.unb.ca/saintjohn/security/parking.html

Further details may be obtained from the Office of Environmental Health, Safety & Security by calling (506) 648-5675, or by visiting their website at http://www.unb.ca/saintjohn/security/index.html.

Emergency Alert Service

The Emergency Alert Service, offered by University of New Brunswick, Saint John campus, allows us to quickly notify you, by text message, email or phone, of a potential emergency on campus such as flooding, fire or similar events which may affect you.

In order to receive notification through this service, you will need to register online at http://www.unb.ca/saintjohn/security/emergency.html

Your information is held in a secure database and is accessed only when an emergency occurs or is expected to occur. When this takes place, an automated message will be sent directly to the contact information you have provided to us.

Only those registered will be contacted by this service when an announcement is made.

Be informed. Register today.

Student Services

Student Services

Student Services offers a number of programs and services design to assist students in their studies and university life. These services include the Writing Centre, Counselling, Financial Aid & Awards Advising, Student Employment Service, Student Accessibility Service, Academic Support, International Student Advisor's Office, Student Health Centre and student orientation activities. The Director of Student Services acts as the campus ombudsman for students in dealing with academic appeals and disciplinary matters. The staff at Student Services is dedicated to helping students get the most from their university education. For information on programs, services or general inquiries, please visit our website at http://www.unb.ca/saintjohn/student-services/

Student Centres

Thomas J. Condon Student Centre

Opened in 1986, the Thomas J. Condon Student Centre houses the offices of student government, the student newspaper (The Baron), Campus Radio Saint John (CFMH, 107.3 FM), lounges, meeting and study rooms, and food services. The Centre consolidates most aspects of student life. Three rooms - the Dr. K.A. Baird Dining Room, the E.A. Whitebone Lounge and the Tanya Hume Room - were named in memory of ardent UNB Saint John supporters. A skyline connects the Student Centre to the G. Forbes Elliot Athletics Centre.

Funding for the Student Centre was provided by the Third Century Fund (donations from faculty, staff and students) and the provincial government.
In 1987, the building was named in honour of Thomas J. Condon, Vice-President of the Saint John Campus from 1977-1987, and 2001-2003.

**Students with Disabilities, Services For**

**Physical Accessibility**

The University of New Brunswick is committed to the equitable treatment of students with disabilities. Most buildings on campus have accessible main entrances with ramps and automatic doors. Elevators and wheelchair accessible washrooms are also available.

**Academic Accommodations**

The Student Accessibility Centre (SAC) is there to assist you in dealing with your individual needs. We will ensure that the any information you provide us remains confidential and private. The Student Accessibility Centre can help with the implementation of a variety of academic supports. If you have any questions or concerns, please do not hesitate to contact us at the SAC sjaccess@unb.ca or (506 648-5690) for more detailed information, or visit our website at http://www.unb.ca/saintjohn/student/services/accessibility/index.html.

**UCard (UNB Photo ID)**

The UCard is the University of New Brunswick’s official Photo ID Card. Much more than a simple ID, this card provides you with discounts around town, access to library resources, entry to UNB athletic facilities, meal plans, entrance to exams and secure areas, and can even be used as a campus debit card. For more information, visit the UCard Website - http://www.unb.ca/ucard.

To get your UCard: Saint John Campus - Go to the Security Office located in room 119 of the Athletics Centre.

MINOR PROGRAMS
Each of the following disciplines offers a Minor program which may be taken in conjunction with the degree programs listed above, with approval of the appropriate Departments:

- Chemistry
- Cognitive Neuroscience
- Comparative Literature
- Computer Science
- Criminal Justice
- English
- French
- Gender Studies
- Health Sciences
- History
- Information and Communication Studies
- Information Technology
- International Development Studies
- International Studies
- Linguistics
- Mathematics
- Mathematics and Economics
- Philosophy
- Politics
- Statistics

In addition, a Minor is offered in Psychosocial Dimensions of Sport.

OTHER PROGRAMS
- A Bachelor of Nursing degree for the post RN student is available.
- A Bachelor of Education Degree in Elementary Education is offered in concurrently with the Bachelor of Arts Degree.
- UNBSJ also offers the first two years of programs leading to Majors and Honours degrees in Science. (Geology)
- The first two years of a degree program in a Chemical, Civil, Computer, Electrical, and Mechanical Engineering.
- The first year of a degree program in: Forest, Geodesy & Geomatics, Physics, Software Engineering.
- Certificate Programs are offered in:
  - Accounting
  - Business Administration
  - Computing
  - Data Analysis
  - Economics
  - Electronic Commerce
  - Financial Markets
  - French Levels I and II
  - Gender Studies
  - General Studies
  - Human Resource Management
  - Mathematics for Education
  - Mental Health Nursing
- A Diploma of Advanced Undergraduate Studies is also available.

Detailed information about these academic programs follows under Degree programs.

ADMISSION, FEES, FINANCIAL AID, SERVICES
Information pertaining to admission requirements and procedures, fees, financial aid and University services and facilities is located elsewhere in this Calendar. Students should consult the appropriate section of the Calendar as indicated below.

Admission and University Regulations See Section B.
Tuition, Fees and Financial Information See Section C.
Scholarships and Loans See Section C.
Accommodation, Services and Facilities See Section D.
BACHELOR OF APPLIED MANAGEMENT FACULTY OF BUSINESS

General Office: Phillip W. Oland Hall
Mailing Address: Faculty of Business
University of New Brunswick
100 Tucker Park Road, Saint John, N.B.
Canada, E2L 4L5
Phone: (506) 648-5570/1-800-50-UNBSJ (86275)
Fax: (506) 648-5574
Email: business@unb.ca
Website: http://unb.ca/saintjohn/business

NOTE: For faculty listing, please see Bachelor of Business Administration program section.

An articulation agreement is a formal, systematic, written collaboration between two institutions designed to identify block transfer credits and to clarify requirements to facilitate student transfers between the two institutions. These agreements are approved by the Maritime Provinces Higher Education Commission and are regularly updated to reflect any changes in curriculum or requirements at the institutions involved.

The Faculty of Business at UNBSJ offers articulated programs in Accounting, Electronic Commerce, General Business and Hospitality and Tourism leading to The Bachelor of Applied Management (BAM). Students first earn a diploma from a participating community college and then enter the third year of the BAM at UNBSJ.

The BAM in Hospitality and Tourism also offers a high school entry option whereby students attend UNBSJ in their first year, transfer to the New Brunswick Community College in St. Andrew's for their second year and return to UNBSJ to complete the final two years of the degree.

The programs are designed to offer students the opportunity to experience two very different types of learning environments while they develop proficiency in both the theoretical and applied areas of their chosen fields.

I. University Regulations on Admission and Academic Regulations
Students are strongly advised to read the General University Regulations, Section B of this Calendar, and in particular the subsection headed "Grading System and Classification". The General University Regulations will govern any point not covered in the regulations that follow. Questions concerning the application of regulations should be directed to the Registrar.

II. BAM Regulations for Students In the Degree Programs
A. Grading and Classification
The regulations in respect to the BAM degree are expressed in terms of letter grades, credit hours and grade point averages. These are explained in Section B of the Calendar. In order to take a BA or HTM course that has a prerequisite, students must earn a C or better in the prerequisite course(s), regardless of the program in which the student is registered.

NOTE: A grade of C or better is necessary in all required and elective courses (including work term reports, where applicable). A grade of D or better is necessary for all options.

B. Credit Hours
The number of credit hours assigned each course is stated in Section F of this Calendar. (In most cases the Faculty of Business assigns a 6 chs weight to a two-term course and a 3 chs weight to a term course). Due to differences in the methods used by the various Faculties in the calculation of credit hours, students who elect to register for courses taught outside of the Faculty of Business should note the following:

1. For purposes of the BAM degree, any course taught outside of the Faculty of Business, which has a course number ending in zero (0) and which is taught over the full academic year, will receive the number of credit hours normally assigned by the Faculty in which the course is taught, up to a maximum of 6.
2. For purposes of the BAM degree, any course taught outside of the Faculty of Business, which has a course number ending in other than zero (0) and which is offered in one term of the academic year, will receive the number of credit hours normally assigned by the Faculty in which the course is taught, up to a maximum of 3. Normally courses of less than 3 credit hours will not be considered for credit.
3. Students may take up to 3 one-credit hour courses of an academic nature during their program.

C. Grade Point Average
1. See Section B of this Calendar for detailed regulations on standing and promotion requirements.
J. BAM with a Certificate in Community Leadership
This program is designed to add value to students’ degrees by allowing for participation in the community. Students are required to complete the certificate program. These requirements include academic course work available as part of the degree program as well as community volunteerism and professional development activities. The certificate program offers students the opportunity to differentiate themselves from other business graduates through professional development, leadership growth, community involvement and networking activities.

The program will consist of four specific academic courses, 40 hours/term for 4 terms of volunteer service in the PALS program, 3 workshops, 1 PALS training course.

Eligibility:
- Open to BAM and BBA students who will be entering their 3rd year of the program.
- Applicants must have a CGPA of 2.7 or higher.
- Applicants must present a combination of academic success, community service and other extra-curricular activities.

Admission:
- Complete and submit an application form.
- Submit a statement outlining your interest in the program and explaining your vision of the role of community leaders.
- Submit a resume detailing community service and extra-curricular activities you have been or currently are involved in.
- Submit an unofficial transcript.

Continued participation in the program after acceptance requires student to maintain a CGPA of 2.7 or higher. Enrolment in the program will be limited to a maximum of 15 students each year.

III. Degree Standing on Graduation
At graduation all successful candidates for the degree of Bachelor of Applied Management shall be listed in alphabetical order within the appropriate degree category as stated below:

Distinction: A student who attains a cumulative grade point average of at least 3.8 over the final 60 chs of course work and no grade less than B- (2.7) over the final 60 chs of course work shall graduate with Distinction.

First Division: A student who attains a cumulative grade point average of at least 3.5 shall graduate in First Division.

Second Division: A student who attains a cumulative grade point average of at least 2.5 but less than 3.5 shall graduate in Second Division.

Third Division: A student who attains a cumulative grade point average of less than 2.5 shall graduate in Third Division.

IV. Bachelor of Applied Management Curriculum Degree Requirements
Elective and option courses for all BAM programs may be chosen from the following:

Humanities and Languages - Classics, English, French, German, Greek, History, Humanities, Latin, Philosophy, Spanish (or other courses as approved by the Faculty of Business)

Social Sciences - Gender Studies, Geography, Information & Communication Studies, International Studies, Linguistics, Politics, Psychology, Social Science, Sociology (or other courses as approved by the Faculty of Business)

Business - All courses prefixed with BA which are not listed as required for specific BAM programs

Other - Biology, Chemistry, Computer Science, Economics, Geology, Hospitality, and Tourism Management, Information Technology, Mathematics, Physics, Science, or other courses as approved by the Faculty of Business.

It is the responsibility of students to ascertain that their elective and option courses are acceptable for BAM degree credit. Credit will not be granted for CHEM 1831, CS 1703, ECON 1004, ESL 1301, ESL 1302, ESL 1303, FREN 1103, MATH 1863, MATH 2633, MATH 3633 or PSYC 1273 in the BAM program. Credit will be granted for only one of MATH 1001, MATH 1003, MATH 1823, or MATH 2853.

Students enrolled in a degree or certificate program under the aegis of the Faculty of Business are not to register in the following courses or similar courses without prior permission of the Faculty of Business: ECON 1075, PSYC 2102, PSYC 2901, PSYC 3913, STAT 1793, STAT 2263, STAT 2264, STAT 2593, STAT 2793 or STAT 3093 (The content of these courses is similar to required or optional BAM or BBA courses).

NOTE: Students should contact the Faculty of Business at the beginning of each regular academic year for a revised list of courses in this category.

SECTION E: SAINT JOHN ACADEMIC PROGRAMS

BACHELOR OF APPLIED MANAGEMENT - ACCOUNTING

Admission Requirements
Students must have successfully completed the two-year Business Technology program with the Accounting Option at NBCC-Saint John, or an equivalent program, with an average of at least 70%. Additional admission requirements will depend upon the institution from which a student graduated.

Curriculum and Degree Requirements
Students must successfully complete at least 60 chs of course work and must obtain the minimum required grades in all required, elective and option courses specifically required for the degree and in the Prerequisites for those courses.

Candidates for the degree must successfully complete the following credit hours.

Please NOTE: courses designated with (*) are CPA entry courses.

a. 27 chs of required courses
b. 9 chs Accounting Elective chosen from BA 4207, BA 4221, BA 4223, BA 4231*, BA 4237*, BA 4238* or BA 4242*
c. 3 chs Finance Elective chosen from BA 3426*, BA 4437, BA 4455, ECON 3114 or other courses as approved by the Faculty of Business
d. 3 chs Elective courses chosen from ECON 2091, IS 1001, IS 1002, SOCI 2413, ECON 2091, 3 chs Psychology or other courses as approved by the Faculty of Business
e. 3 chs Business Elective chosen from BA 3123, BA 3134, BA 3557, BA 4101, BA 4193 or other business course as approved by the Faculty of Business.
f. 15 chs options, with no more than 6 chs from business. BA 3653 recommended for CPA entry requirements.

Example of a Typical Student's Program BAM Accounting Degree

Third Year
Fall Term MATH 1853, BA 2504, Electives or Options - 9 chs
Winter Term BA 2606, BA 3224, BA 3672, BA 3304, BA2858

Fourth Year
Fall Term BA 3623, BA 4229, Electives or Options - 9 chs
Winter Term Electives or Options - 15 chs

BACHELOR OF APPLIED MANAGEMENT - ELECTRONIC COMMERCE

Admission Requirements
Students must have successfully completed the two-year Business Technology program with the E-Business Option at NBCC-Saint John, or an equivalent program, with an average of at least 70%. Additional admission requirements will depend upon the institution from which a student graduated.

Curriculum and Degree Requirements
Students must have successfully complete at least 60 chs of course work and must obtain the minimum required grades in all required, elective and option courses specifically required for the degree and in the Prerequisites for those courses.

Candidates for the degree must successfully complete the following credit hours:

1. 39 chs of required courses;
2. 6 chs of Electives chosen from BA 3125, BA 3328, BA 3661, BA 4108, BA 4126, BA 4223, IT 2773 or other courses as approved by the Faculty of Business;
3. 6 chs of Electives chosen from BA 3557, BA 4866, an ICS course as approved by the Faculty of Business or other courses as approved by the Faculty of Business;
4. 3 chs of Elective chosen from ECON 2091, ECON 2413 or 3 chs PSYC or other courses as approved by the Faculty of Business;
5. 6 chs of non-business Options.

Example of a Typical Student's Program BAM Electronic Commerce Degree

Third Year
Fall Term MATH 1853, BA 2123, BA 2217, BA 2663, Electives or Options - 3 chs.
Winter Term BA 2504, BA 2606, BA 3126, BA 3672, Electives or Options - 3 chs.

Fourth Year
Fall Term BA 2858, BA 3129, Electives or Options - 9 chs.
Winter Term BA 3504, BA 3305, BA 3478, Electives or Options - 6 chs.
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

BACHELOR OF APPLIED MANAGEMENT - GENERAL BUSINESS

Admission Requirements
Completion of an approved diploma program from a recognized college with a minimum overall average of 70%.

Curriculum and Degree Requirements
Students must successfully complete at least 60 chs of course work and must obtain the minimum required grades in all required, elective and option courses specifically required for the degree and in the Prerequisites for those courses.

Candidates for the degree must successfully complete the following credit hours:

a. Successful completion with a grade of "C"
   - 6 chs Accounting as approved by the Faculty of Business
   - 6 chs Marketing as approved by the Faculty of Business
   - 3 chs Management as approved by the Faculty of Business
   - 3 chs Human Resource Management as approved by the Faculty of Business
   - 3 chs Finance as approved by the Faculty of Business
   - 9 chs Operations & Information Mgt as approved by the Faculty of Business
   - 3 chs Electronic Commerce as approved by the Faculty of Business
   - 3 chs Law as approved by the Faculty of Business
   - 3 chs Integrated Strategy as approved by the Faculty of Business

b. Successful completion, with a minimum grade of C, of 9 chs of business electives normally chosen from third and fourth level courses.

c. Successful completion, with a minimum grade of C, of 6 chs of economics as approved by the Faculty of Business

d. Successful completion, with a minimum grade of C, of 6 chs of non-business courses acceptable to the Faculty of Business.

Example of a Typical Student's Program BAM General Business

(assuming no advanced standing for core required business or economics courses in their college diploma or other recognized post-secondary studies)

Third Year
Fall Term
- BA 1216, BA 1605, BA 2123, BA2504, ECON 1013
- Winter Term
- BA 2217, BA 2303, BA 2606, BA 2858, ECON 1023

Fourth Year
Fall Term
- BA 3304, BA 3425, BA 3672, Electives or Non-Business Options - 6 chs
- Winter Term
- BA 3705, BA 4101, Electives or Non-Business Options - 9 chs.

BACHELOR OF APPLIED MANAGEMENT - HOSPITALITY AND TOURISM

Admission
a. High School Entry ("3+1" Program)

Students must have an overall average of 75% in English 122, Trigonometry and 3-Space + Advanced Math with an intro to Calculus and 3 electives. In addition they must achieve a minimum of 60% in English 122 and Math 120.

b. College Entry ("2+2" Program)

Students must have successfully completed a two-year diploma program in Hospitality and Tourism at a recognized community college with an average of at least 70%. Additional admission requirements will depend upon the institution from which a student graduated. Students should contact the Faculty of Business for details.

Co-Operative Education Component
Students may choose the co-op mode. Work terms follow years 2 and 3 for High School entry students; a work term follows year 3 (i.e. first year at UNBSJ for College entry students. These work terms provide "hands on" multi-level practical experiences.

Curriculum and Degree Requirements

A. High School Entry

Students must successfully complete at least 90 chs of course work and must obtain the minimum required grades in all required and elective courses specifically required for the degree and in the Prerequisites for those courses.

College Entry 2+2

Students must successfully complete at least 60 chs of course work and must obtain the minimum required grades in all required, elective and option courses specifically required for the degree and in the Prerequisites for those courses.

B. Candidates for the degree must successfully complete the following:

High School Entry ("3+1")

a. 57 chs of required courses;

b. 6 chs of Social Science Electives;

c. 6 chs of Humanities and/or Languages Electives;

d. 12 chs chosen from approved HTM Electives (includes BA 4108);

e. 9 chs of non-business, non-HTM options (see list below); and

f. 30 chs of block transfer credit in hospitality and tourism from an approved community college.

College Entry ("2+2")

a. 30 chs required courses;

b. 12 chs chosen from approved HTM electives (includes BA 4108);

c. 18 chs of Options (see list below) of which no more than 12 chs may be at the introductory level and no more than 6 chs may be chosen from HTM or business courses; and

d. 60 chs of block transfer credit in hospitality and tourism from an approved community college.

Course Requirements

Students are responsible for ensuring that they meet all the requirements specified for the degree. These include the minimum credit hour requirements, minimum grade point averages, minimum grades in specified courses, successful completion of all specifically required courses, elective and non-elective courses and compliance with the restrictions on elective courses as in Regulation IV above. Students are advised to consult Section H of this calendar for detailed course descriptions, including the number of credit hours assigned to each course. An elective course is one chosen from a specified group of courses, e.g. "from Social Science or Business". An option course is an approved course chosen by the student from any approved discipline.

Electives:
- Humanities and Languages: Classics, English, French, German, Greek, History, Humanities, Latin, Philosophy, Spanish (or other courses as approved by the Faculty of Business)
- Social Sciences: Gender Studies, Geography, Information & Communication Studies, International Studies, Linguistics, Politics, Psychology, Social Science, Sociology (or other courses as approved by the Faculty of Business)
- Business: All courses prefixed with BA which are not listed as required below.
- Hospitality & Tourism: All courses prefixed with HTM which are not listed as required below. **Note** that BAMHT 2+2 students may NOT choose HTM1103 as an elective.

Options: Except as noted in section IV above, options may be chosen from any of the elective areas listed above as well as: Biology, Chemistry, Computer Science, Economics, Geology, Information Technology, Mathematics, Physics, Science, or other courses as approved by the Faculty of Business.

Example of a Typical Student's Program BAMHT Degree ("3+1")

High School Entry - BAMHT Degree ("3+1")

First Year: Fall Term
- Math 1853 Math for Business I*
- 3 chs Option**
- ECON 1013 Intro to Microeconomics
- Social Science Elective*
- Humanities or Language Elective*

First Year: Winter Term
- HTM 1103 Introduction to Tourism
- BA 1216 Accounting for Managers I
- ECON 1023 Intro to Macroeconomics
- Social Science Elective*
- Humanities or Language Elective*

Second Year: Fall and Winter Term
- Students must satisfactorily complete a year-long program at an approved community college.
Second Year: May-August
- Optional co-op work term

Third Year: Fall Term
- BA 1605 Business Decision Analysis I
- BA 2504 Introduction to Organizational Behaviour
- BA 2303 Principles of Marketing
- HTM 2217 Management Accounting for the Hospitality Industries
- Electives or Options** 3 chs

Third Year: Winter Term
- BA 2123 Introduction to Digital Business
- BA 2606 Business Decision Analysis II
- BA 2858 Introduction to Human Resource Management
- BA 3672 Introduction to Management Information Systems
- Electives or Options** 3 chs

Third Year: May-August
- Optional co-op work term

Fourth Year: Fall Term
- BA 3129 Business Research Methods
- BA 3371 Marketing of Services
- BA 3425 Managerial Finance
- Electives or Options** 6 chs

Fourth Year: Winter Term
- BA 3705 Business Law
- HTM 4101 Competitive Strategy
- HTM 4161 Planning and Development of Sustainable Tourism
- Electives or Options** 6 chs

Example of a Typical Student's Program
College Entry- BAMHT Degree ("2 + 2"):

Third Year: Fall Term
- BA 1605 Business Decision Analysis I
- HTM 2217 Management Accounting for the Hospitality Industries
- Electives or options** 9 chs

Third Year: Winter Term
- BA 2123 Introduction to Electronic Commerce
- BA 2606 Business Decision Analysis II
- BA 3672 Introduction to Management Information Systems Electives or options** 6 chs

Third Year: May-August
- Optional Co-op Work Term Fourth Year

Fourth Year: Fall Term
- BA 3129 Business Research Methods
- BA 3371 Marketing of Services
- BA 3425 Managerial Finance
- Electives or options** 6 chs

Fourth Year: Winter Term
- HTM 4101 Competitive Strategy
- HTM 4161 Planning and Development of Sustainable Tourism
- Electives or options** 9 chs

* All students must include MATH 1853 within their first 30 chs; 6 chs from the Social Science disciplines listed above, within their first 60 chs, and 6 chs from the Humanities and Languages disciplines listed above within their first 60 chs.

** Option courses may be selected from the offerings of any faculty provided that the selections are in accord with regulations IV and C. above, and provided they are approved by the Faculty of Business.
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

BACHELOR OF ARTS

**FACULTY OF ARTS**

**General Office:** Sir Douglas Hazen Hall, Room 201

**Mailing Address:** Faculty of Arts, University of New Brunswick
100 Tucker Park Road, Saint John, N.B.
Canada, E2L 4L5

**Phone:** (506) 648-5560

**Website:** http://www.unb.ca/saintjohn/arts/index.html

**FACULTY**

**Dean:** Dr. Joanna Everitt

**Department of History and Politics**
- Everitt, Joanna, BA (Car), MA, PhD (Tor), Prof & Dean - 1997
- Fury, Cheryl, BA, MA (UNB), PhD (McM), Asst Prof - 2010
- Goud, Thomas, BA (Calg), MA, PhD (Tor), Assoc Prof - 1994
- Jeffrey, Leslie, BA (Acad), MA (Car), PhD (York), Assoc Prof - 1998
- Lewis, Jon-Paul (J.P.), BA (Waterloo), MA (Guelph), PhD (Carleton), Asst Prof - 2012
- Lindsay, Debra, BA (Sask), MA, PhD (Man), Assoc Prof & Chair - 2009
- Marquis, Greg, BA (SFX), MA, PhD (Qu), Prof - 1999
- Munoz-Martinez, Hespiziba, BA (Universidad de Monterray), MA (York), PhD (York), Asst Prof - 2010
- Toner, Peter M., BA (St Thomas(NB)), MA, PhD (NUI), Professor Emeritus - 2011
- Whitney, Robert, BA, MA (Alta.), PhD (Qu), Assoc Prof - 2000

**Department of Humanities and Languages**
- Belanger, Louis, BA (Montre), MA (UQTR), PhD (Sher), Prof - 1990
- Bell, Sandra, BA, MA (McM), PhD (Qu), Prof - 2010
- Creelman, David, BA (Acad), MA (UNB), PhD (York), Prof & Chair - 2008
- Flagel, David, BA (UNB), MA, PhD (Qu), Prof - 1989
- Hill, Virginia, MA (Bucharest), MA, PhD (Geneva), Prof - 1990
- Jones, Miniam, BA (Tor), MA, PhD (York), Assoc Prof - 1999
- Littlejohn, Murray, BA, MA (Ott), Sr Instructor - 2008
- Loutfi, Fatima, BA (Grenoble), MA (Ottawa), Sr Instructor - 2012
- Maier, Sarah, BA, MA, PhD (Alta.), Assoc Prof - 1999
- Moore, Robert, BA, MA, PhD (McM), Prof - 1990
- Nikunzima, Obed, Lic(Burundi/Tanzania), MA, PhD (Sher), Prof - 2010
- Serrano, Pedro, BA (El Salvador), MA (ITCA), Sr Teaching Assoc - 2006

**Department of Psychology**
- Best, Lisa, BA (York), MA (Arkansas Little Rock), PhD (Maine), Assoc Prof - 2008
- Both, Lilly E., BA (Manit), MA, PhD (Winst), Assoc Prof & Chair - 2011
- Bradley, Michael T., BSc (Vic.(BC)), MA, PhD (Manit), Prof - 1980
- Brunelle, Caroline, BA (Hons) (Laval), PhD (McGill), Asst Prof - 2006
- Campbell, Mary Ann, BA (Hons) (Dalh), MA (Lakehead), PhD (Dal), Assoc Prof and Director, Centre for Criminal Justice Studies - 2004
- DiTommaso, Enrico, BA (McG), MA, PhD (UNB), Prof - 1997
- Gentreau, Paul, BA, MA (OH), PhD (Qu), Professor Emeritus - 2007
- Goddard, Murray J., BA (Calg), PhD (McM), Univ. Teaching Prof - 1987
- McGuire, Katherine, BA (Hons), MEd, MA (UNB), Instructor - 2006
- Taulukis, Harald, BA (N II), MSc, PhD (Nfld), Prof - 1986
- Wilson, Alexander, BA (Mt All.), MA, PhD (Manit), Prof - 1981

**Department of Social Sciences**
- Bums, Janet, M. C., BA (Alta), MA (Victoria), PhD (S.Fraser), Assoc Prof - 1988
- Chalmers, D. Lee V., BA, MA (Regina), PhD (Essex), Assoc Prof - 1995
- Chiaison, Paul-Emile, BA, BEd (St FX), MA, PhD (France), Education Coordinator - 2004
- Doran, Christopher, J., BA (York), MA, PhD (Calg), Prof - 1989
- Downes, Daniel, BA (Ott), MA (Car), PhD (McG), Assoc Prof - 2001
- Duchesne, Ricardo, BA, MA (C'dia), PhD (York), Prof - 1995
- Galbo, Joseph, BA (CUNY), MA, PhD (York), Assoc Prof - 1997
- Hill, Roderick, BA (Tor), Diploma (Stockholm), MA, PhD (W.Ont), Prof - 1990
- Ibs, Boamah, Mustapha, BSc (Hons) (Ghana), MSc, PhD (Nottingham, Trent), Asst Prof - 2012
- Keynes, Beth, BA, BEd, MED (UNB), MA (Car), Lecturer - 2008
- MacKinnon, Robert, BA (MAll.), MA (Nfld.), PhD (UBC), Prof - 2001
- Madeley, June, BA (Regina), MA (Dal), PhD (McM), Assoc Prof - 2006
- Mir, Robert, BA (McM), MA (Qu), PhD (McM), Assoc Prof - 1996 & Chair - 2011
- Worrell, Gary L., BPE (UNB), MSc (Penn State), PhD (Florida State), Assoc Prof

**General Information**

On the Saint John campus there are a variety of programs leading to the degree of Bachelor of Arts: Majors programs in Biology, French, Information and Communication Studies, International Studies, Linguistics, Mathematics, Philosophy, Sport and Exercise Psychology, and Statistics, and with Majors and Honours programs in: Economics, English, History, Politics, Psychology and Sociology.

**BA Degree Regulations**

**Intent**

The BA Degree regulations are intended to ensure that the student is exposed to a diversity of academic disciplines in the first half of the degree program, and to give the student a more specialized and concentrated knowledge of one or two academic disciplines in the second half of the program. Students are responsible for ensuring that their course of study meets the BA Degree regulations.

**Cooperative Education [Co-Op] Option**

The Faculty of Arts offers a 4-years Cooperative Education [Co-Op] option within the BA program. Consistent with the philosophy of cooperative education, the program is designed to alternate study terms and require students to work terms. The number of positions is limited, and, therefore, restricted to students with a B- (2.7) average or higher after their first year of full-time study. Students must apply for the Co-op program at the end of the second term of their first year of full-time study (completion of at least 5 term-courses). Co-op students are required to maintain a B- (2.7) GPA or higher throughout their academic terms to remain in the Co-op program.

**Grading System and Classification**

The grading system used is that adopted by the University in 1974. The regulations governing grades, grade points, grade point averages and cumulative grade point averages for the BA degree are the same as the General University Regulations, for full-time students, part-time students, and for students enrolled before 1974. For their own benefit all students should study these regulations carefully (see Section B of the Calendar).

1. The BA degree will be granted on successful completion of a minimum of 40 term-courses. A term-course must be between 3 and 5 credit hours to be included in the general BA regulations. Some programs may require courses of lesser values, but these will not count in the general BA requirements (min. 3 ch each term-course). The only exception is for those students who successfully complete the Faculty of Arts Co-op Option Program who may use ARTS 2903, ARTS 3903, and ARTS 4903 (each 2.7) to combine for 1 term course toward their Arts degree. Certain Honours programs may require successful completion of more than 40 term-courses. A full-year course of 6 or more credit hours will count as 2 term-courses. A grade of D or above indicates successful completion of a course, except as stated elsewhere in the Calendar.

2. Normally, the student will successfully complete 20 term-courses at the lower-level (i.e. courses whose number begins with 1 or 2) before taking the 20 term-courses, or more for certain Honours programs, of upper-level courses (i.e. courses whose numbers begin with 3 or 4) which complete the degree program, in accordance with the requirements of either one or two majors programs. Under special circumstances, up to 4 lower level term-courses (min. 3 ch each term) of at least 20 term-courses of upper-level courses. The written permission of the appropriate chair(s) is required for such a concession.

3. During the session in which students expect to complete successfully the first 20 term-courses, they must choose one or two academic disciplines or fields of study in which they wish to specialize. If the students choose to specialize in one academic discipline or field of study they are said to be taking a single major; if they choose to specialize in two academic disciplines or fields of study they are said to be taking a double major. Students with a high grade point average may apply to honour rather than major, in one or two disciplines. The honours programs involve more intensive study and are typically taken by students in preparation for postgraduate work. When
students have decided on the academic discipline(s) or field(s) of study in which they wish to specialize, they must apply to the appropriate Department(s)/Discipline(s) for permission to enter the majors program(s) concerned. Students who fail to apply for acceptance to a majors program after they have successfully completed 20 term-courses may find that they will be required to complete successfully more than 40 term-courses in order to fulfill the majors requirements and get a degree. A student must fulfill the requirement for one or more Majors program(s) in order to obtain a BA Degree. Course selections for students in majors programs must be approved by the appropriate Department Chair(s), or their designee.

4. Among the 20 term-courses at the lower-level, a student must successfully complete at least 2 term-courses in three of the four groups listed below. Up to 6 term-courses may be taken in any one discipline, but not more than 4 term-courses may be taken in any other discipline. For students pursuing a double major, this may be amended to allow up to 5 term-courses in each of the disciplines the student is double majoring in subject to Department Chair approval.

Group 1 - Humanities: Classics, English, History, Humanities, Philosophy, World Literature. Courses in French, German, or Spanish Civilization also form part of this group.

Group 2 - Languages: French, German, Greek, Latin, Spanish. (NOTE: Courses in French, German, or Spanish Civilization do not form part of this group.)

Group 3 - Social Science: Economics, Gender Studies, Geography, Information & Communication Studies, International Studies, Linguistics, Politics, Psychology, Sociology, Sport & Exercise Psychology.

Group 4 - Science: Biology, Chemistry, Computer Science, Geology, Information Technology, Mathematics, Physics, Science, Statistics.

5. With the exceptions noted below only credit hours successfully completed in disciplines listed above will count towards the BA degree.

a. Subject to the agreement of the appropriate departments, up to a maximum of 4 term-courses of core Education courses can be counted towards a BA degree.

b. Some core Education courses (ED 3031, ED 3041, ED 3051, ED 3065), as well as ED 3561 and ED 4502 for Arts students who are registered in the Certificate in Teaching English as a Second Language (CTESL) Program, can be counted as Arts elective credits, up to the maximum of 4 term-courses. Methods courses in Education are not eligible for Arts elective credits. Non-core Education courses which are similar to Arts courses, may be considered for Arts elective credit on an individual basis by the Dean of Arts.

c. All courses successfully completed in Humanities (designated HUM), Social Science (designated SOCS), Business Administration (designated BA), and Hospitality and Tourism (HTM) count towards a BA degree, provided that UNB course program regulations are met. HSCI 2001 and NURS 4144 may be approved as general electives towards the BA degree with permission from the Dean.

6. A student may not take more than 6 courses in any term without the written permission of the Dean.

7. For the purposes of the BA degree, a course offered at UNB Saint John shall have the credit-hour rating assigned to it by the Faculty offering the course. NOTE: Students taking courses with labs must complete the appropriate lab requirements.

8. Exceptions to these credit hour designations in the BA program may be made only by the Dean of the Faculty and the Registrar.

9. Requirements for the 20 term-courses at the upper-level are listed in the regulations of the appropriate majors programs.

10. Candidates for the degrees of BA (Major) are listed with divisions based on the cumulative grade point averages of all courses taken. See Section B of this Calendar. -Listing of Graduates-

11. A student who attains a grade point average equal to or greater than 3.75 for courses taken after the completion of their first 20 term-courses and no grades less than C over the last 20 term-courses shall be awarded a Distinction upon graduation.

BIOLOGY MAJOR

Students who wish to major in Biology will have to plan their course selections carefully in order to meet the various prerequisite requirements. The Biology Major in the BA program will include courses in whole organisms and ecology but will exclude Biochemistry, Cell Biology and a few of the Marine Biology courses.

During the first year the student will take BIOL 1105 during Term 1. In Term 2, BIOL 1205 and BIOL 1017 are required. Students must also complete a year of Chemistry courses. Students must take CHEM 1831 (a minimum grade of "B" is required in both courses) or CHEM 1041 / CHEM 1046 / CHEM 1072 / CHEM 1077. Students taking CHEM 1041 etc. must also take MATH 1003.

During second year the students will take BIOL 2125, BIOL 2485, and BIOL 2585, BIOL 2615 and STAT 2263 or equivalent. During the third and fourth year the students will complete at least eight upper level Biology courses. Students must have the appropriate 2000 level Biology course to enroll in upper level courses. The course descriptions list the necessary Prerequisites.

Except where noted above, a grade of "C" or higher is required for all core courses. Students must also complete the general BA requirements. There is not a Minor in Biology.

CERTIFICATE IN GENERAL STUDIES

General Information

The Certificate in General Studies is open to all interested individuals, but it is intended for student attending university for the first time. It is anticipated that Certificate students may proceed on to a degree program, transferring all appropriate Certificate credit(s).

Admission

Open to all interested individuals, the Certificate in General Studies has no specific academic Prerequisites for students enrolled in a part-time basis, only a desire and willingness on the part of the student to engage in university-level education. Applicants applying to the Certificate in General Studies for a full-time study should consult with the Faculty of Arts before an admission decision will be made.

There is no minimum age, or any specific prerequisite requirements for entrance into the Certificate in General Studies. Some courses, such as those in Groups D, E, and F, may require successful completion of upper-level high-school studies in the discipline.

General Regulations

1. Students who wishes to pursue the Certificate in General Studies on a full-time basis should first consult with the Faculty of Arts.

2. To earn the Certificate in General Studies a student must complete a minimum of 10 term-courses with a grade of C or better in each course, and achieve a cumulative grade point average of at least 2.0.

3. Students in the Certificate in General Studies are required to take a minimum of 2 term courses from three of the six groups listed below (adhering to all course Prerequisites):

- Group A Classics, English, History, Humanities, Philosophy, World Literature.

- Group B French, German, Latin, Spanish.

- Group D Biology, Chemistry, Geology, Mathematics, Physics, Science, Statistics.

- Group E Business, Hospitality & Tourism

- Group F Computer Science, Data Analysis, Engineering, Information Technology.

4. A certificate will not be awarded to a student who has completed another degree or certificate program, or is currently enrolled for a degree. Students currently enrolled in another program, or in the No degree program, will be considered for transfer into the Certificate in General Studies program. A maximum of six term courses will be transferable for these students. Students who have withdrawn from an undergraduate degree program may apply for the Certificate in General Studies. Full time Certificate in General Studies enrollment will be considered by the Faculty of Arts and will only be approved in exceptional circumstances. Students wishing to be considered for full-time study MUST supply the Registrar’s Office with documentation clearly outlining how and why they are capable of full-time university level study. This documentation will include:

- Official transcripts (high school, GED, college, etc.)
- A resume
- Two (2) or more letter of support from employers/teachers who can clearly attest to how and why the student is capable of full-time academic study
- A personal statement by the student outlining in detail how and why they are capable of university-level full time study.

SECTION E: SAINT JOHN ACADEMIC PROGRAMS
COMMUNICATION STUDIES

General Information

The University of New Brunswick at Saint John offers a Bachelor of Arts in Communication Studies (COMS), a Double Major in COMS, and a Minor in COMS. The COMS program seeks to provide students with a comprehensive understanding of the social, political, economic and cultural impact of information and communication technologies and practices. As an interdisciplinary Arts program based in the tradition of the social sciences and humanities, the COMS approach combines theoretical, historical, empirical, and practical study, with an emphasis on emerging media of communication, information gathering and distribution. Course offerings are grouped into three primary areas: Media and Culture; Technology and Communication Practices; and Information Gathering, Governance and Policy. These areas of concentration, combined with the interdisciplinary organization of the program, provide students with broad exposure to a variety of perspectives in communication studies.

Major

Students are eligible to declare a COMS Major during the session in which they will complete 20 term-courses towards a Bachelor of Arts degree. To graduate with a Major in COMS, students must complete 15 term-courses (6 lower level/9 upper level) comprised of the following courses:

**Lower Level: 6 term-courses**

- COMS 1001 History of Communication
- COMS 1002 Foundations of Communication Studies
- COMS 2001 Transformations in Media
- SOCI 2251 Film and Society
- COMS 2102 Media Living: Media in Everyday Life

AND

One term-course selected from the following:

- COMS 2101 Popular Music, Culture and Communication
- COMS 2103 Understanding Comics and Manga

**Upper Level: 9 term-courses**

- COMS 3001 Theories of Communication
- COMS 3003 Electronic Research

OR an upper-level research methods course approved by the ICS Coordinator.

AND

1 term-course selected from the following:

- SOCI 4503 Research Seminar in Popular Culture, OR
- COMS 4001 Research Seminar in Communications Studies; OR
- COMS 4101 Advanced Topics in Communications Studies

4 term-courses of 3000/4000 electives from the “COMS-eligible” list [See NOTES 1 & 2]

No grade lower than a C in a COMS course or a COMS eligible elective will count for credit towards a Majors degree in COMS.

NOTES:

1. The list of current CS-eligible courses is updated annually, and is posted each spring on the COMS website: http://www.unb.ca/academics/programs/arts/information-and-communication-studies.html. Students seeking credit for courses not on this list must have written approval from the COMS Coordinator prior to enrolling in the course.

2. CS students are responsible for ensuring they have completed appropriate Prerequisites for their COMS-eligible electives.

**Double Major**

Students are eligible to declare a COMS Double Major during the session in which they will complete 20 term-courses towards a Bachelor of Arts degree. To graduate with a Double Major in COMS, students must complete 12 term-courses (5 lower level/7 upper level) comprised of the following courses:

**Lower Level: 5 term-courses**

- ICS 1002 Foundations of Communication Studies
- ICS 2001 Transformations in Media
- SOCI 2251 Film and Society
- COMS 2102 Media Living: Media in Everyday Life

AND

One term-course selected from the following:

- ICS 2101 Popular Music, Culture and Communication
- ICS 2103 Understanding Comics and Manga

**Upper Level: 7 term-courses**

- ICS 3001 Theories of Communication
- ICS 3003 Electronic Research

OR an upper-level research methods course approved by the ICS Coordinator.

AND

1 term-course selected from the following:

- SOCI 4503 Research Seminar in Popular Culture, OR
- COMS 4001 Research Seminar in Communications Studies; OR
- COMS 4101 Advanced Topics in Communications Studies

4 term-courses of 3000/4000 electives from the “COMS-eligible” list [See NOTES 1 & 2]

No grade lower than a C in a COMS course or a COMS eligible elective will count for credit towards a Double Major in COMS.

**Minor**

Students are eligible to declare a CS Minor during the session in which they will complete 20 term-courses towards a Bachelor of Arts degree. To graduate with a Minor in COMS, students must complete 8 term-courses (5 lower level/3 upper level) comprised of the following courses:

**Lower Level: 5 term-courses**

- COMS 1002 Foundations of Communication Studies
- COMS 2001 Transformations in Media
- SOCI 2251 Film and Society
- COMS 2102 Media Living: Media in Everyday Life

AND

One term-course selected from the following:

- COMS 2101 Popular Music, Culture and Communication
- COMS 2103 Understanding Comics and Manga

**Upper Level: 3 term-courses**

- COMS 3001 Theories of Communication
- COMS 3003 Electronic Research

OR an upper-level research methods course approved by the ICS Coordinator.

AND

1 term-course selected from the following:

- COMS 2101 Popular Music, Culture and Communication
- COMS 2103 Understanding Comics and Manga

**Comparative Literature**

**Minor in Comparative Literature**

The minor in Comparative Literature will require WLIT 2501 and WLIT 2502; in addition, students must complete 2 term-courses from group A and 4 term-courses at the upper level from group B for a total of 8 term-courses.
A grade of C or better is required in all courses for successful completion of the minor.

Required:
- WJIT 2501 The Western Literary Tradition (3 ch)
- WJIT 2502 The Non-Western Literary Tradition (3 ch)

**Group A: (choose 2 term-courses)**
- FR 1203 Communicating in French I (3 ch)
- FR 1204 Communicating in French II (3 ch)
- FR 1304 French for Immersion Students I (3 ch)
- FR 2203 Communicating in French III (3 ch)
- FR 2204 Communicating in French IV (3 ch)
- FR 2304 French for Immersion Students II (3 ch)
- GER 1003 Basic German (3 ch)
- GER 1004 Improving Basic German (3 ch)
- SPAN 1203 Introductory Spanish I (3 ch)
- SPAN 1204 Introductory Spanish II (3 ch)
- SPAN 2203 Intermediate Spanish I (3 ch)
- SPAN 2204 Intermediate Spanish II (3 ch)

**Group B: (choose 4 term-courses)**

**NOTE:** Students may not take more than 2 term-courses from the discipline of the Majors or Honours program in which they are enrolled. Courses will not be double counted.

- WJIT 3314 European Romanticism (3 ch)
- WJIT 3315 Nineteenth-Century Literature (3 ch)
- WJIT 3725 Literature and/as Philosophy (3 ch)
- WJIT 3901 Studies in Comparative Literature (3 ch)
- ENGL 3601 Literary Theory (3 ch)
- ENGL 3705 Literature of West Indies, Africa and India (3 ch)
- ENGL 3812 Postmodern Literature (3 ch)
- ENGL 3903 Development of Western Drama (3 ch)
- FR 3514 Communication and Literary Form (3 ch)
- FR 3524 Contemporary French African and Caribbean Literature (3 ch)
- FR 3614 18th C French Authors (3 ch)
- FR 3615 19th C French Authors (3 ch)
- FR 3616 20th C French Authors (3 ch)
- FR 3704 Aspects of World Francophone Culture (3 ch)
- FR 3734 Language of Cinema and Literature (3 ch)
- FR 4514 Special Topic in French Literature (3 ch)
- FR 4524 Literary Criticism in French (3 ch)
- PHIL 3075 Philosophies of Art (3 ch)
- PHIL 3110 Contemporary Philosophy (6 ch)
- SPAN 3007 Fundamentals of Spanish Language and Culture (3 ch)
- SPAN 3974 Contemporary Spanish-American Prose Fiction (3 ch)

**CRIMINAL JUSTICE MINOR**

The Criminal Justice interdisciplinary minor provides an academic opportunity for systematic study in the fields related to criminology, penology and criminal justice.

**Eligibility**

Admission to the Criminal Justice Minor is open to students who are majoring in either Sociology or Psychology. Students from other disciplines may take the minor, but must meet all program requirements and associated Prerequisites. Students must select the Minor in consultation with a Faculty Advisor and this should normally be done at the same time as they declare a Major.

**Program of Study**

The Minor program in Criminal Justice shall consist of at least eight term-courses of instruction. The four term-courses listed below are mandatory. A minimum grade of C+ is necessary in the mandatory courses to qualify for the Minor. Prerequisites are noted in brackets.

**Mandatory Courses**

- PSYC 3263 (3 ch) Psychology of Criminological Behaviour (PSYC 1003, PSYC 1004)
- PSYC 4233 (3 ch) Programme Evaluation (PSYC 2102 and, PSYC 2901, Sociology Majors may take SOCI 3104 in lieu of PSYC 2901)

**SECTION E: SAINT JOHN ACADEMIC PROGRAMS**

- STAT 2611 (3 ch) Anti-Criminology (SOCI 1001)
- SOCI 3614 (3 ch) Anti-Criminology (SOCI 2611, and another two-term courses of lower level SOCI)

**Elective Courses**

Students must choose the remaining four term-courses from the following courses. Prerequisites are noted in brackets, but students should note that some prerequisite courses also have their own Prerequisites that are not noted here. A minimum grade of C in these electives is required for them to count towards the Minor.

- BA 3557 (3 ch) The Management of Planned Change (BA 2504)
- ECON 1004 (3 ch) Economics & Society (no prerequisite)
- HIST 4337 (3 ch) Alcohol, Drugs & Tobacco in North America (completion of 20 term-courses in any discipline, and at least two term-courses in HIST)
- HIST 4371 (3 ch) Murder in Canada: A Social and Legal History (completion of 20 term-courses in any discipline, and at least two term-courses in HIST)
- HIST 4377 (3 ch) Social History of Crime in Canada (completion of 20 term-courses in any discipline, and at least two term-courses in HIST)
- HIST 4381 (3 ch) The Family and the State of North America (completion of 20 term-courses in any discipline, and at least two term-courses in HIST)
- HIST 4383 (3 ch) Police and Society in North America (completion of 20 term-courses in any discipline, and at least two term-courses in HIST)
- HIST 4386 (3 ch) Canadian Criminal Justice System (completion of 20 term-courses in any discipline, and at least two term-courses in HIST)
- PHIL 2003 (3 ch) Introduction to Moral, Social and Political Philosophy (no prerequisite)
- PHIL 3124 (3 ch) Contemporary Moral Problems (no prerequisite)
- PHIL 3153 (3 ch) Business Ethics (one term course in PHIL or permission of the instructor)
- POLS 1201 (3 ch) Canadian Politics (no prerequisite)
- POLS 3222 (3 ch) Canadian Political Issues II (POLS 1201)
- POLS 3683 (3 ch) Human Rights (POLS 1301 and/or POLS 2601)
- POLS 4311 Indigenous Rights and Reconciliation
- POLS 4311 (3 ch) Special Topics in Comparative Politics (see note 3)
- POLS 4655: Drugs, Violence, and Global Politics (POLS 1301 or POLS 2601)
- PSYC 3265 (3 ch) Forensic Psychology (PSYC 1003, PSYC 1004)
- PSYC 4313 (3 ch) Introduction to Psychological Testing (PSYC 1003, PSYC 1004, PSYC 2102)
- PSYC 3493 (3 ch) Changing Behaviour (PSYC 1003, PSYC 1004)
- PSYC 3553 (3 ch) Psychopathology (PSYC 1003, PSYC 1004)
- PSYC 3752 (3 ch) Drugs and Behaviours (PSYC 1003, PSYC 1004)
- PSYC 4263 (3 ch) Field Placement in Community Corrections I (PSYC 1003, PSYC 1004, PSYC 2623, PSYC 3493, and SOCI 2611, SOCI 3614; minimum CGPA of B)
- PSYC 4264 (3 ch) Field Placement in Community Corrections II (PSYC 1003, PSYC 1004, PSYC 2623, PSYC 3493, PSYC 4263, and SOCI 2611, SOCI 3614; minimum CGPA of B)
- PSYC 4813 (3 ch) Substance Use Disorders (PSYC 2102 and one of PSYC 4833 or PSYC 3752)
- SOCI 2603 (3 ch) Sociology of Deviance (Fredericton Campus) (SOCI 1001)

**NOTE 1:** Mandatory and elective courses taken for the Minor in Criminal Justice cannot be counted towards other program requirements. However, Prerequisites taken to be eligible for the mandatory and elective courses may be counted towards other programs.

**NOTE 2:** Upper level students interested in taking eligible History courses towards the minor, but who do not meet the Prerequisites, may consult with the individual course instructor to request permission to register for the course.

**NOTE 3:** Students who are not majoring or honouring in Political Science will be admitted to a 4000 level POLS course only if they have completed six term-courses in POLS and have consulted with the instructor.

**ECONOMICS**

**Honours, Major and Minor**

**NOTE:** To satisfy the degree requirements of an Honours, Major, double major or Minor in Economics, a grade of C or better, unless otherwise noted, must be earned in all Economics courses, and in all approved substitutes.

**Honours**
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

Intent
The BA in Economics Honours is designed to prepare a student to work or study as an Economist. Students interested in pursuing graduate programs in Economics are strongly urged to complete an Honours program in Economics.

Requirements
A minimum of 20 term-courses in Economics are required to obtain an Honours designation. To remain in the program, students must maintain a GPA of 3.0 in ECON (or approved substitute courses). Furthermore, to remain in the Honours program, students must receive no less than a B- in the required term-courses beyond the 1000-level as listed below.

A High Honours degree will be awarded to those students graduating with a GPA of 3.7 (A-) or greater averaged over ECON term-courses (excluding ECON 1013, ECON 1023 and STAT 1793). For an Honours; a GPA of 3.0 is required in these term-courses.

**Required Courses**

<table>
<thead>
<tr>

</tbody>
</table>

Students in this program are required to pass MATH 1003 and MATH 1013 with a grade of C or better, but these term-courses do not count towards the 20 term-courses in Economics.

**Electives**
The remaining 8 term-courses in Economics electives will normally be taken in the Economics discipline, but up to 3 discipline-approved term-courses may be substituted for non-compulsory Economics electives (see the Economics coordinator for a list). A grade of C or better must be earned in each of these 8 term courses.

**Major**

**Intent**
The BA in Economics Major Option is designed to give students working knowledge of Economics and prepare them to work in business or in a policy-making environment. Students interested in pursuing graduate programs in Economics are strongly urged to complete an Honours program in Economics.

**Requirements**
A total of 16 term-courses in Economics are required to obtain a Major designation. A grade of C or better must be earned in each of the 16 term-courses required to complete the Majors Program. **NOTE:** Student must obtain at least a B- in ECON 2013 and ECON 2023 in order to stay in the program.

**Required Courses**

</tbody>
</table>

Students in this program are required to pass MATH 1003 (or MATH 1853 and MATH 2853 as substitute) with a grade of C or better, but this does not count in the 16 term-courses in Economics.

**Double Majors**

A total of 14 term-courses in Economics are required to complete a double majors in Economics. Of these, 8 term-courses are the same as those needed to complete the Major (including the Math requirements), with 6 term-courses of Economics electives. Up to 3 discipline-approved term-courses may be substituted for non-compulsory Economics electives (see the Economics coordinator for a list). A grade of C or better is mandatory in all 14 term-courses needed to satisfy the double major requirement. **NOTE:** Students must obtain at least a B- in ECON 2013 and ECON 2023 in order to stay in the program.

**Minor**

**Intent**
The BA in Economics Minor is designed to give students knowledge of the basic issues in economics so they can make more informed choices in their work and private lives.

**Requirements**
A total of 8 term-courses in Economics are required to obtain a Minor Designation. A grade of C or better is mandatory in all 8 term-courses needed to satisfy the minor requirement.

**Required Courses**

<table>

</tr>
</tbody>
</table>

**Electives**
The remaining 4 term-courses in Economics electives must be taken in the Economics Discipline. Of these 4 term-courses, at least 2 must be at the 3000-level or above. A grade of C or better is required in each of these courses.

**Certificate in Economics**
This certificate is a stand-alone program intended for visiting international students and for members of the community interested in economics. It will not be awarded to a student enrolled in a degree program, but students who have withdrawn from an undergraduate degree program may apply. A maximum of 50% of required credits may be transferred from another degree, certificate, or similar program, whether taken at UNB or elsewhere.

The Certificate requires completion of 8 term-courses including ECON 1013, ECON 2013, ECON 2023, plus an additional four courses in Economics at or above the 2000 level. To earn a Certificate, a student must achieve a grade of at least a C in all specifically required courses, and achieve a cumulative grade point average of at least 2.0. While no specific Prerequisites are required for admission to this Certificate program, a background in high school mathematics is strongly recommended.

**Certificate in Financial Markets**
The Certificate requires completion of at least 8 term-courses including BA 1216, ECON 1013, ECON 1023, ECON 2013, ECON 2023, ECON 2103, ECON 3114, plus one additional course in Business or Economics which is in Accounting, Finance, or International/Macro Economics.

To earn a Certificate, a student must achieve a grade of at least a C in all specifically required courses, and achieve a cumulative grade point average of at least 2.0. While no specific Prerequisites are required for admission to this Certificate program, a background in high school mathematics is strongly recommended.

Statement of Purpose

The Education Program prepares students to assume leadership roles in education. Graduates are ready to begin a professional career and to broaden and deepen their professional expertise through continuing study. Students acquire the knowledge, ethical standards, skills, dispositions, and flexibility needed to address current problems in education both creatively and effectively, and to think critically about professional practice. In all its work, the Program seeks to prepare educators who understand the past, delight in the challenges of the present, and look optimistically to the future.

Degrees in Education

The BA/BEd degree is awarded upon successful completion of 56 term courses, of which 20 term-courses are designated in Education. Students who have completed courses at another University may apply to transfer into a concurrent degree program. A minimum of half of the BA and half of the BEd must be completed at UNB.

General Information

1. Applicants may obtain information or application forms from the Admissions/Registrar’s Office, UNB Saint John, PO Box 5050, Saint John, NB E2L 4L5 or by telephoning (506) 648-5270. Applicants are also encouraged to consult UNB’s Internet home-page; http://www.unb.ca - for up-to-date developments, including an on-line application.

2. A student applying for entrance to the University of New Brunswick Saint John (UNBSJ) must complete an application form and forward it to the Admissions/Registrar’s Office together with the applicable application processing fee. A non-refundable tuition confirmation deposit will be required from all applications on acceptance.

3. The final date for program application, including provision of required supporting documentation, will be January 31st annually. Applications received after that date may be considered, provided that space is available, but late applicants are cautioned their applications will not be processed until the earlier applications are dealt with, and that they may not necessarily be accepted.

4. Meeting the minimum requirements does not guarantee admission to any program.

5. Students will normally follow the Calendar Regulations for the year of their admission.

All students wishing to follow degree credit programs in Education must obtain permission to enroll from the Admissions Office of the University. Students will normally only be accepted into the Program in September. Please refer to Section B of this calendar for more information on Admission requirements. Those wishing to follow a graduate studies program should write the Dean of the School of Graduate Studies.

Students may take some courses for teacher certification credit without being formally admitted to a degree program. However no degree credit will be granted for any course until formal admission to the Program has been completed after that date may be considered, provided that space is available, but late applicants are cautioned their applications will not be processed until the earlier applications are dealt with, and that they may not necessarily be accepted.

5. Meeting the minimum requirements does not guarantee admission to any program.

Students wishing to follow degree credit programs in Education must obtain permission to enroll from the Admissions Office of the University. Students will normally only be accepted into the Program in September. Please refer to Section B of this calendar for more information on Admission requirements. Those wishing to follow a graduate studies program should write the Dean of the School of Graduate Studies.

Students may take some courses for teacher certification credit without being formally admitted to a degree program. However no degree credit will be granted for any course until formal admission to the Program has been granted. Courses taken before formal admission will not necessarily be accepted for degree credit. Graduates of the BEd program are pursuing careers in education in many jurisdictions in Canada, the United States, and in other parts of the world. Students who successfully complete the school years pattern program requirements, including the internship, are eligible to apply for a New Brunswick teacher’s license. This license is recognized by other Canadian Provinces and most US states. Nevertheless, students should ensure that the specific programs they are following will qualify them for teacher certification in the province, state or country where they hope to work.

NOTE: The Province of New Brunswick Teacher Certification Regulations under the Education Act states that only Canadian citizens or those holding landed immigrant status or a work visa are eligible for teacher certification in the Province of New Brunswick.

Concurrent Program

NOTE: Although students may be admitted to the Concurrent (BA/BEd) after completing only 10 term-courses of undergraduate studies, they must fulfill one of the following requirements before the BEd will be awarded.

a. In the Early Years program, students must complete at least 10 term-courses of teachable content. These 10 term-courses must include at least one term-course in each of the following: English, Math, Science (Biology, Chemistry, Physics, Earth Science, Environmental Science, Geology, or another approved science course), and Social Studies (Economics, Geography, History, Politics), for a minimum of 4 term-courses. The remaining 6 term-courses may be from any one or a combination of teachable subjects. The mathematics requirement must be a course with a MATH prefix and statistics is not accepted to meet this requirement. However, this requirement may be satisfied by taking MATH 2633.

To be admitted to courses in French second language education, students must possess a high level of French competency. Students must provide evidence of this competency through a French oral proficiency certificate with a minimum level of Advanced from the New Brunswick Department of Training and Employment.

The New Brunswick Department of Education requires that all BEd students entering schools (for field studies or individual course requirements), must provide evidence of a Police Background Check. Students are responsible, at their own expense, to have evidence of the Police Background Check available to present to school officials.

Costs

In addition to those costs listed in Section C of this Calendar, students are responsible for all travel and accommodation costs related to the required student teaching experiences throughout their entire concurrent BEd program.

The Education Program may make arrangements at a limited number of faculty approved locations for students seeking an out-of-province internship. Students undertaking out-of-province placements will be assessed an out-of-province intern differential fee.

University Regulations

Students are urged to read the General University Regulations, Section B of this Calendar, and in particular the subsection headed Grading System and Classification.

Any point not covered in the following regulations will be governed by the General University Regulations. Students applying for a second undergraduate bachelor’s degree, transferring from other institutions, or changing degree programs are particularly advised to consult Section B of this Calendar. Questions concerning the application of regulations should be directed to the Registrar in writing.

General Regulations

Student Standing

Letter grades are assigned in accordance with University regulations.

a. A grade of C shall meet the requirements for Bachelor of Education courses unless otherwise stated in the Calendar.

b. In course offerings of other Faculties/Departments, students must meet the prerequisite requirements of that Faculty/Department.

c. A grade of C shall be the minimum acceptable grade in courses taken to meet requirements for the Bachelor of Education degree.

d. A BEd degree shall be awarded to a student who successfully completes the approved courses indicated in the program outlined. In addition, students must successfully complete the 15-week Internship.

e. A CGPA of 2.7 must be maintained to remain in the program.

Credit Hours

a. The normal course load for a concurrent BEd student (full-time) is 12 term-courses per academic year.

b. Students may take up to 3 term-courses in Spring Session. Students may take up to 3 term-courses summer session.

c. Once admitted to the concurrent degree program a full-time student must strive to maintain an appropriate balance of Education and other-faculty courses, normally no fewer than 3 term-courses per academic year in either faculty.

Standing and Promotion Requirements

Per University Regulations (see Section B of the Calendar).
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

Divisions and Distinctions
a. BEd degrees are awarded in divisions as stated in the University Regulations.
b. A student in the BEd program having a minimum cumulative grade point average of 3.8 in Education (ED) courses, and no grade below C, and whose Internship is deemed satisfactory for this degree by the Dean of Arts after consultation with the faculty member(s) who supervised the student's Internship, shall be awarded the BEd degree with Distinction.

Repeating Courses
Per University Regulations (see Section B of the Calendar).

Pre-Internships and Internship (Student Teaching)
The Education Program places students in school settings subject to approval by the University and in cooperation with the public school system.

a. In order to complete the BEd degree with a recommendation for New Brunswick Teacher Certification, a student must successfully complete both Pre-Internship I & II (ED 4003 and ED 4004) and the Internship (ED 5040) required in the program. The second one week placement (ED 4004) will take place at the end of the last Winter term before the individual's internship; the first one week placement (ED 4003) will take place at the end of the Winter term. The Pre-Internships and Internship are evaluated on a pass/fail basis. If an intern is removed from ED 5040 by the Faculty of Arts, a grade of NCR will be assigned.

b. During their Internship, students participating in teaching and learning activities in an educational setting approved by the faculty, Responsibility for arranging and approving student teaching placements and Internship rests within the Education Program Coordinator.

c. Before entering the 15 week Internship, Prerequisites must be met (see course: ED 5040).

d. With the approval of the Dean of Arts, courses other than the Internship may be taken to meet degree requirements provided the student authorizes the Dean in writing to recommend to the provincial licensing authorities that a New Brunswick Teacher's License not be granted to the student upon completion of the BEd program. Any later request for registration in the Internship must be submitted in writing to the Education Coordinator. In such cases there is no obligation on the part of the Program to place the student in an internship at a later date.

e. Students are responsible for all travel and living expenses incurred.

f. Re-registration
i. Students who have withdrawn from the Internship must establish that the factors necessitating withdrawal have changed and that there is reason to assume that a further attempt would be successful. The request for re-registration must be submitted in writing and must satisfy the Dean of Arts. Any later requests for registration in the Field Studies Internship must be submitted in writing to the Dean of Arts. In such cases there is no obligation on the part of the Program to place the student in an internship.

ii. Students who have failed the Internship (that is, received a grade of NCR) must establish that the factors causing the failure have changed and that there is reason to assume that a further attempt would be successful. Following failure, students will not be permitted to re-register for the practicum until at least one full academic year has elapsed. The request for re-registration must be submitted in writing and must satisfy the Dean of Arts. In such cases there is no obligation on the part of the Program to place the student in an internship.

g. Students who apply for the Internship within 3 years of having completed the requirements of the BEd portion of their degree normally will be allowed to register for the Internship without taking any further courses. If more than 3 years has elapsed, the Coordinator may require specific courses (in subject areas and methodology) to be taken prior to registration in the Internship.

h. Students wishing to be placed in an ESL or French Immersion classroom for their Internship must have completed a minimum of 3 term-courses in second language education.

i. Any appeal with regard to the final grade or the decision of the Faculty to remove a failing student in the Internship will be considered by the Faculty of Arts and the Education Coordinator. A student may choose a Faculty member to represent her/him on the committee. (See also Section B. VIII. Item H: Review of Grades)

NOTE: Consistent with the New Brunswick Department of Education's "Policy 701 on Pupil Protection," students planning to complete a teaching internship will be required to provide a background check, (choose options # 3 and # 4 "indirect check" on the Consent for Disclosure of Criminal Record Information Form). Students must also provide letters of reference attesting to their suitability to work with pupils in the public school system.

Residency Requirements
Students must complete the Internship at the University of New Brunswick. Of the 20 term-courses required for completion of the degree, a minimum of 8 term-courses must be completed at the University of New Brunswick as students in the BEd degree program.

Time Limit
The maximum time permitted between the first registration and the completion of the Concurrent BEd degree in accordance with the regulations in effect at the time of first registration shall normally be 10 years.

Course Selection
Students should consult with the Education Coordinator to confirm that all courses meet degree requirements. Students in a school years program may not take more than 1 term-course of Education courses outside the school years program i.e. ABRG, FNAT, or Adult Education.

Transfer Credits
Students may obtain advanced credit of up to 7 term-courses toward the BEd for education courses which have been taken at this or another institution, where the grade received is 'C' or higher, and which meet program requirements.

Admission Procedures
1. Students apply for entry to the Bachelor of Arts degree program upon completion of their high school program.
2. Students should apply to the Education Program for admission to the Concurrent Program before January 31 of their first year in the BA program. Upon successful completion of 10 term courses and meeting other admission criteria (GPA of at least 2.7), they may be admitted to the Concurrent Program.
3. Admission requires the submission of the following supplemental forms, available from the Education Program Office:
   a. Personal Statement of Intent;
   b. Profile/Personal Interest;
   c. Two letters of reference.

Concurrent BAE/Ed
Program Requirements (58 term-courses)
1. 20 term-courses from the Faculty of Education.
2. 40 term-courses approved by the Faculty of Arts of which 4 term-courses of specified Education credits may be used as Arts electives.
3. A student cannot obtain a BEd degree by itself in this program. A student cannot obtain a BA degree by itself in this program. If a student decides to leave the Concurrent Program, only those Education courses eligible as Arts electives may be transferred to the BA program.

Concurrent BEd courses offered at UNBSJ over a 4-year cycle:
ED 3021, ED 3031, ED 3041, ED 3051, ED 3063, ED 3211, ED 3241, ED 3424, ED 3475, ED 3511, ED 3561, ED 3621, ED 4003, ED 4004, ED 4164, ED 4353, ED 4354, ED 4562, ED 5032, ED 5040, ED 5091, ED 5175, ED 5569, ED 5796, ED 6005

NOTE: Only the early year's option of the Concurrent BEd is offered to full-time students on the Saint John Campus of UNB. For more details of other options, refer to Section G of this Calendar, Fredericton Academic Programs.

CORE (Required) COURSES - 6 term-courses:
ED 3021 Human Development and Learning
ED 3031 Education of Exceptional Learners
ED 3041 Theory & Practice of Education
ED 3051 School Law & Organization
ED 4164 Techniques of Teaching
ED 5032 Inclusion from the Early Years

METHOD (Required) COURSES - 7 term-courses
ED 3211 Introduction to Visual Education
ED 3241 Music for Classroom Teaching
ED 3424 Teaching Mathematics in the Elementary School
ED 3474 Health & Movement Education in the Elementary School
ED 3511 Introduction to Science Education
ED 3621 Introduction to Social Studies
ED 4354 Literacy Learning in Early Years

Elective Courses - 2 term-courses
Field Studies- equivalent to 5 term-courses
ED 4003 Field Experience I
ED 4004 Field Experience II
ED 5040 Internship for Concurrent Education

Certificate in Mathematics for Education

The Certificate in Mathematics for Education is open to all interested students, however it is primarily intended for current and future school teachers for whom mathematics is a potential teachable subject, or ones who simply wish to expand their knowledge in the field of mathematics. This Certificate can be taken as a stand-alone program or in conjunction with a degree program, with the approval of the appropriate faculty. Candidates for admission to the Certificate must meet the University’s requirements for admission to any of the faculties, or the requirements for admission as mature students. The Certificate consists of 30 credit hours (10 courses) as outlined below. A grade of C or better is required in each of the courses.

Mathematics Requirement:

MATH 2633 Fundamental Principles of Elementary School Mathematics
MATH 3633 Fundamental Principles of School Mathematics
MATH 1003 Introduction to Calculus I
MATH 1013 Introduction to Calculus II
MATH 1503 Introduction to Linear Algebra** (or equivalent)
MATH 3093 Elementary Number Theory

Statistic Requirement:

STAT 1793 Introduction to Applied Statistics (or equivalent)

Education Requirement:

ED 3424 Teaching Elementary School Mathematics

Additional Requirement:

1. One of MATH 2203 or MATH 3343;
2. Three credit hours in Mathematics, Statistics, or Computer Science, chosen in consultation with the Department of Mathematical Sciences; BA 3623 or ECON 3665 may be accepted as substitutions.

NOTES:

* Students who do not have the Prerequisites for this course are required to pass MATH 1863 before enrolling in Math 1003.
** This course involves the use of MATLAB (a software package for Mathematical simulation).

Certificate in Teaching English as a Second Language (TESL)

Program Description

The program is designed for three groups:

1. English speakers who have completed an undergraduate degree and are seeking employment in TESL.
2. International students who have completed an undergraduate degree, have an acceptable standard of English, and wish to receive TESL certification in an English-speaking environment.
3. Native English speakers who want to obtain a TESL certificate while pursuing an undergraduate degree.

The Certificate in Teaching English as a Second Language (CTESL) Program is a 3 term-course program designed to provide participants with the knowledge and skills necessary to become effective teachers of English as a second language (ESL). The CTESL Program requires successful completion of:

A. Three compulsory courses:

1. ED 3561 - Introduction to Second Language Education (3 ch) - An overview of the theories of learning and teaching in the Second Language context with particular emphasis on a Communicative, multi-dimensional and multi-resource methodology. (ED 4565 can be taken in place of ED 3561 but students cannot count both towards the TESL certificate.) Prerequisite: successful completion of 10 term-courses with a GPA of 2.7 or better, advanced written and spoken English language skills.

2. ED 4562 - Advanced Studies in ESL Education (3 ch) - Examines communicative language teaching in the context of classrooms. Emphasizes varied teaching methods, curriculum development, and evaluation of second language learning. Prerequisite: successful completion of 10 term-courses with a GPA of 2.7 or better, as well as ED 3561 or ED 4565. Co- or Prerequisites: LING 2101 or equivalent (3 ch).

3. ED 4563 - Field Experience in TESL (3 ch) - Supervised field experience for students in an environment in which they can both observe qualified instructors and participate in planning and teaching English as a second or additional language. (The course does not qualify for the 4 term-courses of ED courses which may be applied to the BA degree.) Prerequisites: successful completion of 10 term-courses with a GPA of 2.7 or better, as well as ED 3561 or ED 4565. Co- or Prerequisites: LING 2101 or equivalent (3 ch).

B. 6 ch of approved Arts and/or Education courses in the area of language education. LING 2101 - Linguistics I and LING 3202 - Linguistics II, are highly recommended. English, Humanities and/or foreign language course which emphasize grammar and syntax. Or literacy methodology courses in Education, may also qualify.

Eligibility

Candidates seeking admission to the Certificate in Teaching English as a Second Language must have completed 30 ch hours at a recognized post-secondary institution with a minimum cumulative grade point average of 2.7 (B-). They must be able to demonstrate an advanced level of written and spoken English. The Faculty of Arts reserves the right to test oral and written proficiency in English.

For more information, please contact the Education Coordinator or the Education Secretary in the Faculty of Arts (506) 484-5590.

BA Cooperative Education [Co-Op] Option

The Curriculum

The Faculty of Arts offers a Cooperative Education [Co-Op] Option within the BA program. While the program is designed to be completed in four years, students may take longer to complete the program. Students must major in one discipline or double major in two disciplines while participating in the Co-Op option. Consistent with the philosophy of co-operative education, the program is designed to alternate study terms and relevant work terms, as follows:

Co-Op Program Academic/Work Term Sequence

<table>
<thead>
<tr>
<th>Year</th>
<th>Academic Term 1</th>
<th>Academic Term 2</th>
<th>Student Apply to Co-Op Program (deadline June 30th annually)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Year 1</td>
<td>Academic Term 1</td>
<td>Academic Term 2</td>
<td>Student Apply to Co-Op Program (deadline June 30th annually)</td>
</tr>
<tr>
<td>Year 2</td>
<td>Work Term 3</td>
<td>Work Term 1</td>
<td>Work Term 2</td>
</tr>
<tr>
<td>Year 3</td>
<td>Academic Term 4</td>
<td>Academic Term 5</td>
<td>Work Term 3</td>
</tr>
<tr>
<td>Year 4</td>
<td>Academic Term 6</td>
<td>Academic Term 7</td>
<td></td>
</tr>
</tbody>
</table>

Every co-op student shall complete three work terms during their undergraduate degree. The co-op program considers students full-time if they are enrolled in at least 4 term-courses, not including work term reports: ARTS 2903, ARTS 3903, and ARTS 4903.

NOTES:

The sequence of academic terms and work terms outlined is not flexible. Only in unusual circumstances will the Dean or designated Program Director/Coordinator approve deviation from the regular sequence.

If students’ course selections deviate from the schedule above they are responsible for obtaining academic advising from the Faculty of Arts Student Coordinator or their Faculty Advisor(s) for their major or double majors. Students are responsible for their own academic planning and course selection.

Each work term is normally 12 to 16 weeks in duration.

Admission:

Students apply for the Co-op program at the end of the second term of their first year of full-time study (completion of at least 8 term-courses). Entrance to the Co-op program is a five-step process, as follows:

1. Academic Achievement - Obtain a B- (2.7) cumulative average or higher by the end of the second term of their first year of full-time study to be eligible for the entry-level Professional Development Workshop Series.
2. Program Selection - Students must be chosen from those applying to the BA Co-op program to be admitted into the program. The application deadline will be June 30th of the students’ first year. Only a limited number of spaces are available in the program in any given year. Notification of students’ acceptance to the program will be given in mid- to late July.
3. Professional Development - Successfully complete all required elements of the entry-level professional development seminars (PDSs).
4. Mock Job Interview - Participate in and pass a mock job interview.
5. The Job Competition - Obtain a position for Work Term One.

Students who are unsuccessful in any one of the five steps will remain in the traditional BA program. To remain eligible for each Co-op work term, students must attend and complete assignments for all mandatory professional development seminars in the academic terms offered.
Honours Coordinator. These courses may count for area coverage; the upper level courses designated as advanced seminars (ENGL 4803, ENGL 4804). Literary Theory (ENGL 3801) is strongly recommended for students intending to pursue graduate study. In addition, such students are advised to study a second language. Electives may be chosen from any of the above areas and from the following list: ENGL 3621, ENGL 3622, ENGL 3631, ENGL 3705, ENGL 3706, ENGL 3709, ENGL 3713, ENGL 3721, ENGL 3722, ENGL 3801, ENGL 3802, ENGL 3803, ENGL 3812, ENGL 3903, ENGL 3922, ENGL 4803, and ENGL 4804. Up to two approved upper level term-courses (See Honours Coordinator) in literatures other than English may be substituted for up to two English electives.

For first-class honours, a minimum grade point average of 3.6 is required in English courses. For second-class honours, a minimum grade point average of 3.3 is required in these courses. Averages are calculated on the basis of the minimum number of courses required in the programme; courses successfully completed above this minimum are treated as “non-required” courses.

Courses

ENGL 4801: Honours Essay: Reading and Research: This course is devoted to the research portion of the honours project. ENGL 4802: Honours Essay: Upon successful completion of ENGL 4801, an honours essay will be written and presented. Students wishing to take ENGL 4802 are required to consult with the Honours Coordinator in the winter term prior to the fall enrolment in ENGL 4801. Supervisors will be assigned by the members of the English discipline.

- Honours Worksheet

Joint Honours Program - English and History

Students interested in pursuing a joint Honours Program in English and History must apply in writing to either the Honours Coordinator of English or the Coordinator of History. To satisfy the English requirements for the joint honours degree, students must complete 4 term-courses of lower level English, 2 of which must be ENGL 2101 and ENGL 2102, and a minimum of ten upper level term-courses in English. At the upper level, a minimum of 3 term-courses is required in each of the following two groups, for a total of 6 term-courses:

- Pre-1800 (ENGL 3007, ENGL 3008, ENGL 3105, ENGL 3106, ENGL 3107, ENGL 3108, ENGL 3109, ENGL 3203, ENGL 3204, or ENGL 3205)
- Post-1800 (ENGL 3301, ENGL 3302, ENGL 3303, ENGL 3304, ENGL 3311, ENGL 3312, ENGL 3313, ENGL 3314, ENGL 3401, ENGL 3402, ENGL 3403, ENGL 3404, ENGL 3405, ENGL 3501, ENGL 3502, ENGL 3504, ENGL 3505, ENGL 3506, ENGL 3508, ENGL 3509, ENGL 3511, ENGL 3512, ENGL 3513, ENGL 3514, or ENGL 3515)

Electives may be chosen from both of the above groups, and from the following list: ENGL 3601, ENGL 3621, ENGL 3622, ENGL 3631, ENGL 3705, ENGL 3706, ENGL 3709, ENGL 3713, ENGL 3722, ENGL 3801, ENGL 3802, ENGL 3803, ENGL 3812, ENGL 3903, ENGL 3922, ENGL 4803, and ENGL 4804. Literary Theory (ENGL 3601) is strongly recommended for students intending to pursue graduate study. In addition, such students are advised to study a second language. Students must complete HENG 4000, a 2 term-course. Once the student has decided whether the primary emphasis will be on English or History, the supervisors will be assigned from the two disciplines. Credit for the thesis (HENG 4000) will be assigned to the discipline receiving the primary emphasis.

To satisfy the History requirements for the joint honours degree, students must complete 2 lower level term-courses in History and 10 upper level History term-courses, of which 2 term-courses will be an Honours Seminar.
Major

Students are eligible to declare a major once they have completed twenty term-courses. Students will design their program in consultation with the Majors Coordinator.

A single Major in English will consist of at least fourteen term-courses in English, at least 10 term-courses must be at the upper level and a minimum of 4 term-courses of lower level English (including ENGL 2101 and ENGL 2102). A minimum of 3 term-courses are required from each of the following two groups, for a total of 6 term-courses:

a. Pre-1800 (ENGL 3004, ENGL 3007, ENGL 3008, ENGL 3105, ENGL 3106, ENGL 3107, ENGL 3108, ENGL 3109, ENGL 3203, ENGL 3204, or ENGL 3205)

b. Post-1800 (ENGL 3301, ENGL 3302, ENGL 3303, ENGL 3304, ENGL 3311, ENGL 3312, ENGL 3313, ENGL 3314, ENGL 3401, ENGL 3402, ENGL 3403, ENGL 3404, ENGL 3405, ENGL 3501, ENGL 3502, ENGL 3504, ENGL 3505, ENGL 3506, ENGL 3508, ENGL 3509, ENGL 3511, ENGL 3512, ENGL 3513, ENGL 3514, or ENGL 3515)

Electives may be chosen from both of these groups, as well as from the following list: ENGL 3601, ENGL 3602, ENGL 3621, ENGL 3622, ENGL 3631, ENGL 3705, ENGL 3706, ENGL 3709, ENGL 3713, ENGL 3721, ENGL 3722, ENGL 3751, ENGL 3801, ENGL 3802, ENGL 3803, ENGL 3808, ENGL 3812, ENGL 3903, ENGL 3922, ENGL 4803, and ENGL 4804. Up to two approved upper level term-courses (See Major’s Coordinator) in literatures other than English may be substituted for up to two English electives.

An English course will count toward the fulfillment of the Major requirements only when it is passed with a grade of C or above.

A Double Major including English will consist of a minimum of 10 term-courses in English, at least 7 of which must be at the upper level including at least 2 term-courses from each of the two groups listed above. Lower-level courses must include ENGL 2101 and ENGL 2102.

English Major with a Concentration in Drama

Students wishing to concentrate in drama may elect the Single Majors option in English (Drama). This program will consist of at least 14 term-courses in English, of which at least 10 must be upper level courses. Students who elect to take the drama option will organize their programs according to the standard requirements for Majors, with the following modifications: ENGL 2002 must be included among their lower level courses. At the upper level, they will be required to complete ENGL 3801, at least one Shakespeare course, and at least two other upper level courses devoted to the study of dramatic literature (see the Majors Coordinator for a list of acceptable options). As part of their Majors requirements students must complete at least 3 term-courses from each of the 2 Majors groups. These 6 courses can include the required drama courses.

Minor

The Minor in English will consist of a minimum of 8 term-courses in English, at least 3 but no more than 4 of which must be at the lower-level (two of which must be ENGL 2101 and ENGL 2102). A grade of C or better is required in all courses.

FRENCH

Major and Minor

Major

A student who wishes to major in French Communication and Culture will normally have completed four term-courses in French (FR 1203, FR 1204, FR 2203, FR 2204) and have received a grade of B or above. A student who has successfully completed a school French Immersion program may begin a major in French Communication and Culture following completion of FR 3203 and FR 3204 with a grade of B or above. Students receiving a grade between C and B in FR 2203 and FR 2204 would normally proceed to FR 3203 and FR 3204. A student must complete a French Minor in order to complete the major. French Minor students are eligible to declare a major once they have completed twenty term-courses. Students will design their program in consultation with the Majors Coordinator. A single Major in French will normally comprise FR 3203, 3204, 4204 and one of 3704, 3714, 3724 and six term courses chosen among upper level courses. A Double Major including French Communication and Culture would normally comprise FR 3203, 3204, 4204 and one of 3704, 3714, 3724, and four term courses chosen among upper level courses.

There is also a French Major as part of the Business Administration program. See relevant section under Business Administration.

Minor

Students completing a French Minor are required to complete four term-courses in French at the upper level. FR 3203 and FR 3204 will be required. A minimum grade of C or above is required. The Minor must be declared at the same time as the Major.

There is also a French Minor as part of the Business Administration program. See relevant section under Business Administration.

BBA with a Major/Minor in French Communication and Culture

In addition to complying with the existing curriculum requirements and regulations governing the award of a BBA degree, BBA students wishing to Major in French Communication and Culture must also comply with the following regulations and requirements of the Faculty of Business and the French discipline:

a. Students electing to major in French Communication and Culture should declare the major by the beginning of their third year. All courses taken to comply with the major requirement must be approved by the Department of Humanities and Languages and by the Faculty of Business.

b. (i.) A BBA student who wishes to major in French Communication and Culture will normally have completed four term-courses in French (FR 1203, FR 1204, FR 2203, FR 2204) and have received a grade of B or above. A student who has successfully completed a school French Immersion program may begin a major in French Communication and Culture following completion of FR 1304 and FR 2304 with a grade of B or above. Students receiving a grade between C and B in FR 2203 and FR 2204 would normally proceed to FR 2203 and FR 2204. A BBA student majoring in Culture and Communication will consist of at least eight term-courses in French at the upper level.

(ii.) All students must earn a minimum grade of C in FR 3203, FR 3204, and FR 4204; and one of FR 3704, FR 3714, or FR 3724 and one of 3704, 3714, 3724, and six term courses of approved French Communication and Culture upper level electives.

BBA with a Major in French (Honours) Communication and Culture

In addition to the above requirements for the major, students must obtain a GPA of 3.3 on compulsory and elective term-courses required for the major.

BBA with a Minor in French Communication and Culture

Students completing a French Minor are required to complete at least four term-courses at the upper level in French Communication and Culture, with a maximum of four term-courses at the lower level (FR 1203, FR 1204 and FR 2203, FR 2204). FR 3203 and FR 3204 are required; the remaining two-term courses will be chosen from advanced courses. A minimum grade of C, in lower level courses, and C, in upper level courses, is required. The Minor must be declared at the same time as the Major.

Students who have completed FR 1304 and FR 2304 are admitted to FR 3203 and 3204 will also do four term-courses in upper level courses.

Certificate of Proficiency in French

Saint John - Certificate of Proficiency in French Communication and Culture

Persons who wish to have official recognition of their competence in the French language may apply for admission to the above-mentioned program, which is administered for the University by the Department of French on the Fredericton campus and the Department of Humanities and Languages on the Saint John campus. The program consists normally of FR 1203/ FR 1204, FR 2203/ FR 2204, FR 3203 and FR 3204, FR 4204 and one of FR 3704, FR 3714, FR 3724, in all of which the student is to attain a mark of C or higher, and the Certificate is awarded on the basis of a comprehensive examination upon termination of FR 4204. Full-time students who are not majoring or honouring in French may take these courses as part of their undergraduate program. Persons not working towards a degree may enroll for the courses as part-time students.

Students may apply to enter the Certificate program at any time before their completion of FR 4204. They are encouraged to apply for entry as soon as they register in a course in the programs.
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

The Certificate of Proficiency in French will be awarded by the University through the Registrar’s Office. The student’s transcript will bear a separate entry showing that the Certificate has been awarded and recording the grades obtained in the four areas of language competence (speaking, listening comprehension, reading comprehension, and writing).

These grades are: A (very good); B (good), and C (satisfactory), and they may be interpreted as follows:

**Speaking:**
- a. Participate with ease in conversation
- b. Can participate adequately in conversation albeit with a certain degree of hesitancy
- c. Can make themselves understood in conversation

**Listening Comprehension:**
- a. Can understand lectures in a job-related context and radio and TV news programs which interest them
- b. Can understand lectures on non-technical subjects and group conversations
- c. Can understand what is said to them in individual conversation with one other person

**Reading Comprehension:**
- a. Can understand the main ideas in books, magazines and newspapers without the aid of a dictionary
- b. Can read printed material of personal interest with occasional help from a dictionary
- c. Can read, with the aid of a dictionary, standard texts written without stylistic difficulties on subjects within their interest

**Writing:**
- a. Can write papers, essays, etc., which are acceptable in form and format
- b. Can write résumés, letters, short compositions, which are structurally acceptable but which would need some revision
- c. Can write sentences and short paragraphs which are grammatically acceptable

*Diplôme de Bilinguisme (Certificate Level Two)*

All students who have successfully completed the Certificate of Proficiency in French and students who have completed FR 4204 (or equivalent) with a grade of C or higher (or the equivalent) are eligible for admission.

Eight term-courses must be completed, from any of the 3000/4000 level French term-courses. Approval of courses will be required. The requirements for the diploma are: (a) satisfactory completion of the program with a grade of C or higher in each upper level course, and (b) the passing of a comprehensive final examination.

**GENDER STUDIES**

*Programs in Gender Studies*

**Minor in Gender Studies**

Admission to the Minor is open to students majoring in any Arts discipline and could be available to students in other faculties as minors become available. Students must select the Minor in consultation with the Gender Studies Coordinator, and this should normally be done at the same time as they declare a Major. The Minor requires 24 ch, comprised of Gender Studies 2001 and 21 ch selected from Gender Studies eligible courses. Approval of courses will be required. The required 24 ch does not include the prerequisites required for the Gender Studies eligible courses.) A grade of C or better is required in all courses counting towards the Minor in Gender Studies.

**Certificate in Gender Studies**

Students meeting the University’s entry requirements or the requirements for admission as a mature student may be admitted to the Certificate in Gender Studies programme in consultation with the Gender Studies Coordinator. The Certificate requires 30 ch, comprised of Gender Studies 2001 and 27 ch selected from Gender Studies eligible courses. (NOTE: The required 30 ch does not include the Prerequisites required for the Gender Studies eligible courses.) A grade of C or better is required in all courses counting towards the Certificate in Gender Studies.

**Elective Courses**

For the GEND Minor: 21 ch from the following list of Gender Studies eligible courses with at least 6 ch in each of the three groups.

For the Certificate in Gender Studies: 27 ch from the following list of Gender Studies eligible courses with at least 6 ch in two of the three groups.

**Groups**

**GROUP 1:**
- ENGL3621 Writing by Women I
- ENGL3622 Writing by Women II
- ENGL3631 Studies in Gender and Genre
- HIST3402 Women in American History (disciplinary Prerequisites apply)

**GROUP 2:**
- POLS3225 Gender and Politics
- POLS3325 Gender and Comparative Politics
- POLS3625 Global Gender Issues
- POLS4311 Global Politics of Prostitution
- SCI3105 Qualitative Methods in the Social Sciences
- SCI3543 Sociology of Gender Relations
- SCI4263 Discourse and Text (prerequisite: Sociology 3105)
- SCI4555 Gender and Organization

**GROUP 3:**
- HIST3945 Women, Science and Medicine (disciplinary Prerequisites apply)
- NURS3053 Gendered Experiences in Health Care
- PSYC3223 Sex Differences (disciplinary Prerequisites apply)
- PSYC3263 Psychology of Women (disciplinary Prerequisites apply)
- SCI1355 Women and Science
- SCI3255 Women, Development, and the Environment
- SCI3544 Gender and Technology

FOR STUDENTS ENROLLED IN THE GENDER STUDIES MINOR: These courses cannot be double counted for those enrolled in Arts. That is, any course taken to fulfill the requirements of the Minor in Gender Studies cannot be counted towards any other programme within Arts.

**NOTE:** The list of GEND-eligible courses is updated annually, and is available from the Gender Studies Coordinator. Students seeking credit for courses not on this list must have written approval from the Gender Studies Coordinator prior to enrolling in the course. Gender Studies students are responsible for ensuring they have completed the appropriate Prerequisites for their GEND-eligible electives.

**HISTORY**

It is suggested that students wishing to pursue an honours, major, double major or minor in History complete 1 term-course at the 1000-level and 1 term-course at the 2000-level before advancing to the required upper-level courses noted below.

Students who have completed satisfactorily Advanced Placement [AP] in European History or International Baccalaureate [IB] courses in History will receive credit for 1 term-course [3 credit hours] of unsignalled HIST at the 1000-level and HIST 2101. AP students with US or World History should consult the Faculty of Arts Student Coordinator for transfer details.

**General Information - Course Numbering and Prerequisites:**

1000-level courses: Prerequisites: Courses at this level are suitable for students from any discipline who are interested in the study of History.

2000-level courses: Prerequisites: Courses at this level are suitable for students from any discipline who have completed:

1. At least ten term-courses - or -
2. At least five term-courses, including one term-course in History.

3000-level courses: Prerequisites: Courses at this level are suitable for students from any discipline who have completed at least twenty term-courses. Students should normally have completed at least one term-course in History.

4000-level courses: Prerequisites: Courses at this level are suitable for students from any discipline who have completed at least twenty term-courses. Students should normally have completed at least two term-courses in History.

5000-level courses: Prerequisites: Courses at this level are restricted to students who have been admitted to the Honours program.

**NOTES:**

1. Starting in September 2012, many History courses were renumbered. Students should contact the History Advisor and consult the course conversion chart in the appropriate area(s) of the UNB Undergraduate Calendar to avoid taking renumbered courses more than once. Courses having identical or similar content, regardless of numbering,
will be counted only toward the completion of a student's program.
2. Classics courses designated as Ancient History count toward a History major or minor, if a minimum grade of C+ is obtained.
3. Faculty of Arts regulations stipulate that no more than 6 term-courses of 1000 and 2000-level History in any one discipline can be counted toward a BA.

Major
Students are eligible to apply to the major program during the session in which they expect to complete successfully their first 20 term-courses. To enter the History major program, a student must have a minimum GPA of 2.7 (B-) in 3 term-courses of lower-level History courses (i.e., 1000 and 2000-level courses).
The major consists of a minimum of 14 term-courses of History:
a. A minimum of 1 term-course of 1000-level History
b. A minimum of 2 term-courses of 2000-level History
c. A minimum of 11 term-courses of upper level History

In the major program students must complete 11 term-courses of upper-level History courses and obtain a GPA of at least 2.7 (B-) with no final grade lower than 2.3 (C+) in these courses.

Double Major
The double major consists of a minimum of 11 term-courses of History:
a. A minimum of 1 term-course of 1000-level History
b. A minimum of 2 term-course of 2000-level History
c. A minimum of 8 term-courses of upper level History

All History courses credited toward the double major must have a minimum grade of 2.3 (C+) and the minimum GPA for total History courses at the upper-level must be 2.7 (B-).

Minor
The minor consists of a minimum of 8 term-courses in History:
a. A minimum of 1 term-course at the 1000-level
b. A minimum of 2 term-course of 2000-level History
c. At least 5 term-courses at the upper level History

All History courses credited toward the minor must have a minimum grade of C+.

Honours
Students interested in pursuing this program must apply in writing to the Honours Coordinator, normally during the term in which they complete the first 30 term-courses of their degree. Students in the honours program must meet the requirements for the History Major and complete an additional 4 term-courses in History, as outlined below.

Requirements
- HIST 5000: Honours Thesis - All thesis topics must be approved by the Honours Coordinator
- HIST 5905: History Theory and Practice
- HIST 5906: Honours Seminar.

Joint Honours Program - English and History
Students interested in pursuing a joint honours program in English and History must apply in writing to either the Coordinator of English or the Coordinator of History.

To satisfy the History requirements for the joint honours degree, students must complete 4 terms of lower-level History and 10 term-courses of upper-level History courses, of which 2 term-courses will be an Honours seminar.

Students must complete HENG 4000 [equivalent to 2 term-courses]. Once a student has decided whether the primary emphasis will be on English or History, supervisors will be assigned from the two disciplines. Credit for the thesis [HENG 4000] will be assigned to the discipline receiving the primary emphasis.

For detailed information on the English requirements, please consult the Rules and Regulations for ENGLISH [in Saint John Degree Program, UNB Calendar].

INTERNATIONAL DEVELOPMENT STUDIES MINOR
The University of New Brunswick at Saint John offers a double major in International Studies. This interdisciplinary program permits students to combine studies in Language, Culture, Politics, Economics, History, and Literature and offers a comprehensive introduction to global and regional developments.

Program of Study
The Minor consists of 24 ch. A grade of C or better must be attained in all required and elective courses. NOTE: None of the courses taken for this Minor may be counted towards the requirements for another Minor or Major.

The following 9 ch of courses are required:
POLS 1601 Introduction to International Politics (6 ch)
ECON 3531 Introduction to International Development (NOTE: ECON 1013 and ECON 1023 are Prerequisites.) (3 ch)
A further 15 ch of elective courses selected from the following:
HIST 2000 World History (6 ch)
HIST 3025 Econ Development of Pre-Industrial Europe (3 ch)
HIST 3035 Industrialization of Europe (3 ch)
POLS 3303 Politics of the Developing World (3 ch)
POLS 3622 International Organization and Law (3 ch)
POLS 3631 Survey of Global Issues (3 ch)
ECON 3542 Topics in International Development (3 ch)
ECON 3755 Environmental and Resource Economics (3 ch)
ECON 3702 Cost-Benefit Analysis (3 ch)
BA 4193 International & Comparative Management (3 ch)
BA 4858 International Human Resources Management (3 ch)
SOCI 3523 Sociology of Third World Development (3 ch)

INTERNATIONAL STUDIES
The University of New Brunswick at Saint John offers a double major in International Studies. This interdisciplinary program permits students to combine studies in Language, Culture, Politics, Economics, History, and Literature and offers a comprehensive introduction to global and regional developments.

Programme of Study
The International Studies Program is one half of a double major in the Faculty of Arts.
IS 1001 and either POLS 2601 or POLS 2301 are required courses.
Students who double major in IS and Politics can count either POLS 2601 or POLS 2301 toward their IS program. A grade of C in both IS 1001 and either POLS 2601 or POLS 2301 is the minimum grade requirement for a Major in International Studies. Students apply for permission to Major in International Studies during the session in which they complete 20 term-courses of study. Students entering the IS Program must have a cumulative GPA of 2.7 (B-). To complete the double Major in IS students must maintain a “B” average overall in their IS courses and in the IS designated electives with no grade lower than a “C”. IS 4501 is a specialized courses intended mainly for Majors. Students must satisfy the prerequisite requirements for all upper level courses. Any student in any program may take IS 1001 or POLS 2601 or POLS 2301 as an elective.

Double counting courses in the IS program will not be permitted.
For a list of IS eligible electives contact the Department of History and Politics.

Double Major in International Studies
Lower level requirements: (6 term-courses)
Students must, in their first 20 term-courses, meet the regular Faculty of Arts breadth requirements. Students must include in their program the following:
a. IS 1001 and POLS 2601 or POLS 2301
b. 4 term-courses of a modern language other than English

Upper level requirements: (8 term-courses)
Students must complete a minimum of 8 upper level term-courses. These courses must include:
a. IS 4501: Research Project in International Studies (one term-course). This course is limited to students with IS 1001 and POLS 2601 or POLS 2301 and 3 term-courses of IS designated electives or to those with permission of the instructor.
b. A minimum of 7 term-courses selected from related disciplinary electives determined in consultation with the International Studies program advisor(s). Students will be advised in their first and second year that many upper level related disciplinary electives have specific Prerequisites that must be completed for these upper level courses to be selected.

For the double Major in a discipline, students will be required to meet the double Majors requirement for one of the existing Faculty of Arts disciplines. These requirements vary - please consult the calendar for further details.

Minor in International Studies
The minor in International Studies will consist of IS 1001 and POLS 2601 or POLS 2301, two term-courses in a language other than English, and a minimum of 4 upper level courses selected from related disciplinary electives determined in consultation with the International Studies program
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

advisor(s). A grade of C or better is required in all courses to be counted for the minor in IS. A minor must be declared at the same time as the major.

LAW IN SOCIETY

Double Majors Program

Law in Society is an interdepartmental and inter-faculty majors program involving the departments of Anthropology, Economics, History, Philosophy, Politics, Psychology and Sociology in the Arts Faculty, the Law Faculty, and the Faculty of Business Administration, on the Fredericton campus. A number of UNB Saint John courses are eligible for credit for the Law in Society Double Major. Please consult the Fredericton Bachelor of Arts programs section for more information.

LINGUISTICS

Minor

The Minor in Linguistics at UNB Saint John consists of eight term-courses organized in three groups, which are listed below. The requirements are as follows: 2 required term courses from Group 1 a minimum of 2 term-courses from Group 2 a minimum of 2 term-courses from Group 3.

Admission requirements, standards etc.

A mark of C or higher in every course is required for granting of the Minor.

Prerequisites for courses included in the three groups do not count toward the eight term-courses for the Minor.

List of courses

Group 1 - required (2 term-courses)
LING 2101 Linguistics 1
LING 2202 Linguistics 2

Group 2 - Linguistics options (minimum 2 term-courses)
LING 1102 English Syntax
LING 3111 Language Acquisition
LING 3113 Phonetics & Phonology
LING 3114 Syntax
LING 3212 The History of the English Language
LING 3223 Semantics
LING 3224 Cognition and Language

Group 3 - related options (minimum of 2 term courses)
CS 4613 Programming Languages
CS 4913 Theory of Computation
ED 3561 Introduction to Second Language Education
ENGL 3601 Introduction to Literary Theory
FR 1203 Communicating in French I
FR 1204 Communicating in French II
FR 2203 Communicating in French III
FR 2204 Communicating in French

PYSC 4733 Cognitive Neuroscience
SOCI 4263 Discourse and Text
SPAN 1203 Introductory Spanish I
SPAN 1204 Introductory Spanish II
SPAN 2203 Intermediate Spanish I

SPAN 2204 Intermediate Spanish II

MATHEMATICS

Mathematics Major

1. A student in the BA degree who wishes to major in Mathematics must complete a minimum of 16 term-courses in Mathematics or approved substitutes as follows:
   a. MATH 1003, MATH 1013, MATH 1503, MATH 2513, MATH 2523, MATH 2203
   b. MATH 3213, MATH 3713, MATH 3733, STAT 3083, STAT 3093
   c. At least five upper level mathematics term-courses. A maximum of one upper level Statistics term-course may count toward the five courses.

2. In addition, at least one term course in Computer Science is required.

NOTE:

(i) STAT 1793 and STAT 2793 are recommended prior to taking STAT 3083 and STAT 3093.
(ii) MATH 2633 and 3633 cannot be taken for credit in the Mathematics major except for students registered in concurrent BED programs.
(iii) It is recommended that MATH 2203 is taken in the first or second year.

Minor in Mathematics

A student who intends to pursue a Minor in Mathematics is required to take 8 term-courses in Mathematics. Credit must be obtained for MATH 1003, MATH 1013 and either MATH 1503 or MATH 2213. The remaining 5 term-courses of the Minor must consist of Mathematics courses at the second year level, or above. A maximum of 2 term-courses of Statistics courses, at any level, may count towards the 5 term-courses.

PHILOSOPHY

Major and Minor

Major

Students in the BA degree program who wish to take a Major or Double Major in Philosophy should consult with a Faculty advisor in Philosophy on successful completion of 20 term-courses.

A single Major in Philosophy will consist of at least fourteen term-courses in Philosophy, passed with a grade of C or better, including:

   a. PHIL 1001 and PHIL 1002;
   b. PHIL 1053;
   c. Eight term-courses at the advanced level.

A double Major in Philosophy will consist of at least ten term courses in Philosophy, including PHIL 1001, PHIL 1002, and PHIL 1053, passed with a grade of C or better, of which at least six term-courses must be at the advanced level.

Minor

The Minor in Philosophy will consist of a maximum of four term courses in Philosophy at the lower level including PHIL 1001, PHIL 1002 and PHIL 1053 and a minimum of four term-courses at the upper level for a total of eight term courses. A grade of C or better is required in all courses.

POLITICS

Honours, Majors and Minor

Honours

Students interested in an Honours degree in Politics must apply to the Department of History and Politics after they complete 60 ch of studies. To be eligible to apply students must have a minimum grade point average of 3.0 in Politics courses and a minimum cumulative grade point average of 3.0. These minimums must be maintained for the duration of the program. No grade lower than C in a Politics course will count for credit towards the required credits in Politics for an Honours degree.

The Honours Politics program consists of 18 term-courses of Political Science courses. This shall be comprised of the 14 term-courses required for a Major in Politics, plus an additional 4 term-courses of upper level Political Science courses which must include POLS 4001 Honours Seminar in Politics and POLS 4000 Honours Thesis, as well as one-term course in another 4000 level course.

For the award of a first-class Honours degree, a grade point average of 3.6 is required in all Politics courses above the introductory level. For a second-class Honours degree an average of 3.3 is required in these courses. In both cases a minimum cumulative grade point average of 3.3 is required.

Major

Students choosing the discipline major must complete a minimum of 14 term-courses in Politics, as follows:

1. POLS 1201, and POLS 1301;
2. Two of the following: POLS 2201/POLS 2301/POLS 2401/POLS 2601;
3. One of the following: POLS 3401/POLS 3101/POLS 3603/POLS 3425;
4. And POLS 3901 or one 4000 level POLS course.
The remaining 8 term-courses must be upper level courses selected by the student in consultation with the faculty advisor in Politics. No grade lower than a C in a Politics course will count for credit towards a Majors degree in Politics.

Unless otherwise noted:
1. The required prerequisite for entry into any upper-level course in Canadian Politics (any course with the number 1, 2 or 5 as its second digit) is POLS 1201;
2. The required Prerequisites for entry into any upper-level courses in Comparative Politics (any course with the number 3 as its second digit) and International Politics (any course with the number 6 as its second digit) are POLS 1361 and/or POLS 2601;
3. The required Prerequisites for entry into any upper-level courses in Political Theory (any course with the number 4 as its second digit) is POLS 2401. Exceptions are subject to approval by the Chair of the Department, in consultation with the Politics faculty.

Double Major

Double major students in Politics and in another discipline must complete 12 term-courses in Politics, as follows:
1. POLS 1201 and POLS 1301;
2. Two of the following: POLS 2201/POLS 2301/POLS 2401/POLS 2601;
3. One of the following: POLS 3401/POLS 3101/POLS 3603/POLS 3425;
4. And POLS 3901 or one 4000 level POLS course.

The remaining 6 term-courses must be upper level courses selected by the student in consultation with the faculty advisor in Politics. No grade lower than a C in a Politics course will count towards a Double Major in Politics.

Minor

A Minor in Politics requires the completion of 9 credit hours from any of the lower level courses in Politics and 15 credit hours of upper level courses. No grade lower than a C in a Politics course will count towards a Minor in Politics.

PSYCHOLOGY

General Information and Curriculum

Successful completion of PSYC 1003 or an equivalent is necessary before taking PSYC 1004. Both PSYC 1003 and PSYC 1004 must be completed before taking any of the remaining psychology courses.

Normally, all Psychology courses counted toward the Psychology Major, BA Psychology Double Major, BA Honours Degree, or Certificate in Mental Health, must have been completed within the 10 years prior to graduation.

Major and Honours

Major

To qualify for a Major degree a student must accumulate 14 approved term-courses in Psychology. Six term-courses are compulsory as follows: PSYC 1003, PSYC 1004, PSYC 2102, PSYC 2301 (or equivalent), PSYC 4003, and PSYC 4005. All other term-courses are selected by the student in consultation with the faculty advisor in Psychology. No grade lower than a C in a Psychology course will count towards a Major in Psychology. A minimum grade of C (2.0) is required for all Psychology courses taken to meet the Majors requirement.

A student who wishes to do a double major in Psychology and another discipline must complete 12 term-courses including 6 term-courses in upper level electives and all the compulsory courses for the single Major in Psychology. A minimum grade of C (2.0) is required for all psychology courses taken to meet the Double Majors requirement.

Honours

The Honours program in Psychology provides a broad knowledge of this field and its research methods. Students planning to pursue graduate studies in psychology are advised to consider this program.

Students may apply to the Honours program at the end of their third year (that is 30 term courses). To be eligible to apply to this program, the student must have a minimum cumulative grade point average of 3.3 (B+), as well as, a cumulative grade point average of 3.6 in all psychology courses at the 2000, 3000, and 4000 level. Please NOTE that these minimum requirements do not guarantee acceptance into the Honours program; admittance is competitive and students must obtain a Faculty member willing to supervise them. As well, space may be limited.

Students must complete 17 approved term-courses in Psychology for the Honours degree. Of the 17 term-courses the following 8 term-courses are compulsory: PSYC 1003, PSYC 2102, PSYC 2301 (or equivalent), PSYC 3913, PSYC 4053, PSYC 4142, PSYC 4143, PSYC 4145. An additional 9 term-courses derived from a selection of 3 term-courses from each of the following 3 groups is necessary.

SECTION E: SAINT JOHN ACADEMIC PROGRAMS

Group I: Biological/Cognitive Basis of Behaviour

PSYC 3343, PSYC 3383, PSYC 3553, PSYC 3513, PSYC 3503, PSYC 3613, PSYC 3633, PSYC 3693, PSYC 3711, PSYC 3723, PSYC 3743, PSYC 3752, PSYC 4021, PSYC 4583, PSYC 4693, PSYC 4733, PSYC 4833

Group II: Social/Personality

PSYC 2201, PSYC 2401, PSYC 3265, PSYC 3265, PSYC 3293, PSYC 3412, PSYC 3414, PSYC 3453, PSYC 3461, PSYC 3695, PSYC 4293, PSYC 4463.

Group III: Clinical/Applied

PSYC 3033, PSYC 3313, PSYC 3323, PSYC 3362, PSYC 3393, PSYC 3493, PSYC 3553, PSYC 3724, PSYC 3725, PSYC 3803, PSYC 4233, PSYC 4263, PSYC 4722, PSYC 4493, PSYC 4813.

All Psychology courses taken for the Honours degree must be passed with at least a C (2.0). Furthermore, to graduate with an Honours degree in Psychology an overall cumulative grade point average of 3.3 (B+) is necessary, as well as, a cumulative grade point average of 3.3 in all required Psychology courses. For a First Class Honours designation, a grade point average of 3.6 is required in such Psychology courses. For an Honours designation, a grade point average of 3.3 is required in such Psychology courses.

Certificate in Mental Health Studies

This Certificate is intended to provide additional education to professionals working in mental health-related fields (e.g., nursing, outreach/support workers, youth workers, correctional officers, social workers, counselors) who are interested in advancing their knowledge about mental health topics that relate to their work (e.g., information about mental health disorders and psychosocial issues impacting on personal functioning, lifespan development, and mental health). This Certificate will complement the education of professionals who have non-university and other university-level degree programs that did not offer as in-depth a psychological focus on mental health topics.

The Certificate will require completion of 12 term-courses (36 credit hours). Students will be required to complete three (3) mandatory undergraduate term-courses (PSYC 1003, PSYC 1004, and PSYC 3553) and select a minimum of 9 elective term-courses: Two (2) from each of the four groups and an additional term-course from any of the four groups as outlined in the list of courses below. All courses for the Certificates are degree-credited courses. The duration of the program will be 1-2 years of full-time study, or up to 4 years of part-time study.

Individuals who successfully complete Certificate courses and who are subsequently admitted to a degree program normally will receive credit towards a degree for those courses acceptable for credit in the particular degree program. To be eligible for the Certificate in Mental Health Studies, students must meet the following requirements:

a. There is no minimum age requirement for admission. To be eligible for the Certificate in Mental Health Studies, candidates must have obtained their high school diploma (or its equivalency) and participated in a basic (30 credit hours) or an advanced (normally 30 credit hours) of approved post-secondary training in a mental health, social service, or health-related field from either an accredited community college or university. Interested applicants should NOTE that the Certificate requires students to be prepared for university-level study given that all courses for the Certificate are undergraduate degree-credit courses.

b. Each student entering the Certificate program on a full-time basis must have the prior approval of the Faculty of Arts.

c. A Certificate will not be awarded to a student currently enrolled in psychology degree programs at the University of New Brunswick or at another university, but students who have withdrawn from an undergraduate degree program in psychology may apply for the Certificate.

d. To earn the Certificate a student must successfully complete the number of credit hours in approved courses specified for the Certificate, achieve a grade of at least C in all required courses and achieve a cumulative grade point average of at least 2.0 across all courses used to complete the Certificate.

e. A maximum of 50% of total program requirements may be transferred upon approval from the Faculty of Arts from another degree, Certificate, or similar program whether taken at UNB or elsewhere.

List of required courses:

PSYC 1003, PSYC 1004, PSYC 3553 (prerequisite PSYC 1003 and PSYC 1004).

List of all elective courses.
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

Group I:
PSYC 3393 Systems of Therapy Prerequisites: PSYC 1003 & PSYC 1004
PSYC 3493 Changing Behaviour Prerequisites: PSYC 1003 & PSYC 1004
PSYC 3362 Guidance and Counselling Prerequisites: PSYC 1003 & PSYC 1004
PSYC 3313 Introduction to Psychological Testing Prerequisites: PSYC 1003 & PSYC 2102.
PSYC 4265 Field Placement in Clinical Psychology Prerequisites: Permission of Instructor and PSYC 1003, PSYC 1004, PSYC 3553, PSYC 3493, as well as PSYC 3362, OR PSYC 3393; Minimum CGPA=3.3 (B+)
PHIL 3133 Health Care Ethics I Prerequisite: One term-course in Philosophy or permission of the instructor

Group II:
PSYC 2201 Child Development Prerequisites: PSYC 1003 & PSYC 1004
PSYC 3293 Aging Prerequisites: PSYC 1003 & PSYC 1004, PSYC 2201 OR ED 3021
PSYC 4293 Adolescence Prerequisites: PSYC 2201 or PSYC 1273 & PSYC 2102
PSYC 4493 Developmental Psychopathology Prerequisites: PSYC 1003 & PSYC 1004, PSYC 2201, PSYC 3553 OR permission of the instructor

Group III:
PSYC 3033 Health Psychology Prerequisites: PSYC 1003 & PSYC 1004
PSYC 3263 The Psychology of Criminal Behaviour Prerequisites: PSYC 1003 & PSYC 1004
PSYC 3725 The Dementias Prerequisites: PSYC 1003 & PSYC 1004
PSYC 4813 Substance Abuse and Dependence Prerequisites: PSYC 1003 & PSYC 1004, PSYC 3752 OR PSYC 4833

Group IV:
PSYC 3711 Biological Psychology Prerequisites: PSYC 1003 & PSYC 1004
PSYC 3723 Human Neuropsychology Prerequisites: PSYC 1003 & PSYC 1004, PSYC 3711
PSYC 3752 Drugs and Behaviour Prerequisites: PSYC 1003 & PSYC 1004
PSYC 4833 Psychopharmacology Prerequisites: PSYC 1003 & PSYC 1004, PSYC 3711

Minor in Psychology
The Minor in Psychology is an 8-term course program aimed at students wishing to acquire a basic foundation in Psychology outside of their Major area of study.

Admission to the Minor in Psychology is not open to students who have completed or are currently enrolled in a Major or Honours in Psychology, Bio-Psychology or a Certificate in Mental Health Studies. The minor requires a minimum of 8 term-courses. A minimum grade of C is required in all courses.

NOTE: PSYC 1003 & PSYC 1004 are Prerequisites for all Psychology courses.

Mandatory Psychology courses (4 term-courses)
PSYC 1003 Introductory Psychology
PSYC 1004 Introductory Psychology II
PSYC 2901 Introductory Statistics for Psychologists
PSYC 2102 Research Methods in Psychology (Prerequisites: PSYC 2901)

Required Psychology Electives (4 term-courses)
Any four (4) 3000/4000 level Psychology courses.

SOCIOLOGY

General Information and Curriculum
Unless otherwise indicated, students must complete SOCI 1001 before taking any sociology courses at the 2000 level or above. Students are required to complete at least 3 term-courses in Sociology at the lower level (1000-2000 courses) before enrolling in any upper level Sociology courses. Students who are not majoring or honours in Sociology will be admitted to a 4000 level course only if they have completed 6 term-courses of Sociology and have consulted with the instructor. A minimum grade of C (2.0) is required for all sociology courses taken to meet the Majors, Honours requirements or Prerequisites.

Admission to Major, Double Major and Honours Options
Students apply for permission to Major in Sociology in the term in which they complete 20 term-courses of study. In addition to SOCI 1001, students intending to Major or Honour in Sociology must have completed at least 3 term-courses in Sociology with a grade of C or better prior to admission into the program.

NOTE: Most courses have a prerequisite; students are responsible for ensuring they have completed the appropriate Prerequisites.

Major
Students choosing Sociology as a Major must have their program approved by the Department, and must complete a minimum of 14 term-courses in Sociology, including the following required 6 term-courses:
SOCI 1001 Introduction to Sociology
SOCI 3008 Early Social Theory
SOCI 3009 Modern Social Theory
SOCI 3104 Quantitative Methods in the Social Sciences
SOCI 3105 Qualitative Methods in the Social Sciences
1 term-course 4000 Level Sociology Courses

Double Major
A student who wishes to do a double major in Sociology and another discipline must complete 12 term-courses of Sociology, including all compulsory courses for the single major in Sociology.

Honours
Students must apply to the Department for permission to honour in Sociology in the term in which they complete 20 term-courses of studies. Only under exceptional circumstances will students be permitted to enter the Honours program after this time.

To be eligible to apply for the Honours program in Sociology, a student must meet the requirements for admission to the major and have a minimum cumulative grade point average of 3.3. The decision to admit a student to the Honours program rests with the Sociology faculty.

For the award of a High Honours degree, a grade point average of 3.6 is required in Sociology courses above the introductory level and for an Honours degree an average of 3.3 is required. In both cases a minimum cumulative grade point average of 3.3 is required.

Students choosing to honour in Sociology must have their program approved by the Department, and must complete a minimum of 16 term-courses in Sociology including the following required 10 term-courses and an honours thesis:
SOCI 1001 Introduction to Sociology
SOCI 3008 Early Social Theory
SOCI 3009 Modern Social Theory
SOCI 3104 Quantitative Methods in the Social Sciences
SOCI 3105 Qualitative methods in the Social Sciences
SOCI 4014 Designing Research Proposals
SOCI 4015 Honours Thesis
3 additional term-courses of 4000 level SOCI courses.

An honours thesis is required in the Final Year.

STATISTICS

Statistics Major
1. A student in the BA degree who wishes to major in Statistics must complete a minimum of 16 term-courses in Statistics and Math (as designated below) and 2 term-courses in Computer Science for a total of 18 term-courses.
   a. MATH 1003, MATH 1013, MATH 1503, MATH 2203, MATH 2513, MATH 2523, STAT 1793, STAT 2793
   b. MATH 3713, MATH 3733, STAT 3083, STAT 3093
   c. At least four upper level term-courses in Statistics, in addition to STAT 3083 and STAT 3093
2. At least two term-courses in Computer Science are required.

NOTE: Suggested elective for the first year is STAT 1793 (or equivalent).
A student who intends to pursue a Minor in Statistics is required to take 24 ch in Statistics. A maximum of 9 ch from Mathematics may be selected. The Minor must be declared at the same time as the Major.
I. Cooperative Education Option
The Faculty of Business offers a 4-year Cooperative Education option within the BBA program. Consistent with the philosophy of Cooperative education, the program is designed to alternate study terms and meaningful work terms. The number of positions is limited and, therefore, restricted to students with a B- average or higher after their first year. Students may apply for the Co-op program during their second semester. Co-op students are also required to maintain a B- GPA or higher throughout their academic terms.

II. Opportunities for Graduates
The program has been designed to prepare its graduates, by means of a well-rounded theoretical and practical education, to enter the administrative levels of private and public corporations, institutions, and agencies. It also prepares students interested in a career in accountancy to undertake on-the-job training leading to professional certification. Holders of the BBA degree may be exempt from part of the required term of service, part of the course of study, and some of the examinations prescribed by the organizations awarding the professional designation "Chartered Professional Accountant (CPA)". Students interested in the accounting profession should discuss their interest with their faculty advisor, or consult the CPA Accounting Associations directly.

III. Business Administration and Law
BBA students who have completed three years of the BBA program may be admitted to the UNB Faculty of Law and may qualify for the BBA degree by successfully completing the first year of the Law program. To qualify for the BBA, such students must have credit for all of the REQUIRED courses specified for the BBA degree (except BA 4101) and must have a session grade point average of at least 2.0. Students must apply to and be accepted by the Faculty of Law. The current regulations of that Faculty require a minimum grade point average of 2.7 (on a 4.0 scale) before a student without a degree will be considered for admission. The average admission GPA for students admitted in 2008 was 3.8. The final grade-point average for BBA degree purposes will be determined by including the results in the first year of the Law program as part of the "final" credit hours used.

IV. Certificate Programs in Administration
The University of New Brunswick, Saint John Campus offers five certificate programs in Administration. This includes a certificate program in Business Administration Level I and Level II, Accounting, Electronic Commerce and Human Resource Management.

V. Graduate Studies in Business
The Faculty of Business offers graduate studies in Business leading to the Master of Business Administration (MBA) on a full-time or part-time basis. Students may concentrate in international business, entrepreneurship, and strategy. The Master of Business Administration degree may be exempt from part of the required term of service, part of the course of study, and some of the examinations prescribed by the organizations awarding the professional designation "Chartered Professional Accountant (CPA)". Students interested in the accounting profession should discuss their interest with their faculty advisor, or consult the CPA Accounting Associations directly.

VI. University Regulations on Admission and Academic Regulations
Students are strongly advised to read the General University Regulations, Section B of this Calendar, and in particular the subsection headed "Grading and Classification". The General University Regulations will govern any point not covered in the regulations that follow. Questions concerning the application of regulations should be directed to the Registrar.
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

VII. Transfers and Graduates of a Community College or Equivalent System to the BBA degree

The University of New Brunswick has specific articulated agreements with a number of domestic and international colleges. Such agreements provide for 2-year block transfer into our Applied Degree programs. See Saint John degree programs/Bachelor of Applied Management for additional information. Also, consult Admissions at the Registrar’s office for an updated listing of such arrangements.

Generally, up to a maximum of 60chs toward the BBA degree may be granted. College transfer students will be required to successfully complete, including any transfer credits, a total of 120 ch in order to graduate with a BBA degree. Only courses with a minimum grade of 65% will be considered for transfer. Entering students will be advised of their status as it is provided in the Admission Regulations of the University, Section S - Transfer students.

VIII. BBA Regulations for Full-time and Part-time Students in the Degree Program

A. Grading and Classification

The regulations in respect to the BBA degree and the Certificates are expressed in terms of letter grades, credit hours and grade point averages. These are explained in Section B of the Calendar. In order to take a Business Administration (BA) course that has a prerequisite, student must earn a C or better in the prerequisite course(s), regardless of the program in which the student is registered.

B. Credit Hours

The number of credit hours assigned each course is stated in Section E of this Calendar. (In most cases the Faculty of Business assigns a 6 ch weight to a two-term course and a 3 ch weight to a term course.)

Due to differences in the methods used by the various Faculties in the calculation of credit hours, students who elect to register for courses taught outside of the Faculty of Business should NOTE the following:

1. For purposes of the BBA degree, any course taught outside of the Faculty of Business, which has a course number ending in zero and which is taught over the full academic year, will receive the number of credit hours normally assigned by the Faculty in which the course is taught, up to a maximum of 6.

2. For purposes of the BBA degree, any course taught outside of the Faculty of Business, which has a course number ending in other than zero and which is offered in one term of the academic year, will receive the number of credit hours normally assigned by the Faculty in which the course is taught, up to a maximum of 3. Normally courses of less than 3 credit hours will not be considered for credit.

C. Grade Point Average

1. See Section B of this Calendar for detailed regulations on standing and promotion requirements.

2. A student who has been registered in the BBA program and who withdrew while on probation or who was required to withdraw from the program will not be eligible to re-enter the program without the approval of the Faculty of Business.

3. To earn the BBA degree, a student must successfully complete at least 120 ch in approved courses and must achieve a minimum grade of C in all courses designated as required or elective.

D. Transfer Students

The University regulations in respect to students transferring to the BBA degree program from another UNB degree program and students transferring to UNB from another university or post-secondary institution are as stated in the General Regulations of the University.

Course credits may only be transferred from another university when the grade is equivalent to at least a C at UNB.

At least half the credit hours for the BBA degree must be taken at UNB and must normally include all the required courses in the BBA degree program. (Students may be permitted to take some of these courses elsewhere with the prior permission of the Faculty of Business and the Registrar.)

E. The BBA as a Second Degree

Graduates of UNB are required to successfully complete a minimum of 30 additional credit hours at UNB; graduates of other recognized universities must successfully complete a minimum of 60 ch at UNB. All graduates must have credit for all the required, elective and option courses (or their equivalent) in the BBA program, and must comply with the regulations in Section C above.

F. Changes in Degree Requirements

Improvements in the BBA program may lead to changes in the requirements for the degree. The University reserves the right to require candidates already enrolled to meet the revised requirements.

G. Normal Course Load

The normal course load for students in the BBA program will be five courses per term. Students with a cumulative GPA of at least 2.7 may, with the written permission of the Manager of Undergraduate Programs or the Dean of the Faculty of Business, take a maximum of six courses in a given term. The normal course load for students accepted into the co-op program is six courses per term.

H. Repeating Courses

A student who fails to obtain a grade of C or better in a required course must retake the course as soon as it becomes available during a session in which the student is in attendance.

A student may take a course a maximum of three times (including Ws but excluding courses which are designated with the "F" notation). Beyond that, the student must obtain the permission of the Dean of the student’s Faculty to register again in the repeated course. See University Regulations section VIII.F.

I. Majors, Minors and Concentrations

1. See Section XI, regarding the BBA with a major in Economics.

2. See Section XII regarding the BBA with a major in French.

3. See Section XIII regarding the BBA with a minor in French.

4. See Section XV regarding the BBA with a major in Human Resource Management.

5. See Section XVI regarding the BBA with a minor in Accounting.

6. See Section XVII regarding the BBA with a major in Electronic Commerce.

7. See Section XVIII regarding the BBA with a major in Tourism.

8. See Section XIX regarding the BBA with a major in Marketing.

9. A student qualifying for the BBA degree who has met the requirements for a Single or a Double Major in the Bachelor of Arts program may request the Registrar to NOTE on the student's transcript that the Major requirement in the external discipline has been met. Students are advised that the Faculty of Business must approve their entire program with the Major requirement approved by the external discipline. NOTE: Students pursuing minors or double majors either within or outside of the Faculty of Business may not double count any course or courses which may be common to more than one program.

10. Majors in specific Business disciplines other than HRM, Accounting and Electronic Commerce are not offered although a student may concentrate in a particular Business area (Business and Public Policy, Finance, Industrial Relations, Marketing, Operations Research or Organizational Behaviour) or in Computer Science by selecting appropriate option courses. Students should NOTE that not all elective or optional courses are offered each year. The timetable should be consulted for current offerings.

11. Minors in specific Business disciplines are not offered. The Faculty of Business will accept all minors as laid out by the offering faculty except as noted below.

   a. A Minor in Economics will be awarded to BBA students who achieve a minimum grade of C in:
      i. ECON 2013 & ECON 2023 and
      ii. any additional 9 credit hours in upper level Economics courses.
( ECON 2103 and ECON 3114 are recommended for 6 of the 9 credit hours.)
   b. A minor in Math will be awarded to BBA students who achieve a minimum grade of C in:
      i. MATH 1003, MATH 1013, and either MATH 1503 or MATH 2213, and
      ii. an additional 15 ch in Math courses at second year level or above.
   c. Maximum 6 ch of approved substitutes may be allowed in consultation with the Department of Mathematical Sciences

12. Business Minor

Non-business students may earn a minor in business by successfully completing, with a grade of C or better, 24 credit hours of business courses as follows:

   a. BA 1216 Accounting for Managers I
   b. BA 1501 Introduction to Business
   c. BA 2303 Principles of Marketing
   d. BA 2504 Introduction to Organizational Behaviour

And any four additional business courses of which a minimum of 2 must be at the 3000 or 4000 level.

NOTE: Students are responsible for ensuring they have completed appropriate Prerequisites for all business courses. Students should NOTE, for example, that the prerequisite for BA 1216 is MATH 1853.
13. **Concentrations** are offered in Accounting, Electronic Commerce, Finance, Human Resource Management, and Marketing. Concentrations are completed by achieving a cumulative GPA of at least 3.0 for 12 ch of approved electives in the area of interest. Approved courses for each subject of concentration are as follows:

**Accounting**
1. BA 3235 Intermediate Accounting II
2. BA 3236 Intermediate Accounting II*
3. BA 3224 Accounting for Manager III*
4. And one of:
   a. BA 4207 Current Accounting Issues
   b. BA 4221 Advanced Management Accounting
   c. BA 4223 Accounting Information Systems
   d. BA 4229 Advanced Financial Accounting I*
   e. BA 4231 Advanced Financial Accounting II*
   f. BA 4237 Income Taxation*
   g. BA 4238 Auditing*
   h. BA 4242 Accounting Theory
   i. BA 4203 - Independent Study - Accounting
   j. Or other course(s) as approved by the Faculty of Business

**Electronic Commerce**
1. BA 2123 Introduction to Digital Business
2. BA 2663 Technology Trends in Digital Business
3. And at least two of the following:
   a. BA 3125 Industry Impact of Electronic Commerce
   b. BA 3126 Frontiers of E-commerce I
   c. BA 3305 Marketing on the Internet
   d. BA 3718 Legal, Privacy & Security Issues in Electronic Commerce
   e. BA 4108 Management of New Enterprise
   f. BA 4126 Frontiers of E-commerce II
   g. BA 4223 Accounting Information Systems
   h. BA 4506 Organizations and Electronic Commerce
   i. BA 4866 Management of Technology
   j. Or other course(s) as approved by the Faculty of Business

**Finance**
1. 6 chs of approved Finance Electives
2. 6 chs of approved Finance or Non-Finance Electives

Available Finance electives are:
- a. BA 3421 Personal Financial Planning
- b. BA 3426 Corporate Finance*
- c. BA 4437 Investment Analysis and Portfolio Management
- d. BA 4455 Derivatives: Options and Futures

Approved non-Finance electives are:
- a. ECON 2103 Financial Institutions and Markets
- b. ECON 3114 International Financial Institutions and Markets
- c. ECON 3412 International Macroeconomics and Finance
- d. or other course(s) as approved by the Faculty of Business

**Human Resources Management**
At least four of the following electives:
- g. BA 2758 Employment Law
- h. BA 3129 Business Research Methods
- i. BA 3813 Introduction to Industrial Relations
- j. BA 4813 Negotiations and Dispute Resolution
- k. BA 4853 Recruitment and Selection
- l. BA 4854 Training and Development
- m. BA 4855 Compensation Structure Development
- n. BA 4856 Evaluating and Rewarding Employee Performance
- o. BA 4857 Management of Occupational Health and Employee Wellness
- p. BA 4866 Management of Technology
- q. Or other course(s) as approved by the Faculty of Business

**Marketing**
1. BA 3129 Business Research Methods
2. BA 3328 Consumer Behaviour
3. And two of:
   a. BA 4107 Studies in Small Business
   b. BA 3305 Marketing on the Internet
   c. BA 3339 Marketing Communications
   d. BA 3371 Marketing of Services
   e. BA 4334 Public and Non-profit Marketing
   f. BA 4398 International Marketing
   g. Or other course(s) as approved by the Faculty of Business

**IX. Degree Standing on Graduation**
At graduation all successful candidates for the degree of Bachelor of Business Administration shall be listed in alphabetical order within the appropriate degree category as stated below:

a. **Distinction**
A student who attains a cumulative grade point average of at least 3.8 over the final 60 ch of course work and no grade less than B- (2.7) over the final 60 ch of course work shall graduate with Distinction.

b. **First Division**
A student who attains a cumulative grade point average of at least 3.5 shall graduate in First Division.

c. **Second Division**
A student who attains a cumulative grade point average of at least 2.5 but less than 3.5 shall graduate in Second Division.

d. **Third Division**
A student who attains a cumulative grade point average of less than 2.5 shall graduate in Third Division.

**X. Business Administration Curriculum and Degree Requirements**

1. Students must successfully complete at least 120 ch of course work and must obtain a grade of at least C in all required and elective courses specifically required for the degree.

2. The normal course load for students in the BBA program will be five courses per term. Students with a cumulative GPA of at least 2.7 may, with the written permission of the Manager of Undergraduate Programs or the Dean of the Faculty of Business, take a maximum of six courses in a given term.

3. Candidates for the degree must successfully complete the following credit hours: a) 54 required, b) 18 Business electives, c) 6 Social Science electives, d) 6 Humanities and Languages electives, e) 36 options, of which a maximum of 16 may be chosen from Business and a maximum of 12 of the 36 may be at the introductory level.

   An elective course is one chosen from a specified group of courses, e.g. "from Social Science or Business". An option course is an approved course chosen by the student from any approved discipline.

**Electives:**
- Humanities and Languages: Classics, English, French, German, Greek, History, Humanities, Latin, Philosophy, Spanish, (or other courses as approved by the Faculty of Business)
- Social Sciences: Gender Studies, Geography, Information & Communication Studies, International Studies, Linguistics, Politics, Psychology, Social Science, Sociology (or other courses as approved by the Faculty of Business)

Business: All courses prefixed with BA which are not listed as required in section 5 below.

**Options:**
As noted below, options may be chosen from any of the elective areas listed above as well as: Biology, Chemistry, Computer Science, Economics, Geology, Hospitality & Tourism Management, Information Technology, Mathematics, Physics, Science, or other courses as approved by the Faculty of Business.

4. It is the responsibility of students to ascertain that their elective and option courses are acceptable for BBA degree credit. Credit will not be granted for CHEM 1831, ECON 3101, ECON 1302, ECON 1303, FREN 1103, IT 1703, ECON 1004, PSYC 1273 or MATH 1863, MATH 2633 OR MATH 3633 in the BBA program. Credit will be granted for only one of MATH 1001, or MATH 1003, or MATH 2853.

   Students enrolled in a degree or certificate program under the aegis of the Faculty of Business are not to register in the following courses or similar courses without prior permission of the Faculty of Business. (The content of these courses is similar to required or option BBA courses.)

ECON 1073, PSYC 2901, PSYC 3913, STAT 1793, STAT 2793, STAT 2263, STAT 2264, STAT 2593, STAT 3093.

165
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

NOTE: Students should contact the Faculty of Business at the beginning of each regular academic year for a revised list of courses in this category.

5. Course Requirements

Students are responsible for ensuring that they meet all the requirements specified for the degree. These include the minimum credit hour requirements, minimum grade point averages, minimum grades in specified courses, successful completion of all specifically required courses and compliance with the restrictions on elective and option courses as in regulation X.3 above.

Students are advised to consult Section F of this Calendar for detailed course descriptions, including the number of credit hours assigned to each course.

Example of a Typical Student's Program
(15 ch per term, total 120 ch)

First Year

Fall Term
MATH 1853 Math for Business I
ECON 1013 Intro to Economics-Micro
BA 1501 Introduction to Business
Humanities or Language Elective*
Social Science Elective*

Winter Term
BA 1605 Business Decision Analysis I
ECON 1023 Intro to Economics-Macro
BA 1216 Accounting for Managers I
Social Science Elective
Humanities or Language Elective

Second Year

Fall Term
BA 2217 Accounting for Managers II
BA 2504 Introduction to Organizational Behaviour
BA 2606 Business Decision Analysis II
Business Elective/Option** - 6 ch

Winter Term
BA 2303 Principles of Marketing
BA 2858 Introduction to Human Resource Management
BA 3623 Management Science: Deterministic Models
Business Electives or Option Courses - 6 ch

Third Year

Fall Term
BA 3425 Managerial Finance
Business electives or option courses - 12 ch

Winter Term
BA 3304 Marketing Management
BA 3653 Production & Operations Management
BA 3672 Introduction to Management Information Systems
BA 3705 Business Law
Business Electives or Option Courses - 3 ch

Fourth Year

Fall Term
BA 4101 Competitive Strategy
Business Electives or Option Courses - 12 ch

Winter Term
Business Electives or Option Courses - 15 ch

NOTES:
* All students must include BA 1501 within their first 30 ch; 6 ch from the Social Science disciplines within their first 60 ch, and 6 ch from the Humanities and Languages disciplines within their first 60 ch.
** Option courses may be selected from the offerings of any faculty provided that the selections are in accord with regulations X.3 and 4 above, and provided they are approved by the Faculty of Business.

XI. BBA with a Major in Economics

In addition to complying with the existing curriculum requirements and regulations governing the award of a BBA degree, BBA students wishing to major in Economics must also comply with the following regulations and requirements of the Faculty of Business and the Economics discipline:

a. Students electing to major in Economics should declare the major by the beginning of their third year. The Faculty of Business must approve all courses taken to comply with the major requirement.

b. In order to earn the major in Economics, BBA students must complete the following:
   i. earn a minimum grade of C in the following compulsory courses: ECON 2013, 2023, 3013 and 3023; and
   ii. successfully complete with a grade of C or better 15 ch of elective Economics courses or approved substitutes from disciplines other than Economics up to a maximum of 6 ch. Many upper-level business courses qualify as approved substitutes; a current list is available from the Faculty of Business or the Economics discipline.

NOTE: Students may not double count courses required for the general BBA.

XII. BBA with a Major in French Communication and Culture

In addition to complying with the existing curriculum requirements and regulations governing the award of a BBA degree, BBA students wishing to major in French must also comply with the following regulations and requirements of the Faculty of Business and the French discipline:

a. Students electing to major in French Communication and Culture should declare the major by the beginning of their third year. All courses taken to comply with the major requirement must be approved by the Department of Humanities and Languages and by the Faculty of Business.

b. i. A BBA student who wishes to major in French Communication and Culture will normally have completed four term courses in French (FR 1203, FR 1204 and FR 2203, FR 2204) and have received a grade of C or above. A student who has successfully completed a school French immersion program may begin a major in French Communication and Culture following completion of FR 1304 and 2304 with a grade of B or above. Students receiving a grade between C and B- in FR 2304 would normally proceed to FR 2203 and FR 2204. A BBA with a major including French Communication and Culture will consist of at least eight term courses in French at the upper level.

   ii. All students must earn a grade of C or above in FR 3203, FR 3204, FR 4204 and one of FR 3704, FR 3714, FR 3724 and four term courses of approved French Communication and Culture upper-level electives.

XIII. BBA with a Major in French (Honours) Communication and Culture

In addition to the above requirements for the major, students must obtain a GPA of 3.3 on compulsory and elective term-courses required for the major.

XIV. BBA with a Minor in French Communication and Culture

Students completing a French Minor are required to complete at least four term courses at the upper level in French Communication and Culture, with a maximum of 12 ch at the lower level (FR 1203, FR 1204 and FR 2203, FR 2204). FR 3203 and FR 3204 will be required; the remaining two term courses will be chosen from advanced courses. A minimum grade of C, in lower level courses, and C, in upper level courses, is required. The Minor must be declared at the same time as the Major. Students who have completed FR 1304 and FR 2304 and are admitted into FR 3203 will also do four term courses at the upper level.

XV. BBA with a Major in Human Resources Management

In addition to complying with the existing curriculum requirements and regulations governing the award of a BBA degree, BBA students wishing to major in Human Resource Management must also comply with the following regulations and requirements.

a. Students electing to major in Human Resource Management should declare the major by the beginning of their third year. The Faculty of Business must approve all courses taken to comply with the major requirement.

b. In order to earn the major in Human Resource Management, BBA students must:
relevant paid work terms, as follows:

**ii. Earn a minimum grade of C in the following compulsory courses:**
- BA 2504, 2758, 2858, 3129, 3813 and 4898; and
- BA 3224*, BA 3235*, BA 3236*, BA 4229*; and
- BA 4242;
- BA 3426*, BA 4437, BA 4455, ECON 3114 or other approved finance course.

**iii. Earn a minimum grade of C in six credit hours of electives chosen from the following:**
- BA 3547, 3557, 3715, 4813, 4853, 4854, 4855, 4856, 4857, 4866 and ECON3375.

**XVI. BBA with a Major in Accounting**

In addition to complying with the existing curriculum requirements and regulations governing the award of a BBA degree, BBA students wishing to major in Accounting must also comply with the following regulations and requirements.

1. Students electing to major in Accounting should declare the major by the beginning of their third year. The Faculty of Business must approve all courses taken to comply with the major requirement.
2. In order to earn the major in Accounting, BBA students must in addition to the general requirements of the BBA degree:
   - Earn a minimum grade of C in the following compulsory courses:
     - Please NOTE that (*) Denotes CPA entry courses. BA 1218, BA 3224*, BA 3235*, BA 3236*, BA 4229*; and
   - Earn a minimum grade of C in three of the following elective courses:
     - BA 4207, BA 4221, BA 4223, BA 4231*, BA 4237*, BA 4238*, BA 4242;
   - Earn a minimum grade of C in one of the following elective courses:
     - BA 3426*, BA 4437, BA 4455, ECON 3114 or other approved finance course.

**XX. BBA Co-Op Option**

The Curriculum

The Faculty of Business offers a Co-operative Education option within the BBA program. While the program is designed to be completed in four years, students may take longer to complete the program. Students may also major and take the Co-op option. Consistent with the philosophy of Co-operative education, the program is designed to alternate study terms and relevant paid work terms, as follows:

Every co-op student shall complete three work terms with full-time academic semesters directly before and after each work term. The co-op program considers students full-time if they are enrolled in at least 12 credit-hours of course-work, not including the work term reports: BA 2903, BA 3903 or BA 4903, or any required ESL support courses. Academic course requirements and work terms are listed in Table A.

**TABLE A: Example of a typical student's program:**

<table>
<thead>
<tr>
<th>Year</th>
<th>Fall Term (September - December)</th>
<th>Winter Term (January - April)</th>
<th>Spring/Summer Term (May - August)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Academic Term 1</td>
<td>Academic Term 2</td>

</tr>
<tr>
<td>3</td>
<td><strong>Work Term 2</strong></td>
<td>Academic Term 5</td>
<td></td>
</tr>
<tr>
<td>4</td>
<td>Academic Term 6</td>
<td><strong>Work Term 3</strong></td>
<td></td>
</tr>
</tbody>
</table>

Every co-op student shall complete three work terms with full-time academic semesters directly before and after each work term. The co-op program considers students full-time if they are enrolled in at least 12 credit-hours of course-work, not including the work term reports: BA 2903, BA 3903 or BA 4903, or any required ESL support courses. Academic course requirements and work terms are listed in Table A.
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

Winter Term (January - April)
Business Electives or Option Courses - 15 ch

NOTES:
* All students must include BA 1501 within their first 30 ch; 6 ch chosen from the Social Science disciplines of Anthropology, Political Science, Psychology or Sociology within their first 60 ch, and 6 ch from the Humanities and Languages disciplines of Classics, English, French, German, History, Humanities, Latin, Philosophy or Spanish within their first 60 ch.
** Option courses may be selected from the offerings of any faculty provided that the selections are in accord with regulations X. (3) and (4) of the Business Administration Curriculum and Degree Requirements of the university calendar, and provided they are approved by the Faculty of Business.

The sequence of academic terms and work terms outlined above is not flexible. Only in unusual circumstances will the Director or Coordinator of the Co-op Program approve deviation from the regular sequence. If students’ course selections deviate from the schedule above they are responsible for obtaining academic advising from either a Faculty of Business or Co-op advisor. Students are responsible for their own academic planning and course selection.

Each work term is normally 12 to 16 weeks in duration.

Admission
Students must apply for the Co-op program during their second semester. Entrance to the Co-op program is a four-step process, as follows:

Step One: Academic Achievement - Obtain a B- (2.7) average or higher after their first year to be eligible for the entry-level Professional Development Workshop Series.

Step Two: Professional Development - Successfully complete all required elements of the entry-level professional development seminars held the week before classes begin in September (PDSs).

Step Three: Mock Job Interview - Successfully pass a mock job interview

Step Four: The Job Competition - Obtain a position for Work Term One.

Students who are unsuccessful in any one of the four steps will remain in the traditional BBA program. To remain eligible for each Co-op work term, students must attend and complete assignments for all mandatory professional development seminars in academic terms three, four, five and six.

For additional details and for information pertaining to transfer students, please read the Co-op students’ handbook available from the Faculty of Business, P.O. Box 5050, Saint John, N.B., E2L 4L5. Web address: www.unbsj.ca/business.

Admissions Policy for International Students Entering the BBA Co-op Program
In addition to the above criteria, students require a TOEFL score of 550 (or equivalent) to enter the BBA Co-op program if English is not their first language.

Advancement
To complete the program and earn a Co-op designation, students must:

• Maintain a minimum GPA of 2.7 (B-) throughout the program
• Successfully complete all PDSs
• Perform satisfactorily in all three work terms
• Obtain CR on all three work reports

If a student’s GPA falls below 2.7 but not lower than 2.5 in any one academic semester directly before or after the work terms, he/she will be placed on co-op program probation. For additional information, please refer to the co-op students’ handbook.

Work Term Reports
The work term report plays a pivotal role in the success of our Co-operative Education Program. Work term reports BA 2903, BA 3903 and BA 4903 are written during the first, second and third work terms respectively. They are required courses carrying 1 credit hour each and are assigned a CR or NCR (pass or fail).

Students must achieve a CR on BA 2903, BA 3903 and BA 4903 to be allowed to continue in the program.

Students who withdraw or are required to withdraw from the co-op program before they have completed BA 2903, BA 3903 and BA 4903 may not use the credit from BA 2903 and/or BA 3903 and/or BA 4903 in conjunction with a lab credit toward their BBA degree.

The Co-Op Fee
A comprehensive Co-operative Education Program includes many important components. Each component provides tangible benefits which are not offered to students in the traditional BBA program. Information on fees may be found in Section C of this calendar. Co-operative Education fees are used to develop and support the following areas:

1. Professional Development Seminars
2. Providing feedback to students in order to help them improve performance
3. Employer recruitment
4. Conducting job interviews with employers
5. Mid-Work term performance evaluations
6. Heightening the profile of our co-op program with schools, businesses, and community

Students who do not abide by Co-op Program regulations set out in the calendar and the Co-op Students’ Handbook, available from the Co-op Office, will be asked to withdraw from the Co-op Program.

XXI. Certificate Programs in Business Administration

General Regulations
1. The following regulations apply to the certificate programs in business:

   a. Certificate in Business Administration Level I, Certificate in Accounting, Certificate in Electronic Commerce and Certificate in Human Resource Management:

      A maximum of 50% of total program requirements may be transferred from another degree, certificate or similar program whether taken at the University of New Brunswick or elsewhere. However, 50% of the required business courses must be taken at the University of New Brunswick. Courses taken more than five years ago will be approved on an individual basis.

   b. Business Administration Certificate Level II:

      A maximum of 75% of total program requirements may be transferred from another degree, certificate or similar program taken at the University of New Brunswick. For students transferring credits from outside the University of New Brunswick, only 50% of total program credits will be transferable. However, 50% of the required business courses must be taken at the University of New Brunswick. Courses taken more than five years ago will be approved on an individual basis.

2. Each student entering a certificate program on a full-time basis must have the prior approval of the Faculty of Business.

3. A certificate will not be awarded to a student enrolled for a degree, but students who have withdrawn from an undergraduate degree program may apply for the appropriate certificate.

4. To earn the Certificate in Business Administration Level I, Level II, the Certificate in Accounting, or the Certificate in Electronic Commerce a student must successfully complete the number of credit hours in approved courses specified for the certificate, achieve a grade of at least C in all specifically required courses and achieve a cumulative grade point average of at least 2.0.

5. To earn the Certificate in Human Resource Management, a student must achieve a cumulative grade point average of at least 3.0 (B) over 24 credit hours required, (excluding BA 1605 and BA 2506).

6. There is no minimum age and no specific Prerequisites for entrance into the Business Administration Certificate Level I, Level II or the Certificate in Accounting. Admission information concerning the Certificate in Electronic Commerce is shown on page 12 and the Certificate in Human Resource Management on page 15 of the Certificate Programs brochure available from the Faculty of Business or at: www.unbsj.ca/business/students/advising. Although, there are no specific entrance requirements for the Business Administration Certificate Level I, Level II or the Certificate in Accounting students will undertake university-level study and assignments demanded in degree-credit courses. Some courses such as Finance, Computer Science and Business Decision Analysis require at least a background knowledge of high school mathematics.

General Information
Admission:

The certificate programs are open to all interested individuals. With the exception of the Certificate in Electronic Commerce and the Certificate in Human Resource Management, there are no specific academic Prerequisites for students enrolled in the business certificate programs on a part-time basis, only a desire and willingness on the part of the student to engage in learning at a university level. However, students engaged in full-time study must receive Faculty approval to be admitted to the program.

Application forms are available at: www.unbsj.ca or from the Admissions Office (506) 448-5674.

Additional Information:
A brochure entitled “Certificate Programs in Administration” provides full information on regulations and course requirements and can be obtained by dialing (506) 448-5570 or 1-800-50-UNBSJ, by writing to The Faculty of
Business Administration Certificate Level I

Requirements:
A Business Administration Certificate Level I will be awarded to individuals who:

a. achieve a cumulative grade point average of at least 2.0 over the 30 credit hours required, and
b. successfully complete (with a C or better):

<table>

**NOTES:**
A. Although, the usual Math Prerequisites are waived for certificate students, it is recommended that students planning to proceed with the following: Business Administration Certificate Level II, Human Resource Management Certificate or the BBA or BAM degrees choose Math 1853 as an elective before studying BA 1216 and BA 1605. Most business courses have Prerequisites. Students who do not have credit for grade 12 academic Math and who intend to continue on to the BBA degree are urged to take MATH 1863 as one of their Business Administration Certificate Level I electives.

B. NOTE that although MATH 1863 is a credit towards the Certificate, it cannot be used as a credit towards the BBA, or BAM degrees.

Business Administration Certificate Level II:

Requirements:
The requirements for the Business Administration Certificate Level II are stated in terms of cumulative credit hours. The 30 credit hours required for the Business Administration Certificate Level I are included as part of the stated requirement of 60 credit hours for the Business Administration Certificate Level II.

A Business Administration Certificate Level II will be awarded to individuals who:

a. achieve a cumulative grade point average of at least 2.0 over the 60 credit hours required, and
b. successfully complete (with a C or better):

NOTE: The normal prerequisite for this course will be waived for students registered in this program.

Certificate in Human Resources Management

Admission to the Certificate in Human Resource Management program will require a minimum of either:
1. 30 credit hours at a recognized postsecondary institution with a minimum cumulative grade point average of 2.7 (B-) in all course work completed, or
2. At least 24 months of relevant work experience in the human resource area to be approved on an individual basis by the Faculty of Business in consultation with Organizational Behaviour/Human Resource Management faculty.

Because the courses offered in this program are largely upper level, the above admission criteria will be waived only in the most exceptional circumstances. However, if an applicant to the program believes that his or her application deserves special consideration related to either of the criteria above, he or she may submit a Permission and Request form to the Faculty of Business undergraduate studies office with an explanation for the reason for the request.

Requirements:
The Certificate in Human Resource Management will require the successful completion of 10 term courses (30 credit hours) as detailed below. For those candidates who have already received credit for more than fifteen credit hours of required courses, course selections may be made from the list of electives as replacements for any credit hours above fifteen.

A Certificate in Human Resource Management will be awarded to individuals who:
a. Achieve a cumulative grade point average of at least 3.0 (B) over 24 credit hours required, (excluding BA 1605 and BA 2606); and
b. Successfully complete (with C or better):

30 ch
To earn the degree, students must successfully complete 140 credit hours. 

**NOTE:** 70 credit hours are required to take be taken at UNB and 70 credit hours are allotted on successful completion of the accredited partner program.

**Admission Policy on English Language Proficiency**

The language of our program is English and prospective students whose mother tongue is not English may prove English language proficiency in one of the following ways:

i. Minimum TOEFL score on a paper-based test of 600.

ii. Minimum CanTEST scores of 5.0 on reading and listening, and 4.5 on writing.

iii. A minimum of 4 years full-time study in the English language in Canada.

Notwithstanding the above, students must demonstrate competence in speaking, listening, reading and writing English to meet course requirements.

**Required Courses**

**Year 1:**

- MATH 1001 (3 ch) or MATH 1003 (3 ch)
- BIOL 1105 / BIOL 1205 / BIOL 1017 (8 ch)
- CHEM 1041 / CHEM 1046 / CHEM 1072 / CHEM 1077 (10 ch)
- PHYS 1011 / PHYS 1021 / PHYS1012 / PHYS 1022 (10 ch)
- PSYC 1003 / PSYC 1004 (6 ch)

Students planning to apply for the Radiation Therapy program should complete BIOL 1105 and BIOL 1442 instead of BIOL 1105 / BIOL 1205 / BIOL 1017.

**Years 2, 3, and 4:**

In addition to the requirements of the appropriate accredited program, students must complete the following University courses:

- BA 2504 (3 ch)
- HSCI 3032 (3 ch)
- STAT 2263 (3 ch)
- one of PSYC 3383, PSYC 3693, PSYC 3711, PSYC 3723, PSYC 3724 or PSYC 3752 (PSYC 3711 is strongly recommended) (3 ch)
- HSCI 3061 (2 ch)
- PHIL 3133 (3 ch)
- HSCI 3092 (3 ch)
- PSYC 3033 (3 ch)
- one elective of 3000/4000 level in PSYC, NURS or BIOL courses (3 ch)
- one elective of any level (3 ch)
- one elective of 3000/4000 level (3 ch)

**Minor in Health Sciences**

The Health Sciences Minor is open to any student in a discipline that has a provision for a minor. To be considered, students must have completed 60 ch (i.e. four full-time terms) with a minimum GPA of 2.0. Interested students may contact the Nursing and Health Sciences Program Coordinator for academic advising.

The Minor in Health Sciences requires 23 ch with a minimum grade of C in each course consisting of:

**Required courses 11 ch:**

- HSCI 2001 (3 ch)
- HSCI 3061 (2 ch)
- PSYC 3033 (3 ch)
- PHIL 3133 (3 ch)

**Required Electives - 12 ch:**

- minimum 3 ch per course
- maximum of 9 ch from the lower (12xxx) level
- minimum of 6 ch from the two groupings: Life & Behavioural Sciences and Social Sciences/Humanities/Business

Students are responsible for ensuring they have completed appropriate prerequisites for any selected courses in the Health Sciences Minor.

The Nursing and Health Sciences Program Coordinator may approve the use of courses for Life & Behavioural Sciences Grouping or Social Sciences/Humanities/Business Grouping electives on an individual basis.

**Life & Behavioural Sciences Grouping**

**Lower Level:**

- BIOL 1205 Biological Principles, Part III (3 ch)
- BIOL 1441 Anatomy & Physiology I (3 ch) or BIOL 1441 (4 ch)
- BIOL 1412 Anatomy & Physiology II (3 ch) or BIOL 1442 (4 ch)

The Bachelor of Information Sciences (BISc) program is by design an interdisciplinary program involving core courses taken primarily from Business Administration, Computer Science, Economics, Mathematics and Statistics. The core subjects are particularly relevant to the collection, treatment, understanding and management of data (information) encountered in other academic disciplines as well as in business, industry, government and other areas. Emphasis is placed on the statistical methods and modern computing techniques of handling these data, the design and application of mathematical models, and the management of information within organizations.

This four-year degree program is offered in cooperation and in conjunction with departments in the Faculty of Science, Applied Science and Engineering, the Faculty of Business and the Faculty of Arts.

For general regulations on admission, please consult the appropriate section of the University calendar. Transfer into the BISc from another UNB degree program is not permitted if the GPA for the most recent assessment period is below 2.0. For transfer from another university, a CGPA equivalent to 2.0 at UNB is required.

UNB Saint John also offers a Bachelor of Arts with a Major in Information and Communication Studies. This interdisciplinary program explores the influences of communication technology, the media industries and information policy on society. Additional detail and program requirements can be found in this section of the Calendar under Bachelor of Arts, Information and Communication Studies.

General Regulations

It is recommended that students read the General University Regulations, Section B of the calendar, and in particular the subsection headed “Grading System and Classification.”

Curriculum

The basic curriculum of the degree consists of a specified set of core courses and a set of regulations governing the choice of others. A student's program is chosen in consultation with a faculty advisor. Two specializations are offered. Years 1 and 2 are the same in all specializations. In Years 3 and 4, students must choose to follow the Decision and Systems Science Specialization, or the Decision and Business Management Specialization.

II. Regulations Governing Course Selection

1. At least 6 ch of courses selected from HUM 2003, HUM 1021, HUM 2021, ICS 1001, ICS 2001, ICS 3001, ICS 3005, and any ENGL course, WLIT 2503, PHIL 1053 and PHIL 2111.

Decision and Systems Science Specialization

2. At least 3 ch of courses must be chosen from upper-level Computer Science, Mathematics or Statistics courses. These courses are in addition to those listed in I.
3. Three credit hours (3 ch) from either MATH 3753 or MATH 3903.
4. Three credit hours (3 ch) in upper-level Statistics. These courses are in addition to those listed in I or chosen to fulfill II.2.
5. At least 3 ch selected from disciplines in Arts or Business to be approved by faculty advisor.

Decision and Business Management Specialization

6. At least 12 ch of courses selected from disciplines in Arts, Business or Science, Applied Science and Engineering to be approved by faculty advisor.
7. Twelve credit hours (12 ch) of courses selected from CS 2253, CS 2998, CS 3033, CS 3403, CS 3423, CS 4033, CS 4525 and DA 4403.

A grade of C or better is required in all required courses and all courses selected under II.1-II.7

An example of what would typically be taken by a student in the first year of the degree program follows:

Program Goal
The goal of the Nursing Programs at UNB Saint John is to educate caring professional nurses. Faculty believe that professional nursing encompasses five interrelated areas of competency: Knowledge and its Application, Communication, Critical Thinking/Skills of Analysis, Professional Identity, and Social Justice/Effective Citizenship.

BN Program
In 1989, the membership of the Nurses’ Association of New Brunswick (NANB) voted to establish a baccalaureate degree in Nursing as the entry level to the profession by the year 2000. In 1994, the Minister of Advanced Education and Labor announced the government’s support of this goal by transferring the total responsibility for nursing education in New Brunswick to the universities. In the fall of 1995, the Bachelor Nursing Program at the Saint John campus of UNB admitted its first students.

The degree program spans four years of general and professional education. On completion of the program, graduates are eligible to write the National Council Licensure Examination for Registered Nurses (NCLEX-RN) procure registration in the Province of New Brunswick. Those who are successful are eligible to obtain registration across Canada.

UNB Saint John’s four-year Baccalaureate Program in Nursing includes a majority of course work in nursing, and courses from the liberal arts and sciences. Many nursing courses provide opportunities for clinical practice. Students work with individuals, families, groups and communities, and with persons at various stages of the life cycle and in a variety of settings.

Costs
Nursing students practice in a variety of clinical facilities and agencies. All students will be expected to travel out of town for some clinical experiences. In some instances, overnight accommodation will be required. Students may also expect to complete clinical experiences during evenings, nights, and weekends to meet clinical course requirements and in accordance with availability of clinical placements and/or instructors. Normally clinical courses are completed in early June (BN program). However, depending on the availability of clinical facilities and/or instructors, these time frames may be extended. Students will be provided with notice of clinical scheduling as soon as it is feasible. All students must provide proof of required immunizations. Clinical agencies may not permit students who are not fully immunized to access facilities and may ask students at any time to provide proof of the following mandatory immunizations: Diphtheria, Pertussis, Tetanus, Polio, Haemophilus Influenza type B, Measles, Mumps, Rubella, and Varicella; appropriate Diphtheria and Tetanus boosters; and series of Hepatitis B immunizations and immune status. Students also must have an initial 2-step Mantoux test for Tuberculosis. Further details are contained in relevant program policies. Additionally, in order to participate in nursing clinical courses, students must have current CPR Certification Basic Rescuer (Level C) and submit a yearly criminal record check. In addition, some clinical agencies require students to have a Social Development Reference check as described in the Family Services Act of New Brunswick, prior to the clinical practice experience.

Regulations
University Regulations
Students are responsible to read carefully Section B of this Calendar, General University Regulations, and in particular the subsection headed Graduation and Classification.

Transfer and mature students are particularly advised to consult Section B. Students applying for a second undergraduate degree will take Nursing courses and the required Arts and Science courses in the program, if they have not already taken them. Questions concerning the application of regulations must be made to the Registrar in writing.

Any point not covered in the following regulations will be governed by the General University Regulations.

Admission Policy on English Language Proficiency
Admission Policy on English Language Proficiency: complete four or more consecutive years of full-time education in English in a country where English is the principal language.

(http://www.unb.ca/international/prospective/adminreq/englishlanguage.html)

The language of our program is English and prospective students whose mother tongue is not English may prove English language proficiency in one of the following ways:

i. Minimum TOEFL score on a paper-based test of 600.
ii. Minimum CanTEST scores of 5.0 on reading and listening, and 4.5 on writing.
iii. A minimum of 4 years full-time study in the English language in a country where English is the principal language.

Notwithstanding the above, students must demonstrate competence in speaking, listening, reading and writing English to meet course requirements.

General Regulations
Admissions, Transfers and Progression Committee
This Department Committee has a mandate to make decisions on issues that pertain to admissions, transfers, and progression of students through the Nursing Program and to implement the Level 1 suspension investigation process per the Unsafe Practice Policy.

Admission: Candidates who are interested in pursuing nursing education are advised to read the Document Becoming a Registered Nurse in New Brunswick: Requisite Skills and Abilities. This document describes the skills and abilities required of students to successfully progress through a nursing education program and achieve the established entry-level competencies for registered nurses in New Brunswick. The document can be found at: http://www.nanb.nb.ca/media/resource/NANB-RequisiteSkillsAbilities.pdf

1. University regulations state that a student whose assessment grade point average (GPA) falls below 2.0 will be placed on academic probation (UNB Calendar: Standing and Promotion Requirements). In addition to this regulation, a Nursing student whose assessment grade point average (GPA) falls below 1.7 may be required to withdraw from the program.
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

Bachelor of Nursing Degree for Licensed Practical Nurses Bridge Pilot

Licensed Practical Nurses (LPNs) will be able to gain access to an LPN Bridge, a cluster of required university courses that, upon successful completion, qualify them to apply for admission to the Bachelor of Nursing (BN) degree if they (1) hold current memberships in the Association of New Brunswick Practical Licensed Nurses (ANBPLN) in good standing, and (2) are a graduate of either the 18 month or two year NBCC Practical Nurse programs. Of the NBCC graduates of the 18 month program must be graduates from 2003 and onward and NBCC graduates from the 2-year program must be graduates from 2009 and onward. If an 18 month graduate, the applicant must provide proof of successful completion of both the Adult Physical Assessment (NCSI 1038) and the Introduction to Pharmacology (PHMC 1018) courses. Students must have achieved a minimum grade of 75% in every course in their previous LPN program and in each of the additional courses identified, if applicable. Finally, students require successful completion of High School English and Mathematics with a minimum grade of 60%.

Since there are non-academic requirements associated with the next step in the admission process, namely being admitted to the BN program, students are advised to familiarize themselves with all admission requirements before applying to the Bridge Courses.

The following required courses comprise the LPN Bridge:

- NURS 2101 (3ch) - Concepts for Professional Nursing Practice
- HUM 1021 (3ch) - Effective Writing I
- STAT 2263 (3ch) - Statistics for Health Sciences
- BIOL 2831 (3ch) - Pathophysiology I
- NURS 2051 (3ch) - Clinical Decision Making
- PSYC 1003 (3ch) - Introductory Psychology I

To subsequently be admitted to the BN Program, LPN Bridge applicants must meet the following requirements: (1) a minimum Grade Point Average (GPA) of 3.0 on the six successfully completed Bridge courses with no grade less than C in any one course, (2) and provide proof of current registration with the Association of New Brunswick Practical Licensed Nurses (ANBPLN) in good standing (3) a completed criminal record check, (4)current CPR certification, and (5) current immunization status as per the policy of the Department of Nursing & Health Sciences, and (6) completion of a medical as per the policy of the Department of Nursing & Health Sciences.

LPN to BN Bridge students must apply to enter the BN program for the upcoming year following NURS 3112 (a) with a minimum grade of 60%.

 BN/LPN Requirements: A minimum of 51 ch comprised of 18 ch from the Bridge plus 63ch from years 3 & 4 of the BN (Basic) curriculum.

Bachelor of Nursing Degree for Registered Nurses

This BN/RN program is for graduates of two- and three-year diploma nursing programs. Requirements for admission include proof of successful completion of a diploma in nursing and have an active registration with the Nurses Association of New Brunswick.

Many students choose to pursue this degree on a part-time basis. Full time BN/RN students complete the Program within 6 years of enrollment. Part-time BN/RN students must complete the Program within 10 years of enrolling in the first nursing courses.

Credit hour requirements for BN/RN Program

BN/RN Program Minimum 54 ch

Required Non-Nursing Courses (6 ch)

PHIL 3133, STAT 2263 or equivalent (3 ch)

Electives (18 ch)

1. Students take a minimum of 18 ch of open electives.
2. Students may be granted 3 ch or one open elective for one current CNA certification.
3. No restrictions are placed on the level at which elective courses are taken; students are advised to take upper-level electives where and when possible.

Required Nursing Courses (40 ch)

(See Section E of the Calendar for course descriptions)

- NURS 2011 (3ch); NURS 3033 (3ch); NURS 3081 (3ch); NURS 3092 (3ch)
- NURS 4211 (3ch); NURS 3045 (4ch); NURS 3067 (4ch); NURS 3167 (2ch); NURS 4142 (3ch); NURS 3061 (2ch)

Physics
- Backman, Philip J., BSc (Dal), MSc (UND), Sr Teach Assoc - 2012
- Xu, Li-Hong, BSc (Suzhou), PhD (UNB), Prof - 1994
Students are strongly encouraged to read Section B of the Calendar for General Regulations governing the degree. General information on the BSc degree can also be found in Section G of the Calendar.

In the Faculty of Science, Applied Science and Engineering, the minimum acceptable grade in a required course or course being used as a prerequisite is normally a grade of "C". Any student who fails to obtain a "C" or better in such a course must repeat the course (at the next regular session) until a grade of "C" or better is attained. Students will not be eligible for graduation until such deficiencies are removed. Please see specific degree programs for further information.

Students in the degree programs of Bachelor of Science, Bachelor of Science in Computer Science, Bachelor of Information Sciences, and Bachelor of Nursing, who complete the requirements for approved minor programs at UNB, will receive recognition of the minor upon completion of the respective degree program.

Students who have completed three full years of a BSc program with the University of New Brunswick and enter a program leading to a degree in a science-based health profession at a recognized school may be granted the BSc degree. To be eligible for consideration under this policy: (1) a student must be enrolled in a professional program that includes the equivalent of at least 7 term courses in science which are recognized by the Faculty of Science, Applied Science and Engineering at UNB to be of upper level science material; (2) a student must have successfully completed at least 7 of these recognized course equivalents.

The Faculty has determined that these requirements can be satisfied by students who have successfully completed two years of Medicine, Dentistry or Veterinary Medicine, or three years of Pharmacy, or graduated from Optometry.

Students wishing to be considered for a BSc general degree who satisfy the above conditions must apply in writing, complete with official transcripts, to the Registrar.

CURRICULUM

Although similar, the first-year requirements for the various BSc options differ from one another. They are specified separately for each option. In the second and succeeding years, students will typically specialize by taking courses appropriate to one of many options that are available to them. Nine of these (Biology, Chemistry, Environmental Biology, Geology, Marine Biology, Physics, Psychology, Mathematics, and Statistics) lead naturally to specialization. Seven interdepartmental programs (Biology-Chemistry, Biology-Mathematics-Statistics, Biology-Psychology, Chemistry-Geology, Chemistry-Mathematics, Chemistry-Physics and Mathematics-Economics) are available. The remaining option, General Science, provides a variety of choices in both Science and Arts electives.

Normally all Psychology courses counted toward the BSc. Psychology Major, Psychology Honours degree and the Bio-Psychology Major and Honours degree must have been completed within the 10 years prior to graduation.

NOTE: Students should note that the full four years required for programs in Mathematics, Statistics, Economics, Psychology, Biology, Marine Biology, Environmental Biology, Biology-Psychology, Mathematics-Economics, Information Sciences and Computer Science and Computer Science may be completed on the Saint John campus and that the Marine Biology and Information Sciences programs are offered only on the Saint John campus. The full four years of a General Science option are also offered at Saint John.

Certificate Programs in Science, Applied Science and Engineering

Certificate in Community Leadership

Eligibility
- Open to BSc students at UNB Saint John who will be entering the 3rd year of their program.
- Applicants must have a CGPA of 2.7 or higher.
- Applicants must have a combination of academic success, community service and other extracurricular activities.

Admissions
- Complete and submit an application form to the Dean of Science, Applied Science and Engineering Office.
- Submit a statement outlining your interest in the program and explaining your version of the role of community leaders.
- Submit a resume detailing community service and extra-curricular activities you have been or currently are involved in.
- Submit an unofficial transcript.

To be awarded the Certificate, students admitted to the program will be required to complete a minimum of 160 hours of community service, 4 courses from a listing of applicable courses, 3 workshops, and 1 training session. All components must be completed before a student earns the Certificate designation. For continued participation in the program, students will be required to maintain a CGPA of 2.7 or higher. Enrolment in the program across Faculties will be limited to a maximum of 15 students each year.

Certificate in Data Analytics

Nowadays, massive amounts of data are available via the Internet, or they are stored in the companies’ databases. The main problem faced is how to leverage such data into information useful for decision making. The main purpose of this certificate is to help build the skills necessary to tackle this problem.

This certificate is meant for students having a previous background in computer science, engineering, business, or science, or students currently in their final year of such a degree, and who are interested in upgrading their skills to be able to analyze data in their field. High School students with industry experience are also welcome to this program. Students with no prior background may take it as well, but they should expect to take more time to complete it, as they will have to take a significant number of prerequisite courses in addition to the core program.

The certificate is composed of 3 required courses that form the basis of data analytics. The subjects covered in those required courses include: data storage into databases, SQL queries, statistical analysis through linear regression, and finally data visualization and data mining techniques so that data can be converted to information useful for decision making. In the 2 elective courses, the student can build further their knowledge in the area(s) of their choice, which make up the data analytics Field: data acquisition and integration, data storage, data visualization, data mining, and statistics; including the current technologies used in industry.

General Regulations

1. Each person entering the program must have the approval of the Data Analytics Governance Committee (data_analytics@unb.ca)
2. Only two of the five courses listed below for the certificate may be transferred from another degree or similar program. The DA 4993 project cannot be transferred.
3. Normally a student must have grade 12 mathematics to enter the program. Math 1863 may be taken as one of the optional courses in the certificate program by those students who do not have grade 12 mathematics from high school or feel that they are weak in the subject.
4. To earn a certificate a student must successfully complete all required courses, elective courses, and the project, with a grade of C or better.

Requirements
- 3 required courses: INFO1103, STAT4703, and DA4403
- 2 elective courses from: CS2383, CS3423, CS3773, CS4525, CS4783, STAT3083, STAT3703, STAT 3093, STAT4043, STAT4203, STAT4243, DA 4903 / DA 4813 / CS 4989 / CS 4999, BA3126
- 1 project (DA4993), which should be an industry-related project or a research-related project, involving a large amount of data.

NOTE: Students should also ensure that the Prerequisites courses are passed. In particular, the following courses are Prerequisites to the required courses above:
1. CS 1073
2. STAT 1793 and STAT 2793 (or one equivalent sequence: BA1605/BA2606, PSYC2901/PSYC3913, or STAT3083/STAT3093)

Students with a prior degree in BSc or BScS would have such Prerequisites covered. Students with a prior degree in business, economics, biology, psychology (except BA major in psychology, with only PSYC2901), mathematics, or statistics, would most probably have already the proper background in statistics (#2 above). Students with a prior degree in engineering (assuming STAT2593 and CS1003 already taken) would have to take STAT2793 and CS1073. Engineering students who have taken CS1023 could take CS2516 rather than CS1073 (covering CS1083 as well, which might be required for some elective courses).

This certificate requires a minimum of three terms of courses, followed by a project to complete the program on a full-time basis. An example of a course schedule for students without the Prerequisites is as follows:

<table>
<thead>
<tr>
<th>Fall Courses</th>
<th>Winter Courses</th>
<th>Fall Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 1093</td>
<td>STAT 2793</td>
<td>CS 1093</td>
</tr>
<tr>
<td>STAT 1793</td>
<td>INFO 1103</td>
<td>STAT 1793</td>
</tr>
<tr>
<td>MATH 1503</td>
<td></td>
<td>MATH 1503</td>
</tr>
</tbody>
</table>

Information about elective courses (to help in course selection):
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

CS 2383 - data structures and algorithms
CS 1073
CS 1303

For students who are planning on writing programs to perform specific analyses, this course presents data structures that will help manipulate data internally in an efficient way.

CS 4525 - database management systems II
INFO1103
CS1073/CS1083
CS2253
CS3403

For an advanced coverage of database technologies (including data warehouse).

CS3423 - data management
CS1073/CS1083

Covers technologies used in the storage and manipulation of data, outside of a database framework (e.g., XML, regular expressions, etc.).

CS3773 - Topics in Web Science

Provides an overview of Web-based architectures and applications facilitating online data analytics using open data.

CS4783 - Web: Semantics, Services and Solutions
CS1073/CS1083
CS1303
CS2383

Focuses on methodologies and infrastructures driving the migration toward the semantic web. Covers interoperability, distributed data services, information retrieval, information extraction, web services and workflow technology.

STAT4203 - intro to multivariate data analysis
STAT 1793 and STAT2793, or equivalent (see #2 above)
MATH1503 or MATH2213

More advanced statistical techniques for dealing with a large number of variables (including how to reduce that number of variables using principal components analysis).

STAT4243 - statistical computing
CS 1703 or CS1003
STAT 1793 and STAT2793, or equivalent (see #2 above)

For programming in R, the language of choice when it comes to using libraries of statistical techniques.

STAT4043 - sample survey theory
STAT 1793 and STAT2793, or equivalent (see #2 above)

For those who are planning on gathering and analyzing data through surveys.

STAT3083 - probability and mathematical statistics I
MATH1013
STAT1793 or equivalent

In depth study of common probability distributions on which most statistical analyses and decision making rely.

STAT 3093
STAT 3083
STAT 2793 or equivalent (see #2 above)

Covers fundamental statistical interference concepts at a more a more in depth level than in the introductory statistics courses, as well as other common but more advanced estimation methods.

STAT3703 - experimental design
STAT 1793 and STAT2793, or equivalent (see #2 above)

Basic + complex designs for organizing experimental data collection and corresponding data analysis procedures.

DA 4803/DA 4813 (independent studies in DA)

Department approval

For covering topics of interest that are not currently included in available courses (e.g., BIG Data Technologies). Students can also choose topics of supportive of their project

CS 4998/CS4999 (directed studies in CS or applied CS)
BA 3126 - BA 2123
Frontiers of E-Commerce I
BA 2663

This courses incorporates a lot of data visualization techniques.

Further information may be obtained by contacting data_analytics@unb.ca. In particular, the Department of Computer Science’s web site will be updated with information about the current tools and technologies taught in the computer science courses making up the certificate, and project details.

BIOLOGY, ENVIRONMENTAL BIOLOGY, AND MARINE BIOLOGY OPTIONS

Honours and Majors Programs

Students planning on specializing in Biology, Environmental Biology or Marine Biology are requested to seek counselling from the SASE Undergraduate Advisor.

Students intending to apply to the honours program are advised to consult with their intended faculty member supervisor at the beginning of their third year. An Honours student must complete the requirements for their Major and complete BIOL 4090 (Honours Project) as one of their required upper level Biology Courses.

An Honours student must achieve a minimum final CGPA of 3.7 to obtain First Class Honours standing upon graduation. A student completing all course requirements for Honours program but having a CGPA below 3.0 will be given a Majors degree upon graduation.

Biology, Environmental Biology, and Marine Biology Majors can specialize in Zoology. Information on the specific courses required for this specialization is available from the Department of Biology.

Biology Option

The following courses are required for all Biology, Majors and Honours students:

First Year
1. BIOL 1105, BIOL 1205, BIOL 1017.
2. CHEM 1041, CHEM 1046, CHEM 1072, CHEM 1077.
3. MATH 1001.
4. STAT 1793.
5. 10 ch of courses selected from GEOL or PHYS.

Second Year
1. BIOL 2125, BIOL 2485, BIOL 2585, BIOL 2615, Plus one of either BIOL 2015, BIOL 2065 or BIOL 2245.
2. CHEM 2421.
3. STAT 2793.
4. A minimum of 9 ch in approved electives.

It is expected that students will take a minimum of 36 ch during their second year.

Third and Fourth Years
1. 42 ch of advanced Biology courses. This can include BIOL 4090 and the two remaining second year elective Biology courses (BIOL 2015, BIOL 2065 or BIOL 2245).
2. 18 ch of approved electives with at least a minimum 12 ch being from non-Biology electives.
3. A total of at least 137 ch is required for graduation.

Environmental Biology Option

All properly qualified students entering the first year of the BSc Environmental Major program will normally complete the following courses:

First Year
1. BIOL 1105, BIOL 1205, BIOL 1017, BIOL 1302.
2. CHEM 1041, BIOL 1046, BIOL 1072, BIOL 1077.
3. GEOL 1044.
4. ECON 1013, ECON 1023.
5. MATH 1001.

A minimum of 3 ch in approved electives, for a total of 38 ch.

Second Year
1. BIOL 2125, BIOL 2485, BIOL 2585, BIOL 2615, plus one of BIOL 2015, BIOL 2065, BIOL 2245.
2. CHEM 2421 and BIOL/CHEM 3245 or CHEM 2421 and CHEM 2422.
3. STAT 1793.
4. ECON 3755.

Third and Fourth Years
1. 6 ch SOCI.
PHIL 3241, PHIL 3242, PSYC 3752 or equivalents.

Arts, of which 6 ch must be chosen from ENGL, PHIL 2111, PHIL 2112, PHIL 2113.

Mathematics, 18 approved electives.

Minor:

Mathematical Chemistry Honours:

Mathematical Chemistry Major:

The minimum credit hour requirements beyond first year are:

First Year

1. BIOL 1105, BIOL 1205, BIOL 1017, BIOL 1202.
2. CHEM 1041, CHEM 1046, CHEM 1072, CHEM 1077.
3. MATH 1001, STAT 1793.
4. GEOL 1044.
5. A minimum of 6 ch in approved electives, for a total of 38 ch.

Second Year

1. BIOL 2125, BIOL 2485, BIOL 2585, BIOL 2615, plus one of BIOL 2015, BIOL 2065 or BIOL 2245.
2. CHEM 2421
3. STAT 2793.

It is expected that students will take a minimum of 38 ch during their second year.

Third and Fourth Years

1. 46 ch from advanced Biology courses. This can include BIOL 4090 and the two remaining second year elective Biology courses (BIOL 2015, BIOL 2065 or BIOL 2245). 30 ch must be from courses designated as having a marine content including BIOL 3165, BIOL 3755, BIOL 3875, BIOL 3955, BIOL 4645, and BIOL 4775.
2. 18 ch of approved electives with at least a minimum 12 ch being from non-Biology electives.
3. A total of at least 139 ch is required for graduation.

NOTE Concerning Transfer to the Fredericton Campus

Students are strongly advised to seek academic advising from a member of the Biology Department on the Fredericton Campus prior to commencing the transfer process.

CHEMISTRY OPTION

The first year of five UNBF programs is offered on the Saint John campus: Major, Honours, Honours Co-op, Medicinal Chemistry Majors, and Medicinal Chemistry Honours. Some upper year level courses are also available. A Minor program is offered for students in other departments within and outside of the Faculty of Science, Applied Science and Engineering who are interested in a coherent package of chemistry courses.

First Year

- CHEM 1041, CHEM 1046, CHEM 1072, CHEM 1077.
- PHYS 1011, PHYS 1012, PHYS 1021, PHYS 1022, MATH 1003, MATH 1013.
- Either BIOL 1105, BIOL 1205, BIOL 1017, and 6ch approved electives.
- BIOL 1006 will need to be completed in Fredericton to obtain a full year Biology credit.

The minimum credit hour requirements beyond first year are:

Major: 72 ch Chemistry, 3 ch Biology, 6 ch Mathematics, 18 ch approved electives.

Honours: 76 ch Chemistry, 3 ch Biology, 6 ch Mathematics, 18 ch approved electives.

Honours Co-Op: 76 ch Chemistry, 3 ch Biology, 6 ch Mathematics, 18 ch approved electives, two work terms.

Medicinal Chemistry Major: 68 ch Chemistry, 3 ch Biology, 6 ch Mathematics, 18 ch approved electives.

Medicinal Chemistry Honours: 74 ch Chemistry, 3 ch Biology, 6 ch Mathematics, 18 approved electives.

Minor: 24 ch Chemistry

NOTE 1: See Chemistry Option Fredericton for detailed description.

NOTE 2: A minimum of 12ch of the electives must be from the Faculty of Arts, of which 6 ch must be chosen from ENGL, PHIL 2111, PHIL 2112, PHIL 3241, PHIL 3242, PSYC 3752 or equivalents.

Second/Third/Fourth Year Courses

- CHEM 2009
- CHEM/BIOI 2065 Biochemistry
- CHEM 2416, CHEM 2421, CHEM 2422, and CHEM 2457 - Organic Chemistry
- CHEM/BIOI 3245 Environmental Chemistry
- CHEM 3335 Chemical Management Practices
- CHEM 3435 Biomolecules and Primary Metabolism
- CHEM 4435 Biologically Active Natural Products and Secondary Metabolism

GEOLGY OPTION

The Saint John campus offers courses designed to lay the groundwork for the Geology degree, which must be completed on the Fredericton campus. Please see the Fredericton Degree Programs section for descriptions of the three Geology programs: Pass, Major and Honours.

The following courses are designed for Pass, Major and Honours students:

First Year

1. GEOL 1044, GEOL 1074.
2. MATH 1003, MATH 1013.
3. CHEM 1041, CHEM 1046, CHEM 1072, CHEM 1077.
4. A minimum of 14 ch in approved electives, for a total of at least 40 ch.

Students are required to successfully complete BIOL 1105, BIOL 1006 (Fredericton), BIOL 1205, BIOL 1017, and PHYS 1010, PHYS 1020 (or Fredericton equivalents PHYS 1040, PHYS 1045) prior to graduation. These courses need not be completed in the first year of study, but it is recommended that as much as possible of this requirement be completed before transferring to the Fredericton campus.

After the first year of study, completion of GEOL 1703, Field School (7 days), is recommended. See Course Descriptions - Fredericton.

Second Year

Depending on availability, students are encouraged to take as many as possible of GEOL 2131, GEOL 2142, GEOL 2201, GEOL 2212, GEOL 2321, GEOL 3222, and GEOL 3442.

1. MATH 2003, MATH 2013.
2. CHEM 2601, CHEM 2622.
3. CS 1003.
4. Enough approved electives to make a minimum total of 40 ch.

After the second year of study, completion of GEOL 2703, Field School (14 days), is recommended. See Course Descriptions - Fredericton.

GENERAL SCIENCE OPTION

1st Year (Minimum 36 ch)

CHEM 1041, CHEM 1046, CHEM 1072, CHEM 1077; MATH 1003, MATH 1013; and PHYS 1010, PHYS 1020 plus one combination of; BIOL 1105, BIOL 1205, BIOL 1017 and PSYC 1003, PSYC 1004 or GEOL 1044, and GEOL 1074. (See NOTE #1)

2nd Year (Minimum 31 ch)

BIOL 1105, BIOL 1205, BIOL 1017 and PSYC 1003, PSYC 1004 or GEOL 1044, GEOL 1074; 21 ch at the second year level in two areas of concentration selected from Biology, Chemistry, Geology, Mathematics, Physics, Psychology, Statistics or Engineering.

3rd and 4th Years (Minimum 64 ch)

42 ch Upper level Biology, Chemistry, Geology, Mathematics, Physics, Psychology, Statistics or Engineering. (At least 12 ch in the two areas of concentration selected, with no more than 24 ch in one area.)

22 ch Approved electives. (At least 12 ch must be selected from Arts, Business, Computer Science, Data Analysis). Recommended electives: HUM 2121, HUM 3121, PHIL 1053, PHIL 2111, PHIL 2112, PHIL 3241, PHIL 3243

Total 135 ch minimum

NOTE 1: Both the BIOL 1105, BIOL 1205, BIOL 1017, PSYC 1003, PSYC 1004 combination and GEOL 1044, GEOL 1074 must be completed before graduation. Course selection in the first year should be done in a manner which allows progression to the two areas of concentration planned for the upper years.

For graduation, students will be listed in three divisions as for other BSc students, but a student achieving a cumulative grade point average of 3.5 or better will graduate with distinction.

NOTE 2: The General Science options offered on the two campuses differ from one another. The regulations governing the General Science option offered at UNBF are given in Section G.
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

NOTE 3: Courses from other institutions will be considered for credit toward this program, pending approval by the Department of Physical Sciences. This affords the students an opportunity to participate in “study abroad” or pursue study in a topic area that is currently not available on the Saint John campus.

MATHMATICS OPTIONS

Mathematics Major

A Minimum grade of C is required in the courses counting for credit for this program. In exceptional circumstances a grade of D may be acceptable with the approval of the Chair of the Department in courses offered through the Faculty of Arts or the Faculty of Business.

First Year (Minimum 38 ch)

a. MATH 1003, MATH 1013, MATH 1503

b. At least 18 ch in lecture courses and at least 8 ch in laboratory courses chosen from:

- BIOL 1105, BIOL 1205, BIOL 1017
- CHEM 1041, CHEM 1046, CHEM 1072, CHEM 1077 (CHEM 1872/1877 (5ch) can be used to replace CHEM 1072/CHEM 1077 (5ch).)
- GEOL 1044, GEOL 1074
- PHYS 1011, PHYS 1012, PHYS 1021, PHYS 1022.
  - (APSC 1013/APSC 1023 (10ch) can be used to replace the full PHYS sequence (10ch).)
- It is recommended that students take at least 6 ch in PHYS courses
- c. A minimum of 3 ch in approved electives.

NOTE: Geology courses include laboratory component

NOTE: It is recommended that MATH 2203 is taken in the first or second year.

Second Year (Minimum 31 ch)

MATH 2203, MATH 2513, MATH 2523, STAT 1793, STAT 2793 plus a minimum of 15ch of approved electives.

Third Year and Fourth Year (Minimum 60 ch)

a. MATH 3213, MATH 3713, MATH 3733, STAT 3083; STAT 3093 plus 15 ch of upper level MATH courses (excluding MATH 3633). One (3ch) upper level STAT course may be counted as part of these 15 ch.
- Plus 21 ch of upper level (3-4000 level) elective courses approved by the department.
- c. An additional 9 ch of electives at any level.

NOTE: At least 3 ch of Computer Science (excluding CS 1303) are required in the program

Mathematics Minor

A student who intends to pursue a Minor in Mathematics is required to take 24 ch in Mathematics. Credit must be obtained for MATH 1003, MATH 1013 and either MATH 1503 or MATH 2213. The remaining 15 ch of the Minor must consist of Mathematics courses at the second year level, or above. A maximum of 6 ch of Statistics courses, at any level, may count towards the 15 ch. MATH 3633 cannot be taken for credit towards the Minor in Mathematics.

Calculus Challenge Exam

This examination which is held in early June is open to students registered in a Calculus course at a high school that has made arrangements with the Department of Mathematics and Statistics. A fee will be charged.

Students who qualify for credit will receive a certificate entitling them to credit for and thereby exemption from Math 1003 when they register at UNBSJ. Upon the student’s acceptance of the credit, the letter grade of the exam will be recorded on their transcript.

Certificate in Mathematics for Education

The Certificate in Mathematics for Education is open to all interested students, however it is primarily intended for current and future school teachers for whom mathematics is a potential teachable subject, or ones who simply wish to expand their knowledge in the field of Mathematics.

This Certificate can be taken as a stand-alone program or in conjunction with a degree program, with the approval of the appropriate faculty.

Candidates for admission to the Certificate must meet the University’s requirements for admission to any of the faculties, or the requirements for admission as mature students.

The Certificate consists of 30 credit hours (10 courses) as outlined below. A grade of C or better is required in each of the courses.

Mathematics Requirement:

MATH 2633 Fundamental Principles of Elementary School Mathematics
MATH 3633 Fundamental Principles of School Mathematics
MATH 1003 Introduction to Calculus I*
MATH 1013 Introduction to Calculus II
MATH 1503 Introduction to Linear Algebra** (or equivalent)
MATH 3093 Elementary Number Theory

Statistic Requirement:

STAT 1793 Introduction to Probability and Statistics (or equivalent)

Education Requirement:

ED 3424 Teaching Elementary School Mathematics

Additional Requirement:

1. One of Math 2203 or Math 3343;
2. Three credit hours in Mathematics, Statistics, or Computer Science, chosen in consultation with the Department of Mathematics and Statistics; BA 3923 or ECON 3685 may be accepted as substitutions.

NOTES:

* Students who do not have the Prerequisites for this course are required to pass MATH 1863 before enrolling in Math 1003.

MATHMATICS AND ECONOMICS OPTION

The motivation for the program is to equip students with the necessary analytical skill to pursue a graduate degree in either Economics or Mathematics. The combination of Mathematics in their Economics courses and the rigorous techniques from Mathematics will aid students in their problem-solving skills.

First Year (Minimum 38 ch)

a. MATH 1003, MATH 1013, MATH 1503

b. At least 18 ch in lecture courses and at least 8 ch in laboratory courses chosen from:

- BIOL 1105, BIOL 1205, BIOL 1017
- CHEM 1041, CHEM 1046, CHEM 1072, CHEM 1077 (CHEM 1872/1877 (5ch) can be used to replace CHEM 1072/CHEM 1077 (5ch).)
- GEOL 1044, GEOL 1074
- PHYS 1011, PHYS 1012, PHYS 1021, PHYS 1022.
  - (APSC 1013/APSC 1023 (10ch) can be used to replace the full PHYS sequence (10ch).)
- It is recommended that students take at least 6 ch in PHYS courses
- c. A minimum of 3 ch in approved electives.

NOTE: Economics Requirements:

- ECON 3013, ECON 3023 plus 21 ch of economics courses or approved substitutes. ECON 3685 is highly recommended.

Mathematics Requirements:

- MATH 3713, MATH 3303 (or approved substitute), STAT 3083, STAT 3093
- Three chosen from: MATH 3073, MATH 3243, MATH 3503, MATH 3713, MATH 3733
- One chosen in consultation with the Department of Mathematics.

Second Year (Minimum 31 ch)

- MATH 2203, MATH 2513, MATH 2523, STAT 1793, STAT 2793, ECON 2013, ECON 2023 plus electives equivalent to 3 term courses (term courses are typically 3-5 ch). It is recommended that some of these electives be Computer Science courses.

Third Year and Fourth Year (Minimum 60 ch)

Economics Requirements:

- ECON 3013, ECON 3023 plus 21 ch of economics courses or approved substitutes. ECON 3685 is highly recommended.

Mathematics Requirements:

- MATH 3713, MATH 3303 (or approved substitute), STAT 3083, STAT 3093
- Three chosen from: MATH 3073, MATH 3243, MATH 3503, MATH 3713, MATH 3733
- Two chosen from: STAT 3703, STAT 4043, STAT 4243, STAT 4703

Plus an additional 6 ch of electives at any level.

NOTE: 1. Students are strongly advised to take the required courses ECON 1013 / ECON 1023 in their first year.
2. At least 3 ch of Computer Science are required in the program.
3. Students who are interested in pursuing graduate work in Mathematics must take MATH 3733.
4. Credit will not be given for both STAT 4703 and ECON 4645.

PHYSICS OPTION

The first year of UNBF Physics Program is offered on the Saint John campus. The two programs are:

1. Honours: This program is designed primarily for qualified students intending to pursue a postgraduate education. The Honours program requires more specialization and a greater overall course load than the Major program.
2. **Major:** The Major program allows a wider choice of courses outside the Psychology Department and a somewhat reduced course load. In addition a student may specialize in Physics or Applied Physics. The Applied Physics program may be entered by any student with a satisfactory record in either first year Science or first year Engineering. It is recommended that students in Applied Physics take, CS 1003 in the first year. The Applied Physics program is not an Engineering program and does not satisfy the requirements for a PEng qualification.

All properly qualified students entering the first year of the BSc Physics program will normally complete the following courses:

- **First Year**
  - PHYS 1011, PHYS 1012, PHYS 1021, PHYS 1022
  - MATH 1003, MATH 1013
  - CHEM 1041, CHEM 1046, CHEM 1072, CHEM 1077
  - Either BIOL 1105, BIOL 1205, BIOL 1017 and 6 ch of electives; or
  - GEOL 1044, GEOL 1074 and 6 ch of electives

**PSYCHOLOGY OPTION**

**General Information and Curriculum**

The Psychology discipline offers Majors and Honours Bachelor of Science degrees. Course requirements common to the Majors and Honours BSc degree are as follows:

- **PSYC 1003, 1004**
- **PSYC 2102**
- **PSYC 2901**
- **PSYC 3913** (in third or fourth year) 2 1/2 full course equivalents as electives.
- **PSYC 4053** (in third or fourth year)

Each degree program requires the equivalent total of 20 full courses and course selection for each program should conform to the following pattern.

**First and Second Year**

- BIOL 1205, 2615
- CHEM 1041, 1046, 1072, 1077
- MATH 1001
- PSYC 1003, 1004, 2102, 2901 (or equivalent)
- 1 additional full course equivalent in Psychology.
- 2 full course equivalents from List A.
- 2 1/2 full course equivalents as electives.

**Third and Fourth Year**

- **PSYC 3913; PSYC 4053**
- 4 1/2 full course equivalents in Psychology.
- 2 full course equivalents from List A (1 full course equivalent must be from either the third or fourth year).
- 2 1/2 full course equivalents as electives from either the third or fourth year.

**List A:**

- Biology
- Chemistry
- Computer Science
- Data Analysis
- Geology
- Mathematics
- Physics
- Statistics

**BSc Major Program**

A student must successfully complete the equivalent of 20 full courses conforming to the above pattern and all required psychology courses must be passed with at least a C (2.0).

Normally all Psychology courses counted toward the BSc. Major in Psychology degree must have been completed within the 10 years prior to graduation.

**BSc Honours Program**

An Honours BSc has requirements beyond those outlined above. Normally all Psychology courses counted toward the BSc Honours in Psychology must have been completed within the 10 years prior to graduation. PSYC 4143, 4145 must be taken. In addition 27 ch of elective psychology courses must be chosen in the following manner. At least 9 ch must be successfully completed from each of the three groups outlined below:

1. **Biological/Cognitive Basis of Behaviour:** PSYC 3343, PSYC 3383, PSYC 3503, PSYC 3513, PSYC 3603, PSYC 3632, PSYC 3693, PSYC 3711, PSYC 3723, PSYC 3743, PSYC 3752, PSYC 4021, PSYC 4583, PSYC 4693, PSYC 4733, PSYC 4833;

2. **Social/Personality:** PSYC 2201, PSYC 2401, PSYC 3222, PSYC 3232, PSYC 3263, PSYC 3265, PSYC 3293, PSYC 3352, PSYC 3412, PSYC 3453, PSYC 3461, PSYC 4463;

3. **Clinical/Applied:** PSYC 3033, PSYC 3313, PSYC 3323, PSYC 3362, PSYC 3393, PSYC 3493, PSYC 3553, PSYC 3724, PSYC 3725, PSYC 3803, PSYC 4213, PSYC 4214, PSYC 4233, PSYC 4493, PSYC 4813.

An Honours student must successfully complete an Honours Thesis (PSYC 4143 and 4145). This typically requires that a student conceive, plan, perform and report an experiment under the supervision of a Faculty advisor. Normally, the thesis research is completed during the student’s final year of study.

Applicants to the Honours program should apply in writing to the Coordinator of the Honours program. To be eligible to apply they must have a minimum cumulative grade point average of 3.3 (+B) as well as, a cumulative grade point average of 3.6 in all psychology courses at the 2000, 3000, and 4000 level. **Note:** That these minimum requirements do not guarantee acceptance in the Honours program; admittance is competitive and students must obtain a faculty member willing to supervise them. As well, space may be limited.

Furthermore, to graduate with an Honours degree in Psychology, an overall cumulative grade point average of 3.6 is necessary, as well as, a cumulative grade point average of 3.3 in all required Psychology courses. For a First Class Honours designation, a grade point average of 3.6 is required in such Psychology courses. For an Honours designation, a grade point average of 3.3 is required in such Psychology courses.

**BIOLOGY - PSYCHOLOGY OPTION**

**Honours and Majors Program**

This interdepartmental program offers both majors and honours. Within the majors program there is a pre-professional specialization that is intended for students who are considering a career in health related profession.

Normally all Psychology courses counted toward the BSc. Bio-Psyc Major and Honours degree must have been completed within the 10 years prior to graduation.

**First Year**

- CHEM 1041, CHEM 1046, CHEM 1072, CHEM 1077, BIOL 1105, BIOL 1205, 1017, MATH 1001, PSYC 1003, PSYC 1004, 9 ch of approved electives (total 36 ch).

**Second Year**

- BIOL 2015, BIOL 2065, BIOL 2615, CHEM 2421, PSYC 2102, PSYC 2901 (or equivalent), plus 11 ch of approved electives (total 33 ch).

**Third and Fourth Years**

- BIOL 4935, PSYC 3913, PSYC 4053, plus approved electives equivalent to 54 ch (total 63 ch). The electives in years 2, 3 and 4 must contain at least 24 ch in psychology courses at the second year level or above and at least 24 ch in biology courses at the second year level or above. At least 132 approved credits are required to complete the program of which a minimum of 46 ch must be beyond the second year level.

**Honours Program**

To register for the honors program, students must have a cumulative grade point average of at least 3.0 at the end of the third year and must take BIPS 4001 and BIPS 4002. To graduate with honours, a cumulative GPA of 3.0 must be maintained at the completion of the study. Students are required to take the same program of study as required for the majors program with the following exceptions. In addition to BIPS 4001 and BIPS 4002, students must take a minimum of 21 credit hours of psychology courses at the second year level or above and at least 21 credit hours of biology courses at the second year level or above. Enrolment in BIPS 4001 and BIPS 4002 is limited and students must arrange their thesis research supervision with an individual faculty member, preferably during their third year.

**Pre-Professional Stream**

To be admitted into the Pre-Professional Stream Program students must achieve a minimum cumulative grade point average (CGPA) of 3.7 at the end of their first year. And, to remain within the Pre-Professional Stream Program, students must maintain a minimum CGPA of 3.7 per year. Students at the end of their second year of study may be considered for admission to the program if their CGPA is 3.7 or higher. Admission to the Program is competitive and students who meet the minimum requirements will not necessarily be accepted. Student should also note that admission into a health related professional program is very competitive and should consider alternative program career choices, as well as their preferred choice of career.

Students who successfully complete the Program will receive the Pre-Professional notation on their transcripts.
Pre-Professional Stream Curriculum

Required courses, in addition to required courses in the majors program, are:

**Required Courses:**

- **Biol 2485 - Introduction to Microbiology (4 ch)**
- **Chem 2416 - Organic Chemistry Laboratory I (2 ch)**
  OR
- **Biol 3251 - Introductory Microbiology (3 ch)**
- **Biol 3435 - Biomolecules & Primary Metabolism (3 ch)**
  OR
- **Chem 2421 - Organic Chemistry I (3 ch)**
- **Biol 4435 - Biologically Active Natural Products & Secondary Metabolism (3 ch)**
  OR
- **Chem 2422 - Organic Chemistry II (3 ch)**
- **Bips 4000 - Pre-professional Seminar (2 ch)**

**PHIL 3133 - Health Care Ethics (3 ch)**

Minimum of THREE of the following psychology courses:

- **Psyc 2201 - Child Development (3ch)**
- **Psyc 3362 - Guidance and Counselling (3ch)**
- **Psyc 3553 - Psychopathology (3ch)**
- **Psyc 3711 - Biological Psychology (3ch)**
- **Psyc 3725 - Dementias (3ch)**
- **Psyc 3033 - Health Psychology (3ch)**
- **Psyc 4493 - Developmental Psychology**
- **Psyc 4813 - Substance Abuse (3ch)**
- **Psyc 4833 - Psychopharmacology (3ch)**

The three required courses in Biology (Biol 2485, Biol 3435, and Biol 4435) and the minimum three psychology courses may be used to replace the electives in Biology and Psychology respectively within the Majors Program. Students in the Pre-Professional Stream Program are eligible to also take the Honors Program.

Recommended Electives:

- **Engr 1001 or Hum 1021**
- **Phys 1011 - Introductory Physics I (3 ch)**
- **Phys 1012 - Introductory Physics II (3 ch)**
- **Phys 1021 - Experiments in Introductory Physics I (2 ch)**
  OR
- **Phys 1022 - Experiments in Introductory Physics II (2 ch)**
  OR
- **Phys 1081 - Introductory Physics for Biological Sciences (5 ch)**

Students are strongly urged to check on admission requirements for the professional school(s) of their choice when considering electives.

### Statistics Option

**Statistics Major**

A Minimum grade of C is required in other courses counting toward credit for this program, in exceptional circumstances in grade of D may be acceptable with the approval of the Chair of the Department in courses offered through the Faculty of Arts or the Faculty of Business.

**First Year (Minimum 38 ch)**

- **a. MATH 1003, MATH 1013, MATH 1503**
- **b. At least 18 ch in lecture courses and at least 8 ch in laboratory courses chosen from:**
  - **Biol 1105, Biol 1205, Biol 1017**
  - **Chem 1041, Chem 1046, Chem 1072, Chem 1077 (Chem 1872/Chem 1877 (5ch) can be used to replace Chem 1072/Chem 1077 (5ch).)**
  - **MATH 1003, MATH 1013, MATH 1503**

**Second Year (Minimum 31 ch)**

- **a. MATH 3713, MATH 3733, STAT 3083, STAT 3093 plus 15 ch of upper level STAT courses. An upper level MATH course (excluding Math 3833) may contribute to these 15 ch.**
- **b. Plus 24 ch of upper level (3-4000 level) elective courses approved by the department.**
- **c. Plus an additional 9 ch of electives at any level.**

**NOTE:** At least 6 ch of Computer Science (excluding CS 1303) are required in the program.

**Minor in Statistics**

A student who intends to pursue a Minor in Statistics is required to take 24 ch in Statistics. A maximum of 9 ch from Mathematics may be selected. MATH 3633 cannot be taken for credits in Minor in Statistics. The Minor must be declared at the same time as the Major.

### Interdepartmental Programs

There are a number of interdepartmental programs available to students interested in moving into an interdisciplinary area. Students should consult the appropriate departments for advising. In some cases, students may have to transfer to the Fredericton campus to complete the program depending on availability of courses. See Section G of this calendar for program details.

### Pre-Professional Programs in Science

Students intending to apply to professional schools, such as schools of Medicine, Dentistry, or Veterinary Medicine, should consult the admissions information for the individual school they intend to apply to. Students may be required to complete a specific entrance test for a particular profession, e.g. the Medical College Admission Test (MCAT) in the case of schools of medicine.

Students should select a BSc program and ensure that they complete all core requirements for the selected program. In addition, the courses indicated below are strongly recommended. Students are also strongly advised to take courses in English and the Humanities and Social Sciences. The BSc Biology-Psychology major accommodates the following course selection and is the most common "pre-med" program.

**First Year**

**Second, Third and Fourth Years**

**Pre-Dentistry**

- **Biol 2065, Biol 2245, Biol 2485, Biol 3055, Biol 3635.**
- **Chem 2401, Chem 2416, Chem 2422, Chem 2457.**
- **12 ch Humanities and/or Social Sciences.**

**Pre-Medicine**

- **Biol 2065, Biol 2245, Biol 2485, Biol 3055, Biol 3635.**
- **Chem 2401, Chem 2416, Chem 2422, Chem 2457.**
- **At least one Statistics course.**
- **Humanities and Social Sciences electives.**

**Pre-Veterinary Medicine**

- **Biol 2015, Biol 2485.**
- **Chem 2401, Chem 2416.**
- **At least one Statistics course.**
- **9 ch Humanities and/or Social Sciences.**
**BACHELOR OF SCIENCE IN COMPUTER SCIENCE**

**FACULTY**

Chair: Dr. Christopher Baker

- Baker, Christopher, BSc (Univ of Newcastle upon Tyne UK), PhD (Univ of Wales, UK), Prof & Chair - 2008
- Belacel, Nabil, Adjunct Prof (Joint Appt: Faculty of CS UNBF) - 2003
- Garey, Lawrence E., BSc (St FX), MA, PhD (Dal), Prof Emeritus - 2007
- Kaser, Owen, BCSS (Acad), MS, PhD (SUNY, Stony Brook), Assoc Prof - 1993
- Light, Janet, BEng (Madras), MEng (Bharathiar), PhD (Avinashilingam), Prof - 2002
- Lemire, Daniel, Adjunct Professor, (University of Quebec) - 2005
- Mahanti, Prabhut, BCSS (Calc.), MCS, PhD (Indian Inst. of Technology), Prof - 2001
- Shaw, Ruth, BScDA, MScCS, PhD (UNB), Prof - 1986
- Tasse, Josee, BScCS (Montr), PhD (McG), Assoc Prof - 1997

**General Information**

The Department of Computer Science offers a four year undergraduate program accredited by the Canadian Information Processing Society (CIPS), leading to a Bachelor of Science in Computer Science (BScCS). Both honours and specializations are also offered along with the BScCS program. A set of core courses and some student selected courses (electives) comprise the requirements for the degree.

Our department also offers other related programs: Certificate programs in Computer Science and Data Analytics, as well as a CS Minor and an IT minor. A multi-disciplinary four year undergraduate program leading to a Bachelor of Information Sciences (BISc) is also available.

For general regulations on admission, please consult the appropriate section of the University calendar. Transfer into the BScCS from another UNB degree program is not permitted if the GPA for the most recent assessment period is below 2.0. For transfer from another university, a CGPA equivalent to 2.0 at UNB is required.

**Regulations:**

1. The total curriculum consists of a minimum of 141 credit hours.
2. A grade of C or better is required in all required core courses, all courses offered for specializations or honours, and all CS courses.
3. It is recommended to take a minimum of 12ch of courses having a significant writing component. This requirement is mandatory for students contemplating a transfer into the Bachelor of Computer Science program at UNB Fredericton. Normally, courses with the prefix ENGL, HIST, or POLS satisfy this requirement. Other courses may also be acceptable. It is the responsibility of the student to ensure that a particular course has a significant writing component, by discussing with the instructor before taking the course. The student should also keep a course outline and at least one writing assignment, as a proof of the significant writing component

**Curriculum**

The basic degree curriculum consists of a set of core requirements plus elective courses. It is expected that students will take four (4) years of study at 5 term courses per term to complete the program. The specific requirements are listed below.

**Computer Science Core Requirements:**

- CS 1073 Intro to Computer Programming I (in Java)
- CS 1083 Intro to Computer Programming II (in Java)
- CS 2383 Data Structures and Algorithms
- CS 2424 Discrete Structures
- CS 2253 Machine Level Programming
- CS 2263 Systems Software Development or CS 2617 C/C++ for Java Programmers
- CS 2333 Computability and Formal Languages
- CS 2383 Data Structures and Algorithms
- CS 2403 Operating Systems
- CS 3813 Computer Architecture and Organization
- CS 3913 Algorithms
- CS 3983 Professional Practice
- CS 4613 Programming Languages
- CS 4983 Technical Report or CS 4993 (Honours Project)
- (ECE 2214 and ECE 2215) Digital Logic Design and its Lab or CS 2803 Logic Design

**INFO 1103 Data and Information Management**

**Computer Science Elective Requirements**

On top of courses under the Computer Science Core Requirements above, the student should take 3 extra computer science courses (worth 4 ch) each as follows:

- Two of them at the 3000 level or above
- One of them at the 4000 level or above

**Mathematics and Statistics Core Requirements:**

- MATH 1003 Intro to Calculus I
- MATH 1013 Intro to Calculus II
- MATH 2213 Linear Algebra or MATH 1503 Introduction to Linear Algebra
- STAT 1793 and STAT 2793 Introduction to Probability and Statistics I and II
- or STAT 2593 Probability and Statistics for Engineers

**Free Electives:**

In addition to the courses taken to satisfy the core curriculum requirements, BScCS students must complete sufficient free electives to get a total of 141 ch. Students can choose combinations of electives to allow them to complete an area of specialization with the BScCS degree, to complete a Minor in another area, or simply to acquire more breadth in their studies. Students are encouraged to take one course (or more) in a newer area of computing. **NOTE** that MATH 3633 (Fundamental Principles of School Mathematics) cannot be taken for credit by Computer Science students.

**Areas of Specialization**

The basic degree is obtained by satisfying the basic curriculum outlined above. In addition to the basic degree, three specializations or curriculum options are available, as described below:

1. **Specialization in High-Performance Scientific Computing**
2. **Specialization in Software Engineering, and**
3. **Specialization in Networking**

To obtain a specialized degree, students must complete all required core courses and all required courses listed in the chosen area of specialization, and they must obtain a cumulative grade point average of 2.5 or greater.

**Specialization in High-Performance Scientific Computing**

**NOTE:** Admission to this specialization has been suspended.
SECTION E: SAINT JOHN ACADEMIC PROGRAMS

Required Courses
- CS 3113 Introduction to Numerical Methods
- CS 3123 High-Speed Computing
- CS 4103 Parallel Programming with MPI
- CS 4113 Advanced Scientific Computing
- CS 4123 Topics in High-Performance Scientific Computing and Visualization

Specialization in Software Engineering

Required Courses
- CS 3033 Software Design and Development
- CS 4033 Software Project Management and Quality Assurance
- CS 4083 Leading-Edge Technology in Software Development
- CS 4093 Team Software Development Project
- CS 4525 Advanced Database Management Systems

NOTE: The Specialization in Software Engineering is not an accredited engineering program and does not lead to registration as a Professional Engineer.

Specialization in Networking

Required Courses
- CS 3893 Computer Networking
- CS 4843 Wireless and Mobile Computing

In addition, at least three (3) of the following courses must be completed.
- MATH 3343 Networks and Graphs
- CS 3123 High Speed Computing
- CS 4713 Fundamentals of Simulation
- CS 4893 Network Programming
- CS 4973 or CS 4999 Independent Study/Directed Studies in Computer Science, with an approved topic.

Honours Degree Curriculum, Basic and Specialized:

Students in the BScCS degree program may elect, after their first or second year, an Honours degree program, with or without a specialization. Students who satisfy the requirements for an honours and/or specialized degree will have that designation on their final transcript. The honours degrees are designed to prepare students for graduate work.

The requirements for the basic BScCS degree must be met. Within the constraints of those basic requirements, the student must complete:

- A full-year course sequence in Science that includes labs, as part of the breadth core requirements:
  - BIOL 1105/BIOL 1205/BIOL 1017
  - or CHEM 1041/CHM 1046/CHM 1072/CHM 1077
  - or GEOG 1044/GEOG 1047
  - or PHYS 1101/PHYS 1121/PHYS 1122
  - or a Science sequence as approved by the Department.
- CS 3XXX or CS 4xxx (4ch). An extra upper-level CS elective, excluding CS 3403, CS 3813, CS 3913, CS 4613, and CS 4993
- CS 4XXX (4ch) An extra fourth year CS elective, excluding CS 4613 and CS 4993
- One CS topics course, covering an emerging area of computer science or recent advances in one area. Such course can be one of: CS4083, CS 4123, CS4973, or CS4999. The Department Chair must approve the topic chosen.
- CS 4993 with a grade of B or better, in lieu of CS 4983.

An honours degree with specialization requires that the student meet the requirements of both the honours degree and the specialization. It further requires:

- **Honours in High-Performance Scientific Computing**: STAT 3083 and STAT 3093. (Note that admission to the Honours in High-Performance Scientific Computing has been suspended.)
- **Honours in Software Engineering**: STAT 3703.
- **Honours in Networking**: no additional courses required

A cumulative grade point average greater than or equal to 3.0 is required to achieve the honours degree. Students who satisfy the requirements for an Honours degree will receive "First Class Honours" if their CGPAs are greater than or equal to 3.5. If their CGPAs are greater than or equal to 3.0 and less than 3.5, they will receive "Second Class Honours".

Certificate in Computing

This certificate program is designed to provide individuals, especially working adults, with an opportunity to acquire the formal background necessary to become effective participants in the Information Technology industry. Since the courses taken in the Certificate are also appropriate for the BScCS, students who later decide to pursue a BScCS will normally be able to transfer their credits into that program.

Although the scheduling of courses cannot be guaranteed, it is likely that the Certificate can be completed on a part-time basis in five terms. The Certificate is also available to students who do not meet the entrance requirements of the BScCS program; in fact, there are no specific entrance requirements except the formal approval of the Department of Computer Science & Applied Statistics. However, students who do not have Grade 12 Math will have to pass Math 1863 before they take the required CS courses.

Core Courses
- CS 1073 Intro to Computer Programming I (in Java)
- CS 1083 Intro to Computer Programming II (in Java)
- CS 1303 Discrete Structures
- CS 2043 Software Engineering I
- INFO 1103 Data and Information Management
- CS 2383 Data Structures and Algorithms
- CS 2983 Programming Project
- ICS 1002 Foundations of Information and Communication Studies

Electives: (At least 12ch required)

Electives may be chosen from any of the 2000-, 3000-, or 4000-level Computer Science courses.

A grade of C or better is required in all courses credited toward the Certificate.

CS Minor

This program aims to prepare graduates from other disciplines to a career in areas of arts and business computer applications, such as in media, banking, data analyzing etc. There are potentially many rich opportunities for cooperation between the knowledge of arts and business disciplines with Computer Science for the above career.

Prerequisites

Grade 12 High School Math

Required courses
- CS 1073 Intro to Computer Programming I (in Java)
- CS 1083 Intro to Computer Programming II (in Java)
- CS 1303 Discrete Structures
- CS 2043 Software Engineering I
- CS 2253 Machine Level Programming
- CS 2383 Data Structures and Algorithms
- INFO 1103 Data and Information Management

Additional 4 ch from upper level CS courses (CS 2998 can be used to meet this requirement).

CS credits required = 32 ch min

NOTE: A grade of C or better is required in all courses credited towards the minor in CS.

IT Minor

In the last few years' information technology (IT) has emerged to play an important role in most work environments. Organizations of all kinds have become more dependent on computing infrastructure than before. IT people are required to select, manage, and maintain IT infrastructure to meet organizational needs. This program aims to prepare graduates from other discipline to a career in IT.

Prerequisites

None. However, students who do not have NB Grade 12 Math will have to pass Math 1863 before they take the required CS courses (or permission of instructor).

Required Courses
- IT 1713 Multimedia and Information Highway
- IT 1813 Introduction to Data Management
- IT 2773 Java Programming for the Internet OR
- CS 1073 Intro to Computer Programming I (in Java)
- CS 1083 Intro to Computer Programming II (in Java)
- CS 2043 Software Engineering I
- INFO 1103 Data and Information Management

Additional 8 ch from upper level courses in CS/IT (or CS 2998 + 4ch from upper level courses in CS/IT).

Total CS/IT credits required = 29 ch min

NOTE: A grade of C or better is required in all courses credited towards the minor in IT.
BACHELOR OF SCIENCE IN ECONOMICS

Description of Program

The Bachelor of Science in Economics is an Undergraduate degree with an emphasis on mathematical and quantitative courses that provides an excellent entry into the workforce and background for graduate school in economics and/or finance.

A student must complete at least 120 ch (40 term courses), with a minimum of C+ grade in the required Economics courses, and a grade of C in each of the other required courses. The program components are as follows:

Required Courses:
48 credit hours, as follows: IT 1703 or IT 1803, MATH 1003, MATH 1013, MATH 1503, MATH 2513, MATH 2523, STAT 1793, STAT 3083, STAT 3093, ECON 1013, ECON 1023, ECON 2013, ECON 2023, ECON 3013, ECON 3023, ECON 4645.

Additional Requirements:

- At least 18 ch of additional courses in Economics. (ECON 3665 and ECON 4013 are recommended).
- At least 9 ch of additional upper level courses in Mathematics, or acceptable substitutes from the Faculty of Science, Applied Science & Engineering.
- Additional 3 ch in Computer Science or Information Technology.
- At least 6 ch of additional upper level courses in Statistics.
- At least 21 ch of additional courses offered by the Faculty of Science, Applied Science & Engineering, or acceptable substitutes.

Electives:

BACHELOR OF SCIENCE IN ENGINEERING

Department of Engineering

General Office: K.C. Irving Hall, Room 221

Mailing Address: Department of Engineering, University of New Brunswick, 100 Tucker Park Road, Saint John, N.B., Canada E2L 4L5

Phone: (506) 648-5595

Email: eng@unb.ca

Website: http://www.unb.ca/saintjohn/sase/undergrad/engineering/

FACULTY

Chair: Peregrine Riley, PhD, PEng

- Christie, James S., BScE, MScE, PhD (UNB), PEng, Hon Research Prof - 1989
- Cotter, G. Terrance, BScE, MScE (UNB), PhD (Purdue), PEng, Hon Research Prof - 1972
- Gadouara, Idris, BScE (Libya), MScE, PhD (HUT, Finland), Senior Teaching Associate - 2006
- Keshavarzi, Shokat, BSc (Iran), BEd(UBC, Canada), MSc (Iran), PhD (UOW, Australia), Senior Teaching Associate, 2014
- Prasad, Ramesh C., BScE (BhU), MTech (IIT), MScE, PhD (UNB), PEng, Hon Research Prof and Emeritus Prof - 1982
- Riley, Peregrine, BScE (Qu), PhD (UNB), PEng, Senior Teaching Associate and Chair - 1986
- Roach, Dale, BScEng, PhD (UNB), PEng, DUT, Senior Teaching Associate - 2000
- Sollows, Kenneth F., BScE, MScE, PhD (UNB), PEng, Assoc Prof - 1985
- Walton, Byron A., Eng Cert (Mt.All.), BScE (NSTC), MScE (UNB), PEng, Senior Teaching Associate - 1975

The Engineering programs are based on Department course credit requirements established by the Faculty of Engineering as detailed in Section G of this Calendar. The courses available will satisfy up to one-half of the total course requirements for Chemical, Civil, Computer, Electrical, Mechanical, and Software Engineering. Geological, Forest and Geomatics Engineering students may obtain approximately one-quarter of their total course requirements.

Elective courses should be chosen to satisfy specific Department program requirements. See Section G of this Calendar. The total number of terms required to complete an Engineering program depends on the course load taken by the student. Students who follow approved programs, and who obtain about 80 - 85 credit hours of approved courses at UNB Saint John, will have the opportunity to complete the Bachelor's degree requirements in Chemical, Civil, Computer, Electrical and Mechanical Engineering at UNB Fredericton in two additional fall and two additional winter terms. Students in Geomatics, Geological and Forest Engineering will require six or more terms at UNB Fredericton in addition to the program credits they obtain at UNBSJ.

For information on the Co-op Program, Professional Experience Program (PEP) and the Diploma in Technology Management and Entrepreneurship (TME), refer to Section G of this Calendar.

Engineering practice and environmental concerns cannot be separated; they are fundamental to all engineering disciplines. Engineering students with a particular interest in environmental issues are encouraged to choose the discipline most closely related to their interest. The following list indicates disciplines associated with various areas of environmental concern:

- Chemical Engineering: air and water quality
- Mechanical Engineering: pollution control
- Electrical Engineering: energy conversion and utilization, electromagnetic interference and compatibility
- Civil Engineering: hydrology, solid waste management, water and wastewater management, environmental geotechniques
- Computer Engineering: digital hardware, automotive and vehicle control, process industries and power systems, instrumentation and communication
- Geodesy & Geomatics: remote sensing of the environment, mapping of land and water resources, monitoring topographic change, hazard mapping, environmental information systems
- Geological Engineering: conservation and management of resources, monitoring topographic change, hazard mapping, environmental information systems
- Mechanical Engineering: alternative energy systems, recycling systems and design for recycling, energy conservation and utilization
- Software Engineering: computer software, information system, system testing and maintenance

Please refer to the UNBF portion of the calendar for information on the General 1st Year Program (Engineering I), Biomedical Engineering and Mechatronics Engineering.

At UNB Saint John the following courses are equivalent to the same courses at UNB Fredericton and/or to the other UNB Fredericton courses listed opposite:

**NOTE:** Minimum grade of C is required for all prerequisite and all core and technical elective courses used for credit towards the BSc (Eng) degree.

**Standard Engineering Program**

Courses are arranged by priority for each major program. Most programs are designed to be completed in eight terms of study. Students electing to spread their studies over nine or ten terms can defer low-priority courses to later terms and thus balance their workload. Students should consult their faculty advisors before selecting courses.
BACHELOR OF SCIENCE IN FINANCIAL MATHEMATICS

General Information

Financial Mathematics is the application of mathematical models to the solution of problems in the financial industry. It draws upon tools from Mathematical Sciences, Business and Economic theory. Financial institutions, insurance companies, corporate treasuries and major corporations require analysts with high skills in financial mathematics. Their responsibilities include, but are not limited to: aiding in interest rate modeling; evaluating investments; wealth valuation; decision making; and developing programmes that utilize derivatives to reduce exposure to market fluctuations and risk. Mathematical analysis has brought efficiency and rigor to financial markets and the investment process, and is becoming important in regulatory concerns.

Admission requirements are the same as for the University of New Brunswick Science Degree.

Curriculum

A student must complete at least 124 ch with a minimum grade of C in each course in the program. The curriculum consists of core requirement courses (77 ch) plus elective courses (11 courses adding up to at least 35 ch) drawn from Mathematics, Business Administration, Computer Science, Humanities, Economics and Statistics as well as at least 12 ch of electives at any level.

a. Required Courses

MATH 1003, MATH 1013, MATH 1503, MATH 2513, MATH 2523, MATH 2203, MATH 2903, MATH 2913, MATH 3073, MATH 3173, MATH 3903, MATH 4903, MATH 4993; ECON 1013, ECON 1023, ECON 2013, ECON 2023; BA 1216, BA 2217, BA 3425, BA 4437, BA 4455; CS 1073; STAT 3083, STAT 3093.

b. Electives Courses

1. At least 3 ch of courses selected from HUM 2003, HUM 1021, HUM 3003, HUM 2021
2. At least 6 ch of courses selected from CS 1083, CS 2113, CS 3113
3. At least 6 ch of courses selected from ECON 2103, ECON 3114, ECON 3412, ECON 3665, ECON 3835
4. At least 12 ch of courses selected from MATH 3213, MATH 3243, MATH 3303, MATH 3343, MATH 3503, MATH 3733, MATH 3753
5. At least 6 ch of courses selected from STAT 1793, STAT 3703, STAT 4243, STAT 4703
6. At least 12 ch of elective courses approved by the Department of Mathematical Sciences.

NOTES

1. Students planning to undertake graduate studies are advised to take MATH 3733.
2. Students choosing STAT 1793 as an elective must do so before taking STAT 3083.
3. Transfer students into this program from UNB or from other Canadian Universities may be able to substitute, with the approval of the Department of Mathematical Sciences, some of the above electives by previously obtained credits (with a C grade or higher) in Business Administration or Economics courses at the 3000 and 4000 levels.

An outline of the sequence of courses taken by a student in the first two years of the programme is as follows:

First Year

MATH 1003 Introduction to Calculus I
MATH 1013 Introduction to Calculus II
MATH 1503 Introduction to Linear Algebra
BA 1216 Accounting for Managers I
CS 1073 Introduction to Computer Programming in Java
ECON 1013 Introduction to Microeconomics
ECON 1023 Introduction to Macroeconomics
Plus electives equivalent to three term courses

Second Year

MATH 2203 Discrete Mathematics
MATH 2513 Multivariate Calculus for Engineers
MATH 2523 Differential Equations for Infinite Series
MATH 2903 Financial Mathematics I
MATH 2913 Financial Mathematics II
BA 2217 Accounting for Managers II
ECON 2013 Intermediate Microeconomics
ECON 2023 Intermediate Macroeconomics
Plus two term elective courses

### Course Numbers

Although the University is on a course credit system and has tended to move away from the idea of a rigid specification with respect to which year courses should be taken, there is some need to provide information as to the level of the course.

The various disciplines and the courses which they offer are presented in alphabetical order.

The course numbers are designated by four digits.

First Digit designates the level of the course:
- 1 - Introductory level course
- 2 - Intermediate level course which normally has Prerequisites.
- 3, 4 and 5 - Advanced level course which requires a substantial background.
- 6 - Postgraduate level course

Second and Third Digits designate the particular course in the Department, Division or Faculty.

Fourth Digit designates the duration of the course: 0 Year (or full) course normally offered over two terms. 1-9 Other than full year courses.

Departments may assign specific meanings to these digits; consult the departmental listings.

### Codes

The following codes are used in course descriptions:

- **A** - alternate years
- **R** - reading course
- **ch** or **cr** - credit hours
- **S** - seminar
- **C** - class lecture
- **T** - tutorial
- **L** - laboratory
- **W** - English writing component
- **LE** - limited enrolment
- **WS** - workshop
- **O** - occasionally given
- ***** - alternate years

For example, 6 ch(3C 1T, 2C, 2T) designates a course with 6 credit hours: 3 class lecture hours and 1 tutorial hour per week in the first term; 2 class lecture hours and 2 tutorial hours per week in the second term.

Combinations of class lectures, laboratories, seminars, etc., are indicated by a slash line, e.g., SC/L/S.

Students should consult the official Web Timetable (http://es.unb.ca/apps/timetable/) to find when courses are offered in a particular year and when they are scheduled. Not all courses listed are given every year.
### APPLIED SCIENCE

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>APSC1013</td>
<td>Mechanics I</td>
<td>5 ch (3C 3L* 1T)</td>
<td>The fundamental concepts of vector analysis as applied to particles and rigid bodies. Forces and moments are introduced with vector algebra, followed by the application of equilibrium conditions. Free body diagrams (F.B.D's) are used to analyse trusses, frames and machines, as well as internal member forces (shear force and bending moment diagrams for beams). The analysis of kinetics of particle motion along straight and curved paths. Additional topics include friction, centroids, centers of gravity, and moments of inertia (area and mass). The course focuses on visualizing concepts in mechanics and developing problem solving techniques. Co-requisites: MATH 1003, MATH 1503.</td>
</tr>
<tr>
<td>APSC1023</td>
<td>Mechanics II</td>
<td>5 ch (3C 3L* 1T)</td>
<td>Vector analysis and its application to the analysis of motion of particles and rigid bodies. Newton's three laws of motion. The dynamics of particle motion along straight and curved paths. Coriolis acceleration. The dynamic analysis of particles and rigid bodies executing general plane motion based on Newton's second law (F=ma), work and kinetic energy, linear and angular impulse, and linear and angular momentum. Rotation of rigid body about a fixed axis. Simple harmonic motion. Prerequisites: APSC 1013, MATH 1003, MATH 1503. Co-requisite: MATH 1013.</td>
</tr>
<tr>
<td>APSC2023</td>
<td>A Survey of 19th and 20th Century Physics</td>
<td>3 ch (3C)</td>
<td>An introduction to ideas developed in Physics over the last two centuries. Topics will be drawn from Thermodynamics, Geometric and Physical Optics, Relativity, Quantum Mechanics and Atomic Physics. Prerequisites: APSC 1013, MATH 1013.</td>
</tr>
<tr>
<td>APSC2028</td>
<td>Survey of the 19th and 20th Century Physics Laboratory</td>
<td>2 ch (3L)</td>
<td>A series of laboratory exercises illustrating the ideas central to the development of Physics over the last two centuries. Co-requisite: APSC 2023.</td>
</tr>
</tbody>
</table>

### BIOLOGY

In the four digit number description of Biology courses taught on the Saint John campus the following code applies:

1st digit specifies year in which course is normally taken.
2nd and 3rd digits designate the particular course.
4th digit designates the duration of the course as follows:
- 0 Course extends over both terms
- 1 Term course offered in first term
- 2 Term course offered in second term
- 3 Field course offered outside normal session
- 5 Term course offered in either first or second term

* indicates laboratory sessions are given on alternate weeks.

**Prerequisites**

All prerequisite courses must be passed with a minimum grade of C. BIOL 1205 or equivalent is a prerequisite for all courses in Biology except BIOL 1105, BIOL 1202, BIOL 1411, BIOL 1412, BIOL 1416, BIOL 1417, BIOL 1551, BIOL 2831 and BIOL 2852.

**NOTE:** See beginning of Section F for abbreviations, course numbers and coding.

**BIOL1017** Applications In Biology, Part II | 2 ch (3L) | Instruction and laboratory work dealing with the applications of Biology at the level of biological molecules, the cell and organisms. Prerequisite BIOL 1105 with a C or better. Pre- or Co-requisite: BIOL 1205. |

**BIOL1105** Biological Principles, Part I | 3 ch (3C) | Ecology and evolution of selected plants, animals, and additional organisms. Topics include ecosystems and ecological interactions, and adaptations in the context of the organisms’ environment. **NOTE:** Students intending to major in Biology must take BIOL 1017 and BIOL 1205. Credit can be obtained for only one of BIOL 1012 or BIOL 1105. |

**BIOL1202** Introduction to Marine Science | 3 ch (3C) | An introduction to the physical, chemical, and biological aspects of marine environments. Marine management issues and laws will be discussed. |

**BIOL1205** Biological Principles, Part II | 3 ch (3C) | Considers the chemistry of life, maintenance of cells and organisms, energy utilization, genetic information, reproductive continuity and mechanisms of evolution. **Prerequisite:** BIOL 1105 with a C or better. **NOTE:** This course is designed for science students or other students planning to major in Biology. Credit can be obtained for only one of BIOL 1205 or BIOL 1001. |

**BIOL1302** Introduction to Environmental Biology | 3 ch (3C) | Introduction to issues in environmental biology, including ecosystem health, sustainable development, environmental law, multi-stakeholder decision-making, etc. The course will use a case study method to examine local and global effects of human activity on the earth’s ecology and human society, focusing on environmental concerns of coastal regions. |

**BIOL1411** Anatomy & Physiology I | 3 ch (3C) | Basic concepts in human anatomy and physiology, with an emphasis on the normal condition. **NOTE:** Nursing students will not get credit for BIOL 1411. **Prerequisites:** Chem 122 and Biology 122. |

**BIOL1412** Anatomy & Physiology II | 3 ch (3C) | A continuation of BIOL 1411, basic concepts in human anatomy and physiology, with an emphasis on the normal condition. **NOTE:** Nursing students will not get credit for BIOL 1412. **Prerequisite:** BIOL 1411 or BIOL 1441 |

**BIOL1441** Human Anatomy and Physiology I | 4 ch (3C 3L*) | Basic concepts in human anatomy and physiology with an emphasis on the normal condition. This course includes a selection of appropriate laboratory exercises. For Nursing students only. **Prerequisites:** CHEM 122 and BIOL 122. |

**BIOL1442** Human Anatomy and Physiology II | 4 ch (3C 3L*) | Continuation of BIOL 1441, basic concepts in human anatomy and physiology with an emphasis on the normal condition. This course includes a selection of appropriate laboratory exercises. For Nursing students only. **Prerequisite:** BIOL 1441. |

**BIOL1605** Introduction to Geographic Information Systems and Applications | 3 ch (3C) | A general introduction to the theory, methods and applications of Geographic Information Systems (GIS). Students will learn the basics of GIS and how to acquire, display, edit, and analyze spatial data with specialized software. GIS is an interdisciplinary field, so students from all faculties may find this course useful. |

**BIOL2015** Introductory Genetics | 4 ch (3C 3L*) | History of genetics, Mendelian genetics, chromosome theory of inheritance, sex determination and linkage, extensions of Mendelian analysis, genetic linkage, crossing-over, genetic mapping, extra nuclear genetics, quantitative and population genetics. **Prerequisites:** BIOL 1205 (or BIOL 1551 with a grade of B or higher) and BIOL 1105 and BIOL 1017. |

**BIOL2065** Introductory Biochemistry | 4 ch (3C 3L*) | (Cross-Listed: CHEM 2065) | Protein structure and function, techniques for protein analysis, examples of important proteins, mechanisms and regulations of enzymatic activity, metabolism (basic concepts and design, followed by the study of a few pathways). **Prerequisites:** BIOL 1017, BIOL 1105, BIOL 1205 and CHEM 2421. |

**BIOL2125** Introductory Botany | 5 ch (3C 3L) | Introduces botanical principles and processes. Includes basic anatomy and morphology on a range of scales: cellular structure and processes, tissues,

<tr>
<td>BIOL3140</td>
<td>Independent Studies</td>
<td>3 ch (3WS)</td>
<td></td>
<td>Gives academically strong Biology Majors an opportunity to write a research report or perform a research project on a subject of interest. The student must discuss the topic with an instructor best qualified to give approval in the subject area and is able to give guidance during the year. Prerequisite: Completion of 60ch and permission of instructor.</td>
</tr>
<tr>
<td>BIOL3185</td>
<td>Marine Ecology (A)</td>
<td>4 ch (3C 3L)</td>
<td></td>
<td>An introduction to the interrelationships between organism and environment in marine ecosystems. Limited enrollment: preference will be given to Marine Biology Majors, then other students based on C. GPA. Prerequisite: BIOL 2585.</td>
</tr>
<tr>
<td>BIOL3245</td>
<td>Environmental Chemistry</td>
<td>4 ch (3C 3L)</td>
<td></td>
<td>(Cross-Listed: CHEM 3245) Course will provide students with a chemical basis for understanding the natural environment and current environmental issues. Topics will include: the process of the natural environment, the chemistry supporting environmental processes, and the main reactions of natural and anthropogenic chemicals in the atmosphere, water, and soils. NOTE: This course may be listed as either BIOL 3245 or CHEM 3245. Credit cannot be obtained for both BIOL 3245 and CHEM 3245. Prerequisite: One term of organic chemistry at the 2nd year level.</td>
</tr>
<tr>
<td>BIOL3251</td>
<td>Introduction to Microbiology</td>
<td>3 ch (3C)</td>
<td></td>
<td>Introduction to the fundamental concepts of infectious disease microbiology. Discusses bacteria, fungi, viruses, protozoa, helminths and arthropods. For Nursing students only (or with permission of Instructor).</td>
</tr>
<tr>
<td>BIOL3275</td>
<td>Economic Botany (A)</td>
<td>4 ch (3C 3L)</td>
<td></td>
<td>Considers the range of ways in which plants are used by humans for food, medicine, shelter, etc. Discusses the impact of plants on humans and vice versa, including the possible origins and impacts of agriculture, importance of plants in various cultures, and selection of desirable plant features by humans. Students will research an area of particular interest and present a seminar on it. Prerequisite: BIOL 2125.</td>
</tr>
<tr>
<td>BIOL3353</td>
<td>Flora of New Brunswick (A)</td>
<td>5 ch (3C 3L)</td>
<td></td>
<td>Explores diversity in form, structure and function in major plant groups, and how these organisms live and reproduce in their particular environments. Probable homologies and evolutionary relationships are discussed. Prerequisite: BIOL 2125.</td>
</tr>
<tr>
<td>BIOL3355</td>
<td>Survey of the Plant Kingdom (A)</td>
<td>5 ch (3C 3L)</td>
<td></td>
<td>Explores diversity in form, structure and function in major plant groups, and how these organisms live and reproduce in their particular environments. Probable homologies and evolutionary relationships are discussed. Prerequisite: BIOL 2125.</td>
</tr>
<tr>
<td>BIOL3362</td>
<td>Current Topics in Aquaculture</td>
<td>3 ch (3C)</td>
<td></td>
<td>This course will explore topics of special interest to aquaculturists at an advanced level. The title of the topic will be specified by the Department. The title of the topic will appear on the student's transcript. Only open to students in third year and above. Prerequisite: Permission of the Instructor.</td>
</tr>
<tr>
<td>BIOL3363</td>
<td>Special Topics in Biology</td>
<td>3 ch (3C)</td>
<td></td>
<td>This course will explore topics of special interest at an advanced level. Topics will be specified by the Department. Title of topic will appear on the student transcripts. Only open to students in third year and above. Prerequisite: Permission of the Instructor.</td>
</tr>
</tbody>
</table>
BIOL3385 Advanced Microbiology 5 ch (3C 3L)
This course is an in-depth introduction into original research and experiential learning. Students will design and implement a project involving isolation of microbes, molecular identification of cultures, fermentation and extraction of biologically active compounds. Compounds will be assessed through bioassay-directed fractionation and biological activity determination and total analysis. This course will include: experimental design, acquisition of new laboratory skills, statistical analysis and scientific writing. Prerequisites: BIOL 2485 and CHEM 2422.

BIOL3435 Biomolecules and Primary Metabolism (A) 3 ch (3C) (Cross-Listed: CHEM 3435)
This course will examine the chemistry, function, biosynthesis and metabolism of primary metabolites. Classes of compounds covered will include carbohydrates, fatty acids, amino acids, peptides, proteins and nucleic acids. NOTE: This course may be listed as either BIOL 3435 or CHEM 3435. Credit cannot be obtained for both BIOL 3435 and CHEM 3435. Prerequisites: CHEM 2422 and BIOL 2065.

BIOL3541 Plant Ecology (A) 5 ch (3C 3L)
A course on the factors affecting the distribution and abundance of plants, how patterns and structure at the levels of populations and communities can be described quantitatively, and how these arise from the interaction of abiotic (climate, fire, soil) and biotic (competition, herbivory) factors. Prerequisites: BIOL 2125 and BIOL 2585.

BIOL3555 Introduction to Bioinformatics (Cross-listed: CS3553) 4 ch (3C)
Even before the completion of the Human Genome Sequencing Project, microbial databases containing millions of DNA and protein sequence information that have been clustered and stored. Today the underlying technologies and analytical tools supporting genomic data analysis make up the field known as Bioinformatics. This course will introduce core topics and tools in genomics and bioinformatics explained from a practical perspective. Students taking this course will receive hands-on training in many of the following areas of study: Genome Sequencing techniques, Gene Prediction, Sequence Annotation, Gene Ontology, Analysis of Scientific Literature, Biomedical Text Mining, Workflow Management Systems, Bioinformatics Web Services. Prerequisite: 60 credit hours completed in a BSc (Biology, Marine Biology, Environmental Biology, or Biology-Psychology) or in a BSc(Nursing) or permission of the instructor.

BIOL3565 Conservation Biology (A) 4 ch (2C 3L)
Emphasizes the management of environmental and ecological resources in such a way as to maintain ecosystem resources for the protection of species. Focus will be on methods of determining population habitat requirements, community interactions, impacts of habitat change, cumulative effects of environmental pressures, etc., in coastal systems. Issues such as biodiversity, habitat protection, endangered species protection, politics of conservation, etc. will also be discussed. Prerequisite: BIOL 2585.

BIOL3625 Structure and Functions of Marine Invertebrates 5 ch (3C 3L)
Explores the structure and functions of major marine invertebrate phyla, emphasizing comparative and organismic approaches, respectively. Topics covered include food capture and digestion, defense mechanisms, respiration, circulation, excretion, skeletal support, reproduction and life cycles, as well as locomotion. Prerequisite: BIOL 2615.

BIOL3635 Animal Physiology II (A) 4 ch (2C 4L)
A physiological approach to organismic function in animals, focusing on endocrine and nervous system effects homeostasis, osmoregulation; and the respiratory and urinary systems. Prerequisite: BIOL 3055.

BIOL3665 Introduction to Environmental Law (A) 3 ch (3C)
This course will provide a general overview of the different concepts that surround environmental law. Recent events have focused our attention on the fragility of the environment, and there is evidence of its deterioration in the forms of harmful pollution, resource depletion, thinning of the earth’s ozone layer, global warming, mass extinction of species, and even or extinction of species. We will look at the legislation, the common law, and the different remedies they provide in cases of environmental crisis. Prerequisites: a minimum of 60 chs.

BIOL3715 Biology of Vertebrates 5 ch (3C 3L)
A comparative account, principally of the physiology and functional anatomy of the higher vertebrates. Prerequisite: BIOL 2615.

BIOL3755 Fish Biology (A) 5 ch (3C 3L)
A study of the anatomy, physiology, and classification of recent fishes. In classification and geographical distribution, emphasis is placed on the marine northwest Atlantic fishes and freshwater fishes of New Brunswick. Limited enrollment: preference will be given to Marine Biology Majors, then other students based on C. GPA. Prerequisite: BIOL 2615.

BIOL3785 Fisheries Ecology (A) 3 ch (2C 3L)
This course takes an ecological approach to fisheries management. Topics include: age and growth, life history analysis, bioenergetics, functional ecology, social behaviour, population estimates, recruitment dynamics and management. Limited enrollment: preference will be given to Marine Biology Majors, then other students based on C. GPA. Prerequisite: BIOL 2615.

BIOL3853 Introduction to Pathophysiology 3 ch (3C)
This introductory course aims to provide students with a basic understanding of pathophysiology. Topics include the mechanisms of inflammation and cellular injury, and the pathophysiology of the digestive, circulatory, respiratory and endocrine systems. Note: students cannot receive credit for BIOL 3853 and BIOL 2852, or BIOL 3853 and BIOL 2831. Prerequisites: BIOL 1411 (or BIOL 1441) and BIOL 1412 (or BIOL 1442) with a C or better, or with permission from the instructor. For non-nursing students only.

BIOL3875 Tropical Marine Biology 5 ch (3C 3L)
Students will be studying the behaviour and ecology of tropical marine flora and fauna in Bimini, Bahamas. The emphasis will be on marine vertebrate species and their surrounding environment. The impact of tourism on this flora and fauna will also be a focus of this course. Prerequisites: BIOL 2615 and minimum of 60 ch completed.

BIOL3893 Diversity and Habitats of Marine Organisms 5 ch (3C 3L)
This course introduces students to the diversity and systematics of marine organisms in the Bay of Fundy, including major taxonomic divisions of macro- and microfauna. The course involves field trips, study of authentic samples and the preparation of marine specimens, and study of authentic samples and the preparation of marine specimens. Prerequisites: BIOL 2585 and BIOL 3435. Students cannot receive credit for BIOL 3893 and BIOL 2485.

BIOL3922 History and Development of Aquaculture 3 ch (3C)
This course reviews the history and evolution of aquaculture practices. Topics covered will vary from year to year, but may include: seaweed, aquatic plant, invertebrate and fish species being cultivated in the world; site and practice selection and management; different types of aquaculture systems and their sustainability; monoculture; integrated multi-trophic aquaculture; offshore aquaculture; land-based aquaculture; aquaculture and environment impacts: what is acceptable, aquaculture and ecosystem services (nutrient bio-mitigation, oxygen provision, carbon sequestration, reduction of ocean acidification); assimilative capacity and resilience of ecosystems; aquaculture and climate change; aquaculture and harmful algal blooms; veterinarian approach to aquaculture; societal, economic and regulatory aspects of aquaculture; aquaculture in the broader international and coastal zone management perspective; organism health and healthy products; differentiation and diversification of products; food production systems; world markets and consumer trends; business models and the integrated ground water and water quality concept; development of responsible aquaculture. Some components of the course will be delivered by experts from Fisheries and Oceans Canada, the Canadian Food Inspection Agency, the New Brunswick Department of Agriculture, Aquatec and Fisheries, other academic institutions, the aquaculture industry,
BIOL3933 Directied Studies in Marine Sciences 5 ch (3C 3L)

This course teaches students the fundamentals of the scientific method, and gives them the opportunity to conduct a small research project in marine sciences under the supervision and guidance from practicing scientists. Topics covered include: hypotheses and predictions; experimental and comparative approaches; variation, replication, pseudo-replication and sampling; calculation, accuracy and precision; experimental designs and their relation to statistics; scientific writing. Students will first work through a small question with instructors to put into practice concepts discussed in class, and they will then work on their own project throughout the better part of the semester to further hone their research skills. Students will choose the topic of their project and establish its design in consultation with instructors and via group discussions with classmates. Projects will be designed to take advantage of local marine organisms and habitats. Students will collect, analyze, interpret and write-up their results following the format of a scientific paper, and they will present them to the class at the end of the semester. NOTE: This course is offered exclusively in the Marine Semester. Course Prerequisites are at least one university level introductory courses in each of statistics, ecology and zoology, all with a grade of "C" or better.

BIOL3943 Current Topics in Marine Sciences 2 ch (3C)

This is a seminar course to acquaint students with some topical issues and recent developments in marine sciences, and provide them with an opportunity to critically evaluate and discuss scientific work. The course will consist of research seminars given by university and government scientists, as well as assigned readings and group discussions that will be associated with each presentation. Topics and guest speakers will vary from year to year; but all seminars will be based on marine sciences, habitats, and/or toxicological issues, both theoretical and practical. Students will work through a small question with instructors to put into practice concepts discussed in class, and they will then work on their own project throughout the better part of the semester to further hone their research skills. Students will choose the topic of their project and establish its design in consultation with instructors and via group discussions with classmates. Projects will be designed to take advantage of local marine organisms and habitats. Students will collect, analyze, interpret and write-up their results following the format of a scientific paper, and they will present them to the class at the end of the semester. NOTE: This course is offered exclusively in the Marine Semester. Course Prerequisites are at least one university level introductory courses in each of statistics, ecology and zoology, all with a grade of "C" or better.

BIOL3953 Functional Ecology of Coastal Fishes 3 ch (1C 3L)

This course is a field-based investigation into the diversity, ecology, and physiology of fishes living in coastal habitats of Atlantic Canada. The major theme is how habitat-specific abiotic and biotic environmental factors shape the function and ecology of fishes. Using a hypothesis-driven approach, emphasis will be placed on the fundamental tasks of acquiring and expending energy to survive and reproduce, as well as the profound influence of temperature on organisinal performance. The course involves field and lab exercises, with supplementary lectures. Students will gain experience with techniques for sampling wild fishes, experimental approaches to study the functional ecology of fishes, and identification and quantification of fish assemblages in subtidal, intertidal, and estuarine habitats in the Bay of Fundy region. NOTE: This course is offered exclusively in the Marine Semester. Prerequisites: At least one university level introductory courses in each of ecology and zoology with a grade of "C" or better.

BIOL3955 Biological Oceanography (A) 4 ch (3C 3L*)

A synopsis of descriptive physical and biological oceanography of the world's oceans with special emphasis on Canadian coastal waters. Laboratories emphasize techniques for measurement of oceanographic parameters and include some field studies. Limited enrollment; preference will be given to Marine Biology Majors, then other students based on C. GPA. Prerequisite: BIOL 2585.

BIOL4090 Honours Project 9 ch [W]

Gives academically strong Biology Majors, under the supervision of a full time faculty member, the opportunity to make a thesis project with permission of the Department. Students who intend to apply for this elective are advised to consult with their intended supervisory faculty member at the beginning of their third year.

BIOL4115 Landscape Ecology 4 ch (3C 3L*)

Landscape Ecology is the study of ecology in heterogeneous environments. It is an interdisciplinary science that draws on elements of traditional ecology, biogeography, landscape architecture, ecosystem ecology, modeling, geostatistics, and remote sensing. It is characterized by the explicit consideration of space and time; where organisms live, how their environments vary, and how the relative locations of different components of the environment affect biological processes. This course covers these topics through lectures, labs, discussions, and a major group project. Prerequisite: BIOL 2585.

BIOL4155 (4159). Current Topics in Biology 3 ch (2C)

A lecture/seminar course to acquaint students with some of the outstanding recent developments in various fields. Restricted to students majoring in Biology or Marine Biology. Prerequisite: Permission of Instructor.

BIOL4245 Molecular Ecology 4 ch (3C 3L*)

Molecular Ecology plays an important role in ecology. This course will introduce concepts and applications in molecular evolution, population genetics, quantitative genetics and ecological genomics. Topics will include gene expression, genomics, proteomics and bioinformatics. Students will become familiar with the use of molecular methods, data analysis, and result interpretation that can be used to study ecology, adaptation, and contemporary evolution. This course will appeal to those students interested in the natural sciences, as well as the medical sciences. Prerequisite: BIOL 2015 or BIOL 2245 or BIOL 4022 or permission of the Instructor.

BIOL4325 Biology of Marine Birds 4 ch (3C 3L*)

The biology of sea ducks, seabirds, and shorebirds. This course will cover aspects of life history, anatomy, physiology, behavior, and conservation of marine birds with an emphasis placed on North Atlantic species. Prerequisites: BIOL 2585, BIOL 2615.

BIOL4373 Tropical Marine Biology Field Courses 3 ch

An examination of tropical coastal ecosystems. The course will focus on the ecology of coral reefs, tropical fish ecology and physiology, tropical seaweed biology and mangrove ecology. The course consists of lectures, fieldwork and laboratory work. Prerequisite: BIOL 3173 or equivalent; or permission of instructor.

BIOL4385 Pharmacognosy and Natural Products Research 5 ch (3C 3L)

Pharmacognosy is the study of medicines derived from natural sources and BIOL4385 will expose students to the strategies and techniques employed in the natural product drug discovery process. This course follows BIOL 3385 Advanced Microbiology, where students continue to experience isolation of microbes from plant and animal host tissues and determine the potential existence of bioactive natural products. Techniques include: aseptic technique, microbial culture maintenance and storage, fermentation, liquid-lipid partition, bioassay-directed fractionation, NMR and PCR determination of chemical structures and microbial identity respectively. Prerequisite: BIOL 3385 or instructor’s permission.

BIOL4435 Biologically Active Natural Products and Secondary Metabolism (A) (Cross-Listed: CHEM 4435)

This course will examine the biosynthesis, biological activity and ecological significance of secondary metabolites. The following topics will include: the links between primary and secondary metabolic pathways; an overview of the mechanisms, chemistry and coenzymes involved in the biosynthesis of natural products; the acetate pathway; the Shikimate pathway; the mevalonate and methyl erythritol phosphate pathways; the alkaloids and chemical ecology. NOTE: This course may be listed as either BIOL 4435 or CHEM 4435. Credit cannot be obtained for both BIOL 4435 and CHEM 4435. Prerequisites: CHEM 2422 and BIOL 2065.

BIOL4445 Marine Behavioral Ecology 3 ch (3C)

Explores the relationship between animal behaviour, ecology and evolution. Theoretical concepts covered include the economics of animal decision making, predator-prey relationships, competition, fighting and assessment, sexual conflict and sexual selection, parental care and mating systems, alternative breeding strategies, altruism and co-operation. Whenever possible, marine organisms, and particularly invertebrates will be used to illustrate theoretical concepts. Prerequisite: BIOL 2585 Introductory Ecology.
SECTION F: SAINT JOHN COURSES

BIOL4845 Biology and Conservation of Marine Mammals (A) 3 ch (3C) [W]
The biology of seals, whales, and sea-cows. Life histories, behaviour, reproduction, and population estimation techniques will receive special emphasis. The biological, economic, and moral aspects of man’s direct and indirect influence on, and utilization of marine mammals will be discussed. **Prerequisite:** BIOL 2615.

BIOL4863 Advanced Elasmobranch Studies 3 ch (3C)
This course will introduce students to advanced studies in elasmobranch biology and ecology with an emphasis on sharks, in particular sharks of the Northern Hemisphere. Topics will include current techniques in shark research, global conservation measures, Canadian Shark Management Plans, shark diving industry, shark fishing, and in-depth studies on shark physiology. **Prerequisites:** BIOL 2615 and BIOL 3055 (or permission of instructor).

BIOL4893 Diversity and Systematics of Marine Invertebrates 4 ch
Introduces basic techniques for invertebrate identification, monitoring and biodiversity assessment in rich and diverse invertebrate fauna of the Quoddy Region. Practical work includes shipboard sampling, field trips to coastal sites and laboratory exercises that present a broad overview of invertebrates of intertidal, plankton and subtidal benthic communities. The course is held at the Huntsman Marine Science Centre, St. Andrews, and is twelve days in length. A charge of tuition, full board and lodging is required. **Prerequisite:** BIOL 2615 or equivalent.

BIOL4775 Physiology of Marine Vertebrates (A) 3 ch (3C)
A course on selected aspects of the comparative physiology of marine fishes, reptiles, birds and mammals. **Prerequisite:** BIOL 3055.

BIOL4825 Introduction to Ecotoxicology (A) 4 ch (2C 3L)
A theoretical and applied approach to the science of ecotoxicology, including application of the tools and procedures used to understand toxicant fate and effects in ecosystems. Both field (e.g. Community level environmental “effects” monitoring) and laboratory (e.g. LC50 tests) methods for understanding contaminant fates and effects will be examined. **Prerequisite:** at least 20ch of Biology courses completed.

BIOL4855 Biometrics 4 ch (3C 2T)
Students are introduced to methods of statistical analysis relevant to biological questions. Topics of study will include: experimental design, how to deal with noisy data (transformations); parametric and non-parametric tests; how to deal with missing data; regression (linear & non-linear); statistical packages; and introduction to multivariate statistics (PCA and DFA). **Prerequisite:** STAT 2263 or equivalent.

BIOL4861 Advanced Environmental Biology (A) 4 ch (3C 3L)
This course examines several of the main environmental issues of concern in the region, in Canada and around the globe such as impacts of natural resource development (e.g., oil and gas, forestry, mining), climate change, and water use and its interaction on the environment and on humans. It covers emerging options with green energy and sustainable development, resource development (e.g., oil and gas, forestry, mining), climate change, and the effects of human activities and environmental health. **Prerequisite:** BIOL 1302.

BIOL4875 Environmental Techniques (A) 4 ch (3C 3L)
A techniques course, in which students will have practical experience in sampling and analytical techniques, including: water, air and soil sampling; plant and animal sampling in field and lab; and chemical analyses of tissues and water, air and soil. Appropriate study design and statistical analyses of collected data will be emphasized.

BIOL4835 Comparative Animal Behaviour 3 ch (3C)
Physiological bases of behaviour, the animal in relation to its environment, the animal in its social context, and the evolution of behavioural displays and activities. Emphasizes the adaptive significance of behavioural activities (ethology) rather than experimental psychology. **Prerequisite:** BIOL 2615.

**BIOLOGY-Psychology**

**NOTE:** See beginning of Section F for abbreviations, course numbers and coding.

BIPS4000 Pre-professional Seminar 0 ch (1S)
Students will attend a series of monthly seminars and workshops related to professional practices. Topics will include information on (1) business management, human resources, and legal aspects of running a practice, (2) interpreting research studies, statistics and literature reviews and (3) developing presentation and interview skills, preparing for MCAT type examinations and guidance on careers in health sciences. Students will enroll in this course for each term that they are in the pre-professional program. Admission is restricted to students accepted into the pre-professional program of the Biology-Psychology major.

BIPS4001 Designing Research Proposals 3 ch
Under the direction of co-supervisors from the departments of Psychology and Biology a student develops a thesis proposal which is assessed and approved by both departments. **Prerequisite:** Eligibility for the Honours Bio-Psych program.

BIPS4002 Honours Thesis 3 ch
Under the direction of co-supervisors from the departments of Psychology and Biology a student conducts, completes, and defends the research. **Prerequisite:** A grade of B+ or higher in BIPS 4001.

**BUSINESS ADMINISTRATION**

**Course Numbering System**
The Faculty of Business uses the following numbering system for courses offered by the School:

a. A first digit of:
   - 1 designates an introductory level course.
   - 2 designates an intermediate level course which normally has a prerequisite specified in the course designation.
   - 3 designates an advanced level course which has one or more prerequisites specified in the course description.

b. The second digit identifies the nature of the course, as follows:
   - 1 general
   - 2 accounting
   - 3 marketing
   - 4 finance
   - 5 organizational behaviour and management
   - 6 operations and information management
   - 7 law
   - 8 industrial relations and human resource management

c. The third and fourth digits distinguish different courses in the same field.

**Course Offerings**
Not all courses listed in this section will be offered each year. The official timetable must be consulted for courses offered each year.

**NOTES:**
In order to take a Business Administration (BA) course that has a prerequisite, student must earn a C or better in the prerequisite course(s), regardless of the program in which the student is registered. Students who feel they have the equivalent prerequisite background through a combination of coursework and work experience, may apply to the Faculty of Business on a Permission and Request Form for permission to enter a course. These forms are available from the Faculty of Business office in Oland Hall Room 245.

Students enrolled in BA courses who do not have the stated prerequisites, and who have not been given the permission of the Faculty of Business to remain in the course, will be administratively withdrawn from the course AFTER the last day to add courses each term.

See beginning of Section F for abbreviations, course numbers and coding.

BA1216 Accounting for Managers I 3 ch (3C)
Examines the uses of accounting information within and outside organizations. Focuses on the impact of business events on the financial statements. Introduces case studies, oral and written presentations, group problem solving, and unstructured problems. **Prerequisite:** MATH 1853.

BA1218 Accounting to Lab - O ch / no Fee 0 ch
A self-paced course that introduces the procedural aspects of accounting. Students will receive a grade of either pass or fail. **Prerequisite:** BA 1216.

BA1501 Introduction to Business 3 ch (3C)
Introduces the fundamentals of business management theories and practices. Topics include accounting, financial management, human resources management, marketing, operations and information management, and special topics. These areas will be examined in both a profit and non-profit context. Students must enroll in this course prior to completing 30 credit hours of Business (BA) courses. BAMHT 3+1 students who wish to enroll in this course must do so prior to their college year.
BA1605 Business Decision Analysis I 3 ch
Basic probability concepts, random variables, descriptive measures, properties of distributions, statistical decision theory and Bayesian approaches are introduced. Discrete and continuous probability models and their applications to business problems are also covered. Prerequisites: MATH 1853 or equivalent.

BA2001 Business Communications 3 ch (3C) (LE)
Introduces students to topics related to business communications, including preparing research papers and business documents; delivering presentations, interviewing, basic speaking and listening skills, running business meetings; and a number of topical issues related to business communications in the 21st century. Prerequisites: Open only to BBA students with at least 30ch completed.

BA2123 Introduction to Digital Business 3 ch (3C)
This is an introductory course that reviews and examines key examples and cases of companies that have transformed their business models through the integration of digital technologies into their operations. Cases will be selected to provide a historic overview as well as up-to-date examples of digital transformation across a broad range of industries and business functions. The course will also survey the range of frameworks used to explain digital leadership and maturity.

BA2217 Accounting for Managers II 3 ch (3C)
Continues the study of accounting by examining the uses of accounting information within the organization. Case studies will be used extensively. Emphasis placed on solving unstructured problems through the use of cases and other materials. Oral and written presentation skills are also emphasized. Credit will not be granted for both BA2217 and HTM 2217. Prerequisite: BA 1216.

BA2303 Principles of Marketing 3 ch (3C) [W]
A basic foundation of marketing theory and analysis, providing the basic analytical framework from which to approach the decision-making process and issues related to the marketing function. Prerequisites: BA 1216 and BA 2504

BA2501 Introduction to International Business 3 ch (3C)
The course examines issues and problems which arise when business operations transcend national boundaries. Topics include the dimensions of the contemporary international economy, politics and management. Course examines theories and activities leading toward international trade, investment and management of international firms. Prerequisites: BA 2504, ECON 1013 and ECON 1023.

BA2504 Introduction to Organizational Behaviour 3 ch (3C)
An introduction to the contributions of the applied behavioural sciences to the study of people at work in organizations. The fundamentals of individual and group behaviour are covered as well as selected topics in motivation, leadership, communication, conflict and organizational change. Prerequisite: Successful completion of 24 credit hours or admission to a certificate program in the Faculty of Business.

BA2606 Business Decision Analysis II 3 ch
Introduction to statistics, statistical techniques used in business situations, sampling theory, estimation, hypothesis testing, Chi-square, t and F distributions, Bayesian inference, association and trend analysis, and their applications. Prerequisite: BA 1605

BA 2611 Business Data Visualization 3 ch (3C)
Communication is one of the most important skills for business leaders. To explain a new idea, to persuade management to take actions, or to achieve consensus with the business stakeholders, data is key. This course deals with how to visualize business data for effective communication. Presenting business data in a way that enables one to grasp the implications of the data is easily more important than ever, given that business data is generated at an exponential rate and that more companies are employing evidence-based management. Through hands-on exercises with computer tools frequently used in companies, students will have opportunities to learn how to explore and visualize business data for effective communication. Prerequisite: 30 credit hours including BA 1605.

BA2663 Technology Trends in Digital Business 3 ch (3C)
This course examines the technologies and technological trends driving the digital transformation of business models. The topics covered will reflect the both historic and current technologies that are recognized or have the potential to disrupt incumbent business models.

BA2738 Administrative Law (O) 3 ch (3C)
 Begins with a brief introduction to our Constitutional system. Then the distinctions between judicial, quasi-judicial, and purely discretionary power are developed through cases followed by a study of law relating to notice, the right to a hearing, and the nature of hearings before tribunals. Concludes with an examination of the interposition of judicial review of administrative action and the legal remedies available to protect individual rights adversely affected by the administrative process.

BA2758 Employment Law 3 ch (3C)
This course examines Canadian employment legislation and its application. Includes a study of laws governing union-management relations, work standards, employment equity, and relevant laws governing recruitment, selection, and employment of personnel. Differences in federal and provincial employment laws will be discussed. Prerequisite: Successful completion of a minimum of 30 credit hours, or admission to a certificate program within the Faculty of Business.

BA2858 Introduction to Human Resources Management 3 ch (3C)
A study of the personnel function within an organization and its relationship to the employees and to the labour market. Includes human resource planning, recruitment and selection, training, performance measurement, wage and salary administration, and job satisfaction. Concludes with a discussion of current issues that affect personnel administration. Prerequisite: BA 2504.

BA2903 Work Term Report I 1 ch
Identifies an opportunity or problem in the workplace, analyzes its source and development, addresses key issues to be considered, offers alternatives and makes recommendations including clear provisions for implementation.

BA3101 Special Topics in Business (O) 3 ch
This course examines various issues and events that influence the area of Business Administration. Topics will vary from year to year reflecting contemporary issues and events.

BA3123 Issues in Business and Society (O) 3 ch (3C)
Uses the applied social sciences as a theoretical framework for analyzing the contemporary business organization in its environment. Such topics as business ethics, the social responsibility of business, cultural relativism, and the multinational organization are examined. Examines the many new demands made on business by various groups (e.g., consumers, environmentalists, employees, minorities, anti-technology groups, etc.) and how they affect business decision making. Prerequisites: BA 2504 and successful completion of 60 ch.

BA3125 Industry Impact of Electronic Commerce 3 ch (3C)
This course addresses the implications of electronic commerce with a broad industry level perspective. Students will develop the profile of electronic commerce in a particular industry and will identify electronic commerce opportunities for the industry and its member organizations. Prerequisites: BA 2123 and BA 2505.

BA3126 Frontiers of E-Commerce I 3 ch (3C)
Introduction to current issues in electronic commerce, with emphasis on the management of these issues. Prerequisites: BA 2123 and BA 2663.

BA3129 Business Research Methods 3 ch (3C)
Students will learn how to design, conduct and analyze research for making informed business decisions. The course will focus on basic methodologies, qualitative and quantitative methods, data sources, reliability, validity, and other measurement issues, data collection and research design, ethics in research, and report writing and presentation. Prerequisites: BA 1605 and one of BA 2303, BA 2858 or HTM 1103 and Co-requisite: BA 2606. NOTE: Credit will be given for only one of BA 5129, BA 4319, BA 4829 and HTM 4129.

BA3134 Government and Business (A) 3 ch (3C)
Examines the technological structure of major industries in order to understand the basis for government intervention. Consideration is given to anti-trust policy, subsidization, utility regulation and government ownership in Canada. The strengths and weaknesses of these techniques are considered. Open to third and fourth year students who have appropriate background in the social sciences.

BA3201 Special Topics in Accounting (O) 3 ch
This course examines various issues and events that influence the area of Accounting. Topics will vary from year to year reflecting contemporary issues and events.

BA3224 Accounting for Managers III 3 ch (3C)
Continues the study of accounting for managerial planning and control. Topics include measuring divisional performance, transfer pricing, short-
SECTION F: SAINT JOHN COURSES

term decision models and revenue variance analysis. *Prerequisites: BA 2217 and BA 1218.

**BA3235 Intermediate Accounting I** 3 ch (3C)

Gives a more detailed understanding of accounting principles and practices than is available in an introductory course. Topics to be discussed include the definition and measurement of assets and of income. This course combined with BA 3236 generally constitutes a credit in the programs of the professional accounting organizations. *Prerequisites: BA 1218 and BA 2217.

**BA3236 Intermediate Accounting II** 3 ch (3C)

Includes an examination of the problems involved in the definition and measurement of liabilities and stockholders’ equity, income taxes and funds flow. *Co-requisite: BA 3235.*

**BA3301 Special Topics in Marketing (O)** 3 ch

This course examines various issues and events that influence the area of Marketing. Topics will vary from year to year reflecting contemporary issues and events.

**BA3304 Marketing Management** 3 ch (3C) [W]

Covers the application of theory and analytical tools of marketing management viewpoint. This integrated study will focus upon the analysis and solution of complex marketing problems for a contemporary environment. Topics include industrial, international, not-for-profit marketing; marketing of services, images and causes; and ethical issues. *Prerequisites: BA 2217 and BA 2203.

**BA3305 Marketing on the Internet** 3 ch (3C)

This course examines the integration of Internet in an organization’s marketing strategy. Topics include, goals for online marketing, customer communications, interactive Internet pages, and customer service issues. *Prerequisites: BA 2213, BA 2303 and BA 2663.

**BA3328 Consumer Behaviour** 3 ch (3C) [W]

Designed to expose a variety of concepts, explain their interrelationships, and develop an understanding of consumer decision making processes. Includes basic individual determinants of consumer behaviour, environmental influences on consumers, purchase processes, post-purchase processes, market segmentation, brand loyalty and message appeals. *Prerequisite: BA 2203.

**BA3339 Marketing Communications (A)** 3 ch (3C) [W]

Examines forms of marketing communications, emphasizing their role in the Canadian environment. Includes basic communications theory related to basic consumer behaviour theory, media availability and selection, promotion channels, personal selling, industry self-regulation, role of government regulation. *Prerequisite: BA 2303.

**BA3371 Marketing of Services** 3 ch (3C) [W]

This course builds on the basic marketing elements to enable the student to contend with marketing problems and opportunities that present themselves in the service industries. The marketing plan and research techniques are applied to actual situations and marketing issues. Cases, industry events and guest lecturers will supplement class lectures and seminars. *Prerequisite: BA 2303 or admission to the BAM-HT degree.

**BA3401 Special Topics in Finance (O)** 3 ch

This course examines various issues and events that influence the area of Finance. Topics will vary from year to year reflecting contemporary issues and events.

**BA3421 Personal Financial Planning** 3 ch (3C)

The objective of this course is to introduce the students to issues and concepts of personal financial planning, with an emphasis on application to real life situations. Topics include concepts of personal finances, credit, financial resources and controlling your financial future. The focus is to provide tools for students to use in planning their financial futures. *Proposed Prerequisite: BA 1216.

**BA3425 Managerial Finance** 3 ch

An introduction to the basic tools and techniques for making various financial decisions. Topics include analysis of financial statements, time value of money, bond and stock valuation, basics of risk and return, various capital budgeting techniques, short-term financial planning and working capital management (such as cash, credit and inventory management). *Prerequisite: BA 2217.

**BA3426 Corporate Finance** 3 ch

Advanced topics in risk and return, cost of capital, advanced concepts in valuation, raising capital, financial leverage and capital structure, dividend policy, leasing, mergers and acquisitions and the basics of financial risk management. *Prerequisite: BA 3425.

**BA3501 Special Topics in Organizational Behavior and Management (O)** 3 ch

This course examines various issues and events that influence the area of Organizational Behaviour and Management. Topics will vary from year to year reflecting contemporary issues and events.

**BA3547 Organizational Communication (A)** 3 ch (3C) [W]

The communication process is explored from the individual, small group, and organizational levels. Topic areas include perception and communication, patterns of miscommunication, the motivational base of communications, and organizational climate and communications. The student is exposed to a variety of communication exercises and cases in order to experience some of the issues and problems in organizational communications. *Prerequisite: BA 2504.

**BA3557 The Management of Planned Change (A)** 3 ch (3C)

Complex organizations in today’s society find themselves immersed in a world of social, political and economic change in which their survival depends on innovation and adaptation. The course familiarizes the student with techniques for diagnosing the need for organization change, ways of designing adaptive organization systems, and the methods and problems of persons functioning as change agents within organizations. *Prerequisite: BA 2504.

**BA3601 Special Topics in Operations and (O)** 3 ch

Information Management

This course examines various issues and events that influence the area of Operations and Information Management. Topics will vary from year to year reflecting contemporary issues and events.

**BA3623 Management Science: Deterministic Models** 3 ch (3C)

This course introduces students to deterministic models and solution methods applicable to business problems. Topics such as linear programming, integer programming, network models, project scheduling, inventory models, multi-criteria optimization and application of software packages in solving management science problems will be covered. *Prerequisites: BA 1605 or the equivalent, and MATH 1853 or the equivalent.

**BA3624 Management Science: Probabilistic Models (O)** 3 ch (3C)

This course introduces students to probabilistic models of management science. Topics such as stochastic models, probabilistic dynamic programming, queuing theory, simulation, stochastic inventory models, game theory and Markov processes will be covered. *Prerequisite: BA 3623 or the equivalent.

**BA3653 Operations Management I** 3 ch (3C)

This course introduces students to concepts, problems and analysis related to the design, planning, control, and improvement of manufacturing and service operations. Topics such as information flow, operations strategy, planning and production design, capacity planning, managing quality, managing inventory, forecasting and inventory control, facilities planning and location decisions will be covered. *Prerequisites: BA 3623 and BA 2606.

**BA3654 Operations Management II (O)** 3 ch (3C)

This course is a continuation of BA 3653 with an emphasis on contemporary developments in the field. Topics such as just-in-time, lean systems, supply chain management, resource planning, waiting lines and operations scheduling will be covered. *Prerequisite: BA 3653.

**BA3661 Supply Chain Management (O)** 3 ch (3C)

The course objectives are to understand the key elements of a supply chain and the effect of business decisions on supply chain performance. Activities within the supply chain include communication, inventory management, transportation, and the cooperation between buyers and suppliers. *Prerequisites: BA 1605 and BA 2606 or permission of the Faculty of Business.

**BA3672 Introduction to Management Information Systems** 3 ch (3C)

This course provides an introduction to the essential concepts of management information systems. The course emphasizes the role of information systems in managing and improving contemporary business practices. How information technology and information systems can contribute to decision-making processes will also be considered. Topics will include: business decision making, e-business, resource planning (RP), software and hardware, database and data warehouses, networks, enterprise architecture, supply chain management (SCM), capacity requirement planning (CRP), system security, and types of control.
BA3701 Special Topics in Law 3 ch
This course examines various issues and events that influence the area of Law directly related to business. Topics will vary from year to year reflecting contemporary issues and events.

BA3705 Business Law 3 ch (3C)
Introduction to the Law of Torts, contracts; particularly those relevant to businesses such as debtor/creditor, sale of goods, mortgages, leases, forms of business organizations. Credit will not be granted for BA 2703/BA 2704 or BA 2705 and BA 3705. Prerequisite: Successful completion of 60 credit hours.

BA3715 Labour Law (O) 3 ch (3C)
Examines Canadian labour legislation and its application. Includes a study of the law governing: union-management relations, collective bargaining, certification, Labour Relations Boards, the legal application of economic pressure, injunctions, strikes, picketing, appeals, and all related remedies. Includes an examination of constitutional differences between Federal and Provincial legislation. Prerequisite: BA 3813.

BA3718 Legal, Privacy, and Security Issues in Electronic Commerce 3 ch (3C)
This course deals with the various systems that provide privacy and security on the Internet, as well as the legal issues that arise in electronic commerce. Includes an examination of encryption, fire walls, user authentication, as well as copyright of intellectual property and contracts. Prerequisites: BA 2123 and BA 2663; or BA 2123 and CS 2813, CS 3403, and CS 2513.

BA3801 Special Topics in Industrial Relations and Human Resource Management (O) 3 ch
This course examines various issues and events that influence the area of Industrial Relations and Human Resource Management. Topics will vary from year to year reflecting contemporary issues and events.

BA3813 Introduction to Industrial Relations 3 ch (3C)
Provides a general introduction to the field of industrial relations. The objectives and values of the various parties involved in collective bargaining in the private and the public sectors are identified. Consideration is given to how these are modified in the bargaining process. The role of industrial conflict and dispute settlement procedures are examined. Prerequisites: BA 2858, and successful completion of 60 ch or admission to the Certificate in Human Resource Management.

BA3900 Community Leadership 6 ch (LE)
As part of the Certificate in Community Leadership, students will take part in volunteer work an approved placement for up to 160 hours over the course of the program. In addition to this, students will participate in training and leadership workshops consisting of up to 35 hours over the course of the program. Students must complete all of the experiential segments of the Certificate in Community Leadership program to be awarded the 6 chs. Prerequisite: Admission to the Certificate in Community Leadership.

BA3903 Co-Op Work Term Report II 1 ch
Identifies an opportunity or problem in the workplace, analyzes its source and development, addresses key issues to be considered, offers alternatives and makes recommendations including clear provisions for implementation.

BA4003 Independent Study - Electronic Commerce 3 ch
This course will provide the student with a deepening knowledge in the Electronic Commerce area. Under the supervision of a Faculty member, the student will explore topics not available in the regular course offerings. The course may consist of written assignments, oral examinations and written examinations. Students must identify a faculty member who is willing to supervise the course and apply to the Director, Undergraduate Studies for approval at least 30 days prior to the term in which they wish to undertake the work. Applications are normally approved for students who are in their senior year and who have obtained a grade point average of at least 3.0 in the work of the second and third years.

BA4101 Competitive Strategy I 3 ch (3C) [W]
Integrates material from other courses to a top management perspective, including factors that influence decision makers and the decision making process. Defines strategy. Concentrates on development of strategies for organizations competing in a single industry. Analyzes industry structure and dynamics and resources and processes that enable an organization to develop and sustain competitive advantages. NOTE: credit will not be granted for both BA 4101 and HTM 4101. Prerequisite: Credit in all courses required for the BBA except BA 3705.

BA4103 Independent Study - Management 3 ch
This course will provide the student with a deepening knowledge in the Management area. Under the supervision of a Faculty member, the student will explore topics not available in the regular course offerings. The course may consist of written assignments, oral examinations and written examinations. Students must identify a faculty member who is willing to supervise the course and apply to the Director, Undergraduate Studies for approval at least 30 days prior to the term in which they wish to undertake the work. Applications are normally approved for students who are in their senior year and who have obtained a grade point average of at least 3.0 in the work of the second and third years.

BA4107 Studies in Small Business 3 ch (3C) [W] (LE)
A seminar course designed to acquaint students with the problems of starting and operating a small business. Class discussions focus on actual small business successes and failures. Frequently, local business owners join in discussions. Emphasis is on written and video-taped cases and on a high degree of student participation.

BA4108 Management of New Enterprise (A) 3 ch (3C) [W] (LE)
A project course designed to allow students to prepare a proposal for starting a new business or to write a case study of an existing enterprise. In the latter case, the business people involved frequently participate in the classroom discussion. Students cannot receive credit for both BA 4108 and BA 4109. Prerequisites: BA 1216, BA 2303 and BA 4107.

BA4126 Frontiers of E-Commerce II 3 ch (3C)
In-depth examination of current issues in electronic commerce, with emphasis on the management of these issues. Prerequisites: BA2123, BA2663, and one of BA3718, BA3125 or BA3305. Students should be in their final 30 credit hours of BBA program.

BA4147 Research Report (O) 3 ch (3C) [W]
This course involves planning and carrying out a research project or a theoretical investigation under the supervision of a faculty member. Wide latitude is given in the selection of topics and in the methods for investigation but all projects must be approved by the Undergraduate Studies Committee before the last day for adding courses in the term. Students must present written reports and defend them before a committee from the Faculty. Applications are normally approved for students who are in their senior year and who have obtained a grade point average of at least 3.0 in the work of the second and third years. Prerequisite: BA 4129 or the equivalent.

BA4148 Research Report (O) 3 ch (3C) [W]
This course involves planning and carrying out a research project or a theoretical investigation under the supervision of a faculty member. Wide latitude is given in the selection of topics and in the methods for investigation but all projects must be approved by the Undergraduate Studies Committee before the last day for adding courses in the term. Students must present written reports and defend them before a committee from the Faculty. Applications are normally approved for students who are in their senior year and who have obtained a grade point average of at least 3.0 in the work of the second and third years. Prerequisite: BA 4129 or the equivalent.

BA4193 International and Comparative Management (O) 3 ch (3C)
Introduces and surveys international business and management. Examines the environment in which international business occurs; the role of culture, political systems and level of economic development in differentiation of management patterns; and formation and implementation of global business strategies in the international environment, focusing on political, social and cultural issues.

BA4203 Independent Study - Accounting 3 ch
This course will provide the student with a deepening knowledge in the Accounting area. Under the supervision of a Faculty member, the student will explore topics not available in the regular course offerings. The course may consist of written assignments, oral examinations and written examinations. Students must identify a faculty member who is willing to supervise the course and apply to the Director, Undergraduate Studies for approval at least 30 days prior to the term in which they wish to undertake the work. Applications are normally approved for students who are in their senior year and who have obtained a grade point average of at least 3.0 in the work of the second and third years.

BA4207 Current Accounting Issues 3 ch (3C)
Concentrates on the application of accounting theory to contemporary areas in financial reporting. Topics covered vary according to the changing importance of current accounting issues. Prerequisite: BA 3236.
SECTION F: SAINT JOHN COURSES

BA4221 Advanced Management Accounting 3 ch (3C)
Cost accounting information and its use in managerial control. Deals in detail with cost accumulation, job and process costing, standard costing, and variance analysis. Supplements the material contained in BA 3224. Examines uses of costing techniques in other than manufacturing situations. Uses case material extensively. Prerequisite: BA 3224.

BA4223 Accounting Information Systems 3 ch (3C)
Introduces the important role that accounting information systems play in today's business world. Emphasizes the accounting information system's function of collecting, recording, and storing business data in order to produce the information for sound business decisions. Prerequisite: BA 2217.

BA4227 Contemporary Issues in Management Accounting (O) 3 ch (3C)
Students' knowledge of the role of accountants in managerial planning and control is expanded. The interface between accounting and management science is emphasized.

BA4229 Advanced Financial Accounting I 3 ch (3C)
This course includes detailed coverage of Accounting for Debt investments and Equity investments including Business combinations, Equity Accounting, Consolidations and Joint ventures. Prerequisite: BA 3236.

BA4231 Advanced Financial Accounting II 3 ch (3C)
This course includes detailed coverage of segmented reporting, interim reporting, and Foreign Transactions and Hedges, Supplemental reporting through MDS&A. Also includes Financial Reporting for Foreign Operations, Non-Profit Entities, Public Sector, and Partnerships. Additional relevant topics may be added as needed. Prerequisite: BA 3236.

BA4237 Income Taxation 3 ch (3C)
This taxation course covers the current Canadian legislation governing both personal and corporate income taxation. Students will be expected to apply their knowledge of the legislation by computing corporate income, income from business, income from property, capital gains and losses and income taxes payable. This course also introduces more complex topics as relevant. Such topics may include corporate reorganizations, distributions and tax planning, etc. Prerequisite: BA 3235 or equivalent.

BA4238 Auditing 3 ch (3C)
Examines the roles, responsibilities and legal liabilities of internal and external auditors in Canada and their professional organizations. Topics developed include internal control systems and their evaluation; audit evidence and problems related to the audit of particular assets, liabilities, and capital and income accounts. A brief study is also made of audit procedures and priorities. Prerequisites: BA 3236 and one of BA 4223 or BA 3672.

BA4242 Accounting Theory (A) 3 ch (3C)
Focuses on accounting literature, especially with respect to financial reporting and accounting standard setting. Prerequisite: BA 3235.

BA4303 Independent Study - Marketing 3 ch
This course will provide the student with a deepening knowledge in the Marketing area. Under the supervision of a Faculty member, the student will explore topics not available in the regular course offerings. The course may consist of written assignments, oral examinations and written examinations. Students must identify a faculty member who is willing to supervise the course and apply to the Director. Undergraduate Studies for approval at least 30 days prior to the term in which they wish to undertake the work. Applications are normally approved for students who are in their senior year and who have obtained a grade point average of at least 3.0 in the work of the second and third years.

BA4334 Public and Non-Public Marketing (O) 3 ch (3C) [W]
Focuses on the application of traditional marketing concepts to the “non business” sector. Types of organizations studied include government, universities, performing arts groups, charities, political groups and health care facilities. Students are encouraged to specialize in one or two areas of interest through a major project. Class time will be divided among lecture, case discussion and student presentations. Prerequisite: Credit in BA 3304.

BA4398 International Marketing 3 ch (3C) [W]
Examines planning marketing strategies for international markets including operations of multinational firms. The main purpose is to show how companies entering the global market should analyze international marketing environment, identify different kinds of international opportunities, decide which particular markets to enter, decide how to enter the chosen market, develop marketing mix strategies for the chosen market and develop an effective organization for pursuing international marketing. Prerequisite: BA 3304.

BA4437 Investment Analysis and Portfolio Management (O) 3 ch (3C)
Introduces students to a basic knowledge of investment media, security markets, security analysis and the role of financial intermediaries in the investment process. Emphasis on the interpretation of economic indicators and analysis of published financial information in order to select superior investment opportunities. Technical analysis, random walk theory and optimal portfolio selection are covered. Application of quantitative techniques is an essential component of the course. Prerequisite: BA 3425.

BA4455 Derivatives: Options and Futures 3 ch
This course will examine the evolution of the derivative markets, market microstructure, trading strategies, pricing models, and risk management using derivative instruments such as futures, options and swaps. Prerequisite: BA 3425.

BA4506 Organization and Electronic Commerce 3 ch (3C)
This course focuses on the internal changes that happen in an organization when it implements electronic commerce. Redesign of organizational structures, jobs, processes and workflow will be considered. Intrnanets, extranets, and enterprise integration will also be explored. Prerequisites: BA2123, BA2663, BA3672 (or BA2672), and one of BA3718, BA3125 or BA3305.

BA4603 Independent Study - Quantitative Methods 3 ch
This course will provide the student with a deepening knowledge in the Quantitative Methods area. Under the supervision of a Faculty member, the student will explore topics not available in the regular course offerings. The course may consist of written assignments, oral examinations, and written examinations. Students must identify a faculty member who is willing to supervise the course and apply to the Director. Undergraduate Studies for approval at least 30 days prior to the term in which they wish to undertake the work. Applications are normally approved for students who are in their senior year and who have obtained a grade point average of at least 3.0 in the work of the second and third years.

BA4644 Project Management (O) 3 ch (3C)
Presents and explores a project management framework. Also illustrates general principles and concepts in the context of information systems development projects.

BA4803 Independent Study - Human Resource Management & Industrial Relations 3 ch
This course will provide the student with a deepening knowledge in the Human Resource Management & Industrial Relations area. Under the supervision of a Faculty member, the student will explore topics not available in the regular course offerings. The course may consist of written assignments, oral examinations and written examinations. Students must identify a faculty member who is willing to supervise the course and apply to the Director. Undergraduate Studies for approval at least 30 days prior to the term in which they wish to undertake the work. Applications are normally approved for students who are in their senior year and who have obtained a grade point average of at least 3.0 in the work of the second and third years.

BA4813 Negotiations and Dispute Resolutions 3 ch (3C)
The aim of this course is to provide an in-depth examination of conflict, negotiation and dispute resolution principles. The course has four specific objectives: to increase students' understanding of the causes and consequences of conflict, to explore various methods of reducing or resolving conflict, to develop an understanding of the different levels and sources of conflict and to apply negotiation and dispute resolution principles to various aspects of industrial relations. Prerequisite: BA 3813.

BA4853 Recruitment and Selection 3 ch (3C)
This course is designed to acquaint students with important issues in the recruitment and selection of employees. The roles of job analysis in the development of selection programs will be stressed. Strategies for effective recruitment will be discussed as well as the various selection devices available to organizations. In all cases, the legal context of recruitment and selection will be considered. Prerequisites: BA 2858 and successful completion of 75 chs, or admission to the Certificate in Human Resource Management, and successful completion of BA 1605, BA 2858, and BA 3813.

BA4854 Training and Development 3 ch (3C)
This course is designed to familiarize students with issues and techniques of training in organizations. Emphasis will be placed on assessment of training needs, instructional methods, and training evaluation. Prerequisites: BA2858 and successful completion of 75 chs, or admission to the Certificate in Human Resource Management and successful completion of BA 1605, BA 2858 and BA 3813.
SECTION F: SAINT JOHN COURSES

BA4855 Compensation Structure Development 3 ch (3C) [W]
- Explores the theory and practice of compensation structure development based on concepts of internal and external equity. Internal equity focuses on assessing the relative worth of different jobs in an organization through job evaluation. External equity involves assigning pay levels to different jobs in an organization based on data collected from wage and salary surveys of competitors. Students are required to apply concepts and techniques discussed in class within a group project that entails developing a compensation structure for a hypothetical company. Prerequisites: BA 2858 and successful completion of 75 chs, or admission to the Certificate in Human Resource Management and successful completion of BA 1605, BA 2858 and BA 3813.

BA4856 Evaluating and Rewarding Employee Performance 3 ch (3C) [W]
- Explores the theory and practice of performance appraisal and performance-based pay. Performance appraisal topics include appraisal instruments, sources of appraisal, increasing appraisal accuracy, and conducting appraisal interviews. Performance-based pay topics include traditional merit pay as well as incentive plans, gain sharing, and profit sharing. Students are required to apply concepts and techniques discussed in class within several assignments and/or exercises. Prerequisites: BA 2858 and successful completion of 75 chs, or admission to the Certificate in Human Resource Management and successful completion of BA 1605, BA 2858 and BA 3813.

BA4857 Management of Occupational Health and Employee Wellness 3 ch (3C)
- A growing number of organizations are realizing that not only is properly managing the occupational health, safety and well-being of employees at all organizational levels right and ethical, it can also be an important competitive advantage. Topics will include, but are not limited to, employee rights and responsibilities, workplace safety, psychosocial hazards faced by employees and how to recognize, assess and control these hazards. Furthermore, students will be provided with the tools and knowledge to develop workplace wellness and health promotion programs. Prerequisites: BA 2858 and successful completion of 75 chs, or admission to the Certificate in Human Resource Management and successful completion of BA 1605, BA 2858 and BA 3813.

BA4866 Management of Technology (O) 3 ch (3C)
- A study of the critical role that technology, particularly information technology, plays in competition. The emphasis will be on aligning human resources practices and technological and organizational strategies. Prerequisites: All other courses required for the HRM major, including the five compulsory courses BA 2504, BA 2758, BA 2858, BA 3129 and BA 3813 as well as six chs of HRM electives selected from the following courses: BA 4813, BA 4853, BA 4854, BA 4855, BA 4856, BA 4866.

BA4903 Work Term Report III 1 ch
- Identifies an opportunity or problem in the workplace, analyzes its source and development, addresses key issues to be considered, offers alternatives and makes recommendations including clear provisions for implementation.

CHEMISTRY

CHEM1041 General Chemistry I 3 ch (3C 1T)
- Introductory course designed primarily for BSc students. Topics covered include atomic structure, chemical bonding, periodic table, acid-base equilibria, redox reactions, stoichiometry and solution chemistry. Prerequisites: MATH 1013. Co-requisite: MATH 1003.

CHEM1046 Introductory Chemistry Laboratory I 2 ch (3L)
- A selection of experiments to accompany CHEM 1041. Co-requisite: CHEM 1041 or equivalent.

CHEM1072 General Chemistry II 3 ch (3C 1T)
- A continuation of CHEM 1041. Topics covered include gas laws & kinetic theory; oxidation & reduction; acids & bases; atomic structure & quantum theory; periodic trends - atomic size, ionization, electron affinity; chemical bonding - Lewis structure, VSEPR, polarity, electronegativity, hybridization, hydrogen bonds - alkanes, alkenes, alkynes, nomenclature, isomerism, functional groups. Prerequisite: Grade 12 Chemistry or equivalent. Co-requisite: MATH 1001 or MATH 1003.

CHEM1077 Introductory Chemistry Laboratory II 2 ch (3L)

CHEM1831 What on Earth Isn't Chemistry? (Cross-Listed: SCI 1831) 3 ch (3C)
- Intended for students with limited chemistry background who wish to gain a better understanding of the chemistry in the world around them. The course will cover aspects of: atomic and molecular structure, the periodic table, what chemical names mean, balancing equations (and the relationship with stoichiometry), nuclear chemistry, radiation and organic compounds. The concepts will be examined in the context of understanding “everyday” chemistry. This course cannot be used as a substitute for any other first level Chemistry course.

CHEM1872 General Physical and Inorganic Chemistry 3 ch (3C)
- Intended primarily for Engineering students who require an introduction to physical and inorganic chemistry. This course may cover thermochemistry, chemical bonding & molecular structure, gases, intermolecular forces & modern materials, chemical equilibria (acid & base, buffer & solubility).
CHEM1877 General Physical and Inorganic Chemistry 2 ch (3L)
Intended primarily for Engineering students who require an introduction to physical and inorganic chemistry. Laboratory topics may include: colligative properties, recycling, enthalpy, gas laws, WHMIS, titration, kinetics, solubility and corrosion. Prereq: or Co-requisite: CHEM 1872.

CHEM2009 Experience in Chemistry Research I 3 ch (3L) [W]
CHEM 2009 is a project based course where students conduct research under the supervision of a chosen faculty member. Students must have declared a Science Major and must have CGPA of 3.7 or better to enter after first year or a CGPA of 3.0 or higher to enter after second year. Students will be provided with a list of projects and applicant's names will be forwarded to project supervisors. Applications must be made, by May 15th, to the Saint John Chemistry coordinator who will be in charge of project assignments. Since enrolment may be limited, students are encouraged to plan for alternative courses in the case that no suitable project is available. A minimum of at least 3 scheduled hours per week is required and one seminar presentation will be required at the end of the academic term, as well as a written report. Prerequisites: CHEM 1041, CHEM 1046, CHEM 1072 and CHEM 1077.

CHEM2065 Introductory to Biochemistry 4 ch (3C 3L*) [W]
Protein structure and function, techniques for protein analysis, examples of important proteins, mechanisms and regulations of enzymatic activity, metabolism (basic concepts and design, followed by the study of a few pathways). Prerequisites: BIOL 1017, BIOL 1105, CHEM 1205 and CHEM 2421.

CHEM2416 Organic Chemistry Laboratory I 2 ch (3L 1T) [W]
Introduction to experimental (organic) chemistry. Part I. Prerequisite: CHEM 1077 Co-requisite: CHEM 2421.

CHEM2421 Organic Chemistry I 3 ch (3C 1T)
An introductory course. Topics include bonding, elementary stereochemistry, functional groups, structure determination, reactions of alkenes and alylkes. Prerequisites: CHEM 1072, or for chemical engineering students with CHEM 1872.

CHEM2422 Organic Chemistry II 3 ch (3C 1T)
A continuation of CHEM 2421. Topics include stereochemistry, structure determination, alkyl halides, nucleophilic substitution and elimination reactions and their synthetic utility. Prerequisite: CHEM 2421.

CHEM2457 Organic Chemistry Laboratory 2 ch (3L) [W]
A laboratory course involving synthesis and purification of organic compounds, stereochemistry, isolation and structure elucidation of natural compounds (by both qualitative and spectroscopic methods). Prerequisite: CHEM 2416. Co-requisite: CHEM 2422.

CHEM2505 Introduction to Spectroscopy (O) 4 ch (3C 3L)
This course examines the fundamental principles underlying electronic, vibrational, and rotational spectra of molecules as well as magnetic resonance, mass spectrometry, optical rotation, etc. Principles of instrumentation will also be studied. Those concepts will then be practically applied in a laboratory setting. Prerequisite: CHEM 2421 or permission of instructor.

CHEM3245 Environmental Chemistry (A) 4 ch (3C 3L)
(Cross-Listed: BIOL 3245)
Course will provide students with a chemical basis for understanding the natural environment and current environmental issues. Topics will include: the composition of the natural environment, the chemistry supporting environmental processes, and the main reactions of natural & anthropogenic chemicals in the atmosphere, water, and soils. NOTE: This course may be listed as either BIOL 3245 or CHEM 3245. Credit cannot be obtained for both BIOL 3245 and CHEM 3245. Prerequisite: One term of organic chemistry at the 2nd year level.

CHEM3335 Chemical Management Practices 1 ch (3L*)
Overviews some information systems for Hazardous materials (builds on WHMIS, introduces TDG and GHS). Introduces aspects of chemical inventory management. Emphasis on laboratory ethics (including environmental responsibilities, safe lab practices, reporting). Further work on chemical handling, storage and waste management. Prerequisites: CHEM 1077 or equivalent and CHEM 2421 or equivalent. (6 x 3 hour lab sessions)

CHEM3435 Biomolecules and Primary Metabolism (A) 3 ch (3C)
(Cross-Listed: BIOL 3435)
This course will examine the chemistry, function, biosynthesis and metabolism of primary metabolites. Classes of compounds covered will include carbohydrates, fatty acids, amino acids, peptides, proteins and nucleic acids. NOTE: This course may be listed as either BIOL 3435 or CHEM 3435. Credit cannot be obtained for both BIOL 3435 and CHEM 3435. Prerequisites: CHEM 2422 and BIOL 2065.

CHEM4435 Biologically Active Natural Products and Secondary Metabolism (A) (Cross-Listed: BIOL 4435) 3 ch (3C)
This course will examine the biosynthesis, biological activity and ecological significance of secondary metabolites. Topics include: the links between primary and secondary metabolic pathways; an overview of the mechanisms, chemistry and coenzymes involved in the biosynthesis of natural products; the acetate pathway; the Shikimate pathway; the mevalonate and methyl erythritol phosphate pathways; the alkaloids; and chemical ecology. This course maybe listed as either CHEM 4435 or BIOL 4435. Credit can not be obtained for both CHEM 4435 or BIOL 4435. Prerequisites: CHEM 2422 and BIOL 2065.

CHNS11203 Introduction to Chinese I 3 ch
This introductory course acquaints students with some of the fundamentals of Modern Standard Chinese (Mandarin) and provides basic oral communication skills. NOTE: Closed to students with any knowledge of Chinese.

CIVIL ENGINEERING
A grade of C or higher is required in all Civil Engineering courses.

CE2023 Mechanics of Materials 5 ch (3C 3L)
Elastic and plastic stress, strain; behaviour of beams and columns, torsion; material strength. Prerequisite: APSC 1023. Co-requisite: MATH 1013.

CE2033 Structural Analysis 5 ch (3C 3L)
Influence lines for beams and trusses; analyses of indeterminate structures including approximate, classical, moment distribution, and numerical methods. Prerequisite: CE 2023.

CE2113 Soil Mechanics I 4 ch (3C 3L*)
Soil properties, seepage, effective stress, consolidation, shear strength. Prerequisites: GEOL 1044, CE 2703. Co-requisite: CE 2703.

CE2703 Introduction to Fluid Mechanics 4 ch (3C 1T)
Physical properties of liquids and gases, fluid statics, kinematics of fluid flow, energy considerations in steady flow, momentum and dynamic forces in fluid flow, fluid measurements, introduction to forces on immersed bodies. Prerequisites: APSC 1023 and MATH 1013.

CE2913 Numerical Problem Solving 4 ch (3C 2L)
An introduction to the application of numerical methods and statistical techniques to the solution of civil engineering problems. Introduction to the system approach and system analysis terminology. Numerical solution of civil engineering problems using root finding, interpolation, integration, and the solution of systems of algebraic equations. Introduction to the numerical solution of ordinary and partial differential equations. Techniques such as multiple linear regression, stepwise regression, time series analysis, nonparametric tests, and optimization are applied to the design and operation of civil engineering systems. Prerequisites: CS 1003, STAT 2593, MATH 1503, MATH 2513.

CE2973 Civil Engineering Design I 3 ch (2C 2L)
Continued development of communication skills used by engineers through the application of the design process to meet a well-defined set of requirements and constraints. Communication aspects emphasized include graphical representation of designs, formalized design calculations, and the development of project schedules and estimates. Design aspects of emphasize the generation, iteration and analyses of alternatives. Credit will not be given for both this course and CE 3973. Prerequisites: ENGG 1003, ENGG 1015.

CLASSICS AND ANCIENT HISTORY
CLAS1005 Ancient History: Greek and Roman People 3 ch
An introduction to the history of ancient Greece and Rome through famous and lesser known individuals. This course is designed to introduce students to historical inquiry and techniques through the study of antiquity.
Cultural industry and as a form of communication which pre
This course will explore the nature and evolution of media since the
and technological aspects of the information and communication

Ancient History: The Greeks (A) 3 ch (SC)
A survey of the social, cultural, intellectual, and political history of the ancient Greek world from the Bronze age to the death of Alexander the Great. Prerequisites: One term-course in CLAS or HIST.
Ancient History: The Romans (A) 3 ch (SC)
A survey of the social, cultural, intellectual, and political history of the ancient Roman world from the founding of Rome to the fall of the western empire. Prerequisites: One term-course in CLAS or HIST.
Ancient History: The Athenian Empire 3 ch
The social, cultural, intellectual, and political history of the "Golden Age" of Athens. Prerequisite: CLAS 2501.
Ancient History: Alexander and the Hellenistic World 3 ch
The social, cultural, intellectual, and political history of the age of Alexander the Great and his successors down to the death of Cleopatra VII. Prerequisite: CLAS 2501 or CLAS 2601.
Ancient History: Cicero and the Late Republic 3 ch
An examination of the social, cultural, intellectual, and political history of the late Roman republic through the life of one of its most famous citizens. Prerequisite: CLAS 2601.
Ancient History: The Julio-Claudian Dynasty 3 ch
The social, cultural, intellectual, and political history of the Roman Empire under Tiberius, Caligula, Claudius, and Nero. Prerequisites: CLAS 2601.
Ancient History: Josephus and the Jewish Wars (O) 3 ch (SC)
A study of Josephus' account of the history of the Jewish people from the Maccabean revolt to the fall of Masada. Special attention will be paid to Josephus' historiographical methods and to the social, cultural, intellectual, and political context of the period. Prerequisite: CLAS 2501 or CLAS 2601.
Ancient History: Women in the Roman World 3 ch
The status and role of women in the Roman world as reflected in literary, historical, legal, and archaeological sources. Prerequisite: CLAS 2601.
Ancient History: Augustus and the Roman Revolution 3 ch
An examination of the career of Caesar Augustus from his unexpected rise to power to his establishment of the imperial system of government at Rome. Prerequisite: CLAS 2601. Credit may be obtained for only one of CLAS 3007 and CLAS 3008.

COMMUNICATION STUDIES

History of Communication 3 ch (SC)
A survey of the great revolutions in human communication of speech, literacy, printing and electronic communication. Examines how new media of communication come into being, their impact on earlier forms of communication, their impact on society, and the influence society and culture have on communication technologies. Credit can only be obtained for one of COMS 1001 or ICS 1001.
Foundations of Communication Studies 3 ch (SC)
This course is a basic introduction to the social, cultural, political, economic and technological aspects of the information and communication revolution. Credit can only be obtained for one of COMS 1002 or ICS 1002.
Transformations in Media 3 ch (SC)
This course will explore the nature and evolution of media since the development of the Internet. The course will provide students with a framework for thinking about media institutions and technologies. Credit can only be obtained for one of COMS 1002 or ICS 1002.
Popular Music, Culture and Communication (O) 3 ch (SC)
A general introduction to the study of Western popular music as both a cultural industry and as a form of communication which presents students with an overview of post-war popular music genres from rock n' roll to contemporary dance music. Credit can only be obtained for one of COMS 2101 or ICS 2101.

SECTION F: SAINT JOHN COURSES

Media Living: Media in Everyday Life 3 ch (SC)
Explores the political, economic, ideological and organizational settings within which contemporary media operate and examines their importance in many aspects of contemporary life. Students will critically examine their own experiences as media consumers and users. Credit can only be obtained for one of COMS2102 or ICS2102.
Understanding Comics and Manga 3 ch (SC)
This course will focus on the study of comics and manga (Japanese comic books and graphic novels). Students will analyze the history of comics and the industry in both North America and Japan. Particular emphasis will be placed on issues pertaining to: gender, culture, leadership, characterizations, artwork, fan communities, and creative workers. Credit can only be obtained for one of COMS 2103 or ICS 2103. Prerequisite: None.
Theories of Communication 3 ch (SC)
This focuses on theoretical issues regarding the political and social implications of the information and communication revolution. Specific themes to be covered include society and technological change, communication technologies, globalization and the digital revolution. Credit can only be obtained for one of COMS 3001 or ICS 3001. Prerequisite: Successful completion of fifteen term-courses, including COMS 2001, or permission of the instructor.
Electronic Research 3 ch (SC)
This course provides students with an advanced introduction to conducting web-based research and the use of electronic research tools. Credit can only be obtained for one of COMS 3003 or ICS 3003. Prerequisite: Successful completion of fifteen term-courses, including COMS 2001, or permission of the instructor.
Media Production: Audio 3 ch (SC)
Introduction to production techniques related to radio and web podcasting. Students will explore aspects of production through individual and group projects as well as in class presentations. Includes a strong writing component. Credit can only be obtained for one of COMS 3004 or ICS 3004. Prerequisite: Successful completion of fifteen term-courses, including COMS 2001, or permission of the instructor.
Intellectual Property and the Information Commons 3 ch (SC)
This course will explore the emerging importance of copyright as a pertinent regulatory issue facing both the communication industries and western society. We will examine the development of copyright and its transformation as a result of technological, economic and cultural changes in the global cultural industries. Credit can only be obtained for one of COMS 3005 or ICS 3005. Prerequisites: Successful completion of fourteen term-courses in any discipline, plus COMS 2001, or permission of the instructor.
Media Production: Video 3 ch (SC)
Introduction to video production techniques. Students will explore aspects of production through individual and group projects as well as in class presentations. Includes a strong writing component. Credit can only be obtained for one of COMS 3006 or ICS 3006. Prerequisite: Successful completion of fifteen term-courses, including ICS 2001, or permission of the instructor.
Digital Democracy 3 ch (SC)
This course examines technologically mediated political practices in liberal democracies. Credit can only be obtained for one of COMS 3007 or ICS 3007. Prerequisite: Successful completion of fifteen term-courses, including COMS 2001, or permission of the instructor.
D.I.Y Media 3 ch (SC)
New technologies and do it yourself (D.I.Y) culture have a long, intertwined history. This class will examine the origins, technologies, techniques and representations of D.I.Y in contemporary culture. Students will examine "lo-fi" practices such as circuit bending, hardware hacking and tinkering as forms of culture and communication. Credit can only be obtained for one of COMS 3008 or ICS 3008. Prerequisite: Successful completion of fifteen term-courses, including COMS 2001, or permission of the instructor.
Special Topics in Communications Studies (O) 3 ch (SC)
Exploration of specialized topics in media studies, technology and society, or communication policy issues. Credit can only be obtained for one of COMS 3101 or ICS 3101. Prerequisites: COMS 3001 and COMS 3003, or permission of the instructor.
Gender, Media and Communication 3 ch (SC)
This course will focus on the salience of gender in understanding media and communication. Course topics may include a focus on gender and the
Introduction to fundamentals of the discipline of software engineering with focus on the software development life cycle. Topics include software development methodologies and processes, requirements, analysis, modeling, architecture, design, implementation, testing, and maintenance.
not be taken for credit by BScCS or BCS students. Prerequisite: Approval of the Department.

CS3033 Software Design and Development 4 ch (3C)
Further coverage of the requirements analysis, software architecture and design phases started in CS2043. Focus on project management and evaluation, advanced techniques for object-oriented analysis and design, design patterns, component-based and product-line approaches. Prerequisite: CS 2043.

CS3113 Introduction to Numerical Methods 4 ch (3C)
Error analysis, convergence and stability. Approximation of functions by polynomials. Numerical quadrature and differentiation. The solution of linear and non-linear equations and the solution of ordinary differential equations. Emphasizes the development of computer algorithms and stresses the influence of finite precision and arithmetic on computational results. Prerequisites: (CS 1003 or CS 1073, MATH 1013) or CS 2113, and MATH 1503 or MATH 2213.

CS3123 High Speed Computing 4 ch (3C 2L*)
This course will discuss the building blocks required for undertaking parallel computation on shared memory architectures. Differences between programming on shared memory multiprocessors and distributed memory processors will be discussed. Software will include performance analysis tools and message passing libraries such as Open MP and MPI. Prerequisite: CS 2263 Co-requisite: CS 3403.

CS3403 Operating Systems 4 ch (3C 2L*)
This course examines the fundamental role of an operating system. Topics covered are: process/threads, process management, process synchronization, CPU scheduling, storage management, I/O management, security and user interfaces. Examples are drawn from contemporary operating systems. Prerequisites: CS 2253, (CS 2263 or CS 2617) and 70ch completed.

CS3423 Data Management (A) 4 ch (3C)
Discussion of selected topics at an advanced level concerning the storage and manipulation of large volumes of data outside of a conventional relational database or statistical package. Covers select NoSQL technologies. Prerequisites: INFO 1103 and 70 ch completed.

CS3553 Introduction to Bioinformatics 4 ch (3C)
(Cross-Listed: BIOL 3553)
Even before the completion of the Human Genome Sequencing Project biomedical databases have stored massive amounts of DNA and protein sequence information that have been analysed and reused in biomedical studies. Today the underlying technologies and analytical tools supporting genomic data analysis make up the field known as Bioinformatics. This course will introduce core topics and tools in genomics and bioinformatics explained from a practical perspective. Students taking this course will receive hands on training in many of the following areas of study: Genome Sequencing techniques, Gene Prediction, Sequence Alignment, Sequence Databases, Genome and Protein Structure Annotation, Bioinformatic Visualization Techniques, Gene Ontology, Analysis of Scientific Literature, Biomedical Text Mining, Workflow Management Systems, Bioinformatics Web Services. Prerequisite: 60 credit hours completed in a BSc (Biology, Marine Biology, Environmental Biology, or Biology-Psychology) or in a BScCS, or permission of the instructor.

CS3773 Topics in Web Science 4 ch (3C)
Web science integrates computer information sciences with multiple aspects of social sciences. Web Science is concerned with the socio-technical aspects of the World Wide Web. Understanding the web requires analysis of its architecture and applications, the people, organizations, policies and economics that are affected by it and impact it. This course will explore the history of the Web and how evolution of metadata representation standards have resulted in a smarter web. Students will primarily do a hands-on data analytics project using Open Data, Linked Data and SPARQL endpoints available on the web. Prerequisite: 70ch completed or permission of the instructor.

CS3813 Computer Architecture and Organization 4ch (3C 2L*)
Advanced concepts in assembly language programming, functional organization of a computer system, organization of CPU, organization of I/O, interrupts, memory organization, cache and virtual memories, performance enhancements, pipelining, superscalar processors and embedded systems. Prerequisites: (ECE 2214 and ECE 2215) or CS 2803, and CS2253.

CS3893 Computer Networking 4 ch (3C)
This course provides an in-depth look at the hardware and software behind the Internet and other computer networks. Topics include OSI network architecture, communication protocols, UDP and TCP, socket programming, common application layer protocols, Internet routing protocols, Internet Protocol, link layer services, network security. Prerequisite: CS 2253. Co-requisites: (ECE 2214 and ECE 2215) or CS 2803.

CS3913 Algorithms 4 ch (3C)
Continues the study of algorithms begun in CS 2383. Covers advanced techniques for analyzing recursive algorithms, examines major algorithm-design approaches including greedy, divide and conquer, dynamic programming, and graph-based approaches. Considers randomized algorithms and introduces complexity theory, including NP-completeness. One or more advanced topics will be chosen from the following areas: algorithmic problems arising in artificial intelligence, state spaces and search strategies, parallel and distributed algorithms. Prerequisites: CS 2383 and CS 2333.

CS3983 Professional Practice 4 ch (3C) [W]
Covers social context of computing, professional and ethical responsibilities, risks and liabilities of computer-based systems, intellectual property, privacy and civil liberties, and professional certification by the Canadian Information Processing Society. Examines the interaction between technical work and the ethical and social issues encountered in practice. Emphasis is on the history of computing and its role in society. Students will write a practicum report and complete a client project. Prerequisites: 70 ch and either completion of the BScCS Arts Writing Core Requirements or exemption from the Requirement.

CS4033 Software Project Management and Quality Assurance (A) 4 ch (3C)
Discusses the "umbrella" activities in software development: project planning and monitoring, risk management, quality assurance through reviews and testing (including reliability and safety, and test automation), and the management of technical debt. Emphasis is put on software metrics and their use in quantitative management. Introduces concepts in software process improvement. Prerequisite: CS2043.

CS4083 Leading-Edge Technology in Software Development 4 ch (3C)
Selected topics in software engineering at an advanced level. Content will vary. Topics will be posted on the department web site at least one month prior to the beginning of the course. One of the goals of this course is to prepare students for life-long learning, through reading papers from the literature and discussing them in class.

CS4093 Team Software Development Project 4 ch (3C)
The application of sound software engineering techniques to a problem in a practical setting. This course involves a relatively large software project, done in a team (with proper team management). A real "client" shall be involved, from whom the requirements have to be gathered, and to whom quality product and documentation have to be delivered. This course is normally completed during the student's final year of study. Prerequisites: CS 3033 and permission of instructor.

CS4103 Parallel Programming with MPI 4 ch (3C)
Explores the design and analysis of parallel algorithms on distributed and hybrid computing clusters. Development work on local and remote computing platforms with a high level computing language and message passing libraries such as OpenMP and MPI will provide the core of the course. Prerequisite: CS 3123.

CS4123 Topics in High-Performance Computing and Visualization (O) 4 ch (3C)
Advanced level discussions chosen from recent research topics in computation techniques, high-performance computing or visualization. The course will involve presentations and written reports. Prerequisites: CS3123 and CS3813.

CS4403 Data Mining 4 ch (3C 1L)
Data Mining (aka knowledge discovery) is an interdisciplinary area of computer science with the goal of extracting new knowledge and insights from big and complex data sets. The course introduces essential pattern recognition methodologies leveraging machine learning and rule-based techniques. Supplementary tasks involving processing, cleaning, integration, and transformation of data are also covered. An etymology of data mining is provided to help students compare and contrast knowledge discovery with contemporary data analytics and decision support methodologies. Prerequisites: INFO 1103 and (STAT 2593 or STAT 2793).

SECTION F: SAINT JOHN COURSES
CS4525 Advanced Database Management Systems (A) 4 ch (3C 2L)*

Continues the study of databases begun in INFO 1103, with a focus on the internal workings of modern relational database systems. Topics include: file systems and structures, advanced query languages, query optimization, concurrency control and recovery, security and integrity, systems for Big Data processing including the Map/Reduce framework and related Apache projects. Prerequisites: INFO 1163, CS2383, and 70 ch completed.

CS4613 Programming Languages 4 ch (3C 1T)

Structure and major characteristics of programming languages; formal definition, syntax, semantics. Comparative study of principal language concepts and their treatment in imperative, functional, logic, and object-oriented languages. Prerequisites: CS 2333, CS 2043, (CS 2263 or CS 2617), and 90 ch completed.

CS4713 Fundamentals of Simulation (O) 4 ch (3C 1T)

Systems and model. The simulation process. Random number generation. Introduction to queues, computer modeling of discrete systems using appropriate languages, computer modeling of continuous systems, model validation and experiment planning. Case studies from a variety of disciplines. Prerequisites: CS 1083, CS 3113, (STAT 2503 or STAT 1793 or STAT 3083).

CS4783 Web: Semantics, Services and Solutions (O) 4 ch (3C)

This course outlines the World Wide Web and focuses on the technologies and innovations that are driving its evolution. It introduces the W3C endorsed Semantic Web technologies and looks at the migration of the semantic web to the semantic web and subsequent generations. Key topics explored are knowledge engineering; OWL ontology reasoning; text mining and natural language processing tools; web services and workflow technology, as well as end-user interaction in web search. Prerequisites: CS 1083, CS 2383, CS 3773, and INFO 1103.

CS4795 Artificial Intelligence 4 ch (3C 2L)*

Introduction to intelligent agent design, problem solving using search techniques, the use of mathematical logic for knowledge representation and reasoning, decision making under uncertainty, machine learning techniques. Applications of AI to health care will be discussed. Note: Credit will not be granted for both CS 4795 and CS 4725. Prerequisites: CS 2333 and CS 2383.

CS4843 Wireless and Mobile Computing (A) 4 ch (3C)

Wireless communication technology, fading and line-of-sight propagation, antennas, signal encoding, spread spectrum and wireless networking. Cellular system, cell coverage, mobile data communication, mobile IP and WAP. The course will also cover IEEE wireless standards, Bluetooth and other related topics for networking. Prerequisite: CS 3893.

CS4893 Network Programming 4 ch (3C 1T)

Threads, socket programming (client/server), secure sockets, multicast sockets, protocol handlers, content handlers, RMI, Mail API and social networks. Uses Java programming language. Prerequisites: CS 1083 and CS 3893.

CS4973 Independent Study in Computer Science 4 ch

This course will provide the student with practical experience in their area of study. Under the supervision of a faculty member, the student will explore topics not available in the regular course offerings. The course may contain written assignments, written tests, or relevant work experience. A written report and oral presentation are required. Students must identify a faculty member who is willing to supervise the course and apply to the co-ordinator of the course for approval prior to the term in which they wish to undertake the work. Applications are normally approved only for students who are in their final year of the programme, and who have obtained a grade point average of at least 3.0 in work of the second and third years. Prerequisite: Approval of the Department.

CS4980 Fourth Year Technical Report 4 ch (1S*) [W]

Builds on the skill developed in CS 3983, through the preparation and presentation of a technical report. The report normally involves a design or implementation project undertaken as part of the course, and it may be expressed either as a traditional formal written document, or, at the supervisor’s discretion, as an extended slide deck. Students are required to attend certain department and faculty talks, and they must attend sessions on writing and/or library research skills. Additional course regulations are available from the Department. A supervisor approved by the Department must be chosen within the first two weeks. Credit will be granted for only one of CS 4980 or CS 4993. Prerequisite: CS 3983.

CS4983 Technical Report 4 ch (1S*) [W]

Builds on the skills developed in CS 3983, through the preparation and presentation of a technical report. The report normally involves a design or implementation project undertaken as part of the course, and it may be expressed either as a traditional formal written document, or, at the supervisor’s discretion, as an extended slide deck. Students are required to attend certain department and faculty talks, and they must attend sessions on writing and/or library research skills. Additional course regulations are available from the Department. A supervisor required approved by the Department must be chosen before the term begins. Changes to the project plan developed in CS 3983 must be approved before the beginning of term. Note: credit will be granted for only one of CS 4980, CS 4983 or CS 4993.

CS4993 Honours Project 6 ch [W]

The student submits a detailed proposal, schedule, progress reports and written reports to the thesis coordinator with the supervisor’s approval. A formal presentation of the thesis is required. Planning of the thesis is done prior to the beginning of term. Detailed guidelines are available from the Department. Note: Credit will be granted for only one of CS 4980, CS 4983, or CS 4993.

CS4998 Directed Studies in Applied Computer Science 4 ch (3S)

This course permits students and faculty to explore inter-disciplinary areas of research in relation with computers, Arts, Science, and Business programs. In some cases, the faculty members will offer directed studies to groups of students. In other instances, individual students will seek this course on a one-on-one basis. Prerequisites: Approval of the CS department and at least 90 ch completed. Recommend that students have taken a first- or second-year course in CS or IT.

CS4999 Directed Studies in Computer Science 4 ch (3S)

This course permits Computers Science students and faculty to explore various areas of Computer Science. In some cases, the faculty members will offer directed studies to groups of students. In other instances, individual students will seek this course on a one-on-one basis. Prerequisites: Department approval and at least 90 ch completed.

DATA ANALYSIS

DA2503 Packaged Software Decision Aids 4 ch (3C 1T)

Examines typical software packages present in information centres and other business environments. Includes selected topics from the following areas: operating systems; network administration; communication software; word processing; spreadsheets; database management systems and graphics. Prerequisite: 30 ch of university courses including one of IT 1803, CS 1003, or CS 1073.

DA3053 Mathematical Software 4 ch (3C 1T)

Advanced software packages and programming languages developed for mathematical computations: symbolic, graphical, numerical and computational. Students will be involved in implementing and testing various algorithms. Prerequisites: MATH 2003, MATH 1503, or CS 1073.

DA3123 Numerical Treatment of Geometric Modeling 4 ch (3C 1T)

Presents the nature, development and application of the basic concepts of geometric modeling. The parametric geometry is considered primarily for curves including analytical properties, intersections and transformation. Emphasizes numerical methods and analysis with applications being drawn from such areas as image processing, graphics and computer-aided design. Prerequisite: CS 3113.

DA3203 Data Analysis Using Statistical Software Packages 4 ch (3C)

This is a case-studies based course in which students learn to analyse data in a modern statistical computing environment. The course promotes the use of graphical and other exploratory techniques as a crucial first step in data analysis. Students will be exposed to practical problems often encountered during the data analysis process. The importance of summarizing and communicating results effectively will be emphasized through the strong project-oriented component of the course. Prerequisites: 3 ch in each of three subjects: Mathematics, Statistics, and Computer Science.

DA4123 Numerical Solution of Systems 4 ch (3C 1T)

Emphasis on linear systems with discussion on topics such as large; small; sparse, full; square, no square systems. Methods of solution involve a survey of direct and interactive techniques. As time permits, the discussions will be extended to include nonlinear systems. Applications drawn from statistics and operations research. Both writing computer programs and working with stored computer programs form an integral part of the course. Prerequisite: CS 3113.
DA4403 Data Mining (O) (Cross-Listed: CS4403) 4 ch (3C 1L)

DA4803 Independent Studies in Data Analysis 4 ch (3C 1T)
Discussion of Data Analysis topics at an advanced level chosen jointly by student, advisor and Department Chair. Topic of course to be entered on the student’s transcript.

DA4813 Independent Studies in Data Analysis 4 ch (3C 1T)
Discussion of Data Analysis topics at an advanced level chosen jointly by student, advisor and Department Chair. Topic of course to be entered on the student’s transcript.

DA4993 Project in Data Analysis 4 ch (2S)
Application of correct and appropriate methods of data analysis in one or more areas. A project proposal is required with a final report in which the student describes clearly and concisely the work done, the results obtained, and a careful interpretation of the results in form and language meaningful to workers in the subject area. Students in the Certificate of Data Analysis should choose an industry-related or applied project involving a large amount of data. It should be noted that such a project may require extra time in order to become familiar with the data at hand. Prerequisite: Permission of Program Director.

ECONOMICS

ECON1004 Economics and Society (O) 3 ch (3C)
Designed for students who do not intend to major in economics. Examines the working of the market system, competition policy, price supports and regulation, labour markets and unions, and social issues. NOTE: BBA students cannot take this course for credit. Students with credit for ECON 1013 or ECON 1073, or taking those courses, cannot take this course for credit.

ECON1013 Introduction to Microeconomics 3 ch (3C)

ECON1023 Introduction to Macroeconomics 3 ch (3C)
Concerned with the causes of unemployment and inflation, the determination of total output, investment, and interest rates. Stabilization policies, exchange rates and balance of payments.

ECON1073 Economics for Engineers 3 ch (3C)
An introductory course for students in Engineering and Computer Science. Topics include theory of markets, production, costs, externalities, and the macroeconomics of aggregate output determination and growth. NOTE: Credit will not be given for both ECON 1073 and ECON 1013/ECON 1023.

ECON2013 Intermediate Microeconomics 3 ch (3C)
This course develops material from ECON 1013. Applications of microeconomic theory are emphasized. Prerequisite: ECON 1013.

ECON2023 Intermediate Economics 3 ch (3C)
This course develops material from ECON 1023. Applications of macroeconomic theory are emphasized. Prerequisite: ECON 1023.

ECON2091 Contemporary Issues in the Canadian Economy I (O) 3 ch (3C)
Concerned with current issues in the Canadian Economy. Topics may include public policy towards unemployment, inflation, foreign investment, poverty, income distribution and regional development. Prerequisites: ECON 1013 and ECON 1023; or ECON 1073.

ECON2092 Contemporary Issues in the Canadian Economy II (O) 3 ch (3C)
Analysis of specific economic phenomena in Canada. Prerequisites: ECON 1013 and ECON 1023; or ECON 1073.

ECON2103 Financial Institutions and Markets 3 ch (3C)
An introduction to the microeconomic aspects of monetary theory and policy. Topics include how money is defined and measured, portfolio theory, theories of the interest rate, the determination of the money supply, and bank regulation. Prerequisites: ECON 1013 and ECON 1023; or ECON 1073.
natural resources. Prerequisites: ECON 1013 and ECON 1023; or ECON 1073.

ECON 3613 Game Theory 3 ch (3C)
An introduction to game theory - a type of applied mathematics that describes strategic behavior. Examples will be drawn from economics, political science, sociology and biology. This interdisciplinary course is open to students who have successfully completed 15 term courses (45 ch) or by permission of the instructor.

ECON 3665 Mathematical Economics 3 ch (3C)
A course in economic theory concerned with topics in micro-and macroeconomics. Emphasis is on the use of mathematics in the development of economic theory, particularly calculus and matrix algebra. Prerequisites: ECON 2013, ECON 2023. Also, Mathematics requirement for Majors must be completed before a student is admitted.

ECON 3702 Cost Benefit Analysis (O) 3 ch (3S)
Comparative study of costs and benefits and the impact of public projects and policy initiatives. Prerequisites: ECON 1013 or ECON 1075, and ECON 1023.

ECON 3755 Environmental Economics (A) 3 ch (3C)
Examines interaction of ecological and economic systems, considering population growth, food supply, and non-renewable resources. Prerequisites: ECON 1013 or ECON 1023; or ECON 1073.

ECON 3813 Introduction to Health Economics 3 ch (3C)
Health Economics is an applied economics course drawing heavily upon microeconomics theory. Through the application of economic principles, this course evaluates healthcare institutions and markets with an emphasis on Canadian issues and policies. The topics covered include the determinants of healthcare, the economics of insurance and risk aversion, the behaviour of consumers and healthcare providers, asymmetric information, and the nature of the market for healthcare services.

ECON 3835 Market Strategies and Organization (O) 3 ch (3C)
The analysis of market structure, firm strategy and performance, and public policy issues. Prerequisite: ECON.

ECON 4035 Macroeconomics II 3 ch (3C)
Advanced course in macroeconomic theory and analysis, with emphasis on the theory of investment, consumption, money and employment. Neoclassical monetary equilibrium, and the Keynesian and post-Keynesian models. Prerequisite: ECON 3023.

ECON 4045 Microeconomics II 3 ch (3C)
Topics may include theories of imperfect competition, search and information, market failures, property rights, simple general equilibrium models. Prerequisite: ECON 3013.

ECON 4645 Introduction to Applied Econometrics (O) 3 ch (3S)
The objective of the course is to explain the problems and issues associated with empirical measurement of economic relationships, and an assessment of the techniques by which those problems may be solved. Prerequisites: STAT 1793 and STAT 2793 (or equivalent), and 4 term courses in Economics. NOTE: Credit will not be given for both ECON 4645 and STAT 4703.

ECON 4665 Mathematical Economics II 3ch
This course extends the work from ECON 3665, building upon your background in calculus, algebra, and real analytics. By the end of this course you should have a strong understanding of mathematical economics with the ability to read and interpret quantitative scholarly research.

ECON 4988 Topics in Economics I (O) 3 ch (3WS/S)
Directed study/reading programs. Workshops or seminars will be held as required. Students should apply to the Department in September or January for permission to take this course. Prerequisites: ECON 2013 and ECON 2023.

ECON 4999 Topics in Economics II (O) 3 ch (3WS/S)
Directed study/reading programs. Workshops or seminars will be held as required. Students should apply to the Department in September or January for permission to take this course. Prerequisites: ECON 2013 and ECON 2023.

EDUCATION

ED 2514 First Nations In North America to the War of 1812 3ch(3C) [W]
This course will focus on the history of Indigenous Peoples in the context of early European exploration, the fur trade, missionization, and colonial policies. This course is cross-listed with HIST 2154 and students may not receive credit for both courses.

ED 3021 Human Development and Learning: An Overview 3 ch
A study of theory, methods and research findings in infancy and childhood. Examines social, cognitive, emotional and physical development. Credit will not be granted for both PSYC 2201 and ED 3621. NOTE: Open to Education Students only. Prerequisites: PSYC 1003 and PSYC 1004.

ED 3024 Understanding the Adult Learner (O) 3 ch (3C)
Explores the characteristics of learners in formal and nonformal education settings and identifies learning processes and conditions as they influence adult learning.

ED 3031 The Education of Exceptional Learners 3 ch (3C)
Provides the student with an introduction to the field of knowledge associated with exceptional learners.

ED 3041 The Theory and Practice of Education 3 ch (3C)
A study of dominant theories which influence and shape educational thinking and practice today. Key ideas, their origins, their current representatives, and the transposition of ideas into educational applications will be discussed.

ED 3051 School Law and Organization 3 ch (3C)
An overview of the legal, organizational, financial and professional aspects of schools and school systems.

ED 3061 Students, Schools, Equity and Social Justice (O) 3 ch (3C)
Explores the social, economic, cultural and political contexts of learners’ lives, discourses of social differences, equity and social justice. Topics include: sexism, gender bias, racism, class oppression, homophobia, and heterosexism, harassment and violence, and the questions these issues raise for schools, curricula and classroom practice.

ED 3211 Introductions to Visual Education 3 ch
Addresses the history, rationales, developmental theories, curriculum planning, and basic art-making skills essential for teaching art at the elementary, middle, and high school levels. Visual understanding and how it can be increased through school art programs is a key consideration.

ED 3241 Music for the Classroom Teacher 3 ch (3C)
Outlines the materials in the music curriculum that the classroom teacher might be expected to teach, plus a study of various ways to integrate music into the general classroom curriculum.

ED 3381 Internet Literacy (O) 3 ch (3C) (LE)
Theoretical issues arising from Internet, along with practical skills needed to gain familiarity with this network. How Internet challenges the way we create, disseminate, acquire and own knowledge.

ED 3382 Access to Literacy (O) 3 ch (3C)
Although the teaching of reading is regarded as one of the fundamental tasks of the school system, there is relatively little attention paid to what is being read. In this course students will learn; how to find out about books; how to recognize a genuine work of imaginative literature when they encounter one; and how to talk about books among themselves and with children.

ED 3415 Developing Numeracy 3 ch
The study of number relationships and approaches to developing number sense in children and adults.

ED 3424 Teaching Elementary School Mathematics 3 ch (3C)
Focus on appropriate methodology for teaching mathematics at the elementary school level. Students must demonstrate competency in the mathematics content underlying the curriculum prior to completion of this course. Prerequisite: MATH 2633 or a MATH course approved by the Education Coordinator.

ED 3474 Health & Movement Education In the Elementary School 3 ch (3C)
Examines curriculum and pedagogy in elementary health and physical education programs.
ED3511 Introduction to Science Education 3 ch (3C)
An introduction to the teaching of science across and for particular learner levels.

ED3561 Introduction to Second Language Education 3 ch
An overview of the theories of learning and teaching in the Second Language context with particular emphasis on Communicative, multi-dimensional and multi-resource methodology. (ED 4565 can be taken in place of ED 3561 but students cannot count both towards the TESL certificate). Prerequisites: Successful completion of 10 term-courses with a GPA of 2.7 or better, advanced written and spoken English language skills.

ED3563 Initiation à la didactique du français langue seconde (FLS) 3 ch
Étude des caractéristiques et des objectifs de divers programmes de FLS (par ex., français de base, immersion avec l'accent sur le français intensif). Examen des fondements de l'apprentissage, de l'enseignement et de l'évaluation du FLS. Élaboration et application d'activités communicatives. This course will be taught only in French. Prerequisite: A French oral proficiency certificate with a minimum level of Advanced from the New Brunswick Department of Training and Employment Development or permission of the instructor.

ED3563 Introduction to French Second Language Education and Intensive French (FI) 3 ch
In this course students will study the characteristics and objectives of various French Second Language programs (core French, Immersion with an emphasis on Intensive French). Students will also examine the basis of learning, teaching and assessment in French Second Language education. Communicative activities will be explored and created. This course will be taught only in French. Prerequisite: A French oral proficiency certificate with a minimum level of Advanced from the New Brunswick Department of Training and Employment Development or permission of the instructor.

ED3621 Introduction to Social Studies (O) 3 ch (3C)
Consideration of the history of Social studies, debates about the content of social studies and the current state of social studies in Canada.

ED3641 Geography in Education (O) 3 ch (3C) (2L)
Scope and purpose of geography in education. Trends and source materials, including the use of maps, air photos and satellite images. Two laboratory sessions.

ED3803 Service Learning in Elementary Education 3 ch (3C)
This course will enable participating students to gain some early practical and hands-on experience in a community school. By providing direct service to a local area school, students will have an opportunity to confirm that their chosen pursuit of a career in the teaching profession. The experience gained in this course will also allow students to see and experience first hand the diversity of learners that are present in the public school system. Prerequisite: ED 4164.

ED4003 Field Experience I for BEd Concurrent Students
Field experience for BEd concurrent students. Must be completed before ED 5000 Practicum. Prerequisite: ED 4164.

ED4164 Techniques of Teaching 3 ch (3C)
Students will learn to design lessons to meet a variety of teaching situations. Classroom skills will be learned and practiced in mini-teaching sessions in front of peers and a supervising faculty member. Causes of student behaviour problems will be analyzed and strategies for dealing with disruptive students developed. This course is mandatory for first year BA/BEd students and a prerequisite for ED 4003 Field Experience I for BEd Concurrent Students (SJ).

ED4211 Integrated Learning through Art (O) 3 ch (3C)
Art education theories and practices as they apply to learning across the curriculum.

ED4353 Literacy for Struggling Readers K-5 (A) 3 ch (3C)
Classroom learning philosophies and arrangements for children who are struggling readers. Prerequisite: Must be a BEd student or teacher upgrading.

ED4354 Literacy Learning in Early Years (O) 3 ch (3C)
Current theories of the nature of literacy learning and their relationship to instructional practices in the early years.

ED4451 Health Education (O) 3 ch (3C)
Examines curriculum and pedagogy in a range of elementary, middle and secondary school programs that come under the rubric of health education.

Includes analyses of underlying assumptions, the organization of knowledge, and pedagogical approaches to this subject area.

ED4562 Advanced Studies in ESL Education 3 ch (3C)
Examines communicative language teaching in the context of classrooms. Emphasizes varied teaching methods, curriculum development, and evaluation of second language learning. Prerequisites: Successful completion of 10 term-courses; as well as ED 3561 or ED 4565. Co- or prerequisite: LING 2101 or equivalent (3 ch).

ED4565 ESL for the Classroom Teacher 3 ch (3C) (LE)
This course is designed for classroom teachers, and future classroom teachers who have English Language Learners, (ELLs) in their classrooms. Topics to be examined include; Second Language Learning, Sheltered Instruction, Teaching Strategies, the S.I.O.P. (Sheltered Instruction Observational Protocol) Model and Assessment. ED 3561 can be taken in place of ED 4565 but students cannot count both towards the TESL certificate. Prerequisites: Successful completion of 10 term-courses, advanced written and spoken English Language skills.

ED4791 Basic and Applied Nutrition (O) 3 ch (3C)
Basic concepts in nutrition across the lifespan; nutritional assessment; nutrition information, education and other change strategies; and current nutrition issues.

ED5013 Special Topics in Education 3 ch (3C)
In consultation with the Education Coordinator.

ED5032 Inclusion from the Early Years 3 ch (3C)
An examination of personal, societal and school assumptions about the meaning and importance of inclusion in life and learning from childhood. Inclusive methods of education will be examined. Prerequisites: ED 3031

ED5040 Internship for Concurrent Education 15 ch
A 15 week Practicum for students in local schools. CGPA of at least 2.7 and criminal record check are required. Along with the Prerequisites, students normally should have completed the two Education electives before taking the Practicum. Prerequisites: All required Education courses and 30 term-courses in BA degree.

ED5046 Education at Risk Students (O) 3 ch (3C)
Characteristics of the at-risk student. Psychological, social, and economic effects of dropping out. Remedial strategies involving learning, teaching, counseling, school climate, and school organization. Exemplary programs for at-risk students and for dropout prevention.

ED5091 Learning Disabilities: Introduction 3 ch (3C)

ED5096 Behavioural/Emotional Disorders: Introduction (O) 3 ch (3C)
An overview of various emotional and behavioural disorders of children and young people and the ways in which coping and management strategies can be applied to develop self-discipline and control. Prerequisite: ED 3031.

ED5102 Curriculum and Evaluation in the Early Years (O) 3 ch (3C)
Examines characteristics of early years learners and the role of the teacher as observer and curriculum developer in theory and practice. Prerequisite: ED 3041.

ED5161 Curriculum Theory (O) 3 ch (3C)
Theory, current trends, and the role of the teacher in curriculum development. Prerequisite: ED 3041.

ED5175 Classroom Assessment (O) 3 ch (3C)
Concepts and principles: teacher made tests, standardized tests, test construction, selection, administration and interpretation across the curriculum. Prerequisite: ED 3051.

ED5191 Independent Studies (O) 3 ch
Students will normally be limited to only 3ch of independent study. Prerequisite: Permission of an instructor is required before registration.

ED5566 Field Experience in TESL 3 ch
Supervised field experience for students in an environment in which they can both observe qualified instructors and participate in planning and teaching English as second or additional language. (The course does not qualify for the 4 term-courses of ED courses which may be applied to the BA degree). Prerequisites: Successful completion of 10 term-courses; as well as ED 3561 or ED 4565. Co- or prerequisite: LING 2101 or equivalent (3 ch).
A critical evaluation of the role of instructional technology across the curriculum. Technologies and strategies for integration to enhance classroom instruction will be developed and evaluated.

**ELECTRICAL AND COMPUTER ENGINEERING**

A grade of C or higher is required in all Electrical Engineering courses.

**ECE1813**  
Electricity and Magnetism  4 ch (3C 1T 3L*)  
An introduction to the fundamentals of electricity and magnetism and applications. Covers concepts of charge, electric fields, voltage, current, power, energy, magnetic fields and the link between electricity and magnetism for the creation of machines. Includes resistors, resistance, Ohm's law, Kirchhoff's voltage and current laws, some electrical properties of materials. Electric sources, simple series, parallel, and series-parallel DC circuits and mesh analysis are examined. Energy conversion and simple electric machines are examined. The behaviour and use of common sensors and transducers are discussed. **Prerequisite**: Two years of high school physics (or equivalent). **Co-requisite**: MATH 1003.

**ECE24112**  
Simulation and Engineering Analysis  4 ch (3C 3L*)  
An introduction to modelling and numerical methods as applied in the solution of engineering problems. The solution of nonlinear equations, polynomials, curve fitting, numerical integration and difference equations. Simulation tools such as MATLAB will be used. **Prerequisites**: CS 1003 or CS 1073 or equivalent; ECE 1813 or EE 1813 or equivalent; MATH 1013; MATH 1503 or MATH 2213 or equivalent.

**ECE2711**  
Electric Circuits  4 ch (3C 1T 3L*)  
Basic DC circuits: network analysis and theorems: AC circuits: introduction of phasors, network analysis and theorems applied to AC circuits. **Prerequisites**: MATH 1013; ECE 1813 or EE 1813 or equivalent.

**ECE2722**  
Circuits and Systems  4 ch (3C 3L*)  
Network analysis: transient and steady state responses; transfer functions; complex frequencies; poles and zeros; Laplace Transforms; frequency response and Bode Plots; filters (passive and active). **Prerequisites**: ECE 2711 or EE 2711 or equivalent; MATH 1503 or MATH 2213 or equivalent. **Co-requisite**: MATH 3503 or equivalent.

**ECE2214**  
Digital Logic Design  3 ch (3C 1T)  
An introductory course to practical aspects of digital system design. The course covers digital logic design, including basic design concepts and implementation technology, number representations, synthesis of combinational and sequential logic, and the use of HDL and computer-based tools. **Prerequisite**: CS 1003 or CS 1073 or equivalent. **Recommended**: ECE 1813 or EE 1813. **Co-requisite**: ECE 2215.

**ECE2215**  
Digital Logic Design Laboratory  1 ch (3L*)  
This is an introductory course to practical aspects of digital systems design. Course includes the design of digital circuits with CAD tools and VHDL hardware description language. **Prerequisite**: CS 1003 or CS 1073 or equivalent. **Recommended**: ECE 1813 or EE 1813. **Co-requisite**: ECE 2214.

**ENGINEERING**

**ENGG1001**  
Engineering Practice Lecture Series  0 ch (1C)  
A guest lecture series intended to introduce students to the engineering profession. Speakers from various engineering disciplines and job functions share their career experiences and discuss engineering projects underway in the region.

**ENGG1003**  
Engineering Technical Communication  4 ch (2C 3L) [W]  
Ooral, written and visual communication skills are developed as important tools used by engineers. Technical writing style is taught through the preparation of reports and summaries, and oral communication skills are improved through public speaking and the preparation of formal presentations. Computer-aided design is introduced and used to enhance visualization skills. The importance of information literacy is stressed. Various types of engineering drawings are presented and engineering unit conversions are practiced.

**ENGG1015**  
Introduction to Engineering Design and 2 ch (1C 2L) [W]  
**Problem Solving**  
This course introduces engineering design methodology and develops basic problem solving techniques. Students work both individually and in teams on real engineering design projects for the local community in a simulated engineering consulting environment. Project planning, team-building, leadership and responsible care are discussed. Laboratories are used to demonstrate problem solving techniques for analytical and open-ended problems, and life-long learning is emphasized by having students integrate Co-requisites and researched material into a structured design process. Restricted to students with fewer than 60ch of program credit upon first admission to the Faculty of Engineering or with permission of the instructor. **Co-requisites**: ENGG 1003, APSX 1013, MATH 1003, MATH 1503.

**ENGLISH**

The prerequisite for upper-level courses in English is 3 term-courses of English at the lower level, or unless special permission is obtained from the instructor.

**ENGL1001**  
Introduction to the Study of Literature  3 ch (3C)  
An introduction to the principles of literary analysis.

**ENGL2001**  
Introduction to Poetry  3 ch (3C)  
An introduction to poetic forms, language and theme within an historical context. Students will be encouraged to participate in the critical analysis of the poems in the course. There will be a special emphasis on written assignments.

**ENGL2002**  
Introduction to Drama  3 ch (3C)  
Introduces dramatic genres, language, theoretical approaches and staging within an historical context. **NOTE**: this is a course in reading drama and not in acting. There will be a special emphasis on written assignments.

**ENGL2003**  
Introduction to Prose  3 ch (3C)  
An introduction to the critical analysis of prose - short stories, novellas, novels - within an historical context. There will be a special emphasis on written assignments.

**ENGL2101**  
Literature in English I  3 ch (3C)  
A survey of literature to the end of the 18th Century. Exclusion ENGL 1200.

**ENGL2102**  
Literature in English II  3 ch (3C)  
A survey of literature in English from 1800 to the present. Exclusion ENGL 1200.

**ENGL3004**  
Malory's Morte D'Arthur  3 ch (3C) [W]  
A study of the Arthuriad of Sir Thomas Malory and some of Malory's source material.

**ENGL3007**  
Chaucer and his Contemporaries  3 ch (3C) [W]  
A study of the major themes and literary forms of the English Middle Ages, with particular emphasis on the lyric, the Breton Lay, the Romance, and the dream vision.

**ENGL3008**  
Chaucer: The Canterbury Tales  3 ch (3C)  
A study of Chaucer's major literary achievement and its relevance to the concerns of the 21st century.

**ENGL3104**  
Shakespeare and Pedagogy  3 ch  
This course will study various pedagogical approaches for up to three Shakespeare plays frequently taught at the high school level. **NOTE**: The prerequisite for upper-level courses in English is 3 term-courses of English at the lower level, or unless special permission is obtained from the instructor.

**ENGL3105**  
Shakespeare's Earlier Plays  3 ch [W]  
This course is a study of a selection of Shakespeare's earlier plays (pre-1600) in context. This course will also examine early theatres, genre, and possible dramatizations.

**ENGL3106**  
Shakespeare's Later Plays  3 ch [W]  
This course is a study of a selection of Shakespeare's later plays (post-1600) in context. This course will also examine early theatres, genre, and possible dramatizations.

**ENGL3107**  
Renaissance Drama (Non-Shakespearean)  3 ch [W]  
This course is an introduction of Elizabethan and Jacobean plays in context. This course will also examine early theatres, genre, and possible dramatizations.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL3108</td>
<td>Studies In Early Renaissance Literature</td>
<td>3 ch</td>
<td>This course is an introduction to prose and poetry of the early Renaissance (1510-1640), studied in the context of the period's wide-ranging literary, political, religious, and social changes.</td>
</tr>
<tr>
<td>ENGL3109</td>
<td>Studies In Later Renaissance Literature</td>
<td>3 ch</td>
<td>This course is an introduction to prose and poetry of the later Renaissance (1590-1670), studied in the context of the period's wide-ranging literary, political, religious, and social changes.</td>
</tr>
<tr>
<td>ENGL3203</td>
<td>Restoration and 18th Century Drama</td>
<td>3 ch (3C)</td>
<td>Traces British Drama from its bawdy rebirth in 1660, through the sentimental domesticity of the early eighteenth century, to the &quot;laughing comedy&quot; at the century's end. Also considers the history of the London theatre.</td>
</tr>
<tr>
<td>ENGL3204</td>
<td>18th Century Prose and Poetry</td>
<td>3 ch</td>
<td>Examines the literature of the 18th century, excluding the drama.</td>
</tr>
<tr>
<td>ENGL3205</td>
<td>Prose Narrative Before 1800</td>
<td>3 ch (3S/C)</td>
<td>Examines genres of prose narrative through to 1800 with emphasis on the novel.</td>
</tr>
<tr>
<td>ENGL3301</td>
<td>Romantic Poetry</td>
<td>3 ch (3C)</td>
<td>Studies the major poets of the British Romantic period.</td>
</tr>
<tr>
<td>ENGL3302</td>
<td>Romantic Novel</td>
<td>3 ch (3C)</td>
<td>A study of the development of the novel in Romantic Britain. Topics studied may include the novel of sensibility, the Gothic novel, the English Jacobin novel, the historical novel, and the national tale.</td>
</tr>
<tr>
<td>ENGL3303</td>
<td>Romantic and Victoria Drama</td>
<td>3 ch</td>
<td>Explores both the literary and theatrical dimensions of the nineteenth century. Studies closet drama, melodrama, comedy, farce, pantomime, burlesque, extravaganza, and spectacular entertainment.</td>
</tr>
<tr>
<td>ENGL3304</td>
<td>Studies in the Romantic Age</td>
<td>3 ch (3C)</td>
<td>This course will study a selection of texts from the period 1789 to 1832.</td>
</tr>
<tr>
<td>ENGL3311</td>
<td>Victorian Poetry</td>
<td>3 ch (3C)</td>
<td>Studies the major poets of Victorian Britain.</td>
</tr>
<tr>
<td>ENGL3312</td>
<td>Victorian Novel</td>
<td>3 ch (3C)</td>
<td>A study of a selection of Victorian novels from the period 1832 to the end of the nineteenth century.</td>
</tr>
<tr>
<td>ENGL3313</td>
<td>The Earlier Victorian Age</td>
<td>3 ch (3C)</td>
<td>This course will study a selection of texts from the period 1832 to 1870.</td>
</tr>
<tr>
<td>ENGL3314</td>
<td>The Later Victorian Age</td>
<td>3 ch (3C)</td>
<td>This course will study a selection of texts from the period 1870 to 1901.</td>
</tr>
<tr>
<td>ENGL3401</td>
<td>Modern British Poetry</td>
<td>3 ch</td>
<td>A study of selected modern poetry.</td>
</tr>
<tr>
<td>ENGL3402</td>
<td>Modern British Novel</td>
<td>3 ch</td>
<td>A study of selected novels.</td>
</tr>
<tr>
<td>ENGL3403</td>
<td>Modern English and Irish Drama</td>
<td>3 ch</td>
<td>Deals with the major dramatic developments of this century, beginning with the pioneering efforts of such figures as Galsworthy, Shaw and Yeats, and concluding with the trends of the present day.</td>
</tr>
<tr>
<td>ENGL3404</td>
<td>Irish Literature</td>
<td>3 ch</td>
<td>A study of the literature of Ireland, excluding drama.</td>
</tr>
<tr>
<td>ENGL3405</td>
<td>Studies In Modern British Literature</td>
<td>3 ch</td>
<td>A study of selected British short fiction, poetry, essays, and novels of the 20th century.</td>
</tr>
<tr>
<td>ENGL3501</td>
<td>Canadian Poetry</td>
<td>3 ch</td>
<td>A study of Canadian Poetry.</td>
</tr>
<tr>
<td>ENGL3502</td>
<td>Canadian Novel</td>
<td>3 ch</td>
<td>A study of selected novels.</td>
</tr>
<tr>
<td>ENGL3504</td>
<td>Canadian Short Fiction</td>
<td>3 ch</td>
<td>A study of selected short fiction.</td>
</tr>
<tr>
<td>ENGL3505</td>
<td>Maritime Poetry</td>
<td>3 ch</td>
<td>A study of Maritime poetry from its beginnings, with an emphasis on 20th century developments.</td>
</tr>
<tr>
<td>ENGL3506</td>
<td>Maritime Fiction</td>
<td>3 ch (3C)</td>
<td>An overview of the variety of genres in Maritime fiction.</td>
</tr>
<tr>
<td>ENGL3508</td>
<td>Canadian Literature WWII</td>
<td>3 ch</td>
<td>A study of Canadian poetry, short fiction, criticism, and novels written before the Second World War.</td>
</tr>
<tr>
<td>ENGL3509</td>
<td>Canadian Literature after WWII</td>
<td>3 ch</td>
<td>A study of Canadian short fiction, poetry, novels, and criticism written after World War II.</td>
</tr>
<tr>
<td>ENGL3511</td>
<td>American Poetry</td>
<td>3 ch (3C)</td>
<td>An overview of modern American poetry.</td>
</tr>
<tr>
<td>ENGL3512</td>
<td>American Short Fiction</td>
<td>3 ch (3S)</td>
<td>A study of 19th and 20th Century American short fiction.</td>
</tr>
<tr>
<td>ENGL3513</td>
<td>American Drama</td>
<td>3 ch (3S)</td>
<td>A study of the work of major American playwrights of the 20th Century.</td>
</tr>
<tr>
<td>ENGL3601</td>
<td>Introduction to Literary Theory</td>
<td>3 ch (3C)</td>
<td>A historical survey of literary theory.</td>
</tr>
<tr>
<td>ENGL3621</td>
<td>Writing by Women I</td>
<td>3 ch (3C)</td>
<td>A study of texts by women in a variety of genres to the mid-eighteenth century.</td>
</tr>
<tr>
<td>ENGL3631</td>
<td>Studies in Gender and Genre</td>
<td>3 ch</td>
<td>Examines the development of masculinities and femininities in the context of a particular or several literary genre(s).</td>
</tr>
<tr>
<td>ENGL3705</td>
<td>Literature of the West Indies, Africa and India</td>
<td>3 ch (3C)</td>
<td>A study of selected literature written in English in the West Indies, Africa and India.</td>
</tr>
<tr>
<td>ENGL3706</td>
<td>Experimental Modern Theory</td>
<td>3 ch (3C)</td>
<td>A study of the development of modern and postmodern drama as a series of reactions against realism.</td>
</tr>
<tr>
<td>ENGL3709</td>
<td>Children’s Literature</td>
<td>3 ch (3C)</td>
<td>An overview of children’s literature.</td>
</tr>
<tr>
<td>ENGL3713</td>
<td>Special Topics</td>
<td>3 ch</td>
<td>This course focuses on specialized areas of interest. Prerequisites: Three term-courses of lower level English.</td>
</tr>
<tr>
<td>ENGL3721</td>
<td>Literature of the Fantastic before the 20th Century</td>
<td>3 ch (3S/C)</td>
<td>This course examines the development of fantastic literature from the early modern period to the beginning of the 20th Century.</td>
</tr>
<tr>
<td>ENGL3722</td>
<td>Topics in Speculative Fiction</td>
<td>3 ch (3S)</td>
<td>This course examines specific themes, movements, and/or authors of science fiction and/or fantasy from the early 20th century.</td>
</tr>
<tr>
<td>ENGL3801</td>
<td>from Script to Performance</td>
<td>3 ch (3C)</td>
<td>This course integrates the study of drama as literature with the practical elements of theatrical production.</td>
</tr>
<tr>
<td>ENGL3802</td>
<td>Reading Film</td>
<td>3 ch</td>
<td>This course will explore various ways of analyzing a variety of films.</td>
</tr>
<tr>
<td>ENGL3803</td>
<td>American Film</td>
<td>3 ch</td>
<td>A study of major trends in American film.</td>
</tr>
<tr>
<td>ENGL3812</td>
<td>Postmodern Literature</td>
<td>3 ch</td>
<td>Postmodern Literature is a study of the theory behind, and the practice of, postmodern literature. Works from several genres including poetry, prose, drama, and film will be studied.</td>
</tr>
</tbody>
</table>
SECTION F: SAINT JOHN COURSES

ENGL3902 Drama Production 3 ch
This course runs in cooperation with a local professional theatre company. It will offer students practical experience in a number of "backstage" elements of theatre production, such as set design and construction, costumes, publicity and program design. Enrollment is limited. 
Prerequisites: Three lower level term-courses in English and permission of the instructor.

ENGL3903 The Development of Western Drama 3 ch [W]
Studies a range of plays to illustrate the development of the dramatic tradition in the western world.

ENGL3922 Special Topics in Creative Writing 3 ch
A workshop seminar in which a variety of genres, styles, and forms are studied and practiced through weekly assignments. Students who have completed ENGL 3913 - Writing Poetry 1 or ENGL 3914 - Writing Poetry II are eligible to register for this course.

ENGL4801 Honours Essay: Reading and Research 3 ch [W]
This course is devoted to the research portion of the honours project.

ENGL4802 Honours Essay 3 ch [W]
An honours essay to be attempted upon completion of ENGL 4801. 
Prerequisite: ENGL 4801

ENGL4803 Advanced Seminar I 3 ch
A senior seminar in selected topics.

ENGL4804 Advanced Seminar II 3 ch
A senior seminar in selected topics.

HENG4000 Joint Honours Thesis 6 ch [W]
Honours thesis for Joint Honours Program in English and History. 
Prerequisites: Acceptance into the Joint Honours Program in English and History.

FRENCH

NOTE: See beginning of Section F for abbreviations, course numbers and coding.

FR1203 Communication en français I 3 ch
Français de base pour étudiants ayant au plus le Grade 10. 
NOTE: Les étudiants qui ont réussi, FR 1304, FR 2203, FR 2304, FR 2204, FR 3203, ou FR 3204, n'obtiendront pas de crédits académiques pour ce cours.

FR2203 Communicating in French III 3 ch
Communication en français III. 
Prerequisite: FR 2204 ou équivalent.

FR2204 Communicating in French IV 3 ch (3C)
A workshop seminar in which a variety of genres, styles, and forms are practiced by wounded and sexercices of different styles, appuyés par la révision des principales structures de la phrase. 
Prerequisite: FR 2203, ou équivalent.

FR2304 Français pour étudiants de l'immersion II 3 ch
Deuxième partie d'un cours destiné à satisfaire les besoins particuliers des étudiants issus des écoles d'immersion. Suite de FR 1304, ce cours offre une revue systématique de la grammaire française. Ouvert aux étudiants issus d'écoles dont la langue première d'enseignement est le français. 
Prerequisite: FR 1304, ou avec la permission du professor. 
NOTE: Les étudiants qui ont réussi FR 1203, FR 2203, FR 2304, ou FR 2204, n'obtiendront pas de crédits académiques pour ce cours.

FR2304 French for Immersion Students II 3 ch
Second half of a course designed to meet the particular needs of students coming from immersion schools. As a continuation of FR 1304, this course provides a systematic review of French grammar. Graduates of high schools where French is the first language of instruction must register for this course. 
Prerequisite: FR 1304, or permission of the instructor. 
NOTE: Students with credit for any of FR 1203, FR 1304, FR 2203, FR 2304, or FR 2204 cannot take this course for credit.

FR3084 Conducting Business in French 3 ch (3C)
Par le biais de textes divers et d'études de cas, ce cours améliore les compétences de l'étudiant en français des affaires. La redaction de lettres, de memos, de procès-verbaux et de rapports sont étudiés. Ce cours prépare aussi les étudiants qui désirent faire l'examen de la Chambre de Commerce et de l'Industrie de Paris. 
Prerequisite: FR 2204 ou équivalent.

FR3084 Le monde des affaires en français 3 ch (3C)
Par le biais de textes divers et d'études de cas, ce cours améliore les compétences de l'étudiant en français des affaires. La redaction de lettres, de memos, de procès-verbaux et de rapports sont étudiés. Ce cours prépare aussi les étudiants qui désirent faire l'examen de la Chambre de Commerce et de l'Industrie de Paris. 
Prerequisite: FR 2204 ou équivalent.
examen set by the Chambre de Commerce et d’Industrie de Paris. 
Prerequisite: FR 2204 or equivalent.

FR3203 Communication avancée 3 ch (3C)
Destiné à familiariser l’étudiant aux structures complexes du langage et à l’application efficace de ces concepts dans leur expression orale et écrite. Prerequisite: FR 2204 ou FR 2304 (avec la permission du professeur), ou équivalent.

FR3203 Advanced Communication 3 ch (3C)
Designed to familiarize students with complex language structures and to prepare them to apply these concepts effectively in their oral and written expression. Prerequisite: FR 2204 or FR 2304 (with permission of the instructor), or equivalent.

FR3204 Français écrit avancé 3 ch (3C)
Destiné au développement plus particulier des connaissances de structures complexes et de leur usage dans l’expression orale et écrite - en particulier la dissertation, le rapport, la lettre. Prerequisite: FR 2204, ou FR 2304, FR 3203 ou équivalent.

FR3204 Effective Writing in French 3 ch (3C)
Designed to further develop the knowledge of complex structures and their use in oral and written expression - particularly essays, reports and letters. Prerequisites: FR 2204, or FR 2304, FR 3203 or equivalent.

FR3324 Traduction I 3 ch (3C)
Destiné à familiariser l’étudiant aux principes fondamentaux de la traduction. Pratique de traduction de textes en français avec accent sur les diverses formes de traduction de concepts similaires en anglais et en français. Prerequisite: FR 2204 ou FR 2304, FR 3203 ou équivalent.

FR3324 Cross-Linguistic Communication I 3 ch (3C)
Designed to familiarize the students with the fundamentals of translation theory. Students will practice translating text into French with emphasis on the different ways of expressing the same concept in English and French - micro level. Prerequisites: FR 2204 ou FR 2304, FR 3203 or equivalent.

FR3412 L’acquisition de la langue 3 ch (3C)
Ce cours présenté les processus acquisition de la langue avec application au français. Les sujets de discussion influent l’acquisition de la langue maternelle (l’hypothèse de l’IP) et l’acquisition du français comme langue seconde en situations d’immersion et de bilinguisme. Pré-requis: aucun sauf pour les étudiant(e)s du programme de français, qui doivent avoir fini FR 2204, ou FR 2304, ou un cours équivalent.

FR3412 Language Acquisition 3 ch (3C)
This is a course in language acquisition with application to French. Topics cover first language acquisition (the IP hypothesis) and second language acquisition of French in immersion and bilingual environments. Prerequisite: No Prerequisites except for the students enrolled in a French program, who must have FR 2204 ou FR 2304.

FR3422 L’histoire de la langue française 3 ch (3C)
Ce cours présente les concepts de la linguistique diachronique dans la perspective de la grammaire générative en se basant sur l’histoire du français. Parmi les sujets abordés seront les changements du système phonologique, la transition au système sans cas, les changements paramétriques en syntaxe. Pré-requis: aucun sauf pour les étudiant(e)s du programme de français, qui doivent avoir fini FR 2204, ou FR 2304, ou un cours équivalent.

FR3422 The History of the French Language 3 ch (3C)
A generative grammar approach to diachronic linguistics with application to French. Topics: changes in consonant and vowel systems, transition to a non-case system, parametric changes in syntax. Prerequisite: No Prerequisites except for the students enrolled in a French program, who must have FR 2204 ou FR 2304.

FR3432 Variation langagière I: Concepts de base 3 ch (3C)

FR3432 Dialect Variation I: Basic Concepts 3 ch (3C)
Study of variations among languages as rooted in the setting of morphological parameters. Illustrations and applications from French and English dialects, pidgins and creoles. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

SECTION F: SAINT JOHN COURSES

FR3434 Les mots et leurs sens 3 ch (3C)
Qu’est-ce qu’un lexique, qu’est-ce qu’un dictionnaire? Le mot (son sens, son évolution, ses variations et sa formation) sont au coeur de cette étude sur l’impact quotidien de l’oral et de l’écrit dans la communication. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3434 Words and Meaning 3 ch (3C)
What is a lexicon and what is a dictionary? Words (meaning, evolution, variants and formation) are the central topic of this study which looks at the impact of spoken and written words on daily communication. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3442 Variation langagière II: le français académ 3 ch (3C)
Étude des différences entre le français standard et le français académien dans la perspective de leur variation paramétrique en morphologie. Une vue d’ensemble de la grammaire française académienne sert de fondement à l’étude. Prerequisite: FR 2204 ou FR 2304, ou FR 3432 équivalent.

FR3442 Dialect Variation II: Acadian French 3 ch (3C)
Differences between Standard French and Acadian French are approached from the perspective of parametric variation in morphology. An overview of Acadian French grammar provides the basis for this study. Prerequisite: FR 2204 ou FR 2304, FR 3422, FR 3432 ou équivalent.

FR3464 La pensée et la phrase 3 ch (3C)
Pourquoi les usagers d’une langue construisent-ils leurs phrases de la même manière? Explication du don inné de l’apprentissage d’une langue et description de modèles mentaux de création de phrases. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3464 Mind and Sentence 3 ch (3C)
Why do speakers of a language construct their sentences in the same way? An investigation of the innate ability to learn a language is proposed. Mental models for creating sentences are considered. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3514 Communication et expression littéraire 3 ch (3C)
Exploration de la littérature comme mode de communication et comme effet de sens particuliers selon les usages de la prose fictive, de la non-fiction, de la poésie ou du théâtre. Étude de textes d’auteurs français du dix-neuvième et du vingtième siècle. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3514 Communication and Literary Form 3 ch (3C)
An exploration of literature as communication, and of the significance inherent in the choice of literary form whether prose fiction, non-fiction, poetry or drama. A variety of texts by French authors of the 19th and 20th centuries will serve as illustration. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3524 Littératures françaises d’Afrique et des Caraïbes 3 ch
Ce cours compare certains courants esthétiques et idéologiques propres aux littératures de francophone, d’Afrique et des Caraïbes, dans une perspective post-coloniale. Prerequisite: FR 2204, FR 2304 ou équivalent.

FR3524 Contemporary French African and Caribbean Literatures 3 ch
Examines in a comparative perspective some ideological and aesthetic trends in francophone, African and Caribbean literatures from a post-colonial point of view. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3525 Francophone Storytelling 3 ch
Examines storytelling as a literary genre and its sociocultural implications in the Francophone world, especially in the Sub-Saharan and northern parts of Africa as well as the French Caribbean. Emphasis will be on the prestige and the social role of the storyteller, but also on the influence of the oral tradition on Francophone Literature. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3525 Le conte francophone 3 ch
Ce cours examine le conte en tant que genre littéraire ainsi que ses implications socioculturelles dans le monde francophone, surtout en Afrique subsaharienne, au Maghreb et dans les Antilles françaises. Il souligne le prestige et le rôle social du Conteur, mais aussi l’influence de la tradition orale sur la littérature francophone. Prerequisite: FR 2204, FR 2304, ou équivalent.

FR3614 Auteurs de dix-huitième siècle 3 ch (3C)
Étude de textes représentatifs de quelques auteurs français importants du dix-huitième siècle. Prerequisite: FR 2204 ou FR 2304, ou équivalent.
FR3614 Selected 18th Century Authors 3 ch (3C)
A study of selected important works representative of one or two major French authors from the 18th century. Prerequisite: FR 2204 or FR 2304, or equivalent.

FR3615 Auteurs du dix-neuvième siècle 3 ch (3C)
Étude de textes représentatifs de quelques auteurs français importants du dix-neuvième siècle. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3615 Selected 19th Century Authors 3 ch (3C)
A study of selected important works representative of one or two major French authors from the 19th century. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3616 Auteurs du vingtième siècle 3 ch (3C)
Étude de textes représentatifs de quelques auteurs français importants du vingtième siècle. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3616 Selected 20th Century Authors 3 ch (3C)
A study of selected important works representative of one or two major French authors from the 20th century. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3626 Chefs d’œuvre en littérature 3 ch (3C)
Étude de textes fondateurs reconnus comme classiques dans la tradition littéraire de langue française à travers l’histoire, les genres et les cultures. Prerequisite: FR 2204 ou FR 2304, ou l’équivalent.

FR3626 Literary Masterpieces in French 3 ch (3C)
An overview of founding texts identified as classics of literary traditions in French across history, genres and cultures. Prerequisite: FR 2204 or FR 2304, or equivalent.

FR3704 Aspects des cultures francophones internationales 3 ch (3C)
Ce cours décrit les changements récents dans les cultures francophones d’Afrique et des Caraïbes dans contexte post-colonial et leurs rapports avec la France. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3704 Aspects of World Francophone Cultures 3 ch (3C)
This course will expose recent changes in Francophone countries, mainly African and Caribbean, and their cultural relationships with France in the post-colonial context. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3714 Aspects des cultures acadienne et franco-ontarienne 3 ch (3C)
À titre de cultures minoritaires au Canada, Acadiens et Franco-Ontariens ont développé des identités distinctes. Des origines à nos jours, ce cours porte une attention particulière sur les réalités historiques, sociales et artistiques de ces cultures. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3714 Aspects of Acadian and Franco-Ontario Cultures 3 ch (3C)
As French cultural minorities in Canada, Acadians and Franco-Ontarians have developed distinctive identities. From their origins to the present, attention will be given to the historical, social and artistic expressions of these cultures. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3724 Aspects de la culture Québécoise 3 ch (3C)
Ce cours porte sur de multiples aspects de la culture québécoise, en particulier l’histoire, la géographie, la langue, la religion, le folklore, la musique, la chanson, l’éducation, le mouvement des idées et la littérature. Attention spéciale portée sur les grandes questions dans le Québec contemporain. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3724 Aspects of Quebec Culture 3 ch (3C)
This course examines the multiple aspects of Quebec culture focusing on the history, geography, language, religion, folklore, music, songs, education, intellectual movements and literary works. Special attention will be given to contemporary issues in the Quebec society. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3734 Littérature francophone et Cinéma 3 ch (3C)
Ce cours porte sur les interactions entre l’œuvre littéraire francophone et son adaptation cinématographique. Il consiste particulièrement en une analyse comparative des séquences narratives, de la représentation et de l’interprétation. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3734 Language of Francophone Literature and Cinema 3 ch (3C)
This course examines the correlation between francophone literary works and their cinematic adaptations. Particular attention is given to the comparative analysis of narrative sequences, representation and interpretation. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3744 Media Texts and the Francophone World 3 ch
Based on a corpus of study combining journal articles gleaned from the French press and samplings taken from French television and radio broadcasting, the course proposes an examination of Francophone cultures through analysis of media language, communication strategies and socio-ideological/aesthetic tendencies. Prerequisite: FR 2204 ou FR 2304, or equivalent.

FR3744 La Francophonie et les médias 3 ch
Ce cours examine la diversité culturelle d’expression française à partir d’un corpus d’articles tirés de journaux, de revues et de sites internet, et d’enregistrements sonores et visuelles authentiques dans la perspective d’une analyse de ses principales tendances idéologiques, esthétiques et sociales. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3814 L’expression littéraire au Canada français 3 ch (3C)

FR3824 Le théâtre au Canada français 3 ch (3C)
De Gratien Gélinas a Robert Lepage, le théâtre canadien-français a évolué d’une expression de l’identité collective vers une recherche plus orientée sur le langage dramatique. Dans ce contexte, les oeuvres des principaux dramaturges seront analysées. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3824 Language of French Canadian Drama 3 ch (3C)
From Gratien Gélinas to Robert Lepage, French Canadian drama has evolved from the expression of cultural identity to research into the language of drama, gradually emphasizing the relationship of dramatic language and content. In this context, the works of major dramatists will be reviewed. Prerequisite: FR 2204 ou FR 2304, or equivalent.

FR3844 Michel Tremblay ET son temps 3 ch (3C)
Auteur reconnu internationalement, Michel Tremblay a consacré l’importance de la culture populaire dans la littérature québécoise dans les années 60. Du Cycle des Belles-Sœurs aux Chroniques du Plateau-Mont-Royal, ce cours analyse la consécration de ce jeune classique et son influence dans la société. Prerequisite: FR 2204 ou FR 2304, ou équivalent.

FR3844 Michel Tremblay and His Time 3 ch (3C)
Internationally acclaimed for Les Belles-Sœurs, Michel Tremblay consecrated the cultural importance of «joual» (popular language) in the «quebecois» literature of the late 1960’s. Through a selection of his works in drama, autobiography, short stories, movies and novels, this course will review the making of this young «classic» and the influence of this author on society. Prerequisite: FR 2204 ou FR 2304, or equivalent.

FR4203 Le Français en context 3 ch
Destiné a reproduire des situations de la vie quotidienne et d’enjeux contemporains afin de motiver l'étudiant à elargir ses connaissances de niveau avance et a en faire usage dans diverses conditions. Prerequisite: FR 3203 ou FR 3204 ou équivalent.

FR4203 French In Context 3 ch
Designed around everyday life and contemporary topics that will motivate students to expand their advanced language skills and make use of them in complex ideas and diverse situations. Prerequisite: FR 3203, FR 3204 or equivalent.

FR4204 Parfait l’oral et l’écrit 3 ch (3C)
Destiné à développer une connaissance plus authentique du français par ses expressions idiomaticques et ses vocabulaires spécifiques. Ce cours s’adresse particulièrement aux étudiants désireux de faciliter leur intégration dans un environnement bilingue. Prerequisite: FR 3203 ou FR 3204, or equivalent.

FR4204 Perfecting Oral and Written Skills 3 ch (3C)
Designed to develop a more idiomatic and authentic knowledge of French through active learning and application of more specific vocabulary. This course will prepare students to function effectively in a bilingual work place. Prerequisite: FR 3203, FR 3204 or equivalent.
FR4324  Translation II  3 ch (3C)
Exploration avancée des différences linguistiques par la traduction de documents authentiques de l’anglais vers le français. Prérequis: FR 3324 ou équivalent.

FR4324  Cross-Linguistic Communication II  3 ch (3C)
Intended to explore cross-communication differences by translation of authentic texts into French - macro level. Prérequis: FR 3324 or equivalent.

FR4514  Special Topics in French Literature  3 ch (3S)
A study of emerging themes in literary works of the French speaking world. Prérequis: FR 2204 or FR 2304, or equivalent.

FR4514  Thèmes en littérature d’expression française  3 ch (3S)

FR4524  Literary Criticism in French  3 ch (3S)
Literary theory applied to the works of Francophone authors. Prérequis: FR 2204 ou FR 2304, or equivalent.

FR4524  Critique littéraire  3 ch (3S)

FR4534  Films francophones et perspectives postcoloniales (A)  3 ch (3C)
Le cours porte sur les nouvelles tendances dans les films francophones de la période postcoloniale (Maghreb, Afrique subsaharienne et Antilles françaises). Tout en analysant de façon critique les polarisations traditionnelles héritées de l’époque coloniale, les films choisis illustrent les nouveaux genres, thèmes et styles qui incarnent les complexités et les défis nouveaux dans un monde francophone soumis aux exigences de la mondialisation. Prérequis: FR 2204 ou FR 2304, ou avec l’permission du professeur.

FR4544  Aspects du Cinéma dans la France contemporaine  3 ch
Par une sélection de films représentatifs, ce cours examine les thèmes majeurs, les styles et les auditoires visés par les cinéastes aujourd’hui. Il décrit la société française du XXIe siècle, dans ses préoccupations quotidiennes, ses idées culturelles et ses rapports au monde extérieur. Prérequis: FR 2204, FR 2304 ou équivalent.

FR4544  Aspects of Cinema in Contemporary France  3 ch
Through a selection of representative films, this course examines major themes, styles and audiences targeted by filmmakers as well as the representations of current preoccupations, cultural ideals and global connections of French society in the 21st century. Prérequis: FR 2204, FR 2304 or equivalent.

GENDER STUDIES
GEND2001  Introduction to Gender Studies  3 ch
An introduction to Gender Studies with an emphasis on interdisciplinary perspectives. Examines basic concepts, approaches, and methods pertinent to understanding gender relations and divisions in a global and historical context. NOTE: Normally students take this course after successful completion of 10 term-courses (30 ch). Students who take GEND 2001 may not receive credit for, SOCI 2501.

GEND4001  Directed Studies  3 ch
Supervised study in some area of Gender Studies to be determined by the student and instructor in consultation with the Gender Studies Coordinator. Prérequis: GEND 2001 and 9 additional ch of Gender Studies eligible courses.

GEOGRAPHY
GEOG1001  Introduction to Human Geography  3 ch (C O)
Introduces sub-fields of human geography - including cultural, historical, economic, environmental, and regional geography.

SECTION F: SAINT JOHN COURSES
GEOG2001  Introduction to Regional Geography of Canada  3 ch (3C)
This course offers a general introduction to the regional geography of Canada. Emphasis will be placed upon regional variations in population distribution, elements of the natural environment and resource use. To understand Canada’s present landscape, some aspects of the historical evolution of each region will be explored. Prérequis: none

GEOL1044  The Earth: Its Origin and Evolution  5 ch (3C 3L)
Basic geological concepts, geological time, material of the earth’s crust, igneous, sedimentary and metamorphic rocks, earthquakes, evolution of continents and ocean basins, sea-floor spreading and plate tectonics.

GEOL1074  Earth Processes, Resources and the Environment  5 ch (3C 3L)
Structural geography, origin and evolution of life from fossils, geomorphology of landforms, mineral resources and fossil fuels, environmental geology, hydrology, engineering geology. Prérequis: GEOL 1044.

GEOL2131  Crystallography and Mineralogy  5 ch (2C 4L)
Fundamentals of crystallography and the classification, identification, occurrence and origin of the major rock and ore-forming minerals. Mineral by definition, igneous, sedimentary and metamorphic rocks in terms of mineral assemblages. Prérequis: GEOL 1044/GEOL 1074

GEOL2142  Optical Mineralogy and Petrography  5 ch (2C 4L)
Fundamental polarizing microscope techniques as applied to the identification of crystalline materials. Systematic study of the composition, phase relations and occurrence of rock-forming minerals with an emphasis on their identification in thin section as individuals and as members of mineral assemblages. Prérequis: GEOL 2131.

GEOL2201  Biogeology I (Systematic Paleontology)  5 ch (3C 2L)
Morphology, paleoecology and biostatigraphy of selected groups of marine invertebrates represented in the fossil record; comparisons with modern invertebrates in present-day oceans stressed.

GEOL2212  Sedimentology I  5 ch (3C 2L)
Sedimentary structures, principles of sedimentation, selected sedimentary environments, with emphasis on marine environments, comparison of present-day models with occurrences in the geological record.

GEOL2321  Structural Geology I  5 ch (3C 3L)
Emphasis on the description and classification of folds, cleavages, lineation’s, joints and faults. Presentation of structural data. Use of primary structures (Salt tectonics). Structure of igneous rocks. Laboratories include stereographic projection, interpretation of geological maps and preparation of geological cross sections.

GEOL2262  Earth, and the Composition of the World  5 ch (3C 3L)
This integrative, multi-disciplinary course explores the links between our physical, biological and cultural worlds. It examines how elements are grouped by similarities of properties, and how these are expressed in the minerals and rocks that we see and interact with. It then addresses the use of these properties by plant and animal life, and how these physical constituents of our world have influenced aspects of human life, such as prehistory, history, economics, industry, music, stories and myths. Lab sessions are an integral part of the course, giving students the opportunity to experience how earth materials are extracted, used and celebrated.

NOTE: This course is open to students of all faculties and is also suitable for students wishing to minor in Geology. Prérequis: Successful completion of at least 30 ch, or permission of instructor.

GEOL2703  Field School  6 ch

GEOL3102  Introduction to Geoarchaeology  5 ch (3C 3L)
Provides an overview of and practical experience with geological techniques used in archaeology, examining the influence of geology on human societies, on the preservation of archaeological sites, and on the potential for re-discovery of those sites. Lectures and laboratory will examine dating methods, alluvial sediments, coastal erosion or buildup, soils, stone tool and other raw materials, the post-depositional evolution of archaeological sites, and pale environments. Prérequis: At least one course in Geology (GEOL), or SCI 1862.
SECTION F: SAINT JOHN COURSES

GEOL3222 Biota-Substrate Relationships 3 ch (3C)
Relationships between various substrate types, mainly in subtidal marine environments, and benthic biotas they support, with examples drawn mainly from Atlantic (temperate and sub-tropical) and Mediterranean areas. Comparisons between present-day relationships and those from fossil record are made.

GEOL3442 Environmental Geology 3 ch (3C)
The role of Geology in the management of our environment. Issues examined may include natural hazards; soil, water, mineral and energy resources; contamination, global systems and change. Prerequisites: GEOL 1044 or approved equivalent.

GERMAN

GER1003 Basic German 3 ch
How Germans pronounce and order their words in questions, answers, commands and various sentence structures. Original German videos and Canadian content improve understanding and motivation.

GER1004 Improving Basic German 3 ch
Continues the study of the basic elements of German with a Canadian emphasis. Creative oral and written work on subjects chosen by the students is strongly encouraged. Extensive use of audio-visual materials. Prerequisite: GER 1003 or equivalent.

GER1063 Spoken German 3 ch
Concentrates on the development of conversational skills appropriate to student's stated needs. Extensive use of audio-visual materials. NOTE: Similar to UNBF course GER 1013 Spoken German I.

GER2003 Creative German 3 ch
Continues to develop the students' ability to read, write, speak and understand German. Emphasizes oral and written production on subjects chosen by students. Uses shorter German original texts and audio-visual materials. Taught in German and English. Prerequisites: GER 1003 and one of GER 1004, GER 1063, GER 1133 or equivalent.

GER2004 Reading German Literature in German 3 ch
Selected short stories in German, e.g., Ebner-Eschenbach, Kafka, Brecht, Böll, Dürrenmatt and students' choices. Taught mainly in German. Prerequisite: GER 2003 or equivalent.

GER2133 The Contributions of German-Speaking People 3 ch
Examines the contributions to arts, culture, literature science and ideas of selected German-speaking individuals from past and present times. Taught in English.

GER3003 Literature in German in Translation I (18th/19th Century) 3 ch
Examines selected works of the enlightenment and the storm and stress, classical, romantic and realistic periods, and their contribution to world literature. Taught in English.

GER3004 Litt. in German in Translation II (20th Century) 3 ch
Examines important Swiss, Austrian, and German authors and their contribution to world literature. This includes Hesse, Kafka, Brecht, Böll, Grass, Hochhuth, Dürrenmatt and Frisch and film versions of the works of the authors whenever possible. Taught in English.

GREEK

GRK1001 Introductory Ancient Greek I 3 ch
A beginner's course in Ancient Greek. No previous knowledge of Greek is required.

GRK1002 Introductory Ancient Greek II 3 ch
A continuation of GRK 1001.

HEALTH SCIENCES

NOTE: See beginning of Section F for abbreviations, course numbers and coding.

HSCI2001 Introduction to Health 3 ch
Introduces the concept of health and its multidimensional nature. Examines health and its determinants, including those policy decisions that shape it. Draws from the contributions of the behavioural, physical and social sciences and the economic and political processes that influence health. Introduces the Canadian Health Care system and compares it to those utilized in other developed countries. Considers interdisciplinary aspects of health.

HSCI3032 Interprofessional Communication 3 ch (3C)
Facets of knowledge, values/attitudes and skills are applied to core interprofessional education and practice competencies: role clarification and affirmation; effective communication and conflict management; participatory planning, decision making and problem solving; and, self-awareness and reflective practices. Prerequisite: BN/RN - NURS 2111; BHS students - successful completion of year 1 BSc courses or CMA certification in Radiography, Radiation Therapy, Nuclear Medicine, or Respiratory Therapy.

HSCI3061 Issues in the Canadian Health Care System 2 ch (2C)
(Cross-Listed: NURS 3061)
This course focuses on the history and organization of the Health Care System and discusses current health care issues. Pre- or Co-requisite: HSCI 3002. NOTE: Credit will be given only to one of HSCI 3061 and NURS 3061. This course is open to non-BHS students with Instructor's permission.

HSCI3092 Health Science Research (Cross-Listed: NURS 3092) 3 ch (3C)
Introduces the purpose, process and utilization of health science research. The interrelationships among theory, practice and research are explored. Students critique research studies. (For Health Science (BHS) students only.) NOTE: Credit will only be given to one of HSCI 3092 and NURS 3092. Co-requisite: STAT 2263 or approved substitute.

HISTORY & ENGLISH

HENG4000 Honours Thesis 6 ch [W]
Honours thesis for Joint Honours Programme in English and History. Prerequisites: Acceptance into the Joint Honours Programme in English and History.

HISTORY

NOTE: See beginning of Section F for abbreviations, course numbers and coding.

HIST1101 European Experience 3 ch
The course will introduce students to the history of continental Europe and the goals and methods of historical studies. A flexible set of lectures, discussion periods and assignments will explore, social, cultural, economic, and political issues illustrative of a wide range of European experiences, as well as the central role of this continent in the shaping of our contemporary world.

HIST1301 Canadian Historical Issues 3 ch
This course is designed to introduce students to the methodology and techniques of historical study. It will focus on the historical background to current issues in Canadian society, culture and politics.

HIST1401 The American Experience 3 ch
HIST 1401 is an introductory course focusing on American Social History. Through lecture, discussion and written assignments, students will examine questions about how men and women make history, as well as questions about how history is shaped by those writing it. This course will offer students an opportunity to do historical research, improve communication skills, and develop a critical scholarly approach.

HIST1601 Global History 3 ch
Examines the global history of empire and capitalism from roughly 1492 to the present.

HIST2101 Europe & the world before 1800 3 ch (3C) [W]
A survey of important historical events prior to the modern age.

HIST2102 Europe & the World after 1800 3 ch (3C) [W]
A survey of important historical events in the modern era. Completion of HIST 2101 is recommended but not required.

HIST2511 The History and Politics of Latin America (Cross-Listed with POLS 2311) 3 ch [W]
Provides an overview of Latin American history and politics from colonialization to the 20th century.

HIST2514 First Nations in North America to the War of 1812 3 ch [W]
This course will focus on the history of Indigenous Peoples in the context of early European exploration, the fur trade, missionization, and colonial policies.
HIST2515  First Nations in North America since 1800  3 ch [W]
A History of First Nations focusing on economic, political, social, and
cultural developments in the post-colonial context.

HIST3153  Britain in the Age of the World Wars  3 ch [W]
Examines the impact of the First and Second World Wars on British history,
both on the battlefield and on the home front, with an emphasis on how total
war transformed the economy, politics, religion and society.

HIST3301  Canadian History Before Confederation  3 ch (3C) [W]
A survey of Canadian history from the age of exploration through the
Colonial era to the British North America Act of 1867.

HIST3302  Canadian History Since Confederation  3 ch (3C)
A survey from 1867 of western expansion, the growth of an industrial
society, the wars of the 20th century to the re-examination of Confederation
of the late 20th century.

HIST3404  U.S. History: Colony to Nation  3 ch (3C) [W]
A general survey examining topics such as Puritan New England, native
peoples and colonists, slavery, the American Revolution, and nationalism.

HIST3405  U.S. History: Since Independence  3 ch (3C) [W]
A general survey from the Revolution to the present examining topics such as
territorial expansion, the Civil War, the Rise of corporate America,
protest and reform movements, and the US in international affairs.

HIST3555  History of the Atlantic World (A)  3 ch (3C) [W]
History of the Atlantic slave trade, plantation societies in the Caribbean
region, Atlantic trade networks, the abolition of Atlantic slavery, and
emancipation.

HIST3577  The History of the Caribbean Since 1492 (O)  3 ch (3C)
A broad social, political, and economic overview of the Caribbean since
1492.

HIST3591  Latin American Revolutions (Cross-Listed with POLS 3344)  3 ch [W]
Examines the origins and course of Latin American revolutions, especially
the Mexican and Cuban revolution.

HIST3977  Sex, Drugs, and Rock & Roll: the 1960s in Historical Perspective  3 ch (3C)
Examines the cultural, political and historical significance of the 1960s.

HIST4009  Women in European History (O)  3 ch (3C) [W]
A survey of the changing roles of women from the Middle Ages through
modern industrialization. Studies major texts defining woman’s place in
European society. Specific topics include attitudes to women, family and
work patterns, education, and emerging public roles.

HIST4011  Early Modern Queens  3 ch
Explores the roles of queen consorts, queen mothers, and queen regnants
who wielded power directly and indirectly in early modern Europe.

HIST4106  The Rise of Fascism and Nazism in Europe  3 ch (3C) [W]
1890s to 1945 (O)
Examines nationalism, imperialism, antisemitism and biological racism.

HIST4109  War and Genocide: The Holocaust  3 ch
Explores the development, implementation and impact of the Nazis “Final
Solution” of the Jewish question during World War II.

HIST4202  England Under the Tudors (O)  3 ch (3C)
Examines the events and conditions in England during the Tudor dynasty,
1485-1603, focusing on political, religious, intellectual, economic and social
issues.

HIST4203  England Under the Stuarts  3 ch
Examines the changing political, intellectual, religious and social conditions
in England from the reign of James I in 1603 to the end of the Glorious
Revolution in 1688-89.

HIST4205  Britain, 1688-1780: The Age of Oligarchy (A)  3 ch (3C) [W]
Analyzes the Glorious Revolution, the intellectual revolution of the late 17th
century, the emergence of Britain as a military power, the union with
Scotland, the Agricultural Revolution, the beginnings of the Industrial
Revolution, the Whig oligarchy and the social development and the cultural
transformation of the period.

HIST4221  Elizabeth I  3 ch [W]
This upper level course focuses on the major themes in the life of Queen
Elizabeth I, one of the most famous and mythological women in history. We
will attempt to sort through the legacy of her father, Henry VIII, and
ascertain the reasons for the fall of her mother, Anne Boleyn. We explore
her turbulent relationship with her sister, Mary, which resulted in Elizabeth’s
stay in the Tower of London as a suspected traitor. From there we will
examine some of the predominant themes in her reign: finding and
preserving a religious settlement for the Church of England, her gender as
both a “plus and a minus”, the Elizabeth court, her relationship with Mary,
Queen of Scots, her fashioning of her image and how her reputation has
been perceived subsequently.

HIST4303  Women in Canadian History (O)  3 ch (3C) [W]
Topics such as education, work and family, suffrage and women’s rights,
sexuality and social reform, as well as feminism will be studied. Primary
sources and gender theory will be examined.

HIST4311  Canada-U.S. Relations 1867-1945 (A)  3 ch (3C) [W]
Examines the major themes in Canada-United States relations from
Confederation until the end of World War II, specifically trade, diplomacy,
 military relations, and cultural issues, including how Americans and
 Canadians viewed each other’s societies.

HIST4313  Canada-United States Relations Since 1945 (A)  3 ch (3C) [W]
This course examines Canadian-American Relations from 1945 to the
Mulroney-Reagan era. It explores diplomatic, defense, economic, cultural
and environmental issues.

HIST4337  Alcohol, Drugs and Tobacco in North America  3 ch
Examines the social history of alcohol, illegal drugs and tobacco in Canada
and the United States, as well as state regulation and expert, medical and
criminal justice responses to these substances.

HIST4361  Atlantic Provinces 1497-1784 (A)  3 ch (3C)
A history of the Atlantic region of Canada from the time of earliest European
explorations to the formation of the second Empire in North America.

HIST4371  Murder in Canada: A Social and Legal History  3 ch [W]
Examines the legal and expert response to homicide, patterns of homicide
and the issue of capital punishment, from the colonial to the modern era.

HIST4377  Social History of Crime in Canada (O)  3 ch (3C)
Examines how Canadian society has perceived and reacted to crime and
criminals from early Colonial times to the mid-twentieth century.

HIST4381  The Family and the State in North America (O)  3 ch (3C)
Examines the economic and social functions of the family in the transition
from pre-industrial to industrial society. Topics include the religious
underpinnings of the family, gender relations, the role of laws and state
regulation, the impact of social policy and the emergence of a North American ‘politics of the family’.

HIST4382  The City in North America (O)  3 ch (3C)
Examines the development of the commercial, industrial, and post-
industrial city in North America.

HIST4383  Police and Society in North America (O)  3 ch (3C)
Examines the development of the “new Police” and its relationship to 19th
and 20th century North American society. Themes include the European
origins of policing, police reform, professionalization, labour relations,
relations with minorities, political policing and private security.

HIST4386  Canadian Criminal Justice System (O)  3 ch (3C)
An examination of the Canadian criminal justice system with an emphasis
on criminal law, courts, police and corrections from the Colonial era to the
mid-twentieth century.

HIST4473  Indigenous Peoples in America before 1800 (A)  3 ch (2C 1S)
This course will focus on the history of Native People in the post-contact
period. Relations based on missions, the fur trade, and colonization will
be examined.

HIST4473  Native People in United States after 1800 (A)  3 ch (2C 1S)
This course will focus on government policies pertaining to Native People,
beginning in the early National period. The history of Natives and
Newcomers in the nineteenth century will be emphasized, although
twentieth century issues will also be examined.
SECTION F: SAINT JOHN COURSES

HIST4475  The American South (A)  3 ch (2C 1S)
Beginning with the arrival of the first settlers and their relationship with aboriginal peoples, through the development of a distinctive culture and society based on slavery, HIST 4475 will focus on social, intellectual, economic and political themes in southern history.

HIST4945  Women, Science and Medicine (A)  3 ch (3C) [W]
Focuses on the relationship between gender and science. Women's participation in science and medicine will be examined, as well as the philosophical and empirical underpinnings of science and medicine. Contemporary issues will be discussed, but the focus is historical, beginning with Aristotelian science and Hippocratic medicine.

HIST4985  The Revolutionary Experience I: Anarchism & Socialism (O)  3 ch (3C)
Examines the historical context surrounding the emergence and development of radical leftist movements since 1848.

HIST4986  The Revolutionary Experience II: Student Movements from the French Revolution to the Present  3 ch
A comparative approach to student movement in Europe, the Americas, Africa, and Asia.

HIST5000  Honours Thesis  6 ch [W]
Prerequisite: Honours admission.

HIST5905  History: Theory and Practice  3 ch (3S)
Introduces historical methodology, the process of historical research, and the influences on selected major historical studies. Prerequisites: Honours admission.

HIST5906  Honours Seminar  3 ch (3C) [W]
Selected topics for Honours History students. Prerequisite: Honours admission.

HOSPITALITY AND TOURISM

Not all courses listed in this section will be offered each year. The official timetable must be consulted for courses offered each year.

NOTES:
In order to take a Hospitality and Tourism (HTM) course that has a prerequisite, students must earn a C or better in the prerequisite course(s), regardless of the program in which the student is registered.

Students who feel they have the equivalent prerequisite background through a combination of coursework and work experience, may apply to the Faculty of Business on a Permission and Request Form for permission to enter a course. These forms are available from the Faculty of Business office in Oland Hall.

Students enrolled in HTM courses who do not have the stated Prerequisites, and who have not been given the permission of the Faculty of Business to remain in the course, will be administratively withdrawn from the course AFTER the last day to add courses each term.

HTM1103  Introduction to Tourism  3 ch
This course is designed to acquaint students with the broad topic of tourism. Emphasis is placed on the socio-cultural, environmental and economic impacts of tourism. In addition, the course focuses on the interdisciplinary nature of tourism, with pertinent elements drawn from business, economics, sociology, psychology, recreation and geography.

HTM2103  International Tourism  3 ch (3C)
This course studies the special characteristics of international tourism. Topics may include: the nature, importance and measurement of international travel, the impact of host/visitor interactions, factors affecting the motivation of travelers, and the constraints on travelers. Prerequisite: HTM 1103 or permission of the Faculty of Business.

HTM2217 Management Accounting for the Hospitality Industries 3 ch (3C)
This course examines the use of accounting information for planning and control in hospitality and tourism operations. Topics to be covered include cost-volume-profit analysis, budget planning and control, ABC costing, and performance evaluation all geared to the industry. Also included will be an introduction to measuring the costs of quality and to yield management. NOTE: Credit will not be granted for both HTM 2217 and BA2217. Prerequisite: BA1216 or admission to year three of the BAMHT.

HTM2903  Work Term Report I  1 ch
Identifies an opportunity or problem in the workplace, analyzes its sources and development, addresses key issues to be considered, offers alternatives and makes recommendations, including clear provisions for implementation.

HTM3505  Resort and Recreation Management  3 ch (3C)
This course considers concepts and methods of resort planning, management and marketing, including development, land use and management for the resort environment. Case studies of real and proposed resorts from different environments will be used. Field visits to one or more resorts will be an essential part of the course. Prerequisite: HTM 1103 or permission of the Faculty of Business.

HTM3506  Festivals and Events Management (A)  3 ch
The goal of this course will be to familiarize the student with this exciting and dynamic segment of the tourism and recreation industry. It will examine specific aspects of contemporary sport, community and cultural events; and the meeting, incentive, convention (MICe) industry. Topics to be studied include the main functions of Events Managers in the areas of development, planning, programming, marketing and promotions, facility management, human resources and finance. Students will be presented with case studies and applied projects. Prerequisite: HTM 1103 or permission of the Faculty of Business.

HTM3555  Adventure And Leisure Tourism  3 ch (3C)
This course will explore issues related to entrepreneurial small business development in the growing adventure and leisure sector of the Tourism Industry. Participants will have the opportunity to research emerging trends and issues related to the feasibility of creating service products to serve this market. Small business models which allow for the creation of stable enterprises in an often seasonal market will be examined. Prerequisite: HTM 1103 or permission of the Faculty of Business.

HTM3903  Work Term Report II  1 ch
Identifies an opportunity or problem in the workplace, analyzes its sources and development, addresses key issues to be considered, offers alternatives and makes recommendations, including clear provisions for implementation.

HTM4101  Competitive Strategy  3 ch (3C)
This is an integrative course dealing with the many interdepartmental and interdisciplinary problems confronting the management team in addressing organizations with opportunities and problems. Extensive use will be made of case studies and on-site assignments or projects. Emphasis will be placed on productivity and the delivery of a quality product within a competitive environment. NOTE: credit will not be granted for both HTM 4101 and BA 4101. Prerequisite: Credit in all courses required for the BAMHT except HTM 4161.

HTM4111  Travel Writing and Photography  3 ch (3C)
Provides an introduction to the travel writing industry. Topics include the responsibilities and ethics of the travel writing profession and an examination of how visual imagery relates to tourism marketing, motivation, service quality and visitor satisfaction. Prerequisite: HTM 1103 or permission of the Faculty of Business.

HTM4161  Planning & Development of Sustainable Tourism  3 ch (3C)
This course examines the nature and scope of tourism planning and development from the perspective of markets, attractions, services, transportation suppliers, natural resources and government policy makers. Emphasis will be placed on community and regional tourism planning, with attention paid to economic, physical, environmental and social considerations of planning for tourism entities and destinations. Prerequisite: Open to fourth year students who have successfully completed BA 3129, or permission of the Faculty.

HTM4503  Independent Study - Hospitality and Tourism  3 ch
This course will provide the student with a deepening knowledge in the Hospitality and Tourism area. Under the supervision of a Faculty member, the student will explore topics not available in the regular course offerings. The course may consist of written assignments, oral examinations and written examinations. Students must identify a faculty member who is willing to supervise the course and apply to the Director, Undergraduate Studies for approval at least 30 days prior to the term in which they wish to undertake the work. Applications are normally approved for students who are in their senior year and who have obtained a grade point average of at least 3.0 in the work of the second and third years.

HTM4516  Natural Area Tourism  3 ch
This course will examine in detail the management of tourism in natural areas. Topics will include an introduction to ecology, and how ecological and related sustainable management principles are used to manage visitors to natural parks and equivalent reserves. Students interested in outdoor recreation, adventure tourism, park and heritage management and
related topics would find this course an advantage. Prerequisites: Students should have successfully completed HTM 1103 or permission of the Faculty. This is a Web-based course and a good understanding of MS Word and Excel as well as the Internet would be an advantage.

HTM4531 Historical Perspectives in Tourism 3 ch (3C)
An overview of the history of tourism in Canada with particular emphasis on the Province of New Brunswick. The course is designed to trace the evolution and role of tourism in Canada from the late nineteenth century to the present. The course will include explorations of selected leisure/tourism sites in the Saint John area. Prerequisite: HTM1103 or permission of the Faculty of Business.

HTM4545 Special Topics in Hospitality Management/ Tourism and Travel 3 ch (3C)
This course surveys various issues and events that influence the hospitality and tourism industries. Topics will vary from year to year reflecting contemporary issues and events.

HTM4555 Sacred Sites Tourism (A) 3 ch
This course examines the characteristics and management of one of the largest tourism sectors, spiritual tourism, pilgrimages and sacred sites. Topics include the power of myth and belief in the identification of natural sacred spaces, and the creation of man-made religious and secular sacred spaces worldwide. The importance and measurement of international travel related to religious holidays, pilgrimages, and historic/heritage travel to places with significance to various cultural and religious groups will be discussed. The impact of host/visitor interactions and factors affecting motivation of travelers as well as constraints on travelers will be studied. The course will also include on-site visits to local sacred sites. Prerequisite: HTM 1103 or permission of the Faculty of Business.

HTM4565 Heritage Tourism 3 ch (3C)
This course explores the nature of heritage tourism. It surveys the issues that influence the development of heritage tourism. Perspectives on heritage provisions for tourism will be examined in the context of social, cultural, tourism policies at the provincial, national, and international levels. Prerequisite: HTM 1103 or permission of the Faculty of Business.

HTM4903 Work term Report III 1 ch
Identifies an opportunity or problem in the workplace, analyzes its sources and development, addresses key issues to be considered, offers alternatives and makes recommendations, including clear provisions for implementation.

HUMANITIES
NOTE: See beginning of Section F for abbreviations, course numbers and coding.

HUM1021 Effective Writing I 3 ch (3C) [W]
Examines various aspects of effective writing in English including vocabulary, sentence structure, organization of material, and essays of a descriptive, comparative, expository, critical and argumentative nature. Includes numerous written exercises. NOTE: Students may not receive credit for both HUM 1021 and HUM 2121.

HUM1401 Introduction to Music 3 ch [W]
An introduction to the development of music from the origins of musical performance and compositions to the relationships of music with present computer technology, and to the appreciation of music.

HUM1905 Introduction to Art 3ch (3C/S)
An introduction to visual art based on thematic, historical or regional approaches. NOTE: Students who have taken HUM 1903 or HUM 1904 will not be given credit for this course.

HUM2003 Theory and Practice of Technical and Professional Communication I (O) 3 ch (3C)
A broad-based introduction to theories of workplace communication. Introduces the practice of workplace and other professional communication including technical writing, editing, proof-reading, document design, on-line publishing. Prerequisite: HUM 1021.

HUM2021 Effective Writing II (A) 3 ch (3C) [W]
This course develops academic skills in writing and research, and focuses on how critical analysis is used across the disciplines. Students will be introduced to methods of appraising and critiquing academic materials, developing skills in supporting a scholarly argument, and understanding ethical issues in research and writing. Prerequisite: HUM 1021. NOTE: Students may not receive credit for both HUM 2021 and HUM 3121.

SECTION F: SAINT JOHN COURSES

HUM2501 Music in the Romantic Era 3 ch
A survey of musical development in nineteenth century Europe focusing on the major composers of the era such as Beethoven, Chopin, Brahms, Tchaikovsky and Wagner. Prerequisite: None.

HUM3003 Theory and Practice of Technical and Professional Communication II (O) 3 ch (3C)
Develops students’ understanding of current theory and research in workplace communication, and gives them the opportunity to pursue workplace and other professional communication (including technical writing, editing, proof-reading, document design, on-line publishing) in more depth. Prerequisite: HUM 2003.

HUM3205 Baroque and Rococo Art 3 ch [W]
A study of the history of Art and Architecture in Europe during the 17th and 18th centuries. Prerequisites: HUM 1903, HUM 1904.

HUM3208 Renaissance Art 3 ch [W]
Examines developments in painting, sculpture and architecture during the fifteenth and sixteenth centuries in Italy and in the rest of Europe. Prerequisites: HUM 1903, HUM 1904.

HUM3924 History of Modern Art 3 ch (3C) [W]
A study of major movements in the art of the 19th and early 20th centuries from Neo-classicism to Surrealism.

HUM3953 American Painting 3 ch (3C) [W]
A history of painting in the United States from the time of the Revolution to the 1960’s, including Abstract Expressionism and Pop Art.

HUM3964 Canadian Painting 3 ch (3C) [W]
A history of Canadian Painting, emphasizing developments in the twentieth century.

HUM3966 Art of Photography (O) 3 ch (3C)
The course explores how photography developed in various historical, economic, political, and cultural settings worldwide and discusses the many uses to which photography has been put from art to vernacular, documentary to photojournalism, and science to advertising. It examines today’s use of digital photography and how digital process and its capacity for manipulation has changed current notions of what photography is as well as what photography represents.

INFORMATION SYSTEMS

INFO1103 Data and Information Management 4 ch (3C 2L)
Topics include: History and motivation of information systems; database system components; relational data model; relational algebra; SQL language; data integrity, security and privacy; data modeling and logical database design; indexing and physical database design; rapid application development; user interface design; data validation and exception handling; accessing a database using an API (such as ADO.NET and JDBS); stored procedures and triggers; introduction to web development, three layered architecture, and XML. NOTE: Credit is only given for one of CS 2513, CS 3513, and INFO 1103. Prerequisite: CS 1073.

INTERNATIONAL STUDIES

IS1001 Introduction to International Studies 3 ch
An interdisciplinary introduction to the regional approach to International Studies. The course examines the political, social and economic aspects of developing and developed regions.

IS1002 Global Issues 3 ch (3C)
An interdisciplinary examination of issues and problems relating to the environment, human rights, gender and inequality, migration, and poverty in a global perspective.

IS4501 Research Project In International Studies 3 ch
A seminar requirement of the International Studies Program to enable students to do research. Prerequisites: IS 1001, IS 1002 and 9 ch in IS courses, or permission of the instructor.

INFORMATION TECHNOLOGY

IT1703 Introduction to Computing Concepts 3 ch (3C)
An introduction to the essential concepts of computers, computing systems and computer-based information systems. Topics also include microcomputer operating systems and current office software. This course may not be taken for credit by BBA, CS, BiSc, Engineering, and Science
SECTION F: SAINT JOHN COURSES

(except BSc in Economics) students. Credit will not be given for both IT 1803 and IT 1703.

**IT1713 Multimedia and the Information Technology** 3 ch (3C)
Introduction to multimedia concepts and technical underpinning of digital multimedia (including vector vs bitmap graphics, color, and animation). The current practices in web page design and construction using HTML (including advanced concepts such as CSS, image maps, etc.). Various software packages are included including PowerPoint for creating slide shows. **NOTE:** This course may not be taken for credit by Computer Science and Information Science students.

**IT1803 Introduction to Computers and Systems** 3 ch (3C)
An introduction to the essential features of computers, computing systems and computer-based information systems. Includes: microcomputer operating systems, word processing and spreadsheets. This course is intended for students in Business, Education and Physical Education and cannot be taken for credit by CS, BSc, Engineering, or Science (except BSc in Economics) students. **NOTE:** credit will be given for only one of IT 1803, IT 1813, or IT 1703.

**IT1813 Introduction to Data Management** 3 ch (3C)
This course covers the storage, manipulation, and presentation of data. Examples are drawn from various domains, such as sales, business-related, and scientific data. Two software packages are presented for such propose: MS Excel (concepts including formula, data consolidation, and graphical representation) and MS Access (concepts including table design for data storage, queries in both QBE and SQL format, forms, and report generation). Emphasis is placed on the strengths of each tool, and how to benefit from both by importing data from one tool into the other. Macro programming is introduced, so as to create simple applications within these tools. **NOTE:** This course may not be taken for credit by Computer Science and Information Sciences students. Credit will not be given for both IT 1803 and IT 1813.

**IT2773 Java Programming for the Internet** 3 ch (3C)
The course will cover algorithm design and programming techniques using current software for web programming. Students are expected to have basic web page development skills. **Prerequisite:** IT 1713 or permission of instructor. **NOTE:** This course cannot be taken for credit by CS students. Also, credit will be granted for only one of the following courses: CS 1073, CS 1616, or IT 2773.

**LATIN**

**LAT1001 Introductory Latin I** 3 ch
A beginner's course in Latin. No previous knowledge of Latin is required.

**LAT1002 Introductory Latin II** 3 ch
A continuation of LAT 1001.

**LAT2001 Intermediate Latin I** 3 ch
Emphasis on developing fluency in reading Latin. By the end of the term students will be reading unaltered Latin texts.

**LAT2002 Intermediate Latin II** 3 ch
Reading of selections from Caesar, Cicero, and Ovid.

**LINGUISTICS**

For Linguistics taught in French, see FR 3412, FR 3432, FR 3434, FR 3442, FR 3464 under the French section.

**LING1102 English Syntax (O)** 3 ch (3C)
An introduction to traditional concepts in English syntax. Covers two areas: grammatical categories (noun, verb, adjective, adverb, etc.) and sentence structure (subjects, predicates, complements; main vs subordinate clauses). The course is a theoretical presentation of grammatical concepts.

**LING2101 Linguistics I** 3 ch
Basic concepts of phonetics, phonology, morphology, language change and language variation.

**LING2202 Linguistics II** 3 ch
Basic concepts of syntax, semantics, language acquisition and computer applications of language.

**LING3111 Language Acquisition** 3 ch (3C)
Theories of first and/or second language acquisition with focus on the stages of language acquisition and parametric setting.

**LING3113 Phonetics and Phonology** 3 ch (3C)
Articulatory phonetics and phonology with comparative application to English, French, and other languages. This course is the equivalent to LING 3411 (Phonetics & Phonemics) at UNB Fredericton.

**LING3114 Syntax** 3 ch (3C)
The generative grammar approach to sentence structure. Comparative applications to English, French, and other languages.

**LING3212 The History of the English Language** 3 ch (3C)
The methodology of historical linguistics and an overview of Indo-European languages form the background for the discussion of changes in English, changes in consonant and vowel systems, transition to a non-case system, setting of parameters in syntax.

**LING3223 Semantics** 3 ch (3C)
Meaning through language: word and sentence meaning, context, inference, speech acts. Comparative applications to English and French.

**LING3224 Cognition and Language** 3 ch (3C)
Language as a cognitive system; focus on the work of Steven Pinker.

**MATHEMATICS**

**MATH1001 Calculus for Life Sciences** 3 ch (4C)
Functions, limits, continuity, the concept of derivative, basic rules of differentiation. Derivatives of polynomials, exponential, logarithmic and trigonometric functions. Extreme values and related rates. Introduction to integration, area, volume, average value. Applications to life sciences will be stressed throughout the course. This course is restricted to students in Health Sciences, Nursing, and Biological Sciences. **NOTES:** (1) Credit will be given for only one of MATH 1001, MATH 1003, MATH 1823 or MATH 2853 (2) A minimum grade of B is required in MATH 1001 to take MATH 1013. **Prerequisites:** A minimum grade of 60% in New Brunswick high school courses: Pre-calc 12A and Pre-calc 12B, or equivalent. Students must also pass a Placement Test which is administered by the Department of Mathematics and Statistics. See "NOTE 18 to Admission Chart" in Section B of this Calendar for further details.

**MATH1003 Introduction to Calculus I** 3 ch (4C)
Functions and graphs, limits, derivatives of polynomial, log, exponential and trigonometric functions. Curve sketching and extrema of functions. **Prerequisites:** A grade of at least 60% in New Brunswick high school courses: Pre-calc 12A or Pre-calc 12B, or equivalent. Students must also pass a Placement Test which is administered by the Department of Mathematics and Statistics. See "NOTE 12 to Admissions Chart" in Section B of this Calendar for further details. **NOTE:** Credit will be given for only one of MATH 1001, MATH 1003, MATH 1823 or MATH 2853.

**MATH1013 Introduction to Calculus II** 3 ch (4C)
Definition of the integral, fundamental theorem of calculus, techniques of integration, improper integrals. Ordinary differential equations, Taylor polynomials and series. **Prerequisite:** A grade of C or higher in MATH 1003 or a grade of B or higher in MATH 1001.

**MATH1503 Introduction to Linear Algebra** 3 ch (3C)
Lines and Planes, The Geometry and Algebra of vectors, Systems of linear equations, Matrix algebra, Linear independence, Linear transformations, Determinants, Complex numbers, Eigenvalues, Eigenvectors, Diagonalization, Rotation matrices. **NOTE:** Credit will not be given for both MATH 1503 and MATH 2213. **Prerequisites:** A minimum grade of 60% in New Brunswick high school courses: Pre-calc 12A and Pre-calc 12B, or equivalent.

**MATH1853 Mathematics for Business I** 3 ch (3C)
A brief review of pre-calculus math, logarithmic and exponential functions, limits, introduction to derivatives. Linear systems, matrices, systems of linear inequalities, difference equations, arithmetic and geometric sequences, annuities and installment buying. Applications to Business and Economics will be emphasized throughout the course. **NOTE:** Credit will not be given for both MATH 1833 and MATH 1853. It carries no credit for certain programs. Please consult with a faculty advisor. **Prerequisites:** A minimum grade of 60% in New Brunswick high school courses: Pre-Calc 12A and Pre-calc 12B, or MATH1863 or equivalent.

**MATH1863 Precalculus Mathematics** 3 ch (4C)
A review of high school mathematics topics, particularly those covered in the New Brunswick high school curriculum. Topics include: elementary set theory, manipulation of algebraic expressions, equation and inequalities, analytic geometry, linear and quadratic functions, polynomial and rational function, exponential and logarithm functions, trigonometric functions,
inverse trigonometric functions, analytic trigonometry. **NOTE:** This course is designed to serve as preparation for MATH 1001, MATH 1003, and MATH 1853. It carries no credit for certain programs. Please consult with a faculty advisor. MATH 1863 and MATH 0863 are not the same course.

**MATH2003 Intermediate Mathematics I (O)**
3 ch (3C 1T)
Analytic geometry and vectors. Parametric curves. Polar, cylindrical and spherical coordinates. Functions of several variables, partial derivatives, applications to max-min. Double and triple integrals. **NOTE:** Credit will be given for courses in only one of the sequences MATH 2003/MATH 2013 or MATH 2252/MATH 2513. Prerequisite: MATH1013.

**MATH2013 Intermediate Mathematics II**
3 ch (3C 1T)

**MATH2203 Discrete Mathematics (A)**
3 ch (3C)
Logic, methods of proof, mathematical induction, elementary set theory, functions and relations. This course is designed for students desiring a good grounding in the foundations of mathematics. Theorems and proofs are an important part of the course. **NOTE:** Credit will not be given for both MATH 2203 and CS 1303. It is recommended that students majoring in Mathematics or Statistics choose MATH 2203. Co-requisites: MATH 1013 and MATH 1503.

**MATH2213 Linear Algebra I**
3 ch (3C)
This course introduces the basic concepts of linear algebra, mainly in finite dimensional real vector spaces. Systems of linear equations, vector and matrix algebra, bases and dimensions of subspaces, row and column spaces, linear transformations and matrix representations, inner products, determinants, eigenvectors and diagonalization. Applications as time permits. Credit will not be given for both MATH 2213 and MATH 1503. Prerequisite: MATH 1013 or equivalent.

**MATH2513 Multivariable Calculus for Engineers**
4 ch (4C)
Functions of several variables, partial derivatives, multiple integrals, vector functions, Green’s and Stoke’s Theorems. See the note following MATH 2003. Prerequisites: A grade of C or higher in MATH 1013; and MATH 1503 or MATH 2213.

**MATH2523 Differential Equations and Series (A)**
3 ch (4C)
First order differential equations, higher order linear differential equations, infinite series, power series, series solution of differential equations about ordinary points and singular points, Gamma and Beta functions. Bessel function and Legendre polynomials. **Prerequisite:** A grade of C or higher in MATH 1013.

**MATH2633 Fundamental Principles of Elementary (A)**
3 ch (3C)
School Mathematics
This course is primarily intended for individuals interested in elementary and middle school teaching, and is open to students registered in concurrent B.Ed. program. The focus is on the mathematical content of K-8 Atlantic Canada Mathematics Curriculum, and extensions beyond the classroom to show the how and why behind school mathematics. Topics include problem solving, number concepts, number and relationship operations, patterns and relations, shape and space, as well as data management and probability. This course may be taken by others with the approval of the student’s department Chair or Dean. With the exception of Certificate of Math Education, this course is not available for credit to students who would have 6ch of Level 1000 mathematics in their degree programs. **Prerequisites:** Successful completion of at least one year of a university program. **Prerequisites:** Successful completion of at least one year of a university program.

**MATH2853 Mathematics for Business II**
3 ch (3C)
Derivatives, marginal analysis, optimization problems with applications in business, anti-derivative, definite integrals and applications, techniques of integration, simple differential equations, functions of several variables, partial derivatives, unconstrained and constrained optimization, Lagrange multipliers. Applications to Business and Economics will be emphasized throughout the course. **NOTE:** Credit will be given for only one of MATH 1001, MATH 1003, MATH 1823 or MATH 2853. Prerequisite: MATH 1853.

**MATH3901 Financial Mathematics I**
3 ch (3C)
Simple, compound, continuously compound interest, future value, series of payments, sinking funds, amortization, installments. Major asset type. Valuation of fixed interest securities, effects of tax, ordinary shares, bonds. Deterministic models for term structure dynamics. **Prerequisite:** MATH 1003 or MATH 1853.

**MATH3903 Financial Mathematics II**
3 ch (3C)
Options and option pricing, Black-scholes formula, derivatives, forwards, futures, swaps, asset pricing, returns and payoffs, foreign currencies, put-call parity, hedging, arbitrage, risk and immunization. **Prerequisite:** MATH 2903.

**MATH3073 Partial Differential Equations (A)**
3 ch (3C)
Methods of solution for first order equations. Classification of second order equations. Characteristics. Analytic and numerical methods of solution for hyperbolic, elliptic and parabolic equations. **Prerequisite:** MATH 2013; or both MATH 2513 and MATH 3503, or equivalent.

**MATH3093 Elementary Number Theory (A)**
3 ch (3C)
Primes, unique factorization, congruences, Diophantine equations, basic number theoretic functions. As well as serving mathematics majors, this course will be of particular benefit to prospective mathematics teachers. **Prerequisite:** At least 6 credit hours in Math excluding MATH 1863.

**MATH3213 Linear Algebra II (A)**
3 ch (3C)
Vector spaces and subspaces, independent and spanning sets, dimension, linear operators, determinants, inner product spaces, canonical forms. **Prerequisite:** MATH 1503 or MATH 2213, or consent or instructor.

**MATH3243 Complex Analysis (A)**
3 ch (3C)
Complex analytic functions, contour integrals and Cauchy’s Theorem; Taylor’s, Laurent’s series and Liouville’s Theorem; residue calculus. **Prerequisites:** MATH 2003 and MATH 2513 or MATH 2523; or equivalent.

**MATH3303 Operations Research I**
3 ch (3C)
Linear programming models, simplex method, duality theory, post-optimality analysis, network simplex method and special cases, introduction to interior point methods. Credit will not be granted for both MATH 3303 and BA 3623. **Prerequisite:** MATH 2213.

**MATH3343 Networks and Graphs (A)**
3 ch (3C)
Graphs, Euler paths, tournaments, factors, spanning trees, applications; graph colourings, planar graphs; Menger’s theorem, flows in networks, flow algorithms. **Prerequisites:** (MATH 2213 or MATH1503) and (MATH 2003 or CS 1303).

**MATH3503 Differential Equations for Engineers**
3 ch (4C)
Nonhomogeneous differential equations, undetermined coefficients, variation of parameters, systems of 1st and 2nd order ordinary differential equations, Laplace transforms, Fourier series. **Prerequisite:** MATH 1503 or MATH 2213. Co-requisite: MATH 2513 or MATH 2003.

**MATH3633 Fundamental Principles of School Mathematics (A)**
3 ch (3C)
This course is primarily intended for individuals interested in school teaching. The focus is on the mathematical content of the K-12 Atlantic Canada Mathematics Curriculum with extensions beyond the classroom, to show the how and why behind school mathematics. Topics include mathematical language; real numbers and other mathematical structure; Euclidean geometry; functions; mathematical connections; problem solving. Intended for students registered in concurrent BEd programs, but may be taken for credit by others with the approval of the department Chair or Dean. **Prerequisites:** A minimum grade of 60% in New Brunswick high school courses Pre-calc 12A and Pre-calc 12B or equivalent, and successful completion of at least one year of a university program; or MATH 2535.

**MATH3713 Analysis I (A)**
3 ch (3C)
A rigorous introduction to analysis on the real numbers. Sequences, limits, sets, functions, axioms for the real numbers, completeness, continuous and differentiable functions, the Mean Value Theorem. **Prerequisites:** MATH 1013 and (MATH 2203 or CS 1303.)

**MATH3733 Abstract Algebra (A)**
3 ch (3C)
An introduction to the elementary theory of groups, Rings and Fields. Applications to number theory. **Prerequisites:** MATH 2203 and either MATH 1503 or MATH 2213.

**MATH3753 Applications of Mathematical Models (O)**
3 ch (3C)
Provides an overview of mathematical modeling strategies for particular applications. Introduces students in a variety of disciplines to mathematical modeling based problem solving. General concepts such as stochastic vs. deterministic modeling are discussed and case studies of specific applications are presented. Case studies may include models of survival, models of cognition, models of population growth and financial models. Students develop case studies in the areas of their major or their own expertise. **Prerequisites:** One of STAT 3093, PSYC 3913, MATH 2013, MATH 2513, MATH 2523; or permission of the instructor.
MECHANICAL ENGINEERING
A grade of C or higher is required in all Mechanical Engineering courses.

ME1312 Computer Aided Design
Introduces the technology of 3D parametric geometric modeling to design and model mechanical engineering parts, assemblies and devices. Geometric variables and their interrelationships will be covered by projects involving the design of mechanical components, assemblies and machines to meet functional requirements. Manufacturing requirements including Geometric Dimensioning and Tolerancing. The use of the model for analysis, optimization and simulation will be stressed. Presentation of the model through engineering drawings and pictorial renderings. Animation of mechanisms. A comprehensive commercial CAD program will be used. Prerequisite: ENGG1003. Co-requisite: MATH 1503.

ME2111 Mechanics of Materials I
Basic concepts, uniaxial stress and strain, Hook’s law, torsion, pure bending, bending design, shear flow, transverse loads, stress and strain transformation, Mohr’s circle, strain measurement. Prerequisite: APSC 1023.

ME2122 Mechanics of Materials II
Fatigue, yield criteria, thin-wall pressure vessels, strength and deflection of beams, buckling of columns, instability, indeterminate beams, energy methods, Castigliano’s theorem. Prerequisite: ME 2111 or ME 2121 or CE 2023.

ME2125 Mechanics of Materials Design Project
Analysis of the strength of a mechanical device. Shapes and materials will be modified to meet deflection and stress limits. Written reports will document choices made and assessment of design. Group oral reports. Prerequisites: ME 2111 or ME 2121 or CE 2023. Co-requisite: ME 2122.

ME2143 Kinematics and Dynamics of Machines
Fundamental concepts of linkages, displacement, velocity and acceleration analysis using graphical and analytical methods. Static and dynamic force analysis of linkages. Introduction to cams. Gears: involute nomenclature; bevel, helical and worm gears; ordinary and planetary gear trains. Balancing rotating masses. Simple gyroscopic effects. Prerequisite: APSC 1023. Recommended: CS 1003 or other introductory programming course.

ME2145 Kinematics and Dynamics Design Projects
Student groups to design and build working model of planar linkage mechanism, based on a mechanical application. Cooperation and project management skills. Written reports to document choices made; evaluation of working model performance; and position, velocity, acceleration and force analyses. Group oral reports. Prerequisite: APSC 1023 or ME 2003. Co-requisite ME 2143.

ME2352 Design Optimization
Optimization of any design is essential either to remain competitive or to improve product efficiency and quality. Several optimization methods are presented through a variety of mechanical design and industrial engineering problems. Topics include: single and multi-variable unconstrained optimization, linear programming, transportation, assignment and network problems. Other topics such as constrained and global optimization are introduced. Prerequisites: CS 1003, MATH 1003, MATH 1503. Recommended Co-requisite: ME2143.

ME2413 Thermodynamics

ME2415 Thermodynamics I Laboratory
Laboratory experiments and measurements related to Thermodynamics I. Laboratory reports and readings are assigned. Co-requisite: ME 2413.

ME3232 Engineering Economics
Application of engineering economic analysis to mechanical and industrial engineering systems. Major emphasis will be given to decision-making based on the comparison of worth of alternative courses of action with respect to their costs. Topics include: discounted cash flow mechanics, economic analyses, management of money, economic decisions. Restricted to students with at least 60 ch in their program.

ME3513 Fluid Mechanics
The principles of fluid mechanics are introduced and methods are presented for the analysis of fluid motion in practical engineering problems. Specific topics include: fluid statics; integral balances of mass, momentum, angular momentum and energy; boundary layer theory and introduction to the Navier-Stokes equations; dimensional analysis, and liquid flow in piping networks with pumps and turbines. Pressure and flow measurement and experimental uncertainty. Prerequisite: APSC 1023. Co-requisite: MATH 2513.

NURSING
NUR51011 Nursing as a Profession
Introduction to the foundations, heritage and practices of nursing as a profession. Examines UNB nursing curriculum and philosophy.

NUR51020 Interprofessional Health Mentor Experience
Introduction to interprofessional education and practice delivered through an innovative learning opportunity through partnerships with Dalhousie Medicine and NBCC. Students will have opportunities to develop interprofessional communication skills and understandings of interprofessional patient/client-centered care through learning about chronic conditions and/or disabilities and their management from the perspective of persons living with conditions/disabilities. Co-requisites: NURS 1011, NURS 1032 For BN students only.

NUR51032 Professional Relationships
Introduction to the theoretical foundation of professional relationships in nursing with a focus on self awareness, communication and caring. Pre-or Co-requisite: NURS 1011.

NUR51041 Health Assessment
Addresses physical, psycho-social and cultural assessment throughout the lifespan with an emphasis on adults. The nurse’s role in health promotion is explored. Includes a lab component. Pre-requisites: NURS 1011 and NURS 1032, co-requisite NURS 1235, NURS 1225 and BIOL 1442.

NUR51225 Nursing and Wellness
Explores the concepts of wellness, health and illness within the framework of primary health care. Prerequisites: NURS 1011, NURS 1032. Co-requisite: NURS 1235.

NUR51235 Clinical Practice: Nursing and Wellness
Supplements NURS 1225. Designed to provide students with the opportunity to apply theory and acquire skills in clinical environments. Prerequisites: NURS 1032, NURS 1101. Co-requisite: NURS 1225.

NURS 1323 Indigenous Perspectives on Health and Wellness
The focus of this course is to build an understanding of Indigenous health, community wellness and cultural safety to promote equitable health care practice and policy. In this course, students will examine Indigenous models of health and healing, storytelling, and tools for aliyshay.

NURS2011 Concepts for Professional Nursing Practice
Includes core concepts (health, client, environment, nursing), nursing standards, professional issues (ethics, legal, collaboration) and primary
health care with particular emphasis on health promotion and disease prevention. For BN/RN and LPN Bridge students only.

NURS 2052 Clinical Decision Making 3 ch (2C 3L)
A hybrid course that combines concepts essential for a comprehensive health assessment, safe delivery of medications in a complex care environment, and lab experiences in physiology. Using a primary health care framework, the course will enhance clinical judgement, interpretation of clinical findings, and appropriate nursing actions that result from both. This course is intended for LPN Bridge students only.

NURS 2063 Concentrated Clinical Practice I 4ch (12L)
An integrative practice experience with young families and/or individual client and their families living with chronic health challenges. Prerequisites: All year 2 nursing courses and BIOL 2831 and BIOL 2852.

NURS 2132 Pharmacology 3 ch (3C)
Includes theory and principles of pharmacology relevant to nursing. Provides knowledge to administer medications, provide client education and assess potential for adverse events related to medication and lifestyle issues. Theory will include basic legal and safety issues related to drug administration by the nurse. Prerequisites: All required nursing and non-nursing courses in the fall term of Year 2. Co-requisite: BIOL 2852

NURS 2135 Chronic Health Challenges 3 ch (3C)

NURS 2145 Mental Health Challenges 3 ch (3C)
Explores the experiences of persons living with mental illnesses and examines related nursing therapeutics. Prerequisites: NURS 2041, NURS 2135, NURS 2157, BIOL 2831. Co-requisite: NURS 2189.

NURS 2157 Clinical Practicum I 4 ch (12L)
In various clinical settings, students will be provided opportunities to assess, plan, implement and evaluate care while supporting individual clients and their families living with chronic health challenges. Pre and Co-requisites: NURS 2135, NURS 2041, BIOL 2831.

NURS 2177 Young Families’ Health 3 ch (3C)
Focuses on promoting the health of childbearing and child-rearing families. Encompasses the childbearing experience. Prerequisites: NURS 2041, NURS 2135 and NURS 2157. Co-requisite: NURS 2189.

NURS 2189 Clinical Practicum II 5 ch
Provides students with the opportunity to apply theory and acquire skills in practice environments. Pre-requisites: NURS 2157, NURS 2177 and NURS 2135. Corequisites: NURS 2145.

NURS 3033 Communications in Health Care (Cross Listed: HSCI 3032) 3 ch (2C 1T)
Explores more advanced communication skills in helping relationships with patients/clients and focuses on the continuing development of skills related to effective collaboration with members of intra- and inter-professional healthcare teams. Pre-requisite: Successful completion of Year 2 of the BN Program or LPN Bridge.

NURS 3061 Issues in the Canadian Health Care System 2 ch (2C)
This course focuses on the history and organization of the Health Care System and discusses current health care issues. Cross listed with HSCI 3061. Prerequisites: NURS 2063 for BN students, all required LPN Bridge Courses for BN/LPN students and NURS 2011 for BN/RN students. Co-requisite: NURS 3092.

NURS 3064 Community Development I 4 ch (4C)
Focuses on community assessment and program planning in institutional and non-institutional settings. Students assess primary health care needs of a community, and are involved with planning, implementing, and evaluating health care programs for target groups. Prerequisites: NURS 2063 for BN students, all required LPN Bridge courses for BN/LPN students and NURS 2011 for BN/RN students. Co-requisite: NURS 3092.

NURS 3067 Community Development Practicum 5 ch
To apply concepts of community health nursing in challenging situations with client populations. Prerequisites: NURS 2063 for BN students. All required LPN Bridge courses for BN/LPN students. Co-requisite: NURS 3064, NURS 3092.
PHIL2003  
Introduction to Moral, Social and Political Philosophy  
3 ch (3C) [W]

An historical investigation into such moral and socio-political concepts as goodness, virtue, happiness, justice, choice, duty, custom, natural and civil law, the state, freedom and the individual.

PHIL2034  
Religion and Ethics  
3 ch (3C) [W]

An examination of such notions as good and evil, compassion and social justice, divine and natural authority, community and society, from the perspectives of religious affiliation and moral reasoning.

PHIL2111  
Symbolic Logic I  
3 ch (3C)

A study of the principles of symbolic logic and the standard notations and methods used in determining the validity and invalidity of arguments.

PHIL3014  
Metaphysics and Epistemology  
3 ch (3C) [W]

A study of issues in the branches of philosophy concerning reality and knowledge: metaphysics (the overall framework of reality) and epistemology (the theory of knowledge). Prerequisite: One term-course in Philosophy or permission of the instructor.

PHIL3033  
Pre-Socratics and Plato  
3 ch (3C) [W]

An examination of early forms of Greek thought from the pre-Socratics and Plato. The Platonic tradition will also be surveyed and assessed. Prerequisites: PHIL 1001 or permission of the instructor.

PHIL3034  
Aristotle and Hellenistic Philosophies  
3 ch (3C) [W]

A study of Aristotelian thought and of the diverse philosophies of the Hellenistic period. Prerequisite: PHIL 1001 or permission of the instructor.

PHIL3083  
Philosophy of Language  
3 ch (3C)

A study of some of the basic concepts of argument and reasoning, such as truth, falsity, analyticity, validity, agreement, stating and questioning. Prerequisite: One term-course in Philosophy or permission of the instructor.

PHIL3075  
Philosophy of Art  
3 ch (3C) [W]

This course examines the principles and concepts of art, as developed by philosophers and artists themselves, from ancient aesthetic theory, through essays on taste, to more recent views of aesthetic perception and the function of art in society. Prerequisite: One term-course in Philosophy or permission of the instructor.

PHIL3085  
Philosophy & Film (O)  
3 ch (3CO)

An exploration of the philosophical themes and issues in selected films. Prerequisites: One term-course in Philosophy or permission of the instructor.

PHIL3115  
Contemporary Continental Philosophy (O)  
3 ch (3C)

An in-depth study of the origins of and subsequent developments in Contemporary Continental Philosophy: the European philosophical tradition in western philosophy. Prerequisite: PHIL 1002 or permission of the instructor.

PHIL3116  
Contemporary Analytic Philosophy (O)  
3 ch (3C)

An in-depth study of the origins of and subsequent developments in Contemporary Analytic Philosophy: the Anglo-American philosophical tradition in western philosophy. Prerequisite: PHIL 1002 or permission of the instructor.

PHIL3117  
Contemporary Political Philosophy (O)  
3 ch (3C)

An exploration of the most influential approaches to contemporary political philosophy and the central issues that are addressed therein. Topics include: liberalism and communitarianism; justice, rights and freedoms; equality: private and public virtues; social responsibilities; citizenship and nationhood; and economic and environmental sustainability. Prerequisites: One term-course in Philosophy or Politics or permission of the instructor.

PHIL3124  
Contemporary Moral Problems  
3 ch (3C) [W]

A wide-ranging look at a variety of claims and issues perplexing moral agents in contemporary society. Prerequisite: One term-course in Philosophy or permission of the instructor.

PHIL3133  
Health Care in Ethics I  
3 ch (3C) [W]

Examines major problems in contemporary medical practice, including confidentiality, informed consent and paternalism, compulsory sterilization and blood transfusions, contraception, abortion and genetic engineering, euthanasia, allocation of scarce resources, moral aspects involved in strikes of medical personnel, and conflict of duty situations. Prerequisite: One term-course in Philosophy or permission of the instructor.

PHIL3134  
Health Care in Ethics II  
3 ch (3C) [W]

A continuation of Health Care Ethics I. Examines major problems in contemporary medical practice, including confidentiality, informed consent and paternalism, compulsory sterilization and blood transfusions, contraception, abortion and genetic engineering, euthanasia, allocation of scarce resources, moral aspects involved in strikes of medical personnel, and conflict of duty situations. Prerequisite: PHIL 3133.

PHIL3141  
Philosophy of Mind  
3 ch (3C) [W]

A study of various philosophical approaches to the nature and concept of mind. Topics to be covered include: Cartesian Dualism, Freudian Psychology, Behaviourism, Cognitive Psychology and Artificial Intelligence. Prerequisite: One-term course in Philosophy or permission of the instructor.

PHIL3153  
Business Ethics  
3 ch (3C) [W]

An evaluation of a selection of moral problems in business enterprises. Topics include: the state and business; the profit motive; ethics in the workplace; moral development; justice as fairness; social responsibility; wage equity; bribery; discrimination in hiring; ecology; business and the developing world; advertising; sexual harassment. Prerequisite: One term-course in Philosophy or permission of the instructor.

PHIL3171  
Philosophy of Religion I  
3 ch (3C) [W]

A critical examination of the central philosophical issues in the Western Religious Tradition. Prerequisite: One term-course in Philosophy or permission of the instructor.

PHIL3172  
Philosophy of Religion II  
3 ch (3C) [W]

A further analysis and elaboration of issues raised in PHIL 3171. Prerequisite: PHIL 3171 or permission of the instructor.

PHIL3181  
Philosophy of History I  
3 ch (3C) [W]

A philosophical exploration of the nature of history and historiography. Topics include: laws and explanation; objectivity and subjectivity; point of view and value judgements; and narrative. Prerequisites: One term-course in Philosophy or permission of the instructor.

PHIL3241  
Philosophy of Natural Science  
3 ch (3C) [W]

An analysis of such scientific concepts as explanation, theory, and law, with special attention to the implications of recent scientific theories. Prerequisite: One term-course in Philosophy or permission of the instructor.

PHIL3242  
Philosophy of Human Science  
3 ch (3C) [W]

An analysis of the methods, theories and presuppositions of such human sciences as economics, psychology, history, and anthropology. Prerequisite: One term-course in Philosophy or permission of the instructor.

PHIL3531  
Late Antiquity & Early Medieval Philosophy (A)  
3 ch (3C)

This course will concentrate on major figures, persistent themes and significant philosophical works of late antiquity and early medieval philosophy, from the rise of Christianity to the Carolingian Renaissance. Prerequisite: One term-course in philosophy or permission of the instructor.

PHIL3532  
Medieval & Renaissance Philosophy (A)  
3 ch (3C)

This course will concentrate on major figures, persistent themes and significant philosophical works of the medieval period, from the rise of scholasticism, through the full flowering of medieval philosophy in the 13th century, to the breakdown of the medieval synthesis and the rise of Renaissance thought. Prerequisite: PHIL 3531.

PHIL3534  
Health Care in Ethics II  
3 ch (3C) [W]

A continuation of Health Care Ethics I. Examines major problems in contemporary medical practice, including confidentiality, informed consent and paternalism, compulsory sterilization and blood transfusions, contraception, abortion and genetic engineering, euthanasia, allocation of scarce resources, moral aspects involved in strikes of medical personnel, and conflict of duty situations. Prerequisite: PHIL 3133.

PHIL3541  
Philosophy of Mind  
3 ch (3C) [W]

A study of various philosophical approaches to the nature and concept of mind. Topics to be covered include: Cartesian Dualism, Freudian Psychology, Behaviourism, Cognitive Psychology and Artificial Intelligence. Prerequisite: One-term course in Philosophy or permission of the instructor.

PHIL3841  
17th & 18th Century Modern Philosophy  
3 ch (3C) [W]

A study of the Rationalist and Empiricist traditions of the 17th and 18th century from Descartes to Hume. Prerequisite: PHIL 1002 or permission of the instructor.

PHIL3852  
Kant and 19th Century Philosophy  
3 ch (3C) [W]

A study of late 18th and 19th century German philosophy from Kant to Marx. Prerequisite: PHIL 1002 or permission of the instructor.

PHIL4193  
Selected Topics in Philosophy  
3 ch [W]

These courses focus on specialized areas of interest. Prerequisites: At least two term-courses at the upper level in Philosophy or permission of the instructor.
PHYSICS

PHYS1011  Introductory Physics I  3 ch (3C 1T)
This course is an introduction to the branch of physics called mechanics. Mechanics is the study both of how objects move and why they move the way they do. Describing the motion of objects requires understanding the basic kinematics quantities position, displacement, velocity, and acceleration, as well as the connection between them. Understanding the causes of motion can be achieved by considering the forces acting on the object and/or by focusing on the conserved properties of the system (momentum, energy, angular momentum). Mechanics applies to a wide range of phenomena, essentially to anything that moves, but the course will highlight ties to and applications in the physical sciences. Prerequisites: Grade 12 Physics or equivalent Co-requisites: Either MATH 1001 or MATH 1003. Students intending to take Physics courses beyond Introductory Physics or continue in the Physical Sciences stream should take MATH 1003 and PHYS 1021 as Co-requisites to this course.

PHYS1012  Introductory Physics II  3 ch (3C 1T)
This course introduces the students to wave phenomena and to electricity and magnetism. Throughout, the concepts related to motion learned in the previous course are used to describe and explain new phenomena. The study of waves introduces the students to propagating, periodic disturbances. In addition to their importance in mechanical phenomena (e.g., seismic waves), waves form the basis of both optics and acoustics. The study of electricity and magnetism introduces the student to the concept of charge and to the effects of their surroundings (fields and forces). This course will highlight ties to and applications in the physical sciences. Prerequisites: PHYS 1011; MATH 1001 or MATH 1003. Students intending to take Physics courses beyond Introductory Physics or continue in the Physical Sciences stream should take MATH 1013 and PHYS 1022 as Co-requisites to this course.

PHYS1021  Experiments in Introductory Physics I  2 ch (3L)
This course provides the student hands-on experience with concepts covered in PHYS 1011. Co-requisite: PHYS 1011.

PHYS1022  Experiments in Introductory Physics II  2 ch (3L)
This course provides the student hands-on experience with concepts covered in PHYS 1012. Co-requisite: PHYS 1012.

PHYS1801 Introductory Physics for Biological Sciences 5 ch (3C 1T 3L) E
A general introduction to Physics, with applications to biological systems. Topics include mechanics, fluid mechanics, electromagnetism, optics, acoustics, and radiation phenomena. This course is intended primarily for students in Biological Sciences. NOTE: Credit will not be given for both PHYS1801; and PHYS 1011/PHYS1021. Co-requisites: MATH 1001 or MATH 1003.

PHYS1917  Physics for Engineering 5 ch (4C 2T/3L)
Vectors, kinematics, momentum, force, potential and kinetic energy. Kinetic theory of gases, circular motion, charge, field and potential, gravitation, electrostatics, optics, sound. Prerequisite: Grade 12 Physics or equivalent.

PHYS2011  Mechanics 5 ch (3C 3L)
Scalar and vector quantities, statics, kinematics, dynamics, work, energy, power, rotational motion, impulse and momentum, vibratory motion. Prerequisites: MATH 1013, PHYS 1011/PHYS 1012 and PHYS 1021/PHYS 1022.

PHYS2016  The Physics of Spaceflight 3 ch (3C)
Have you ever wondered how to get to Mars? If so, this course is for you. The course will begin with the famous problem of proving Kepler's three laws of planetary motion from Newton's 2nd law of motion and his Universal Law of Gravitation. From this launching point definitions will be developed for the significant geometrical and physical characteristics of elliptical, parabolic and hyperbolic orbits. Next, and what will form the bulk of the course, the motion of spacecraft, and how they can move from one orbit to another, will be studied. The basic form of orbital transfer, called the Hohmann transfer, will be applied first to spacecraft moving from orbit to orbit around the earth and, later, to flights to the Moon, Mars and beyond. Prerequisites: PHYS 1011 or APSC 1013 or PHYS 1801; MATH 1003/MATH 1013; or equivalents; or permission of Instructor.

POLITICS

POL201  Canadian Politics I  3 ch (3C/T) [W]
Survey course focusing on Canadian government and politics at the national level.

POL1301  Global Political Studies 3 ch [W]
This course introduces students to the global issues of imperialism, globalization and democratization and their impacts on the governance of various countries. Prerequisites: None. Credit cannot be given for both POLS 1301 and IS 1001.

POL2201  Canadian Politics II  3 ch [W]
This course expands on ideas introduced in POLS 1201 with a focus on the relationship between Canadian political institutions and Canadian society. Prerequisite: POLS 1201.

POL2301  Politics of the Developing World 3 ch (3C) [W]
Overview of political issues facing developing countries.

POL2311  The History and Politics of Latin America (Cross-Listed: HIST 2511) 3 ch (3C) [W]
Provides an overview of Latin American history and politics from colonization to the 20th century. (Cross-listed with HIST 2511). Prerequisite: POLS 1301.

POL2401  Introduction to Political Ideas 3 ch (3C) [W]
An introduction to the ideas and principles that serve as the foundation for Political Science. Prerequisite: 1 term-course in Politics.

POL2601  Introduction to International Politics 3 ch (3C/T) [W]
General introduction to the historic and contemporary practices of international relations.

POL3007  Digital Democracy 3 ch [W]
This course examines technologically mediated political practices in liberal democracies.

POL3101  Constitutional Politics in Canada 3 ch (3S/T) [W]
Examines the structure and process of constitution-making, and conflicting visions of constitutional change.

POL3112  Political Economy of Canada 3 ch (3S/T) [W]
Examines the political economy of Canada, with a focus on the contribution of the political economy tradition to an understanding of Canada’s political, social and economic development.

POL3201  New Brunswick Politics 3 ch (3S/T) [W]
An overview of the history and development of New Brunswick politics.

POL3205  Canadian Provincial Politics 3 ch (3S/3) [W]
Designed to provide the student with an overview of the nature of government and political processes in the Canadian provinces.

POL3211  Contemporary New Brunswick Ethics 3 ch (3S/T) [W]
Specialized study of current or selected issues in New Brunswick provincial politics.

POL3221  Canadian Political Issues I  3 ch (3C/S) [W]
Emphasis on current problem areas in Canadian Politics.

POL3222  Canadian Political Issues II  3 ch (3C/S)
Emphasis on a selected problem area in Canadian Politics.

POL3225  Gender and Canadian Politics 3 ch [W]
Examines the role of gender in Canadian social movements, political parties and political institutions, including Parliament, the courts and the media. Prerequisite: POLS 1201 or GEN 2001.

POL3231  Representation and Recognition in Canadian Politics 3 ch [W]
This course addresses the representation and recognition of women, aboriginals, Francophones, LGBT individuals, ethnic minorities and individuals with disabilities in the Canadian political system. Prerequisite: POLS 1201.

POL3232  Language Issues in Canada 3 ch (3S/T) [W]
Study of linguistic duality in Canada, with particular attention to conflicts over language rights.

POL3241  Canadian Voting Behaviour 3 ch (3S/T) [W]
A study of the electoral system, representation, and voting behavior in Canada.

POL3252  Canadian Political Parties 3 ch (3S/T) [W]
Directed at a systematic study of the structure and functions of political parties in Canada.

SECTION F: SAINT JOHN COURSES
SECTION F: SAINT JOHN COURSES

POL3255 Interest Groups and Social Movements 3 ch [W]
Explores the development, goals, strategies and political impact of interest groups and social movements.

POL3261 Canadian Federalism 3 ch (3C/S) [W]
Advanced analysis of specific issues affecting the federation.

POL3273 Canadian Intergovernmental Relations 3 ch (3C/S) [W]
Considers the relationships between federal, provincial and municipal governments, and their impact on current issues.

POL3277 Political Leadership in Canada 3 ch (3S/T) [W]
Focuses on various aspects of political leadership at the federal level.

POL3278 Courts & Legislatures: The Politics of Canadian Policy Making 3 ch [W]
This course analyses the impact of the inter-relationship of courts and legislatures on policy making at both the provincial and federal levels. Prerequisite: POLS 1201.

POL3283 Politics in French 3 ch (3S/T) [W]
The politics and institutions of French Canada; in particular, the nature and sources of relevant political changes within French Canadian society in Quebec and Acadian society in New Brunswick.

POL3291 First Nations Government in Canada 3 ch (3C/S) [W]
Examines the politics and administration of the relationship between aboriginal peoples and the Canadian state.

POL3292 Politics of Aboriginal Self-Government 3 ch (3C/S) [W]
A systematic analysis of the principles, structures and institutions of traditional and contemporary aboriginal self-government in Canada.

POL3311 Government of the United States 3 ch (3C/L) [W]
An analysis of contemporary issues in American politics, derived from an understanding of the concepts and structures of the national governmental system.

POL3322 The United States Presidency 3 ch (3C/L) [W]
An emphasis on the power relationships of the office of the Chief Executive.

POL3325 Gender and Comparative Politics 3 ch [W]
Comparative study of gender issues in selected countries, including women’s political organizations, political participation and social policies affecting women. Prerequisite: POLS 1301 or GEND 2001.

POL3333 Comparative European States 3 ch (3S/T) [W]
A comparative examination of selected European states, their political institutions, political cultures and recent political issues.

POL3334 Latin American Politics 3 ch [W]
This course discusses the major political trends, actors and processes that have shaped Latin American governments and politics throughout the course of the 20th and 21st Centuries. Prerequisite: POLS 1301 or POLS 2601.

POL3335 The Circumpolar North 3 ch (3C/S) [W]
A comparative analysis of political change and development in the Arctic region. Examples drawn from the Soviet Union, Alaska, Canada, Greenland, and Nordic Europe; pan-national movements; and Canadian Arctic policy.

POL3341 Comparative Federalism 3 ch (3C/S) [W]
A comparison of selected federal state structures. Definition of the problems and prospects of federation in Canada, the United States, Russia and other examples.

POL3344 Latin American Revolutions 3 ch [W]
Examines the origins and course of Latin American Revolutions, especially the Mexican and Cuban revolutions (cross-listed with HIST 3591). Prerequisites: POLS 1301 and POLS 2301 or POLS 2601.

POL3345 Political Behaviour 3 ch [W]
An examination of the foundations of political behaviour, public opinion, political participation and political elites.

POL3355 Politics of the Environment 3 ch (3C/S) [W]
Focus on the public sensitivity to environmental/ecological issues, political responses to this phenomena, and consequences of those responses. Uses a case-study approach.

POL3372 The State and Economic Interests 3 ch (3S/T) [W]
Examines the role of the Canadian state in economic development, with emphasis on the political dimensions of economic policy. Issues include the deficit, industrial policy, and foreign elements.

POL3375 The Political Economics of Asia 3 ch (3S/T) [W]
Examines the political structures, decisions and processes underlying Asia’s role in the global economy.

POL3381 Politics of Asia 3 ch (S) [W]
Examines political resistance, rebellions and revolutions in selected Asian countries.

POL3401 Modern Political Thought 3 ch [W]
Examines a selection of major texts from the modern period of Western political theory, encompassing classic statements of conservative, feminist, liberal, and socialist thought.

POL3421 Selected Topics in the History of Ideas 3 ch (3C/S) [W]
A comparison of various political thinkers on specific themes: natural law from Cicero to Rousseau, social contract theory from Locke to Marx, etc.

POL3425 Canadian Political Ideas 3 ch (3S/T) [W]
This course surveys the tradition of Canadian political thought from Confederation to the present.

POL3433 Montesquieu and the Enlightenment 3 ch (3S) [W]
The examination of his influence on the Enlightenment.

POL3445 Rosseau and the Enlightenment 3 ch (3S) [W]
The examination of his influence on the Enlightenment.

POL3451 Marxism 3 ch (3C/S) [W]
A focus on the writings of Karl Marx. Other Marxist theorists may also be examined.

POL3456 Politics Through Film 3 ch (3S/T) [W]
Seeks to examine political principles through the medium of film. Tyranny, censorship, totalitarianism, utopia, and liberty will be discussed through an analysis of a variety of films.

POL3463 Liberalism 3 ch (3S/T) [W]
Focuses on the core values and the exponents of liberal ideology.

POL3471 Study of Politics Through Literature 3 ch (3S) [W]
A multi-disciplinary analysis of the exposition of political ideas in works of classical and contemporary literature.

POL3473 Politics and Media in Canada 3 ch [W]
Examines the role of the press as critics and opposition to government & the role of government in regulating media. Designed as an upper level course for students majoring in politics or with a background in media or communications studies.

POL3483 Theories of Rights 3 ch (3S/T) [W]
The concept of “right” and differing perspectives on rights discourse.

POL3494 Democracy 3 ch (S/T) [W]
Examines the concept, and the various theories, of democracy.

POL3501 Contemporary Issues in Public Policy 3 ch (3S/T) [W]
Examines the major approaches explaining and understanding Canadian public policy, and applies them to a study of major public policy fields.

POL3601 Contemporary Issues in World Politics 3 ch (3S) [W]
Deals with current trends on the international scene including the global balance of power, relations between superpowers, ideological conflicts, the developing world, war, revolution, etc.

POL3603 Critical Perspectives on International Relations Theory 3 ch (S) [W]
A seminar that centers on frameworks for understanding international relations including: race, nationalism, political geography, de-territorialization, sovereignty, feminism, global communication, human rights, the state and political space, forms of political conflict, identity theory, ethnography, and globalization.

POL3622 International Organization and Law 3 ch (3S/T) [W]
Study of supra-national organizations, and structures of international conduct; the effect of both on inter-state relationships.

</thead>
<tbody>
<tr>
<td>POLS3625</td>
<td>Gender and International Politics</td>
<td>3 ch [W]</td>
<td>Introduction to the gender aspects of international relations including militarism, nationalisms, international political economy, the environment and human rights. Prerequisite: POLS 2601 or GEND 2001.</td>
</tr>
<tr>
<td>POLS3631</td>
<td>Survey of Global Issues</td>
<td>3 ch (3S/L) [W]</td>
<td>Current global issues such as war, militarism, the arms race, human rights and social justice, ecological imbalance, economic inequalities, and alternative world organizational structures, considered from international and interdisciplinary perspectives. General-interest course.</td>
</tr>
<tr>
<td>POLS3632</td>
<td>Urbanization, Poverty and Politics</td>
<td>3 ch [W]</td>
<td>This course explores the ways in which urban politics and planning have an effect on poverty and income disparities, and examines the role public and green spaces play in people’s everyday lives. Prerequisites: POLS 1301 or POLS 2601.</td>
</tr>
<tr>
<td>POLS3651</td>
<td>Canada and the Americas</td>
<td>3 ch [W]</td>
<td>This course discusses Canadian foreign policy towards the region with special emphasis on the influence of the United States. Prerequisites: POLS 1301 or POLS 2601.</td>
</tr>
<tr>
<td>POLS3671</td>
<td>Web Activism</td>
<td>3 ch (S) [W]</td>
<td>Examines how Web activists use global communication technology in campaigns against given governments.</td>
</tr>
<tr>
<td>POLS3673</td>
<td>Global Communication and International Relations</td>
<td>3 ch (S) [W]</td>
<td>Examines the role of global communication media and technologies in international relations. Discussion focuses on inter-governmental interaction, government links to citizens, and the empowerment of sub-state and non-state actors.</td>
</tr>
<tr>
<td>POLS3675</td>
<td>Global News</td>
<td>3 ch (S) [W]</td>
<td>A seminar that focuses on the political meaning of global media communication. The rise of international television news networks will be examined as a factor that influences international relations.</td>
</tr>
<tr>
<td>POLS3677</td>
<td>Information Technologies &amp; Conflict</td>
<td>3 ch (S) [W]</td>
<td>A seminar based on the examination of new information technologies and their role and impact on conflict. Discussion will focus on a variety of technological applications in order to outline trends, features and theoretical implications.</td>
</tr>
<tr>
<td>POLS3685</td>
<td>The Politics of Food</td>
<td>3 ch [W]</td>
<td>This course provides an overview of the political and policy issues concerning food production and consumption in Canada and around the World. Prerequisite: POLS 1301 or POLS 2601.</td>
</tr>
<tr>
<td>POLS3901</td>
<td>Approaches to Political Research</td>
<td>3 ch [W]</td>
<td>A survey of the major approaches and techniques used to research and analyze politics. Prerequisite: POLS 2401.</td>
</tr>
<tr>
<td>PSYC1003</td>
<td>Introductory Psychology I</td>
<td>3 ch (3C)</td>
<td>An overview of psychology as well as an introduction to the biological basis of behavior, motivation, learning, sensation, perception, memory, thinking and language. Students may be requested to participate in research and some course credit may be earned in this way.</td>
</tr>
<tr>
<td>PSYC1004</td>
<td>Introductory Psychology II</td>
<td>3 ch (3C)</td>
<td>Examines social behaviour, personality, assessment, abnormal psychology, and psychological therapy. Students may be requested to participate in research and some course credit may be earned in this way.</td>
</tr>
<tr>
<td>PSYC1273</td>
<td>Life Span Development</td>
<td>3 ch (3C)</td>
<td>An introduction to theory, methods, and research findings in lifespan developmental psychology. The life cycle as a whole and basic processes in socialization, cognition, and personality development will be examined. This course is designed primarily for Nursing students. Enrollment of other students is by permission of the instructor. Students currently enrolled in the BN programme are exempt from the PSYC 1004 prerequisite requirement. NOTE: Students who take PSYC 1273 may not take PSYC 2201 or PSYC 3293.</td>
</tr>
<tr>
<td>PSYC2102</td>
<td>Research Methods in Psychology</td>
<td>3 ch (3C 1L)</td>
<td>An introduction to the methods and theory of empirical and experimental research in psychology. The logic of hypothesis construction and testing in relation to various areas of psychology are examined. Students will be required to complete an experiment. This course is intended for students who plan to major or honor in either Psychology or Biopsychology. Prerequisite: A grade of C or better in PSYC 2901.</td>
</tr>
</tbody>
</table>
SECTION F: SAINT JOHN COURSES

PSYC2201 Child Development 3 ch (3C)
A study of theory, methods and research findings in infancy and childhood. Examines social, cognitive, emotional and physical development. Credit will not be granted for both PSYC 2201 and ED 3021.

PSYC2401 Social Psychology 3 ch (3C)
The scientific study of how people think about, influence, and relate to one another. The course examines methods and findings related to topics such as the self in society, attitude formation, judging others, conformity, aggression, prejudice, and attraction. Prerequisite: PSYC 1004 or equivalent.

PSYC2901 Introduction to Statistical Analysis for Psychologists 3 ch (3C)
Designed to acquaint the student with the basic tools of statistics which are used to summarize and analyze psychological data.

PSYC3033 Health Psychology 3 ch (3C) (LE)
An aggregate of the scientific and professional contributions of the discipline of psychology towards promotion of an holistic approach for the maintenance of health, the prevention and treatment of illness including etiologic as well as diagnostic correlates of health and illness. Prerequisites: PSYC 1003 and PSYC 1004.

PSYC3263 The Psychology of Criminal Behaviour 3 ch (3C)
Examines psychological based theories of crime and the contribution of psychology to the understanding of criminal behaviour and the assessment and rehabilitation of offenders. Prerequisites: PSYC 1003 and PSYC 1004.

PSYC3265 Forensic Psychology 3 ch (3C)
This course will focus on the application of psychological principles within legal contexts (e.g., legal decision-making, eye witness memory) and in relation to policing practices (e.g., interrogation practices, credibility assessment). Prerequisites: PSYC 1003 and PSYC 1004.

PSYC3293 The Psychology of Aging 3 ch (3C)
Focuses on changes in learning ability, memory, perception, physical development, personality and social development associated with aging, beginning in young adulthood and extending to late adulthood. Prerequisite: PSYC 2201 or ED 3021.

PSYC3323 Community Psychology and Mental Health 3 ch (2C 1S)
Provides a detailed examination of how to evaluate programs in the community. Areas covered are mental health, criminal justice, and other systems that provide human services.

PSYC3343 Human Sexuality 3 ch (3C)
Provides an introduction to the psychology of human sexuality, including examination of topics such as sexual anatomy, sexual behaviour, sexual response, sexual dysfunction and therapy, sexual variation and other topics of interest.

PSYC3362 Introduction to Guidance and Counselling 3 ch (3C)
A survey of the concepts, theories, and resources involved in the guidance and counselling area.

PSYC3383 Perception 3 ch (3C)
Provides a broad introduction to visual and auditory perception. Topics include the structure and neural functioning of auditory and visual systems and contemporary approaches to traditional problems of perception. The course may include reviews of other sense modalities.

PSYC3393 Systems of Therapy 3 ch (3C)
The array of contemporary psychotherapeutic techniques is examined with emphasis on the relationship that exists between the theoretical and historical background of a therapy and the form it assumes when put into practice.

PSYC3412 Advanced Social Psychology 3 ch (3C)
Further examines the scientific methods and findings that pertain to the functioning of individuals in social contexts. Topics include advanced methods used to study groups, aggression, prejudice, attraction and altruism.

PSYC3414 Psychology and Technology 3 ch (3C)
This course will introduce students to the topic of media psychology. Students will learn about the theories and research frameworks that seek to explain (1) how we process media and (2) how media influences our attitudes, beliefs, and behaviours. Special attention will be given to specific topics like advertising, media violence, sex in the media, and social media.

PSYC3453 Cross Cultural Psychology (O) 3 ch (3C)
Cross cultural influences on behaviour, cognition, motivation, and personality variation. Methodological issues are examined. Prerequisites: PSYC 1003 and PSYC 1004.

PSYC3461 Theories of Personality 3 ch (3C)
Theory formation is greatly influenced by the assumptions, beliefs and experience of the theorist. In surveying formal theories of personality, an attempt is made to demonstrate the influence of personal-subjective factors in the development of theory.

PSYC3493 Changing Behaviour 3 ch (3C)
An examination of the application of basic principles of learning to human behavioural processes. A study of the treatment techniques and assessment procedures employed in behaviour modification programs.

PSYC3503 Learning 3 ch (3C)
A survey of principles of both instrumental and classical conditioning focusing on animal subjects. Such topics as biological constraints on learning, cognitive interpretations of learning, and memory processes will be included. There will be various demonstrations throughout the course.

PSYC3553 Psychopathology 3 ch (3C)
This course will provide the student with a comprehensive picture of maladaptive behaviour from a biological and psychosocial perspective. Problems associated with diagnostic systems, the role of stress, and other causative factors implicated in the traditional clinical syndromes will be discussed.

PSYC3603 Selective Attention and Memory 3 ch (3C/SL)
Open to 2nd, 3rd and 4th year students who have completed PSYC 1004. An examination of the processes involved in the reception, election and storage of information.

PSYC3632 Motivation 3 ch (3C)
A critical examination of the concept of motivation in terms of its power to explain findings in the experimental literature and its capacity to generate research.

PSYC3693 Cognitive Processes 3 ch (3C)
The scientific study of higher mental processes. This course examines experimental methods and findings related to attention, memory, mental imagery, the organization of general knowledge, language, problem solving and creativity.

PSYC3695 Psychology of Music 3 ch (3C)
This course will provide a broad introduction to the psychology of music. Topics covered will include the origins of music in humans, music acquisition during childhood and adolescence, how music interacts with emotions, well-being, and other cognitive abilities, the process of performing music, and the neuroscience of music. Prerequisite: PSYC 1004.

PSYC3711 Biological Psychology 3 ch (3C) (LE)
An introduction to the anatomy and physiology of nervous systems with a special emphasis on behavioural indices of function. Illustrative examples of both human and animal research are surveyed. Prerequisites: PSYC 1003 and PSYC 1004.

PSYC3723 Introduction to Human Neuropsychology 3 ch (3C)
A review of human neuroanatomy with a focus on recent theories and findings regarding the functional organization of the brain. The principles of cerebral asymmetry, disconnection syndromes, and the functions of the occipital, parietal, temporal, and frontal lobes are examined. A special emphasis is placed on the role of brain systems in sensory motor skills, higher order cognitive functions and personality. Prerequisite: PSYC 3711.

PSYC3724 Introduction to Clinical Neuropsychology 3 ch (3C)
Explores the neuropsychological sequelae of the most common neurological and psychiatric disorders seen in the practice of clinical neuropsychology, including vascular disorders, traumatic head injuries, epilepsy, tumors, multiple sclerosis, anxiety, depression, schizophrenia, dementia, and neuro-degenerative conditions, such as Alzheimer's Disease. Prerequisite: PSYC 3723.

PSYC3725 The Dementias 3 ch (3C)
An introduction to a devastating group of diseases which cause irreversible decline in cognitive functioning and for which the incidence is expected to triple by the year 2031. The etiological models, cognitive, emotional, and behavioral changes, treatment, care, and management issues of the most common types of dementias are explored including cortical (e.g.,...
Alzheimer’s disease, Vascular Dementia, Frontal Lobe Diseases) and subcortical (e.g., Parkinson's Disease, Huntington’s Disease, Multiple Sclerosis, and AIDS) dementias. Prerequisites: PSYC 1003 and PSYC 1004.

PSYC3743 Comparative Psychology 3 ch (3C)
Development of psychological theory by the comparison of data from different species. Emphasizes the evolution and adaptive significance of behaviour. Prerequisites: PSYC 1003 and PSYC 1004.

PSYC3752 Drugs and Behaviour 3 ch (3C)
A survey of all classes of psychoactive drugs, their effects on human and animal physiology and behaviour, their history of use, and various drug-related issues such as abuse, dependency, and legality.

PSYC3803 Industrial Psychology 3 ch (3C)
Application of psychological knowledge to business and industrial problems. Prerequisites: PSYC 1003 and PSYC 1004.

PSYC3913 Introduction to Statistical Inference and Experimental Design in Psychology 3 ch
This course provides an introduction to research design and statistical inference in psychology. Topics covered are computational procedures and theory up to analysis of variance, including multiple comparisons and multiple regression. Students will also learn how to analyse data using one or more statistical packages. Prerequisites: PSYC 2102 and PSYC 2902.

PSYC4021 Cognitive and Psychophysiological Research 3 ch (3C)
Deals with research scenarios that involve measuring cognitive and physiological correlates of human functioning. Measurements reflect processes and conditions related to stress, cognitive functioning, motivation and individual differences. Prerequisite: PSYC 2102.

PSYC4053 History of Psychology 3 ch (3C)
This course traces the origins and development of modern psychology from its roots in ancient Greece through the philosophical and scientific developments in Europe that have culminated in the broad polymorphic discipline of today.

PSYC4111 Conducting Research Studies 3 ch
The purpose is to enable students to become actively involved in basic research. This involvement will take the form of participation in research, reading and discussion of research topics, and development of research skills. Prerequisite: PSYC 2102.

PSYC4122 Basic Research II 3 ch (3S)
Continuation of PSYC 4111.

PSYC4142 Honours Research Seminar 0 ch (3S)
A non-credit seminar for Honours students. Topics include problems of research design and discussions of student Honours research projects.

PSYC4143 Designing Research Proposals 3 ch
Under the direction of a supervisor a student develops a proposal which is assessed and approved by the Department. Prerequisite: Eligibility for the Honours programme. A letter grade will be assigned.

PSYC4145 Honours Thesis 3 ch
Under the direction of a supervisor a student conducts, completes and defends the research. Prerequisite: A grade of B+ or higher in PSYC 4143. A letter grade will be assigned.

PSYC4233 Programme Evaluation 3 ch (3C)
A seminar course focusing on review of the principles and methods used in planning and conducting programme evaluations. A basic introduction to the review and assessment of applied/clinical research using meta-analytic methods. Prerequisites: PSYC 2102 and PSYC 2901; Sociology Majors take SOCI 3104 in lieu of PSYC 2901.

PSYC4263 Field Placement in Community Corrections I 3 ch (LE)
The field placement is designed to provide students with practical experience in a community correctional setting that provides services for federal parolees. The course has limited enrollment and is open to 3rd - 4th year psychology & sociology majors. Prerequisites: PSYC 3203 and PSYC 3493 and SOCI 2611 and SOCI 3614; 3rd - 4th year PSYC/SOCI, Cumulative GPA=B (exceptions may be made at the discretion of the instructors).

PSYC4264 Field Placement in Community Corrections II 3 ch (LE)
The field placement is designed to provide students with additional practical experience in a community correctional setting that provides services for federal parolees. The course has limited enrollment and is open to 3rd - 4th year psychology & sociology majors. Prerequisites: PSYC 3203 and PSYC 3493 and SOCI 2611 and SOCI 3614; 3rd - 4th year PSYC/SOCI, Cumulative GPA=B (exceptions may be made at the discretion of the instructors).

SECTION F: SAINT JOHN COURSES

PSYC4265 Field Placement in Clinical Psychology 3 ch (3C) (LE)
Exposure to community mental health settings, with the goal of gaining applied supervised experience with individuals who have mental health, behavioural and/or intellectual challenges. Enrolment is limited to Psych Majors and students with a minimum CGPA of 3.3 (B+) and is subject to permission of the instructor. Prerequisites: PSYC 1003, PSYC 1004, PSYC 3553, PSYC 3493, and either PSYC 3362 or PSYC 3393.

PSYC4266 Field Placement in Aging I 3 ch (LE)
This field placement is designed to provide students with experience working with the elderly. Students who will gain practical experience (e.g. working with Recreationalists creating programming opportunities for residents; learning about proper approaches to interact with elderly, etc.) Students will work for 3 hours a week during the duration of the term in their field placement. This course has limited enrolment, and is open to fourth year students completing the Minor in Gerontology. Pre-requisite: PSYC 3293 and permission of the field placement co-ordinator.

PSYC4267 Field Placement in Aging II 3 ch (LE)
A continuation of PSYC 4266. This field placement is designed to provide students with experience working with the elderly. Students will gain practical experience (e.g. working with Recreationalists creating programming opportunities for residents; learning about proper approaches to interact with elderly, etc.) Students will work for 3 hours a week during the duration of the term in their field placement. This course has limited enrolment, and is open to fourth year students completing the Minor in Gerontology. Pre-requisite: PSYC 3293 and permission of the field placement co-ordinator.

PSYC4293 Adolescence 3 ch (3S)
A seminar course examining physical, cognitive, social and emotional development in adolescence. Prerequisites: PSYC 2201 and PSYC 2102. NOTE: Students who take PSYC 1273 may not take PSYC 2201, PSYC 2302, or PSYC 4293.

PSYC4313 Psychological Testing 3 ch (3CL)
A seminar course focusing on Psychometric Theory and principles of psychological testing as they arise in consideration of relevant statistical concepts and methods and of historical experience in development and use of tests for general intelligence, differential abilities and personality traits. Prerequisite: PSYC 2102.

PSYC4463 Attachment and Relationships 3 ch (CS)
A seminar course focusing on an in-depth analysis of selected topics in personality theory and research. Possible topics include attachment, interpersonal relations and communication, intimacy, loneliness, solitude, and issues in personality assessment. Prerequisites: PSYC 2102 and PSYC 3461.

PSYC4466 Developmental Psychopathology 3 ch (3C)
A seminar course that introduces students to the literature of maladaptive behavior within the developmental perspective. Specific disorders of childhood and adolescence will be included in the seminar topics. Prerequisites: PSYC 2102 and PSYC 2201 and PSYC 3353 or permission of instructor.

PSYC4583 Advanced Perception 3 ch (3C)
A seminar course that provides an in-depth discussion and analysis of selected problems in perception. Topics may include temporal factors in perception, optical illusions, spatial frequency representation, perceptual development, motion perception. Prerequisites: PSYC 2102, PSYC 3383.

PSYC4693 Learning Theory 3 ch (3S)
An examination of some of the persistent theoretical questions in learning. Prerequisite: PSYC 3503.

PSYC4733 Cognitive Neuroscience 3 ch (3C)
A seminar course that deals with contemporary neurological models of perception and cognition. Topics will be selected to reflect the expertise of faculty. They may include computational networks, blind sight, prosopagnosia, lateralization, etc. Prerequisites: PSYC 2102, PSYC 3711, and either PSYC 3383 or PSYC 3693.
SECTION F: SAINT JOHN COURSES

PSYC4813 Substance Use Disorders 3 ch (3C)
A seminar course that covers a broad spectrum of topics in the area of addiction including the epidemiology of substance abuse and dependence, the biopsychosocial bases of addiction, as well as, issues of comorbidity and treatment. Prerequisites: PSYC 2102 and one of PSYC 3752 or PSYC 4833.

PSYC4833 Psychopharmacology 3 ch (3C)
A seminar course focusing on the drugs used in the treatment of depression, panic disorder, obsessive-compulsive disorder, phobias, schizophrenia, dementias, and related disorders. The emphasis is on the biological bases of these syndromes and the pharmacological agents used to alleviate them. Prerequisites: PSYC 2102 and PSYC 3711.

SPAN

SPAN1203 Introductory Spanish I 3 ch
Designed to give beginners a sound basic knowledge of Spanish. Explains fundamentals of grammar with some reading at the elementary level. Language laboratory available for oral practice.

SPAN1204 Introductory Spanish II 3 ch
Continuation of SPAN 1203. Prerequisite: SPAN 1203 or equivalent.

SPAN2203 Intermediate Spanish I 3 ch
Designed to consolidate and to develop language skills acquired in SPAN 1203 and SPAN 2204. Fundamentals of grammar will be completed and modern Spanish and Spanish American authors read. Audio-visual materials are also used. Prerequisite: SPAN 1204 or equivalent.

SPAN2204 Intermediate Spanish II 3 ch
Continuation of SPAN 2203. Prerequisite: SPAN 2203 or equivalent.

SPAN3007 Fundamentals of Spanish Language and Culture (Q) 3 ch (3C)
This intensive course combines the study of language and culture and targets the development of all four basic skills: speaking, listening, reading, and writing to extend intermediate-level proficiency. It also offers an opportunity to create a contemporary, and interesting context for meaningful communication with the Spanish-speaking world. Prerequisite: SPAN 2204 or permission of the instructor.

SPAN3011 Hispanic American Civilization 3 ch
Various aspects of Hispanic American civilization are examined, including geography, history, art, literature, society and contemporary problems. Prerequisite: SPAN 2204 or permission of the instructor.

SPAN3101 Special Topics 3 ch
This course focuses on specialized areas of interest. Taught primarily in Spanish. Prerequisite: SPAN 2204 or permission of the instructor.

SPAN3974 Contemporary Spanish American Prose Fiction 3 ch (3S)
Representative novels and short stories by Spanish-American writers including: Borges, Vargas, Llosa, Garcia Marquez, and Paz whose works exemplify the social conflicts and ideological contradictions of the region. Taught in Spanish. Prerequisite: SPAN 2204 or permission of the instructor.

SCIENCE

SCI1001 University Skills for Science Students 2 ch (2C)
This course introduces first year students to skills which will assist in their success in first year university. Helps students develop their self-assessment skills and their approaches to problem solving.

SCI1002 Science in Context 1 ch (1C, 0.5L)
This course is designed for entering Science students to develop career skills in science. Topics include library research skills, lab report writing, teamwork skills, identifying junk science, ethics in science, as well as exploring career & degree options.

SCI1831 What On Earth Isn't Chemistry (Cross-Listed: CHEM 1831) 3 ch (3C)
Intended for students (with limited chemistry background) who wish to gain a better understanding of the chemistry in the world around them. The course will cover aspects of; atomic and molecular structure, the periodic table, what chemical names mean, balancing equations (and the relationships involved), nuclear chemistry, radiation and organic compounds. The concepts will be examined in the context of understanding “everyday” chemistry. This course cannot be used as a substitute for any other first level Chemistry course.

SCI1862 Shaping the Earth's Surface 3 ch (3C)
Designed for the non-scientist. Examines the basic geological forces that shape the earth's surface and our environment. Subjects include volcanism, earthquakes, erosion, soils, groundwater, rivers, coastlines, deserts, landslides, and the earth's past, present and possible future climates.

SCI1872 Basic Physics and Astronomy for Non-Scientists 3 ch (3C)
Overview of physics and astronomy from the perspective of historic development and fundamental principles of science. Topics include: concepts of force, energy and wave; survey of astronomy tracing development of our view of the universe. Offered in alternate years with SCI 1862 (Shaping the Earth’s Surface). Prerequisites: High school math and science courses are an asset.

SCI1892 The History and Challenges of Human Spaceflight 3 ch (3C)
People have been entering space since 1961, with the flight of Soviet cosmonaut Yuri Gagarin. Now with the passage of more than half a century, is it worth reflecting on what human spaceflight has accomplished, how it is achieved, and what challenges it faces moving forward.

A written and oral report on the scientific activities of the Work Integrated Learning (WIL) experience. Faculty approval is required prior to any placement. A component of the grade will be the supervisor’s evaluation of the student. Prerequisites: BIOL 2033 and either CHEM 3421 or CHEM 3422.

SCI3155 Women and Science 3 ch (3C)
An overview of women's historical and contemporary participation in science, issues in science and math education, feminist critiques and theories on science and gender, and the impact of technology on women's lives. Prerequisite: GEND 2001 (pre- or co-req) or 30 ch of any SASE program.

SCI3255 Women, Development and the Environment 3 ch (3C)
An examination of the effects of the status of women, poverty, population growth and economics on the state of the environment and conservation in developing nations. Environmental issues to be discussed include: over cultivation and deforestation, over fishing, poaching, antibiotic resistance, migration, biodiversity, extinction and resource depletion. Prerequisites: GEND 2001 (pre- or co-req) or 30 ch of any SASE program.

SOCIOLOGY

NOTE: See beginning of Section F for abbreviations, course numbers and coding.

SOC54501 Social Science in Practicum Courses 3 ch (3C/S)
Combined seminar and independent study course that provides students with volunteer experience working in an organization, institution or business related to their disciplines. It can only be taken with the approval of an instructor in the subject area. Prerequisite: Successful completion of 30 term courses in Arts.

SOCIOLOGY

NOTE: See beginning of Section F for abbreviations, course numbers and coding.

Unless otherwise indicated, students must complete Sociology 1001 before taking any sociology courses at the 2000 level or above. Students are required to complete at least three term-courses of sociology at the lower level (1000-2000 courses) before enrolling in any third-year sociology courses. Students who are not majoring or honouring in Sociology will be admitted to a 4000 level course only if they have completed six term-courses of Sociology and have consulted with the instructor.

A minimum grade of C (2.0) is mandatory for all sociology courses required as Prerequisites or taken to meet the Majors and Honours requirements.

SOCI0101 Introduction to Sociology 3 ch (3C)
Surveys the basic concepts, theories and analytical methods of sociology and introduces students to sociology as a way of thinking.

SOCI0202 The Emergence of the Sociological Imagination 3 ch (3C)
An historical introduction to the people, places and ideas that inform modern sociology that is elaborated with reference to contemporary social life. Emphasis will be placed on North America and Europe from the nineteenth and bases, nuclear centuries; although, some reference may be made to similar ideas developed in other places and times.
SOCI2007 Introduction to Human Evolution and Social Anthropology 3 ch (3C)
An introduction to the social and evolutionary anthropology of human diversity. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2205 Interpersonal Relations (O) 3 ch (3C)
An introduction to a variety of perspectives designed to provide insight into social interaction on the interpersonal level. Attention is also given to some of the methodological problems involved in achieving a better understanding of this area of social life. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2251 Film and Society Prior to World War II 3 ch
This course examines the rise of the North American film industry, its organization and its current cultural influence. It investigates the history of early film, the rise of the studio system, the star as celebrity, the emergence of a number of film aesthetics, and it analyses how film has represented social issues especially those of class, gender and race. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2253 From TV to the Internet (O) 3 ch (3C)
This course provides a broad-based introduction to the interdisciplinary field of the sociology of the media. It explores the political, economic, ideological and organizational settings within which the media operates and charts its growing importance in many aspects of contemporary life. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2232 Sociology of Work 3 ch (3C)
Examines the changing nature and organization of work within the context of regional, national and international developments. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2376 Sociology of Health, Illness and Healing (O) 3 ch (3C)
Examines the social nature and consequences of health, illness and healing and looks at medicine as a form of social control. Areas to be covered include the delivery of health care, the construction of medical knowledge, social inequality and its impact on health and disease. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2413 Canadian Society (O) 3 ch (3C)
Examines the historical preconditions, current processes in and structure of Canadian society. This may include French-English relations, regionalism, native rights, Canadian mosaic and position in the world system. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2471 Sociology of Western Civilization Pre-1500 (A) 3 ch (3C)
Beginning with the cultures of prehistoric Indo-European speakers, this course examines the Greco-Roman world, the Christian institutions of the Middle Ages, Renaissance and Reformation periods. Students will be required to evaluate and interpret these periods from a sociological perspective which focuses on how societies and cultures develop throughout history. One of the founders of this perspective was Max Weber, probably best known and most influential figure in sociological theory. Students will be expected to study some of Weber's writings on uniqueness of the West. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2501 Introduction to Gender and Gender Studies 3 ch (3C)
An introduction to gender and gender studies from a sociological viewpoint with some consideration of interdisciplinary perspectives. Examines basic concepts, approaches, and methods pertinent to understanding gender relations and divisions in a global and historical context. Prerequisite: SOCI 1001 or equivalent with a grade of C or better. NOTE: Students who take SOCI 2501 may not receive credit for GEND 2001.

SOCI2533 Social Movements and Social Revolutions (A) 3 ch (3C)
An analysis of social movements and revolutions from a sociological perspective. Emphasis is on critical understanding of why they arise, why some fail and why others succeed. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2611 Anti-Criminality (A) 3 ch (3C)
Introduces students to the new sub-field of anti-criminality. Focuses on qualitative criminological developments since the pioneering work of Howard Becker. Emphases will be placed on interactionist, ethnography, sociological, feminist and other micro-level analyses which constantly challenge and provoke the criminological canon. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI2615 Historical Sociology I (O) 3 ch (3C)
Introduction to historical and sociological understanding of modern and post-modern societies. Particular emphasis will be placed on Canada and Europe. Prerequisite: SOCI 1001 or equivalent with a grade of C or better.

SOCI3003 Sociology of Economic Ideas (O) 3 ch (3C)
Explores the relationships between the evolution of economic ideas and the prevailing socio-historical, sexual identities, ideological and epistemological, philosophical and reflexive concerns as well as practical applications. Prerequisite: SOCI 1001 or equivalent and two term-courses in lower-level Sociology, all with grades of C or better.

SOCI3008 Early Social Theory 3 ch (3C)
This course introduces students to developments within social theory since its origins in the 19th. century. The writings of Marx, Durkheim, Weber, will be examined, along with more recent contributors to the field. Students who have taken SOCI 3000 cannot also get credit for SOCI 3008. Prerequisite: SOCI 1001 or equivalent and three term-courses in lower-level Sociology, all with grades of C or better.

SOCI3109 Modern Social Theory 3 ch (3C)
This course familiarizes students with developments in modern social theory. Focus will be placed on contemporary theoretical issues and debates within the field. Students who have taken SOCI 3000 cannot also get credit for SOCI 3009. Prerequisite: SOCI 3008 with a C or better.

SOCI3104 Quantitative Methods in the Social Sciences 3 ch (3C)
Introduces students to the logic and main stages of quantitative research, covering research design, sampling, measurement, data collection methods, and statistical analysis as well as research ethics. Prerequisites: SOCI 1001 or equivalent and two term-courses in lower-level Sociology, all with grades of C or better.

SOCI3105 Qualitative Methods in the Social Sciences 3 ch (3C)
Introduces students to the inter-disciplinary emergence of qualitative methodology (e.g., ethnography, interactionism, textual), with an emphasis on qualitative and quantitative paradigms as well as practical applications. Prerequisites: SOCI 1001 or equivalent and two-term course in lower-level Sociology, all with grades of C or better.

SOCI3214 Sociology of Communications: Canadian Culture Through Film 3 ch (3C)
A sociological examination of the principal ways communications can be understood. The course examines how Canadian films have addressed epistemological, philosophical and reflexive concerns as well as practical applications. Prerequisites: SOCI 1001 or equivalent and two term-courses in lower-level Sociology, all with grades of C or better.

SOCI3217 Film and Society III 3 ch (3C)
This course will investigate the relationship between film and society and will focus its attention on contemporary film. Prerequisites: SOCI 1001, SOCI 2251 plus 1 additional term-course at the 2000-level in Sociology, all with grades of C or better in all three courses, or permission of the instructor.

SOCI3251 Film and Society from WWII to the 1960s 3 ch (3C)
This course provides a broad-based introduction to the interdisciplinary field of the sociology of film. It investigates the relationship between film and society and focuses its attention on post World War II Hollywood Films, Italian Neo-realist and French New Wave films. Prerequisites: SOCI 1001 or equivalent, SOCI 2251 and one additional term-course in lower-level Sociology, all with grades of C or better. ICS students: SOCI 1001, SOCI 2251 and ICS 2001, all with grades of C or better.

SOCI3257 Film and Society from the 1960s to the Present Day 3 ch (3C)
This course will investigate the relationship between film and society and will focus its attention on contemporary film. Prerequisites: SOCI 1001, or equivalent, SOCI 2251 and one additional term-course in lower-level Sociology, all with grades of C or better. ICS students: SOCI 1001, SOCI 2251, and ICS 2001, all with grades of C or better.

SOCI3331 Cinematic Rome (O) 3 ch (3C)
This course situates cinematic Rome in its cultural, urban, social and political settings. It focuses on films that treat the city of Rome as a protagonist as well as a symbolic cultural space that will be traversed, examined, contested, and reclaimed. The course will further examine how Rome is used in film as a site for the projection of modern romance, Cold War political conflicts, sexual identities, decadence, and cultural anxieties. Course will normally be taught on site in Rome. Prerequisites: SOCI 1001 or equivalent and two term-courses in lower-level Sociology all with grades of C or better.
SECTION F: SAINT JOHN COURSES

SOCI3386 Sociology of Religion (O) 3 ch (3C)
This course will examine ways that religious groups and their members are affecting and being affected by changes in society. Prerequisites: SOCI 1001 or equivalent, and two term-courses in lower-level Sociology, all with grades of C or better.

SOCI3471 Sociology of Western Civilization Post-1500 3 ch (3C)
Proceeding from the modern era, this course continues through the era of European exploration of the globe, the rise of the Galilean and Newtonian science, the Enlightenment, the American and French Revolutions, the mechanization of industry, nineteenth century nationalism, the First and Second World Wars, and concludes with a consideration of the rise and fall of the socialist/multicultural state in contemporary Europe. The focus of this course will be historical and sociological. Students will be required to employ sociological concepts so that they can gain a better understanding of historical phenomena. Prerequisites: SOCI 1001 or equivalent and two term-courses in lower-level Sociology, all with grades of C or better.

SOCI3517 Sociology of Culture (O) 3 ch (3C)
Examines the historical emergence of contemporary western culture. Some cross-cultural comparisons will also be examined. Prerequisites: SOCI 1001 or equivalent and two term-courses in lower-level Sociology, all with grades of C or better.

SOCI3523 Sociology of Globalization (A) 3 ch (3C)
Surveys the process of globalization arising from the increasing integration and interaction of products and cultures in the world. Distinguishes between different ideologies of globalization: market or neoliberal globalization; jihad globalization, and cultural Marxist globalization. Examines the struggle for cultural and ethnic preservation by ethnic-nationalist movements against these ideologies of globalization. Prerequisites: SOCI 1001 or equivalent and two term-courses in lower-level Sociology, all with grades of C or better.

SOCI3531 Sociology of Multiculturalism 3 ch (3C)
This course will examine the case for and against multiculturalism and mass immigration in Canada and the Western world. Prerequisites: SOCI 1001 or equivalent and two term-courses in lower level Sociology, all with grades of C or better.

SOCI3544 Gender and Technology (A) 3 ch
Explores the processes through which gender relations and assumptions about gender enter into the design and use of technologies, the extent to which the social relations of technology are implicated in the generation of gender inequalities, and the impacts of technology on the lives of women and men. Prerequisites: SOCI 1001 or equivalent, one of either SOCI 2501 or GEND 2001, and one additional term-course in lower-level Sociology, all with grades of C or better.

SOCI3614 Anti-Crime III (A) 3 ch (3C)
Advanced study in the field of anti-crimeology. Focuses on developments in the field of critical criminology since the emergence of "The New Criminology" and "Discipline & Punishment". Emphasis will be placed on the critical analysis of our western systems of criminal justice. Prerequisites: SOCI 1001 or equivalent, SOCI 2611 and one term-course in lower-level Sociology, all with grades of C or better.

SOCI3615 Historical Sociology II (O) 3 ch (3C)
Advanced study of socio-cultural and socio-historical transformations in Western societies. Emphasis will be placed on the critical literature in this field, and the detailed analysis of specific empirical transformations. Course topics change annually. Prerequisites: SOCI 1001 or equivalent, SOCI 2615 and one term-course in lower-level Sociology, all with grades of C or better.

SOCI3822 Sociology of Modernization (A) 3 ch (3C)
Course explores the transition from traditional to modern society. Emphasis is on the structures of everyday life before and after modernization. Prerequisites: SOCI 1001 or equivalent, and two term-courses in lower-level Sociology, all with grades of C or better.

SOCI3843 Sociology of the Arts 3 ch (3C)
Investigates the social contexts of artistic endeavor and consumption of such art forms as painting, music, literature, theatre, film and architecture. Explores the role of both amateur and professional artists as well as their products and publics.

SOCI3889 Sociology of Native Issues: Culture and Colonization (O) 3 ch (3C)
Provides a socio-historical analysis of a range of issues facing Aboriginal people in Canada today, including an examination of the colonization process through a focus on treaties, The Indian Act, the reserve system, and residential schools. Prerequisites: SOCI 1001 or equivalent and two-term courses in lower-level Sociology, all with grades of C or better.

SOCI3911 Cinematic New York (A) 3 ch (3S)
This course examines films shot in New York within the historical and sociological context as well as within the body of work of a number of directors who made New York an important setting for their stories. The course will normally be taught on site in New York. Prerequisites: SOCI 1001 or equivalent, and two-term courses in lower-level Sociology, all with grades of C or better.

SOCI3921 Sociology of Knowledge (O) 3 ch (3C)
This course examines the social construction of knowledge. Explores the social and historical processes by which we have come to accept certain claims as knowledge as valid. Also examines controversies about the progressiveness and rationality of knowledge. Prerequisites: SOCI 1001 or equivalent and two-term courses in lower-level Sociology, all with grades of C or better.

SOCI4014 Designing Research Proposals 3 ch (3S)
Under the direction of a supervisor, an Honours student develops a proposal which is approved by the Discipline. Prerequisites: SOCI 1001 or equivalent, two-term courses in lower-level Sociology, and SOCI 3000, 3104 and 3105, all with grades of C or better. CGPA of 3.3 or higher is required.

SOCI4015 Honours Thesis 3 ch (3S)
Under the direction of a supervisor, an Honours student carries out an approved project and completes and defends a thesis. Prerequisites: SOCI 1001 or equivalent, two-term courses in lower-level Sociology, SOCI 3000, SOCI 3104, SOCI 3105, and SOCI 4014, all with grades of C or better. CGPA of 3.0 or higher is required.

SOCI4023 Special Topics in Sociological Theory (O) 3 ch (3S)
Intensive study of a selected theorist or theory group or selected issues in sociological theory. Prerequisites: SOCI 1001 or equivalent, two-term courses in lower-level Sociology, SOCI 3000 and one term-course in upper-level Sociology, all with grades of C or better.

SOCI4263 Discourse and Text (O) 3 ch (3S)
Advanced studies in discourse and textual analysis. Topics may vary from year to year, but will typically cover a selection from the following intellectual schools: phenomenology, ethnomethodology, conversation analysis, discourse analysis, cultural studies, post-structuralism, deconstruction, and feminism. Prerequisites: SOCI 1001 or equivalent, two term-courses in lower-level Sociology, SOCI 3105, and two term-courses in upper-level Sociology, all with grades of C or better.

SOCI4363 Political Sociology (O) 3 ch (3C)
A comprehensive historical study of the political routes the major countries of the East and the West took to reach modern industrial society. Emphasis is on the interrelations of state power, class, ideology, and industrialization. Prerequisites: SOCI 1001 or equivalent, two-term courses in lower-level Sociology, and three term-course in upper-level Sociology, all with grades of C or better.

SOCI4503 Research Seminar in Popular Culture 3 ch (3S)
This course examines the daily cultural artifacts that surround us, their multitude of meanings, and their use by social actors. This course will provide a historical background for understanding contemporary popular culture, and will investigate current theoretical debates on mass culture, popular culture and postmodernism. Prerequisites: Sociology students - complete SOCI 1001 or equivalent, two-term courses in lower-level Sociology, SOCI 3000 and one of SOCI 3104 or 3105, all with grades of C or better. COMS Majors and Double-Major students - COMS 1001, COMS 1002, COMS 2001, COMS 3001 and COMS 3003, all with the grades of C or better.

SOCI4505 Society and Sex Work (O) (Cross-Listed: POLS 4505) 3 ch (3S)
Examines sex work as a social issue. Topics include radical, liberal and socialist feminist understandings of prostitution; sex workers' standpoints; criminological implications. Prerequisites: SOCI 1001 or equivalent, and two term-courses in lower-level Sociology, and three term-courses in upper-level Sociology, all with grades of C or better. Credit cannot be given for both SOCI 4505 and POLS 4505.

SOCI4555 Gender and Organization (O) 3 ch (3C)
An advanced focus on how gender and organization(s) are mutually constituting, and how other sources of diversity (e.g., race, sexual orientation, class) intersect with gender, informing organizational structures and processes and our experiences with them. Examines feminist critiques of gender and organizations.
of traditional approaches to organization; feminist conceptualizes of gender and organization; empirical studies of men and women in particular organizations (e.g., business, police, military, health care, educational organizations). Prerequisites: SOCI 1001 or equivalent, one of either SOCI 2501 or GEND 2001, one term-course in lower-level Sociology, and three term-courses in upper-level Sociology, all with grades of C or better.

SOCI4705 Sociology of Civilization (O) 3 ch (3C)
A comparative study of the cultural, political and economic heritage of world civilizations. Prerequisites: SOCI 1001 or equivalent, two term-courses in lower-level Sociology, and three term-courses in upper-level Sociology, all with grades of C or better.

SOCI2102 The Emergence of the Sociological Imagination 3 ch (3C)
An historical introduction to the people, places and ideas that inform modern sociology that is elaborated with reference to contemporary social life. Emphasis will be placed on North America and Europe from the nineteenth to the twentieth centuries; although, some reference may be made to similar ideas to developed in other places and times.

STATISTICS
NOTE: See beginning of Section F for abbreviations, course numbers and coding.

STAT1793 Introduction to Probability and Statistics I 3 ch (3C)
Concepts of population and sample, data collection, descriptive statistics and exploratory data analysis, frequency distributions, basic probability concepts, random variables, discrete and continuous probability models and their applications, central limit theorem and its applications and an introduction to statistical inference. NOTE: Credit can be obtained for only one of STAT 1793, STAT 2263, STAT 2593, BA 1605, PSYC 2901. Prerequisite: Grade 12 Mathematics.

STAT2263 Statistics for Health Sciences and Non-Science Majors 3 ch (3C)
An introductory course in statistics. Experiments, sampling, basic descriptive statistics. Probability, random variables, Normal distribution. Confidence intervals for means and proportions. Tests of hypotheses, paired samples vs. two independent samples. Contingency tables. Regression, correlation. Introduction to analysis of variance. Examples drawn from the health sciences. Use of a statistical computer package. NOTE: Credit can be obtained for only one of STAT 1793, STAT 2263, STAT 2593, BA 1605, PSYC 2901. Prerequisite: A New Brunswick high school mathematics course, either Pre-Calculus 110 or Foundations of Mathematics 120, or equivalent.

STAT2593 Probability and Statistics for Engineers 3 ch (3C)
Probability spaces: combinatorial probability, conditional probability, and independence. Random variables: discrete distributions, continuous distributions, expectation, variance, and covariance; linear combinations. Statistics: descriptive and graphical statistics; sampling; distributions. Inferential statistics: point estimation, confidence interval estimation; hypothesis tests; paired data designs; two sample inference, linear regression. NOTE: Credit can be obtained for only one of STAT 1793, STAT 2263, STAT 2593, BA 1605, PSYC 2901. Prerequisite: MATH 1013.

STAT2793 Introduction to Probability and Statistics II 3 ch (3C)
Concepts of estimation and test of hypothesis, sampling distributions, confidence interval estimation and test of hypothesis for proportion(s), mean(s) and standard deviation(s), association and trend analysis, elementary experimental designs and analysis of variance. NOTE: Credit can be obtained for only one of STAT 2793, BA 2606, PSYC 3913. Prerequisite: STAT 1793.

STAT3083 Probability and Mathematical Statistics I (A) 3 ch (3C)
The first half of a two-part sequence covering various topics in probability and statistics. This course provides an introduction to probability theory and the theory of random variables and their distributions. Probability laws. Discrete and continuous random variables. Means, variances and moment generating functions. Sums of random variables. Joint discrete distributions. Central Limit Theorem. Examples drawn from engineering, science, computer science and business. Prerequisites: MATH 1013 (or B+ or higher in MATH 1001) and one of STAT 1793, STAT 2263, STAT 2593, BA 1605, PSYC 2901; or permission of the instructor.

STAT3093 Probability and Mathematical Statistics II (A) 3 ch (3C)
The second half of a two part sequence covering various topics in probability and statistics. This course provides and introduction to essential techniques of statistical inference. Samples and statistics versus population and parameters. Distributions of functions and random variables. Sampling from the normal distribution. The t and F distributions. Point estimation by the method of moments and maximum likelihood estimation. Methods of evaluating point estimators. Finding and evaluating hypothesis tests and confidence intervals. Brief introduction to method of moments and maximum likelihood. Tests and intervals for means, variances and proportions (one and two sample). Regression models. Examples drawn from engineering, science, computer science, and business. Prerequisites: STAT 3083 and one of STAT 2793, BA 2606, PSYC 3913, STAT 2593; or permission of the instructor.

STAT3703 Experimental Design (A) 3 ch (3C)
Experimental Design methods and theory, one-way and two-way classification models, split plot designs, incomplete blocks, response surface designs. Special emphasis on applications. Prerequisite: One of STAT 2793, BA 2606, PSYC 3913, or STAT 3093.

STAT4043 Sample Survey Theory (O) 3 ch (3C)
Simple random sampling; stratified sampling; systematic sampling; multistage sampling; double sampling, ratio and regression estimates; sources of error in surveys. Prerequisite: One of STAT 2793, BA 2606, PSYC 3913, or STAT 3093.

STAT4203 Introduction to Multivariate Data Analysis (O) 3 ch (3C)
Multivariate normal distribution; multivariate regression and the analysis of variance; canonical correlations; principal components; classification procedures; factor analysis; computer applications. Student should have some exposure to matrix algebra. Prerequisite: One of STAT 2793/BA 2606/PSYC 3913 or STAT 3093, MATH 1503 or MATH 2213 (or permission of the instructor).

STAT4243 Statistical Computing (O) 3 ch (3C)
Course will include random number generation, simulation of random variables and processes, Monte Carlo techniques and integral estimation, the computation of percentage points and percentiles, as well as resampling methods. Prerequisites: One of STAT 2793/BA 2606/PSYC 3913/393 or STAT 3093, and CS 1073 or CS 1003 (or permission of the instructor).

STAT4703 Regression Analysis (A) 3 ch (3C)
Simple and multiple linear regression, least squares estimates and their properties, tests of hypotheses, F-test, general linear model, prediction and confidence intervals. Orthogonal and non-orthogonal designs. Weighted least squares. Use of a statistical computer package. NOTE: Credit can be obtained, for only one of STAT 4703, and ECON 4645. Prerequisite: One of STAT 2793/BA 2606/PSYC 3913/393 or STAT 3093 (or permission of instructor).

STAT4803 Topics in Statistics (O) 3 ch (3C)
Selected topics at an advanced level. Content will vary. Topic of course will be entered on student’s transcript. Course will be considered as an upper level elective for Information Sciences students and for Mathematics and Statistics Majors. Prerequisite: STAT 3093 or consent of instructor.

STAT4993 Project in Statistics 3 ch
Research project in Statistics carried out by the student under the supervision of a member of the Department. The student will submit a written report and make an oral presentation. Prerequisite: Normally 75% of total credits required in the program.

SURVEYING ENGINEERING
SE1001 Surveying I 5 ch (3C 3L)
Basic instrumentation, techniques and computations for plane surveying and small area topographic surveys. Introduction to electronic distance measurement and total stations; basic curves, area and volume computations.

UNIV
UNIV1003 Everything I Need to Know in First Year 3 ch (3C)
UNIV 1003 is a one-term course, open only to first-year students, which provides an introduction to the nature of university education. The course is designed to help new students better understand the learning process and acquire essential academic skills including research and writing skills. The course will support students as they examine challenges common in the university setting.

WORLD LITERATURE
WLIT2503 Introduction to Comparative Literature 3 ch
This course is an introduction to the discipline of Comparative Literature. Students will read representative works in a variety of genres from different cultures and historical periods.
SECTION F: SAINT JOHN COURSES

WLIT3314 European Romanticism 3 ch (3C)
A study of the literature, art, and music of the period 1770-1850 in Europe. Major themes may include individualism, Romantic heroism, revolution, folklore, childhood and nature.

WLIT3315 Nineteenth-Century Literature 3 ch (3C)
The development of Western literature, philosophy, and aesthetics during the second half of the nineteenth century, in the context of literary, philosophical, aesthetic, and social movements. Authors studied may include: Baudelaire, Sand, Mallarmé, Rachilde, Marx, Tolstoy, Nietzsche, Ibsen, Dostoevsky, Strindberg, Freud.

WLIT3725 Literature and/as Philosophy 3 ch (3C)
Through the study of specific authors, this course will be an examination of the manner in which these two humanities disciplines interact, enhance and mutually inform dialectical, analytic, and imaginative forms of thought. Authors and their texts may include de Beauvoir, Camus, Dostoevsky, Kundera, de Sade, Sartre, Tolstoy, Wollstonecraft.

WLIT3901 Studies in Comparative Literature 3 ch (3S)
An upper-level seminar on a specified topic. Please consult the discipline.

Undergraduate Degree Programs
The University offers courses of undergraduate instruction leading to the degrees of:

- Bachelor of Arts
- Bachelor of Applied Arts (Craft and Design)
- Bachelor of Arts and Science
- Bachelor of Business Administration
- Bachelor of Computer Science
- Bachelor of Geomatics
- Bachelor of Information Systems
- Bachelor of Integrated Studies
- Bachelor of Medical Laboratory Science
- Bachelor of Nursing
- Bachelor of Philosophy in Interdisciplinary Leadership
- Bachelor of Sports and Recreation Studies
- Bachelor of Science
- Bachelor of Science in Engineering
- Bachelor of Science in Environment and Natural Resources
- Bachelor of Science in Forestry
- Bachelor of Science in Forestry
- Bachelor of Science in Kinesiology
- Bachelor of Science in Software Engineering

Concurrent Undergraduate Degree Programs
The University offers a number of concurrent degree options:

- Bachelor of Arts/Bachelor of Science
- Bachelor of Arts/Bachelor of Computer Science
- Bachelor of Computer Science/Bachelor of Education
- Bachelor of Computer Science/Bachelor of Science in Engineering (Geodesy & Geomatics Engineering)
- Bachelor of Computer Science/ Bachelor of Science

Post-Graduate Bachelor’s Degree Program
- Bachelor of Education
- Juris Doctor

Degree and Diploma Programs within the School of Graduate Studies
- Doctor of Philosophy
- Master of Arts
- Master of Arts in Sport and Recreation Administration
- Master of Business Administration
- Master of Computer Science
- Master of Education
- Master of Engineering
- Master of Forestry
- Master of Forest Engineering
- Master of Nursing
- Master of Philosophy
- Master of Science
- Master of Science in Forest Engineering
- Master of Science in Forestry
- Master of Science in Engineering
- Master of Science in Exercise and Sports Science
- Postgraduate Diploma in Land Information Management
- Postgraduate Diploma in Forest Management

Honorary Degrees
The degrees of Doctor of Science, Doctor of Letters, Doctor of Civil Law and Doctors of Laws are the Honorary degrees conferred from time to time by the University upon persons who have achieved distinction in scholastic public service.

Other Programs
- Art and Design
- Certificate in Academic Proficiency in Hydrographic Surveying
- Certificate in Adult Education
- Certificates in Business Administration, Level I and II
- Certificate in Business Administration and Aviation
- Certificate in Computer Telephony Integration
General Information

The Bachelor of Arts (BA) degree at UNB Fredericton may be earned for study in humanities, languages, sciences, social sciences, or interdisciplinary programs. Within the different branches of knowledge, a collection of some thirty different disciplines at UNB (Fredericton campus) offers students an opportunity for the learning experience of their choice, in preparation for their personal academic goals, which may include:

- entry into advanced professional programs (such as architecture, business, education, journalism, law, divinity, social work, etc.);
- employment in the broad and growing number of career fields which require the skills developed in an Arts degree—the ability to critically analyze a text, to research a topic, to communicate orally and in writing, to work independently or on a team, to apply general principles to a specific problem, to demonstrate flexibility, to adapt to and grow in new situations, and to take initiative;
- admission into graduate training and research in their chosen discipline.

The structure of the four-year Bachelor of Arts program encourages Arts students to gain a basic understanding of a variety of academic disciplines as they begin their studies, and then to focus on one or two of those disciplines as they complete the degree requirements. Years 1 and 2 lay a foundation by broadening students’ perspectives on the many different ways we have of understanding the world and by strengthening the thinking and communication skills necessary for the students’ success in university and beyond. Years 3 and 4 build on that broad foundation by further developing the students’ understanding of the approaches, methodologies, and subject matter of the discipline(s) chosen by the students to be their central area(s) of interest—their “Major(s).” An even more intensive specialization is possible for students who maintain high grades, if they chose to complete their degree “with Honours.” Students may also choose to complement their Major or Honours subject(s) with a Minor in another discipline.

The BA program may also be combined with complementary fields in other degree programs:

- BAA (Bachelor of Applied Arts (Craft and Design))—a four-year articulated degree program (offered in co-operation with the New Brunswick College of Craft and Design) offering a unique combination of the traditional strengths of liberal arts education with practical experience in studio art courses;
- BAS (Bachelor of Arts and Science) — a four-year joint degree program (offered in co-operation with the Faculty of Science) which offers a chance to gain broader experience of academic work in both faculties;
- BA/BCS (Bachelor of Arts/Bachelor of Computer Science) — a five-year concurrent degree program (offered in co-operation with the Faculty of Computer Science) which leads to both a BA and a BCS; it combines in-depth scientific training with the development of sophisticated analytical, communication, and critical skills;
- BA/BSc (Bachelor of Arts/Bachelor of Science) — a five-year concurrent degree program (offered in co-operation with the Faculty of Science) which leads to both a BA and a BSc; it provides an academic framework for students who have a strong interest in one of the Science disciplines and in one of the Arts disciplines and want to work in both.
I. This section outlines what students need to do to complete a BA degree at UNB on the Fredericton campus; all students are encouraged to review carefully the regulations in this section, to seek assistance regularly from Faculty and Department advisors, and to take overall responsibility for their own progress through the degree program. While UNB makes every effort to ensure that academic advice is available to all students, it remains the students’ responsibility to seek such advice and to ensure they fully understand what is required of them. (Any matter not addressed by the General Regulations of the Arts Faculty will be governed by the General University Regulations in Section B of this Calendar. Questions concerning the application of regulations should be directed in writing to the Associate Dean of Arts.)

II. The BA degree requires the successful completion of both (a) the general Arts Faculty requirements and (b) the specific requirements of an Honours/Major program. The general Arts Faculty requirements include

- the first-year and second-year distribution requirements (see below under First-Year Regulations and Second-Year Regulations);
- the successful completion of at least 51 credit hours (ch), and normally 60 ch, of upper level courses (3000 or higher); and
- the successful completion overall of at least 120 ch of approved courses with a Cumulative Grade Point Average (CGPA) of 2.0 (C) or higher.

The specific Honours/Majors requirements are described by Department or Program in the Programs of Study section, below.

III. Students should note the following additional regulations:

1. In the Faculty of Arts, almost all courses are given a weighting of 3 ch per term, so that a one-term course normally counts for 3 ch, and a full-year course for 6 ch. Courses taken outside the Faculty of Arts with a weighting of 3-5 ch (one term) receive a value of 3 ch towards the BA degree; those with a weighting of 6-8 ch (full-year) receive a value of 6 ch toward the BA degree. Courses taken outside the Faculty of Arts with a weighting of 1 or 2 ch do not count toward the BA.

2. The regular academic year, from September to April, is made up of two terms: Fall and Winter. The typical course load for a student is 15 ch (or five 3-ch courses) each term. A student may register for up to 18 ch each term and must register for at least 12 ch each term to be considered full-time (for tuition purposes).

3. As far as possible, requirements should be completed in sequence: first-year distribution requirements; then second-year distribution requirements; then upper-year courses to complete Major(s) or Honours requirements.

4. With the exception of laboratory courses and field schools, any appropriate courses completed successfully in the Faculties of Science or Computer Science may be counted toward a BA degree. In addition, if a student completes the requirements for a Minor in Business (24 ch), the full Minor will count towards the BA; otherwise, no more than 12 ch of courses in Faculties other than Arts, Science, and Computer Science may be counted toward the completion of the BA.

*Indicates a BA specializing in one of the Science disciplines. Interested students should direct their inquiries to the Department concerned.

**Indicates subjects which are available only as part of a Joint Honours or Double Major program.

SECTION G: FREDERICTON ACADEMIC PROGRAMS

5. Only students completing a BA degree may earn a Major or Honours designation in an Arts discipline, with the following exceptions: students may complete a BBA in Economics or in Law in Society; students may complete a BSc in Economics or in Psychology.

6. Students who have successfully completed the First Year (30 ch) of the BA program on the Saint John campus of UNB shall have their full First Year accepted as equivalent to that offered in Fredericton.

7. To complete the BA degree, students transferring from another university should note that at least 60 ch of the total credit hours, at least 30 ch of the upper-level courses, and at least half of the courses counting towards their Majors, Honours, and/or Minor, must be taken at UNB.

FIRST-YEAR REGULATIONS (1-30 Credit Hours)

The first year is designed to offer a strong, broad-based core of knowledge and skills from various Arts disciplines and to provide a foundation for the remainder of the degree program. To fulfill the Faculty’s distribution requirements, students should choose their first-year courses (the first 30 ch) as follows:

1. 6 ch - ARTS 1000.
2. 18 ch - Six credit hours in each of three different disciplines. Three of the four groups of disciplines (A, B, C, D) listed below must be represented.
3. 6 ch - The remaining six credit hours may be taken in one discipline from any of Groups A, B, C, or D, or taken as three credit hours in each of two disciplines, including Drama, Gender and Women’s Studies, IDS and Music. In either case, the discipline(s) should be different from the three taken under regulation 2, above, since first-year students may take no more than 6 ch in any one discipline.

OR

1. 9 ch - ARTS 1100
2. 18 ch - Six credit hours in each of three different disciplines. Three of the four groups of disciplines (A, B, C, D) listed below must be represented.
3. 3 ch - The remaining three credit hours may be taken in one discipline from any of Groups A, B, C, or D, including Drama, Gender and Women’s Studies, IDS and Music. The discipline should be different from any of the three taken under regulation 2, above, since first-year students may take no more than 6 ch in any one discipline.

NOTES:

1. Other languages such as Arabic, Maliseet, and Mi’kmå may be taken to satisfy the requirements of Group A.
2. Laboratory courses taken in other Faculties will not be counted in the credit hour total but will be counted in the calculation of the Grade Point Average (GPA) for the BA program.

SECOND YEAR REGULATIONS (31-60 Credit Hours)

Students may choose their second-year courses from the disciplines listed under the First-Year regulations, as well as from Drama, Film, Music, International Development Studies, Law in Society, and Gender and Women’s Studies. To fulfill the Faculty’s distribution requirements, students should choose their courses as follows:

1. 18 ch - Six credit hours in each of three disciplines
2. 12 ch - At least three credit hours in a fourth discipline; the remaining credit hours may be elective courses in any discipline, as long as no more than 12 ch of the 30 ch total are taken in any single discipline.

During the Winter term of their second year, students must consult with the academic advisor(s) in the discipline(s) in which they intend to complete a Major or Honours program in their final two years, in order to declare a
FA: The Honours degree requires a GPA of 3.6 in the courses of the Honours subject or subjects, excluding introductory courses. For an Honours degree an average of 3.0 is required in these courses. Averages in the Honours subject(s) are calculated on the basis of the minimum number of credit hours required by individual Departments or Interdisciplinary Programs; credit hours successfully completed above this minimum are treated as “non-required” courses. Students are required to maintain a GPA of 2.5 in “non-required” courses taken for credit hours 31-120. Courses which Honours students are obliged to take must be counted as part of the minimum number of credit hours for the purpose of calculating the GPA in the Honours courses. The recommendation to award an Honours degree will be made to the Dean of Arts by the Department(s) concerned. In the case of Joint Honours, the standing is determined by the overall average in the courses required to fulfill the minimum requirements in both programs, and is subject to the agreement of both Departments (or of the Department and the Interdisciplinary Program) concerned.

Regulations for Granting a Second UNB Bachelor of Arts Degree

BA graduates of UNB may apply for admission to and follow a program towards a second BA degree under the following regulations:

- The general regulations of the University must be satisfied.
- The regulations of the Degree program and Departmental regulations concerning Major or Honours must be satisfied. Normally, the minimum number of credit hours to be successfully completed beyond the work required for the previous degree will not be less than the normal load of the final academic year in the degree program concerned (typically, 30 ch). More than the minimum number of credit hours may be required.
- The courses taken must be approved by the Dean and the Department(s) (or the Department and the Interdisciplinary Program) offering the Major or Honours program.
- The general regulation that at least half the credit hours for a degree must be taken at this University still applies.

Candidates for a second undergraduate degree may not choose a Major or Honours in the same discipline as in the first undergraduate degree, whether the first degree involved a Single or Double Major or Single or Joint Honours. Candidates may not choose a Major or Honours in a discipline in which they previously completed a Minor.

Students must apply to the Associate Registrar (Admissions) for entry to the second degree program.

Only under special circumstances will students be admitted to a third undergraduate degree program. After completing a first degree, students may be permitted to upgrade a Minor to a Major or Honours, or to upgrade a Major to Honours, but in either case a notation only will be included on the student record and a second degree will not be awarded.

FACULTY

- Betts, Matthew, BA (Toronto), MA (Toronto), PhD (Toronto), Adj. Prof - 2008
- Black, David, BA (Simon Fraser), MA, PhD (McMaster), Honorary Research Professor - 2016

238
remain in the Honours program, a student must maintain a grade point equivalent (GPA) and at least 24 ch of upper level Anthropology courses. Upper level courses must include Anthropology courses and approved substitutes, with no grade lower than C (2.0) in a required upper-level course.

To graduate in Anthropology, students must complete at least two first level courses. Upper level courses frequently require specific first and second level courses as Prerequisites. Students should take note of these requirements when planning their studies.

**General Information**

Anthropology is the global study of the human condition, including biological and cultural similarities and differences in the past and the present. The Department of Anthropology offers comprehensive programs in three sub-fields:

- sociocultural anthropology is the study of contemporary and recent cultures around the world;
- archaeological anthropology is the study of human cultures through material remains;
- biological anthropology is the study of human biological diversity in the framework of human evolution;

**Courses in Area Ethnographies**

ARTH 2052 through ANTH 3704 are intended to provide a general knowledge of the societies and cultures of selected geographical regions. These courses are designed for non-Majors as well as for Anthropology Majors and Honours students. **NOTE** that there are no Prerequisites for these courses.

**Prerequisites**

To graduate in Anthropology, students must complete at least two first level courses. Upper level courses frequently require specific first and second level courses as Prerequisites. Students should take note of these requirements when planning their studies.

**Credit in Classics and Ancient History**

Students interested in the anthropology subfield of Anthropology might also wish to take courses in Classical Archaeology of the Department of Classics and Ancient History. With permission from the Anthropology Undergraduate Advisor, a maximum of 12 ch advanced CLASS courses in archaeology may be counted for credit in programs in the Department of Anthropology. Likewise, up to a maximum of 12 ch advanced ANTH archaeology courses may be counted for credit in programs in the Department of Classics and Ancient History. Consult the CLAS section of the calendar for relevant regulations. A Double Major or Joint Honours in Anthropology and Classics/Classical Studies is an option.

**Minors, Majors and Honours Programs**

**Minor**

To Minor in Anthropology, a student must successfully complete both ANTH 1001 and ANTH 1002 (or equivalent) and at least 18 ch of upper level Anthropology courses, with a grade of 2.0 (C) or better in each course.

**Single Major and Double Major**

For a single Major in Anthropology, or to complete the Anthropology component of a Double Major with another discipline, a student must successfully complete both ANTH 1001 and ANTH 1002 (or equivalent) and at least 24 ch of upper level Anthropology courses, with a grade of C (2.0) or better in each course.

**Honours**

Students wishing to be admitted to Honours should review the regulations concerning the BA Honours Program in this Calendar and apply in writing to the Department of Anthropology’s Honours and Majors Advisor.

**Single Honours**

To earn an Honours degree in Anthropology, a student must successfully complete both ANTH 1001 and ANTH 1002 (or equivalent) and at least 36 ch of upper level Anthropology courses. Upper level courses must include ANTH 5701, ANTH 5303 or ANTH 5704. To remain in the Honours program a student must maintain a grade point average of at least B (3.0) in Anthropology courses and approved substitutes, with no grade lower than B- (2.7) in a required upper-level course.

**Joint Honours**

To graduate with Joint Honours in Anthropology and another discipline, a student must successfully complete both ANTH 1001 and ANTH 1002 (or equivalent) and at least 24 ch of upper level Anthropology courses. Upper level courses must include ANTH 5701, ANTH 5303 or ANTH 5704. To remain in the Honours program, a student must maintain a grade point average of at least B (3.0) in Anthropology courses and approved substitutes, with no grade lower than B- (2.7) in a required upper-level course.

**ARCHAEOLOGY**

**NOTE:** ADMISSION TO THE ARCHAEOLOGY PROGRAM AND ALL RELATED MINORS HAS BEEN SUSPENDED EFFECTIVE SEPTEMBER 1, 2018. FOR FURTHER INFORMATION PLEASE CONTACT THE DEAN OF ARTS.

This Inter-Departmental program has been terminated, however, students can still obtain courses/credit in both Anthropology and Classics and Ancient History.

**ARCHAEOLOGY INTERDEPARTMENTAL PROGRAM**

**FACULTY**

- Susan Blair - Department of Anthropology - sbair@unb.ca
- Gabriel Hyrnick - Department of Anthropology - gabriel.hyrnick@unb.ca
- Matthew Sears - Department of Classics and Ancient - matthew.sears@unb.ca
- Maria Papaioannou - Department of Classics & Ancient History - mariaps@unb.ca

**Archaeology Program Advisor**

- Maria Papaioannou - Department of Classics and Ancient History - mariaps@unb.ca

The Archaeology Interdepartmental Program offers a comprehensive, four-year curriculum covering anthropoligical archaeology, classical archaeology and related subjects. The core of the program is offered through the departments of Anthropology and Classics and Ancient History. Students have a choice of Minor, Major, Double Major, Honours or Joint Honours study, with emphasis in either an Anthropological Archaeology stream or a Classical Archaeology stream. The first two years of the program are comprised of required courses, which provide foundational overviews of the discipline of Archaeology. While the upper-level program structure allows students to specialize in one of the two streams (Anthropological or Classical archaeology), students are required to take upper-level courses from both streams.

**Minors, Majors and Honours Program**

**MINOR PROGRAM IN ARCHAEOLOGY**

The Minor in Archaeology consists of 24 ch of courses, forming a coherent sequence, distributed as follows:

- 6 ch of 1000-level archaeology;
- 6 ch of 2000-level archaeology;
- 12 ch of 3000-level archaeology;

Students must achieve a grade of C or better in each individual course.

**MAJOR AND HONOURS PROGRAMS IN ARCHAEOLOGY**

**Lower-Level Requirements:**

**1000-Level Requirements:** ARCH (ANTH) 1303 and ARCH (CLAS) 1323

**2000-Level Requirements:** ARCH (ANTH) 2303 and ARCH (CLAS) 2333

**Upper-Level Requirements:**

- **Major:** Students typically enter the Major program prior to beginning the final 60 ch of undergraduate study, preferably during the Winter term of the second year, and after consultation with the Archaeology Program Advisor. The Major in Archaeology consists of 24 ch of upper-level courses, distributed as follows:
  - 15 ch in the student's chosen Archaeology stream;
  - 9 ch in the other Archaeology stream;

Students must achieve a grade of C or better in each individual course.

- **Double Major:** Students may undertake Double Major study in Archaeology and another discipline; Archaeology requirements are the same as for a Major.

- **Honours:** Students seeking admission to the Honours program are strongly encouraged to apply before completing the first 60 ch of undergraduate study, preferably during the Winter term of the second year, by meeting with the Archaeology Program Advisor. To be eligible for admission to the Honours program, students must have:
  - completed 60 ch of undergraduate study with a cumulative GPA 2.5 or higher;
  - completed at least 12 ch of Archaeology course work with a cumulative GPA of 3.0 or higher in Archaeology courses.

For admission to Honours, students must apply in writing to the Archaeology Program Advisor.

The Honours program in Archaeology consists of 36 ch of upper-level courses, distributed as follows:

- 24 ch in the student's chosen Archaeology stream;
- 12 ch in the other Archaeology stream;
- the above must include ANTH 5303 and CLAS 5013;
- at least 3 ch of the above must be a recognized course involving archaeological field research, or an acceptable equivalent; ↑

239

**SECTION G: FREDERICTON ACADEMIC PROGRAMS**
SECTION G: FREDERICTON ACADEMIC PROGRAMS

- in addition to the upper-level requirements listed above, students must complete at least 3 ch of a science, an applied science, computing, statistics, or a technical subject relevant to archaeological practice. †

Students must achieve a grade of B- or better in each individual course.

**Joint Honours** Students may undertake Joint Honours study in Archaeology and another discipline. The Archaeology requirements for Joint Honours include 27 ch of upper-level courses, as distributed as follows:

- 18 ch in the student's chosen Archaeology stream;
- 9 ch in the other Archaeology stream;
- the above must include either ANTH 5303 and CLAS 5013;
- at least 3 ch of the above must be a recognized course involving archaeological field research, or an acceptable equivalent. †

Students must achieve a grade of B- or better in each individual course.

†This requirement may be satisfied through completing a field school program offered by Anthropology or by Classics & Ancient History, or through field schools offered by other universities or research institutions, or through field experience gained in a non-university setting, such as employment on government-sponsored or private-sector cultural resource management-based archaeological projects. Students should consult the Archaeology Program Advisor in advance with regard to fulfilling this requirement.

‡Examples of UNB courses that fulfill this requirement: introductory biology, geology, chemistry or physics courses; introductory computer science; STAT 2043; MATH 1003; PSYC 2113; ANTH 3052; BIOL 4352; GGE 1001, 2423; FNAT 2703. Students should consult the Archaeology Program Advisor with regard to fulfilling this requirement.

### CLASSICS AND ANCIENT HISTORY

#### DEPARTMENT OF CLASSICS AND ANCIENT HISTORY

**General Office:** Carleton Hall, Room 209

**Mailing Address:** Department of Classics and Ancient History University of New Brunswick P.O. Box 4400, Fredericton, New Brunswick, Canada E3B 5A3

**Phone:** (506) 453-4763

**Fax:** (506) 447-3052

**Email:** classics@unb.ca

**Website:** [http://www.unb.ca/fredricton/arts/departments/classics/index.html](http://www.unb.ca/fredricton/arts/departments/classics/index.html)

**Chair:** Maria Papaioannou

**FACULTY**

- Kerr, William G., BA (Tor), MA, PhD (Prin), Assoc Prof - 1987
- MacDonald, Carolyn, BA (King's/Dal), MA, PhD (Stanford), Assoc Prof - 2016
- Papaioannou, Maria, BA (Thessalonike), MA, PhD (UBC), Assoc Prof - 2005
- Sears, Matthew A., BA (UNB), PhD (Cornell), Assoc Prof - 2013

**General Information**

**“Classics”**

- is the study of the ancient civilizations of Greece and Rome through their literary and material remains
- embraces the entire history of these civilizations as well as their continuing influence on modern society
- offers a multicultural, interdisciplinary approach to the classical world through the study of languages, history, literature, mythology, religion, archaeology, art, and philosophy

**Courses Offered**

- Latin [LAT]: students are taught [in English] to read and write Classical Latin. Students without previous experience in this language begin the study of Latin with LAT 1103.
- Greek [GRK]: students are taught [in English] to read and write ancient Greek. Students without previous experience in this language begin the study of Greek with GRK 1203.
- Modern Greek [GRKM]: through the auspices of the Centre for Hellenic Studies at UNBF, students are taught [in English] to read, write, and speak Modern Greek. Students without previous experience in this language begin the study of Modern Greek with GRKM 1003.
- Classics [CLAS]: students study the political, social, and cultural life of the Greeks and Romans through lectures, visual illustrations, and assigned readings in English translation. Students begin with the study of the Classical Civilizations in any introductory course (CLAS 1323, 1403, 1413, or 1503).

Selected advanced CLAS courses may be counted for credit in programs in the Department of History, up to a maximum of 12 ch. Consult the History section of the calendar for a list of these courses.

**Credit in Anthropology**

Students interested in Classical Archaeology might also wish to take Archaeology courses from the Department of Anthropology. With permission of the Classics Undergraduate Advisor, advanced ANTH courses in Archaeology may be counted for credit in programs in the Department of Classics and Ancient History, up to a maximum of 12 ch. Likewise, selected advanced CLAS Archaeology courses may be counted for credit in programs in the Department of Anthropology, up to a maximum of 12 ch. Consult the ANTH section of the calendar for relevant regulations. A Double Major or Joint Honours in Anthropology and Classics/Classical Studies is possible.

**Programs of Study**

Students should be aware of the difference between the two program options offered by the Department, as well as the options for a focus on Classical Archaeology.

**Classics**

Classics is the study of the ancient Mediterranean world through literary and material remains. Of central importance to the study of Greece and Rome is a knowledge of the works of ancient authors such as Homer and Herodotus, Vergil and Cicero in their original languages. The program in Classics emphasizes the study of ancient Greek and Latin language. Students wishing to pursue the study of Classics at the highest level, including in Graduate School, or even to experience the ancient world in the original languages, are advised to begin their study of Greek and Latin as early as possible in their degree program. Students also have the opportunity to participate in a Travel Study Program to Greece or Rome and in summer archaeological field-schools in the Mediterranean.

**Classical Studies**

Classical Studies is the study of the ancient Mediterranean world through literary and material remains. Students in Classical Studies have far lighter requirements in Greek and Latin language (in fact, no language requirements at the Major or Minor levels). Instead, Classical Studies students can experience the ancient world through the department’s wide range of courses on the societies of Greece and Rome and their neighbours. Students in the Classical Studies program may, of course, still take courses in Greek and Latin language, which can count towards their degree requirements. Students also have the opportunity to participate in a Travel Study Program to Greece or Rome and in summer archaeology field-schools in the Mediterranean.

**Classical Archaeology**

Classical Archaeology: Classical Archaeology is the study of the ancient Mediterranean world through the scientific study of material remains. Through either the Classics or Classical Studies Program, students have the opportunity to delve into the world of the art and architecture of these civilizations, explore the scientific methods of identifying and excavating sites, learn about the engineering feats of the Greeks and Romans, become acquainted with the various biological sciences (i.e., botany and forensic anthropology) and scientific dating methods used in the study of human remains, dive into the world of ancient shipwrecks, all to unravel the mysteries of these ancient civilizations. Students also have the opportunity to participate in a Travel Study Program to Greece or Rome and in summer archaeology field-schools in the Mediterranean. Students interested in archaeology may also wish to take courses in Archaeology from the Department of Anthropology. A Double Major or Joint Honours program in Classics/Classical Studies and Anthropology is possible.

**Honours, Majors and Minors**

**NOTE:** The Department of Classics and Ancient History requires a grade of C- or above in all courses that count towards Major or Honours requirements.

**Honours**

Students normally apply for admission to an honours program in Classics or Classical Studies during their second year, pending their successful completion of 60 ch of university study with a CGPA of at least 2.5. Admission to the Honours programs normally requires the completion of at least 12ch of courses taught in the Department of Classics or Ancient History, including at least 6 ch of a Classical language for those students choosing the CLASSICS option.

**Honours in Classics**

An Honours in Classics required 57 ch, distributed as follows.

- 6 ch of lower level CLAS
- 12 ch LAT 1103/1113 and GRK 1203/1213
- 12 ch LAT 2305/3105 and GRO 2205/3205
- 3 ch more LAT or GRK
A Joint Honours in Classics and another discipline required 48 ch, distributed as follows:
- 6 ch lower-level CLAS
- 12 ch LAT 1103/1113 and GRK 1203/1213
- 12 ch LAT 2105/3105 and GRK 2205/3205
- 18 ch upper-level CLAS or LAT or GRK

Honours in Classical Studies
An Honours in Classical Studies required 54 ch, distributed as follows:
- 6 ch of lower-level CLAS
- 12 ch LAT 1103/1113 or GRK 1203/1213
- 42 ch of upper-level CLAS or LAT or GRK (including at least 3 ch from EACH of the three course categories, and CLAS 4403 [or equivalent]) (LAT/GRK courses at 2000-level may count toward the upper-level requirements)

A Joint Honours in Classical Studies requires 42 ch, distributed as follows:
- No ancient language requirements
- 6 ch of lower-level CLAS or LAT or GRK
- 36 ch upper-level CLAS or LAT or GRK (LAT/GRK courses can be at 2000 level )

Majors
Students wishing to Major in Classics or Classical Studies normally declare their major during their second year after they have seen their Department advisor.

Major in Classics
A major in Classics requires 51 ch, distributed as follows:
- 6 ch of lower-level CLAS
- 12 ch of LAT1103/1113 and GRK 1203/1213
- 6 ch of LAT 2105/3105 or GRK 2205/3205
- 27 ch upper-level CLAS or LAT or GRK (including at least 3 ch from EACH of the three course categories)

A Double Major in Classics and another discipline requires 45 ch, distributed as follows:
- 6 ch in lower-level CLAS
- 12 ch LAT 1103/1113 and GRK 1203/1213
- 6 ch LAT 2105/3105 or GRK 2205/3305
- 21 ch upper-level CLAS or LAT or GRK

Major in Classical Studies
A Major in Classical Studies requires 42 ch, distributed as follows:
- 6 ch of lower-level CLAS or LAT or GRK
- 30 ch upper-level CLAS or LAT or GRK (including at least 3 ch from EACH of the three course categories) (LAT/GRK courses at 2000-level may count toward the upper-level requirements)
- 6 ch of additional CLAS or LAT or GRK at any level

A Double Major in Classical Studies and other discipline requires 36 ch, distributed as follows:
- 6 ch of upper-level CLAS or LAT or GRK
- 24 ch of upper-level CLAS or LAT or GRK (LAT/GRK courses at 2000-level may count toward the upper-level requirements)
- 6 ch of additional CLAS or LAT or GRK at any level

Minor
A Minor in Classics requires 24 ch, distributed as follows:
- 12 ch LAT and/or GRK
- 12 ch upper-level CLAS or LAT or GRK (LAT/GRK courses at the 2000-level may count toward the upper-level requirements)

A Minor in Classical Studies requires 24 ch, distributed as follows:
- 12 ch of upper-level CLAS or LAT or GRK (LAT/GRK courses at the 2000-level may count toward the upper-level requirements)
- 12 ch additional CLAS or LAT or GRK at any level.

A Minor in Ancient Philosophy consists of 24 ch of courses offered by the Department of Classics & Ancient History and the Department of Philosophy as follows:
- 6 ch of introductory Philosophy: PHIL 1101, PHIL 1301.
- 6 ch of ancient language: GRK 1203/GRK 1213 or LAT 1103/LAR 1113 or any other 6 ch of Greek and/or Latin.
- 6 ch of advanced Philosophy (PHIL) courses, including at least one of PHIL 3301, PHIL 3302, PHIL 3305, PHIL 3306, PHIL 3311.

UNB TERM IN ATHENS
The Department of Classics & Ancient History, in cooperation with other departments in the Faculty of Arts at UNBF, offers students an opportunity to spend a term in Athens studying UNB courses offered by UNB professors. Each student participant enrolls in an integrated 15 ch program which combines classroom work in state-of-the-art teaching facilities with field trips, cultural experiences, extended travel to other areas of Greece, and a cruise visiting several Aegean islands.

The program includes:
- 3 credit hours of language study: GRKM 1003: Modern Greek I - An introduction to language skills which will enable students to gain a basic ability to speak read and write the language of modern Greece. [Prerequisites: none]
- 6 credit hours of classical archaeology and art history: CLAS 3603: The Art and Architecture of Greece I - A survey of outstanding examples of the art and architecture of Greece at important archaeological sites and in major museums in Greece. [Prerequisites: successful completion of 30 ch of university courses]; CLAS 3605: Ancient Athens - A practical workshop introducing students to the ancient city's Greek and Roman remains which are found at archaeological sites and museums in and around Athens. [Prerequisites: successful completion of 30 ch of university courses]
- 6 credit hours in the discipline of the collaborating department: The collaborating department will vary from year to year. Students are encouraged to enquire concerning departmental plans in future years.

Courses will be conducted both in the classroom and "on-site", and will include standard UNB reading and writing assignments and final examinations. NOTE that travel costs are not included in the tuition for these course.

COMPARATIVE CULTURAL STUDIES
General Information
The program in Comparative Cultural Studies is dedicated to the interdisciplinary study of cultures and cultural forms in a cross-cultural perspective. Students learn about culture(s) and arts across time and geographic origin, in a range of contexts and expressions, through practical and theoretical perspectives. Along with the study of a second language, students will pursue courses in a diverse range of disciplines including popular culture, cultural theory, literature, music, and film, all primarily from
SECTION G: FREDERICTON ACADEMIC PROGRAMS

a cross-cultural perspective. It is through critical comparative analysis and study that we can truly begin to understand ourselves and our own traditions, identities, and realities alongside those of others. With an international and comparative focus, this program will allow students to view their world in new and exciting ways. We also encourage students to participate in travel study and exchange programs whenever possible.

Programs of Study

Honours, Majors, and Minors

Students interested in Comparative Cultural Studies have the following options:

- Honours in Comparative Cultural Studies
- Honours in Comparative Cultural Studies (German or Spanish option)
- Major in Comparative Cultural Studies
- Major in Comparative Cultural Studies (German or Spanish option)
- Minor in Comparative Cultural Studies

Honours programs are intended for students who are interested in a concentrated course of study.

The German and Spanish options are designed to allow students with an interest in one of these areas to concentrate their 15 ch of CCS elective courses and have this recognized on their transcript. All students electing the German or Spanish option still complete all of the core courses for the general Comparative Cultural Studies program.

The Minor, which consists of 24 ch of CCS courses, is for students majoring in other disciplines.

Joint Honours and Double Majors with Comparative Cultural Studies are also possible.

NOTE: Students may take up to 6ch of their program electives outside the department with permission of the program director.

Honours Program

Admission to the Honours Program in Comparative Cultural Studies is open to qualified students who have completed 45 ch of courses toward the BA degree. Normally students will have completed (or be in process of completing) 12 ch in lower-level CCS courses and 12 ch in a second language. Students should normally apply for admission to the Comparative Cultural Studies Honours Program in their fourth term and will enter the program during their third year, if they qualify.

To be admitted to Honours, students must have achieved an average of 3.3 (B+) in their Comparative Cultural Studies courses. Students must maintain an average of 3.3 in CCS courses and of 2.5 in non-CCS courses in order to maintain Honours standing.

The Honours in Comparative Cultural Studies requires the completion of 48 ch of CCS courses. Specific requirements are as follows:

Each student’s program of study must be approved by the program advisor.

Honours (48 ch plus 12 ch in an additional language)

Lower Level
- CCS 2021
- 9 ch of additional 1000- or 2000-level CCS courses
- 12 ch in an additional language

Upper Level
- CCS 3021 and CCS 3023
- 9 ch chosen from CCS 3011, CCS 3065, CCS 3794, CCS 3795, CCS 3909, CCS 3064, CCS 3904
- 15 ch of additional upper-level CCS electives
- CCS 5000

[To complete an Honours program in CCS with a concentration in German or a concentration in Spanish, students must complete 12 ch of courses in the relevant language and 15 ch of upper-level electives in the chosen concentration. See the lists below under “Optional Concentrations.”]

Joint Honours (42 ch plus 12 ch in an additional language)

Lower Level
- CCS 2021
- 6 ch of additional 1000- or 2000-level CCS courses
- 12 ch in an additional language

Upper Level
- CCS 3021 and CCS 3023
- 6 ch chosen from CCS 3011, CCS 3065, CCS 3794, CCS 3795, CCS 3909, CCS 3064, CCS 3904
- 18 ch of additional upper-level CCS electives
- CCS 5000 (optional)

Major Program

A Major in Comparative Cultural Studies requires the completion of 42 ch of CCS courses, with a grade of C or better in each. The specific requirements are as follows:

Major (42 ch plus 12 ch in an additional language)

Lower Level
- CCS 2021
- 9 ch of additional 1000- or 2000-level CCS courses
- 12 ch in an additional language

Upper Level
- CCS 3021 and CCS 3023
- 9 ch chosen from CCS 3011, CCS 3065, CCS 3794, CCS 3795, CCS 3909, CCS 3064, CCS 3904
- 15 ch of additional upper-level CCS electives

Double Major (36 ch plus 12 ch in an additional language)

Lower Level
- CCS 1021 and CCS 2021
- 9 ch of additional 1000- or 2000-level CCS courses
- 12 ch in an additional language

Upper Level
- CCS 3021 and CCS 3023
- 6 ch chosen from CCS 3011, CCS 3065, CCS 3794, CCS 3795, CCS 3909, CCS 3064, CCS 3904
- 12 ch of additional upper-level CCS electives

Optional Concentrations

Students completing a Major or Honours in Comparative Cultural Studies can receive an additional concentration by meeting all of the criteria for the Major or Honours listed above plus the criteria listed below:

CCS: German

- Complete 12 ch of German language courses

For their 15 ch of elective courses:

- Complete CCS 3061 or CCS 3071
- Complete the remaining 12 ch of additional courses selected from the following list:

German Concentration Electives*

*With prior permission, students may take up to two courses from outside the department to satisfy the requirements for the concentration.

Combined CCS/MAAC programs

In addition to pursuing joint study with other programs, students have the opportunity to complete a Double Major or Joint Honours in the Department of Culture and Media Studies’ two interdisciplinary programs: Comparative Cultural Studies and Media Arts & Cultures. Because the two programs already share a set of core courses, the unique guidelines for combining the two are outlined below.

Double Major in CCS and MAAC

Lower Level
- CCS/MAAC 2021
- 9 ch of additional 1000- or 2000-level CCS courses
- 9 ch of additional 1000- or 2000-level MAAC courses
- 12 ch in an additional language

Upper Level
- CCS/MAAC 3021, CCS 3023, MAAC 3101
- 6 ch chosen from CCS 3011, CCS 3065, CCS 3794, CCS 3795, CCS 3909, CCS 3064, CCS 3904
- 18 ch of additional upper-level CCS electives
- 18 ch of additional upper-level MAAC electives
Students should be careful not to double-count any courses cross-listed as both CCS and MAAC.

**Joint Honours in CCS and MAAC**

**Lower Level**
- CCS/MAAC 201
- 6 ch of additional 1000- or 2000-level CCS courses
- 6 ch of additional 1000- or 2000-level MAAC courses
- 12 ch in an additional language

**Upper Level**
- CCS/MAAC 3021, CCS 3023, MAAC 3101
- 6 ch chosen from CCS 3011, CCS 3065, CCS 3794, CCS 3795, CCS 3909, CCS 3064, CCS 3904
- 18 ch of additional upper-level CCS electives
- 18 ch of additional upper-level MAAC electives
- CCS 5000 or MAAC 5000 or MAAC 5980 (optional)

Students should be careful not to double-count any courses cross-listed as both CCS and MAAC.

**Minor Program**

A Minor in Comparative Cultural Studies requires the completion of 24 ch of CCS courses with a grade of C or better:
- One of CCS 1021 or CCS 2021
- One of CCS 3021 or CCS 3023

12 ch of the remaining 24 ch must be upper-level CCS courses.

Under certain circumstances, language acquisition courses may be counted for lower-level requirements. The program must be approved by the advisor for the program.

- Reid, Allan, BA (Sask), MA, PhD (Alberta), Professor - 1991

The twin forces of globalization and technological change continue to reshape our increasingly complex and interconnected world. These circumstances compel us to respond to new challenges and new opportunities by understanding and appreciating diversity, by learning to navigate established and emerging mediascapes, and by discovering new ways to express ourselves through music, film, media arts, and multi-lingual communication.

The Department of Culture and Media Studies invites students to explore culture and cultural forms in an interdisciplinary environment. Students learn about culture through the lenses of film and media, literature, music, and other art forms, as well as the study of foreign languages. All of these subjects are examined in a variety of contexts and perspectives, from the practical to the critical and theoretical.

The Department of Culture and Media Studies offers the following academic programs:

---

**SECTION G: FREDERICTON ACADEMIC PROGRAMS**

- Comparative Cultural Studies: Minor, Major, Honours;
- Film Production: Major, (MAAC Concentration); Certificate in Film Production;
- German: CCS Concentration;
- Media Arts and Cultures: Minor, Major, Honours;
- Music: Minor
- Spanish: CCS Concentration.
- Film Studies: Minor (Interdepartmental Program)

The Department also offers language acquisition courses in Japanese, Russian, and Chinese. For course listings consult Section H of this calendar or visit the Departmental website at http://www.unb.ca/fredericton/arts/departments/cams/index.html

**FACULTY**

- **Director:** Dr. Len Falkenstein
  - Ball, John C., BA, MA, PhD (Tor), Prof - 1995
  - Falkenstein, Len, BA, MA (Sask), PhD (Alta), Prof - 1999
  - Finlay, Tatrina, BA (MT Allison), MA (UNB), Senior Instructor - 2008
  - Martin, Randall, BA (Tor), MA (Birmingham), DPhil (Oxon), Prof - 1994

**General Information**

The UNB Drama program offers pre-professional training in all aspects of theatre, including acting, directing, stage management, and costume, set, lighting, and sound design. Students in the program stage 5-7 major productions annually under the auspices of Theatre UNB, the production wing of the program. The Drama program is administratively housed within the Department of English.

**Programs of Study**

**Major**

Students can complete a Major in English with a concentration in Drama. For information on this program, see the English Department section in this Calendar.

**Double Major**

For the Drama component of a Double Major, students take a total of 30 ch chosen from required, recommended, and elective courses as listed below. Students can complete the Drama component of the Double Major over either 3 or 4 years, having entered the program in the first or second year of their studies. Required courses for the Double Major are DRAM 1173, DRAM 2173, DRAM 2174, DRAM 2175, DRAM 3170, and either DRAM 4170 or both DRAM 4173 and DRAM 4174. For the remaining 6 ch in the program, students can choose from a range of elective courses, with DRAM 3175 and ENGL 3877 recommended.

The recommended program of study is as follows:

Over years one and two, it is recommended that students take a total of either 9ch or 12ch of DRAM, drawn from DRAM 1173, DRAM 2173, DRAM 2174, DRAM 2175, as below. Courses may be taken in any order, except that students must have completed or be concurrently registered in DRAM 1173 or DRAM 2173 in order to take DRAM 2175.

**Year One:** DRAM 1173 and either DRAM 2173 or DRAM 2174
**Year Two:** DRAM 2173 (if not taken in 1st year) and DRAM 2174 (if not taken in 1st year) and DRAM 2175
**Year Three:** DRAM 3170
**Year Four:** DRAM 4170

The 6ch of electives can be taken in any year. Students entering the program in the second year of their studies can take DRAM 1173 simultaneously with any 2000-level DRAM course. Students wishing to spread the work of DRAM 4170 across two different academic years can choose to take DRAM 4173 and DRAM 4174 in lieu of DRAM 4170. Students interested in the program are advised to consult the Director of Drama for further information.

---

243
**SECTION G: FREDERICTON ACADEMIC PROGRAMS**

**Required and Elective Courses**

**Required Courses**
- DRAM 1173 Introduction to Acting and Performance 3 ch
- DRAM 2173 Acting: Body and Text 3 ch
- DRAM 2174 Technical Production and Design for the Theatre 3 ch
- DRAM 2175 Mainstage Production I 3 ch
- DRAM 3170 Advanced Drama Production 6 ch
- DRAM 4170 Thesis Production and Independent Project 6 ch [or DRAM 4173 Thesis Production (3 ch) + DRAM 4174 Independent Drama Project (3 ch)]

**Elective Courses**

**Recommended Electives**
- DRAM 3175 Mainstage Production II 3 ch
- ENGL 3877 Modern Drama 3 ch

**Other Electives**
- ENGL 2195 Creative Writing: Poetry and Drama 3 ch
- ENGL 2263 Shakespeare and Film 3 ch
- ENGL 3163 Creative Writing: Drama 3 ch
- ENGL 3260 Shakespeare 6 ch
- ENGL 3263 Shakespeare's Predecessors and Contemporaries 3 ch
- ENGL 3269 Shakespeare Now 3 ch
- CCS 3123 Berlin to Broadway: Musical Theatre across the Oceans 3 ch
- CLAS 3403 The Comic Theatre of Greece and Rome 3 ch
- CLAS 3413 The Tragic Theatre of Greece and Rome 3 ch
- FILM 3998/MAAC 3998 Editing and Post Production 3 ch
- FR 3884 Théâtre du Canada français/Theatre of French Canada 3 ch
- MAAC 3101 Media Design I 3 ch
- MAAC 3999 Editing and Post Production 3 ch
- FR 3884 Théâtre du Canada français/Theatre of French Canada 3 ch
- MAAC 3101 Media Design I 3 ch

Equivalent courses offered by St. Thomas University can also be used for the Minor, with permission of the Director of Drama. Other courses, including some offerings in Film, Creative Writing, and Music, can also be taken as electives, with the permission of the Director of Drama.

**Minor**

The Drama Minor consists of 24 ch chosen from required, recommended, and elective courses as listed below. Students can complete the Minor over either 3 or 4 years, having entered the program in the first or second year of their studies. Required courses for the Minor are DRAM 2173, DRAM 2174, DRAM 2175, DRAM 3170, and either DRAM 4170 or both DRAM 4173 and DRAM 4174. For the remaining 3ch in the program, students can choose from a range of elective courses, with DRAM 1173 and ENGL 3877 being strongly recommended.

The recommended program of study is as follows:

In years one and two, it is recommended that students take a total of either 9ch or 12ch of DRAM courses, drawn from DRAM 1173, DRAM 2173, DRAM 2174, DRAM 2175, as below. Courses may be taken in any order, with the exception that students must have completed or be concurrently registered in DRAM 1173 or DRAM 2173 in order to take DRAM 2175.

Year One: either DRAM 1173 or DRAM 2173 plus either DRAM 2174 or DRAM 2175
Year Two: DRAM 2173 and/or DRAM 2174 and/or DRAM 2175
Year Three: DRAM 3170
Year Four: DRAM 4170

The remaining 3ch of electives can be taken in any year. Students entering the program in the second year of their studies can take DRAM 1173 simultaneously with any 2000-level DRAM course. Students wishing to spread the work of DRAM 4170 across two different academic years can choose to take DRAM 4173 and DRAM 4174, two 3ch courses which are the equivalent of DRAM 4170.

Students interested in the program are advised to consult the Director of Drama for further information.

**Required and Elective Courses**

**Required Courses**
- DRAM 2174 Technical Production and Design for Theatre 3 ch
- DRAM 2175 Mainstage Production I 3 ch
- DRAM 3170 Advanced Drama Production 6 ch

**Recommended Electives**
- DRAM 4170 Thesis Production and Independent Project 6 ch [or DRAM 4173 Thesis Production (3 ch) + DRAM 4174 Independent Drama Project (3 ch)]

**Elective Courses**

**Recommended Electives**
- DRAM 3175 Mainstage Production II 3 ch
- ENGL 3877 Modern Drama 3 ch

**Other Electives**
- ENGL 2195 Creative Writing: Poetry and Drama 3 ch
- ENGL 2263 Shakespeare and Film 3 ch
- ENGL 3163 Creative Writing: Drama 3 ch
- ENGL 3260 Shakespeare 6 ch
- ENGL 3263 Shakespeare's Predecessors and Contemporaries 3 ch
- ENGL 3269 Shakespeare Now 3 ch
- CCS 3123 Berlin to Broadway: Musical Theatre across the Oceans 3 ch
- CLAS 3403 The Comic Theatre of Greece and Rome 3 ch
- CLAS 3413 The Tragic Theatre of Greece and Rome 3 ch
- FILM 3998/MAAC 3998 Editing and Post Production 3 ch
- FR 3884 Théâtre du Canada français/Theatre of French Canada 3 ch
- MAAC 3101 Media Design I 3 ch
- MAAC 3999 Editing and Post Production 3 ch
- FR 3884 Théâtre du Canada français/Theatre of French Canada 3 ch
- MAAC 3101 Media Design I 3 ch

Equivalent courses offered by St. Thomas University can also be used for the Minor, with permission of the Director of Drama. Other courses, including some offerings in Film, Creative Writing, and Music, can also be taken as electives, with the permission of the Director of Drama.

**Programs of Study**

The Department of Economics offers Majors and Honours programs to students in the Faculties of Arts, Business Administration and Science. The Department also offers a Minor to students from all Faculties. The usual entry level courses are introductory microeconomics (ECON 1013 or ECON 1014) and introductory macroeconomics (ECON 1023 or ECON 1024).
Students normally choose a Majors/Honours program in their second or third year and should register with the Department at the beginning of the academic year. Registration forms can be obtained from the departmental secretary in SH465 or downloaded from the departmental website at: http://www.unb.ca/fredericton/arts/departments/economics/_resources/pdf/s/minormajhonoursform.pdf

Minimum Academic Standards

Students in all Faculties should note that the minimum grade in a course required by any of the Economics programs (Majors, Honours and Minor) is a “C+” grade of 60% or a course is a normal part of the final year of that program, and is being taken for the first time in the final year; or 2) the course is not needed to meet the minimum credit hours of that program.

Economics Programs to Arts Students

Programs available to Faculty of Arts students include Majors and Honours in Economics, a Major in Economic Studies and a Minor in Economics. There is also a Minor in Public Policy jointly offered with Political Science.

Major in Economics

The Major consists of a minimum of 30 ch in Economics of which 24 ch must be in advanced courses (i.e., courses that start with the number 3 or higher are advanced). Required courses include ECON3023, ECON3013, and a 3 ch course in statistics. Since the Economics Department does not offer an undergraduate statistics course, most statistics courses offered by other Departments are acceptable as an Economics statistics credit, e.g. ADM2623/ ECON 3601.

Major in Economic Studies

This Major consists of a minimum of 30 ch in Economics, of which 24 ch must be in advanced courses. There are no other restrictions on course selection. The Economic Studies Program is appropriate for those who want a liberal arts background in Economics without the commitment to theory and statistics required by the Major in Economics.

Honours in Economics

There are two Honours programs: Single Honours and Joint Honours. They are suitable for students who intend to become professional economists, particularly those who plan to do graduate work at UNB or another university.

The Single Honours program consists of a minimum of 54 ch in Economics courses or approved substitutes, of which 36 ch must be in advanced courses. The Joint Honours program consists of 48 ch in Economics courses or approved substitutes, of which 24 ch must be in advanced courses. Students may substitute up to 9 ch of non-Economics courses for non-compulsory Economics courses. Department of Economics approval is required. These substitute courses must be approved by the Director of Undergraduate Studies.

To remain in the Honours programs, a student must maintain a GPA of 3.0 in Economics courses and approved substitutes.

The following courses are compulsory for Honours students: ECON 3013 and ECON 3023, ECON3601/ADM2623 and ECON3628/ADM3628 or approved substitutes, ECON 3665, ECON4013, ECON4023, ECON4625, and ECON4865.

Minor in Economics

In addition to the Majors/Honours programs in Economics, a Minor in Economics is also available to students from all Faculties. The minor in Economics shall consist of at least 24 ch in Economics. The courses for the Minor must be from a "coherent set of sequence of courses" as called for by the general university regulations for a Minor.

Minor in Public Policy

This is a joint Minor proposed by the departments of Economics and Political Science. Students may minor in Public Policy by completing 24 ch of courses offered by the Department of Economics and the Department of Political Science. Students are required to complete 24 ch as follows:

a. 6ch of economics (ECON) courses chosen from: ECON 1014 or ECON 1013, ECON 1024 or ECON 1023, ECON 2203, ECON 3505, ECON 3705, ECON 3905.

b. 6ch of introductory political science (POLS) courses chosen from: POLS 1103, POLS1203, POLS 2013, POLS 2202, POLS 2503, POLS 2603.

c. 6ch of advanced economics (ECON) courses from: ECON 3055, ECON 3203, ECON 3504, ECON 3702, ECON 3755, ECON 3775, ECON 3801, ECON 3815, ECON 3845, ECON 3865.

d. 6ch of advanced political science (POLS) courses from: POLS 3103, POLS 3213, POLS 3215, POLS 3241, POLS 3251, POLS 3257, POLS 3282, POLS 3284, POLS 3292, POLS 3391, POLS 3461, POLS 3647, POLS 4724.

Economics Programs to Business Administration Students

Please refer to the Faculty of Business Administration for further details on the Economics Program in Business Administration.
The 1000- and 2000-level courses are designed to give students a fuller appreciation of major works of literature and to improve their ability to write effective English. These courses are intended to be of value both to students who will specialize in English and to students in Arts and other Faculties who have a general interest in English.

Course Numbering

Courses beginning with the digit 1 are introductory; those beginning with 2 are intermediate. Advanced-level courses begin with 3, 4, or 5. Students above the first-year level who have taken a previous university English course must elect 2000-level courses, except for ENGL 1000, which may be elected with departmental permission, and ENGL 1103 and ENGL 1104. Students above the first-year level who have not taken a previous university English course may elect either 1000- or 2000-level courses except ENGL 2901 and ENGL 2902.

Apart from the initial numeral indicating the year in which a course is normally taken, the numbering of courses is merely a means of identification and does not indicate that one course is more or less advanced than another. Students must have taken 6 ch of 1000- or 2000-level courses before enrolling in a course at the advanced level. Any student intending to major or honour in English should take ENGL 2901 and 2902; to enter these courses a grade of C or better in ENGL 1000 or equivalent is required. First-year students in Faculties other than Arts must elect 1000-level courses.

Second-year students may take up to 12 ch of English courses, normally at the intermediate level. Students may not take a 2000-level course in any subject area in which they have already had an advanced-level course. Please see the Director of First- and Second-Year for more information.

Major, Honours, and Minor

Majors and Honours students must complete ENGL 1000 (or equivalent), ENGL 2901, and ENGL 2902. Students should note that any courses compulsory for other programs may not be counted towards an English Major, Honours, or Minor program.

Majors in English

Students who wish to major in English should discuss their program for the following year with the Director of Majors and Honours in the spring or at fall registration. Students are encouraged to register in the program as early as possible. The Director of Majors and Honours should be consulted about any changes in a student's program.

Single-Major students must complete a minimum of 30 ch of advanced-level English courses, including at least 6 ch in pre-1660 literature in English and at least 6 ch in literature in English, 1660-1900. For a Double Major the requirements are the same except that the minimum is 24 ch. All courses to be counted toward the fulfillment of the minimum Major requirement must be passed with a grade of C or better.

In order to give recognizable coherence to the regular Major program, there are regulations regarding the minimum 30 ch (Single Major) or 24 ch (Double Major) of advanced-level courses. No more than a total of 9 ch of upper-level courses from the following categories may be included in these minimum requirements: Film Studies, Writing (Creative, Expository, or Screen), and Drama Production.

Optional Major Program: English (Drama)

The Department offers to students wishing to concentrate in drama the following Major option: English (Drama). The requirements for this program are that a student complete:

- ENGL 1000 (or equivalent)
- ENGL 2173 and ENGL 2174
- ENGL 2901 and ENGL 2902

and

- at least 30 ch in English literature courses at the advanced level, including the following:
  - ENGL 3170
  - at least 6 ch in pre-1660 literature in English
  - at least 6 ch in literature in English, 1660-1900
  - at least 12 ch courses in dramatic literature

Students wishing to enroll in this program should consult the director of Majors and Honours.

A Minor in Drama is also offered, which can be combined with other Major or Honours programs. Similarly, students can study Drama as part of a Double Major program. For details, see the Drama Program.

Optional Major Program: English (Creative Writing)

The Department offers students wishing to concentrate in Creative Writing the following Major option: English (Creative Writing). The requirements for this program are that a student complete the normal English Majors requirements as explained under “Majoring in English,” along with courses from relevant writing areas, as follows:

- both ENGL 2195 and ENGL 2196 and
- at least two of the following four courses options:
  - ENGL 3123
Any student who is interested in this program should consult the Director of Creative Writing.

Honours Program

Students enter the Honours program in their third year but may declare their intention of pursuing Honours during their second year. Only in exceptional circumstances will students be admitted in their fourth year. ENGL 1000 (or equivalent) is required of those who wish to enroll in Honours. Students should complete ENGL 2901 and ENGL 2902 by the end of second year and must have met this requirement by the end of the third year. The student must have achieved on average of 3.3 (B+) in these or other English literature courses. An average of 3.3 in English courses and of 2.5 in non-English courses must be maintained if the student is to retain Honours standing.

Single Honours

Single Honours students must complete 60 ch in English courses in total, including the following:

- ENGL 1000 (or equivalent)
- ENGL 2901 and ENGL 2902
- 6 ch in literature in English before 1660 at the upper level (not including Honours seminars)
- 6 ch in literature in English, 1660-1900, at the upper level (not including Honours seminars)
- five Honours seminars (including ENGL 5083), for a total of 15 ch at the 5080 level (Honours students who have already taken ENGL 3083 should take five regular Honours seminars.)
- 21 ch of upper-level ENGL electives (usually 3000-level courses, but students choose to take an extra Honours seminar)

Joint Honours

Joint Honours students must complete a total of 39 ch of English courses, including the following:

- ENGL 1000 (or equivalent)
- ENGL 2901 and ENGL 2902
- 6 ch in literature in English before 1660 at the upper level (not including Honours seminars)
- 6 ch in literature in English, 1660-1900m at the upper level (not including Honours Seminars)
- four Honours seminars (including ENGL 5083), for a total of 12 ch at the 5080 level (Honours students who have already taken ENGL 3083 should take four regular Honours seminars).
- one 3 ch ENGL elective at the upper level (usually a 3000-level course, but students may choose to take an extra Honours seminar).

Honours students may count up to 9 ch total of upper-level courses drawn from the following group: Film Studies, Writing (Creative, Expository, or Screen), Drama Production. Students are required to consult with the Director of Majors and Honours in choosing their courses so as to ensure that they follow a well-balanced program.

Students interested in Honours English are encouraged to discuss the program with the Director of Majors and Honours.

Optional Honours Program: English (Creative Writing)

The Department offers students wishing to concentrate in creative writing the following Honours option: English (Creative Writing). The requirements for this program are that a student complete the normal English Honours requirements as explained under “Honours Program,” along with courses from the relevant writing areas, as follows:

- both ENGL 2195 and ENGL 2196 and
- at least two of the following four course options:
  - ENGL 3123
  - ENGL 3143
  - ENGL 3163
  - Either ENGL 3183 or ENGL 3186.

Any student wishing to enroll in this program should consult the Director of Creative Writing.

Minor Program

The Minor in English consists of at least 24 ch in ENGL completed with a grade of C or better, at least 12 ch of these from advanced-level courses. The courses from the Minor in must be approved by the Director or Majors and Honours, and must form a “coherent set or sequence of courses” as called for by the general university regulations for the Minor. Students should note that any courses compulsory for their programs may not be counted toward a Minor.

Students pursuing an ENGL Minor are strongly advised to take ENGL 1000 (or a combination of courses such as ENGL 1144 or ENGL 1145 and ENGL 3143 or ENGL 3163

General Information

The Film Studies Minor offers students from all faculties the opportunity to study film from creative and practical perspectives in production and other practice-driven courses as well as creative writing for the screen. For details of courses and requirements, see below.

Eligibility

Admission to the Film Studies Minor is open to students from any Faculty who have completed 30 ch towards a degree. Students should contact the Advisor for the Film Studies Minor for program approval and advising. Students are encouraged to begin the Minor in the second year of their program.

Program of Study

The Minor consists of 24 credit hours, approved by the Advisor. Of these 24 ch, FILM/MAAC 2022 “The Art of Film,” FILM/ENGL 2909 “International Film History,” and FILM/ENGL 3903 “Film Theory” are required, and at least 12 ch must be at the upper level. Students must take approved courses

247
SECTION G: FREDERICTON ACADEMIC PROGRAMS
from at least 3 different disciplines, including ENGL, FILM, FR, GER, HIST, MAAC, and CCS.
Courses will be selected from the following list. Additional courses may be counted towards the Minor subject with the approval of the Advisor.

ECONOMICS
ECON 2009 Understanding Economics Through Film

ENGLISH
ENGL 2263 Shakespeare and Film
ENGL 3905 The City in Cinema

General Information

Placement
The Department of French offers a broad range of language classes in order to accommodate as many students as possible. It is therefore imperative that students consult the Department before registering for a French course for the first time at UNB. To begin the process, students should contact the departmental secretary in Tilley Hall, room 231 (email:french@unb.ca).

Language courses are offered at all levels. Advanced-level courses are offered in language, Linguistics, and Literature. In keeping with traditional practice, Department of French recognizes that an undergraduate program in French studies must include aspects of literary, cultural, and linguistic enquiry. Students may find that course described as primarily ‘language’ courses include some or all of these elements. Classes are normally taught in French.

The Department of French cannot guarantee a place in a course until this consultation has taken place. The Department reserves the right to remove from the class lists or wait lists any students who have not consulted the Department or who miss three consecutive class hours within the first two weeks of classes.

Introductory Courses
1000-and 2000-level languages courses are offered in complementary pairs so that students can take French throughout a full academic year (two consecutive terms); it is recommended that students do so whenever possible. The Department of French believes that taking a French course that is below a student’s ability is not a productive use of the student’s time and that it constitutes academic dishonesty.

- FR 1014, followed by FR 1015;
- For students who have not previously studied French or who have not completed Grade 12 (Core) French.
- FR 1034, Followed by FR 1044;
- For students who have completed Grade 12 (Core) French.

The following course combinations are recommended depending on the student’s background:

- FR 1014, followed by FR 1015; for students who have not previously studied French or have no completed Grade 12 (Core) French.
- FR 1034, followed by FR 1044; for students who have completed Grade 12 (Core) French.
- FR 1124, followed by FR 2154, FR 2164, FR 2174, or FR 2184;
- For Francophone students and for student who were educated in French. When FR 1124 is not offered, students will take FR 2154.
- FR 1184, followed by FR 1194.
Primarily for students who have graduated from a French immersion program.
FR 2034, followed by FR 2054.
For students who have completed FR 1044 and for for students whose background (some immersion, a period of time since their last French course, etc.), renders them to advanced for FR 1034 but who are not yet ready for FR 1184.

Please note: Students who have successfully completed a language course cannot subsequently receive credit for a course that occurs earlier in the sequence; e.g. students who have passed FR 1184 cannot take FR 1034 or FR 1015 for credit.

External Credit
Students may elect to take language courses off campus, e.g., in Summer French immersion programs. These courses can be counted for UNB credit if the Department judges that sufficient progress has been made to merit credit equivalent to a course offered by the the UNB French Department. The student is responsible for providing a detailed description of the course an other information the Department may require in order to assess it. It is required that students apply for the Department’s approval before taking a French course off campus for which they hope to receive UNB credit.

Normally, a maximum of 9 credit hours of transfer credits at the advanced level will be counted towards the Major or Honours Programs.

The Department offers upper-level courses in three: Language, (second digit), Linguistics (second digit 2,3, or 4), and Literature (second digit 5, 6, or 8).

Students working towards a Major or Honours degree in French are required to choose a number of specialized courses in Linguistics and in Literature. Students working towards a Major or Honours in another discipline who wish to continue the study of French may take any advanced-level French course, provided they have the necessary competence.

Linguistics
FR 3034 "Introduction to Linguistics" is a perquisite or co-requisite for all Linguistics courses.

Literature

Literature courses are of three kinds:

a) Courses offering a variety of critical approaches, not limited to France or Canada (second digit 5);
b) Term courses on various periods of French European Literature (second digit 6);
c) Term courses on aspects of French Canadian Literature (second digit 8).

Students are advised to check the timetable to see which courses are offered in the current session.

Majors
All Single and Double Major students must complete the required number of credit hours in upper-level courses in French with a grade of C or better in each course.

Single Major: 36 credit hours
Double Major: 30 credit hours

Required Courses:
- FR 3404 - Introduction to Linguistics
- A minimum of one upper-level Literature courses

Honours
All Single and Joint Honours students must complete the required number of credit hours in upper-level courses in French with an average grade of B or better.

Single Honours: 42 credit hours
Joint Honours: 30 credit hours

Required Courses:
- FR 3404 - Introduction to Linguistics
- A minimum of one upper-level Literature course.

Honours students may choose between the course-based option and the Honours report option.

Minor in French
Students must complete 24 credit hours in French including a minimum of 12 credit hours at the upper level. The upper level courses will include a minimum of 3 credit hours in either Literature or Linguistics. A grade of C or better is required in each course.
SECTION G: FREDERICTON ACADEMIC PROGRAMS

Joint Honours

The GWS portion of a Joint Honours programme consists of 36ch of course work in GWS, selected in consultation with the Coordinator of Gender and Women’s Studies. These 36ch include:

1. at least one of GWS 1003, Introduction to Gender and Women’s Studies I, and GWS 2003, Introduction to Women’s Studies II;
2. GWS 4004, Seminar in Gender and Women’s Studies;
3. GWS 4900, Honours Thesis in Gender and Women’s Studies; and
4. 24ch of upper-level courses chosen from the list of core courses below.

If a student is completing Joint Honours in GWS and any another program requiring an Honours thesis, 6 credit hours of upper-level or seminar courses may replace GWS 4900. Prior approval from the Coordinator of Gender and Women’s Studies must be obtained.

Core Courses

ANTH 3114 Gender, Sex, and Cultures
ANTH 3704 South Asia
ANTH 4204 Gender, Kinship and Marriage
ANTH 4502 Issues in Medical Anthropology

ARTS 3000, Internship in Arts, when the placement is with an organization working on gender and women’s issues, will count for credit in Gender and Women’s Studies. In addition, some departments offer honours seminars that may be pertinent. Please consult the relevant department for more details. Please consult the Co-ordinator of Gender and Women’s Studies for the most recent list of core courses. Because Minors are subject to University-wide regulations, arts students seeking credit for Gender and Women’s Studies courses outside their Faculty must ensure that they have Arts Faculty approval before they register for such courses.

- Windsor, Lee, BA (Acadia), MA (WLU), PhD (UNB), Assoc Prof - 2006

General Information

COURSE NUMBERING

- 1000-level courses
  
  Courses at this level are suitable for students in their first or second year of University (i.e. in their first 60 ch) and are open to Arts students and non-Arts students. Subject to general regulations, these courses may also be taken for credit by students in the upper years of their programs. They are general-interest courses, designed to introduce students to specific topics, and to develop their skills in critical thinking and effective writing. Please note: students who are interested in pursuing a Major, a Minor or Honours in History, including students in their first year are encouraged to begin their studies in the discipline with a 2000-level foundation course, as discussed below.

- 2000-level courses
  
  All history courses at this level are Foundation Courses, which are the recommended entry point into History for both first- and second-year students who are considering completing a Major, a Minor, or Honours in this discipline. These courses feature weekly discussion groups, which are limited in size and give students the opportunity to develop communication skills and critical thinking. These courses also provide students with experience in analyzing primary sources, assessing different historical interpretations of key problems, and writing research essays. Students planning to minor, major, or double-major in History or to complete an Honours degree are
required to complete at least 6 ch at this level, and are strongly advised to complete at least 12 ch. Subject to general regulations, these courses may also be taken for credit by students in the upper years of their program. Courses taken at other institutions and presented to satisfy the Foundation course requirement must be approved by the Director of Majors or Honours.

- **3000-level courses**
  These courses are suitable for students who have completed at least 60 ch, both Arts and non-Arts students, and for History majors and non-majors.

- **4000-level courses**
  These courses are suitable for students who have completed at least 60 ch, both Arts and non-Arts students, and for History majors and non-majors. Students should normally have completed at least 6 ch in History before enrolling in a 4000-level course. The 4000-level courses employ the seminar system and may have enrolment restrictions.

- **5000-level courses**
  These courses employ the seminar format and are normally open only to History Honours students, who must register for them in conjunction with the departmental Director of Honours. Students not enrolled in the History Honours program require permission of the Director of Honours and the course instructor before registering.

**Courses for Credit from Cognate Disciplines**

The following courses may be counted for advanced credit in the Department of History up to a maximum of 12 ch:

**Classics**
- CLAS 3003 Ancient History: The Greeks from the Trojan War to Alexander the Great
- CLAS 3033 Ancient History: The Romans from Republic to Empire
- CLAS 3053 The Roman Army
- CLAS 3063 Ancient Greek Warfare
- CLAS 3073 Ancient History: Jewish Civilization from the Babylonian Exile to the Great Revolt
- CLAS 3083 The Byzantine Empire
- CLAS 3093 The Decline and Fall of the Roman Empire
- CLAS 3623 Remembering War in Ancient Greece
- CLAS 3803 The World of Jesus
- CLAS 3813 The Early Church
- CLAS 4063 Caesar Augustus

**Economics**
- ECON 3017 Canadian Economics Development

**Education**
- ED 5074 History and Philosophy of Education

**German**
- CCS 3061 From Peoples to a Nation: German Culture before 1900
- CCS 3071 Germany Today: German Culture from 1900 to the Present

**Political Science**
- POLS 3242 Canadian-American Relations
- POLS 3247 Trudeau’s Canada
- POLS 3251 Canadian Federalism
- POLS 3411 Women Political Thinkers
- POLS 4416 Canadian Political Thought
- POLS 4495 Gender and War: Historical and Contemporary Perspectives

**History at St. Thomas University**
UNB students are advised that upper-level history courses offered at St. Thomas University, which are not offered at UNB, may be taken for credit by UNB students. Please see the St. Thomas University Calendar for course descriptions.

**NOTE on Grading**
The Department of History requires a "C" grade on individual courses to fulfill prerequisite and Majors requirements. All full-year History courses carry a 6 ch rating. Term courses carry a 3 ch rating.

**Honours, Majors and Minors**

**Honours Program**
Admission to the Honours Program in History is open to qualified students who have completed 60 ch of courses toward the BA degree and who have satisfied the Arts Faculty general requirements for the first and second year.

Sociology | SOCI 3523 | Sociology of International Development |
| SOCI 3563 | Global Perspectives in Environmental Health |
| SOCI 3801 | Food Studies in Sociological Context |
| SOCI 4264 | Health Care in International Context |

Tier 3 courses are on topics of interest to IDS students and can be used to complete program electives. Course availability changes yearly. For scheduling, please search the UNB Undergraduate Timetable, and consult the IDS program advisor.

Course availability changes yearly. For scheduling, please search the UNB Undergraduate Timetable, and consult the IDS program advisor.

Students can undertake a Minor, Double Major or Joint Honours, combining IDS with a disciplinary degree program in the Faculty of Arts.

A Minor in International Development Studies can be taken by any UNB student. For information on the Minor, Double Major and Joint Honours, see the BA General Regulations.

Admission into the Double Major or Joint Honours program is open to any student who has successfully completed 60 credit hours towards the BA degree; students require a minimum GPA of C+ (2.3) for admission to the Joint Honours program. Students considering International Development Studies as part of a Double Major or Joint Honours program should consult with the Coordinator.

Inquiries about the International Development Studies program should be directed to Dr. Thom Workman, Coordinator of International Development Studies, and (506) 453-4826. E-mail: workman@unb.ca.

Program of Study
A grade of C (2.0) or better in each individual course used for IDS credit is required for Minors and Double Majors; students in Joint Honours program require a grade of C+ (2.3) or better on each individual course used for IDS credit.

Minors
For a Minor in International Development Studies a student must complete the following courses for a total of 24 ch:
• IDS 1103 Introduction to Development Studies: Global Perspectives on Human Inequality (3 ch)
• IDS 2103 Institutions, Practices and Perspectives on International Development (3 ch)
• 18 ch of courses approved for IDS credit

Double Majors
Double Majors taking International Development Studies must complete the following for a total of 30 ch:
• IDS 1103 Introduction to Development Studies: Global Perspectives on Human Inequality (3 ch)
• IDS 2103 Institutions, Practices and Perspectives on International Development (3 ch)
• IDS 4103 Advanced Topics in International Development Studies (3 ch)
• IDS 4203 Development Project Design (3 ch)
• 18 ch from Tier 2 and Tier 3 course lists, of which at least 9 ch will be from the Tier 2 course list

Joint Honours
Joint Honours taking International Development Studies must take the following courses, for a total of 36 ch:
• IDS 1103 Introduction to Development Studies: Global Perspectives on Human Inequality (3 ch)
• IDS 2103 Institutions, Practices and Perspectives on International Development (3 ch)
• IDS 4103 Advanced Topics in International Development Studies (3 ch)
• IDS 4203 Development Project Design (3 ch)
• IDS 4900 Honours Thesis in International Development Studies (6 ch) *
• 18 ch from Tier 2 and Tier 3 course lists, of which at least 9 ch will be from the Tier 2 course list

* The Honours Thesis in IDS (IDS4900) is compulsory only for students who do not have to write an Honours Thesis in the other discipline of their Joint Honours program. Students completing an Honours Thesis in another program will instead be required to complete an additional 6ch of upper-level IDS electives approved by the IDS Advisor.

Upon registration in IDS 4900, the student must identify a thesis supervisor from the list of IDS affiliated faculty members and develop a thesis...
propers. A copy of the thesis proposal must be provided to the Coordinator.

Please note that those students who are required to complete both an Honours thesis in a departmental discipline and one in IDS cannot have the same supervisor for both.

**General Information**

Law in Society is an interdepartmental and inter-faculty program involving the Faculties of Administration and of Law, the Muriel McQueen Fergusson Centre for Family Violence Research and, in the Faculty of Arts, the departments of Anthropology, Classics and Ancient History, Economics, History, Philosophy, Political Science, Psychology, and Sociology.

Based on the premise that law and the character and quality of society are interrelated, the program offers a critical academic examination of the role of law in society and of society in law. Students will study these issues from at least three disciplinary perspectives and may include in their studies examinations of the philosophic, historic, economic, political, and social foundations of law. All of the courses explore one common theme: the connections between law and the social order.

**Eligibility**

Admission to the Law in Society Program is open to students who have successfully completed sixty credit hours toward a degree in the Faculty of Arts or the Faculty of Business Administration. Students must obtain the approval of the department (Arts) or faculty (Administration) in which they major and then apply through the LWSO Coordinator for admission to the Law in Society Program. Students should apply during the registration period or immediately thereafter. With permission of the Coordinator, students may count for credit in a LWSO Program courses taken before they enter the Program. A grade of C or better is required for credit in the Law in Society Program. Although not a requirement, students are encouraged to complete PHIL 1101 Critical Thinking before entry into the Program.

**Programs of Study**

**Double Major**

The Law in Society Double Major consists of 30ch, which must include LWSO 2003 and LWSO 4003. Students will choose an additional 24ch from the core and elective course lists. Of these, 9ch shall be chosen from at least 2 disciplines (other than LWSO) among the core courses. Additional core courses may be counted as electives. At least 24ch shall be upper level courses (3000 level or above). A grade of C or better is required for course credit in the Law in Society Double Major Program.

**Joint Honours**

Students intending to complete a Joint Honours must apply in writing to the LWSO Coordinator for admission. Normally, students wishing to complete a Joint Honours will apply prior to the start of their 3rd year and have a GPA of at least 3.3 or B+. A Joint Honours consists of 36ch including completion of the requirements for a Double Major and completion of either (a) 6ch of 4000 level courses from the core or elective lists, approved by the LWSO Coordinator, OR (b) completion of LWSO 5000, the Honours Thesis in Law in Society. A grade of C or better is required for course credit in the Law in Society Joint Honours Program.

**Minor**

Students are required to complete 6ch of LWSO courses from the core course list. At least 4ch of these 6ch shall be upper level courses (3000 level or above). A grade of C or better is required for course credit in the Law in Society Minor Program.

Single Honours Requirements

Students interested in Media Arts & Cultures have the following five options

- Honours in Media Arts & Cultures
- Honours in Media Arts & Cultures (Film Production)
- Major in Media Arts & Cultures
- Major in Media Arts & Cultures (Film Production)
- Minor in Media Arts & Cultures

Honours programs are for students who are interested in a concentrated course of study (typically in preparation for further studies). The Film Production options are designed to allow students with an interest in filmmaking to focus their MAAC elective courses in this area. All students electing the Film Production option still complete all of the core courses for the general Media Arts & Cultures Program. The Minor consists of 24 ch of MAAC courses for students majoring in other disciplines. Joint Honours and Double Majors with Media Arts & Cultures are also possible.

Honours

Admission to the Honours Program in Media Arts & Cultures is open to qualified students who have completed 45 ch of courses toward the BA degree. Normally students will have completed (or be in process of completing) 12 ch in lower level MAAC courses. Students should apply for admission to the Media Arts & Cultures Honours Program in their fourth term. Students may enter the program during their third year, if they qualify.

To be admitted to Honours, the student must have achieved an average of 3.3 (B+) in their Media Arts & Cultures courses. Also, an average of 3.3 in MAAC courses and 2.5 in non-MAAC courses must be maintained if the student is to retain Honours standing.

Each student's program of study must be approved by the Media Arts & Cultures Program Advisor.

Single Honours Requirements

- GPA in MAAC courses and a 2.5 GPA in non-MAAC courses

Joint Honours Requirements

A student completing Honours in Media Arts & Cultures jointly with another subject follows the same requirements as Single Honours but may reduce the overall number of advanced level ch in MAAC courses to 30.

Honours in Media Arts & Cultures (Film Production)

The Department offers students wishing to concentrate in film production the following Honours option: Media Arts & Cultures (Film Production). The requirements for this program are:

- 3.3 GPA in MAAC courses and a 2.5 GPA in non-MAAC courses
- MAAC/FILM 2999 & MAAC 2022
- An additional 6 ch of introductory and intermediate level MAAC courses (chosen from MAAC 1001, MAAC 1002, MAAC 1021, MAAC 2021)
- 42 ch of advanced level MAAC courses
  - These must include MAAC 3021, MAAC 3101, MAAC 4000, 6 ch from the approved Film Production course list (List A below), 6 ch from the approved Film Studies course list (List B below), and either MAAC 5000 (Honours Thesis) or MAAC 5980 (Honours Project).

Students considering this option should discuss their plans with the Media Arts & Cultures Program Advisor when they apply for admission to the Honours program. All students following the Film Production option must have their course of study approved by the Media Arts & Cultures Program Advisor.

List A
FILM/ENGL 3183 Creative Writing: Screenwriting for Short Formats (this is a limited enrolment course)
FILM/ENGL 3186 Creative Writing: Feature Screenplay (this is a limited enrolment course)
MAAC/MUS 3362 Sound Design
MAAC/FILM 3981 Screen Acting
MAAC/FILM 3988 Film Production
MAAC/FILM 3999 Editing and Post Production
MAAC 4401 Animation Principles

List B
ENGL 3906-9 Film Genre
ENGL 3916-9 National Cinemas
FILM/ENGL 3903 Film Theory
MAAC/CSS 3065 The Thrill of Fear: Horror Narratives across Media & Cultures
MAAC/FILM 3075 Framing Reality: Theory and Practice of Documentary Media
MAAC 3085 Television Studies
MAAC/CSS 3066 Trauma and Seduction: Early German Cinema
MAAC/CSS 3072 (Re) constructing National Identity: Contemporary German Cinema
MAAC/CSS 3082 History of Canadian Cinema
CCS 3455 The Cinema of Spain
CCS 3456 Latin America Cinema
MAAC/CSS 3795 Dark Futures: Visions of Dystopia since World War I

Major in Media Arts & Cultures

A major in Media Arts & Cultures requires the completion of 42 ch of MAAC courses, with a grade of C or better in each. The specific requirements are as follows:

Single Major Requirements

- 12 ch of Introductory and Intermediate level MAAC courses (including at least MAAC 2021)
- MAAC 3101 and MAAC 3102
- 30 ch of upper-level MAAC courses.

Double Major Requirements

A student completing a Double Major in Media Arts & Cultures jointly with another subject follows the same requirements as a Single Major but may reduce the required number of Advanced level ch in MAAC courses to 24.

Optional Majors Program: Media Arts & Cultures (Film Production)
SECTION G: FREDERICTON ACADEMIC PROGRAMS

The Department offers students wishing to concentrate in film production the following Major option: Media Arts & Cultures (Film Production). The requirements for this program are:

- MAAC/FILM 2999 & MAAC 2022
- An additional 6 ch of Introductory and Intermediate level MAAC courses (chosen from MAAC 1001, MAAC 1002, MAAC 1021, or MAAC 2021)
- 30 ch of advanced level MAAC courses
  - These must include MAAC 3021, MAAC 3101, MAAC 4000, at least 6 ch from the approved Film Production courses list (List A below), and at least 6 ch from the approved Film Studies course list (List B below)

Students considering this option should discuss their plans with the Media Arts & Cultures Program Advisor when they declare their major. All students following the Film Production option must have their course of study approved by the Media Arts & Cultures Program Advisor.

List A

FILM/ENGL 3183 Creative Writing: Screenwriting for Short Formats (this is a limited enrolment)
FILM/ENGL 3186 Creative Writing: Feature Screenplay (this is a limited enrolment course)
MAAC/MUS 3362 Sound Design
MAAC/FILM 3981 Screen Acting
MAAC/FILM 3998 Film Production
MAAC 4401 Animation Principles

List B

ENGL 3086-9 Film Genre
ENGL 3916-9 National Cinemas
FILM/ENGL 3903 Film Theory

CCS 3546 Latin American Cinema
MAAC/CSS 3795 Dark Futures: Visions of Dystopia since World War I

MUSIC

Minor in Music

General Information

The Music Minor offers students from all Faculties the opportunity to study music from a variety of perspectives, including theory, history, and analysis, and performance, among others. It is designed so as to create rich learning experiences for students interested in making music as well as for those primarily interested in learning about music. For details of courses and requirements, see below.

Eligibility

Admission to the Music Minor is open to students from any Faculty who have completed 30 ch towards a degree. Students should contact the Director of Music for program approval and advising. Students are encouraged to begin the Minor in their second year of study.

Program of Study

The Minor consists of 24 credit hours approved by the Director. Of these 24 ch, at least 12 ch must be at the upper level. All students are required to take at least one of the following theory-based courses: MUS 2113, MUS 2114, MUS 2123, or MUS 2124, and at least one of the following history-based courses: HIST/MUS 3775, HIST/MUS 3785, HIST/MUS 3795, or HIST/MUS 3796. For the remainder of the courses, students are expected to consult with the Director of Centre for Musical Arts to ensure a coherent set of courses is selected to reflect a distinct area of concentration.

Students wishing to focus on performance will typically take at least 12 ch from performance and theory based courses, while students primarily interested in the history and appreciation of music will typically take at least 12 ch from courses in those areas.

Courses will be selected from the following list. Additional courses may be counted towards the Minor subject to the approval of the Director.

MUS 2113 Introduction to Music
MUS 2114 Introduction to Music Appreciation
MUS 2123 Music Theory I
MUS 2124 Music Theory II
MUS 2143 Introduction to Jazz Theory
MUS 2797 Rock and American Popular Music
MUS 3000 Studio Work
MUS 3001 Studio Work: Private Lessons
MUS 3002 Studio Work: Ensemble Work
MUS 3113 Computer in Music, an Introduction
MUS 3123 Musical Composition
MUS 3133 Conducting
MUS 3797 Music of Canada
MUS 3798 Canadian Jazz: The Forbidden, the Rebellious, and the Misunderstood
HIST 3701 The Cultural Turn: Cultural Studies in Historical Context
HIST/MUS 3765 History of Music in Medieval and Renaissance periods
HIST/MUS 3775 History of Music in the Late Baroque and Classical Period
HIST/MUS 3785 History of Music in the Romantic Era
HIST/MUS 3795 History of Music in the Twentieth Century
HIST/MUS 3796 History of Music Dramas of Richard Wagner
MUS/CSS 3799 Women in Music
MAAC 3362 Sound Design
POLs 3417 Politics and Music
SOCs 3472 Sociology of Music
CCS 3023 Berlin to Broadway

General Information

Prerequisites

Any course in Philosophy may be taken in any year, provided that the Prerequisites for the course have been met, and subject to the regulations of the student's degree program. The following list gives the general Prerequisites for Philosophy courses at each level:

1000 Courses: General introductory courses.

2000 Courses: Courses in specific areas of the subject. They have no formal Prerequisites, and are often taken by students beginning with a
subject, have a special interest, or other reasons for taking them. They may be taken by first year students.

3000 Courses: Open to students in the second year of their studies or above, or others with the permission of the instructor.

4000 Courses: 6 ch in Philosophy, or the permission of the instructor, is prerequisite.

**Minors, Majors and Honours**

**Minors**
The following Minors programs in Philosophy may be taken by students in any degree program. A grade of C or better is required in each course.

1. A Minor in Philosophy will consist of two 1000 level courses and any other 18 ch in Philosophy.
2. A Minor in Ethics will consist of two 1000 level courses and 18 credit hours from PHIL 2201, PHIL 2203, PHIL 3203, PHIL 3205, PHIL 3206, PHIL 3251, PHIL 3302, PHIL 3308, PHIL 3315.
3. A Minor in the History of Philosophy will consist of PHIL 1301, PHIL 1302, and 18 ch chosen from PHIL 3301, PHIL 3302, PHIL 3303, PHIL 3304, PHIL 3305, PHIL 3306, PHIL 3308, PHIL 3311, PHIL 3312, PHIL 3313, PHIL 3315, PHIL 3317, PHIL 3331. Certain courses in the Department of Philosophy at STU may also be included with the approval of this Department.

**Major in Ancient Philosophy**

Students may minor in Ancient Philosophy by completing 24 ch of courses offered by the Department of Classics & Ancient History and the Department of Philosophy. For Classics (CLAS) departmental course descriptions, please consult that department's calendar listing.

Students are required to complete 24ch as follows:

a. 6 ch of introductory philosophy chosen from PHIL 1101, PHIL 1201, PHIL 1301, PHIL 1302, PHIL 1401.

b. 6 ch of advanced courses, including at least one of PHIL 3301, PHIL 3302, PHIL 3306, PHIL 3308, PHIL 3311.

c. 6 ch of advanced classics (CLAS) courses, including at least one of CLAS 3703, CLAS 3723 and CLAS 3733.

**Majors:**

Students in the BA degree program who wish to take a Major in Philosophy, either singly or with some other subject, should consult with the Major/Honour advisor of the Philosophy Department.

- **Single Major:** A Major in Philosophy will consist of 36 credit hours, including the required courses PHIL 1301, PHIL 1302, at least one of PHIL 1101 or PHIL 3101, and 24 credit hours of advanced courses (3000 and above), and 3 credit hours that may be taken at the 1000, 2000, 3000, or 4000 level. At least one course from each of the three streams of ethics, logic, and metaphysics/epistemology must be taken while attaining a minimum grade of C in all philosophy courses.

- **Double Major:** The requirements are as for the single Major, except the Double Major requires 33 credit hours, and it requires 21 credits of courses that are not required for the BA in Philosophy (3000 and above). Students qualifying for a degree other than the BA, who meet the above requirements for a Major in Philosophy, may request the Registrar to note this fact on their transcript.

**Honours**

Students in the BA degree program who wish to take Honours in Philosophy must consult with the Major/Honours advisor of the Philosophy Department.

- **Single Honours:** Students taking Honours in Philosophy must complete at least 48 credit hours in Philosophy. The student’s program must include PHIL 1301 and PHIL 1302, at least one of PHIL 1101 or PHIL 3101 (Honours students are strongly encouraged to take 3101), and 36 credit hours in advanced courses in Philosophy. At least one course from each of the four streams of logic, ethics, history of philosophy and metaphysics/epistemology must be taken. With the approval of the Department, up to 12 ch in related courses in other departments may be counted as credit hours in Philosophy. Students must obtain a grade of B in all courses counting as fulfilling their Honours requirements in Philosophy.

- **Joint Honours:** PHIL 1301 and PHIL 1302 and 24 credit hours in advanced courses in Philosophy. At least one course from each of the four streams of logic, ethics, history of philosophy and metaphysics/epistemology must be taken. With the approval of the Department, up to 12 ch in related courses in other departments may be counted as credit hours in Philosophy.

- **Courses in Logic**
  - PHIL 1101 Critical Thinking
  - PHIL 3101 Introduction to Symbolic Logic

- **Courses in Ethics or Social Philosophy**
  - PHIL 1201 Ethics of Life and Death
  - PHIL 2201 Introduction to Ethics
  - PHIL 2203 Business Ethics
  - PHIL 2206 Environmental Ethics
  - PHIL 2207 Ethics for Engineers Online Only
  - PHIL 2208 Military Ethics
  - PHIL 2209 Health Care Ethics in Canada
  - PHIL 2251 Applied Professional Ethics
  - PHIL 3205 Contemporary Ethical Theory

- **Courses in the History of Philosophy**
  - PHIL 1301 Introduction to the History of Philosophy I
  - PHIL 1302 Introduction to the History of Philosophy II
  - PHIL 3301 Early Greek Philosophy
  - PHIL 3302 Later Greek Philosophy
  - PHIL 3303 Modern Philosophy I
  - PHIL 3304 Modern Philosophy II
  - PHIL 3305 Capitalism vs. Communism
  - PHIL 3306 Kierkegaard, Nietzsche, and the Roots of Postmodernism
  - PHIL 3308 Plato's Republic
  - PHIL 3311 Nietzsche on Socrates' Death-Wish
  - PHIL 3312 Infinity: Emmanuel Levinas' Encounter with the Other
  - PHIL 3313 Reason vs. Faith: The Philosophy of Kierkegaard
  - PHIL 3315 Hannah Arendt and Simone de Beauvoir
  - PHIL 3317 Jean-Paul Sartre's Philosophy of Freedom
  - PHIL 3331 Michel Foucault's Discipline and Punish: The Birth of the Prison

- **Courses in Metaphysics and Epistemology**
  - PHIL 1401 God, Mind and Freedom
  - PHIL 3404 Aquinas and Dante
  - PHIL 3411-19 Selected Topics in Epistemology
  - PHIL 3421 Philosophy of Mind
  - PHIL 3422 Philosophy of Science
  - PHIL 3431 Philosophy of Religion
  - PHIL 3433 Models of Divine Agency
  - PHIL 3434 Evil: From Job to Leonard Cohen
  - PHIL 3501 Contemporary Metaphysics
  - PHIL 3501 Introduction to the Philosophy of Kant
  - PHIL 3502 Introduction to the Philosophy of Hegel
  - PHIL 3511 Direct Divine Agency and the World
  - PHIL 3535 Science vs God?
  - PHIL 3434 The Concept of Miracle
  - PHIL 3307 Edmund Husserl's Pure Phenomenology

- **Courses in Aesthetics**
  - PHIL 1501 Monsters and Philosophy
  - PHIL 2501 Philosophy and Film

- **Courses in Political Philosophy**
  - PHIL 1202 Tyranny, Violence and Liberty
  - PHIL 3332 Philosophers and the Nazis
  - PHIL 3601 Liberalism and its Critics

Honours students should also note the standards required for ranking Honours degrees. These are stated in the regulations for the Bachelor of Arts degree.

**Credit Courses from Cognate Disciplines**
The Department of Philosophy will accept credit courses in ancient philosophy, CLAS 3703, CLAS 3723, CLAS 3733. It will also accept for credit courses credit hours, which shall include the following:

1. **Required Courses**

   The Certificate will require the successful completion (with a grade of B or higher) of six (6) courses, totalling eighteen credit hours, which shall include the following:
SECTION G: FREDERICTON ACADEMIC PROGRAMS

a. three (3) core courses, including PHIL 1101 Critical Thinking, a 2000-level course in Ethical Theory, and a breadth of requirements drawn from a Certificate area of concentration in applied ethics that is NOT being pursued by the student.

b. three (3) elective courses in the student's area of concentration, including one (1) 3000-level course.

(c) with the added proviso that students cannot take more than two (2) elective courses from the student's own home department.

The course work will be approved by the Department of Philosophy.

To be awarded the Certificate, a minimum of nine (9) hours must be completed at UNB. Subject to approval by the Dean of Arts, a maximum of nine (9) credit hours (or the equivalent) of comparable coursework may be transferred from another recognized post-secondary institution. Credit will not normally be awarded for those courses completed more than five years prior to student's return to university study, in accordance with the norms already in place by the Registrar's office.

2. Possible Courses

ADM 3875 Labour Relations
ANTH 4024 Anthropology and Ethics
CCS 3063 Literature of the Holocaust
CCS 3064 The Holocaust: East European Representations and Responses
CLAS 3063 Ancient Greek Warfare

Graduate Study in Philosophy at UNB
To be accepted as a candidate for the degree of MA in Philosophy, applicants will normally be expected to have a letter grade average of at least B in a minimum of 42 credit hours in Philosophy (or equivalent, e.g. a 70% average in seven full courses in Philosophy). Applicants with an average of less than B or fewer than 42 credit hours in Philosophy may be admitted conditionally as graduate students for a qualifying year. Further details may be found in the Calendar of the School of Graduate Studies.

General Information
1000-level courses introduce the discipline.
2000-level courses are Foundation courses, which introduce the main subfields.
3000-level courses are Advanced courses on specialized topics.
4000-level courses are Honours Seminars, open to senior students.
The courses are grouped into subfields, which are intended to guide students in developing a coherent program of study, but students may choose according to their interests and course availability as long as they meet program requirements.

Minor, Majors and Honours

Minor
A Minor in Political Science consists of 24 credits in Political Science courses, of which at least 6 credits must be in Introductory Level courses (1000 or 2000 level) and 12 credits in Advanced Level courses (3000 or 4000 level).

Minor in Public Policy
This is a joint Minor offered by the Departments of Economics and Political Science. The Minor is open to all students including those majoring in Economics and Political Science.
Students may minor in Public Policy by completing 24ch of courses offered by the Department of Economics and the Department of Political Science. Students are required to complete 24ch as follows:

a. 6ch of economics (ECON) courses chosen from: ECON 1014 or ECON 1013, ECON 1024 or ECON 1023, ECON 2203, ECON 3505, ECON 3705, ECON 3905.
b. 6ch of introductory political science (POL) courses chosen from: POLS 1105, POLS1203, POLS 2202, POLS 2503.
c. 6ch of advanced economics (ECON) courses from: ECON 3055, ECON 3203, ECON 3504, ECON 3702, ECON 3703, ECON 3775, ECON 3801, ECON 3815, ECON 3845, ECON 3885.
d. 6 ch of advanced political science (POL) courses from: POLS 3103, POLS 3213, POLS 3241, POLS 3251, POLS 3257, POLS 3282, POLS 3284, POLS 3292, POLS 3381, POLS 3461, POLS 3531, POLS 3647, POLS 4724.

Majors Program

NOTE: These regulations apply to students who began their program at UNB in Fall 2014 or after. For regulations pertaining to students who entered before that date, please consult an earlier calendar or the Department.

SECTION G: FREDERICTON ACADEMIC PROGRAMS

• Single Major: A student doing a single Major in Political Science shall complete a total of 42 ch in Political Science. 24 ch of which must be in advanced level courses. The student's program must include:
  o POLS 2202 Canadian Politics
  o 6.0 additional credit hours selected from Foundation Courses offered at the 2000 level
  o POLS 3410 Survey of Political Thought

• Double Major: A student doing a Double Major in Political Science with another discipline shall complete a total of 30 ch in Political Science, 24 ch of which must be in advanced level courses. A student's program must include:
  o POLS 2202 Canadian Politics
  o additional credit hours selected from Foundation Courses offered at the 2000 level
  o POLS 3410 Survey of Political Thought

Honours Program
In order to be eligible for entry into Honours, students must have:
1. a GPA of 3.0 in Political Science courses
2. a cumulative GPA of 2.5
3. 60 ch of course work completed
4. 12 ch of course work in Political Science completed

Students wishing to read for Honours in Political Science should notify the Departmental Coordinator of Honours and Majors on registration day or immediately thereafter. Approval by the Coordinator, in consultation with the Department, of the programs of successful applicants is required.
Students considering entry to the program are encouraged to contact the Coordinator of Honours and Majors in the term prior to their desired term of entry for further information.

Honours (Single)
A student reading for Honours in Political Science must complete at least 48 ch in Political Science. 30 ch of which must be in advanced level courses. The student's program must include:

• POLS 2202 Canadian Politics
• 6.0 additional credit hours selected from Foundation Courses offered at the 2000 level
• POLS 3410 Survey of Political Thought
• POLS 3533 Research Methods in Political Science
• POLS 4000 Directed Readings and Research in Political Science
• 6 ch at the 4000-level (in addition to POLS 4000)

Joint Honours
A student reading for Joint Honours in Political Science and another discipline must complete at least 36 ch in Political Science, 24 ch of which must be in advanced level courses. The student's program must include:

• POLS 2202 Canadian Politics
• additional credit hours selected from Foundation Courses offered at the 2000 level
• POLS 3410 Survey of Political Thought
• POLS 3533 Research Methods in Political Science
• POLS 4000 Directed Reading and Research in Political Science
• 3 ch at the 4000 level (in addition to POLS 4000)

Course Credit:
Students may count courses towards the fulfillment of their program requirements in a Single Major, Double Major or Honours in Political Science only if they receive a grade of C or better. Students must achieve a grade of B- or better in POLS 4000 to receive an Honours degree.

SUB-FIELDS IN POLITICAL SCIENCE
Foundation courses, which are marked with an asterisk*, introduce students to the different sub-fields in the program.

The Department of Psychology offers several undergraduate programs through the Faculty of Arts and the Faculty of Science. Arts students may complete Minors, Majors, Double Majors, Honours, Joint Honours and Specialization in Neuroscience programs. Science students may complete Minors, Majors, Double Majors, Honours, Joint Honours and Specialization in Neuroscience programs. Some students may complete Minors, Majors, Double Majors, Honours, Joint Honours and Specialization in Neuroscience programs.

**General Information:**

The Department of Psychology offers several undergraduate programs through the Faculty of Arts and the Faculty of Science. Arts students may complete Minors, Majors, Double Majors, Honours, Joint Honours and Specialization in Neuroscience programs. Science students may complete Minors, Majors, Double Majors, Honours, Joint Honours and Specialization in Neuroscience programs. Some students may complete Minors, Majors, Double Majors, Honours, Joint Honours and Specialization in Neuroscience programs.

**FACULTY:**

- Byers, E. Sandra, BA (Roch), MA, PhD (W Virginia), Prof & Chair - 1978
- D’Entremont, Barbara, BSc, MSc (Dal), PhD (Qu), Prof - 2000
- Hamilton, Ryan, BA, MSES, PhD (UNB), Assoc Prof - 2013
- Harker, Troy, BSc, MSc (Lethbridge), PhD (Dal), Asst Prof - 2011
- LaChapelle, Diane, BSC (McM), MA, PhD (Regina) - Assoc Prof - 2002
- O’Sullivan, Lucia, BA, BA (UNB), PhD (Bow) Prof - 2006
- Perunovic, W. Q. Elaine, BA, PhD (Wat) Assoc Prof - 2007
- Piercey, Darren, H.B.Sc (Toronto), PhD (Alberta), Assoc Prof - 2001
- Poulin, Carmen, BA (UNB), MA, PhD (Qu), Prof - 1991
- Ronis, Scott, BA (Brandies), MA, PhD (Missour), Assoc Prof-2009
- Sears, Heather, BSc (Acad.), MA, PhD (Victoria), Prof - 1995
- Stevanovski, Biljana, BA (McM), MA, PhD (Wat), Assoc Prof - 2007
- Voyer, Daniel, BSc, MSc (Montr.), PhD (Wat), Prof - 2000

**Minimum Academic Standards:**

A grade of C or better must be attained in each of the courses taken to meet the minimum requirements of any of the programs listed below. Students are advised to carefully plan their selection and sequencing of Foundation courses as each course is a prerequisite for higher level courses within the same Teaching Area.

**Minor**

A Minor will consist of 24 ch in Psychology courses and will include the following:

- PSYC 1013
- PSYC 1023
- PSYC 2103/PSYC 2123
- two Foundation courses (selected from PSYC 2203, PSYC 2313/PSYC 2515, PSYC 2403, PSYC 2603, PSYC 2613, and PSYC 2703), and
- three advanced level (3xxx or 4xxx) Psychology courses.

**Majors**

Students wishing to Major in Psychology will normally declare their major during their second year after they have seen their Department advisor.

**Single Major**

A Single Major will consist of 48 ch in Psychology courses and will include the following:

- Introductory Psychology 6ch (PSYC 1013 and PSYC 1023)
- Research Methods 6ch (PSYC 2103/PSYC 2123 and PSYC 2113)
- four Foundation courses 12ch (selected from PSYC 2203, PSYC 2313/PSYC 2515, PSYC 2403, PSYC 2603, PSYC 2613, and PSYC 2703)
- seven advanced level Psychology courses 21ch (3xxx or 4xxx level) and
- History of Psychology 3ch (PSYC 4053)

**Double Major**

A Double Major will consist of 42 ch in Psychology courses and will include the following:

- Introductory Psychology 6ch (PSYC 1013 and PSYC 1023)
- Research Methods 6ch (PSYC 2103/PSYC 2123 and PSYC 2113)
- four Foundation courses 12ch (selected from PSYC 2203, PSYC 2313/PSYC 2515, PSYC 2403, PSYC 2603, PSYC 2613, and PSYC 2703)
The Honours in Psychology with Specialization in Neuroscience will consist of
• a Major in Psychology with Specialization in Neuroscience will consist of 48ch in Psychology and 24ch in Biology. The Psychology courses will include the following:
  • Introductory Psychology 6ch (PSYC 1013 and PSYC 1023)
  • Research Methods 6ch (PSYC 2103/PSYC 2123 and PSYC 2113)
  • four Foundation courses 12ch (selected from PSYC 2203, PSYC 2313/PSYC 2515, PSYC 2403, PSYC 2603, PSYC 2613, and PSYC 2703)
  • seven advanced level Psychology courses 21ch (3xxx or 4xxx level)
    o Students must take one or both Basic Research Seminars (PSYC 3151, 3152) in their third year. Students must also take at least one Topical Seminar (PSYC 4003, PSYC 4103, PSYC 4203, PSYC 4223, PSYC 4303, PSYC 4403, PSYC 4603, PSYC 4713, PSYC 4743, or PSYC 4773).
  • Advanced Statistics 3ch (PSYC 3113)
  • full year Honours Thesis 6ch (PSYC 4110), and
  • History of Psychology 3ch (PSYC 4053)

The Honours Thesis: The Honours Thesis will consist of an independent research project, completed in the fourth year, supervised by a Psychology faculty member and courses in the Honours Thesis Research Seminar. Students must take one or both Basic Research Seminars (PSYC 3151, PSYC 3152) in their third year. Applicants to the Honours Program should apply by submitting the Honours Program Application Form, normally in the third year of their program, to the Honours Research Coordinator, and are encouraged to approach individual faculty members to find a supervisor. Only students with a cumulative grade point average of at least 3.6 in Psychology courses will be considered for the Honours Program.

Joint Honours: A Joint Honours will consist of 48ch in Psychology courses and will include the following:
  • Introductory Psychology 6ch (PSYC 1013 and PSYC 1023)
  • Research Methods 6ch (PSYC 2103/PSYC 2123 and PSYC 2113)
  • four Foundation courses 12ch (selected from PSYC 2203, PSYC 2313/PSYC 2515, PSYC 2403, PSYC 2603, PSYC 2613, and PSYC 2703)
  • four advanced level Psychology courses 12ch (3xxx or 4xxx level), Students must take one or both Basic Research Seminars (PSYC 3151, 3152) in their third year.
    o Students must also take at least one Topical Seminar (PSYC 4003, PSYC 4103, PSYC 4203, PSYC 4223, PSYC 4303, PSYC 4403, PSYC 4603, PSYC 4713, PSYC 4743, or PSYC 4773).
  • Advanced Statistics 3ch (PSYC 3113)
  • full year Honours Thesis 6ch (PSYC 4110), and
  • History of Psychology 3ch (PSYC 4053)

The Joint Honours Thesis: The Joint Honours Thesis is the same as the Honours Thesis described in the preceding section (The Honours Thesis).

Specialization in Neuroscience

Major
A Major in Psychology with Specialization in Neuroscience will consist of 48ch in Psychology and 24ch in Biology. The Psychology courses will include the following:
  • Introductory Psychology 6ch (PSYC 1013 and PSYC 1023)
  • Research Methods 6ch (PSYC 2103/PSYC 2123 and PSYC 2113)
  • Foundations of Biological Psychology 3ch (PSYC 2703)
  • three Foundation courses 9ch (selected from PSYC 2203, PSYC 2313/PSYC 2515, PSYC 2403, PSYC 2603, and PSYC 2613)
  • three advanced level Area 7 courses 9ch (selected from PSYC 3713, PSYC 3723, PSYC 3733, PSYC 3743, PSYC 3753, PSYC 3773, PSYC 3783, PSYC 4713, PSYC 4743 and PSYC 4773)
  • four advanced level Psychology courses 12ch (3xxx or 4xxx level), and
  • History of Psychology 3ch (PSYC 4053)

The Biology courses will consist of the following: Introductory Biology 6ch (Biol 1001 or Biol 1551 and Biol 1012 or Biol 1552) and a minimum of any six additional courses in Biology 18ch.

Honours
The Honours in Psychology with Specialization in Neuroscience will consist of 57ch in Psychology and 24ch in Biology. The Psychology courses will include the following:
  • Introductory Psychology 6ch (PSYC 1013 and PSYC 1023)
  • Research Methods 6ch (PSYC 2103/PSYC 2123 and PSYC 2113)
  • Foundations of Biological Psychology 3ch (PSYC 2703)
  • three Foundation courses 9ch (selected from PSYC 2203, PSYC 2313/PSYC 2515, PSYC 2403, PSYC 2603 and PSYC 2613)
  • three advanced level Area 7 courses 9ch (selected from PSYC 3713, PSYC 3723, PSYC 3743, PSYC 3753, PSYC 3773, PSYC 3783, PSYC 4713, PSYC 4743 and PSYC 4773)
  • four advanced level Psychology courses 12ch (3xxx or 4xxx level)
    o Students must take one or both Basic Research Seminars (PSYC 3151, PSYC 3152) in their third year. Students must also take at least one Topical Seminar (PSYC 4003, PSYC 4103, PSYC 4203, PSYC 4303, PSYC 4403, PSYC 4603, PSYC 4713, PSYC 4743, or PSYC 4773).
  • Advanced Statistics 3ch (PSYC 3113)
  • full year Honours Thesis 6ch (PSYC 4110), and
  • History of Psychology 3ch (PSYC 4053)

The Biology courses will consist of the following: Introductory Biology 6ch (BIOL 1001 or BIOL 1551 and BIOL 1012 or BIOL 1552) and a minimum of any six additional courses in Biology 18ch. The Honours Thesis is the same as the Honours Thesis described in the above section (The Honours Thesis) except that normally the research topic will be on a topic represented by Teaching Areas 6 or 7.

Majors and Honours in Psychology (Science)

Science students choosing the Psychology Option must follow the regulations provided under the Bachelor of Science in Section G of this Calendar.

SOCIOLOGY

DEPARTMENT OF SOCIOLOGY

General Information:
Tilley Hall, Room 20

Mailing Address:
Department of Sociology,
University of New Brunswick,
P.O. Box 4400, Fredericton, N.B.,
Canada, E3B 5A3

Chair:
Dr. Lucia Tramonte

FACULTY

Ballucci, Dale, BA (Guelph), MA (Wind), PhD (Alta), Adjunct - 2011
Bombak, Andrea, BSc (Calg.), MA, PhD (Manitoba), Asst Prof - 2017
Bowden, Gary, BA (W. Wash), MA, PhD (Calg), Assoc Prof - 1990
Crouse, Dan, BES (Waterloo), MES (Waterloo), PhD (McGill), RA - 2015
Datios, Tia, BA (U of T), MA, PhD (York), Asst Prof - 2015
Gill, Carmen, BA, MA, PhD (Qc), Prof - 2004
Gupta, Neeru, BSc, PhD (Montr), Health Research Chair in Diabetes - 2016
Haan, Michael, BA (Dordt), MA (Wind), PhD (Tor), Adjunct -2010
Hardy, Nick, BA, MA (Essex), PhD (Qu), Asst Prof - 2013
Harrison, Deborah, BA (Qu), MA, PhD (York), Adjunct Prof - 1995
Hofmann, David, BA (Western), MSc (U de Montreal), PhD (Waterloo), Asst Prof - 2016
Holtmann, Cathy, BA (Winnipeg), MDiv (St Michael's), MA (UNB), PhD (UNB), Assoc Prof & Dir MFM Ctr for Family Violence Research - 2015
Low, Jacqueline, BA, MA (Conc.), PhD (McM), Prof - 2001
Miedema, Baukie, BA, MA, PhD (UNB), Adjunct - 2011
Nason-Clark, Nancy, BSc (Houghton Col. NY), MA (Wat), PhD (Lond), Prof - 1984
Neilson, Linda, BA, LLB (UNB), PhD (Lond), Prof Emerita - 1993
O'Donnell, Susan, BA (Ott), MA (Cardiff), Adjunct -2004
Reddick, Andy, BA (Qu, Car), MA, PhD (Car), Adjunct - 2012
Rehorick, David A., BA, MA (Alt), PhD (Calgary), Prof Emeritus - 1974
Thériault, Luc, BA (Qc), MSc (Montr), PhD (Tor), Prof - 2005
Tramonte, Lucia, BA, MA, PhD(UNIM), Assoc Prof - 2009
van den Hoonaard, Will C., BA (UNB), MA (Mem), PhD (Man), Prof Emeritus - 1979

General Sociology Curriculum Information

The Sociology Department curriculum is divided into different levels that students should be aware of when choosing courses in which to enroll. By selecting the courses most appropriate to a student’s level of existing
sociological knowledge and current level of undergraduate study, students will have a much more rewarding learning experience. If in any doubt, contact the Sociology Undergraduate Director or a particular course instructor for enrolment guidance.

**Lower-Level Courses**

Lower-Level courses numbered in the 1000s - e.g., SOCI 1503 'Sociological Perspectives' - are considered introductory courses. A course at this level is designed with the assumption that students have no or very little background in sociology and is taught in a way that builds up knowledge of sociology. Courses may cover a variety of topics year by year, but all will help develop sociological thinking and reasoning.

1000-level courses are excellent for First-Year Arts Faculty students as well as First-, Second-, or even Third-Year students from other Faculties.

Lower-level courses numbered in the 2000s - e.g., SOCI 2603 'Sociology of Deviance' - are considered to be foundational sociology courses covering subjects and topics that are designed to give students a firm basis on which to continue studies in sociology as well as, potentially, other Arts Faculty subjects. Foundational courses focus more heavily upon a single topic (in contrast to the more general 1000-level courses), enabling students to get a firm grasp of key issues in a particular subject or topic area.

2000-level courses are recommended for students who have taken 6ch or more of 1000-level Sociology courses and/or who have already completed 30ch or more of undergraduate study.

**Upper-Level Courses**

Upper-level courses numbered in the 3000s and 4000s - e.g., SOCI 3373 'Sociology of Policing and Security' or SOCI 4334 'Education and Society' - are considered to be Upper-Level courses in sociology. At the 3000 level, courses develop abilities to conduct sociological inquiry by building upon the knowledge and skills gained in previous studies. These courses go into much more depth about the topics and subjects students are examining. At the 4000 level, courses are designed to enable students to engage at the highest undergraduate level, using clear and precise analytical and critical reasoning.

### Minor, Majors, and Honours Programs

**Minor**

The Minor in Sociology consists of 24 ch in Sociology. Enrolment in a Sociology Minor must be approved by a Sociology Undergraduate Advisor. Of the 24ch required for a Minor, at least 12 ch must be Upper-Level courses. Only courses completed with a grade of C or higher count towards a Minor Sociology.

**Major**

Students intending to take a Single or Double Major in Sociology are usually expected to have completed at least 12 ch of Sociology courses prior to entering their Major. Students must contact the Sociology Undergraduate Director for approval and to register for a Major in Sociology.

**Honours**

Students intending to take a Single or Joint Honours in Sociology are usually expected to have completed at least 12ch of Sociology courses, have a 3.3 GPA or better in Sociology courses (not including 1000-level courses), and to have a 2.7 GPA or better across their other undergraduate courses. Entry for non-Arts Faculty students or for students having taken a large number of non-Arts Faculty courses might still be approved by the Sociology Undergraduate Advisor even if their GPA is below 3.0. Students must contact the Sociology Undergraduate Director for approval and to register for the Honours program.

- Single Honours students must complete a minimum of 42ch in Sociology, of which a minimum of 36 ch must be at the Upper Level.
- Joint Honours students must complete 30ch of Sociology courses, of which a minimum of 18ch must be at the Upper Level.

The following courses are compulsory for a student to graduate with Single or Joint Honours in Sociology: SOCI 2022, SOCI 3004, SOCI 3104, SOCI 4044, SOCI 4011, and SOCI 4022.

There is an option in both the Single and the Joint Honours programs that a student may research and write an Honours Thesis (SOCI 5000). The project should produce a 40-60 page manuscript and must be approved by the Sociology Department. If taken, this option reduces the number of required credit hours (as listed above) and is only available to students with a 3.4 CGPA.

Students must complete the required number of Sociology courses with a GPA of 3.0 or better and must have an overall GPA of 2.7 or better on their general transcript. For a First Class Honours standing, students must maintain a GPA of 3.6 or above in their required Sociology courses and a GPA of 2.7 or above in their remaining courses. Only courses completed with a grade of C or higher count towards a Single or Joint Honours in Sociology.

(For further Arts Faculty regulations, please see the following link: http://www.unb.ca/academics/calendar/undergraduate/current/fredericton_programs/bachelorofarts/index.html)

### CONCURRENT DEGREE PROGRAM

**CONCURRENT DEGREE IN ARTS AND SCIENCE (BA/BSc)**

To be admitted to the Arts and Science program, students must meet the entrance requirements of both BA and BSc degrees given in the Admission Requirements Table under Admission Regulations.

The concurrent BA/BSc program is designed as a five-year program. To receive both degrees, students need a Major (or Honours) in an Arts discipline and a Major (or Honours) in a Science discipline - for example, BA (History) and BSc (Physics).

Within Science, students can major or honour in one of Biology, Chemistry, Earth Sciences, Mathematics and Statistics, Physics, or one of the Interdepartmental programs such as Biology-Chemistry. Students may also choose as their Science subject either Economics (unless already selected as an Arts program) or Psychology (unless already selected as an Arts program). Within Arts, students can major or honour in one of the following areas: Anthropology, Archaeology, Classical Studies, Classics, Economics, Economics Studies, English, French, German, German Studies, History, Media Arts & Cultures, Philosophy, Political Science, Psychology, Sociology, Spanish, World Literature and Culture Studies. In addition, interdisciplinary programs in International Development Studies, Law in Society, and Gender and Women’s Studies are available as part of an Arts Double Major or Joint Honours. Students are also advised that completing a Double Major or Joint Honours in Arts will require more credit hours than a Single Major or Honours.

This program is ideal for students with a strong interest in one of the Sciences and one of the Arts disciplines. It is also demanding and requires a serious commitment from the student from the outset and throughout the degree. Its breadth makes it an excellent pre-professional program to prepare for studies in dentistry, medicine, veterinary medicine, optometry, and physiotherapy.

Students who enter the concurrent BA/BSc program may opt to move into either the BA or the BSc program at any stage. With the exception of labs, all courses taken during the first two years can be counted towards either a BA or a BSc (or both). Approved specialized Science labs count towards the BSc degree.

Students in the concurrent program can count many of their courses toward the requirements of both degrees, so it is important to select courses carefully from the outset. Students must seek advice and pre-approval from departmental/Faculty advisors of both Faculties at every level from pre-entry enquiries through to graduation.

#### Program of Study (5 Years)

**First Year**

1. ARTS 1000 Development of Western Thought 6 ch
2. 6 term lecture courses in first-year Science (MATH 1003 or 1053 included), 4 accompanied by labs. The choice of lecture courses and lab courses is dictated by the particular area of Science in which the student intends to major or honour, and thus decisions about which lecture and lab courses a student takes should be made in consultation with a Science Faculty advisor.
SECTION G: FREDERICTON ACADEMIC PROGRAMS

3. 6 ch (in any one discipline) chosen from either Humanities (Classics, English, History, Media Arts & Cultures, Philosophy, World Literature and Culture Studies), Languages (Ancient Greek, Chinese, French, German, Japanese, Modern Greek, Latin, Russian, Spanish), or Social Sciences (Anthropology, Archaeology, Economics, Political Science, Psychology, Sociology).

OR

1. ARTS 1100 Development of Western Thought (for Academic Success) 9ch
2. 6 term lecture courses in first-year Science (MATH 1003 or 1053 included), 4 accompanied by labs. The choice of lecture courses and lab courses is dictated by the particular area of Science in which the student intends to major or honour, and thus decisions about which lecture and lab courses a student takes should be made in consultation with a Science Faculty advisor.
3. 3 ch (in any one discipline), chosen from either Humanities (Classics, English, History, Media Arts & Cultures, Philosophy, World Literature and Culture Studies), Languages (Ancient Greek, Chinese, French, German, Japanese, Modern Greek, Latin, Russian, Spanish), or Social Sciences (Anthropology, Archaeology, Economics, Political Science, Psychology, Sociology). The discipline should be different from any of the three taken under regulation 2, above, since first-year students may take no more than 6 ch in any one discipline.

Students will select their Science Major or Honours discipline at this point. Throughout the program, advice is available on the options and course requirements. Students should have written pre-approval from the appropriate Arts and Science advisors for all programs and course selection.

Second Year

1. Two additional term lecture courses in first-year Science. Whether these need to be accompanied by labs depends upon the area of Science the student has chosen to major or honour in, and as such, these courses should be chosen in consultation with a Science Faculty advisor.
2. 12 ch (6 ch in each of 2 disciplines) chosen from Arts, including at least one discipline from a group (Humanities, Languages, Social Sciences) not chosen in the first year.
3. At least 18 ch of Science courses (certain Science programs may require more than the minimum) chosen with pre-approval from the student's Science program advisor in the respective department.

Students will select their Arts Major(s) or Honours at this time with the help of Faculty and departmental/program advisors.

Third, Fourth and Fifth Years

The exact content of years 3, 4, and 5 will depend upon the particular Arts and Science disciplines chosen. Students take advanced courses to gain a thorough understanding of their chosen disciplines and to prepare for an immediate career or further work at graduate school. Students who elect to take Honours in Arts and/or Science may extend their program beyond the five years, depending on the subjects chosen.

1. Courses in Science will be chosen in consultation with, and pre-approved by, the student's Science advisor to meet the requirement of a Science degree.
2. A total of 54 ch of courses chosen in consultation with, and pre-approved by, the student's Arts Major advisor, 36 ch of which must be upper-level courses.

Students should note that at least half the advanced-level credits counted towards a Major/Honours/Minor in an Arts subject must be from courses taken at the University of New Brunswick. The same regulation also applies to Science courses. Exceptions may be considered by the Dean of Arts and the Dean of Science, respectively.

Students should note that, in any given year, their course load may not be evenly balanced between Arts and Science courses. Students should plan to meet with an advisor from both Faculties on an annual basis to ensure that the selected courses satisfy Prerequisites for upper-level courses and take account of courses offered in alternating years and other program requirements.

CONCURRENT DEGREES IN ARTS AND COMPUTER SCIENCE

Many career opportunities demand a combination of in-depth scientific training with the understanding of people and the sophisticated analytic and critical skills acquired in an Arts degree. The Faculties of Arts and Computer Science at UNB in Fredericton are cooperating to make it possible for a student to graduate with both a BA and a BCS in five years.

All Arts students concentrate on a Major or Honours program in their third, fourth, and fifth years chosen from any of the following disciplines: Anthropology, Archaeology, Classical Studies, Classics, Comparative Cultural Studies, Economics, Economics Studies, English, French, History, Media Arts and Cultures, Philosophy, Political Science, Psychology, Sociology, or Spanish. In addition, interdisciplinary programs in International Development Studies, Law in Society, and Gender and Women's Studies are available as part of an Arts Double Major or Joint Honours; however, students are advised that completing a Double Major or Joint Honours in Arts will require more credit hours than a Single Major or Honours.

This program is ideal for students with an interest in Computer Science and one of the Arts disciplines. It is also a demanding program that requires a serious commitment from the student from the outset and throughout the degree.

The concurrent program is designed so that if a student decides to opt for either degree alone part-way through the program, the adjustments can be made easily.

Students in the concurrent program are able to count many of their courses toward the requirements of both degrees, so it is important to select courses carefully from the outset. Advice is available from both Faculties at every level from pre-entry enquiries through to graduation. To complete the concurrent degree, students must satisfy both the BA and BCS degree requirements. Completing these requirements will involve completing at least 151 credit hours of courses.

Application and Admission

Students wishing to pursue the concurrent program should apply for admission to the Faculty of Arts at UNB’s Fredericton campus, specifying on the application form an interest in the concurrent program in Arts and Computer Science. Further information on the program is available from the offices of the Dean of Arts and the Dean of Computer Science.

Faculty Affiliation

Students in the concurrent program will be registered as BA/BCS students. They will be assigned to academic advisors in the Faculty of Computer Science and in the Faculty of Arts.

Sample Program of Study

First Year

1. ARTS 1000
2. MATH 1003 and MATH 1013 (or enriched MATH 1053 and MATH 1063)
3. CS 1073, CS 1083, and CS 1203
4. ECON 1013 and ECON 1023 (or ECON 1014 and ECON 1024)
5. 6 ch in either one Humanities discipline or one Language

OR

1. ARTS 1100
2. MATH 1003 and MATH 1013 (or enriched MATH 1053 and MATH 1063)
3. CS 1073, CS 1083, and CS 1203
4. ECON 1013 and ECON 1023 (or ECON 1014 and ECON 1024)
5. 3 ch in either one Humanities discipline or one Language

Students wishing to take an additional Social Science will select the course from the First-Year Arts listings in Social Sciences.

Second Year

1. CS 1303, CS 2043, CS 2253, CS 2263
2. INFO 1103
3. MATH 2213 or MATH 1503
4. 2 term courses toward the BCS Breadth Core Requirement, selected from Arts, Business Administration, Engineering, or Science
5. 9 ch of appropriate Arts courses

Third Year

1. CS 2333, CS 2383, CS 3413, CS 3853, CS 3997
2. STAT 3083 or STAT 2593
3. 15 ch of appropriate Arts courses

Fourth Year

1. CS 3383, CS 3873
2. Two CS/INFO/SWE technical electives
3. An approved third-year Math course
4. 18 ch of appropriate Arts courses

Fifth Year

1. One CS/INFO/SWE technical electives
2. Three CS/INFO/SWE technical electives at the 3000 level or above (with at least one of these at the 4000 level or above)
3. 21 ch of appropriate Arts courses

CONCURRENT BCS/BCS DEGREE PROGRAM

Most scientific careers now require a thorough background in computing. Many careers in the computing field require primary knowledge in a scientific application area. The Faculty of Science and the Faculty of Computer Science offer students a program in which to pursue a science major and a complete computer science education. Students may enroll in a concurrent degree program in which at the end of five to five-and-a-half years of study a student will graduate with both a BSc with a major in Biology, Chemistry, Earth Sciences, Mathematics, or Physics, and a BCS. Participation in the Computer Science Co-op program will lengthen the
student's program. The program is designed so that if a student decides to opt for BCS alone, the adjustments can be easily made. Students in the concurrent degree program are able to count many of their courses toward the requirements of both degrees so it is important to select courses carefully from the outset, in consultation with an advisor.

Admission requirements: Students must satisfy the admission requirements for both the Bachelor of Computer Science and the Bachelor of Science as given in Section B.

Course Selections While the first and second years given below are typical, the third, fourth and fifth year will depend on the CS and Science degree programs chosen (Major, Honours, etc.)

Year 1 CS 1073, 1083, two of (INFO 1103, CS 1203, or CS 1303), MATH 1003, 1013, (or 1053, 1063) plus four term lecture courses in first year science, all four of which are accompanied by labs, chosen from Biology, Chemistry, Physics, and Earth Sciences. The particular sciences and labs chosen will depend on the intended Science program. MATH 2203 may be substituted for CS1303. Students planning to major or minor in Mathematics are strongly recommended to choose MATH 2203 rather than CS 1303. Credit will be given for only one of CS 1303 and MATH 2203.

Year 2 One of (INFO 1103, CS 1203, or CS 1303), CS 2043, CS 2263, MATH 2213, one of (CS 2333, INFO 1103, or CS 2383), MATH 2003, plus 6 term courses in Science (minimum 18 ch) chosen in consultation and with the approval of the advisor in your chosen Science discipline.

Year 3, 4, 5 These must be arranged in consultation with your CS and Science advisors and will be different for each student.

CERTIFICATE PROGRAMS

FAMILY VIOLENCE ISSUES CERTIFICATE PROGRAM

The FVI Certificate is granted upon completion of eight (3 credit hour) courses related to the study of family violence with a minimum grade of C in each course. The program is offered by the Muriel McQueen Fergusson Centre for Family Violence Research at UNB, but the courses listed below are offered through various departments and faculties.

The FVI Certificate includes three different groupings of courses based on the proportion of material covered in the course that is directly relevant to issues of family violence: core courses (all material considered relevant); intensive courses (at least 60% of the material considered relevant); and supplementary courses (at least 30% of the material considered relevant). While students will choose a mix of core, intensive and supplementary courses, it is required that they choose a minimum of 3 core courses, and a maximum of 3 intensive courses, along with 2 supplementary courses.

Students interested in being admitted into the Family Violence Issues Certificate Program make an application to the Director of the Muriel McQueen Fergusson Centre for Family Violence Research. Admittance is based on the student's academic performance and any related employment or volunteer experiences.

Students completing the FVI Certificate are able to count those courses taken in conjunction with a Minor, Major, Honours, Double Major, or Joint Honours program towards the FVI requirements.

**Not all these courses will be offered in any given academic year**

### CERTIFICATE IN FILM PRODUCTION

The Certificate in Film Production is designed to help students develop expertise in all the areas of film, including screenwriting, acting, directing, and producing as well as the technical aspects of film and digital video production.

Students participate fully in the production structure of film-making in a variety of positions, such as camera operator, cinematographer, director and screenwriter, in addition to gaining hands on experience in the post-production process of picture and sound editing.

The program also covers basic film studies, including the history of film, because students making films learn from watching other films and analyzing how they work.

The broad range of the program not only prepares students for a variety of positions, but also helps them in making informed choices in pursuing opportunities or specialized training.

The Certificate in Film Production can be taken as a stand-alone certificate program or in conjunction with a degree program, with the approval of the appropriate faculty. Students interested in majoring in Film Production should consider instead the Film Production option in the Media Arts & Cultures program.

Candidates for admission to the Certificate Program must meet the university's requirements for admission to the Bachelor of Arts or for admission as a mature student. Enrollment in the Certificate in Film Production is limited. The stand-alone certificate is a part-time program. Students with limited or no university background who are enrolled in the stand-alone certificate should bear in mind that some upper-level courses have Prerequisites that must be met, and where appropriate should consider taking advantage of the university's writing and skills development program.

Some courses for the Certificate in Film Production may be scheduled in late afternoon or evening time slots.

#### Program Structure

The Certificate in Film Production program consists of 30 credit hours. Of these, 21 credit hours are from required courses; the remainder is from electives. Normally, a grade of C or better is required for each course in the program.

#### Required Courses

- FILM 2022 / MAAC 2022 The Art of Film (3 ch)
- FILM 2909 / ENGL 2909 International Film History (3 ch)
- FILM 2998 / MAAC 2998 Digital Filmmaking I (3 ch)
- FILM 2999 / MAAC 2999 Digital Filmmaking II (3 ch)
- FILM 3903 / ENGL 3903 Film Theory (3 ch)
- FILM 4001 / MAAC 4001 Advanced Production (3 ch)

At least one of FILM/ENGL 3181: Creative Writing: Screenwriting for Short Formats (3 ch) and FILM/ENGL 3186 Creative Writing: Feature Screenplay (3 ch). The other may be taken as one of the three electives.

#### Electives (9 credit hours must be selected)

- ENGL 2263 Shakespeare and Film (3 ch)
- ENGL 3906-9 Film Genre (3 ch)
- ENGL 3916-9 National Cinemas (3 ch)
- FILM 3075/MAAC 3075 Framing Reality: Theory and Practice of Documentary Media (3 ch)
- FILM 3082/MAAC 3082/CCS 3082 History of Canadian Cinema (3 ch)
- FILM 3981/MAAC 3981 Screen Acting (3 ch)
- FILM 3998/MAAC 3998 Film Production (3 ch)
- FILM 3999/MAAC 3999 Editing and Post-Production (3 ch)
- FILM 3066/CCS 3066/MAAC 3066 Trauma and Seduction: Early German Cinema (3 ch)
- FILM 3072/CCS 3072/MAAC 3072 (Re)constructing National Identity: Contemporary German Cinema (3 ch)
- HIST 1315 Canadian History on Film (3 ch)
- HIST 3415 America at the Movies (3 ch)
- HIST 3803 War through Film (3 ch)
- MAAC 3212 Lens Media I (3 ch)
- MAAC 3362 Sound Design (3 ch)
- SPAN/CCS 3455 Latin American Cinema (3 ch)
- SPAN/CCS 3456 The Cinema of Spain (3 ch)
- CCS 4053 Culture and Film: The Cinema of Transitional Democracies (3 ch)

Other film-related university courses may be approved as electives by the Film Production Certificate Advisor.

#### General Information

UNB’s Certificate in Publishing program is designed to prepare students for work in the publishing industry. The program is intended to complement a wide range of majors offered at UNB. It offers a combination of classroom instruction, online instruction, and experiential learning and may be taken concurrently with a UNB degree program. UNB is one of the very few Canadian universities to have founded and continuously published three internationally respected journals in the Arts and Humanities - The Fiddlehead, Academica, and Studies in Canadian Literature. This long experience, coupled with expertise in editing journals that are based elsewhere, makes UNB’s program unique.

#### Admission Requirements

The program is open only to students enrolled in a UNB Arts undergraduate degree program. Students need 30 ch to be formally admitted to the program. Students may take the core courses - PUB 2103 The Evolving Publishing Environments (3ch), PUB 3103 Assessment, Acquisition, & Editing (3ch), and PUB 3104 Production & Management Fundamentals for Print & Digital Publishing (3ch) - before applying to be admitted into the program.

Interested students should make an appointment to meet with one of the co-directors. Admissions will be limited to 12 students per year in order to enable placement in the required 6 ch of internships. Applications are available from the co-directors, and students will be chosen on the basis of a statement of interest and GPA.

#### Program of Study

The Certificate in Publishing consists of 24 ch, comprising 15 ch of required courses and 9 ch of electives chosen from the list below. Undergraduate students may begin the Certificate in their second year or later. While students might be able to complete the program in one academic year (September to August), they are advised to spread it over two years.

Courses taken to fulfill a student’s degree or program requirements may also count as Certificate in Publishing electives.

The core curriculum consists of 3 three-credit hour courses that focus on the fundamentals of publishing: the evolving publishing environment in Canada; how to acquire, assess, and edit manuscripts for publishing; and how publications are produced, with a focus on design and management fundamentals.

### SECTION G: FREDERICTON ACADEMIC PROGRAMS

Six credit hours of internships build on the core curriculum. Students take either one 6 ch or two 3 ch internship courses. Placements will be made at our three journals, or at other businesses and organizations with publishing activities, on campus and off campus. These placements give students hands-on experience in various aspects of publishing covered in the core courses. Students who have taken an ARTS 3000 Internship that complements the Certificate in Publishing may request consideration for it to count towards the internship requirement.

Students also choose 9 ch of electives from UNB’s other courses; these support students’ knowledge of the theory and context of their core courses and internship experiences. Students shall take those credits in at least two different disciplines. Elective courses are chosen for their coverage of topics, methods, or practices related to publishing and communication, or to the production, dissemination, and marketing of knowledge in various media. With the approval of the program director, other courses, including Honours seminars and transfer credits, may serve as electives.

#### Required Courses (15 ch)

- PUB 2103 The Evolving Publishing Environments (3ch)
- PUB 3103 Assessment, Acquisition, & Editing (3ch)
- PUB 3104 Production & Management Fundamentals for Print & Digital Publishing (3ch)
- PUB 3000 Publishing Internship (6ch)

In lieu of PUB 3000, students may take both PUB 3001 Publishing Internship (3ch) and PUB 3002 Publishing Internship (3ch). With approval, a publishing-related ARTS 3000/ARTS 3001/ARTS 3002 internship may be counted in lieu of PUB 3000/ PUB 3001/ PUB 3002.

#### Elective Courses (9 ch)

- ADM 1313 Principles of Marketing (3ch)
- ADM 3315 Marketing Management (3ch)
- ANTH 3346 Public Archaeology (3ch)
- ENGL 2195 Creative Writing: Poetry and Drama (3ch)
- ENGL 2196 Creative Writing: Fiction and Screenwriting (3ch)
- ENGL 2608 Introduction to Contemporary Canadian Literature (3ch)
- ENGL 3103 Creative Writing: Studio Course (3ch)
- ENGL 3113 Writing in Academic and Professional Contexts (3ch)
- ENGL 3123 Creative Writing: Poetry (3ch)
- ENGL 3143 Creative Writing: Short Fiction (3ch)
- ENGL 3153 Creative Writing: Non-Fiction (3ch)
- ENGL 3698 Canadian Literature from 1970 to the Present (3ch)
- HIST 1415 “Cowboys and Indians”? A History of Native People in Canadian and American Popular Culture (3ch)
- HIST 3736 Art for Nation? Visualizing Twentieth-Century Canada (3ch)
- HIST 5388 Understanding the Virtual Past; Making Digital History (3ch)
- HIST 5725 The Art of Public History (3ch)
- MAAC 1001 Understanding Media I: Technology and Culture (3ch)
- MAAC 1002 Understanding Media II: Power and Pleasures (3ch)
- MAAC/CCS 1021 Introduction to Culture, Arts, and Media (3ch)
- MAAC 1023 Media, Technology, and Creativity (3ch)
- MAAC/CCS 2021 Popular Culture (3ch)
- MAAC 2998 Digital Film Production I (3ch)
- MAAC 2999 Digital Film Production II (3ch)
- MAAC 3101 Media Design I (3ch)
- MAAC 3102 Media Design II (3ch)
- MAAC 3212 Lens Media I (3ch)
- MAAC 3213 Lens Media II (3ch)
- MAAC 3057 Advertising and Consumer Culture (3ch)
- PSYC 3063 Psychology and the Internet (3ch)
- SOCI 2223 Introduction to Mass Communications (3ch)
- SOCI 2533 Information Society (3ch)
- SOCI 3252 International Media, Culture, and Communications (3ch)
- SOCI 3253 Sociology of Media (3ch)

When choosing electives and internships, students may wish to consider concentrating in one of the following areas:

1. Literary & Trade Publishing
2. Academic Publishing
3. Public Outreach & Communications
4. Production, Design & Digital Media
5. Business & Marketing for Publishing
SECTION G: FREDERICTON ACADEMIC PROGRAMS

ARTS AND LAW

Students may be admitted to the Faculty of Law after they have successfully completed three years of the BA program. For further information regarding admission to the Faculty of Law, please consult the Faculty of Law Calendar or visit the Faculty of Law website at http://law.unb.ca/

BACHELOR OF ARTS AND SCIENCE (BAS)

The Faculties of Arts and Science at UNB in Fredericton are co-operating to make it possible for a student to combine Arts and Science in this four-year degree program.

This Joint Program allows students
• to experience academic work in both Faculties before committing themselves to a specialization;
• to gain a broader and more systematic exposure to disciplines outside that specialization; and
• to prepare for subsequent degree programs that permit or encourage a broader distribution of courses; such programs include the General Science Program and various preprofessional programs leading to study in dentistry, medicine, veterinary medicine, optometry, and physiotherapy.

To be admitted to the Joint Arts and Science program, students must meet the entrance requirements for the BAS as outlined in the Admission Requirements Table under Admission Regulations.

To earn a BAS degree, students must complete the requirements of a Supplementary Major in an Arts subject and a Specialization in a Science subject. The requirements for a Supplementary Major are the same as those for one subject taken as part of a Double Major.

Within Science, students can specialize in one of the following subjects: Biology, Chemistry, Earth Sciences, Mathematics and Statistics, Physics, Economics (unless already selected as an Arts program), Psychology (unless already selected as an Arts program). Within Arts, students can select a Supplementary Major in one of the following areas: Anthropology, Archaeology, Classical Studies, Classics, Economics, Economics Studies, English, French, German, German Studies, History, International Development Studies, Law in Society, Media Arts & Cultures, Philosophy, Political Science, Psychology, Sociology, Spanish, Gender and Women's Studies, World Literature and Culture Studies.

Program of Study

First Year
1. ARTS 1000 Development of Western Thought.
2. 6 term lecture courses in first-year Science (MATH 1003 or 1053 included), 4 accompanied by labs. The choice of lecture and lab courses is dictated by the particular area of Science in which the student intends to specialize, and thus decisions about which lecture and lab courses a student takes should be made in consultation with a Science Faculty advisor.
3. 6 ch (in any one discipline) chosen from either Humanities (Classics, English, History, Media Arts & Cultures, Philosophy, World Literature and Culture Studies), Languages (Ancient Greek, Chinese, French, German, Japanese, Modern Greek, Latin, Russian, Spanish) or Social Sciences (Anthropology, Archaeology, Economics, Political Science, Psychology, Sociology). The discipline should be different from any of the three taken under regulation 2, above, since first-year students may take no more than 6 ch in any one discipline.

Second Year
1. Two additional term lecture courses in first-year Science. Whether these need to be accompanied by labs depends upon the area of Science the student has chosen to specialize in, and as such, these courses should be chosen in consultation with a Science Faculty advisor.
2. 12 ch (6 ch in each of 2 disciplines) chosen from Arts, including at least one discipline from a group (Humanities, Languages, Social Sciences) not chosen in the first year.
3. At least 18 ch of Science courses chosen in consultation with and pre-approved by the Science Faculty advisor.

Students will normally select a Supplementary Major in Arts and a Specialization in Science at this time, and should discuss the options with their Arts and Science advisors.

Third and Fourth Years

The exact content of years 3 and 4 will depend upon the particular Arts and Science areas chosen. Students take advanced courses to give them a thorough understanding of their chosen subjects and prepare them for an immediate career or further work at graduate school. Students who elect to take a Single Major or Honours in Arts and/or Science may extend their program beyond the four years, depending upon the subjects chosen.

1. A minimum of 36 ch total in Science chosen in consultation with, and pre-approved by, the student's Science advisor. At least half of these courses must be at the 3000 or 4000 level.
2. 36 ch total chosen in consultation with, and pre-approved by, the student's Arts Major advisor, 18 ch of which must be at the 3000 or 4000 level.

Students should note that at least half the advanced-level credits counted towards the BAS degree must be from courses taken at the University of New Brunswick. Exceptions may be considered by the Deans of Arts and Science. Students should also note that, in any given year, their course load may not be evenly balanced between Arts and Science courses. Students should plan to meet with advisors from both Faculties on an annual basis to ensure that the selected courses satisfy Prerequisites for upper-level courses and take account of courses offered in alternating years, and other program requirements.

Students who enter the BAS program may opt to move into the BA program, the BSc program, or the concurrent BA/BSc program at any stage. With the exception of laboratory courses, all courses taken during the first two years can be counted towards either a BA or a BSc degree (or both). Approved specialized Science laboratory courses will count towards the BSc degree or the Concurrent Degree in Arts and Science (BA/BSc).

Instead of graduating with a BAS at the end of the four-year program, students may continue for a fifth year to earn both a BA and a BSc, two degrees, with a Major (or Honours) in an Arts discipline and a Major (or Honours) in a Science discipline - for example, BA (History) and BSc (Physics). See the following section for the five-year concurrent degree program in Arts and Science.

For further details on subjects in Arts, see the Bachelor of Arts portion of the Fredericton Programs section of this Calendar.
**BACHELOR OF APPLIED ARTS (CRAFT AND DESIGN)**

**GENERAL INFORMATION**

This four-year articulated degree program offers a unique combination of academic and practical study, offering the advanced reasoning, research, and writing skills of a traditional liberal arts education at UNB along with the hands-on experience of studio art courses offered by the New Brunswick College of Craft and Design, one of Canada's most respected fine craft and design schools.

**Eligibility**

Admission to the Bachelor of Applied Arts (BAA) program is through the University of New Brunswick. Applicants must meet the admission requirements for the BA degree and will follow the normal admission procedures of the University of New Brunswick. Students must indicate on both admission forms which institution they wish to attend first. Deadline to apply is March 31.

Prospective applicants and students wishing to transfer into the program with advanced credit should contact the office of the Dean of Arts or the BAA program advisors at either UNB or the New Brunswick College of Craft and Design.

**Program of Study**

The BAA is a four-year degree program, two years of which are taken at the New Brunswick College of Craft and Design (NBCCD) and the remaining two years (60 ch) at the University of New Brunswick Fredericton (UNBF). The two required years at NBCCD will generally consist of the Foundation Visual Arts Certificate and the first year of the Diploma in Fine Craft. Students may start at either institution, may attend each school in alternate years, or complete the requirements of one before moving on to another.

**Year 1 at UNB**

The first year consists of 24 ch at the first-year level and 6 ch at either the first-year or second-year level. Students may be advised to take certain courses that relate to their interest in craft and design, to their future career plans, and/or to upper-level courses they plan to take in Year 2 at UNB.

Courses are required as follows:

- ARTS 1000 (6 ch)
- 6 ch in each of three disciplines chosen from the four groups of disciplines (A, B, C, D) listed below (18 ch).
- The remaining 6 ch may be taken in any Arts or Science discipline, or taken as 3 ch in each of two disciplines, including those already being taken this year; the course(s) in this category may be at either the first-year or second-year level. In addition to disciplines listed in groups A-D, students may take courses in Drama, Film, Music, Gender and Women's Studies, or International Development Studies to meet this requirement (6 ch).

**OR**

- ARTS 1100 (9 ch)
- 6 ch in each of three disciplines chosen from the four groups of disciplines (A, B, C, D) listed below (18 ch).
- The remaining 3 ch may be taken in any Arts or Science discipline; the course(s) in this category may be at either the first-year or second-year level. In addition to disciplines listed in groups A-D, students may take courses in Drama, Film, Music, Gender and Women's Studies, or International Development Studies to meet this requirement (3 ch).

**NOTES:**

1. Other languages such as Arabic, Maliseet, and Mi’kmaq (when available) may be taken to satisfy the requirements of Group A.
2. Lower level laboratory courses taken in other Faculties will not be counted in the credit hour total but will be counted in the calculation of the Grade Point Average (GPA) for the BA program.

**Year 2 at UNB**

The second year at UNB consists of 30 ch of lecture courses or seminars, of which at least 24 ch must be chosen from the 3000-4000 level in consultation with the program advisor. Normally, students may not take independent study, reading, or thesis courses. The course selection should support the student’s interest in craft and design. Courses required are as follows:

- 12 ch in Cultural Studies and Art History
- 6 ch in humanities, social sciences, fine arts
- 6 ch in skill development: math, language, multimedia, science, English (creative or expository writing)
- 6 ch optional from any of the above or others as approved

**Year 1 and Year 2 at NBCCD**

For more information on the program at NBCCD please see NBCCD Programs overview (https://nbccd.ca/programs/bachelor-applied-arts).

- Wiedenmaker, Martin, BSc (UBC), MSc (Tech. Univ. Delft), PhD (Erasmus), Assoc Prof - 2002

---

**General Information**

Through the cooperation of New Brunswick business firms and professional associations, the Department of Business Administration was created in the Faculty of Arts during 1951 to service the needs of Canadian business for men and women with specialized training in the field of management. A School of Administration superseded the Department in 1975 and the Faculty of Administration was established during 1980. The Faculty's operations since 1987 have been based in Ethel Francis Singer Hall, a building named in memory of the first Jewish woman (BA'35, MA '38) to graduate from the University of New Brunswick.

The four-year program leads to the degrees of Bachelor of Business Administration (BBA) or Honours BBA. The course of studies is designed to ensure that students receive a broad-based education, by requiring a variety of courses from across the University, as well as courses from the functional areas within the Faculty of Business Administration. Students will be made aware of the economic and environmental context within which modern business operates, as well as learning about administrative principles and practices.

Business Administration courses include accounting, finance, general management, human resource management, law, management information systems, marketing, operations management, organizational behaviour, and quantitative analysis. Lectures, class discussions, laboratory work, essays, and case studies are used depending upon the requirements of the subject.

---

**1. Business Administration and Accounting**

Candidates who are considering entering the accounting profession are invited to discuss the matter with members of the Faculty. A student may also write to:

CPA New Brunswick
860 Main St., Suite 602, Moncton N.B. E1C 1G2

---

**2. Business Administration and Law**

BBA students who have completed three years of the BBA program may be admitted to the Faculty of Law and may qualify for the BBA degree by successfully completing the first year of the Law program. In order to qualify for the BBA, the students must have credit for all of the REQUIRED courses specified for the BBA degree, with the exception of ADM 3123. Students must apply and be accepted by the Faculty of Law.

---

**3. Graduate Study in Business Administration**

The Faculty of Business Administration offers an MBA (Master of Business Administration) degree program. Information regarding the program may be obtained from the School of Graduate Studies.

Most universities in Canada and in the United States which offer graduate programs in Business Administration (MBA, MPA, etc.) require applicants to submit the results of the Graduate Management Admission Test. Students who think they might wish to enter a graduate program in Business Administration should arrange to write this test in their senior year.

An undergraduate degree in business administration is not required for admission into the MBA program.

---

**4. Graduates of A Community College or Equivalent System**

Students who have completed or partially completed such programs may be granted credits toward the BBA. Entering students will be advised of their status, as provided for in the General Regulations of the University.

---

**5. University Regulations**

Any point not covered in the following regulations will be governed by the General University Regulations in Section B of this Calendar. Questions concerning the regulations should be directed to the Registrar in writing.

---

**Conditions Regarding Admission to the BBA Program**

All admissions are on a competitive basis and are subject to availability of space. Satisfaction of minimum requirements does not guarantee admission.

A student who is not registered in the BBA program may not take more than 24 ch of ADM courses without approval from the Faculty of Business Administration.
Transfer Students
A student's scholastic record normally must satisfy the general admission requirements of the Faculty of Business Administration specified in Section B.1.

A minimum cumulative GPA of 2.0 normally is required for a student to be considered for transfer into one of the Faculty's programs.

A student normally will not be allowed to transfer into the Faculty mid-year through the academic year.

Application is by special form available from the Registrar's Office and must be submitted to the Registrar's Office by 31 March.

Upon admission, transfer students must take ADM 1113 during their first term of studies.

6. BBA for Students with another Bachelor's Degree
(See also Requirement for a Second Undergraduate Bachelor's Degree, Section B of this Calendar)

Students who obtained a GPA of 3.0 or better in their undergraduate degree program should consider applying for the MBA program (see Section 3).

A. Graduates of UNB and Other Universities

Graduates of UNB are required to complete successfully a minimum of 30 additional ch and to have credit for all the required courses (or their equivalents) in the BBA program. In addition, students must maintain a session grade point average of at least 2.0 (see Section 8 on Degree Standing on Graduation below).

Graduates of other recognized universities must also have credit for all of the courses specifically required for the BBA but must, in addition, have successfully completed a minimum of 60 ch for the BBA degree or 63 ch for the Honours BBA degree at UNB. In addition, students must maintain a session grade point average of at least 2.0 (see BBA Regulations 7D, 7E and 8.)

B. Degree Standing on Graduation

Students taking the BBA program as a second degree may graduate with First, Second, or Third Division standing but not with Distinction.

i. Students who have a UNB undergraduate degree and are thus required to take a minimum of 30 additional ch (and to have credit for all the required courses in the BBA program) will have their division standing calculated on the basis of all the courses they take while registered for the BBA degree, plus all of the required courses for the BBA for which they received grades from UNB in their other undergraduate degree at UNB.

ii. Students whose first undergraduate degree is from another university are required to complete at least 60 additional ch and to have credit for all required courses in the BBA program. Their division standing will be calculated on all of the courses they have taken while registered at UNB.

7. BBA Regulations

A student who had been registered in the BBA program and who withdrew while on probation or who was required to withdraw from the program will not be eligible to re-enter the program without the approval of the Faculty of Business Administration.

The regulations in respect to the BBA degree are expressed in terms of letter grades, credit hours and grade point averages. These are referred to below.

A. Letter Grades

A candidate's final standing in a course is indicated by one of the letter grades stated in Section B (Grading System and Classification) of this Calendar. A grade of C or better meets the prerequisite standards for Business Administration courses.

B. Credit Hours

The number of credit hours assigned each course is stated in Section F of this Calendar. Due to differences in the methods used by the various Faculties in the calculation of credit hours, students who elect to register for courses taught outside of the Faculty of Business Administration should note the following:

i. For purposes of the BBA degree, any course taught outside of the Faculty of Business Administration, which has a course number ending in zero and which is taught over the full academic year, will receive the number of credit hours normally assigned by the Faculty in which the course is taught, up to a maximum of 6.

ii. For purposes of the BBA degree, any course taught outside of the Faculty of Business Administration, which has a course number ending in other than zero and which is offered in one term of the academic year, will receive the number of credit hours normally assigned by the Faculty in which the course is taught up to a maximum of 3.

C. Grade Point Averages

The method of calculating grade point averages is explained in Section B (Grading System and Classification) of this Calendar.

Students registered in the BBA program must maintain an assessment grade point average of at least 2.0 throughout the program. (See Section B of this Calendar for further details of GPA, standing and promotion requirements).

To earn a degree, a student must have successfully completed at least 120 ch (see Section 10) in approved courses. A grade of at least C must be attained in all the courses specifically required for the degree.

Laboratory courses normally will not be counted in the ch total or in the calculation of the grade point average.

D. Credits Required at UNB

At least 60 ch for the BBA degree must be taken at UNB and must normally include all the required courses in the BBA degree program. (Under extraordinary conditions, a student may be permitted to take some of those courses elsewhere with the prior consent of the Faculty of Business Administration and the Registrar.)

E. Changes in Degree Requirements

Improvements in the BBA program may lead to changes in the requirements for the degree. The University reserves the right to require candidates already enrolled to meet the revised requirements where practicable.

F. Majors and Concentrations

Students who elect to seek the Honours BBA degree must complete their other degree requirements. See Section 11.

Students may select a Joint Honours in Finance and Economics by selecting appropriate optional courses. See Section 12.

Students who elect to seek the Honours BBA degree must complete a major in an area of Business Administration. A Major requires the successful completion of at least 24 ch of advanced level courses designated by the Faculty of Business Administration. See Sections 9, 10, and 12.

8. Degree Standing on Graduation

In order to qualify for a degree, a student in the regular degree program must have successfully completed at least 120 ch of approved course work including a grade of at least C in all the courses required for the BBA degree in accord with Sections 9B and 10. A student must complete at least 126 ch of approved course work including a grade of C in all the courses required for the Honours BBA degree and must meet the conditions specified in Sections 9, 10 and 12.

At graduation all successful candidates for the degree of Bachelor of Business Administration shall be listed in alphabetical order within the appropriate degree category as stated below:

A. Distinction

A student who attains a cumulative grade point average of at least 3.8 over the final 60 ch of course work and no grade less than C over the final 90 ch of course work shall graduate with Distinction.

B. First Division

A student who attains a cumulative grade point average of at least 2.5 but less than 3.5 over all courses attempted in the program at the University shall graduate in First Division.

C. Second Division

A student who attains a cumulative grade point average of at least 2.5 but less than 3.5 over all courses attempted in the program at the University shall graduate in Second Division.

D. Third Division

A student who attains a cumulative grade point average of less than 2.5 over all courses attempted in the program at the University shall graduate in the Third Division.
A. General Information
1. Choice of program: For Upper level students, two program paths are available: BBA and Honours BBA. Upon the successful completion of 60 ch, students must declare their intent to follow one or the other of these two paths. Their decisions must be made in consultation with the academic advisors of the Faculty of Business Administration. The Honours degree is designed for candidates with a high level of ability who wish to undertake intensive study of an area within business administration. Students who satisfy the requirements for an Honours degree will have that designation included on their final transcript.

2. Approval of courses: Students are expected to consult with the academic advisors of the Faculty of Business Administration in the development of their program of study. Students must follow the course sequence outlined in this Calendar and complete Prerequisites prior to enrolment in intermediate-or upper-level courses. Approvals for any exceptions to this policy will occur only under extraordinary conditions.

3. The normal course load for all BBA students is 30 ch in each of the first two years of the program. Students who take the BBA degree complete 30 ch in each of the last two years. Students who take the Honours BBA degree must complete a further 6 ch in the last two years.

4. A full-time student is one whose work load consists of a minimum of 12 ch in each term (or 24 ch for two terms in the regular session). Students may enroll for a maximum of 36 ch in any year of the program provided they have completed at least a 2.5 grade point average on at least 30 ch in the immediate preceding year at university. Students who do not obtain at least a 2.5 grade point average on at least 30 ch in the immediate preceding year at university are advised to take no more than 30 ch of course work. Students should take no more than 12 ch per term of course work in a year following placement on academic probation, or upon re-entering university after being required to withdraw. Part-time students are subject to the maximum course loads permitted in Summer Session.

5. Candidates must obtain a grade of at least C in the courses required for the BBA degree. This includes all required Business Administration courses, all first or second year electives from Groups A, B, and C (see Section 10). As outlined below, students who seek to complete a concentration or Major within Business Administration must also obtain a minimum cumulative GPA on the courses designated for the concentration or Major (see Section 11).

6. At least 39 ch of electives must be chosen from courses beyond the introductory level. These normally include courses for which there are Prerequisites. Prerequisites include both specific courses and/or specific credit hour specifications.

7. At least 12 of the 39 ch in A.7 must be courses beyond the introductory level from within a single faculty other than the Faculty of Business Administration. Students should select those electives in consultation with the academic advisors of the Faculty of Business Administration. The courses should constitute a logical and coherent set of studies.

8. It is the responsibility of a student to ascertain that elective courses are acceptable for BBA or Honours BBA degree credit. Service courses offered by other faculties are not acceptable for degree credit. In addition, various courses (such as those in statistical methods) duplicate some of the material in required Business Administration courses and will not be accepted for credit. The following courses are not allowed for BBA or Honours BBA credit: CE 3003, CE 3963, CE 3973, CE 5623, ED 3113, ENGC 4013, FE 3222, FE 3803, FE 5252, FOR 3006, ME 3232, PSYC 2113, PSYC 2123, SOCI 3123, and the following STAT courses: 2043, 2253, 2263, 2264, 2283, 2293, 2593.

B. BBA Degree
1. Students taking a BBA must complete at least 120 credit hours (ch) of approved course work and maintain an assessment year grade point average of at least 2.0 in order to qualify for the BBA degree.

2. Students complete the Business Information Skills Certificate (offered by the Faculty in partnership with UNB Libraries). UNB’s Co-Curricular Program, and at least six additional certificates of proficiency (or the equivalent professional development courses) that are approved by the Faculty. Students are responsible for consulting with their academic advisor for proof of completion requirements and to secure a list of approved certifications and professional development courses.

3. Not more than 30 ch of Business Administration electives may be counted for degree credit.

C. Honours Degree
1. Students must apply for Honours after the completion of 60 ch. Students subsequently will be permitted to enter the Honours BBA only under exceptional circumstances. Entrance into the Honours BBA requires that a student shall have demonstrated a high level of ability in first- and second-year level courses. The Faculty of Business Administration will normally refuse to admit to Honours students whose cumulative GPA is below 3.0 at the completion of 60 credit hours or whose grades in relevant courses are below B. Students should note that admission is competitive and meeting minimum requirements does not guarantee admission.

2. Students taking the Honours BBA path must complete at least 126 ch of approved course work, including at least 24 ch in courses for a designated major within Business Administration. (See Section 12).

3. Students must maintain an assessment year grade point average of at least 3.0 in order to qualify for the Honours BBA. Students also must achieve a cumulative GPA of 3.0 or above on the courses designated for a major.

4. Honours candidates who are able to fulfill the requirements laid down for a Major, in a discipline outside the Faculty of Business Administration, may, if they choose, register for a supplementary Major. Their transcripts will record that they have fulfilled the requirement for a Major in that subject. Registration for the supplementary Major shall normally be completed no later than the completion of 90 ch.

5. Not more than 36 ch of Business Administration electives may be counted for degree credit.

6. Concentrations: Students completing an Honours BBA may also take a concentration in another area of Business Administration but may need additional Administration electives in order to complete the concentration (See Sections 11 and 12 below).

10. Curriculum Requirements
Students are responsible for ensuring that they meet all the requirements specified for the degree. These include the minimum credit hour requirements, grades of at least C in the required courses and all first year elective requirements from Groups A, B, and C (see below). A cumulative GPA of 3.0 or above must be achieved on the courses designated for a concentration or a major. Students are advised to consult Section F of this calendar for detailed course descriptions including the number of credit hours assigned to each course.

Students will normally take their courses in the following sequence:

0-30 Credit Hours
A. 24 ch of required courses
   - ECON 1013 (first term)
   - ECON 1023 (second term)
   - MATH 1833 (first term; see NOTE (2) below)
   - MATH 1823 (second term; see NOTE (2) below)
   - ADM 1123 (first term)
   - ADM 1192 (second term)

B. 6 ch of electives from the Breadth Group (see NOTE (1) below)

31-60 Credit Hours
A. 21 credit hours of required courses
   - ADM 2223 (either term)
   - ADM 2413 (either term)
   - ADM 2513 (either term)
   - ADM 2623 (first term; see NOTE (3) below)
   - ADM 2624 (second term; see NOTE (3) below)
   - ADM 2815 (either term)
   - PHIL 2203 (either term; see NOTE (3) below)

B. 9 ch of electives from the Breadth Group (see NOTE (1) below)

61-90 Credit Hours (BBA)
61-90 Credit Hours (Honours BBA)
A. 9 ch of required courses
   - ADM 3123 (either term)
   - ADM 3573 (either term)
   - ADM 3713 (first term)

B. 3 ch of electives from the Breadth Group (see NOTE (1) below)

272
SECTION G: FREDERICTON ACADEMIC PROGRAMS

Students must take ADM 3315, ADM 3345, ADM 4325, and a Marketing elective to receive a concentration. Available electives are: ADM 3316, ADM 4315, ADM 4316, ADM 4326, ADM 4335, ADM 4336, ADM 4435, ADM 4436, ADM 4533 ADM 4535, ADM 4496.

12. Major Courses

Honours BBA students must complete a major in a designated subject. A major is completed by achieving a cumulative average GPA of 3.0 for at least 12 ch of approved subjects in the area of interest, with a minimum grade of C for any individual course. Students wishing to undertake a major must consult with advisers in the Faculty of Business Administration and should note that some electives may not be available in a session. Courses entailing internship or independent study require prior approval and are subject to faculty and placement availability.

Students should note that at least half the credits counted towards a BBA Honours program must be from courses taken at the University of New Brunswick. Exceptions may be considered by the Dean of Business Administration.

Approved courses for each major subject are as follows:

**Accounting**

18 ch comprised of: ADM 3215, ADM 3216, ADM 3225, ADM 4215, ADM 4216, and ADM 426, At least 3 ch from: ADM 3415, ADM 3435, ADM 3445, ADM 4218, ADM 4245, ADM 4295, ADM 4415, ADM 4425, ADM 4545, ADM 4475, ADM 4495, ADM 4496, ECON 3013, ECON 4013, ECON 4023, ECON 4625, and ECON 4685. An additional 3 ch of other Economics electives beyond the introductory-level.

**Finance**

6 ch comprised of ADM 3415 and ADM 4445. 3 ch comprised of ADM 3628 or approved equivalent. At least 15 ch from the following Groups A and B, with a minimum of 9 ch from Group A.

*Group A:* ADM 4345, ADM 4416, ADM 4421, ADM 4425, ADM 4426, ADM 4450, ADM 4455, and ADM 4475 (or MATH 4853).

*Group B:* ADM 4450, ADM 4462, ADM 4415, ADM 4435, ADM 4497, ADM 4495, ADM 4496, ECON 3013, ECON 3023, ECON 3205, ECON 4891, ECON 3665, and MATH 3813.

NOTE: Group B may include another 3 ch advanced-level university course, subject to the prior approval of the Faculty of Business Administration.

**Finance and Economics**

6 ch comprised of ADM 3415 and ADM 4445. 3 ch comprised of ADM 3628 or approved equivalent.9 ch from: ADM 4345, ADM 4416, ADM 4421, ADM 4426, ADM 4462, ADM 4495, ADM 4497, ADM 4545, ADM 4583, ADM 4625, ECON 3013, ECON 3023, ECON 3025, ECON 3665, ECON 4013, ECON 4023, and ECON 4625.

**Human Resources Management**

3 ch comprised of ADM 3875. At least 21 ch of additional electives from: ADM 4525, ADM 4526, ADM 4815, ADM 4825, ADM 4827, ADM 4828, ADM 4835, ADM 4845, ADM 4856, ADM 4857, ADM 4878, ADM 4895, ADM 4896, ADM 4990, ECON 3724.

**Marketing**

9 ch comprised of: ADM 3315, ADM 3345, ADM 4325. At least 15 ch of electives from: ADM 3315, ADM 3316, ADM 4315, ADM 4316, ADM 4317, ADM 4326, ADM 4335, ADM 4336, ADM 4345, ADM 4346, ADM 4353, ADM 4355, ADM 4395, ADM 4996, ADM 4615, ADM 4990, RSS 4081, SOCI 3252, SOCI 3253.

13. Co-operative Education Option

The Faculty of Business Administration offers a Co-operative Education (Co-op) option that is available to academically qualified BBA students who have completed one year of study. Co-op is "practical" education which extends the learning process beyond the classroom into the workplace by alternating academic study terms with paid periods of career related work experience. The Co-op Option in Business Administration consists of eight study terms and three work terms of four months each. This option is normally completed in four calendar years, compared to four academic years for the regular BBA degree. The Co-op option allows students to complete concentrations or majors per degree requirements (see Sections 9B, 9C, 11, 12), in addition to Co-op. Students normally apply for entry to the Co-op option during their second term of study. Later application and entry into the co-op option may be possible.

a. Admission to the Co-op option is competitive. Students must achieve a GPA of at least 3.0 in the study term preceding their application for employment. Students are advised to contact the Faculty of Business Administration Co-op Coordinator for additional acceptance criteria.

b. Students must register for each work term in order that they be considered full-time students while working.

c. A work term fee will be charged for each 4 month work term registered.
SECTION G: FREDERICTON ACADEMIC PROGRAMS

d. A student’s progress on work terms will normally be jointly monitored by the employer and through on-site visits by the Co-op Coordinator. As well, the employer will complete an evaluation of the student. The student must discuss these evaluations with the Coordinator upon returning to UNBF from the work term.

e. Students must have a minimum of 3 work terms, alternating with study terms, with satisfactory employer evaluations and work term reports to meet the requirements of the Co-op option. Upon graduation with the BBA degree, Co-op students meeting these requirements will have the designation "Co-operative Education" following the degree designation on their transcript.

f. Students will normally have at least one study term after their last work term.

g. Each successful work term will be noted on the student’s transcript.

h. Upon successful completion of three work terms, students will be registered in ADM 4195, Co-operative Education.

14. Minor in Business

The Minor in Business is designed for students from outside the Faculty of Business Administration interested in a coherent package of Business Administration courses.

The Minor in Business will consist of 24 credit hours of approved Business Administration courses. Students planning to minor in Business will be required to take ADM 1015 and 21 additional credit hours chosen in consultation, and in advance, with the Faculty of Business Administration. At least 12 of the 24 credit hours must be from the 3000 and 4000 level courses. A grade of C or better is required in each course used towards the Minor in Business.

Students should note that at least half the credits counted towards a Minor in Business must be from courses taken at the University of New Brunswick. Exceptions may be considered by the Dean of Business Administration.

15. ROYTEC OPTION

The UNB Faculty of Business Administration offers a BBA in participation with the Royal Bank Institute of Business and Technology (ROYTEC) in Trinidad. Further information is available from the Faculty of Business Administration.

16. Certificate Programs

The Faculty of Business Administration offers degree credit courses leading to Certificates in Business Administration, Public Administration, Applied Human Resources Management, and First Nations Business Administration. Students may take these programs on a part-time or full-time basis.

These certificate programs are designed to provide individuals, especially working adults, with an opportunity to engage in systematic and coordinated study directed towards an academic goal. Participants enrolled in the certificate programs will have an opportunity to study the basic principles of administration and management; to improve their analytical skills; to increase their awareness of the various factors contributing to effective decision-making; and to understand the basic functions of organizations.

The certificate programs will be of particular interest to those men and women who are engaged in administration or are contemplating a career in administration or management and wish to expand their knowledge in the related subject areas. The courses in the certificate programs are presented at the undergraduate level of study and provide a framework for theoretical analysis of general principles of administration through lectures, discussions and individual study. By combining accumulated work experience and formal class-room learning, participants will be able to relate theory and practice as part of their continuing development.

All courses for the certificates are degree-credit courses. Individuals who successfully complete certificate courses and who are subsequently admitted to a degree program normally will receive credit towards a degree for those courses normally acceptable for credit in the particular degree program. Individuals admitted to a BBA degree program will normally be able to apply all certificate courses completed to their degree program.

General Regulations

The following regulations apply to the certificate programs in business administration:

1. Certificate in Business Administration Level I
Certificate in Business Administration Level II
Certificate in Public Administration Level I
Certificate in Public Administration Level II
Certificate in Applied Human Resources Management

2. A maximum of 12 credit hours or the equivalent normally may be transferred from another degree, certificate or similar program taken elsewhere.

3. Each student seeking admission to a certificate program must receive the prior approval of the Faculty of Business Administration. The certificate programs are not necessarily designed for completion in one year. There may be variations with course offerings and Prerequisites.

4. A certificate may be awarded to a student enrolled in a UNB degree program other than the BBA degree. Students who have withdrawn from the BBA degree program may apply for the appropriate certificate.

5. To earn a certificate, a student must have successfully completed the number of credit hours in approved courses specified for the certificate, and achieved a cumulative grade point average of at least 2.0.

6. There is no minimum age and there are no specific Prerequisites for entrance into a Level I Certificate Program in Business Administration or in Public Administration. Successful completion of a Level I Certificate is the prerequisite for entrance into a Level II Certificate Program. Although there are no specific entrance requirements for this program, students are expected to undertake university-level study and assignments demanded in degree-credit courses. Some courses, such as Finance, Computer Science and Business Statistics, may require knowledge of high school mathematics.

7. The Certificate Program in Applied Human Resources Management requires approval for entrance from the Faculty of Business Administration and applicants must meet specific admission criteria (see below).

8. The normal Prerequisites for ADM 2623 will be waived for candidates in the certificate programs.

Certificate in Business Administration Level I

Admission

This program is open to all interested individuals but admission requires prior approval from the Faculty of Business Administration.

Requirements

A Certificate in Business Administration Level I will be awarded to individuals who:

a. achieve a cumulative grade point average of at least 2.0 over the 36 credit hours required, and

b. successfully complete (with a C or better):

<table>
<thead>
<tr>

<tr>
<td><strong>Total Credit Hours</strong></td>
<td><strong>36</strong></td>
</tr>
</tbody>
</table>

NOTE: Students who plan to complete the BBA should take ADM 1192 rather than ADM 1015.

Certificate in Business Administration Level II

Admission

This program is open to all interested individuals but requires successful completion of the Certificate in Business Administration Level I. Approval for admission must also be received from the Faculty of Business Administration.

Requirements

A Certificate in Business Administration Level II will be awarded to individuals who:

a. achieve a cumulative grade point average of at least 2.0 over the 66 credit hours required, and

b. successfully complete (with a C or better):

<table>
<thead>
<tr>
<th>Course</th>
<th>Ch</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADM 1015 Introduction to Business (see NOTE below)</td>
<td>3</td>
</tr>
<tr>

<td>3</td>
</tr>
<tr>
<td>ECON 1023</td>
<td>Principles of Macroeconomics</td>
<td>3</td>
</tr>
</tbody>
</table>

Plus:

- Six credit hours in the Humanities or Languages
- Eighteen credit hours of electives from any faculty including Business Administration

Total Credit Hours: 66

**NOTE:** Students who plan to complete the BBA should take ADM 1192 rather than ADM 1015.

---

### Certificate in Public Administration Level I

**Admission:**
This program is open to all interested individuals but admission requires prior approval from the Faculty of Business Administration.

**Requirements:**
A Certificate in Public Administration Level I will be awarded to individuals who:

- achieve a cumulative grade point average of at least 2.0 over the 36 credit hours required, and
- successfully complete (with a C or better):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Ch</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td>POLS 2202</td>
<td>Canadian Politics</td>
<td>3</td>
</tr>
</tbody>
</table>

Plus:

- Nine credit hours in total chosen from Anthropology, Political Science, Psychology, or Sociology
- Six credit hours of electives from any faculty

Total Credit Hours: 36

**NOTE:** Students who plan to complete the BBA should take ADM 1192 rather than ADM 1015

---

### Certificate in Applied Human Resource Management

**Admission:**
Admission requires prior approval from the Faculty of Business Administration and satisfaction of the following criteria.

1. 30 credit hours completed at a recognized post-secondary institution with a minimum cumulative grade point average of 2.7
   Or
2. A minimum of two years relevant work experience, in the human resource field, to be approved on an individual basis by the Dean in consultation with the Human Resources Management faculty.

**Requirements:**
A Certificate in Applied Human Resource Management will be awarded to individuals who:

- achieve a cumulative grade point average of at least 2.0 over the 30 credit hours required, and
- successfully complete (with a C or better):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Ch</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADM 1015</td>
<td>Introduction to Business (see NOTE below)</td>
<td>3</td>
</tr>
<tr>
<td>ADM 2513</td>

<tr>
<td>PHIL 2203</td>
<td>Ethical Issues in Business</td>
<td>3</td>
</tr>
<tr>
<td>PHIL 2202</td>
<td>Canadian Politics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1013</td>
<td>Principles of Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1023</td>
<td>Principles of Macroeconomics</td>
<td>3</td>
</tr>
</tbody>
</table>

Plus:

- Three credit hours in Business Administration elective
- Six credit hours chosen from Economics
- Six credit hours chosen from Political Science
- Nine credit hours chosen from Anthropology, Political Science, Psychology or Sociology
- Nine credit hours of electives from any Faculty (The courses offered by the Departments of Economics and Political Science are most appropriate to the study of public administration).

Total Credit Hours: 66

**NOTE:** Students who plan to complete the BBA should take ADM 1192 rather than ADM 1015

---

### Certificate in Public Administration Level II

**Admission:**
This program is open to all interested individuals but requires successful completion of the Certificate in Public Administration Level I. Approval for admission must also be received from the Faculty of Business Administration.

A Certificate in Public Administration Level II will be awarded to individuals who:

- achieve a cumulative grade point average of at least 2.0 over the 66 credit hours required, and
- successfully complete (with a C or better):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Ch</th>
</tr>
</thead>
<tbody>
<tr>
<td>ADM 1015</td>
<td>Introduction to Business (see NOTE below)</td>
<td>3</td>
</tr>
<tr>
<td>ADM 1213</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours: 66

**NOTE:** Students who plan to complete the BBA should take ADM 1192 rather than ADM 1015
The Faculty of Computer Science was established at UNB on May 1, 1990, thereby becoming the first such faculty in Canada. The program is designed to enlarge the student's view of the world as well as to provide the background and qualifications to pursue careers in the field of computing. It is based on a set of core subjects which are intended to develop problem solving ability and provide a basic understanding of concepts fundamental to information processing. Students, through a choice of electives, may deepen their knowledge in computing subjects or develop an understanding in some complementary discipline.

The Faculty of Computer Science also offers the following degree programs:

- Bachelor of Information Systems (Please note: Admission to the Bachelor of Information Systems program has been suspended, effective September 2015. For further information, please contact the Dean of the Faculty of Computer Science.)
- Bachelor of Science in Software Engineering (offered jointly with the Faculty of Engineering)

Co-operative Education Program

1. The Faculty operates a full Co-operative Education (Co-op) Program that is available to academically qualified Computer Science students who have completed one year of study. Co-op is “hands-on” education, extending the learning process beyond the classroom into the workplace by alternating academic study terms with paid periods of career related work experience. This allows students to put classroom knowledge to practical and profitable use in the Canadian workplace. At UNB the Co-op Program in Computer Science consists of eight study terms and four to six work terms of four months each. This program is normally completed in five years, compared to the regular four year program, and allows students to obtain a Majors or Honours designation in addition to Co-op. Students normally apply for this program during their second year of study and enter the program at the end of their first year, although later application and entry into the program is possible.

2. Co-op is a designated option within the BCS, BA/BCS, BSc/BSys, BScSwE, and BCS/BScE(GGE) programs in the Faculty of Computer Science.

3. To be eligible for a co-op work term, students must normally have achieved a minimum of a 2.7 GPA in the study term preceding their application for employment.

4. Students must register for each work term in order that they be considered as full-time students while working.

5. A work term fee will be charged for each 4-month work term registered.

6. The overall assessment of the work period is the responsibility of the Faculty of Computer Science. The work period assessment shall consist of two components: 1) student performance as evaluated by a coordinator, given input from the employer, and 2) a work report graded by a coordinator or a member of faculty.

7. Students must have a minimum of four work terms of four months each, alternating with study terms, with satisfactory employer evaluations and work term reports in order that the Co-op designation appear on their transcripts. Two back-to-back work terms are possible, giving periods of work up to eight months in duration.

8. A Co-op student’s first work term will normally be 4 months in duration. After the first 4-month work term, the student shall return to UNB to study for at least one term before going out for another work term.

9. A co-op student will normally complete at least one Summer study term during his or her degree program. This Summer study term will normally be completed before the student applies for his or her third work term. (i.e. Normally, no more than two 4-month work terms should be completed before the Summer study term.)

10. Students will normally have at least one study term after their last work term.

11. Each successful work term will be noted on the student’s transcript.

12. Upon graduation, Co-op students will have the designation “Co-operative Education” following the degree designation on their transcripts.

13. Students must be registered as full-time students in order to be eligible to apply for Co-op jobs.

Professional Experience Program (PEP)

This program adds flexibility to the work experiences available to our students by providing opportunities to work for employers who prefer the PEP model over the Co-op model. Moreover, many transfer students into Computer Science find it easier to fit a PEP with their academic program than a traditional sequence of Co-op work terms.

- Program Description
  1. The PEP requires an extended period of continuous work experience, the duration of which may be 12 or 16 months.
  2. A Co-op coordinator provides the necessary liaison and support activities for students in this program.
  3. The overall assessment of the PEP experience is the responsibility of the Faculty of Computer Science.
period assessment shall consist of two components: 1) student performance as evaluated by a coordinator, given input from the employer, and 2) a work report graded by a coordinator or a member of faculty.

4. While no specific course credit will be assigned to the PEP, a negotiated component of a PEP project may form an integral part of the student's senior project, based on a written proposal, progress reports, and faculty supervision in accordance with standard CS 4983 regulations.

- Program Registration
  1. The PEP is a designated option within the BCS, BA/BCS, BCS/BSc, BScSys, BScSwE, and BCS/BScE (GGE) degree programs in the Faculty of Computer Science.
  2. The PEP will be open to all Faculty of Computer Science students with good academic standing, who will have completed between 80 and 120 credit hours at the beginning of the PEP work term, including having completed 50% of the required Computer Science courses, and having completed at most 2 Co-op work terms. To be considered in good academic standing for the purpose of PEP registration, a student must normally have achieved a minimum of a 2.7 GPA in the study term preceding their application for employment.
  3. Students may transfer from CS Co-op to PEP under the restrictions of not having completed more than 2 Co-op work terms. Students who have registered for a PEP normally will not be eligible to enter, or reenter, the CS Co-op program.
  4. Registration in this option is contingent upon receiving an offer of employment from an approved PEP employer and will depend on the number of PEP positions available. Each student normally will be allowed only one such PEP registration during his/her degree program.
  5. Official University registration is required for each student in the PEP. This will enable PEP students to remain on the Registrar's list in good standing during the time encompassed by their off-campus PEP period.
  6. Each student in this program will be charged a PEP fee.
  7. A suitable notation will be placed on each student's transcript in recognition of this PEP option.

- University Regulations

Students are strongly advised to read the General University Regulations, Section B of this Calendar, and in particular the subsection headed "Grading System and Classification". Any point not covered in the following regulations will be governed by the General University Regulations.

Students applying for a second undergraduate bachelor's degree, transferring from other institutions, or changing degree programs are particularly advised to consult Section B of this Calendar. Questions concerning the application of regulations should be directed to the Registrar in writing.

- General Regulations

  1. To earn a BCS degree, a student must complete at least 40 courses, as specified below. Completing these requirements involves, completing at least 133 credit hours' worth of courses.
  2. Any course taken to satisfy any of the requirements for a BCS degree must be passed with a minimum grade of C.
  3. Developments in the BCS program may lead to changes in the requirements for the degree. The University reserves the right to require candidates already enrolled to meet the revised requirements where practicable.

- Curriculum

The basic curriculum for the BCS program and six areas of specialization are given below to assist the student in planning a program of studies. Students will typically take 5 or 6 courses per term to complete the program in 8 study terms. Students whose grade point average drops below 2.7 (B- ) should restrict their course load to 5 courses, or fewer.

Every student must complete at least 12 credit hours of courses with an extensive English writing component with a minimum grade of "C". These courses are indicated with a "W" in the Calendar. AESL 1011 and AENGL 1012 will not count for credit towards the BCS degree, nor will they count towards the writing component requirement.

- Core Curriculum (Required)

  - Computer Science Core Requirement

  (Please note: As of the 2016-2017 academic year the following set of core courses is in effect for students admitted to the BCS program.)
  - CS 1073 Introduction to Computer Programming I (in Java)
  - CS 1083 Introduction to Computer Programming II (in Java)
  - INFO 1103 Data and Information Management
  - CS 1303 Discrete Structures
  - CS 2043 Software Engineering I
  - CS 2253 Machine Level Programming

- Mathematics and Statistics Core Requirement

  1. MATH 1003 Introduction to Calculus
  2. MATH 1013 Introduction to Calculus II
  3. One of:
     - MATH 1503 Introduction to Linear Algebra
     - MATH 2213 Linear Algebra I
  4. One of the following two options:
     - STAT 3083 Probability and Mathematical Statistics I
     - STAT 3093 Probability and Mathematical Statistics II
     - OR:
       - STAT 2593 Probability and Statistics for Engineers
  5. One of:
     - CS 3113 Introduction to Numerical Methods
     - MATH 2003 Intermediate Mathematics I
     - MATH 2513 Multivariable Calculus for Engineers
     - MATH 3033 Group Theory
     - MATH 3063 Geometry
     - MATH 3093 Elementary Number Theory
     - MATH 3213 Linear Algebra II
     - MATH 3333 Combinatorial Theory
     - MATH 3343 Networks and Graphs
     - MATH 3353 Computational Algebra
     - MATH 3363 Finite Math
     - MATH 3373 Introduction to Game Theory
     - MATH 3383 Introduction to Mathematical Logic
     - MATH 4063 Advanced Geometry (Exotic Spaces)
     - STAT 4333 Queuing Theory

Another approved MATH/STATS elective at the 2000 level or above, approved by the Assistant Dean (Undergraduate) in the Faculty of Computer Science.

- Breadth Core Requirement

BCS students must complete at least 10 approved courses (minimum of 30 ch) in subjects other than computer science and mathematics, which means that CS, INFO, SWE, MATH, and STAT courses are not eligible for this requirement. Selected ECE courses may be taken toward this requirement with prior approval from the Assistant Dean (Undergraduate). One or more of ENGL 1103 and ENGL 1145 are strongly encouraged.

At least 2 of these courses (minimum of 6 ch) must be at the 2000 level or above.

NOTES:

- Courses worth 6 credit hours or more will count as two courses toward this requirement.
- AESL 2011 and AESL 2012 (or equivalent) count as one course toward this requirement.
- See the GENERAL NOTES section below for a list of courses that are not for BCS credit.

SECTION G: FREDERICTON ACADEMIC PROGRAMS

CS 2263 Systems Software Development
CS 2333 Computability and Formal Languages
CS 2383 Data Structures and Algorithms
CS 3383 Algorithm Design and Analysis
CS 3413 Operating Systems I
CS 3853 Computer Architecture and Organization
CS 3873 Net-centric Computing
CS 3997 Professional Practice

Technical Elective Requirement

In addition to the course courses listed above, students are required to select a total of 7 technical elective totalling a minimum of 21 ch (worth a minimum of 3 ch each, except that CS4983 is permitted), as follows:

- 7 CS/INFO/SWE courses, at least 3 of which must have an extensive computer programming component (indicated with a [P] in the Calendar).

At least 4 of these 7 technical elective courses must be 3rd year or above, and at least 1 of these must be 4th year or above. CS 4983 does not satisfy the requirement for the 4th year course. NOTE: Courses worth 6 credit hours or more will count as two courses toward this requirement.
Free Electives
In addition to the courses taken to satisfy the core curriculum requirements, BCS students must complete at least 4 approved free electives (minimum of 12 ch). Students can choose combinations of electives to allow them to complete an area of specialization with the BCS degree (see below), to complete a Minor in another area, or simply to acquire more breadth in their studies. NOTE: Courses worth 5 credit hours or more will count as two courses toward this requirement.

General NOTES
1. Credit is not given toward the BCS degree for MATH 1823, MATH 1833, MATH 2633, ADM 2623, PHIL 3101.
2. UNIV 1010T (formerly UNIV 1001), AESL 1011 and AESL 1012 will not be counted for credit toward degree programs offered by the Faculty of Computer Science.
3. Credit will not be given for both CS 1303 and MATH 2203.

None of ECE 2213, ECE 2214, ECE 2215, or ECE 3221 will normally be counted for credit toward the BCS degree.

Common First Year (5 courses each term)
CS 1073 Intro to Computer Programming I (in Java)
MATH 1003 Intro to Calculus I, or MATH 1053 Enriched Intro to Calculus I
MATH 1013 Intro to Calculus II, or MATH 1063 Enriched Intro to Calculus II
CS 1083 Introduction to Computer Programming II (in Java)
CS 1303 Discrete Structures

CS 1203 Overview of Computer Science
INFO 1103 Data and Information Management

Three term courses toward the Breadth Core Requirement, selected from Arts, Business Administration, Engineering and Science.

Honours in Computer Science
The requirements for the Bachelor of Computer Science with Honours are as follows:
1. The student’s BCS Technical Elective Requirement must be satisfied with 7 CS/INFO/SWE courses. At least 5 of these 7 courses must be 3rd year or above, and at least 2 of these 7 courses must be 4th year or above.
2. The student must have a cumulative grade point average of 3.0 or above.
3. As one of the two required 4th year Technical Elective courses, the student must complete CS 4997 (Honours Thesis) with a grade of B or better.

Students satisfying the requirements for an Honours degree will receive a "First Class Honours" designation if their CGPA is 3.5 or above, and "Honours", if their CGPA is 3.0 or above and less than 3.5. Students may elect to combine Honours with one of the specializations mentioned below, but an Honours designation can be obtained without completing one of the areas of specialization.

Areas of Specialization and Electives
To assist students in planning a program of studies, some recommended courses for areas of specialization, and elective groupings, are given at the end of this section. The suggested first year, and to some extent the second, are common to the six recommended areas. First and second year electives should be carefully chosen to include courses which are Prerequisites to courses intended to be taken in the third and fourth years. Students are not bound in any way to follow an area of specialization, but each student must have their program approved by the faculty. Students are advised to check carefully on course Prerequisites in preparing a program. The six areas are:

Area One—Hardware Systems
Emphasizes digital systems logic, communications and organization.

Area Two—Software Systems
Emphasizes program design, applications and systems software.

Area Three—Information Systems
Emphasizes the data and information processing area of computer applications including database management systems.

Area Four—Theory and Computation
Emphasizes the theoretical basis for several important areas of computer science development.

Area Five—Multimedia Systems
Emphasizes the technical and creative aspects of multimedia systems development.

Area Six—Geographic Information Systems (GIS)
Emphasizes the application of computers to the storage, retrieval, and processing of geographically referenced information.

Area Seven—Cybersecurity
Emphasizes the protection of information assets from cybersecurity threats.

Courses for Areas of Specialization

Hardware Systems
ECE 1813, ECE 2701, 3 from Group H (with at least 2 of these being CS courses).

Software Systems
4 courses from Group F, plus 2 courses from Group F or G. Of these 6 courses, at least 3 must be at the 4000 level.

Information Systems
CS 3503, ADM 1213, 2 of (INFO 2403, INFO 3103, INFO 3303, INFO 3403); and 2 courses from Group D.

Theory and Computation
CS 4935, MATH 3343, 2 from Group E (1 of which must be CS).

Multimedia Systems
CS 3025, CS 3703, CS 4735, plus 3 approved courses from the Faculty of Arts. A list of preapproved Arts courses for the Multimedia Systems specialization can be obtained from the Faculty of Computer Science.

Geographic Information Systems
INFO 3303, CS 4735, GGE 3423, GGE 4423; 2 from CS 3025, INFO 3403, GGE 5413, GGE 3342, GGE 3353, GGE 4313, GGE 5403, GGE 5322, GGE 5341, GGE 5402, INFO 3103.

Cybersecurity
INFO 2403, CS 4355, CS 4411, CS 4415, CS 4417, CS 4419, CS 4865.

Groups:

Group A: Approved non-core CS/INFO/SWE 3000, 4000, and 5000 level courses, excluding CS 3903.

Group B: Approved courses, at the 2000 level and above, taken from PHYS, or ECE.

Group C: Approved courses taken from MATH and STAT 3000 and 4000 level courses.

Group D: ADM 1313, ADM 2223, ADM 2413, ADM 2513, ADM 2624, ADM 2815, ADM 3123, ADM 3573.

Group E: CS 3113, CS 4725, CS 4735, CS 4905, CS 4965, MATH 3363, MATH 3333, MATH 3373, MATH 3383, STAT 4333. Other approved MATH courses.

Group F: CS 3043, CS 3503, CS 3613, CS 4015, CS 4405, CS 4905, INFO 3103, SWE 4103, SWE 4203.

Group G: CS 2053, CS 3025, CS 4725, CS 4735, CS 4745, CS 4805.

Group H: CS 4405, CS 4745, CS 4805, CS 4815, CS 4825, CS 4835, CS 5865, or ECE courses at the 3000 or 4000 level approved by the Assistant Dean (Undergraduate) in the Faculty of Computer Science.

Majors Degrees

PLEASE NOTE: Admission to the BCS Majors programs is suspended, effective December 2015. For further information, please contact the Dean of the Faculty of Computer Science.

Students in Computer Science may elect to pursue a Majors degree program within one of the areas of specialization. Students who satisfy the requirements for a Majors degree will have that designation included on their final transcript.

Courses used to satisfy core may also be used to satisfy the requirements for a Major degree, as well as minors (as long as the home department agrees), certificates and diplomas.

A student may only graduate with one Major within the BCS program and one in the other degree program.

Requirements for a Majors Degree:

1. Completion of all courses in an area of specialization.
2. A cumulative grade point average of 2.5 or above.

Minor in Computer Science

Students who are not registered in a degree program in the Faculty of Computer Science may complete a Minor in Computer Science by completing 8 approved term courses from CS, INFO, or SWE, including CS 1073, CS 1083 (or CS 1023), CS 1303 (or MATH 2203), CS 2043 (or CS 2033), CS 2263 and CS 2383. Of the remaining two courses, one must be at the second year level or above, with the second of those being at the third year level or above. Courses of 1 or 2 credit hours cannot be counted for credit towards the Minor. CS courses that are designated for non-CS students will not count towards the Minor. A grade of C or better is required in all courses offered for the Minor. Students working towards a Minor in Computer Science must make their intentions known to the Faculty of Computer Science.
Concurrent BA/BCS Degree Program
The Faculty of Computer Science, in cooperation with the Faculty of Arts, offers students the opportunity to obtain both a BCS degree and a BA degree by selecting a well-planned choice of courses. To complete the concurrent degree, students must satisfy both the BA and BCS degree requirements. Completing these requirements will involve completing at least 151 credit hours worth of courses over a five year period. In order to meet the requirements for this program, it is necessary for the student to obtain advice from both faculties. By completing this program, the student will meet the core requirements for the basic BCS degree; participation in the Computer Science Co-op program will lengthen the student's program.

For specific details on course planning, see the Faculty of Arts sections of the Calendar.

Admission requirements:
Students must satisfy the admission requirements for both the Bachelor of Computer Science and the Bachelor of Arts as given in section B.

Concurrent BCS/SSc Degree Program
Most scientific careers now require a thorough background in computing. Many careers in the computing field require primary knowledge in a scientific application area. The Faculty of Science and the Faculty of Computer Science offer students a program in which to pursue a science major and a complete computer science education. Students may enroll in a concurrent degree program in which at the end of five to five-and-a-half years of study a student will graduate with both a BSc with a major in Biology, Chemistry, Earth Sciences, Mathematics, or Physics, and a BCS. Participation in the Computer Science Co-op program will lengthen the student's program. The program is designed so that if a student decides to opt for BCS alone, the adjustments can be easily made. Students in the concurrent degree program are able to count many of their courses toward the requirements of both degrees so it is important to select courses carefully from the outset, in consultation with an advisor.

Admission requirements:
Students must satisfy the admission requirements for both the Bachelor of Computer Science and the Bachelor of Science as given in Section B.

Course Selections
While the first and second years given below are typical, the third, fourth and fifth year will depend on the CS and Science degree programs chosen (Major, Honours, etc.)

Year 1 CS 1073, 1083, two of (INFO 1103, CS 1203, or CS 1303), MATH 1003, MATH 1013, (or MATH 1053, MATH 1063) plus four term lecture courses in first year science, all four of which are accompanied by labs, chosen from Biology, Chemistry, Physics, and Earth Sciences. The particular sciences and labs chosen will depend on the intended Science program. MATH 2203 may be substituted for CS1303. Students planning to major or honour in Mathematics are strongly recommended to choose MATH 2203 rather than CS 1303. Credit will be given for only one of CS 1303 and MATH 2203.

Year 2 One of (INFO 1103, CS 1203, or CS 1303), CS 2043, CS 2263, MATH 2213, one of (CS 2333 or CS 2383), MATH 2003, plus 6 term courses in Science (minimum 18 ch) chosen in consultation and with the approval of the advisor in your chosen Science discipline.

Year 3, 4, 5 These must be arranged in consultation with your CS and Science advisors and will be different for each student.

Certificate in Software Development

General
This certificate program is designed to provide individuals, especially working adults, with an opportunity to acquire the formal background necessary to become effective participants in the Information Technology industry. This program is directed towards people who are not currently enrolled in an undergraduate degree program at UNB. It is expected that applicants will have good command of high school mathematics. If not, they will have to take MATH 0863 (pre-calculus math) before applying to the program. Credits earned in the certificate program may subsequently be recognized for credit in an undergraduate degree program.

The program consists of 6 core courses and 4 elective courses.

Core Courses
CS 1073 Introduction to Computer Programming I (in Java)
BACHELOR OF EDUCATION

FACULTY OF EDUCATION

General Information:
Marshall d’Avary Hall, Room 327

Mailing Address:
Faculty of Education,
University of New Brunswick,
P.O. Box 4400, Fredericton, N.B.,
Canada, E3B 5A3

FACULTY

Dean: Sharon Wahl, BA (SFU), Prof. Teacher’s Cert. (UBC), Med (SFU), PhD (SFU)

Belczewski, Andrea, BSc (UNB), PhD (Queen’s) Senior Teaching Associate, Bridging Year Coordinator - 2002
Benjamin, Amanda, BA (York), MA (Concordia), PhD (UNB), Assoc Prof - 2009
Blatherwick, Mary, BA (Ed), BFA (NSCAD), MA (UBC), PhD (Rochestown), Prof - 2000
Brien, Ken, BA (UWO), BEd (UWO), Med (UNB), EdD (Alberta), Assoc Prof - 2005
Burkholtzer, Casey, BA (Manitoba), BEd (Acadia), MA (Concordia), Asst Prof - 2017
Dicks, Joseph, BA, BEd (Nfld), Med (PhD), Prof - 1998
Domeone, Jose, BSc (Trent), MA (Trinity Western), PhD (UBC), Assoc Prof - 2009
Hamm, Lyle A., Brandon U), BEd (Alberta), Med (Lethbridge), PhD (Calgary), Asst Prof - 2013
Hirschhorn, Mark, BSc (U. Sask), BEd (Lethbridge), Med, PhD (Alberta), Assoc Prof - 2008
Kirstmanson, Paula Lee, BEd (UNB), CFSL (Laval), Med, PhD (UNB), Assoc Prof
Landine, Jeff, BA (UNB), BEd (STU), Med (UNB), Med (OISE/U of T), Assoc Prof - 2010
Massfelter, Helen, BSc (Liverpool John Moores U), MA, PhD (Alberta), Asst Prof - 2015
Mcloughlin, John, BMath (Wat), MSc Teaching (Tor), PhD (SUNY Buffalo), Prof (Cross Appl. - Math & Stats)-2002
Morrison, William, BEd, Med, (UNB), PhD (Alberta), Assoc Prof - 2002
Peterson, Patricia, BEd (UNB), Med (U. of N.Tex.), PhD (Boston U), Assoc Prof - 2008
Plaice, Evelyn, BA (Oxft), MA (Nfld), PhD (Manc), Assoc Prof (Joint Anthropology) - 1999
Randall, Lynn, BPE (Brock), BEd, Med (UNB), PhD (Ohio State), Assoc Prof - 2000
Rogers, Matthew, BA, BEd, Med, PhD (UNB), Asst Prof - 2016
Rose, Ellen, EdD (Victoria), Med, PhD (UNB), Assoc Prof (Joint Arts) - 2001
Rose, Sherry, BEd, Med, PhD (UNB), Asst Prof and Assoc Dean (Grad Studies) - 2013
Saul, Roger, BA (McGill), BEd, Med, PhD (York) - Asst Prof - 2014
Sears, Alan, BEd, Med (UNB), PhD. (UBC), Prof - 1988
Sloat, Elizabeth, BEd (UNB), Med, PhD (McGill), Prof - 1999
Wagner, David, BRS (Mennonite Brethren), BA (Winnipeg), BEd, Med, PhD (Alta), Prof - 2004
White, Melissa, BOA (Mt. St. Vin), MA, PhD (OISE), Asst Prof - 2011
Whitty, Pam A. M., BA (McMaster), BEd, Med (UNB), EdD (Maine), Prof - 1991
Wahl, Sharon, BA (SFU), Prof. Teachers Cert. (UBC), Med (SFU), PhD (SFU) - 2018
Williams, Jon Douglas, BEng (Royal Military College and Kingston), MA (UBC), MSc, PhD (Stanford), Prof - 1995
Windsor, Katherine M., BSc (St. F.X.), MS (N Dakota State), PhD (Minn.), Assoc Prof & Assoc Dean (Undergraduate Studies) - 1987

Statement of Purpose

The Faculty of Education prepares students to assume leadership roles in education. Graduates are ready to begin a professional career and to broaden and deepen their professional expertise through continuing study. Through a sequence of educational experiences integrating theory and practice, the faculty and its partners in education provide opportunities for the academic and professional development of teachers, guidance personnel, and administrators at all levels in public school systems, community colleges, and other learning environments. Students acquire the knowledge, ethical standards, skills, dispositions, and flexibility needed to address current problems in education both creatively and effectively, and to think critically about professional practice. In all its work, the Faculty seeks to prepare educators who understand the past, delight in the challenges of the present, and look optimistically to the future.

Students have access to centres in the Faculty which provide teaching, research, and educational services to schools and communities. These include centres established for the study of Indigenous education, early childhood education, mathematics education, and second language learning, and social studies education.

Degrees in Education

The BEd degree is awarded upon successful completion of 60 credit hours of study in Education, following another Bachelor's degree. There are three program streams that may be followed:

1. School Years Program (information follows)
2. Bachelor of Education for Indigenous Students
3. Bachelor of Education in Adult Education

Please NOTE: In order to qualify for a level 5 New Brunswick teaching license, a minimum combined total of 168 credit hours is required between the two degrees. Students entering the school years pattern will be accepted into one of the following:

Program Option 1: Early Years/Elementary
Program Option 2: Secondary

Students must apply in writing to the Associate Dean for Undergraduate Studies to change programs.

General Information

All students wishing to follow degree credit programs in Education must obtain permission to enrol from the Admissions Office of the University. Students pursuing the School Years Program will only be able to commence study in the Faculty in late August. Please refer to Section B of this calendar for more information on Admission requirements.

Students wishing to follow a graduate studies program must write to the Dean of the School of Graduate Studies.

Students who have completed some education course work within their previous Bachelor’s program, may apply for substitution credit toward the Education program. Courses taken before admission will not necessarily be accepted for degree substitution.

Graduates of the BEd program are pursuing careers in education in many jurisdictions in Canada, the United States, and in other parts of the world. Students who successfully complete the school years requirements, are eligible to apply for a New Brunswick teacher’s certificate. This certificate is recognized by other Canadian Provinces and most US states. Nevertheless, students should ensure that the specific programs they are following will qualify them for teacher certification in the province, state or country where they hope to work.

NOTE: The Province of New Brunswick Teacher Certification Regulations under the Education Act states that only Canadian citizens or those holding landed immigrant status or a work visa are eligible for teacher certification in the Province of New Brunswick.

Prerequisites to the Program

To be admitted to courses in French second language education, students must possess a high level of French competency. Students must provide evidence of this competency through a French oral proficiency certificate with a minimum level of “Advanced” from the New Brunswick Department of Post-Secondary Education, Training and Labour.

The New Brunswick Department of Education requires that all BEd students entering schools (for practicum or individual course requirements), must provide evidence of a Criminal Record Check (including the vulnerable sector). Students are responsible, at their own expense, to provide evidence of the Criminal Record Check (including vulnerable sector) to the Faculty of Education upon acceptance into the program. Documentation outlining the need for the background check, required by law enforcement agencies in many jurisdictions, will accompany the offer of admission from the Admissions Office.

Elementary Program

Applicant must have completed an undergraduate degree (normally 120 credit hours) with a minimum cumulative grade point average of 2.7. NOTE: Admission to the Bachelor of Education is highly competitive. The minimum CGPA stated may not be sufficient to secure a place. Students must have completed at least 30 credit hours (10 term courses) in teachable subjects. This must include a minimum of three credit hours of course work from each of the first two categories listed below and the remaining 24 credit hours from at least four different categories (including English and mathematics).

1. English
2. Mathematics

280
3. Sciences
4. Humanities
5. Languages
6. The Arts
7. Health and Physical Education
8. Social Sciences

NOTE: Students entering this stream will be placed in an elementary school. Applicants should note that not all teachable subjects fall into the prerequisite categories.

In addition to the above, applicants must complete an application package that includes:
1. Three written statements related to interest in and goals for pursuing the Education program.
2. List of activities relevant to teaching
3. Three references

Secondary Program
Applicant must have completed an undergraduate degree with a minimum cumulative grade point average of 2.7. NOTE: Admission to the Bachelor of Education is highly competitive. The minimum CGPA (cumulative grade point average) stated may not be sufficient to secure a place. Students must have completed at least 30 credit hours (10 term courses) in the first teachable area and 18 credit hours (6 term credits) in the second teachable area or they must have completed at least 24 credit hours (8 term courses) in each of two teachable areas. All applicants must have completed at least one term English course.

NOTE: Students entering this stream will be placed in a secondary school which could either be a middle school or a high school. We are unable to offer programs in all teachable areas. Applicants should contact the faculty for advice.

In addition to the above, applicants must complete an application package that includes:
1. Statement of interest in teaching (one page)
2. List of activities relevant to teaching
3. Three references

(FEAA) Faculty of Education Admission Advantage
A number of students will be guaranteed admission to the Faculty of Education (Fredericton) school year programs:
1. after secondary school graduation provided they achieve a minimum graduation average of 80% and meet the teachable subject admission requirements for education within their first degree and meet progress criteria.
2. after first year in a program at UNB (Fredericton) provided they achieve a cumulative grade point average of 3.5, meet the teachable subject admission requirements for education within their first degree and meet progress criteria.

The Faculty of Education Admission Advantage extends conditional offers of acceptance into the Bachelor of Education program to exceptional high school and first year UNB (Fredericton) students. Faculty of Education Admission Advantage students apply to the Bachelor of Education program and to the University of New Brunswick Fredericton during the final year of secondary school or apply to the Bachelor of Education program during the first year of their UNB (Fredericton) program.

Secondary school students should complete these steps:
1. Apply to an undergraduate program at UNB, by the application deadline of March 31st.
2. Indicate interest in the Faculty of Education Admission Advantage by checking the box in the online application.
3. Complete the components of Faculty of Education Admission Advantage supplementary application to be submitted.

First Year UNB (Fredericton) students should complete the initial component of the Faculty of Education Admission Advantage supplementary application March 31st of their first year of study.

The competitive application for the Faculty of Education Admission Advantage requires that the applicant presents all courses necessary for admission to their first program choice (e.g. Bachelor of Arts) with an admission average of 80% if applying out of high school or an assessment grade point average of 3.3 if applying after completing a typical first year of study (30-39 ch).

(FEAA) Progress Criteria
To progress into the Bachelor of Education program, Faculty of Education Admission Advantage students need to:
1. Enrol at the University of New Brunswick (Fredericton) for their first degree.
2. Achieve a cumulative grade point average of 3.0 upon completion of that degree (degree must be completed within a five year period).
3. Demonstrate continued involvement in leadership/achievement activities involving working with children, athletics, performing arts, student government, volunteer work, and community services.
4. Complete final component of Faculty of Education Admission Advantage supplementary application.

Securing Faculty of Education Admission Advantage status has the following benefits:
1. A place in the Bachelor of Education program, conditional upon meeting progress requirements.
2. Ongoing advising for the Faculty of Education to ensure students meet teachable admission requirements.

A place in the Faculty of Education will be assured to those students who are awarded a Faculty of Education Admission Advantage, provided they meet the progress criteria listed above upon graduation from their first UNB degree program.

Costs
In addition to those costs listed in Section C of this Calendar, students are responsible for all travel and accommodation costs related to the required practicum experiences throughout the entire BEd program.

University Regulations
Students are urged to read the General University Regulations, Section B of this Calendar, and in particular the subsection headed Grading System and Classification.

Any point not covered in the following regulations will be governed by the General University Regulations.

General Regulations
Student Standing
Letter grades are assigned in accordance with University regulations.

a. A grade of C shall be the minimum acceptable grade in courses taken to meet requirements for the Bachelor of Education degree.
b. A BEd degree shall be awarded to a student who successfully completes the number of credit hours and approved courses indicated in the program outlined. In addition, students must successfully complete the practicum component required by the degree program.

Credit Hours
The Bachelor of Education degree is a 60 ch program to be completed over three academic terms: fall, winter, and summer. All students must attend on a full time basis. The Faculty of Education will prepare a timetable for each student each term.

Standing and Promotion Requirements
Per University Regulations.

Divisions and Distinctions
a. BEd degrees are awarded in divisions as stated in the University Regulations (Section B).
b. A student in the BEd program having a minimum cumulative grade point average of 3.8 in Faculty of Education courses, and no grade below C, and whose practicum is deemed satisfactory for this degree by the Dean of Education after consultation with the faculty members who supervised the student's practicum, shall be awarded the BEd degree with Distinction.

Repeating Courses
Per University Regulations.

Field Experiences (Practicum)
The Faculty of Education may only place students in school settings within the New Brunswick public school system in cooperation with the New Brunswick public school system, and with the ongoing permission of a School District or School as appropriate. Such Schools and/or School Districts are not required to accept or maintain intern placements.

a. Practicum placements are evaluated on a pass/fail basis. If an intern is removed from his/her practicum by the Faculty of Education, or a School District and/or a School, or their practicum performance does not meet expectations a grade of NCR will be assigned.
b. In their field experiences students participate in teaching and learning activities in an educational setting approved by the Faculty.

281
SECTION G: FREDERICTON ACADEMIC PROGRAMS

Responsibility for arranging student teaching placements, throughout the province of New Brunswick, rests within the Faculty of Education. Students must not attempt to arrange their own practicum school placements. The Faculty of Education will attempt to secure one practicum placement for each student.

c. Students are responsible for all travel and living expenses incurred during the practicum.

d. Students who have failed the practicum (that is, received a grade of NCR) are required to wait one academic term before applying to the Faculty of Education for an opportunity to make a further attempt at the practicum. Students, in so applying to the Field Services Committee of the Faculty of Education must establish that the factors causing the failure have changed and that there is reason to presume that a further attempt at the practicum would be successful. The request by a student to make a further attempt at the practicum must be submitted in writing and must satisfy the Dean of Education and the Field Services Committee on both of the above points. In all such cases, there is no obligation on the part of the Faculty of Education, through the Dean of Education and the Field Services Committee, to grant students a chance to make a further attempt at the practicum. In cases where the Dean of Education and the Field Services Committee deny a student a chance to make a further attempt at the practicum, the student will be required to withdraw from the Faculty of Education. Students wishing to be placed in a French Immersion classroom for their practicum must meet the minimum Oral Proficiency requirements of the School District.

e. To teach a school subject in the advanced block of the practicum in middle school or high school a student must have a minimum of 9 credit hours of methods in the subject area.

f. Any appeal with regard to receipt of a grade of NCR on the practicum must follow the University appeal policies. (See Section B, III, Item I: Review of Grades.)

g. Students who do not complete the practicum for reasons other than receiving a grade of NCR and/or being removed from a practicum by the Faculty of Education or a School District and/or a School in the New Brunswick public school system may be awarded a grade of incomplete for the practicum. In such cases, the Faculty of Education shall work with the student to attempt to arrange a subsequent placement for the student, recognizing always the limitation to practicum placements set out in this regulation.

Residency Requirement

Students in the BEd degree program must normally complete a minimum of 60ch in Education, including Field Studies, from the University of New Brunswick.

Time Limit

Bachelor of Education: the maximum time permitted between the first registration and the completion of the BEd degree in accordance with the regulations in effect at the time of first registration shall normally be 4 years.

BEd in Adult Education: the maximum time permitted between the first registration and completion of the BEd in Adult Education in accordance with the regulations in effect at the time of the first registration shall normally be 8 consecutive calendar years.

Course Selection

Within the Bachelor of Education program, there are required courses and some elective space. Students should consult with Faculty of Education advisors when choosing electives.

Substitution Credits

Students may obtain substitution credit of up to 12 credit hours toward the BEd for education courses which have been taken at this or another institution, where the grade received is ‘C’ or higher, and which meet program requirements. In these cases, alternate education courses must be successfully completed to meet program requirements.

Re-registration

Students who have withdrawn from the Program must establish that the factors necessitating withdrawal have changed and that there is reason to assume that a further attempt would be successful. The request for re-registration must be submitted in writing and must satisfy the Dean of Education. In such cases there is no obligation on the part of the Faculty to place the student in a similar practicum.

The BEd Program

The BEd degree is awarded upon successful completion of 60 credit hours of study in Education following another Bachelor’s degree.

Students elect one of two distinct patterns in the BEd program: 1) School Years Education, or 2) Adult Education. The School Years pattern consists of the following:

**BEd (School Years Pattern)**

The School Years pattern focuses on all aspects of the education of children between the ages of 4 and 19, including schooling, community education, family education, and educational intervention. Particular emphasis is placed upon appropriate practice, the integration of subject area content and methodology, and the design of curriculum. The School Years pattern has the following components.

NOTE: For details of the Adult Education program, see BEd. Adult Education

**Core Studies:** ED 5001 Teaching and Learning Theories I, ED 5002 Teaching and Learning Theories II, ED 5003 Teaching and Learning Theories III, ED 5035 Inclusionary Practices, ED 5070 Cultural Contexts of Education, ED 5175 Classroom Assessment or ED 5561 Evaluation des apprentissages, and one 3 credit hours course in Indigenous education.

**Practicum:** ED 5050 The school-based experience component of the B.Ed involves one day per week in schools during fall semester as well as a two-week, five-week and eight-week block practica during the fall and winter terms.

**Pedagogical Studies:** Listed in the Fredericton Courses Section of the Calendar. Courses about the teaching of school subjects, enabling students to specialize in particular subjects if desired; courses about particular learner levels; courses which focus on the integration of subject matter, methodologies, or educational concepts across the curriculum.

**Common Core Studies**

ED 5001 Teaching and Learning Theories I
ED 5002 Teaching and Learning Theories II
ED 5003 Teaching and Learning Theories III
ED 5035 Inclusionary Practices
ED 5050 Practicum
ED 5070 Cultural Contexts of Education
ED 5175 Classroom Assessment
ED 5561 Evaluation des apprentissages

Plus one 3 ch course in Indigenous Education

**Program Option 1:**

The elementary stream is designed for prospective teachers who wish to be knowledgeable in teaching the broad range of subjects reflected in the elementary school curriculum. Students take the following courses in seven (7) subject areas and should consult with Faculty Advisors when a specific course is not listed.

1. Visual Education- ED 5209
2. Literacy ED 5355 or 5563 (fall term)
3. Mathematics Education - ED 5424 (fall term)
4. Music Education - ED 5242 or ED 5243
5. Health and Physical Education - ED 5478
6. Science - ED 5505
7. Social Studies - ED 5621

With the remaining 6 credit hours, students may choose electives from the following focus areas.

**Focus Areas for Option 1**

- Arts Education (Visual Arts/Drama)
- Early Childhood Education
- Indigenous Education
- Health and Physical Education
- Literacy/Drama Education
- Mathematics Education
- Music Education
- Second Language Education (ESL)
- Second Language Education (FSL)
- Science Education
- Social Studies Education (including geography)
- Exceptional Learner

**Program Option 2:**

The secondary stream is designed for prospective teachers who wish to specialize in teaching one or more of the subjects reflected in the middle/secondary school curriculum. Normally, students pursue teachable concentrations based on course work from their previous undergraduate degree. Each concentration must consist of 9 ch in the areas chosen (those in the Health and Physical Education concentration must complete 12 ch in that area). The first concentration MUST be in a teachable area.

**Concentration Areas for Option 2**

- Arts Education (Visual Arts/Music/Drama)
- Early Childhood Education
- First Nations Education - Choose courses in consultation with Mi'kmak-Wolastoqey Centre
- Health and Physical Education
- Literacy/Drama Education
- Mathematics Education
- Music Education
- Second Language Education (ESL)
- Second Language Education (FSL)
- Science Education
- Social Studies Education (including geography)
- Exceptional Learners
SECTION G: FREDERICTON ACADEMIC PROGRAMS

ED 5046 Educating At-Risk Students
ED 5071 Education in International Contexts
ED 5078 Communication Disorders in the Classroom
ED 5091 Learning Disabilities: Introduction
ED 5096 Behavioural/Emotional Disorders: Introduction
Independent Studies
ED 4191, 5191 Independent Studies
ED 5013, 5033, 5043 Special Topics in Education

Literacy Education
ED 3362 Access to Literacy
ED 5105 Connecting Home and Schooled Literacies
ED 5313 Cultural Studies through Theatre
ED 5314 Drama Across the Curriculum
ED 5315 Dramatization of Literature
ED 5352 Teaching Writing
ED 5353 Teaching Secondary English I
ED 5354 Teaching Secondary English II
ED 5361 Challenging the Authority of Texts
ED 5362 Symbolic Representation in Children’s Play, Pictures and Print
ED 5357 Poetry K-12
ED 5355 Literacy Learning in Early Years
ED 5356 Literacy Learning in the Middle School
ED 5358 Critical/Cultural Literacy
ED 5359 Cultivating Proficient Readers
ED 5562 La littératie a l’élémentaire I
ED 5563 La littératie a l’élémentaire II
ED 5684 The Anthropology of Literacy and Learning

Multimedia Studies
ED 5698 Multimedia Studies in Education
ED 5699 Cultural Studies Through Multimedia

Music Education
ED 5242 Music for the Classroom Teacher
ED 5423 Music in the Elementary School

Physical Education
ED 3475 Movement Education for the Elementary Teacher
ED 5478 Health and Physical Education in the Elementary School
ED 5492 Introduction to the Teaching of Secondary Physical Education
ED 5488 Teaching of Games for the Secondary Physical Education Teacher
ED 5493 Teaching Methods in Secondary Physical Education
ED 5494 Teaching Physical Education

School Counselling
ED 5065 Personal Growth and Helping
ED 5141 Orientation to Counselling
ED 5142 Career Guidance
ED 5143 Group Theory and Skills

Science Education
ED 3512 The Nature(s) of Science: Implications for Teaching Science
ED 3513 Science Education Policy and Practice
ED 5505 Teaching Science in the Elementary School
ED 5511 Introduction to Science Education
ED 5515 Science Education and the Learner
ED 5513 Advanced Studies in Science Education I
ED 5512, ED 5514 Special Topics in Science Education I, II
ED 5521 Science Education Seminar and Project

( NOTE: All courses listed in this section with French titles/descriptions are offered in French. Students may be required to take a language proficiency test before permission is granted to enroll.)

Second Language Education
ED 5561 Évaluation des apprentissages
ED 5562 La littératie a l’élémentaire I
ED 5563 La littératie a l’élémentaire II
ED 5564 Introduction to Second Language Education

NOTE: Students pursuing the School Years program may take no more than one adult education course.

Adult Education
ED 3113 Communication Practices for Adult Education ED 3115 Methods & strategies in Adult Education
ED 4110 Methods and Strategies in Adult Education: Theory and Practice
ED 4113 Introduction to Distance Learning in Adult Education
ED 4115 Issues in Adult Literacy

Critical Studies
ED 5154 Creativity, Images, and Meaning

Early Childhood Education
ED 5032 Inclusion from the Early Years
ED 5062 Cultural Constructions of Childhood
ED 5102 Curriculum and Evaluation in the Early Years
ED 5105 Connecting Home and Schooled Literacies
ED 5167 Interpreting Play for Curriculum Development
ED 5182 Problem Solving with Young Children
ED 5184 Parental Involvement in Schooling
ED 5362 Symbolic Representation in Children’s Play, Pictures and Print

Indigenous Education
ABRG 3688 Contemporary Canadian First Nations Children’s Literature
ED 3022 First Nations Epistemology
ED 3043 Indigenous Education
ED 4686 Teaching the First Nations Learner
ED 4688 Teaching First Nations Children’s Literature
ED 5162 Integrated Curriculum for the First Nations Learner
ED 5683 First Nations Education Seminar
ED 5684 The Anthropology of Knowledge
ED 5685 Teaching First Nations Language

Health Education
ED 4451 Health Education

Inclusive Education

ED 5569 Français langue seconde II - Secondaire
ED 5575 Reflection on Second Language Theory and Practice

**Social Studies Education**
ED 3621 Introduction to the Social Studies
ED 3641 Geography in Education
ED 4621 Learning to Learn about teaching in Social Studies and Science
ED 4643 Geography of Canada
ED 5620 Introduction to Teaching Social Studies
ED 5621 Introduction to Social Studies in Elementary Education
ED 5622 Global Education
ED 5623 Teaching Canadian Studies
ED 5624 Exploring and Teaching about Worldviews
ED 5625 Introduction to Teaching Secondary Social Studies
ED 5626 Introduction to Teaching Secondary History

**Visual Education**
ED 5154 Creativity, Images and Meaning
ED 5209 Creativity and Visual Arts in Teaching and Learning
ED 5211 Integrated Learning Through Art
ED 5212 Curriculum Development in Art Education
ED 5213 Issues in Art Education

**BEd for Indigenous Students**
The Mi’qmak-Wolastoqey Centre (see Section D) has administered the BEd for First Nations Students at UNB since 1977.

For full details, including program content and admission requirements and procedures, consult the Mi’qmak-Wolastoqey Centre at UNB.

**BEd in Adult Education (4-Year)**
The BEd in Adult Education consists of a minimum of 120 ch of accumulated study. This program is open to individuals who qualify as mature students. The Program consists of three major elements, with credits normally assigned as follows:

- **Arts/Science Courses**: 30 ch
- **Education Courses**: 48 ch - Core Studies (9 or 12 ch), - Field Studies (3 or 6 or 9 ch), Approved Courses (remaining ch)

**Occupational/Technical/Academic Specialization Courses**: 42 ch - Approved electives or credit for prior experience. At least half the credits for the BEd degree must be UNB credits. Of the 120 ch required for the four year BEd in Adult Education a maximum of 42 ch is allowed for prior learning.

**BEd in Adult Education**
The Adult Education pattern in the BEd degree is a 60 ch program that focuses on all aspects of teaching adult learners. In consultation with Faculty of Education advisors, students choose appropriate courses according to the following requirements.

**Core Studies**
ED 3024, ED 3115 & ED 4042 Additional approved Adult Education options may be taken from human development and learning; exceptional learners, history, philosophy, and practice; social, cultural, and political contexts.

**Field Studies**
ED 3015 (3 ch) or ED 5010 (6ch) Approved practicum, Seminars, and independent study; site of practicum to be negotiated

**Curriculum Studies**
Remaining ch Approved courses about the development and delivery of Adult Education programs in Institutions of learning, workplaces and society; about adult learning and development; about the nature, scope, and field of Adult Education. Up to six (6) credit hours for prior learning may be granted in consultation with Faculty of Education advisors and in accordance with PLA regulations.

**Outcome**
Preparation for teaching adult learners or for coordinating, developing, or managing programs of adult learning.

**Core and Curriculum Studies**

**Inclusive Education**
**Adult Education**
ED 4032 Adult Learners with Exceptionalities

**Field Studies**
**Adult Education**
ED 3015 Practicum in Adult Education
ED 5010 Advanced Practicum in Adult Education
ED 5011 Preparing for Prior Learning Assessment

**History, Philosophy and Practice**
**Adult Education**
ED 3011 Professional Ethics for Practitioners of Adult Education
ED 4042 Introduction to Adult Education

**Human Development and Learning**
**Adult Education**
ED 3024 Understanding the Adult Learner
ED 4102 Transition to Adulthood
ED 5022 Transformative Learning

**Independent Studies**
ED 4191, ED 5191 Independent Studies
ED 5156 Special Topics in Adult Education

**Social, Cultural and Political Contexts of Education**
**Adult Education**
ED 3114 Introduction to Workplace Learning
ED 4012 Diversity and Inclusion in Adult Learning
ED 4045 Issues in Training and Development
ED 4061 Advising and Mentoring Adult Learners
ED 5157 Adult Education and Community Development

**Certificates and Diplomas**

**Bridging Year Program**
The Faculty of Education offers a Bridging Year Program for First Nations students who are preparing for admission to a UNB degree program. Applications for the program are welcome from:

1. High school graduates.
2. Students with Grade 11 who have been out of school for at least 3 years.
3. Mature students as defined in the UNB undergraduate Calendar.

Admissions are competitive. Satisfaction of the minimum criteria will not guarantee acceptance. The deadline for applications is March 31. Late applications can be considered only if spaces remain unfilled.

In their Bridging Year students register for four courses each term, at least one of which must be a university credit course (See Bridging Year courses in Section H of the Calendar). Course schedules are individually planned in consultation with the Faculty in which a student wishes to enrol the following year.

The maximum time permitted between the first registration and the completion of the Bridging Year in accordance with the regulations in effect at the time of first registration shall be two consecutive academic terms. Students who complete the Bridging Year with a minimum of 24 ch or the equivalent of 8 term courses and with a grade of CR in all BY courses and a GPA of 2.0 or higher in other courses will be guaranteed admission to the degree program for which the Bridging Year was designed. Students who do not succeed in meeting these requirements will not be permitted to continue in the Bridging Year program and will not be transferred to a degree program.

**Certificate in Adult Education**
The Faculty of Education offers degree credit courses leading to a Certificate in Adult Education. The certificate program is open to individuals who have met normal admission requirements for the BEd. The certificate requires a total of 36 ch. Consult the UNB Certificate Program Coordinator for a listing of appropriate courses.

**Certificate in Early Childhood Education**
The certificate is designed to provide participants with the knowledge and skills that will enable them to foster dynamic learning environments for young children. The Certificate in Early Childhood Education requires successful completion of:

1. **Required**
   - ED 5355 Literacy Learning the Early Years
2. **Three of**
   - ED 5102 Curriculum and Evaluation in the Early Years
   - ED 5105 Connecting Home and School Literacies
   - ED 5167 Interpreting Play for Curriculum Development
ED 5362 Symbolic Representation for Children's Play Pictures and Print

3. A practicum in a K-2 setting (at least 50%)

Certificate in Teaching French as a Second Language (CTFSL)

Description
This certificate is designed to provide participants with the knowledge and skills necessary to become effective teachers of French as a Second Language (FSL). The CTFSL requires successful completion of:

- ED 5568, ED 5569, ED 5575 (secondary stream)
- OR
- ED 5562, ED 5563, ED 5575 (elementary stream)
- A practicum in an FSL context (at least 50%)
- The New Brunswick Oral Proficiency Interview (Minimum of Advanced Plus for French immersion, and Advanced for all other FSL teaching contexts).

Eligibility
In order to be eligible to enroll in the CTFSL, candidates must be currently enrolled in a B.Ed. program and be completing a concentration in FSL.

Certificate in Teaching English as a Second Language (CTESL)

Program Description
This Certificate Program is designed to provide participants with knowledge and skills necessary to become effective teachers of English as a second language (ESL). The CTESL requires successful completion of:

- Three compulsory courses:
  - ED 5564 - Introduction to Second Language Education
  - ED 5565 - Advanced Studies in ESL Education
  - ED 5575 - Reflection on Second Language Theory and Practice
- One approved course in the area of language education, cultural studies or literacy, and
- Practicum in TESL (ED 5566 or equivalent)

Eligibility
In order to be eligible to enroll in the CTESL, candidates must either have completed an undergraduate degree or be currently enrolled in a BEd program.

Candidates whose first language is not English must also demonstrate a high level of English language proficiency as evidenced by:

- A score of 600 or better on the TOEFL
- And a score of 55 or better on the TSE (Test of Spoken English)
- And a score of 5.5 or better on the TWE (Test of Written English)

Equivalent tests may be considered.

Practicum
Students pursuing the CTESL must successfully complete ED 5566 - Field Experience in TESL. This is a 3 credit hour practicum that involves approved short-term experience working in an ESL setting. Students enrolled in a BEd program may request that ED 5566 be waived if they have had equivalent practical experience in ESL education during their regular BEd teaching practicum. Recognition for any such equivalent experience must be approved in advance.

NOTE: Students wishing to obtain both the Certificate in Teaching French as a Second Language and the Certificate in Teaching English as a Second Language must take 12 ch of different courses. In other words, the same courses may not be applied to both certificates.

The Faculty of Education places students in school settings at the discretion of the public school system. Although the Faculty cannot guarantee a placement in that system, it will make its best effort to find an initial placement for any student eligible for the practicum (subject to approval by the University).

Diploma in Advanced Undergraduate Study (DAUS)

The DAUS is a 36 credit hour program designed for students with a degree in Education who wish to gain additional teaching qualifications. Students may choose a general pattern (Professional Growth) or a specific area of specialization from the following:

- Professional Growth
- Early Childhood
- Elementary Education
- School Counselling and Special Education
- Literacy Education
- French Immersion Education
- French Second Language Education
- Mathematics and Literacy Education
- Science Education
- Social Studies Education

Consult the Faculty for course requirements.

Regulations for DAUS Not Covered by General University Regulations

1. Admission
   Students who hold a BEd degree or the equivalent (e.g. certified teachers with a BA or BT) are eligible for admission to the DAUS.

2. Student Standing
   a. A grade of D shall meet the prerequisite requirements of that Faculty/Department.
   b. In course offerings of other Faculties/Departments, students must meet the prerequisite requirements of that Faculty/Department.
   c. A grade of C shall be the minimum acceptable grade in courses for the DAUS.
   d. No course can be credited without prior approval of a faculty advisor.

3. Residency Requirements
   Students must normally complete a minimum of 24 credit hours of work for the DAUS on campus as full or part-time students.

4. Transfer Credits
   Students may not transfer more than 12 credit hours of work from another university for credit toward the DAUS. No surplus credits from the BEd other than extra courses taken in the final year may be transferred in for credit. When applying for the DAUS, students may transfer only 12 ch taken prior to admission to the program.

5. Time Limit
   In accordance with the regulations in effect at the time of registration, the maximum time permitted between the first registration and completion of the DAUS will be six years.
SECTION G: FREDERICTON ACADEMIC PROGRAMS

BACHELOR OF GEOMATICS

The Department of Geodesy and Geomatics Engineering, in the Faculty of Engineering, offers a non-engineering baccalaureate degree, Bachelor of Geomatics.

NOTE: For Department information, see the Bachelor of Science in Engineering (Geomatics Engineering) program section.

Even though admission to the Geomatics degree may be granted after completion of the appropriate secondary school courses, it is preferred that applicants have successfully completed a programme of geomatics engineering technology (GET) or its equivalent. Usually at least two years in duration, the GET should have included or have been supplemented with courses in calculus, computer science, and probability and statistics at a level equivalent to first year university. Some advanced credit for those academic efforts, or for academic efforts at any other form of post-secondary education, may then be given.

The recommended first year calculus courses for students who have obtained a passing score on the Department of Mathematics and Statistics placement test (offered during the orientation session at the beginning of the fall term) are MATH 1003 and MATH 1013. Students with insufficient scores may be required to take remedial mathematics courses which may prolong their studies at UNB because of prerequisite sequencing.

The Bachelor of Geomatics cannot be done after having completed the Bachelor of Science in Engineering in Geomatics Engineering.

Curriculum

With a minimum of 120 credit hours (ch) in the Geomatics program, students are required to complete:

a. a core of mathematics, computer science, general science, and geomatics subjects; and
b. a minimum of 13 ch of approved technical electives, with at least 9 ch of GGE 5000 level courses.

Credit hours for courses are listed in the course descriptions portion of the calendar.

A minimum grade of C is required for all courses to be used as credit toward the degree.

Students who have previous post-secondary educational efforts are advised to write to the Chair of the Department for information on credits that may be awarded.

Students who wish to academically prepare to become professional land surveyors, but not professional engineers, should follow the Cadastral Surveying Option outlined below.

The program has been designed to be completed in 6 terms, with reasonable course loads. Students may proceed at a slower rate but all requirements must be completed within 8 consecutive years. Detailed program information is available from the Department.

Courses

Descriptions of courses offered by the various Departments are given in the "Fredericton Courses" Section of this Calendar.

Core Courses (all required)

- CE 3963 Engineering Economy
- CS 1003 Programming and Problem Solving for Engineers
- ECON 1073 Economics for Engineers
- ENGG 4013 Law and Ethics for Engineers
- GGE 1001 Introduction to Geodesy & Geomatics
- GGE 2012 Advanced Surveying
- GGE 2013 Advanced Surveying Practicum
- GGE 3423 Introduction to Geographic Information Systems
- GGE 2501 Land Administration I
- GGE 3022 Survey Design and Analysis
- GGE 3023 Surveying Design Practicum
- GGE 3042 Introduction to Global Navigation Satellite Systems
- GGE 3111 Introduction to Adjustment Calculus
- GGE 3122 Advanced Adjustment Calculus
- GGE 3202 Geodesy I
- GGE 3342 Remote Sensing
- GGE 3353 Ocean Mapping
- GGE 3423 Introduction to Geographic Information Systems
- GGE 4211 Geodesy II
- GGE 4313 Airborne Mapping Systems
- GGE 4423 Advanced Geographic Information Systems
- GGE 4512 Land Administration II
- MATH 1003 Introduction to Calculus I
- MATH 1013 Introduction to Calculus II
- MATH 1503 Introduction to Linear Algebra
- MATH 2513 Multivariable Calculus for Engineers
- STAT 2503 Probability and Statistics for Engineers
- GGE 5011 Oceanography, Tides, and Water Levels
- GGE 5012 Marine Geology and Geophysics
- GGE 5022 Precision Surveying
- GGE 5042 Kinematic Positioning
- GGE 5131 Special Studies in Adjustments
- GGE 5222 Gravity Field in Geomatics
- GGE 5242 Global Navigation Satellite Systems for Geodesy
- GGE 5322 Digital Image Processing
- GGE 5341 Advanced Technologies in Remote Sensing
- GGE 5401 Geospatial Development
- GGE 5402 Geographic Databases
- GGE 5403 Web Mapping and Geospatial Web Services
- GGE 5405 Introduction to Big Data & Data Science
- GGE 5415 Real-Time Mobility Data Analytics
- GGE 5413 Special Studies in Digital Mapping
- GGE 5521 Survey Laws
- GGE 5833 Land Use Planning for Geomatics
- GGE 5701 Special Studies in Geomatics I
- GGE 5702 Special Studies in Geomatics II
- GGE 5703 Special Studies in Geomatics III

Technical Electives

Students who complete the Bachelor of Geomatics at UNB with the four specified technical electives (CE 5313 or GGE 5813; CE 5342 or GGE 5842; GGE 5521 and GGE 5532), or two specified technical electives (GGE 5521 and GGE 5833), as well as either GGE 4022 or GGE 5022, will have the following notation placed on their transcripts: "COMPLETED CADASTRAL SURVEYING OPTION". This option has been accredited by the Canadian Board of Examiners for Professional Surveyors.

ENVIRONMENTAL STUDIES PROGRAM

General Information

Environmental Studies interdisciplinary programs provide an academic framework for understanding the growing body of literature and scholarship on environmental problems. Students will learn about major environmental problems facing contemporary society, and acquire the interdisciplinary tools required to analyze, critique, and solve them. Both theoretical and applied approaches will be emphasized to varying degrees within the curriculum.

Eligibility

Environmental studies courses are open to any student in any faculty electives contributing, towards a Minor, or a Secondary Major. There is no official admission to the Environmental Studies Minor or Secondary Major programs. Students may take the required credit hours at any time throughout their program, and will indicate their desire to be considered for either the Minor or Secondary Major when applying to graduate. Students are advised to contact the coordinator of the Environmental Studies program early on in their studies to ensure they will have all necessary credits. With the permission of the Coordinator of Environmental Studies, students may count the following for credit in the Minor and Secondary Major programs: (i) UNB course credits not on the list of Environmental Studies elective courses (provided below), but approved by the relevant Faculty at UNB and deemed relevant by the coordinator of the Environmental Studies program; and (ii) course credits from other universities which have been approved by the relevant Faculty at UNB and deemed relevant by the coordinator of the Environmental Studies program. NOTE: Any course required by a student's primary major (as a core course) cannot be used as an Environmental Studies course elective. However, students can count approved elective courses towards one or more minors. Students should also be aware that some courses listed above have Prerequisites.

Programs of Study
Environmental Studies Minor
The Environmental Studies Minor consists of 24ch of core and elective courses, selected in consultation with the Coordinator of Environmental Studies. Students are required to take:
1. 6ch of core Environmental Studies (ENVS) courses.
2. 18ch of course work chosen from a list of approved elective courses (provided below). One elective course must be taken under each of three discipline headings specified in the list of elective courses.
3. Additional courses may be approved for electives by the Coordinator of Environmental Studies.

Environmental Studies Secondary Major
The Environmental Studies Secondary Major consists of 30ch of core and elective courses, selected in consultation with the Coordinator of Environmental Studies. Students are required to complete:
1. 6ch of core Environmental Studies (ENVS) courses.
2. 24ch of course work chosen from a list of approved elective courses (provided below). A minimum of 18ch shall be upper level courses (i.e., 3000 level courses and above), and at least one course from each of the three discipline headings specified in the list of elective courses must be taken. A grade of C or better in each course is required for credit in the Environmental Studies Secondary Major program.

Courses
Core Courses:
ENVS 4001 Environmental Impact Assessment and Management (3ch)

Elective Courses:
Science Group
BIOL 2003 Introduction to Ecology
BIOL 3459 Economic Botany
BIOL 4233 Conservation Biology
BIOL 4351 Climate Change and Environmental Response
BIOL 4773 River and Lake Ecosystems
BIOL 4863 Environmental Biology
ENR 3111 Estuary and Ocean Ecosystems
ENR 3532 Ecohydrology
ENR 4111 Fisheries and Aquatic Sciences Techniques
FOR 3445 Forest Ecology: Populations and Communities
FOR 3456 or FOR 4576 Forest Watershed and Forest Fire Management
FOR 4425 Conservation Genetics
FOR 4576 Forest Hydrology and Aquatic Habitats
ESCI 2602 Principles of Geochemistry
ESCI 3442 Geohydrology
ESCI 3631 Geochemistry of Natural Waters

Applied Science Group
PHYS 2803 Physics and Society
PHYS 2902 Environmental Physics

Elective Courses:
CE 3403 Introduction to Environmental Engineering
CE 3713 Hydraulics and Hydrology
CE 5721 Ecohydrology
CE 5421 Water Quality and Treatment
CHE 5313 Energy and the Environment
CHE 5314 Chemical Process Industries
CHE 5413 Air Pollution Control
CHE 5933 Bio-refining: Principles, Processes and Products
ENR 2114 Water Sustainability: Practice and Technology
ENR 3201 Urban Hydrology and Water Management
ENR 3112 Water Resources Management
ENVS 2023 Climate Change
FOR 2006 Management of Natural Systems
FOR 4545 Biodiversity and Ecosystem Management
FOR 4625 Integrated Management of Insects and Fungi
FOR 4656 Wildlife: Scale and Forest Landscapes
ESCI 4452 Environmental Impact Assessment

Social Sciences and Humanities Group
ANTH 2114 Human Systems of Exchange: Nature and Culture
ANTH 4114 Culture and Environment
ECON 3755 Environmental Economics
ENR 2004 Social and Cultural Systems
ENVS 4002 Stakeholder Approaches to Environmental Problem Solving
ENR 2114 Water Sustainability: Practice and Technology
ENR 3201 Urban Hydrology and Water Management
ENR 3112 Water Resources Management
ENVS 2023 Climate Change
FOR 2006 Management of Natural Systems
FOR 4545 Biodiversity and Ecosystem Management
FOR 4625 Integrated Management of Insects and Fungi
FOR 4656 Wildlife: Scale and Forest Landscapes
ESCI 4452 Environmental Impact Assessment

* Credit granted for only one of: SOCI2534, HIST3925

PHIL 3206 Environmental Ethics
POLS 1603 Politics of Globalization
SOCI 2534 Technology and Social Change*
SOCI 3553 Sociology and the Environment

* Credit granted for only one of: SOCI2534, HIST3925
SECTION G: FREDERICTON ACADEMIC PROGRAMS

BACHELOR OF INFORMATION SYSTEMS

FACULTY OF COMPUTER SCIENCE

NOTE: Admission to the Bachelor of Information Systems program has been suspended, effective September 2015. For further information, please contact the Dean of the Faculty of Computer Science.

General Information

Information Systems was established at UNB as a separate program in 2007. The BISys program is administered by the Faculty of Computer Science. The program educates professionals who apply information technology to solve problems within the business domain.

The BISys program is designed as a four-year program or five years if undertaken in conjunction with the Cooperative Education Program (Co-op) or Professional Experience Program (PEP). Students entering the program are strongly encouraged to participate in either Co-op or PEP, as it is widely recognized that the experience gained is a valuable component of an Information Systems background. A description of the Co-op and PEP programs are found in Section G Undergraduate Degrees in the Computer Science section.

The Faculty of Computer Science also offers the following degree programs:
- Bachelor of Computer Science
- Bachelor of Science in Software Engineering (offered jointly with the Faculty of Engineering)

Curriculum

The program consists of 40 courses. The program consists of: required "core" courses from information systems, computer science, business administration, and mathematics, arts electives; and free electives. A minimum of 131 ch is required for the degree. A minimum grade of C is required for all courses used for credit towards the BISys degree.

Core Courses

- CS 1073 Introduction to Computer Programming I (in Java)
- CS 1083 Introduction to Computer Programming II (in Java)
- CS 2043 Software Engineering I
- CS 2253 Machine Level Programming
- CS 3413 Operating Systems I
- CS 3503 Systems Analysis, Design and Project Management
- CS 3873 Net-centric Computing
- CS 3997 Professional Practice
- INFO 1003 Foundations of Information Systems
- INFO 1103 Data and Information Management
- INFO 2403 Information Security
- INFO 3103 e-Business Software Development
- INFO 3303 Enterprise Information Systems
- INFO 3403 Information Systems Administration
- INFO 4900 Information Systems Project
- ADM 1113 Administration
- ADM 1213 Financial Accounting
- ADM 1313 Principles of Marketing
- ADM 2223 Managerial Accounting
- ADM 2413 Principles of Finance
- ADM 2513 Organizational Behaviour
- ADM 2623 Business Statistics
- ADM 2624 Management Science

ADM 3573 Organizational Design
MATH 1823 Calculus for Management Sciences
MATH 1833 Finite Mathematics for Management Sciences

Electives

Arts Electives

Students must take at least 3 courses offered by the Faculty of Arts.

Free electives

Students must take at least 10 other courses (min 30 ch) selected from a list of approved courses that can be obtained from the Faculty of Computer Science. At least two of these free elective courses (minimum of 6 ch) must be 2nd year or above.

NOTE: For both the 'Arts electives' and 'Free electives' requirements, courses worth 6 credit hours or more will count as two courses.

GENERAL NOTES

1. UNIV 0101 (formerly UNIV 1001), AESL 1011 and AESL 1012 will not be counted for credit toward degree programs offered by the Faculty of Computer Science.

2. Bachelor of Information Systems students should be aware that a Minor in Business may be obtained by selecting relatively few additional Business Administration courses as free electives. Students planning to minor in Business should select courses in consultation, and in advance, with the Faculty of Business Administration.

Minor in Information Systems

Students who are not registered in a degree program in the Faculty of Computer Science may complete a Minor in Information Systems by completing 8 courses as follows:
- ADM 1213 Financial Accounting
- CS 1073 Introduction to Computer Programming I (in Java)
- CS 3503 Systems Analysis, Design and Project Management
- INFO 1003 Foundations of Information Systems
- INFO 1103 Data and Information Management
- INFO 3303 Enterprise Information Systems
- INFO 3403 Information Systems Administration
- One of CS 1083 Introduction to Computer Programming II (in Java) or INFO 2403 Information Security
- ADM 1313 Principles of Marketing
- ADM 2223 Managerial Accounting
- ADM 2413 Principles of Finance
- ADM 2513 Organizational Behaviour
- ADM 2624 Management Science
- ADM 2815 Human Resource Management
- ADM 3123 Business Law I

A grade of C or better is required in all courses offered for the Minor.

Bachelor of Information Systems students should be aware that a Minor in Business is required for the degree. A minimum grade of C is required for the degree. A minimum grade of C is required for all courses used for credit towards the BISys degree.

Bachelor of Computer Science (offered jointly with the Faculty of Arts)

Students planning to minor in Business should select courses in consultation, and in advance, with the Faculty of Business Administration.

Arts Electives

Students must take at least 3 courses offered by the Faculty of Arts.

Free electives

Students must take at least 10 other courses (min 30 ch) selected from a list of approved courses that can be obtained from the Faculty of Computer Science. At least two of these free elective courses (minimum of 6 ch) must be 2nd year or above.

NOTE: For both the 'Arts electives' and 'Free electives' requirements, courses worth 6 credit hours or more will count as two courses.

GENERAL NOTES

1. UNIV 0101 (formerly UNIV 1001), AESL 1011 and AESL 1012 will not be counted for credit toward degree programs offered by the Faculty of Computer Science.

2. Bachelor of Information Systems students should be aware that a Minor in Business may be obtained by selecting relatively few additional Business Administration courses as free electives. Students planning to minor in Business should select courses in consultation, and in advance, with the Faculty of Business Administration.

Minor in Information Systems

Students who are not registered in a degree program in the Faculty of Computer Science may complete a Minor in Information Systems by completing 8 courses as follows:
- ADM 1213 Financial Accounting
- CS 1073 Introduction to Computer Programming I (in Java)
- CS 3503 Systems Analysis, Design and Project Management
- INFO 1003 Foundations of Information Systems
- INFO 1103 Data and Information Management
- INFO 3303 Enterprise Information Systems
- INFO 3403 Information Systems Administration
- One of CS 1083 Introduction to Computer Programming II (in Java) or INFO 2403 Information Security
- ADM 1313 Principles of Marketing
- ADM 2223 Managerial Accounting
- ADM 2413 Principles of Finance
- ADM 2513 Organizational Behaviour
- ADM 2624 Management Science
- ADM 2815 Human Resource Management
- ADM 3123 Business Law I

A grade of C or better is required in all courses offered for the Minor.

Bachelor of Information Systems students should be aware that a Minor in Business is required for the degree. A minimum grade of C is required for the degree. A minimum grade of C is required for all courses used for credit towards the BISys degree.

Information Systems (BISys) Entrance Program

1. High School students who do not meet the admission requirements noted in the Admission Chart for direct entry to the BISys program but have a passing grade in each of the required courses and a minimum admission average of 60% may be considered for full time admission to an Entrance Program to the extent that capacity allows.

2. Students enrolled in the BISys Entrance program are restricted to a maximum of 28 ch in the first year of studies. This is a prescribed set of courses as determined by the Faculty, including courses in Computer Science, Information Systems, Mathematics, and Business Administration, as well as UNIV 0101.

3. Students are required to meet with their Faculty Advisor on a semi-annual basis.

4. Students who successfully complete their first year with a minimum grade of C in at least 20 ch of courses, obtain a minimum GPA of 2.0, regardless of the total number of credit hours completed, successfully complete UNIV 0101 and other conditions as may be outlined by the Faculty, will be approved for admission to the BISys program for the upcoming academic year.

5. Students who do not succeed in completing the program requirements may not be permitted to continue in the BISys Entrance program nor enter the BISys degree program.

6. Students can only register in the BISys Entrance program once.
**BACHELOR OF INTEGRATED STUDIES**

**Mailing Address:** Bachelor of Integrated Studies  
c/o UNB College of Extended Learning  
6 Duffie Drive, P.O. Box 4400,  
Fredericton, N.B., Canada, E3B 5A3

**Phone:** (506) 458-7976  
**Fax:** (506) 453-3572  
**Email:** bis@unb.ca  
**Website:** http://www.unb.ca/CEL/credit/bachelor-of-integrated-studies/index.html

**General Information**

The Bachelor of Integrated Studies (BIS), an innovative degree completion program, was developed in response to the needs of adult learners. BIS students will have some post-secondary educational experience (such as certificate or diploma programs, or partially completed degree programs); and may have achieved equivalent university study through a Prior Learning Assessment (PLA) of university-level learning gained through work, life and education experiences.

The BIS is particularly designed for part-time study. Mid-career adults may consider this program for a variety of reasons including a change in professional direction, advancement within their career, or seeking a personal or professional challenge. To help adult learners achieve their specific personal, educational and professional goals, the program will integrate their university-level educational background and career and personal objectives with an approved plan of study.

**Expected Outcomes**

Although each individual program of study may include learning outcomes specific to that plan, student-learning outcomes that are general to the BIS degree program include:

- Communication skills: graduates will be able to listen, read, synthesize, draw conclusions and effectively communicate results in both oral and written form.
- Critical and analytical thinking: graduates will be able to absorb and analyze complex material from a variety of disciplinary perspectives.
- Problem solving: because of their increased ability to critically analyze the complexities of an issue or problem from multiple perspectives, graduates will have developed the ability to make discerning judgments and decisions.
- Intellectual and research skills: graduates will have acquired generalized intellectual and research skills, which will also develop the student’s capacity for lifelong learning.
- Interdisciplinary leadership: graduates will be able to set a direction, create and maintain commitment to that direction, and face adaptive challenges. As well, graduates will have an interdisciplinary awareness of current social, political, and economic concerns, the leadership qualities required to assume the challenges of citizenship, and the capabilities to facilitate change.

This degree program is jointly coordinated and administered through a partnership between Renaissance College (the Faculty) and the College of Extended Learning (CEL). Renaissance College (RC), with its strength in interdisciplinary leadership programs and with its emphasis on learning portfolios and outcomes-based learning, is responsible for the academic oversight of the BIS program (admissions, transfer credit review, curriculum changes, graduation and portfolio approvals). The College of Extended Learning, with its expertise in adult learning, distance education, workplace learning, and prior learning assessment provides the infrastructure and the administrative support for the program. The UNBF Faculties contribute expertise in the areas of the students’ chosen Minor programs and in Prior Learning Assessments.

**University/General Regulations**

The General University Regulations covered in Section B of this Calendar will govern any point not covered by the General Regulations of the Bachelor of Integrated Studies. Questions concerning the application of regulations should be directed in writing to the Registrar.

Normally, applicants to the Bachelor of Integrated Studies program without a prior degree must meet the following requirements:

- Have acquired a minimum of 30 credit hours of transferable credit of post-secondary study. Transferable credit may also include credit awarded through a Prior Learning Assessment (PLA).
- Have been out of high school a minimum of seven (7) years.
- As a final step in the admission process, complete an interview with the Bachelor of Integrated Studies Coordinator to assess their suitability for the program.

Potential applicants with a degree should refer to existing regulations in the UNB Calendar regarding second degrees and should consult the BIS Coordinator.

To earn a Bachelor in Integrated Studies a student must complete a minimum of 120 credit hours that include the following requirements:

1. **University Minor:** A required element of the BIS program is a University Minor or the equivalent. Specialization in a discipline or subject area through a minor complements the interdisciplinary nature of the BIS program. UNB Minors are administered and approved by UNB Faculties. Externally obtained minors must meet UNB guidelines for Minors and have an equivalent content and quality level to that offered by UNB. In cases where the student’s particular interests and qualifications warrant a minor in Interdisciplinary studies, this can be approved by the Faculty of Renaissance College in consultation with the College of Extended Learning.

2. **Leadership Component:** To build program coherence and to explore interdisciplinary and integrated learning approaches each learner will normally complete at least 15 credit hours of interdisciplinary courses through Renaissance College within the first two years of study. This will provide them with a Certificate in Leadership studies (see Bachelor of Philosophy in Interdisciplinary Leadership - Certificate in Leadership Studies in the Undergraduate Calendar). By adding three additional leadership related courses through Renaissance College, students can obtain a Minor in Leadership Studies (see Bachelor of Philosophy in Interdisciplinary Leadership - Minor in Leadership Studies). This will not replace the requirements of the BIS minor.

3. **Individualized Plan of Study:** Adult learners admitted to the BIS will meet with the BIS Coordinator to design a plan of study that builds upon their interests and previous academic study, and that meets the program requirements.

Each individual plan of study includes a statement of objectives written by the learner, a list of courses previously taken and to be taken during the upcoming academic year, a summary of BIS program requirements, and a description of how each component will contribute to achieving the student’s learning objectives. Each learner’s plan of study begins in the first semester.

4. **Personal learning portfolio:** Two distinct elements of the BIS portfolio are required for graduation. The first is successful completion of RCLP 3030, the BIS learning portfolio course. This 3ch course introduces learners to the BIS learning outcomes, reflective writing, and experiential learning as a foundation for developing their learning portfolios. BIS students take this course early in their program. The second element is a personal learning portfolio that learners continue to develop throughout their studies. The development of the learning portfolio begins with the admission application process, and if applicable, the applicant’s prior learning assessment. A portfolio review takes place annually to allow learners to recognize and reflect on progress toward their objectives and the BIS learning outcomes.

5. **Elective credits:** The balance of the BIS program is comprised of elective courses that students select based on individual goals and interests identified in their study plans.

6. **Students must complete a minimum of 39 credit hours (one-third of the program) at the 3000 and/or 4000 level.**

7. **Students must maintain a minimum cumulative grade point average of 2.0.**

8. **Normally students will complete a minimum of 45 credit hours of the program at UNB. The Registrar in consultation with the College of Extended Learning may waive this provision.**

9. **A course taken or transferred to satisfy any of the requirements for a BIS degree must be passed with a minimum grade of C. A maximum of twelve (12) credit hours from courses with a final grade of D can transfer as elective credit only and must be from a field in which a grade of D is considered to be a passing grade.**

The standing RC BIS Committee (composed of one RC faculty member, the BIS Coordinator and the RC College Coordinator) will review and make recommendations to RC Dean or Council for approval of PLA, transfer credit, periodic plans of study and graduation.

- Wilkins, Krista, BSc (Dal), BScN (Dal), MN (U of M), PhD (U of M), Assoc Prof and Assoc Dean -2000
- Wilson, Kathy, BN (UNB), MN (Dal), PhD (UNB), Assoc Prof - 1990

Mission Statement

Educating and preparing nurses for an evolving healthcare system grounded in the principles of primary health care, social justice and caring supported by evidence and research.

- Questioning, developing, applying and sharing nursing knowledge
- Creating a climate for the advancement of excellence in nursing practice
- Implementing a curriculum grounded in the principles of primary health care, social justice, and caring

Engaging diverse communities as full participants in inquiry, caring and decision-making related to health.

The Faculty of Nursing contributes to enhancing people’s health and the advancement of the profession and discipline of nursing.

General Information

The Faculty of Nursing was established in 1958 through the financial generosity of the W.K. Kellogg Foundation and the provincial government. It was the result of the recognized need for better education for professional nurses by this University and individuals and organizations in the health fields. This program has built a solid reputation across Canada and internationally over the years.

The Nurses’ Association of New Brunswick established a Task Force which led in 1989 to the endorsement of the Baccalaureate degree in Nursing as the entry level to the profession by the year 2000. In December 1994, the responsibility for nursing education in NB was transferred to the universities and UNB admitted the first cohort of students in the fall of 1995. In fall of 2000, the Faculty of Nursing began a collaborative relationship to offer the baccalaureate program in nursing at the Humber Institute of Technology and Advanced Learning.

The Faculty of Nursing offers two programs leading to a baccalaureate degree. The four year BN degree program covers four years of general and professional education. This program is offered at the Fredericton and Saint John campuses. The Advanced Standing degree program (BNASP) is completed in six terms (Fall, Winter and Summer) over the course of two years, beginning in September of each year. BNASP is offered only at the Moncton site. On completion of either program, graduates are eligible to write the National Council Licensure Examination (NCLEX-RN). Those who are successful are eligible to apply for registration across Canada and in other countries by reciprocity.

Nursing students practice in a variety of clinical facilities and health agencies. All students will be expected to travel out of town for some clinical experiences. In some instances, accommodation will be required. Students may also be expected to complete clinical experiences during evenings, nights, and weekends to accommodate availability of clinical facilities and/or instructors. Students may need to participate in the preceptor clinical practicum during the winter break. Normally, summer session clinical courses are completed by the end of May/early June (four year BN program). However, depending on the availability of clinical facilities and/or instructors, these time frames may need to be extended. Students will be provided with notice of clinical scheduling as soon as it is feasible.

All BN and BNASP students must provide proof of required immunizations. Clinical agencies require that students be fully immunized in order to access facilities and may ask students at any time to provide proof of the following mandatory immunizations: Diphtheria, Pertussis, Tetanus, Polio, Measles, Mumps, Rubella and Varicella; appropriate Diphtheria, Tetanus and Pertussis boosters; and the series of Hepatitis B immunizations and titre status. Students also must have an initial 2-step Mantoux test for Tuberculosis. Further details are contained in the relevant Faculty policy.

Additionally, in order to participate in nursing clinical courses, students must have current CPR Certification Basic Life Support for Health Care Providers (Health Care Provider BLS-HCP) and must have completed a suicide intervention course (such as Applied Suicide Intervention Skills Training [ASIST]). In order to access clinical agencies, students must submit a yearly Criminal Record check, including Vulnerable Sector check. In addition, some clinical agencies require students to have a Social Development Reference Check as described in the Family Services Act of New Brunswick, prior to the clinical practice experience.
**Costs**

Costs in addition to those listed in the financial information section of this Calendar are: CPR Certification; Criminal Record check; Suicide Intervention course; immunizations; books; photocopying; lab kits; equipment; uniforms; preparation for NCLEx examination and examination writing costs; professional nursing registration; professional meetings; travel costs to and from clinical practice areas; and room and board for off-campus and off-site placements/course requirements.

**University Regulations**

It is advisable to read carefully the University Wide-Academic Regulations in this Calendar, in particular the subsection titled Examinations, Standing and Promotion.

Any point not covered in the following regulations will be governed by the General University Regulations.

Transfer and mature students are particularly advised to consult the Admissions and University Regulations section of this Calendar. Transfer students and students applying for Nursing as a second undergraduate degree will take Nursing courses and in addition, those Arts and Science courses required by the Faculty if they have not already taken them. To be eligible for the four year degree program, transfer and mature students must have a minimum grade of 70% on each of the following Grade 12 academic high school courses (or the equivalent) with an overall average of 75% on the four: Biology, Chemistry, English and either Pre-calculus 110 or Foundations of Mathematics 120 (prior to September 2013, Functions and Relations). If a higher level Math course (the Pre-Calculus stream is presented, the math courses with the highest grade will be considered. In addition to these high school courses, transfer applicants must have completed a minimum of 24 credit hours of university course work with an average of 3.0 (B or 70%) or higher. For transfer applicants who have completed more than 24 credit hours, the admission average will be calculated on the most recent 24 credit hours of course work. The grades for all courses taken within an academic term will be included in this calculation, even if the results in exceeding the 24 credit hour requirement. Mature applicants must have completed a minimum of 12 credit hours (or 4 courses) of university studies with an average of 3.0 (B or 70%). Preference may be given to those mature applicants who began and successfully completed this requirement within the year prior to the term for which admission is sought. Questions concerning admissions should be directed to the BN Program Director at the Fredericton campus.

**Admission Policy on English Language Proficiency**

The language of instruction within our program is English and prospective students whose native language is not English will be required to demonstrate competence in the English language prior to admission. Prospective students may prove English language proficiency in one of the following ways:

- Minimum TOEFL (paper based) score of 600
- Minimum TOEFL (IBT) score of 100
- Minimum IELTS score of 7.0
- UNB Fredericton English Language Programme (ELP) Assessment score of 85 with no sub score less than 85
- Equivalent results of a UNB approved standardized proficiency test.
- Complete four or more consecutive years of full-time education in English in a country where English is the principal language.

In all cases, the Faculty reserves the right to require further proof of language proficiency before permission will be granted to register in academic courses.

**General Regulations**

1. A student whose assessment grade point average (the May/April period; for definition, see Standing and Promotion Requirements in Section B of this Calendar) falls:
   a. below 2.0 but above 1.6 will be placed on academic probation; if in any subsequent period the grade point average falls below 2.0 the student will be required to withdraw from the program.
   b. below 1.7 will, subject to review by the Nursing Faculty, be required to withdraw from the program.
2. A student who twice fails to achieve at least a “C” or “CR” grade in any Nursing course will be required to withdraw from the Nursing program.
3. A student must receive at least a “C” or clinical "CR" in
   a. each Nursing course before proceeding to ensuing Nursing courses and
   b. in all additional required non-nursing courses before proceeding to the next year of Nursing courses.
   c. nursing electives
4. A "D" grade is accepted only in non-nursing open electives (a nursing elective taken as an open elective requires a "C" grade for credit).
   5. Normally, students must complete all courses in a given year before proceeding to the next year of the program.

**SECTION G: FREDERICTON ACADEMIC PROGRAMS**

6. A student repeating a Nursing course may, at the discretion of the Nursing Faculty, also be required to repeat and pass the Nursing course that immediately preceded it.
   a. Four year BN degree students must complete the program within 6 years of enrolment in the Faculty of Nursing.
   b. Advanced Standing Degree Program students must complete the program within 4 years of enrolment in the first term of the program.
7. Students who have been out of regularly sequenced nursing courses for less than one year, for any reason, are required to notify the campus BN Director by email of their intentions for future studies by June 1st. This will facilitate planning for the upcoming academic year. Failure to notify the BN Director of the intention to return to the program by this deadline may result in lack of availability of a clinical placement in a required clinical course(s).
8. Students enrolled in the four year BN degree program must complete 94 credit hours in Nursing. 26 required credit hours in other faculties and 9 credit hours of open electives including a maximum of 6 credit hours of nursing electives.
9. All students in the four year and BN program are required to complete one online Student Assessment of Abilities Year (SAAY) survey at the end of each year in the program. The students of the BN Advanced Standing Program are required to complete the online Student Assessment of Abilities Year (SAAY) survey at the completion of terms two, four and six. These surveys are administered electronically and are linked to a particular course at the end of each year in the program. All students must complete the SAAY survey in order to receive credit for the related course.

**Curriculum for BN Students Four Year Degree Program (BN) (Program Start 2014-2017)**

**YEAR I**

Term 1: NURS 1011 (3ch), NURS 1032 (3ch), BIOL 1711 (4ch), Open Elective (3 ch), Writing elective (English or Writing designated Course) (3 ch)

Term 2: NURS 1225 (3ch), NURS 1235 (3ch), BIOL 1782 (4ch), Open Elective (3 ch), restricted elective (Psychology) (3 ch)

**YEAR II**

Term 1: NURS 2177 (3 ch), NURS 2135 (3 ch), NURS 2145 (3 ch), NURS 2154 (3 ch), BIOL 2501 (3 ch)

Term 2: NURS 2041 (4 ch), NURS 2132 (3 ch), NURS 2187 (3 ch), BIOL 2513 (3 ch), STAT 2263 (3 ch)

Extended Winter Session: NURS 2063 (3 ch)

**YEAR III**

Term 1: NURS 3052 (2 ch), NURS 3065 (4 ch), NURS 3068 (5 ch), NURS 3092 (3 ch), BIOL 2251 (3 ch)

Term 2: NURS 3031 (3 ch), NURS 3072 (3 ch), NURS 3074 (4 ch), NURS 3082 (3 ch)

Extended Winter Session: NURS 3103 (3 ch)

**YEAR IV**

Term 1: NURS 4113 (3 ch), NURS 4121 (3 ch), NURS 4125 (5 ch), open or Nursing elective (3 ch)

Term 2: NURS 4185 (3 ch), NURS 4153 (12 ch)

**Curriculum for BN Students Four Year Degree Program (BN) (Starting Program Sept 2018)**

**YEAR I**

Term 1: NURS 1012 (4 ch), NURS 1032 (3 ch), BIOL 1711 (4ch), Writing elective (English or Writing designated Course) (3 ch)

Term 2: NURS 1225 (3 ch), NURS 1305 (4 ch), NURS 1306 (5 ch), BIOL 1782 (4 ch)

Extended Winter Session: NURS 1235 (3 ch)

**YEAR II**

Term 1: NURS 2177 (3 ch), NURS 2135 (3 ch), NURS 2145 (3 ch), NURS 2154 (3 ch), BIOL 2501 (3 ch)

Term 2: NURS 2132 (3 ch), NURS 2187 (3 ch), BIOL 2513 (3 ch), STAT 2263 (3 ch), Open elective (3 ch)

Extended Winter Session: NURS 2063 (3 ch)

**YEAR III**

Term 1: NURS 3065 (4 ch), NURS 3068 (5 ch), NURS 3092 (3 ch), BIOL 2251 (3 ch)

Term 2: NURS 3072 (3 ch), NURS 3074 (4 ch), NURS 3082 (3 ch)

Extended Winter Session: NURS 3103 (3 ch)
The Advanced Standing degree Program in Nursing is intended for applicants with a university degree (or 60 credit hours or more of courses) who wish to become professional nurses.

To be eligible for the Advanced Standing BN program, applicants must have a minimum grade of 70% on each of the following Grade 12 academic high school courses (or the equivalent) with an overall average of 75% on the four: Biology 120, Chemistry 122, English 122 and Pre-Calculus 110 or Foundations of Mathematics 120 (prior to September 2016, Functions and Relations). If a higher level Math course in the Pre-Calculus stream is presented, the math course with the highest grade will be considered. In addition to these high school courses an applicant must have completed a minimum of 60 credit hours of university courses with an admission average of 3.0 ("B" or 70%) or higher. For applicants who have completed more than 60 credit hours, the admission average will be calculated on the most recent 60 credit hours of course work. The grades for all courses taken within an academic term will be included in this calculation, even if this results in exceeding the 60 credit hour requirement. Students must receive a minimum "C" grade or the equivalent in each prerequisite course and maintain a minimum 3.0 GPA ("B" average or 70%) in their prerequisite courses in order to be admitted into the Advanced Standing BN Program.

Program Prerequisites Are:
1. BIOL 1711: Human Anatomy I (4 ch) (BIOL 1709 online course option through UNB College of Extended Learning)
2. BIOL 2251 or equivalent: Microbiology (3 ch)
3. STAT 2263 or equivalent: (3 ch)
4. A restricted elective in either the Humanities or Social Sciences (3 ch)
5. BIOL 2501: (Pathophysiology I (3 ch) (BIOL 2509 online course option through UNB College of Extended Learning)

NOTE: Taken from UNB Undergraduate Calendar

**September 2017 or Earlier Start**

**YEAR I**

Term 1: NURS 1121 (4 ch), NURS 1135 (4 ch), NURS 1136 (4 ch), NURS 1142 (4 ch).

Term 2: NURS 2171 (3 ch), NURS 2172 (5 ch), NURS 2173 (2 ch), NURS 2133 (3 ch).

Term 3: NURS 2133 (3 ch), NURS 3065 (4 ch), NURS 3066 (4 ch), BIOL 2513 (3 ch).

**YEAR II**

Term 4: NURS 3072 (3 ch), NURS 3073 (5 ch), NURS 3082 (3 ch), NURS 4176 (3 ch).

Term 5: NURS 4113 (3 ch), NURS 4121 (3 ch), NURS 4124 (4 ch), NURS 4176 (3 ch).

Term 6: NURS 4185 (3 ch), NURS 4153 (12 ch).

**September 2018 Start**

**YEAR I**

Term 1: NURS 1121 (4 ch), NURS 1135 (4 ch), NURS 1136 (4 ch), NURS 1142 (3 ch).

Term 2: NURS 2171 (3 ch), NURS 2172 (5 ch), NURS 2173 (2 ch), NURS 2133 (3 ch).

Term 3: NURS 2133 (4 ch), NURS 3065 (4 ch), NURS 3088 (5 ch), BIOL 2513 (3 ch).

**YEAR II**

Term 4: NURS 3072 (3 ch), NURS 3073 (5 ch), NURS 3082 (3 ch), NURS 4176 (3 ch).

Term 5: NURS 4113 (3 ch), NURS 4121 (3 ch), NURS 4124 (4 ch), NURS 4176 (3 ch).

Term 6: NURS 4185 (3 ch), NURS 4153 (12 ch).

**Credit Hours Requirements for Nursing Programs**

Four Year BN Degree Program Minimum 129 ch
Advanced Standing Degree Program Minimum 85 ch

**Nursing Electives**

Nursing electives may not be available in each academic year.
NURS 1324 Indigenous Perspectives on Health and Wellness (3 ch)
NURS 4234 Independent Study (3 ch)

FACULTY

Acting Dean: Paul Howe, BA (Toronto), MSc (LSE), PhD (UBC)
- Mira Bachvarova, BA (Trent), MA (Carleton), PhD (Queen's)
- Thomas Mengel, Dipl Paed, Lic Theol (Bamberg), MA (Toronto), Dipl Infl (Hagen); Dr Theol (Bamberg)
- John Valk, BA (Carolinia), MA (St. Michaels), PhD (Toronto)

General Information

The Renaissance College Undergraduate Interdisciplinary Leadership Program is a 126 credit hour program. Approximately sixty percent of the program is held at Renaissance College in its classes, seminars, forums, and internships, with the remaining forty percent offered through other UNB courses. Graduates of the Bachelor of Philosophy in Interdisciplinary Leadership will gain knowledge and experience in leadership, depth in one discipline equivalent to at least a UNB minor, and an interdisciplinary understanding to issues.

Program Features
- An understanding of leadership in different situations and cultures
- A breadth in interdisciplinary knowledge in the social sciences, natural sciences, humanities and fine arts
- A wide selection of elective courses providing students with the opportunity for depth in a disciplinary or professional area
- An emphasis on experiential forms of education to enhance learning
- Activities to enhance the student's physical, emotional, spiritual, intellectual, and social aspects of personal well-being
- An intentional approach to meeting designated knowledge-based and experiential learning outcomes
- A Canadian internship designed to provide practical work and leadership experience
- An international internship designed to foster multiple cross-cultural perspectives
- The program can be completed following a four year option or intensive summer internships can reduce the calendar length of the eight semester B. Phil. degree program to three academic years plus two summers.
- Community-based resource people share their special expertise and will help to situate learning in a practical context

General Regulations

Any point not covered by the General Regulations of Renaissance College will be governed by the General University Regulations stated in Section B of the Undergraduate Calendar. Questions concerning the application of university regulations should be directed to the Registrar in writing.

1. To earn a Bachelor of Philosophy degree (in Interdisciplinary Leadership) a student must demonstrate, in a summative portfolio, growth and competency in each of the program's designated learning outcomes. During the course of the program, students will show growth and competency in a formative learning portfolio. Within the context of Interdisciplinary Leadership studies, students are to achieve growth and competency in the following learning outcomes: Knowing Oneself and Others, Effective Citizenship, Problem Solving, Multi-Literacy, Personal Well-Being, and Social Interaction. No letter grade is assigned to the summative portfolio, rather the portfolio is assessed as credit or no credit.

2. The Renaissance College degree program is designated as a limited enrolment program and meeting the minimum requirements does not guarantee admission. Normally, not more than thirty students will be admitted in any academic year.

3. The maximum time period between the first registration in the Renaissance College program and the completion of the degree is seven (7) years.

4. Few prerequisites are specified; it is expected that students will ordinarily take courses in the normal sequence and exceptions will require the permission of the Dean and instructor of the course.

5. In exceptional circumstances, and with the approval of the Dean, alternative arrangements may be made in lieu of the Canadian internship or international internship to meet degree requirements.

6. Where the educational objectives of a course will be best served by limiting enrolment in the course, the Dean may approve a limited enrolment for the course.

7. In course offerings of other Faculties/Departments, students must meet the prerequisite and other requirements of that Faculty/Department.

8. Each student's program of study must be approved by the College advisor.

9. A minimum grade of C will be required for all courses that are used to meet the core requirements of the program and courses judged to be 'equivalent' to RCLP courses as part of credit transfer.

10. Students must be in good academic standing (min. 2.0 assessment GPA) in order to register in RCLP 2023 Canadian Internship. Failure to meet preparatory course requirements could lead to disqualification from participation in the Canadian internship. Any costs incurred by the student up to the point of disqualification are the sole responsibility of the student. A student who fails to qualify will normally be expected to take RCLP 2023 the following year.

11. In order for students to register in RCLP 3046, students must a) achieve a minimum grade of B (3.0) in RCLP 2023, and b) achieve a term GPA of 2.7 in the fall term preceding the internship or a minimum cumulative GPA of 2.7. Failure to meet preparatory course requirements could lead to disqualification from participation in the international internship. Any costs incurred by the student up to the point of disqualification are the sole responsibility of the student. A student who fails to qualify will normally, be expected to take RCLP 3046 the following year.

Curriculum

Core Courses

RCLP 1001 Leadership Foundations 3 ch
RCLP 1010 Formative Learning Portfolio I 2 ch
RCLP 1011 Worldviews, Religions and Cultures 3 ch
RCLP 1021 Concepts of Enhancing Personal Well-Being 3 ch
RCLP 1052 Quantitative Approaches to Problem-Solving 3 ch
RCLP 1062 Citizenship and Community 3 ch
RCLP 1111 Integrative Forum I 1 ch
RCLP 1112 Integrative Forum II 6 ch
RCLP 2001 Practicing Leadership in Community Projects 3 ch
RCLP 2014 Democracy and Public Policy in Canada 3 ch
RCLP 2020 Formative Learning Portfolio II 2 ch
RCLP 2023 Canadian Internship 12 ch
RCLP 2042 Science and Society 3 ch
RCLP 3002 Leadership in Cross-Cultural Contexts 3 ch
RCLP 3015 Democracy and Global Policy 3 ch
RCLP 3046 International Internship 12 ch
RCLP 4002 Leadership for Social Innovation 3 ch
RCLP 4028 Community Problem-Solving and Research Project 6 ch
RCLP 4031 Images and Insight 3 ch
RCLP 4040 Summative Learning Portfolio III 2 ch
Total credit hours of core courses is 84 ch

Electives

Electives shall constitute a minimum 42 credit hours, with at least 24 ch assigned to a concentration equivalent to a UNB Minor Program.

Minor in Leadership Studies

The Renaissance College Minor in Leadership Studies is an interdisciplinary program offered to students registered in other degree programs at UNB. Enrolment is limited and application to the program is required. The Minor consists of 5 courses (24ch) as listed below and a minimum grade of C is required for all courses. Students are advised that in order to complete the minor they may need to take more than the usual number of credit hours required by their degree program. Students should check with their faculty advisor and the Renaissance College, College Coordinator.

Leadership Studies Minor Required Courses

RCLP 1001 Leadership Foundation 3ch
RCLP 1011 Worldviews, Religions and Cultures 3ch
RCLP 1021 Concepts of Enhancing Personal Well-being 3ch
RCLP 1062 Citizenship and Community 3ch
SECTION G: FREDERICTON ACADEMIC PROGRAMS
RCLP 2001 Practicing Leadership in Community Projects 3ch
RCLP 3002 Practicing Leadership in Cross-Cultural Contexts 3ch
RCLP 3030 Integrated Learning Portfolio 3ch
RCLP 4002 Leadership for Social Innovation 3ch

Normally RCLP 1001 is taken in the first year of study. RCLP 1001 is a prerequisites or co-requisites for RCLP 2001.

Certificate in Leadership Studies
The Certificate in Leadership Studies requires the following 5 courses of the minor (RCLP 1001, RCLP 1011, RCLP 1062, RCLP 2001, RCLP 3030) totaling 15 credit hours. A minimum grade of C is required in all courses. The Certificate is open to students registered at UNB and students are advised that in order to complete the certificate they may need to take more than the usual number of credit hours required by their degree program. Students should check with their faculty advisor as well as the Renaissance College, College Coordinator.

General Information

The Faculty of Kinesiology offers two undergraduate degree programs: Bachelor of Recreation and Sport Studies (BRSS) and Bachelor of Science in Kinesiology (BScKin). The four year BRSS program provides a solid foundation in theories and applications in the social-psychological aspects of recreation, sport, physical activity and leisure. Students may select one of four options in the BRSS degree program: Management, Recreation, Preparation, Wellness or BRSS with Minor. Students in the program develop competency in communication, critical thinking, problem solving, professional conduct and numeracy, as well as, comprehensive and applicable knowledge of recreation, sport, physical activity, leisure and healthy living. The curriculum is designed to prepare students for a variety of vocational careers and/or further study at the graduate level.

The BRSS and the BScKin degree programs will prepare students interested in becoming elementary or secondary physical education teachers and coaches in school systems. Students who are interested in the Arts and Humanities as a teachable subject, should select the BRSS degree program, while students who are interested in the Sciences as a teachable subject, should select the BScKin degree program.

High School applicants or first-year students interested in the BEd program at UNB should refer to the Faculty of Education Admission Advantage program in either the Admissions section of this calendar (Item J) or the Bachelor of Education section under Fredericton Degree Programs.

University Regulations

Any point not covered in the following regulations will be governed by the General University Regulations as stated in this Calendar. Questions concerning the application of regulations should be directed to the Registrar in writing.

Conditions Regarding Admission to the BRSS Program

All admissions are on a competitive basis; satisfaction of minimum requirements does not guarantee admission. Normally, no more than 100 students will be admitted to first year in the Faculty of Kinesiology in any academic year.

Transfer Students

1. Normally, a minimum session grade point average of 3.0 is required for a student to be considered for transfer into one of the Faculty’s programs.
2. Normally, a student will not be allowed to transfer into the Faculty mid-way through the academic year.
3. In addition to scholastic record, a transfer applicant’s record of participation and interest in the “Kinesiology”, “Recreation”, and “Sport Science” field is also considered for admission.
4. Students presently registered in the Faculty will continue to be governed by the regulations in effect when they first registered. Students who were formerly in the Faculty and apply for re-admission, if accepted, will be governed by the regulations in effect at the time of their re-admission.

Time Limitation

The maximum time period permitted between the first registration in the BRSS degree program and the completion of the BRSS degree shall normally be eight (8) years. Normally, BRSS students who are re-admitted within this time frame must complete the degree requirements in effect at the last re-admission.

BRSS as a Second Degree

In addition to the University’s regulations for a second undergraduate bachelor's degree as specified in the UNB Undergraduate Calendar, the Faculty of Kinesiology requires that any student accepted into the BRSS degree program as a second undergraduate bachelor's degree be required to: (a) Complete at least (30) credit hours of courses, and (b) Complete the requirements of the selected program within the BRSS degree.

General Regulations

Grade Point Averages

1. The method of calculating grade point averages is explained in the Calculation of Grade Point Averages, section H, of this Calendar.
2. To earn a BRSS degree, a student must have successfully completed 120 ch of approved courses in the BRSS with Minor and Management options, 121 ch in Wellness or 122 ch in the Education Preparation option.
3. Students should refer to the Standing and Promotion Requirements, section I, Calendar for regulations regarding academic probation and withdrawal.

Policy on Grades

BRSS students must obtain a grade of "C" or better in required degree program courses. These courses include:

- all first year required courses
- all required core courses

NOTE: KIN 1001 is considered to be Prerequisite to all other KIN and RSS courses.

Repeating Courses

1. Regulations pertaining to repeating courses can be found in the Repeating Courses Section of this Calendar.
2. Any required courses not successfully completed during a given year must be attempted no later than the next academic year, except by special permission of their academic advisor.

Summer Term Courses

BRSS students who wish to take Summer Term courses that are to be credited towards their degree should first consult with their Academic Advisor.

Practicum and Directed Studies

1. Normally, students may elect a maximum of six (6) ch from practicum courses, i.e. RSS 3911 (1), RSS 3912 (2), RSS 3913 (3), RSS 3914 (3), RSS 4910 (6).
SECTION G: FREDERICTON ACADEMIC PROGRAMS

2. Normally, students may elect a maximum of six (6) ch from directed study courses, i.e., RSS 4093 (3), RSS 4094 (3), RSS 4890 (6).

Approval of Elective Courses

Advice concerning elective courses will be provided by members of the Faculty. All elective courses require approval of the Faculty.

Normal Workload

The maximum student workload is considered to be 20 ch per term, or 40 ch per year (not including Summer Term). Permission from their academic advisor is required to exceed 20 ch per term or 40 ch in any given academic year.

BRSS Year Designation Based on Credit Hours

For the purposes of on-line registration and administrative operations, BRSS students shall be considered as in:

1. Second year after the student has successfully completed 30 ch toward their BRSS.
2. Third year after the student has successfully completed 60 ch toward their BRSS.
3. Fourth year after the student has successfully completed 90 ch toward their BRSS.

Curriculum

General NOTES

1. It is the students' responsibility to complete the degree program curriculum for the year in which they enroll.
2. All students take a common core listed in section A AND MUST choose from one of four options: Management, Education Preparation, Wellness or BRSS with Minor as outlined in sections B through E, respectively.
3. The minimum credit hour total to graduate is 120 ch for Management and BRSS with Minor options, 121 ch for Wellness option; and 122 ch for Education Preparation option.
4. Students must complete at least 48 ch of 3000, 4000 level courses in order to graduate (42 ch min. in Education Preparation Option).

A. CORE PROGRAM (total 51ch for Management and BRSS with Minor, 52ch for Education Preparation and Wellness)

Students in the BRSS degree program are required to attend a two-day conference (or equivalent) sponsored by a recognized professional or academic organization prior to enrolling in RSS 4092, Senior Integrative Conference and graduation. Written approval of the conference must be obtained through the Faculty prior to attendance. A written post-conference reflection report and session moderator attendance sheet must be submitted.

KIN 1001 Introduction to Kinesiology 3 ch
1 of 1st year Psychology/Sociology/Philosophy 3 ch
**1st year Science 3 ch

E. BRSS WITH MINOR OPTION (total 69 ch)

*Approved Minor
NON RSS/KIN Courses 24 ch
RSS/KIN Electives 33 ch
Either RSS/KIN Electives or NON RSS/KIN Electives 12 ch
*The Minor must be approved by the awarding Faculty.

Honours Program: BRSS

1. The Honours program provides students with the opportunity to undertake academic research and be recognized as one of the Faculty's top students. Upon successful completion of the program, "Honours" is printed on the student's official academic transcript. See academic advisor for application procedures.
2. Application requirements include: minimum CGPA of 3.7, must be in one’s final year of study, must identify a faculty member willing to serve as one’s Honours Research Project supervisor.
3. Once accepted into the program, students must: outline the required deliverables and expectations of the Honours project which will be approved by the Honours supervisor before being submitted to the Assistant Dean of the Undergraduate Program no later than Oct 15th. This outline (one or two pages) briefly describes: i) the nature of the study being conducted, ii) timelines, iii) deliverables and expectations. This outline serves as a course contract between the student and the supervisor.
4. To graduate with a BRSS Honours, students must meet the following requirements: maintain a minimum CGPA of 3.5 throughout one’s undergraduate degree; successfully complete RSS 4900: Honours Research Project.

Minor in Recreation and Sports Studies

The Minor in Recreation and Sports Studies is designed for students from outside the Faculty of Kinesiology interested in a coherent package of Recreation and Sports Studies courses. Students interested in the minor, must apply through the Undergraduate Degree Program Office, Faculty of Kinesiology. Enrolment is limited.

The Minor will consist of 24 credit hours of approved Recreation and Sports Studies courses. Students enrolled in the Minor will be required to take 12ch of introductory courses and 12ch of 3000 & 4000 level courses chosen...
in consultation, and in advance, with the Faculty of Kinesiology. A grade of C or better is required in each course used towards the Minor.

**Science Student Services:**

**General Information**

The first year curriculum is common to all students entering the Faculty. Commencing in second year students must select one of the available options. Some options lead to specialization in a single subject area, while interdepartmental options involve specialization in two subject areas. Majors and Honours programs are available in these options. Pass degree programs are also available in Physics and Earth Sciences. In addition, co-operative programs are available that enable students to combine academic studies with work terms in university, industry or government laboratories. The General Science Degree option offers a broader exposure to more sciences and the program can be customized to meet the interest and academic development of the students. Honours is not available in General Science but students achieving a high academic performance are awarded Distinction upon graduation.

At the time of registration all students entering the Faculty of Science will be advised by members of the Faculty regarding selection of courses to meet the program requirements. It should be noted that as students register for the second, third and fourth years, approval of the courses and programs should be obtained from the program advisors for the Departments concerned or from the Dean’s office when they are not available. Students are strongly recommended to read the University-wide Regulations, Section III of this Calendar, and in particular the subsection headed Grading and Classification. Any point not covered in the following regulations will be governed by the General University Regulations.

**General Regulations**

Students should note that in the Faculty of Science the minimum acceptable grade in a course which is required by a particular program or is used to meet a prerequisite, is a “C”. Any student who fails to attain a “C” or better in such a course must repeat the course (at the next regular session) until a grade of “C” or better is attained. Students will not be eligible for graduation until such deficiencies are removed. The only exception will be granted for a single course with a “D” grade that is a normal part of the final year of that program, and is being taken for the first time in the final year. Valid WHMIS (Workplace Hazardous Materials Information System) certification is required for all students who wish to take Chemistry laboratory courses. Information regarding WHMIS training will be provided during the first week of classes.

**Major, Honours and Minor Programs**

Major and Honours programs are offered for specialization and enriched training, respectively, in various subject areas. Upon the successful completion of the First Year, Science students will declare their Majors in one of the Science options or one of the Interdepartmental programs. Students must consult their respective program advisors to develop their programs and obtain pre-approval for the selection of courses. Such course requirements and choices are listed under each of the options and Interdepartmental programs in the subsequent sections. A minimum CGPA of 3.0 is required for admission to and retention in an Honours program in Science. For individuals who wish to enrol in Honours programs, they must contact the corresponding department Chairs or their delegates to learn about the application procedures and requirements that are discipline specific. In order to graduate with Honours recognition, the graduate must maintain a minimum CGPA of 3.0. Additional discipline specific requirements must also be met. A student who has completed the courses of an Honours program but did not achieve the minimum CGPA requirement will be awarded a Major degree. An Honours graduate with a CGPA of 3.7 and above will be awarded First Class Honours provided that the discipline specific requirements are also met.

**Minor Programs**

Minor programs are offered to broaden a student's educational background and complement a Major or Honours program. Science Minors are offered in the disciplines of Biology, Chemistry, Economics, Earth Sciences, Physics, Psychology, Mathematics and Statistics. The Minors follow the University guidelines outlined in Section V in the University-wide Academic Regulations of the Calendar and consist of a sequential and coherent grouping of courses totalling at least 24 credit hours (with a grade of C or better) as approved by the department offering the Minor. Courses that are required in the student’s degree program may not normally be counted toward the Minor.

**Co-operative Education Program**

The UNB Faculty of Science seeks to provide opportunities for students and employers to develop relationships that enhance the learning experience for students and present employers with skilled, motivated employees looking to make a career connection. To achieve this, the Faculty, through its constituent departments/programs, operates a Co-operative education program based on established partnerships with selected employers.

The Co-op team, reporting to the Dean of Science, liaises with the academic advisor in each department/program to ensure alignment between students’ academic and professional experience objectives. Additional oversight is provided by the Faculty of Science Co-op Committee, which functions like a board of directors, and, as such, influences the Co-op program’s strategies and policies. The effectiveness of the Co-op program in delivering the planned professional internship experience is closely monitored and assessed by the Co-op coordinators through interactions with the students, company personnel, and the University.

Co-operative education is available within all Science Programs including BAS and BA/BSc. Work terms may be 4, 8, 12 or 16 months in duration and are generally interspersed with academic study terms. Prior to applying for Co-op jobs, students will be oriented to the process and will be assisted in preparing resumes and for job interviews.

**Co-op Program Eligibility**

1. Students must be registered as full-time students in an undergraduate science, BAS or BA/BSc degree program at UNB. Students on Co-op work terms retain their full-time status.
2. Students must have completed at least 32 ch of study in science prior to their first Co-op work term.
3. Approval to participate in the Co-op program must be received from the Co-op Office and from the student’s department/program.
4. All students participating in the Co-op program must be in good academic standing.
   a. Students must have an Assessment GPA of at least 2.7.

**Co-op Work Term Requirements**

1. Students completing the first year of science studies will be limited to an initial summer work term of 4 months.
2. Students completing their second year of full-time science studies will be limited to work terms of 4 or 8 months.
3. Students completing their third year of full-time science studies are eligible for extended work terms of 4 - 16 months.
4. A fee is charged for each 4-month portion of a work term.
5. The final term in the student’s degree program must be a full-time science study term at UNB.
6. When combined the total of all work terms cannot exceed 24 months.
7. Students must register for the appropriate Work Term Report Course. The student’s evaluation by the employer will be taken into consideration but the final assessment on whether or not a work term has been successful will be the responsibility of the Faculty of Science.
8. A Co-op designation is awarded upon graduation to those students who have successfully completed work terms that total at least 12 months.

**Planning and Scheduling**

1. Work terms usually commence at the beginning of January, May, and September.
SECTION G: FREDERICTON ACADEMIC PROGRAMS

2. A schedule of work and study terms is developed by each student in consultation with the Director of Undergraduate Studies or designate for the student’s specific science program.

More information can be obtained from the Co-op Office.

First Year Curriculum

The normal requirement for first year science (which must be completed before graduation) is MATH 1003, MATH 1013 (6 ch), 18 ch of First Year lectures in three of the four subject areas of Biology, Chemistry, Earth Sciences and Physics, plus 8 ch of laboratories to accompany lectures in two of the subject areas and SCI 1001. In addition, there are two term courses of electives that may be taken which can be chosen from courses offered by various faculties (6 ch total) or they can be two terms of science laboratories (4 ch) to accompany the third science subject chosen. The total course load will be 36 to 38 ch depending on the above selections. The particular first year science lecture and lab courses should be chosen to fit into the student’s future degree program.

The First Year core science lecture and laboratory courses, respectively, are:

- BIOL 1001, BIOL 1012 and BIOL 1006, BIOL 1017
- CHEM 1001, CHEM 1012 and CHEM 1066, CHEM 1017
- ESCI 1001, ESCI 1012 and ESCI 1006, ESCI 1017
- MATH 1013 or MATH 1051 and MATH 1013 or MATH 1063
- PHYS 1061 or PHYS 1071, PHYS 1062 or PHYS 1072 and PHYS 1091, PHYS 1092

*Any exceptions allowed in a particular program will be noted in the program requirements. Courses such as CHEM 1982, CHEM 1987 and unassigned first level transfer credits in science disciplines could be used in some circumstances.

First Year Science Entrance Program

1. High School students who do not meet the admission requirements noted in the Admission Chart for direct entry to the BSc program but have a passing grade in each of the required courses, a minimum senior science average of 70% and an admission average of 70% may be considered for full time admission to an Entrance Program to the extent that capacity allows.

2. Students enrolled in the BSc Entrance Program are restricted to a maximum of 30 ch in the first year of studies. This is a prescribed set of courses as determined by the Faculty including SCI 1001, SCI 1002, MATH 1003, MATH 1013, 10 ch of a first-year Science subject and 10 ch of a second first-year Science subject as determined in consultation with a Faculty Advisor.

3. Students are required to meet with their Faculty Advisor on a regular basis.

4. Students who successfully complete their first year with a minimum GPA of 2.0, regardless of the total number of credit hours completed, receive credit for MATH 1001 and SCI 1002 and meet other conditions as outlined by the Faculty, will be approved for admission to the BSc program for the upcoming academic year.

5. Students who do not succeed in completing the program requirements will be permitted to continue in the BSc Entrance program or enter the BSc degree program.

6. Students can only register in the BSc Entrance program once.

Course Recognitions from other institutions

UNB recognizes a number of field courses offered at the Huntsman Marine Science Centre, and other similar institutions, which may be used toward meeting part of the degree requirements for UNB students as subjected to the approval by the respective Departments or Divisions.

Students should note that at least half the advanced-level courses counted towards Major/Honours/Minor in a Science subject must be from courses taken at the University of New Brunswick.

Advanced Placement Tests

Advanced Placement Tests in selected first year Science courses will be available to students achieving a grade of 90% in the appropriate Level 1 high school course or 95% in the appropriate Level 2 high school course. Advanced placement in Math requires a high school Calculus course beyond NB Math 120 with a minimum grade of 90%. The Department of Mathematics also offers a “Calculus Challenge Exam” to NB students at a school that has made arrangements with the Department of Mathematics and Statistics. The Challenge Exam is written in June. Consult the mathematics section of the calendar for more information.

The grade obtained on an advanced placement test will not be included in a student’s GPA calculation. It will be equivalent to a transfer credit. A fee will be charged for each placement test.

Criteria for Granting B.Sc. (General Science) degrees to former UNB Science Students who are graduates from Professional Degree Programs

A student who has completed a minimum of 78 ch of science core courses, including those at the 1000 level, with the University of New Brunswick will be granted the BSc degree in General Science upon successful completion of a science-based health professional degree. The Faculty has determined that these requirements can be satisfied by students who have successfully completed Medicine, Dentistry, Veterinary Medicine, Pharmacy, or Optometry.

Students wishing to be considered for a BSc (Gen.Sci) degree who satisfy the above conditions must apply in writing, complete official transcripts, to the Registrar. Students in professional programs not specifically listed above who are interested in being considered for the BSc (Gen.Sci.) degree, should contact the Office of the Dean of Science. Such students are expected to provide a detailed description of courses in their programs as well as further information requested by the Faculty.

Regulations for Granting a Second UNB Bachelor of Science Degree

A student who holds a BSc degree from UNB may obtain, following further studies, a second specialization. See the regulations below. BSc degree holders from another university may apply for admission to and follow a program towards a second BSc degree. Further details can be found in the general regulations in Section VII in the University-wide Academic Regulations of this Calendar.

BSc graduates of UNB may apply for admission to and follow a program towards a second BSc undergraduate bachelor’s degree under the following regulations:

- The general regulations of the University and the regulations of the degree program concerned must be satisfied.
- Degree and departmental regulations concerning option, concentration, Major or Honours must be satisfied.
- Normally, the minimum number of credit hours which must be successfully completed beyond the work required for the previous degree would not be less than the normal load of the final academic year in the degree program concerned. More than the minimum number of credit hours, or courses, may be required.
- The courses taken must be approved by the Dean and the Department, or Departments, under which the option, concentration, Major or Honours, falls.
- The general regulation that at least half the total credit hours for a degree must be taken at this University will apply.
- Candidates for a second undergraduate degree may not choose a Major, or option, or Honours, or concentration using the same Departmental discipline as in the first undergraduate degree, whether the discipline was part of a single or an interdepartmental program. (For example, a student with a BSc in Biology-Chemistry may not return and obtain a BSc in Chemistry. A student with a BSc in Earth Sciences may not return and obtain second BSc degree in Environmental Geochemistry.)
- Students with a UNB BSc degree are not eligible to obtain a second degree under the special provisions for granting a BSc (General Science) after a professional school.
- Students may be permitted to upgrade a Minor or a Major from the first degree under the following Conditions:
  - A Minor from the first degree may be upgraded to a Major or Honours after completion of the first degree.
  - A Major from the first degree may be upgraded to an Honours after completion of the first degree.
  - In either case, a notation only will be included on the student record and a second degree will not be awarded.
- Students will not be permitted to include a Minor in the second degree.
- Students must make specific application to the Associate Registrar/Admissions for entry to the second degree program.
- Only in special circumstances will students be admitted to a third undergraduate degree program.

The final decision on the course work requirements for a second undergraduate bachelor’s degree shall be a matter of agreement between the Registrar and the Dean after consultation with the Chairs of Departments concerned.

- van den Heuvel, Michael R., BSc, PhD (Wat.), Adjunct Prof - 2016

General Information

**Biology Goal**

The educational goal of the Department of Biology at UNB is to foster a fascination with and an ability to learn about progress in the biological sciences, and appreciate the importance of these fields to society. This is achieved through teaching within the department that emphasizes the questions of contemporary biology, and how they are asked. Our graduates understand that the sub-disciplines of 21st century biology are interrelated, ask questions at a spatial and temporal scales, with a broad taxonomic scope, and that these dynamic disciplines have a strong quantitative foundation.

Our aim is to provide students with a foundation upon which they can build in future professional or postgraduate training, and as scientifically literate citizens of our society.

**Programs in Biology**

The Department of Biology offers the following programs: Honours (by Thesis or by Course), Major and Minor.

Either of the Honours programs provides students with the preparation required for graduate work in Biology or admission to many professional schools.*

The Major program is designed to provide concentrated study in Biology while maximizing a student's access to the offerings of other Departments and Faculties. It will therefore be of use to students with interdisciplinary educational and career objectives. With care, students should be able to use this to satisfy Prerequisites to many professional schools.*

Both the Honours and the Major programs have Pre-Health Profession (PHP) Concentrations designed to help students prepare for health-professional schools. The program requirements for these concentrations are the same as for the regular Honours and Major programs, but additional courses are recommended as electives. Students interested in the PHP Concentration must discuss their intentions with their Biology advisor early in their program to ensure appropriate time-matching of these electives.*

The Minor program is structured to meet the individual needs of the student and will complement his/her major program.

Admission to these programs is by application to the Chair of Biology or Director of Undergraduate Studies. Minimum cumulative grade point average (CGPA) requirements and Prerequisites may be required for admission.

An advisor, assigned to each successful applicant, must approve course selections according to the guidelines given below.

Students are reminded that courses offered by other Departments form an important complementary part of the overall program of studies. A minimum of 12 ch of electives selected from the course offerings of the Faculty of Arts are required in the Honours and Major programs.

NOTE:* In addition to their Biology advisor, pre-professional students must consult the Assistant Dean of Science for information about Prerequisites and advice on program planning.

**Program Requirements**

**Major Program (132 ch total)**

**Level I**

1. BIOL 1001, BIOL 1006, BIOL 1012, BIOL 1017, CHEM 1001, CHEM 1008, CHEM 1017, MATH 1003 or MATH 1053 and one of MATH 1013, MATH 1063 or STAT 2264.

2. 2 more term courses of first year science lectures (Physics or Earth Sciences).

**Level II**

1. BIOL 2003, BIOL 2008, BIOL 2013, BIOL 2018, BIOL 2023, BIOL 2028, BIOL 2063, BIOL 2068, CHEM 2401 (3 ch) and STAT 2264 (3 ch) (* See NOTE 2)

**Levels III and IV**

Upper level (Level III or IV) Biology courses totalling a minimum of 34 ch, including a minimum of 10 ch of laboratory or field courses (denoted by the course designation "L" in the course description). Courses considered toward the laboratory and field experience requirement include BIOL 3058, BIOL 3103, BIOL 3102, BIOL 3113, BIOL 3173, BIOL 3207, BIOL 3293, BIOL 3301, BIOL 3371, BIOL 3383, BIOL 3441, BIOL 3541, BIOL 3593, BIOL 3603, BIOL 3703, BIOL 3883, BIOL 3908, BIOL 3933, BIOL 3943, BIOL 4182, BIOL 4211, BIOL 4221, BIOL 4368, BIOL 4393, BIOL 4443, BIOL 4725, BIOL 4892, BIOL 4893, BIOL 4981, BIOL 4982, BIOL 4981, BIOL 4723, BIOL 4732, BIOL 4746, BIOL 4851, BIOL 4863, BIOL 4981, and BIOL 4991 (but do not include BIOL 3149, BIOL 4149, or BIOL 4909).

**Electives**

1. 12 ch of Arts courses.

2. 24 ch of other courses (in almost any field including Biology) * (see NOTE 4).

**NOTES:**

1. A C grade or better is required in all courses for Biology degree programs. Students in all Biology programs will not be allowed to take any third or fourth level Biology courses, until they have passed (C minimum) all first level requirements for Biology programs.

2. If STAT 2264 is counted as a first year requirement, then an extra 3 ch of Level III/IV courses must be taken.

**SECTION G: FREDERICTON ACADEMIC PROGRAMS**
SECTION G: FREDERICTON ACADEMIC PROGRAMS
3.
4.

Students are urged to register early (by the end of classes, Winter
term) for courses they plan to take in the next academic year that are
required for their program and that have limited enrollment.
Some courses offered in other Faculties will not be considered for
credit toward a BSc; so, students should see their advisor for course
approval.

1006, BIOL 1012 and BIOL 1017 as part of their Biology Minor. Also, see
NOTE 2 below.
*Additional NOTES:

1.

Honours Program (144 ch total):

There are two honours programs: Honours by Course and Honours by
Thesis. Students must have (and maintain) a minimum CGPA of 3.0 to be
accepted in and remain in either program.
Application to the Honours by Thesis program is initiated by writing a letter
of intent to the Chair of Biology before preregistration at the end of year 3.
Students must make arrangements to complete their dissertation research
with a Faculty member in the Department of Biology before applying to the
Program. BIOL 4090 (Honours Thesis Project) is required and the course
description should be consulted for further information and specific
procedures. As well, a general research skills course, either BIOL 3933,
BIOL 3943, BIOL 4463 or BIOL 5473, is required (note that a student can
do more than one of the general research skills courses).

2.

Some upper level courses (3000 and 4000 level) have limited
enrollment. Students should register in the Winter term for these
courses, since assignments will be made in May following preregistration. Priority for admission is as follows: Year IV Honours,
Year IV Majors, Year III Honours, Year III Majors. Within each
category, students will be selected based on CGPA (and at the
discretion of the instructor). If space permits, students in a Minor
program may also enroll in these courses.
Some Biology courses are designed for non-Science students.
Students enrolled in Biology programs may take these courses, but
they can only be considered as electives for the purposes of the
Biology programs. Permission of the instructor may be required. Such
courses include: BIOL 1711, BIOL 1719, BIOL 1782, BIOL 1789,
BIOL 1846, BIOL 2251, BIOL 2259, BIOL 2501, BIOL 2509, BIOL
2513, BIOL 2519, BIOL 2721, BIOL 2761, BIOL 2769, BIOL 2792,
BIOL 2812, and BIOL 2819.

Level I

Co-operative Work Experience in Biology

1.

The Faculty of Science seeks to provide opportunities for students and
employers to develop relationships that enhance the learning experience
for students and present employers with skilled, motivated employees
looking to make a career connection. To achieve this, the Faculty, through
the Department of Biology and other Science departments and programs,
operates a Co-operative Education Program. Co-op opportunities are
available for qualified students; please refer to the Science section of this
calendar for detailed information.

2.

BIOL 1001, BIOL 1006, BIOL 1012, BIOL 1017; CHEM 1001, CHEM
1006, CHEM 1012, CHEM 1017; MATH 1003 or MATH 1053 and one
of MATH 1013, MATH 1063 or STAT 2264.
2 more term courses of first year science lectures (Physics or Earth
Sciences).

Level II

BIOL 2003, BIOL 2008, BIOL 2013, BIOL 2018, BIOL 2023, BIOL 2028,
BIOL 2063, BIOL 2068; CHEM 2401 (3 ch) and STAT 2264 (3 ch)* (see
NOTE 2).
Levels III and IV

Upper level (Level III or IV) Biology courses totalling a minimum of 46 ch,
including a minimum of 10 ch of laboratory or field courses (denoted by the
course designation “L” in the course description). Courses considered
toward the laboratory and field experience requirement include BIOL 3058,
BIOL 3083, BIOL 3102, BIOL 3113, BIOL 3173, BIOL 3207, BIOL 3293,
BIOL 3301, BIOL BIOL 3383, BIOL 3441, BIOL 3541, BIOL 3593, BIOL
3603, BIOL 3703, BIOL 3883, BIOL 3908, BIOL 3933, BIOL 3943, BIOL
4182, BIOL 4211, BIOL 4221, BIOL 4368, BIOL 4393, BIOL 4443, BIOL
4523, BIOL 4533, BIOL 4581, BIOL 4641, BIOL 4688, BIOL 4691, BIOL
4723, BIOL 4732, BIOL 4746, BIOL 4851, BIOL 4863, BIOL 4981, and BIOL
4991 (but do not include BIOL 3149, BIOL 4149, or 4090). As well, a
general research skills course, either BIOL 3493, BIOL 3933, BIOL 4463 or
BIOL 5473, is required (note that a student can do more than one of the
general research skills courses). For the Honours by Thesis, the minimum
of 46 ch also includes BIOL 4090 and one of the general research skills
courses (BIOL 3933, BIOL 3943, BIOL 4463 or BIOL 5473).
Electives

1.
2.

12 ch of Arts courses.
24 ch of other courses (in almost any field, including Biology)* (see
NOTE 4).

NOTES:(*)

1.

2.
3.
4.
5.

A C grade or better is required in all courses for Biology degree
programs. Students in all Biology programs will not be allowed to take
any third or fourth level Biology courses, until they have passed (C
minimum) all first year requirements for Biology programs.
If STAT 2264 is counted as a first year requirement, then an extra 3
ch of Level III/IV courses must be taken.
Students are urged to register early (by the end of classes, Winter
term) for courses they plan to take in the next academic year that are
required for their program and that have limited enrollment.
Some courses offered in other Faculties will not be considered for
credit toward a BSc; so, students should see their advisor for course
approval.
The Honours student (by course or by thesis) must achieve a
minimum final CGPA of 3.7 to obtain First Class Honours standing
upon graduation. A student completing all course requirements for
Honours but with a CGPA below 3.0 will be given a Majors degree.

Minor Program:

The Minor in Biology is designed for students in other Departments of the
Faculty of Science, and outside the Faculty of Science, who are interested
in a coherent package of Biology courses. The Minor follows section V in
the “University Wide Academic Regulations” of the Undergraduate
Academic Calendar and consists of BIOL courses, totalling at least 24
credit hours with a grade of C or better, approved by the Biology Director of
Undergraduate Studies. The Level II BIOL courses and the Concentrations
can be used as guidelines. Students requiring BIOL 1001, BIOL 1006, BIOL
1012 and BIOL 1017, or other BIOL courses for their Major are not eligible
to also count these courses towards a Biology Minor. Students not requiring
Biology courses for their Major must take, and can count, BIOL 1001, BIOL

300

Concentrations

Upper level Honours and Major students in Biology can choose from many
Biology courses (see requirements for Levels III and IV, above).
Concentrations are optional and designed to guide students who want more
focused education in a specific area, and can be indicated on the final
transcript at graduation if a student successfully completes a minimum of
24 ch from the Concentration. The majority of these 24 ch should come
from the “Recommended courses” list, and the remaining ch from the
“Other Relevant courses” list. Note that BIOL 3933, BIOL 3943 and BIOL
5473 can count towards any of the Concentrations. Selection must be
approved by an academic advisor and the student must then indicate their
concentration on their application to graduate.
Aquatic Biology Concentrations

Recommended
courses:

BIOL 3383, BIOL 3883, BIOL 4741, BIOL 4746 or
BIOL 4981, BIOL 4773, BIOL 4863, BIOL 4973,
BIOL 4991, BIOL 6183.

Other Relevant
courses:

BIOL 3603, BIOL 3802,BIOL 3802, BIOL 3908,
BIOL 4393, BIOL 4443; ENR 2531, ENR 3201; also
see Marine Biology Concentration; FOR 3457, FOR
4576.

Biological Diversity Concentration

Recommended
courses:

BIOL 1846, BIOL 3083, BIOL 3207,
BIOL 3301, BIOL 3371 or ESCI 3271,
BIOL 3603, BIOL 3673, BIOL 3703,
BIOL 4221, BIOL 4233, BIOL 4351,
BIOL 4523, BIOL 4581, BIOL 4723,
BIOL 4741, BIOL 4746 or BIOL 4981.

BIOL
BIOL
BIOL
BIOL
BIOL

3261,
3493,
3883,
4443,
4732,

Other Relevant
courses:

BIOL 3162, BIOL 3383, BIOL 3633, BIOL 3802
BIOL 4043, BIOL 4368, BIOL 4533, BIOL 4691,
BIOL 4823.

Cell and Molecular Biology Concentration

Recommended
courses:

BIOL 3013, BIOL 3031, BIOL 3043, BIOL 3058,
BIOL 3073, BIOL 3207, BIOL 3261, BIOL 4043,
BIOL 4302, BIOL 4533, BIOL 4581; CHEM 2421,
CHEM 2422.

Other relevant
courses:

BIOL 3102, BIOL 3133, BIOL 3162, BIOL 3242,
BIOL 3311, BIOL 3493, BIOL 3593, BIOL 3673,
BIOL 3812, BIOL 4123, BIOL 4182, BIOL 4272.

Environmental Biology Concentration

Studies interested in environmental biology should take ESCI 1001,
ESCI 1006, and ESCI 1012.
Recommended
courses:

BIOL 4863; BIOL 3261 and BIOL 3207 or BIOL
3802 and BIOL 3908; BIOL 3441, BIOL 3633, BIOL
4191, BIOL 4233, BIOL 4351, BIOL 4773; CHEM


Other relevant courses:
BIOL 1846, BIOL 3083, BIOL 3173, BIOL 3293, BIOL 3301, BIOL 3383, BIOL 3603, BIOL 3703, BIOL 3883, BIOL 4302, BIOL 4588, BIOL 4423, BIOL 4443, BIOL 4563, BIOL 4723, BIOL 4732, BIOL 4741, BIOL 4746, ENVIS 4001, ENVIS 4002; ESCI 3271, ESCI 3442, ESCI 4452, FOR 4545, FOR 4721; PHIL 3206; see also Marine Biology Concentration.

Evolutionary Biology Concentration
Recommended courses:
BIOL 3013, BIOL 3113, BIOL 3242, BIOL 3293, BIOL 4123, BIOL 4523, BIOL 4533, BIOL 4563.

Other relevant courses:
BIOL 3083, BIOL 3301, BIOL 3423, BIOL 3603, BIOL 3703, BIOL 3873, BIOL 3883, BIOL 4221, BIOL 4581, BIOL 4723, BIOL 4732, BIOL 4741, BIOL 4823.

General Zoology Concentration
Recommended courses:
BIOL 3603, BIOL 3703, BIOL 3802, BIOL 3908.

Suggested field courses:
BIOL 3162, BIOL 3593, BIOL 3673, BIOL 3812, BIOL 3873, BIOL 3883, BIOL 4182, BIOL 4523, BIOL 4691, BIOL 4723, BIOL 4732, BIOL 4741, BIOL 4746 or BIOL 4981.

Other relevant courses:
BIOL 3013, BIOL 3031, BIOL 3043, BIOL 3058, BIOL 3073, BIOL 3162, BIOL 3311, BIOL 3493, BIOL 3593, BIOL 3673, BIOL 3802, BIOL 3812, BIOL 3833, BIOL 3908, BIOL 4043, BIOL 4123, BIOL 4182, BIOL 4953; PHIL 1201, PHIL 3203; PHYS 1091, PHYS 1092.

Pre-Health Profession Concentration
Recommended courses:
BIOL 1711 or BIOL 1719, BIOL 2761 or BIOL 2769, BIOL 2792 or BIOL 1789, BIOL 2812 or BIOL 2819, BIOL 3207, BIOL 3261, BIOL 3593, BIOL 3833.

Other relevant courses:
BIOL 3013, BIOL 3031, BIOL 3043, BIOL 3058, BIOL 3073, BIOL 3162, BIOL 3311, BIOL 3493, BIOL 3593, BIOL 3673, BIOL 3802, BIOL 3812, BIOL 3833, BIOL 3908, BIOL 4043, BIOL 4123, BIOL 4182, BIOL 4953; PHIL 1201, PHIL 3203; PHYS 1091, PHYS 1092.

Marine Biology Concentration
Students should complete the Level II requirements prior to entering this concentration. The Marine Block Semester offers four of the recommended courses in the Fall term in a block format, where the courses are offered consecutively over the term.

Recommended course:
BIOL 3633.

Marine Block courses (recommended, taken together in the Fall term):
BIOL 4211, BIOL 4221, BIOL 4641, BIOL 4691 or BIOL 4851 or BIOL 4981, BIOL 4991.

Other relevant courses:
BIOL 3173, BIOL 3603, BIOL 3943, BIOL 4233, BIOL 4393, BIOL 4741, BIOL 4746, BIOL 4773, BIOL 4863.

Parasitology Concentration
Recommended courses:
BIOL 3593, BIOL 3603, BIOL 3673, BIOL 3703, BIOL 3802, BIOL 4688, BIOL 4691.

Other relevant courses:
BIOL 3031, BIOL 3043, BIOL 3207, BIOL 3261, BIOL 3311, BIOL 3493, BIOL 3873, BIOL 3883, BIOL 4191, BIOL 4863, BIOL 4991; BIOL 6671/BIOL 6672.

Physiology Concentration
Recommended courses:
BIOL 3031, BIOL 3043, BIOL 3162, BIOL 3207, BIOL 3261, BIOL 3311, BIOL 3493, BIOL 3873, BIOL 3883, BIOL 3908, BIOL 4043, BIOL 4182, BIOL 4823.

Other relevant courses:
BIOL 3083, BIOL 3133, BIOL 3311, BIOL 3603, BIOL 3703, BIOL 3873, BIOL 4688, BIOL 4723, BIOL 4732.

Wildlife, Ecology and Conservation Concentration

Recommended courses:
BIOL 3083, BIOL 3113, BIOL 3293, BIOL 3441, BIOL 3541, BIOL 3603, BIOL 3673, BIOL 3703, BIOL 3873, BIOL 3883, BIOL 4191, BIOL 4233, BIOL 4351, BIOL 4393, BIOL 4423, BIOL 4723, BIOL 4732, BIOL 4741, BIOL 4773, BIOL 4863, BIOL 4973.

Relevant field courses:
BIOL 3173, BIOL 3383, BIOL 4443; also see Marine Biology Concentration.

- Kang, Guojun, BS (Nankai), PhD (McGill), Research Assoc - 1993
- Elbakali-Kassimi, Noureddin, BSc (Rabat), DEA, PhD (Paris), Sr. Teaching Assoc - 2000
- MuGee, David I., BSc, PhD (UNB), Prof and Vice President Research - 1990
- Mattar, Saba M., BSc (Alexandria), MSc (Amer U Of Cairo), PhD (McGill), Prof Emeritus 2015
- Neville, John, BSc (UNB), PhD (UBC), Assoc Prof and Chair - 1999
- Ni, Yonghao, BEng (Northwest Inst of Light Industry), MEng, PhD (McGill), Prof and CRC Chair in Pulping Tech. (Joint Chemical Eng) - 1993
- Passmore, Jack, BSc, Dipl Ed (Bristol), PhD (UBC), DSc (Bristol), FCIC, Prof Emeritus - 2007
- Reeves, Valerie, BSc, PhD (UNB), Sr. Teaching Assoc - 2005
- Tait, James, BSc, PhD (Western), Sr. Teaching Assoc - 2007
- Thakkar, Ajit, BSc, PhD (Queens), FCIC, Prof Emeritus - 2015
- Valenta, Zdenek, Dip. (Zurich), PhD (UNB), Prof Emeritus - 1993
- Villemure, Gilles, BSc, PhD (Ottawa), Prof - 1990

General Information

There are five chemistry degree programs: Major, Medicinal Chemistry Major, Honor, Medicinal Chemistry Honours and Chemistry Co-op. All five programs have national accreditation under the Canadian Society for Chemistry. The Honours and Chemistry Co-op programs are recommended for students pursuing graduate studies and careers in chemistry. The Medicinal Chemistry Honours program is recommended for
SECTION G: FREDERICTON ACADEMIC PROGRAMS

students pursuing graduate studies leading to careers in the health professions or the pharmaceutical industry. There are two options available in the Chemistry Honours and Medicinal Chemistry Honours programs; Honours by Thesis, and Honours by Course. A Minor program is offered for students in other departments of the Faculty of Science and outside the Science Faculty who are interested in a coherent package of chemistry courses.

Valid WHMIS (Workplace Hazardous Materials Information System) certification is required for all students who wish to take CHEM laboratory courses. Information regarding WHMIS training will be provided during the first week of classes.

**Minor Program**

The Minor in Chemistry is designed for students in other Departments of the Faculty of Science, and outside the Faculty of Science, who are interested in pursuing a greater understanding of chemistry. The Minor follows section V in the “University Wide Academic Regulations” of the Undergraduate Academic Calendar and consists of CHEM courses, totalling at least 24 credit hours with a grade of C or better, approved by the Chemistry Director of Undergraduate Studies. Students requiring CHEM 1001, CHEM 1006, CHEM 1012 and CHEM 1017, or other CHEM courses for their Major are not eligible to also count these courses towards a Chemistry Minor. Students not requiring Chemistry courses for their Major must take, and can count, CHEM 1001, CHEM 1006, CHEM 1012, and CHEM 1017, as part of their Chemistry Minor.

**First Year**

CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017, MATH 1003 or MATH 1053, MATH 1013 or MATH 1063, PHYS 1061 and PHYS 1062 or PHYS 1071 and PHYS 1072, BIOL 1001, BIOL 1012, and either BIOL 1006 and BIOL 1017, or PHYS 1091 and PHYS 1092 plus 6 ch electives.

The minimum credit hour requirements beyond first year are:

Major: 64 chemistry, 3 biology, 6 mathematics, 18 electives.

Honours by Thesis: 77 chemistry, 3 biology, 6 mathematics, 18 electives.

Honours by Course: 77 chemistry, 3 biology, 6 mathematics, 18 electives

Chemistry Co-op: Please refer to the Science section of this calendar for detailed information.

**NOTE:** A minimum of twelve (12) ch of the twenty-four (24) ch of electives must be from the Faculty of Arts.

**Chemistry Major Program**

**Second Year**

CHEM 2002, CHEM 2201, CHEM 2222, CHEM 2237, CHEM 2421, CHEM 2422, CHEM 2416, CHEM 2601, MATH 2003, MATH 2213 or equivalent (approved by the Chemistry department), plus electives.

**Third and Fourth Year**

BIOL 2023, CHEM 2121, CHEM 2136, CHEM 3122, CHEM 3637, two of CHEM 4112, CHEM 4222, CHEM 4422, and CHEM 4622, and a minimum of 17 ch from the following lecture courses: CHEM 2321, CHEM 3201, CHEM 3222, CHEM 3421, CHEM 3422, CHEM 3523, CHEM 3621, CHEM 3622, CHEM 4503 (counts as a 3 ch lecture course), CHEM 4513, CHEM 4601, CHE 2501, CHE 5313, CHE 5522, CHEM 5714, CHEM 5824, and a minimum of 21 ch from the following laboratory courses: CHEM 2321, CHEM 3201, CHEM 3222, CHEM 3421, CHEM 3422, CHEM 3523, CHEM 3621, CHEM 3622, CHEM 4503 (counts as a 3 ch laboratory course), CHEM 4513, CHEM 4601, CHE 2501, CHE 5313, CHE 5522, CHEM 5714, CHEM 5824, and a minimum of 14 ch from the following laboratory courses: BIOL 2028, CHEM 2009, CHEM 3009, CHEM 3236, CHEM 3137, CHEM 4503 (counts as a 2 ch laboratory course), CHEM 4416, CHE 2506, plus electives.

**Chemistry Co-op Program**

The UNB Faculty of Science seeks to provide opportunities for students and employers to develop relationships that enhance the learning experience for students and present employers with skilled, motivated employees looking to make a career connection. To achieve this, the Faculty, through the Department of Chemistry and other Science departments and programs, operates a Co-operative education program. Co-op opportunities are available for qualified students, please refer to the Science section of this calendar for detailed information.

**Medicinal Chemistry Program**

**First Year**

CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017, MATH 1003, or MATH 1053, MATH 1013 or MATH 1063, PHYS 1061 and PHYS 1062 or PHYS 1071 and PHYS 1072, BIOL 1001, BIOL 1012, and either BIOL 1006 and BIOL 1017, or PHYS 1091 and PHYS 1092 plus 6 ch electives.

The minimum credit hour requirements beyond first year are:

Medicinal Chemistry Major: 61 chemistry, 12 biology, 6 mathematics, 18 electives.

Medicinal Chemistry Honours by Thesis: 71 chemistry, 12 biology, 6 mathematics, 24 electives.

**Medicinal Chemistry Honours by Course:** 72 chemistry, 12 biology, 6 mathematics, 24 electives.

**Medicinal Chemistry Major Program**

**Second Year**

BIOL 2023, CHEM 2002, CHEM 2201, CHEM 2222, CHEM 2237, CHEM 2421, CHEM 2422, CHEM 2416, CHEM 2601, MATH 2003, MATH 2213 or equivalent (approved by the Chemistry department), plus electives.

**Fourth Year**

BIOL 3043, CHEM 4513, CHEM 4422, CHEM 4503, two of BIOL 2028, CHEM 3137, CHEM 3236, CHEM 4616, one of CHEM 3122, CHEM 3201, CHEM 3222, CHEM 3523, CHEM 4501, CHEM 4601, plus electives.

**Medicinal Chemistry Honours Program**

**Second Year**

BIOL 2023, CHEM 2002, CHEM 2201, CHEM 2222, CHEM 2237, CHEM 2416, CHEM 2421, CHEM 2422, CHEM 2601, MATH 2003, MATH 2213 or equivalent (pre-approved by the Chemistry department), plus electives.

**Third Year**

BIOL 2053, BIOL 2251, CHEM 2121, CHEM 2136, CHEM 3421, CHEM 3422, CHEM 3523, CHEM 3621, CHEM 3637, CHEM 4416, plus electives.

**Fourth Year**

BIOL 3043, CHEM 4513, CHEM 4422, CHEM 4503, two of BIOL 2028, CHEM 3137, CHEM 3236, CHEM 4616, two of CHEM 3122, CHEM 3201, CHEM 3222, CHEM 3522, CHEM 4501, CHEM 4601, plus electives.

**Medicinal Chemistry Honours Program**

**Second Year**

BIOL 2023, CHEM 2002, CHEM 2201, CHEM 2222, CHEM 2237, CHEM 2416, CHEM 2421, CHEM 2422, CHEM 2601, MATH 2003, MATH 2213 or equivalent (pre-approved by the Chemistry department), plus electives.

**Third Year**

BIOL 2053, BIOL 2251, CHEM 2121, CHEM 2136, CHEM 3421, CHEM 3422, CHEM 3523, CHEM 3621, CHEM 3637, CHEM 4416, plus electives (must include 3 ch of an approved science elective).

**Fourth Year Option 1 (Honours by Thesis)**

BIOL 3043, CHEM 4000, CHEM 4422, CHEM 4503, CHEM 4513, one of BIOL 2028, CHEM 3137, CHEM 3236, CHEM 4616, two of CHEM 3122, CHEM 3201, CHEM 3222, CHEM 3522, CHEM 4601 plus electives.

**Fourth Year Option 2 (Honours by Course)**

BIOL 3043, CHEM 4422, CHEM 4503, CHEM 4513, two of BIOL 2028, CHEM 3137, CHEM 3236, CHEM 4616, fourteen credit hours from CHEM 3122, 3201, CHEM 3222, CHEM 3622, CHEM 4601, CHEM 4112, CHEM 4222, CHEM 4622, plus electives.

**EARTH SCIENCES OPTION**

**DEPARTMENT OF EARTH SCIENCES**

**General Office:**

Forestry & Geology Building, Room 112

**Mailing Address:**

Department of Earth Sciences, University of New Brunswick, Box 4400, Fredericton, N.B., Canada, E3B 5A3

**Phone:** (506) 453-4804
industry and engineering and environmental organizations.

teaching and research, and as independent consultants to the mining for oil, metals, and industrial mi

economists find employment in the mineral industry, including exploration and in addressing environmental concerns. Students are urged to consult the relevant provincial body to ensure that they meet the necessary requirements.

**Earth Sciences Programs**

Within the Earth Sciences Option, three programs are offered to students starting their second year in Science: Honours, Major, and Pass. Two required off-schedule field schools for the Major and Honours programs contribute 10ch to the program totals. The Pass program includes 5ch of second year field schools.

1. **Honours Program** (minimum of 149ch): This program is recommended for students intending to pursue graduate studies in the earth sciences, or whose goal is to become a professional geoscientist. This program meets the knowledge requirements for professional registration. The program requires a thesis and a CGPA of 3.0 at the time of entry (start of the student’s final year). Honours students are not formally recognized as such until this time. A written request for admission to this program must be submitted to the Department. The program comprises the same as the honours program except it does not require a thesis. These requirements will be awarded a Major degree.

2. **Major Program** (minimum of 141 ch): This program is designed to meet the knowledge requirements for professional registration. It is the same as the honours program except it does not require a thesis.

3. **Pass Program** (minimum of 137 ch): This program is designed for those students who are looking for some specialization in Earth Sciences and the opportunity of taking more elective courses outside the Department. Minimum course requirements are given below. This program does not meet all of the requirements for professional registration.

**Common Core**

All required and elective science and ESCI courses must be passed with a grade of C or better.

**Academic Programs**

Within the Earth Sciences Option, three programs are offered to students starting their second year in Science: Honours, Major, and Pass. Two required off-schedule field schools for the Major and Honours programs contribute 10ch to the program totals. The Pass program includes 5ch of second year field schools.

1. **Honours Program** (minimum of 149ch): This program is recommended for students intending to pursue graduate studies in the earth sciences, or whose goal is to become a professional geoscientist. This program meets the knowledge requirements for professional registration. The program requires a thesis and a CGPA of 3.0 at the time of entry (start of the student’s final year). Honours students are not formally recognized as such until this time. A written request for admission to this program must be submitted to the Department. The program comprises the same as the honours program except it does not require a thesis. These requirements will be awarded a Major degree.

2. **Major Program** (minimum of 141 ch): This program is designed to meet the knowledge requirements for professional registration. It is the same as the honours program except it does not require a thesis.

3. **Pass Program** (minimum of 137 ch): This program is designed for those students who are looking for some specialization in Earth Sciences and the opportunity of taking more elective courses outside the Department. Minimum course requirements are given below. This program does not meet all of the requirements for professional registration.

**Common Core**

All required and elective science and ESCI courses must be passed with a grade of C or better.

**Academic Programs**

Within the Earth Sciences Option, three programs are offered to students starting their second year in Science: Honours, Major, and Pass. Two required off-schedule field schools for the Major and Honours programs contribute 10ch to the program totals. The Pass program includes 5ch of second year field schools.

1. **Honours Program** (minimum of 149ch): This program is recommended for students intending to pursue graduate studies in the earth sciences, or whose goal is to become a professional geoscientist. This program meets the knowledge requirements for professional registration. The program requires a thesis and a CGPA of 3.0 at the time of entry (start of the student’s final year). Honours students are not formally recognized as such until this time. A written request for admission to this program must be submitted to the Department. The program comprises the same as the honours program except it does not require a thesis. These requirements will be awarded a Major degree.

2. **Major Program** (minimum of 141 ch): This program is designed to meet the knowledge requirements for professional registration. It is the same as the honours program except it does not require a thesis.

3. **Pass Program** (minimum of 137 ch): This program is designed for those students who are looking for some specialization in Earth Sciences and the opportunity of taking more elective courses outside the Department. Minimum course requirements are given below. This program does not meet all of the requirements for professional registration.

**Common Core**

All required and elective science and ESCI courses must be passed with a grade of C or better.
The Department also offers a Minor in Earth Sciences following the University guidelines outlined in the online calendar. The minor must be pre-approved by the Director of Undergraduate Studies. A Minor consists of first year earth sciences (ESCI 1001, ESCI 1006 or ESCI 1026, ESCI 1012, ESCI 1017) and an additional 14 ch of approved earth sciences courses (total of 24 ch minimum).

Students whose programs require first year earth sciences courses may count these courses towards their minor. The student must get a grade of C or better in all courses used for the minor.

The Earth Sciences Minor does not meet the requirements for professional registration in New Brunswick. Students in joint programs with the Department of Earth Sciences are not eligible for a Minor in Earth Sciences.

For Bachelor of Arts Economics please see - Fredericton Degree Programs - Bachelor of Arts - Economics

FACULTY
- Chowdhury, Mushred, BSS, MSS (Shah Jalal), MA, PhD (Manit.), Asst. Prof. - 2016
- Dalkir, Elf, BSc (Mathematics-METU), MS (Bogazici), MA (Mathematics-Kansas), PhD (Economics & Mathematics - Kansas), Assoc. Prof - 2012
- Dalkir, Methmet S., BS, MS (Engineering-METU), MA (Kansas), PhD (Kansas), Assoc. Prof - 2005
- Emery, Herbert, BA (Gu.), MA, PhD (British Columbia), Vaughan Chair & Director of Policy Studies Centre, Prof - 2016
- Farwirth, Mike, BA, MA (Qu.), PhD (Toronto), Assoc. Prof - 2005
- Hann, Michael, BA (Dordt), MA (Windsor), PhD (Toronto), Assoc. Prof. - Canada, E3B 5A3
- Lantz, Van, BA (Car.), MA (Dal), PhD (S.Fraser), Assoc. Prof (Joint Forestry & Enviro Mgmt) - 2000
- Leonard, Philip, BComm (Queen's), MA (Ottawa), PhD (McMaster), Research Assoc and Health Economist with NB-IRDT - 2014
- McDonald, Ted, BA (St. F.X.), MComm, PhD (Melbourne), Prof & Acting Chair - 2001
- Myatt, Anthony E., BA (Lancaster), MA, PhD (McM), Prof - 1983
- Passaris, Constantine E., BA (American U, Cairo), MA (Nfld), PhD (Leicester), Prof - 1972
- Yervokimov, Yuri, BSc (Sumy), MA (Academy of Science), MSc (III), PhD (Manit.), Prof (Joint Civil Eng.) - 1999
- Yu, Wei, BSc (Shandong), MA (UNB), PhD (S. Fraser), Prof - 1993

Programs available to Faculty of Science students include Majors, Honours and a Minor in Economics (see below), Major and Honours in Mathematics/Statistics-Economics, and Major in Earth Science-Economics. These programs can be found at BSc. Interdepartmental Programs.

Majors and Honours

Students are advised to carefully plan their selection and sequencing of foundation courses as each course is a prerequisite for higher level courses within the same subject area.

Students normally choose a major or Honours in the second year and should register with the Department at the beginning of the academic year. Registration forms may be obtained from the departmental secretary in SH465 or downloaded from the departmental website at: http://www.unb.ca/fredericton/arts/departments/economics/_resources/pdf/majormajorhonoursform.pdf

Major in Economics

A Major will consist of 42ch in Economics courses, 63 ch in other Science courses (including CS 1003 or CS 1073) and 21 ch of electives for a total of 126ch. The following courses are compulsory for this program: ECON 1013, ECON 1023, ECON 3013, ECON 3023, ECON 4013, ECON 4023,
ECON 3665, MATH 1003 or MATH 1053, MATH 1013 or MATH 1063, CS 1003 or MATH 1073, STAT 3083, and STAT 3093. Course selection should normally conform to the following pattern:

First Year (36 ch minimum)
1. ECON 1013, ECON 1023, CS 1003 or CS 1073, MATH 1003 or MATH 1053, MATH 1013 or MATH 1063
2. A total of 20 ch of first year science lecture and laboratory courses in two subjects areas of Biology, Chemistry, Geology (Earth Sciences), and Physics

Second Year (30 ch minimum)
1. ECON 3013, ECON 3023, and 6 ch electives in Economics
2. Two additional courses of first year science lectures in the same subject area
3. STAT 3083, STAT 3093
4. 6 ch chosen from List A

NOTE: Students who did not take ECON 1013, 1023 in their first year may enter the program by taking these courses in their second year. They should consult the Undergraduate Director in Economics for course selections.

Third and Fourth Years (60 ch minimum)
1. ECON 4013, ECON 4023, ECON 3665
2. A minimum of additional 15 ch (advance level) in Economics
3. 21 ch of approved electives (at least 8 ch must be advanced level as defined by the relevant Department)
4. 15 ch chosen from List A (at least 6 ch must be at advanced level as defined by the relevant Department).

List A: Biology, Chemistry, Computer Science, Geology (Earth Sciences), Mathematics, Physics, Statistics.

Honours in Economics

The Honours program is designed mainly for persons who intend to become professional economists, particularly those who plan to do graduate work in Economics at UNB or some other universities. The program emphasizes economic theory, mathematical economics, mathematics and quantitative research methods.

Admission to the Honours Program is restricted to persons who have earned a grade of B or higher in ECON 1013 and ECON 1023 or MATH 1003 and MATH 1013 or their equivalents, and have a cumulative grade point average of at least 3.0. To remain in the Honours program a student must maintain a grade point average of 3.0 in Economics courses and approved substitutes, with no grade lower than C in a required course.

The Honours Program consists of 48 ch in Economics courses, 63 ch in other Science courses (including CS 1003 or CS 1073) and 15 ch of electives for a total of 126 ch. The following courses are compulsory for Honours students: ECON 1013, ECON 1023, ECON 3013, ECON 3023, ECON 4013, ECON 4023, ECON 4625, ECON 4665, MATH 1003 or MATH 1053, MATH 1013 or MATH 1063, MATH 2003, MATH 2013, MATH 2213, CS 1003 or 1073, STAT 3083, and STAT 3093. Course selection should normally conform to the following pattern:

First Year (36 ch minimum)
1. ECON 1013, ECON 1023, CS 1003, or 1073, MATH 1003 or 1053, MATH 1013 or 1063.
2. A total of 20 ch of first year science lecture and laboratory courses in two subject areas of Biology, Chemistry, Geology (Earth Sciences), and Physics.

Second Year (30 ch minimum)
1. ECON 3013, ECON 3023 and 6 ch electives in Economics
2. Two additional term courses of first year science lectures in the same subject area
3. STAT 3083, STAT 3093
4. 6 ch chosen from List A

NOTE: Students who did not take ECON 1013, 1023 in their first year may enter the program by taking these courses in their second year. They should consult the Undergraduate Director in Economics for course selections.

Third and Fourth Years (60 ch minimum)
1. ECON 4013, ECON 4023, ECON 4665
2. A minimum of additional 15 ch (advance level) in Economics
3. 21 ch of approved electives (at least 8 ch must be advanced level as defined by the relevant Department)
4. 15 ch chosen from List A (at least 6 ch must be at advanced level as defined by the relevant Department).

List A: Biology, Chemistry, Computer Science, Geology (Earth Sciences), Mathematics, Physics, Statistics.

Minor in Economics

A minor in Economics is available to Science students. It consists of at least 24 ch in Economics with a grade of 2.0 or better. For the minor up to 6 ch in statistics courses from other Departments may be treated as equivalent to Economics statistics and therefore counted as an Economics credit. The

SECTION G: FREDERICTON ACADEMIC PROGRAMS

courses for the minor must be from a "coherent set of sequence of courses" as called for by the general university regulations for a Minor.

ENVIRONMENTAL BIOLOGY OPTION

PLEASE NOTE: ADMISSION TO THE ENVIRONMENTAL BIOLOGY OPTION HAS BEEN SUSPENDED EFFECTIVE MAY 1, 2015. FOR FURTHER INFORMATION PLEASE CONTACT THE CHAIR OF BIOLOGY.

The Environmental Biology Option is offered as an Honours or Major Program through the Department of Biology.

The Honours program requires the student to take a minimum of 150 credit hours, including 74 ch of Years I and II requirements, 44 ch of Years III and IV requirements (see below), and 32 ch of electives (which include a minimum of 12 ch of courses in the Faculty of Arts). A student must sustain a minimum CGPA of 3.0, and is eligible to apply for BIOL 4090 (Honours by thesis).

The Major program requires a minimum of 132 credit hours, with 69 ch of Years I and II requirements, 38 ch of Years III and IV requirements, and 25 ch of electives (including a minimum of 12 ch of course in the Faculty of Arts).

NOTE: Students must consult their Environmental Biology advisor for information on Prerequisites, electives, and program planning.

Year I (34 ch, same for both Honours and Majors programs)
1. MATH 1003 or MATH 1053 (3ch), STAT 2264 (3ch)
2. BIOL 1001, BIOL 1006, BIOL 1012 and BIOL 1017 (10ch)
3. CHEM 1001, CHEM 1006, CHEM 1012 and CHEM 1017 (10ch)
4. GEOL 1001, GEOL 1012 and GEOL 1017 (8ch)

Year II (40 ch Honours, 35 ch Majors)
1. CHEM 2111 (5ch, Honours program only)
2. Cell/Molecular module (10ch) BIOL 2025, BIOL 2033, BIOL 2053
3. Ecology/Evolution module (10ch) BIOL 2113, BIOL 2105, BIOL 2143
4. Organismal module (15ch) BIOL 2073, BIOL 2083, BIOL 2093.

Years III and IV (44 ch Honours, 38 ch Majors minimum required plus electives)
1. BIOL 4863 (4ch)
2. Two of ENVS 2003, ENVS 2023, ENVS 4001 or ENVS 4002 (6ch)
3. One of BIOL 3801 (3ch), BIOL 3521 (5ch) or BIOL 3526 (3ch)
4. One of BIOL 3173, BIOL 3383, BIOL 4443, or equivalent (4ch)
5. Minimum 12 ch for Honours, 9 ch for Major from Group A courses (see below)
6. Minimum 15 ch for Honours, 12 ch for Major from Group B courses (see below)
7. Electives to bring total credit hours in Honours program to 150 ch, Majors 132 ch minimum.

NOTE: Credit for a course will only be counted once toward degree requirements.

Group A Courses (Plants and Microbes)
BIOL 3206 Advanced Microbiology Laboratory (4ch)
BIOL 3261 Microbial Physiology (3ch)
BIOL 3293 Population Genetics (4ch)
BIOL 3301 Taxonomy of the Flowering Plants (5ch)
BIOL 3423 Forest Tree Genetics and Genomics (3ch)
BIOL 3441 Forest Ecology: Populations and Communities (5ch)
BIOL 3521 Plant Function: Physiology and Primary Metabolism (5ch)
BIOL 3541 Plant Ecology (5ch)
BIOL 3633 Biological Oceanography (3ch)
BIOL 3943 Hypothesis Testing in Biology (3ch)
BIOL 4221 Diversity, Evolution and Ecology of Marine Plants (5ch)
BIOL 4352 Climate Change and Environmental Response (3ch)
BIOL 4413 Environmental Plant Physiology (3ch)
BIOL 4423 Resource Conservation Genetics (3ch)
ENR 3111 Estuary and Ocean Ecosystems (3ch)

Group B Courses (Animals and Ecology)
BIOL 3113 Evolutionary Ecology (5ch)
BIOL 3293 Population Genetics (4ch)
BIOL 3602 Invertebrate Zoology (5ch)
BIOL 3633 Biological Oceanography (3ch)
BIOL 3703 Vertebrate Zoology (5ch)
BIOL 3801 Animal Physiology (3ch)
BIOL 3873 Ethology (3ch)
BIOL 3883 Entomology (4ch)
BIOL 3908 Laboratory Studies in Vertebrate Physiology (3ch)
SECTION G: FREDERICTON ACADEMIC PROGRAMS

BIOL 3943 Hypothesis Testing in Biology (3 ch)
BIOL 4191 Wildlife Management (3 ch)
BIOL 4233 Conservation Biology (3 ch)
BIOL 4352 Climate Change and Environmental Response (3 ch)
BIOL 4841 Coastal Marine Ecology (5 ch)
BIOL 4723 Ornithology (5 ch)
BIOL 4732 Mammalogy (5 ch)
BIOL 4741 Fish Biology (2 ch)
BIOL 4746 Advanced Studies in Ichthyology (4 ch)
BIOL 4851 Ecology of Marine Birds (5 ch)
BIOL 4899 Population Analyses (3 ch)
BIOL 4991 Aquaculture in Canada (5 ch)
BIOL 4773 River and Lake Ecosystems (3 ch)
BIOL 5473 Experimental Design and Data Analysis in Biology and Forestry (3 ch)
ENR 4111 Fisheries and Aquatic Sciences Techniques (3 ch)
FOR 4602 Ecology and Forest Insects (3 ch)
FOR 4656 Wildlife: Scale and Forest Landscapes (3 ch)

ENVIRONMENTAL GEOCHEMISTRY OPTION

The Environmental Geochemistry Option is offered by the Department of Earth Sciences. Consult the Earth Sciences listing for contacts and Faculty. This option provides Earth Sciences students who have an interest in environmental science with a background to pursue careers or graduate studies in environmentally related geoscience fields, especially in areas related to water resources, contamination and remediation.

Professional Registration

Geoscience is a regulated profession in most of Canada. Individual provinces and territories have legislative acts that restrict the practice of geoscience to individuals who are registered members of professional associations. In New Brunswick, the Association of Professional Engineers and Geoscientists of New Brunswick (APEGNB) is the licensing body. In order to meet the requirements of professional registration, specific academic training is required. Students intending to take a professional stream must take a full year of physics (PHYS 1061/PHYS 1062/PHYS 1091/PHYS 1092) and at least one term of biology (BIOL 1001/BIOL 1006) in either the first or second year. Other sciences may be taken with the approval of the Director of Undergraduate Studies.

At the end of the winter term of the second year must be completed and program stream. Because many third and fourth year courses are offered in alternate years, students must consult with the Director of Undergraduate Studies when planning their program in order to graduate in a timely fashion.

Honours Program

Entrance to the Environmental Geosciences Honours Program requires a cumulative grade point average of at least 3.0 overall, by the end of the third year. The student must have completed all first and second year requirements and at least 20 ch of earth science requirements for their stream. An application for admission to the Honours program, available from the Director of Undergraduate Studies, must be submitted by the last day to add classes of the fall term of the fourth year. Students not admitted to the Honours Program may continue in the Major Program.

For graduation with an Honours degree, a minimum cumulative grade point average of 3.0 and a grade of B or higher in ESCI 4900 are required. Students failing to meet these requirements will be awarded a Major degree.

Third and Fourth Year (77 ch minimum)

ESCI 2022, ESCI 3442, ESCI 3631, ESCI 3713, ESCI 4401, ESCI4512, one of ESCI 3482 or ESCI 3492, ESCI 4900, one set of the stream requirements plus the following electives:

Hydrogeocemistry Stream
ESCI 4452, GE 5753 plus 2 elective ESCI courses (6 ch minimum)

Earth Systems Stream
ESCI 3271, ESCI 3282, ESCI 3292, and one ESCI elective (3 ch minimum)

Electives

Four elective courses from the Faculty of Arts (minimum of 12 ch)

Three courses at the 2000 level or above (9 ch minimum) from Biology, Chemistry or Environmental Studies that form a coherent group.

Two free elective courses (minimum of 6 ch) from any Faculty or Department.

Major Program

Third and Fourth Year (69 ch minimum)

ESCI 2022, ESCI 3442, ESCI 3631, ESCI 3713, ESCI 4401, ESCI 4512, one of ESCI 3482 or ESCI 3492, one set of the stream requirements plus the following electives:

Hydrogeocemistry Stream
ESCI 4452, GE 5753 plus 2 elective ESCI courses (6 ch minimum)

Earth Systems Stream
ESCI 3271, ESCI 3282, ESCI 3292, and one ESCI elective (3 ch minimum)

Electives

Four elective courses from the Faculty of Arts (minimum of 12 ch
Three courses at the 2000 level or above (9 ch minimum) from Biology, Chemistry or Environmental Studies that form a coherent group.

Two free elective courses (minimum of 6 ch) from any Faculty or Department.

Co-op Program
The UNB Faculty of Science seeks to provide opportunities for students and employers to develop relationships that enhance the learning experience for students and present employers with skilled, motivated employees looking to make a career connection. To achieve this, the Faculty through the Department of Earth Sciences, and other Science departments and programs, operates a Co-operative education program. Co-op opportunities are available for qualified students, please refer to the Science section of this calendar for detailed information.

Minor Program
The Department does not offer a Minor Environmental Geochemistry. Students may take a minor in Earth Sciences with a suitable choice of courses in environmental geoscience. Consult with the Director of Undergraduate Studies.

MATHMATICS AND STATISTICS OPTIONS
DEPARTMENT OF MATHEMATICS AND STATISTICS

General Information
The Department of Mathematics and Statistics offers Honours and Majors BSc and BA degrees in Mathematics and in Statistics. Requirements for the BA degrees are available from the Department. Minors are also offered.

Mathematics Option

Introductory Level Courses
Introductory Mathematics courses are organized into the following sequences:

1. MATH 1003 and MATH 1013, Introduction to Calculus I and II (or MATH 1053 and MATH 1063): these courses are required for a degree in Mathematics or Statistics and are Prerequisites for intermediate and upper-level courses in Mathematics and Statistics. Students who intend to pursue a degree in Mathematics or Statistics should take these courses in their first year. Grade 12 Mathematics is the normal prerequisite.

2. MATH 1823 and MATH 1833, Mathematics for Management Sciences I and II: this sequence provides a mathematical background for quantitative work in Business Administration and in the social sciences. These courses do not provide the preparation for most intermediate and upper-level courses in Mathematics and Statistics.

Minors

For a minor to be designated Financial Mathematics the courses taken by a student must satisfy the requirements for the Mathematics Minor, as listed above, and must include: MATH 2003 or MATH 2513, MATH 3903, two of MATH 3813, MATH 3843 or MATH 4853; and STAT 2593 or STAT 2264, or both of STAT 3083 and STAT 3093. Other recommended courses are MATH 2013, MATH 3043, MATH 3703, and MATH 3373.

MINOR IN FINANCIAL MATHEMATICS

For a minor to be designated Computational Mathematics the courses taken by a student must satisfy the requirements for the Mathematics Minor, as listed above, and must include: MATH 2003 or MATH 2513, MATH 3003, MATH 3073, MATH 3353, MATH 4313, MATH 4503. Other recommended courses are MATH 3343, MATH 3473, MATH 3043, MATH 3243, and MATH 4853.

Certificate in Actuarial Studies
The primary objective of the Certificate is to prepare students at UNB for a career in the actuarial profession. Professional qualification in the actuarial profession is contingent on passing a series of examinations administered by the Canadian Institute of Actuaries and on passing university courses in five specialized topics, known as Validation by Educational Experience or VEE courses. The Certificate will require that the five VEE courses be taken, and will also require courses that help the student prepare for the first three professional examinations.

Admission to the Certificate in Actuarial Studies program requires admission into a major or honors program in Mathematics, Statistics, Economics, or Business Administration at UNB, or permission of the program administrator.

The Certificate requires the successful completion (with a grade of B or higher) of one of (9) courses, totaling twenty-seven credit hours, which shall include the following: ADM 1213 (VEE), ADM 3415 (VEE), ECON 1013 (VEE) or 3013 (VEE), ECON 1023 (VEE) or 3023 (VEE), MATH 3803 (E), MATH 3843 (E), STAT 3083 (E) or 2593 (E), STAT 3093 (E).

Courses indicated with an E are courses that prepare the student for the first three actuarial exams. Prerequisites for these courses may require additional course work outside of the student’s major or honors program. Students considering an actuarial career are strongly urged to consult the Department of Mathematics and Statistics for placement in a suitable VEE course.

The Certificate requires the successful completion with a grade of B- or higher of nine (9) courses, totaling twenty-seven credit hours, which shall include the following: ADM 1213 (VEE), ADM 3415 (VEE), ECON 1013 (VEE) or 3013 (VEE), ECON 1023 (VEE) or 3023 (VEE), MATH 3803 (E), MATH 3843 (E), STAT 3083 (E) or 2593 (E), STAT 3093 (E).

If the student passes SOA Exam FM or CAS Exam 2 before graduating, the Math 3803 will not be required for the Certificate. If the student passes SOA Exam MLC or CAS Exam 3L before graduating, then Math 3843 will not be required for the Certificate.

To be awarded the Certificate, a minimum of eighteen (18) credit hours must be completed at UNB. Subject to approval by the Dean of Science, a maximum of nine (9) credit hours (or the equivalent) of comparable coursework may be transferred from another recognized post-secondary institution.

Mathematics Degree Program
The Mathematics major degree is designed to prepare students for careers in industry, government or education. Mathematics students are urged to obtain some expertise in an area of application such as the physical sciences, computer science, engineering or business.

General Requirements
SECTION G: FREDERICTON ACADEMIC PROGRAMS

STAT 3083, STAT 3093 and at least one approved Computer Science term course are required courses for all Mathematics Majors. CS 1003 or CS 1073 is strongly recommended. CS 2525 and CS 1043 will not be approved.

First Year
First year required courses are listed under the BSc general regulations. MATH 1013 or MATH 1063 must be included. Suggested electives are MATH 2213, MATH 2203 or CS 1303, and CS 1073, CS 1083.

Second Year
MATH 2003, MATH 2013, MATH 2203, MATH 2213, and approved electives equivalent to 6 courses with a minimum of 3 ch each.

Third and Fourth Years
Students normally choose an Honours or a Majors degree in the Third Year. Students must apply to the Department Chair for admission to the Honours program. The Honours degree is the normal prerequisite for graduate study in the mathematical sciences. However, unless the undergraduate program is chosen carefully, a student may have to take certain undergraduate courses before entering or as part of their graduate program. Students with a Majors degree generally will be required to complete a qualifying year before being admitted to graduate study.

All Mathematics Majors and Honours students must have their course selections approved by the Department.

Honours Program
1. MATH 3033, MATH 3213, MATH 3243, MATH 3103, MATH 3113, MATH 4110 (normally taken in fourth year), and at least five other 3000-4000 level Mathematics term courses including at least one 4000 level term course, totalling at least 36 ch. STAT 3303 and STAT 3313 may count as Mathematics courses for this requirement.
2. STAT 3083, STAT 3093 and an additional 15 ch are required in approved 3000-4000 level courses selected from Science (excluding Mathematics but including Statistics), Arts, Business Administration, Computer Science, or Engineering.
3. Two other approved electives with a minimum of 3 ch each.
4. A total of 132 ch is required to complete the degree.

For the award of a first-class Honours degree, in addition to the Science Faculty general regulations, a grade point average of 3.5 is required in 3000-4000 level Mathematics courses; this average is calculated on the minimum number of specified Mathematics courses as stated in 1 above. Credit hours obtained above the minimum will not be used in calculation of the average.

Majors Program
1. MATH 3003, MATH 3213, MATH 3033, MATH 3243, and at least five 3000-4000 level Mathematics term courses, totaling at least 27 ch. STAT 3303 and STAT 3313 may count as Mathematics courses for this requirement.
2. STAT 3083, STAT 3093, and an additional 15 ch are required in approved 3000-4000 level courses selected from Science (excluding Mathematics but including Statistics), Arts, Business Administration, Computer Science, or Engineering. A maximum of 6 ch from a list of approved Education courses may be included. At least 9 ch must be taken from one coherent field of study, excluding Statistics.
3. Four other approved electives with a minimum of 3 ch each.
4. A total of 129 ch is required to complete the degree.

Co-Op Program
The UNB Faculty of Science seeks to provide opportunities for students and employers to develop relationships that enhance the learning experience for students and present employers with skilled, motivated employees looking to make a career connection. To achieve this, the Faculty, through the Department of Mathematics and Statistics and other Science departments and programs, operates a Co-operative education program. Co-op opportunities are sometimes available to qualified students. Please refer to the Science section of the calendar for detailed information. Students must take STAT 3083 and STAT 3093 in their second year to be eligible for this program.

Statistics Option
Introductory and Service Courses
In addition to degree programs in Statistics, the Department of Mathematics and Statistics offers a number of courses, both introductory and upper level, aimed at non-specialists whose discipline requires them to obtain some knowledge of statistics. The introductory courses are: STAT 2253, STAT 2263, and STAT 2264 (prerequisite Grade 11 Mathematics), and STAT 2593 (prerequisite MATH 1013).

Majors Program
The Minor in Statistics consists of 24 ch in Statistics and Mathematics courses. Credit must be obtained for MATH 1003 or MATH 1053, and MATH 1013 or MATH 1063, and either MATH 1503 or MATH 2213. The remaining 15 ch of the minor must consist of Statistics courses at the second year-level or above. (MATH 3843 or MATH 3373 may be counted as a Statistics course).

Statistics Degree Program
General Information
The degree programs in Statistics are designed to prepare students for careers in industry or government as well as to provide a background for graduate study. Statistics students are required to obtain expertise in an area of application such as the applied sciences, economics or psychology. Consequently, all upper level electives must be approved by the undergraduate faculty advisor.

The courses STAT 3083 and 3093 form the core of the Statistics degree programs. These courses are Prerequisites for most of the upper year Statistics courses. It is strongly recommended that students take these courses in second year to facilitate flexibility of their programs in third and fourth years.

Students who have an interest in, or who are preparing for future careers which involve the design and implementation of statistical algorithms, are strongly encouraged to take MATH 3003 and MATH 3413 or CS 3113. Students interested in data science should consider taking CS 1073, CS 1083, and CS 2545.

The Honours degree is the normal prerequisite for graduate study in Statistics. Students with a Majors degree generally will be required to complete a qualifying year before being admitted to graduate study.

Majors Program
The basic structure of the majors program is as follows:

First year requirements
As specified by the Science Faculty regulations. MATH 1013 or MATH 1063 must be included.

General Requirements
i. At least 4 ch of approved Computer Science courses. CS 2525 and CS 1043 will not be approved.
ii. A total of 129 ch, of which at least 48 ch must be at the 3000 level or above. These credit hours include those specified below; the balance is to be made up of approved electives.

Application Elective Requirements
At least 16 ch of approved courses in a field where statistics is applied at the 2000 level or above, taken outside the Department of Mathematics and Statistics. At least eight of these credit hours must be at the 3000 level or above.

Second Year Course Requirements
MATH 2003, MATH 2013, and MATH 2213, STAT 3083, and STAT 3093.

Students are strongly encouraged to take a second year applications course (outside Mathematics & Statistics) in their second year in order to make sure they have the Prerequisites for Third Year Science electives.

Third and Fourth Year Course Requirements
i. STAT 3083 and 3093. (NOTE: These courses may be taken in second year.)
ii. At least 21 more credit hours of approved 3000-4000 level Statistics courses, giving a total of 27 ch of Statistics courses at the 3000 level or above. Up to 12 ch chosen from MATH 3003, MATH 3043, MATH 3103, MATH 3113, MATH 3373, MATH 3413, MATH 3473, MATH 3803, MATH 3813 and 3843 may count as STAT courses for this requirement.

Honours Program
Students normally choose between an Honours or Majors degree in Third Year. They must apply to the Department Chair for admission to the Honours program.

For the award of a first-class Honours degree, in addition to the Science Faculty general regulations, a grade point average of 3.5 is required in 3000-4000 level statistics courses. This average is calculated on the basis of the courses, meeting the minimum requirements specified in (i), (ii), and (iii) below, in which the student has the highest marks.

The basic structure of the Honours program is as follows:

First Year Course Requirements:
General requirements:

i. As for the Majors program.

ii. A total of 132 ch, of which at least 63 must be at the 3000 level or above. These credit hours include those specified below; the balance is to be made up of approved electives.

Application Elective requirements:
As for the Majors program.

Second Year Course Requirements:
As for the Majors program, plus MATH 2203.

Third and Fourth Year Course Requirements:
A total of 42 ch of approved STAT and MATH courses at level 3000-4000, with more ch in STAT than in MATH. These ch must include the following:

i. At least 15 ch of Stat at 4000 level, including STAT 4100.

ii. MATH 3103, at least one of MATH 3003, MATH 3113, at least one of MATH 3033, MATH 3043, MATH 3243.

**Co-op Program**

The UNB Faculty of Science seeks to provide opportunities for students and employers to develop relationships that enhance the learning experience for students and present employers with skilled, motivated employees looking to make a career connection. To achieve this, the Faculty, through the Department of Mathematics and Statistics and other Science departments and programs, operates a Co-operative education program. Co-op opportunities are sometimes available to qualified students. Please refer to the Science section of this calendar for detailed information. Students must take STAT 3083 and STAT 3093 in their second year to be eligible for this program.

**PHYSICS OPTION**

DEPARTMENT OF PHYSICS

| General Office: | I.U.C. - Physics & Administration Building, Room 206/209 |

**FACULTY**

- Adam, Allan G., BSc, MSc (UWO), PhD (Wat), Prof (Cross App - Chemistry) - 1991
- Backman, Philip J., BSc (Dal), MSc (UND), Sr Teaching Assoc - 2004
- Balcom, Bruce, BSc (Mt.Al.), MSc (UWO), Prof (Cross App - Chemistry) & Canada Research Chair - 1993
- Benton, J. Bruce, BSc, MSc (UNB), Sr Teaching Assoc and Asst Dean - 1983
- Ghosh, S.N., BSc (Calic), MSc (Calc & Nfld), PhD (UNB), Sr Teaching Assoc - 1978
- Hamza, Abdelhaq, BSc (Algiers), MSc, PhD (MIT), Prof - 1995
- Husain, Vigar, BSc (Manchester), PhD (Yale), Prof (Cross App - Math & Stat) - 1999
- Jayachandran, P. T. BSc (Calicut), MSc (Andhra), PhD (Andhra), Prof - 1995
- Mastikhin, Igor, MSc, PhD (Novosibirsk State), Prof - 2002
- Neuling, Benedict, BA, PhD (Camb.), Prof - 2002
- Normandeau, Magdalen, BSc, MSc (Laval), PhD (Calgary), Sr Teaching Assoc - 2005
- Ross, Stephen, BSc (Tor), MSc, PhD (Car), Prof - 1988
- Seathra, Sanjeev, BSc, PhD (Waterloo), Asst Prof (Cross App - Math & Stat) - 2010
- Takaryk, Dennis, BSc (Sask), MSc (Guelph), PhD (Guelph), Prof - 2002
- Ward, William, BSc (UWO), PhD (York), Prof - 2001
- Wilson-Ewing, Edward, BSc, (Bishops), PhD (Penn. State), Asst Prof - 2017
- Xu, Li-Hong, BSc (Suzhou Univ.), PhD (UNB), Prof - 1994
- Yan, Zong-Chao, BSc (Shanghai Teachers U.), MSc (Tongji), MSc (Nfld), PhD (Calgary), Prof - 1999
- Zhao, Saibei, BSc (Zhong Shan Univ.), MSc (Beijing U. E. D. Research Inst.), PhD (UNB), Sr Teaching Assoc - 2000

**General Information**

Programs are offered at four different levels:

1. **Honours**: These programs are designed primarily for qualified students intending to pursue a post graduate education. In general, the Honours programs require more specialization and a greater overall course load than the Major programs. A Co-op program is available.

2. **Major**: The Major programs allow a wider choice of courses outside the Physics Department and a somewhat reduced course load.

3. **Pass**: A Pass degree is intended for students who require a basic foundation in Physics to undertake further study in another area (such as X-ray technology, medical imaging technology, etc.) It has fewer requirements than a Major in Physics.

**SECTION G: FREDERICTON ACADEMIC PROGRAMS**

4. **Minor**: A Minor in Physics consists of first year physics (PHYS 1061, 1092, 1091, 1002 or equivalent) plus at least a further 14 ch of approved physics courses (at least 24 ch of physics courses in total).

A student may do a Major, Honours or Honours Co-op program in Physics or Applied Physics.

Students entering second year from Engineering must complete the requirements of First Year of their physics program before graduation. CHEM 1012 or CHEM 1987 may replace CHEM 1017. **NOTE** that students must take CHEM 1001 and 1006. PHYS 1081 and EE 1813 may replace First Year Physics i.e. PHYS 1061, 1062, 1091, 1092 (or equivalently PHYS 1071, 1072, 1091, 1092).

The Applied Physics program is not an Engineering program and does not satisfy the requirements for a PEng qualification.

**Honours Program**

A student intending to take Honours should consult with the undergraduate advisor in physics.

All students in Honours Programs are required to complete an Advanced Research Project (PHYS 4338). Students must have arranged with the Department for an appropriate project by October of their final year and must submit a report to the Department. The deadline for the report is decided and circulated each year, but is usually late in March.

To remain in and graduate in Honours, the student must meet certain minimum standards in the course work beyond second year.

1. In each term of study beyond second year, the student must have a GPA of at least 3.0 calculated from the grades of the courses taken that term.

2. The student must have a minimum GPA of 3.0 in the required upper level physics courses and a minimum grade of B- in PHYS 4338.

When students apply to graduate with Honours, records will be checked for compliance with 1 and 2 above. In the event a student does not meet requirements he/she may request permission from the department for an exception of standards 1 and/or 2 above.

Students offering all the courses necessary for the Honours program but failing to meet the qualifications outlined in 1 and 2 above will receive Major degrees, subject to general university regulations for graduation.

**Honours Physics**

Elective courses listed below total a minimum of 36 ch (of which 18 ch must be physics courses) for the Honours degree.

**First Year:**
- PHYS 1061 or PHYS 1071, PHYS 1062 or PHYS 1072, PHYS 1091, PHYS 1092, MATH 1003 or MATH 1053, MATH 1013 or MATH 1063, CHEM 1001, 1006, 1012, 1017 plus two more term lecture courses chosen from BIOL 1001, BIOL 1012, ESCI 1001, ESCI 1012, plus 6 ch of electives.

**Second Year:**
- PHYS 2311, PHYS 2312, PHYS 2327, PHYS 2331, PHYS 2341, PHYS 2351, PHYS 2372, MATH 2003, MATH 2013, MATH 2213, CS 1073, plus approved physics electives totalling 3 ch.

**Third Year:**
- PHYS 3331, PHYS 3332, PHYS 3336, PHYS 3338, PHYS 3342, PHYS 3351 plus additional approved physics electives totaling at least 9 ch, plus MATH 3243, plus MATH 3413 or CS 3113 or equivalent, plus approved electives totaling at least 6 ch.

**Fourth Year:**
- PHYS 4321, PHYS 4332, PHYS 4351, PHYS 4371, PHYS 4383, plus approved physics electives totaling at least 6 ch, plus STAT 3083, plus additional approved electives totaling at least 6 ch.

**Physics Major**

Electives courses listed below total a minimum of 48 ch (of which 21 ch must be physics courses) for the Major degree.

**First Year:**
- PHYS 1061 or PHYS 1071, PHYS 1062 or PHYS 1072, PHYS 1091, PHYS 1092, MATH 1003 or MATH 1053, MATH 1013 or MATH 1063, CHEM 1001, 1006, CHEM 1012, CHEM 1017 plus two more term lecture courses chosen from BIOL 1001, BIOL 1012, ESCI 1001, ESCI 1012, plus 6 ch of electives.

**Second Year:**
- PHYS 2311, PHYS 2312, PHYS 2327, PHYS 2331, PHYS 2341, PHYS 2351, PHYS 2372, MATH 2003, MATH 2013, MATH 2213, CS 1073, plus approved physics electives totaling 3 ch.

**Third Year:**
- PHYS 3331, PHYS 3332, PHYS 3336, PHYS 3338, PHYS 3342, PHYS 3351 plus additional approved physics electives totaling at least 9 ch, plus MATH 3243, plus MATH 3413 or CS 3113 or equivalent, plus approved electives totaling at least 6 ch.

**Fourth Year:**
- PHYS 4321, PHYS 4332, PHYS 4351, PHYS 4371, PHYS 4383, plus approved physics electives totaling at least 6 ch, plus STAT 3083, plus additional approved electives totaling at least 6 ch.
Second Year:
PHYS 2311, PHYS 2312, PHYS 2327, PHYS 2331, PHYS 2341, MATH 2003, MATH 2013, MATH 2213, CS 1073, plus approved physics electives totaling at least 3 ch plus approved electives totaling at least 3 ch.

Third and Fourth Years:
PHYS 2341, PHYS 2372, PHYS 3322, PHYS 3331, PHYS 3336, PHYS 3342, PHYS 3351, MATH 3243, MATH 3413 or CS 3113 plus approved physics electives totaling at least 18 ch plus approved electives totaling at least 18 ch.

Make-Up Year:
Physics Major students who decide to prepare themselves for graduate study in Physics at UNB might be required to take a further year of study composed of the following: PHYS 4321, PHYS 4351, PHYS 4371, PHYS 4388, and STAT 3083 and 3 ch Math/Stats electives + 9 ch of approved electives.

Applied Physics Program (Honours or Majors)
First Year:
PHYS 1061 or PHYS 1071, PHYS 1062 or PHYS 1072, PHYS 1091, PHYS 1092, MATH 1003 or MATH 1053, MATH 1013 or MATH 1063, CHEM 1001, 1006, CHEM 1012, CHEM 1017 plus two more term lecture courses chosen from BIOL 1001, BIOL 1012, ESCI 1001, ESCI 1012, plus 6 ch of electives.

NOTE: Students are reminded that to go into the second year of any PHYSICS program, they must have completed MATH 1013 or MATH 1063, since second year math must be taken with the second year physics courses.

Second Year:
PHYS 2311, PHYS 2312, PHYS 2327, PHYS 2331, PHYS 2341, PHYS 2351, PHYS 2372, MATH 2003, MATH 2013, MATH 2213, CS 1073.

Third and Fourth Years:
PHYS 3322, PHYS 3331, PHYS 3336, PHYS 3342, PHYS 3351, PHYS 4321, PHYS 4332, PHYS 4338, PHYS 4351, PHYS 4371, PHYS 4723, PHYS 4823, MATH 3243, MATH 3413 or CS 3113 or equivalent, an approved course in Statistics plus approved electives which should include engineering and/or computer science courses totaling at least 24 ch.

Electives may be chosen to prepare the student for specialization in various aspects of applied Physics.

NOTE: In choosing electives students must ensure that they satisfy prerequisite requirements for desired electives.

Physics Co-op Program
The UNB Faculty of Science seeks to provide opportunities for students and employers to develop relationships that enhance the learning experience for students and present employers with skilled, motivated employees looking to make a career connection. To achieve this, the Faculty through the Department of Physics, and other Science departments and programs, operates a Co-operative education program. Co-op opportunities are available for qualified students, please refer to the Science section of this calendar for detailed information.

Pass Program
A pass degree is intended for students who require a basic foundation in Physics to undertake further study in another area (such as X-ray technology, medical imaging technology, etc.). The requirements are those of second year Honours Physics plus at least 30 ch of approved physics electives plus a minimum of 15 ch of approved electives. A minimum of 126 credit hours are required for graduation.

PSYCHOLOGY OPTION

- Stevanovski, Biljana, BA (McM), MA, PhD (Wat), Assoc Prof - 2007
- Voyer, Daniel, BSc, MSc (Montr.), PhD (Wat), Prof - 2000

General Information
The Department of Psychology offers several undergraduate programs through the Faculty of Arts and the Faculty of Science. Arts students may complete Minors, Majors, Double Majors, Honours, Joint Honours and Specialization in Neuroscience programs. Science students may complete Minors, Majors or Honours in Psychology. Some students may complete degrees in a combined (BSc) program or earn both Arts (BA) and Science (BSc) degrees in a concurrent program. Students in the concurrent program may declare the major or apply for admission to Honours in Psychology in either Faculty but not both. Students in the combined program may declare the Major (following the Double Major regulations) in Psychology in either Faculty but not both.

The second digit in each course number indicates Teaching Areas within the discipline of psychology. The Areas and the specific course numbers of the courses belonging to each Area are as follows:

0 General PSYC 1013, PSYC 1023, PSYC 3033, PSYC 3043, PSYC 3053, PSYC 3063, PSYC 4003, PSYC 4053;
1 Research PSYC 2103, PSYC 2113, PSYC 3113, PSYC 3123, PSYC 3151, PSYC 3152, PSYC 4110;
2 Developmental PSYC 2203, PSYC 3213, PSYC 3215, PSYC 3233, PSYC 3243, PSYC 3253, PSYC 3263, PSYC 3273, PSYC 4203, PSYC 4223;
3 Clinical PSYC 2313, PSYC 3313, PSYC 3315, PSYC 3323, PSYC 3353, PSYC 3373, PSYC 3383, PSYC 4303;
4 Personality and Social PSYC 2403, PSYC 3403, PSYC 3415, PSYC 3423, PSYC 3433, PSYC 4409;
6 Memory, Learning and Cognition PSYC 2603, PSYC 2613, PSYC 3613, PSYC 3623, PSYC 3633, PSYC 4603;
7 Biological PSYC 2703, PSYC 3713, PSYC 3723, PSYC 3733, PSYC 3743, PSYC 3745, PSYC 3753, PSYC 3773, PSYC 3783, PSYC 4713, PSYC 4743, PSYC 4773.

The third digit in each course number designates the course within the Subject Area. Terminal digits of 3 or 5 indicate the course could be offered in any term. Please note that no more than three of PSYC 3033, PSYC 3043, PSYC 3053, and PSYC 3063 may be counted toward a Major or Honours in Psychology.

Statement of Web Courses
The Department of Psychology offers some online Web Courses to students through the College of Extended Learning. The Department of Psychology has approved these courses as equivalent to regular courses. In the Undergraduate Timetable, the section number for all Web Courses is listed as Open Access Learning. In exceptional cases Full time students may be given permission to enroll in Web Courses as part of their regular course load. Current regulations require Web courses taken by Full-time students during the Winter and Fall terms to be approved by the Dean of the faculty offering the course. Web Courses must be on the list of courses approved by the Department as equivalent to existing courses and must include a proctored final exam. The following Web Courses have been approved by the Department of Psychology as equivalent to regular courses:

<table>
<thead>
<tr>

**Majors and Honours**

**Minimum Academic Standards**

Students should note that in the Science Faculty the minimum acceptable grade in a course which is required by a particular program or is used to meet a prerequisite, is a “C”. Any student who fails to attain a “C” or better in such a course must repeat the course (at the next regular session) until a grade of “C” or better is attained. Students will not be eligible for graduation until such deficiencies are removed. The only exception will be granted for a single course with a “D” grade that is a normal part of the final year of that program, and is being taken for the first time in the final year.

Students are advised to carefully plan their selection and sequencing of Foundation courses as each course is a prerequisite for higher level courses within the same Teaching Area.

Course selection for each program should conform to the following pattern:

**First Year**

1. PSYC 1013, PSYC 1023, BIOL 1001, BIOL 1006, BIOL 1012, BIOL 1017, CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017, and MATH 1003 or MATH 1053, MATH 1013 or MATH 1063.
2. 6 ch of approved electives.

**Second Year**

1. PSYC 2113, PSYC 2103.
2. Two term courses of first year science lectures (Earth Sciences or Physics).
3. Two of: PSYC 2603, PSYC 2613, PSYC 2703 and 12 ch chosen from List A.

**Third and Fourth Years**

1. PSYC 4053
2. Two of: PSYC 2203, PSYC 2313, PSYC 2403
3. 24 ch of Advanced Psychology electives.
4. 12 ch chosen from List A (6 ch must be at advanced level).
5. 15 ch of approved electives.

**List A:** Biology, Chemistry, Computer Science, Earth Sciences, Mathematics, Physics, Statistics.

**Minor Program**

A Minor will consist of 24ch in Psychology courses and will include the following:

- PSYC 1013, PSYC 1023, PSYC 2103,
- two Foundation courses (selected from PSYC 2203, PSYC 2313, PSYC 2403, PSYC 2603, PSYC 2613 and PSYC 2703), and
- three advanced level (3xxx or 4xxx) Psychology courses.

**Major Program**

Students wishing to Major in Psychology will normally declare their major during their second year after they have seen their Department advisor.

A Major will consist of 51ch in Psychology courses, 56ch in other Science courses, and 21 ch of elective for a total of 128ch.

A Major in Psychology will include the following:

- Introductory Psychology 6ch (PSYC 1013 and PSYC 1023)
- Research Methods 6ch (PSYC 2113 and PSYC 2103)
- Area 6 and 7 Foundation courses 6ch (PSYC 2603 and PSYC 2703)
- Two general Foundation courses 6ch (selected from PSYC 2203, PSYC 2313, and PSYC 2403)
- Four advanced level Area 6 or Area 7 Psychology courses 12ch (3xxx or 4xxx level)
- Four general advanced level Psychology courses 12ch (3xxx or 4xxx level chosen from any area of Psychology)
- History of Psychology 3ch (PSYC 4053)
- Biology 10ch (BIOL 1001, BIOL 1006, BIOL 1012, and BIOL 1017)
- Mathematics 6ch (MATH 1003 or MATH 1053 and MATH 1013 or MATH 1063).
- Chemistry 10ch (CHEM 1001, CHEM 1006, CHEM 1012, and CHEM 1017)
- 6ch in PHYS 1061/PHYS 1071, PHYS 1062/PHYS 1072, ESCI 1001 or ESCI 1012.
- List A Science Courses 18ch (Any level (i.e. 1xxx, 2xxx, 3xxx, or 4xxx) from Biology, Chemistry, Computer Science, Earth Sciences, Mathematics, Physics, or Statistics).
- Electives 21ch (any level from any discipline)

**Honours Program**

Students wishing to Honour in Psychology will normally apply to the Department in their third year. The Honours Program is designed to provide broad exposure to the discipline and develop research skills appropriate for students wishing to pursue graduate studies in Psychology.

An Honours will consist of 56ch in Psychology courses, 60ch in other Science courses, and 12ch of electives for a total of 132ch. An Honours in Psychology will include the following:

- Introductory Psychology 6ch (PSYC 1013 and PSYC 1023)
- Research Methods 6ch (PSYC 2113 and PSYC 2103)
- Area 6 and 7 Foundation courses 6ch (PSYC 2603 and PSYC 2703)
- Two general Foundation courses 6ch (selected from PSYC 2203, PSYC 2313, and PSYC 2403)
- Four advanced level Area 6 or Area 7 Psychology courses 12ch (3xxx or 4xxx level) and Four general advanced level Psychology courses 12ch (3xxx or 4xxx level chosen from any area of Psychology) for a total of Eight advanced level Psychology courses 24ch
- Students must take one or both Basic Research Seminars (PSYC 3151, PSYC 3152) in their third year. Students must also take at least one Topical Seminar (PSYC 4003, PSYC 4110, PSYC 4203, PSYC 4223, PSYC 4303, PSYC 4403, PSYC 4603, PSYC 4713, PSYC 4743, or PSYC 4773).
- Advanced Statistics 6ch (PSYC 3113)
- Full year Honours Thesis 6ch (PSYC 4110)
- History of Psychology 3ch (PSYC 4053)
- Biology 10ch (BIOL 1001, BIOL 1006, BIOL 1012, and BIOL 1017)
- Mathematics 6ch (MATH 1003 or MATH 1053 and MATH 1013 or MATH 1063)
- Chemistry 10ch (CHEM 1001, CHEM 1006, CHEM 1012, and CHEM 1017)
- 6ch in PHYS 1061/PHYS 1071, PHYS 1062/PHYS 1072, ESCI 1001 or ESCI 1012.
- List A Advanced Science Courses 6ch (3xxx or 4xxx) from Biology, Chemistry, Computer Science, Earth Sciences, Mathematics, Physics, or Statistics.
- List A Advanced Psychology Courses 18ch (Any level (i.e. 1xxx, 2xxx, 3xxx, or 4xxx) from Biology, Chemistry, Computer Science, Earth Sciences, Mathematics, Physics, or Statistics), and
- Electives 12ch (any level from any discipline)

**The Honours Thesis**

The Honours Thesis will consist of an independent research project, completed in the fourth year, supervised by a Psychology faculty member and discussed in the Honours Thesis Research Seminar. Application to the Honours Program is made prior to submission of the Honours Program Application Form, normally in the third year of their program, to the Honours Research Coordinator, and are encouraged to approach individual faculty members to find a supervisor. Only students with a cumulative grade point average of at least 3.6 in Psychology courses will be considered for the Honours Program. For the award of a first-class Honours degree, an overall cumulative grade point average of 3.7 is required.

**Interdepartmental Programs**

Eight interdepartmental programs are available based on existing courses in the Science Faculty to meet the needs of students proceeding into an interdisciplinary area. These programs are not truly interdisciplinary but are extracted from the specialized offerings of two Departments in each case. These programs are administered jointly by the two departments concerned, and students should refer to specified program advisors for counseling.

Students are advised to consult their academic advisors to carefully plan their selection of first and second year courses to ensure that the relevant Prerequisites are completed prior to selection of courses at the third and fourth year levels.

Students should note that in the Science Faculty the minimum acceptable grade in a course which is required by a particular program or is used to meet a prerequisite, is a “C”. Any student who fails to attain a “C” or better in such a course must repeat the course (at the next regular session) until a grade of “C” or better is attained. Students will not be eligible for graduation until such deficiencies are removed. The only exception will be granted for a single course with a “D” grade that is a normal part of the final year of that program, and is being taken for the first time in the final year.

**NOTE:** In individual cases certain modifications to these programs may be recommended by the Chairs of the Departments concerned, or their delegates.

**Honours in Interdepartmental Programs**

Application for Honours in the interdepartmental programs is made prior to registration in the final year to the appropriate Department Chair or their delegates. The Honours content of interdepartmental programs consists of content in addition to that prescribed for the corresponding Major program, usually in the final year. Normally this will be in the form of one of the departmental honours or senior research projects (i.e. BIOL 4090, CHEM 4110).
SECTION G: FREDERICTON ACADEMIC PROGRAMS

4000, ESCI 4900, MATH 4100, PHYS 4338, STAT 4100). Requirements for qualified students will be approved by the two Departments responsible for the program, in consultation.

NOTE: Requirements for Honours programs generally exceed those for Majors programs. In light of this, students may need to take on a heavier course load than would otherwise be the case to finish the degree in four years. Alternatively, students may need to extend the time needed to finish the degree.

BIOLOGY-CHEMISTRY OPTION

The interdepartmental Biology-Chemistry Program combines courses from Biology, Chemistry, Mathematics and Physics, as well as electives from other disciplines. A minimum of 12 ch of electives must be from courses offered by the Faculty of Arts. Students will normally enter the Biology-Chemistry program after completing the first year science curriculum (32 ch). Students must consult with one of the Biology-Chemistry advisors in order to enter the program.

Two Biology-Chemistry program streams are offered. The Pre-Health Profession stream is recommended for students who may enter a professional health program upon graduation (i.e. medicine, dentistry, pharmacy, optometry, veterinary medicine, etc.). The Comprehensive stream is recommended for students who may consider graduate studies in biochemistry, biophysics, etc. Such courses as biochemistry, biophysics, etc may be given to students who may enter a professional health program upon graduation (i.e. medicine, dentistry, pharmacy, optometry, veterinary medicine, etc.). The Comprehensive stream is recommended for students who may consider graduate studies in biochemistry, biophysics, etc.

Pre-Health Profession stream, Major program (132 ch):

Second Year

BIOL 1001, BIOL 1066, BIOL 1012, BIOL 1017, CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017, MATH 1003 or MATH 1053, MATH 1013 or MATH 1063, PHYS 1061 or PHYS 1071, PHYS 1062 or PHYS 1072.

Electives

1. 12 ch of Arts courses.
2. 15 ch of upper level Biology (3000 or 4000 level courses) including a minimum of 2 laboratory or field courses (denoted by the course designation "L" in the course description).
3. 15 ch of 2000-4000 level Chemistry courses including a minimum of 10 ch in a discipline other than Organic Chemistry (i.e. Analytical, Physical or Inorganic Chemistry).
4. Other electives to total a minimum of 132 ch.

Pre-Health Profession stream, Honours program (144 ch): Second Year

BIOL 1711, BIOL 2063, BIOL 2068, BIOL 2761, BIOL 2812, CHEM 2416, CHEM 3421, CHEM 3523, CHEM 3857, STAT 2264.

Electives

1. 12 ch of Arts courses.
2. For Honours by thesis, 15 ch of upper level Biology (3000 or 4000 level courses) including a minimum of 2 laboratory or field courses (denoted by the course designation "L" in the course description).
3. For Honours by thesis, 18 ch of 2000-4000 level Chemistry courses including a minimum of 10 ch in a discipline other than Organic Chemistry (i.e. Analytical, Physical or Inorganic Chemistry).
4. For Honours by course, 21 ch of upper level Biology (3000 or 4000 level courses) including a minimum of 2 laboratory or field courses (denoted by the course designation "L" in the course description).
5. For Honours by course, 21 ch of 2000-4000 level Chemistry courses, including a minimum of 10 ch in a discipline other than Organic Chemistry (i.e. Analytical, Physical or Inorganic Chemistry).
6. Other electives to total a minimum of 144 ch.

Comprehensive Stream, Majors Program (135 ch): Second Year

BIOL 2013, BIOL 2018, BIOL 2023, BIOL 2028, one of CHEM 2201 or CHEM 2121, one of CHEM 2222 or CHEM 3122, CHEM 2421, CHEM 2422, CHEM 2601, MATH 2003, STAT 2264.

Third Year

BIOL 2063, BIOL 2068, BIOL 3031, BIOL 3043, CHEM 2416, CHEM 3421, CHEM 3857, one of CHEM 3621, PHYS 3993 or PHYS 3892.

Fourth Year

BIOL 3242, BIOL 3013, BIOL 4272, 1 Group B course**, CHEM 3523, CHEM 4053, CHEM 4513, 1 Group A*.

Electives

1. 12 ch of Arts courses.
2. 4 ch from either electives or Group A courses must be from upper year CHEM labs (CHEM 2136/CHM 3137/CHM 2237/CHM 3236/CHM 3637/CHM 4616)
3. Other electives to total a minimum of 135 ch.

Comprehensive stream, Honours program (144 ch):

Second Year

BIOL 2013, BIOL 2018, BIOL 2023, BIOL 2028, one of CHEM 2201 or CHEM 2121, one of CHEM 2222 or CHEM 3122, CHEM 2421, CHEM 2422, CHEM 2601, MATH 2003, STAT 2264.

Third Year

BIOL 2063, BIOL 2068, BIOL 3031, BIOL 3043, CHEM 2416, CHEM 3421, CHEM 3857, one of CHEM 3621, PHYS 3993 or PHYS 3892, 2 Group A courses*

Fourth Year

BIOL 3242, BIOL 3013, BIOL 4272, 1 Group B course**, CHEM 3523, CHEM 4503, CHEM 4513, 1 Group A course*.

By fourth year, students must choose between Honours by course and Honours by thesis and add the following to their program:

i. Honours by course: add 3 Group A courses*
ii. Honours by thesis: add BIOL 4090 or CHEM 4000. Please see the course descriptions for BIOL 4090 and CHEM 4000 for details regarding admission to the thesis research courses.

Electives

1. 12 ch of Arts courses.
2. 4 ch from either electives or Group A must be from upper year CHEM labs (CHEM 2136/CHM 3137/CHM 2237/CHM 3236/CHM 3637/CHM 4616)
3. Other electives to total a minimum of 144 ch.

* Group A courses:

BIOL 3058, BIOL 3073, BIOL 3133, BIOL 3149, BIOL 3162, BIOL 3207, BIOL 3261, BIOL 3493, BIOL 3593, BIOL 3673, BIOL 3802, BIOL 3812, BIOL 3833, BIOL 3908, BIOL 3933, BIOL 4043, BIOL 4149***, BIOL 4182, BIOL 4533, BIOL 4581, BIOL 5473, CHEM 4003, any 2000-4000 level CHEM course, MATH 2213, PHYS 3903.

** Group B courses:

BIOL 3058, BIOL 3207, BIOL 3908, BIOL 4182, BIOL 4533, BIOL 4581.

***NOTE: that students can only receive credit for either BIOL 4149 or BIOL 4090.

BIOLOGY-MATHEMATICS/STATISTICS OPTION

Biology is a quantitative discipline and mathematics underpins all sub-disciplines in Biology. Students with a strong quantitative background are better positioned for graduate research. Areas in which Math/Stat are used extensively include all areas of ecology and evolution, bioinformatics, genomics, biochemistry, molecular biology, and systems biology. To ensure necessary Prerequisites are met when planning an individual program, students must consult with advisors from both departments, ideally prior to second year.

Requirements for the Major Program

First Year

First year required courses are listed under the BSc general regulations. BIOL 1001, BIOL 1006, BIOL 1012, BIOL 1017, CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017, MATH 1003 or MATH 1053, MATH 1013 or MATH 1063 must be included. Suggested electives are STAT 2264 and CS 1003 or CS 1073, CS 1003 or CS 1073, and STAT 2264, if not taken in first year must be taken later in the program.

Second Year

BIOL 2013, BIOL 2018, MATH 2003, MATH 2013, MATH 2203, MATH 2213, plus 6 ch in Biology or Math/Stat, plus approved electives totaling at least 6 ch.

NOTES:

1. Students interested in the more molecular aspects of biology such as biochemistry, biophysics, etc may be given to permission to take BIOL 2023, BIOL 2028.

312
SECTION G: FREDERICTON ACADEMIC PROGRAMS

400 level. Students must have (and maintain) a minimum CGPA of 3.0 to be accepted in and remain in the Honours program. Application to the Honours program is initiated by writing a letter of intent to the Chair of Biology or Physics before preregistration at the end of Year III. BIOL 4090 (Honours Thesis Project) or PHYS 4338 (Advanced Research Project) is required, and the course descriptions should be consulted for further information and specific procedures. Students must make arrangements to complete their dissertation research with a Faculty member in the Department of Biology or of Physics before applying to the Program. In each case, a reader from the second department must also oversee the research project.

The Honours student must achieve a minimum final CGPA of 3.7 to obtain First Class Honours standing upon graduation. A student completing all course requirements for Honours but with a CGPA below 3.0 will be given a Major degree.

CHEMISTRY-PHYSICS OPTION

The Chemistry-Physics Option offers a challenging program for strong students. This interdisciplinary program provides a solid core of courses in both Chemistry and Physics. It is set up in such a way that a student may opt for the single disciplines of Chemistry or Physics after the second year. A BSc in this joint program would allow students to continue studies at the graduate level in either Physics or Physical Chemistry.

Careful choice of electives in first and second year will make any change from the joint program into a single discipline program easier.

First Year

CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017, PHYS 1061 or PHYS 1071, PHYS 1062 or PHYS 1072, PHYS 1091 and PHYS 1092, MATH 1003 or MATH 1053, MATH 1013 or MATH 1053, plus two more term lecture courses chosen from BIOL 1001, BIOL 1012, ESCI 1001, ESCI 1012, plus 6 ch electives.

NOTE: Students must have a minimum AGPA of 3.0 to enter second year of this program and they must maintain the 3.0 AGPA at the end of second year to proceed to third year. Students must have passed MATH 1013 or MATH 1063 before entering the second year of this program. Because of the challenging nature of the program, some students may plan to spread the required courses over five years.

Second Year

CHEM 2601, or PHYS 2341, CHEM 3637, MATH 2003, MATH 2013, MATH 2213, PHYS 2311, PHYS 2312, PHYS 2327, PHYS 2331, PHYS 2351, CS 1003 or CS 1073, plus 3 ch approved electives.

Third Year

CHEM 2002, CHEM 2201, CHEM 2222, CHEM 2421, CHEM 2422, CHEM 3621, PHYS 2372, PHYS 3336, PHYS 3331, PHYS 3351, CS 3113 or MATH 3413 or equivalent plus 3 ch approved electives.

Fourth Year

CHEM 3201, CHEM 3222, CHEM 3622, CHEM 4616, CHEM 4622, CHEM 4601 or PHYS 3752, PHYS 3322, PHYS 4332, PHYS 4351, plus 6 ch approved electives. Students in Honours add PHYS 4338 or CHEM 4000 and must have a minimum AGPA of 3.0 entering fourth year.

EARTH SCIENCES-ECONOMICS OPTION

The program totals 137 ch for Majors and 145 ch for Honours. This includes 5 ch of field schools which take place outside of the regular fall and winter terms.

First Year

Students follow the first year Science curriculum. MATH 1003 or MATH 1053, MATH 1013 or MATH 1063 must be taken. ESCI 1001, ESCI 1006 or ESCI 1026, ESCI 1012, ESCI 1017 must be included. 2 lecture and 2 lab courses must be taken from Biology, Chemistry or Physics. 2 additional lecture courses must be taken from Biology, Chemistry or Physics. ECON 1013, ECON 1023 or ECON 1014, 1024 should be taken in the first or second year.

Second Year

ESCI 2131, ESCI 2142, ESCI 2211, ESCI 2321, ESCI 2703, STAT 2263, one of MATH 2003 and MATH 1013 or MATH 2513, plus ECON 1013, ECON 1023 or ECON 1014, ECON 1024 if not taken in the first year, ECON 3103 and ECON 3023, plus CS 1003 or CS 1073.

Third and Fourth Year

ESCI 3131, ESCI 3322, ESCI 3482, ESCI 4312, ESCI 4442, ESCI 4461, ESCI 4472, ECON 3013, ECON 3023 if not taken in the second year, ECON 3665, ECON 3755, ECON 3794, ECON 4013, ECON 4023, plus a minimum of 2 term courses in Economics, and a minimum of 4 additional approved term courses.

Students in the Honours program must take ESCI 4900 in addition.

EARTH SCIENCES-PHYSICS OPTION

The program totals 148 ch for Major and 156 ch for Honours. This includes 12 ch of Earth Sciences field schools which take place outside of regular fall and winter terms. The fourth year has a lighter credit hour course load.
SECTION G: FREDERICTON ACADEMIC PROGRAMS

than third year to accommodate the addition of an Honours Project in fourth year. Students in a Major program may prefer to move some of the courses listed under third year into fourth year to even out the course load.

First Year
ESCI 1001, ESCI 1006 or ESCI 1026, ESCI 1012, ESCI 1017, PHYS 1061 or PHYS 1071, PHYS 1062 or PHYS 1072, PHYS 1091 and PHYS 1092, MATH 1003 or PHYS 1053, PHYS 1013 or PHYS 1063, CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017.

NOTE: Students must have already completed MATH 1013 or equivalent before entering the second year of this program.

Second Year
ESCI 2131, ESCI 2142, ESCI 2211, ESCI 2321, ESCI 2703, PHYS 2311, PHYS 2312, PHYS 2372, MATH 2003, MATH 2013 plus 5 ch approved electives in Science or Computer Science.

Third Year
ESCI 3131, ESCI 3322, PHYS 2327, PHYS 2331, PHYS 2341, PHYS 2351, PHYS 3331, PHYS 3336, CS 3113 or MATH 3413 or equivalent plus 3 ch approved electives in Science or Computer Science.

Fourth Year
ESCI 3703, ESCI 4501, ESCI 4512, PHYS 3322, PHYS 3342, PHYS 3351, 4332, PHYS 4722 or PHYS 4823, plus 6 ch approved electives in Science or Computer Science.

Students in the Honours program add an honours project, PHYS 4383 or ESCI 4900.

MATHEMATICS/STATISTICS - ECONOMICS OPTION
The combination of mathematics, statistics and economics is a natural one as students will see practical applications of mathematics and statistics in their economics courses and the rigorous techniques from mathematics will aid students in their problem-solving skills. Requirements for a Science degree are listed below. Requirements for an Arts degree are available from either the Department of Mathematics and Statistics or the Department of Economics.

First Year
First year required courses are listed under the BSc general regulations. MATH 1013 or MATH 1063 must be included. CS 1003 or CS 1073, one of ECON 1014 and ECON 1024 or ECON 1013 and ECON 1023 may be taken in first or second year.

Second Year
MATH 2003, MATH 2013, MATH 2203, MATH 2213, ECON 1013, ECON 1023, CS 1003 or CS 1073 (if not taken in first year), plus approved electives to bring the course load to a minimum of 30 ch.

Third and Fourth Years
1. MATH 3003, MATH 3043, and two courses chosen from MATH 3033, MATH 3073, MATH 3213, MATH 3243, MATH 3373, MATH 3473, MATH 3803, MATH 3843, MATH 4423, MATH 4433 or MATH 4853.
2. STAT 3083, STAT 3093, STAT 4443, and three courses chosen from STAT 4083, STAT 3383, STAT 4053, STAT 4073 or STAT 3373.
3. ECON 3013, ECON 3023, ECON 4013, ECON 4023, ECON 4625, ECON 4665, plus at least 3 additional term courses in Economics.
4. An additional 9 ch of electives so that the total in third and fourth year is 66 ch. The minimum total number of credits for the degree is 135 ch.

Recommended electives: MATH 3413, MATH 3813, and any of the courses listed above.

Honours Requirements
MATH 3103 and MATH 3113 must be taken and MATH 3003 becomes an elective course. Honours students must take a total of 33 ch of upper level MATH/STAT courses. The minimum GPA for an honours degree from the Faculty of Science is 3.0.

NOTE: Some year-to-year variation in Economics course selection is possible. For example a student taking ECON 1014, ECON 1024 in year 1 may wish to take ECON 3013, ECON 3023 in year 2.

MATHEMATICS-PHYSICS OPTION
Both the Major and Honours versions of this option are demanding programs intended for strong students. The Honours Mathematics-Physics Program includes all the required courses of both an Honours Physics program and an Honours Mathematics program.

First Year
MATH 1003 or MATH 1053, MATH 1013 or MATH 1063, PHYS 1061 or PHYS 1071, PHYS 1062 or PHYS 1072, PHYS 1091 and PHYS 1092, CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017, plus two more term courses chosen from BIOL 1001, BIOL 1012, ESCI 1001, ESCI 1012, plus 6 ch of electives.

HONOURS PROGRAM (160 ch)
Second Year
MATH 2003, MATH 2013, MATH 2203, MATH 2213, PHYS 2311, PHYS 2327, PHYS 2331, PHYS 2341, PHYS 2351, PHYS 2372, CS 1003 plus 3 ch Physics elective.

Third Year
MATH 3033, MATH 3103, MATH 3113, MATH 3243, MATH 3213, MATH 3342, MATH 3413, MATH 3073, PHYS 3322, PHYS 3336, PHYS 3351, plus 3 ch Physics elective.

Fourth Year
MATH 3043, STAT 3083, PHYS 4321, PHYS 4332, PHYS 4351, PHYS 4371, plus 3 ch Mathematics elective, plus 6 ch other electives; and finally either MATH 4100 or Physics 4338 (6 ch or 8 ch). (In either case, the research project will be jointly supervised by a reader from each Department.)

MAJOR PROGRAM (152 ch)
Second Year
MATH 2003, MATH 2013, MATH 2203, MATH 2213, PHYS 2311, PHYS 2327, PHYS 2331, PHYS 2341, PHYS 2351, PHYS 2372, PHYS 3342, CS 1003, plus 3 ch elective.

Third and Fourth Years
MATH 3243, MATH 4313, 3503, STAT 3083, PHYS 3322, PHYS 3336, PHYS 3351, PHYS 4351, PHYS 4321, PHYS 4332, 18 ch Mathematics electives*, 15 ch Physics electives, plus 6 ch electives.

* It is recommended that students choose MATH 3003 and MATH 3213 in 3rd year. Other suggested Math electives would be MATH 2203 and MATH 3033.

GENERAL SCIENCE OPTION
This option presents students with the opportunity to get a broader science exposure by concentrating on two areas of science while taking many electives. While General Science does not give a major in any discipline, it will have to meet the minimum requirement equivalent to the minor programs in two of the selected science disciplines beyond first year. This degree has largely been used by students who planned to follow it with a second degree, e.g., in education, or a health profession.

First Year (38 ch)
The first year in General Science follows the regulations for First Year Science given in the Curriculum Section under “BACHELOR OF SCIENCE”, but students must include MATH 1003 or MATH 1053 and at least a term of lectures in each of Biology, Chemistry, Earth Sciences, Physics and Economics or Psychology. Eight credit hours of coherent First Year laboratory courses are chosen to meet future prerequisite requirements.

Second, Third and Fourth Years (96 ch minimum)
A student must choose two science disciplines from Biology, Chemistry, Earth Sciences, Mathematics/Statistics, Physics and Economics or Psychology for areas of concentration. Courses chosen must be consistent with the requirement of the minor programs of the two selected disciplines above first year. The remainder of the 96 credit hours will be used for approved electives and courses required to meet the prerequisite for the core courses. The guidelines given below should be followed for choosing electives. Course selections must be pre-approved and reviewed annually by a General Science advisor.

Guideline for choosing electives:

1. A minimum of 12 ch of courses must be chosen from those offered by the Faculty of Arts, 6 ch of which must have a substantial writing component as designated with a [W] in the calendar description. Courses in History of Science and ENGL 1144 are strongly recommended electives.

2. Courses from disciplines outside of the selected concentrations that are used as Prerequisites for the core courses are regarded as electives.

3. Also acceptable as electives are additional science courses (except for those that cannot be taken for credit by Science students) and approved courses from other faculties.

DISTINCTION IN GENERAL SCIENCE
The BSc with Distinction in General Science will be awarded to students who attain a cumulative grade point average of 3.7 or greater in the General Science option.

NOTE: The General Science options on the Fredericton and Saint John campuses are different from each other. For regulations governing the General Science option offered on the Saint John campus, see the Saint John Academic Programs section of this Calendar.
BACHELOR OF MEDICAL LABORATORY SCIENCE (BMLS)

The degree of Bachelor of Medical Laboratory Science (BMLS) is offered through the Faculty of Science in partnership with the New Brunswick Community College in Saint John (NBCC-SJ). Enrolment will be limited and based on availability of seats in the Medical Laboratory Technology (MLT) program at NBCC-SJ. Students may enter the program only with approval from the Dean of Science or the program Director. The BMLS degree requires completion of the MLT program either prior to or after completion of 84 credit hours of courses at UNB. For graduation, students must have completed the UNB portion of the degree as well as 2.5 years of the MLT program at NBCC-SJ and have passed the Canadian Society for Medical Laboratory Science (CSMLS) exams required for professional practice.

NOTE: Students who already have the MLT certification from NBCC-SJ or any other Canadian MLT program can be admitted to the BMLS degree with no limitation on enrolment. Foreign students cannot be admitted to the BMLS degree due to restrictions on acceptance of foreign students at NBCC-SJ.

First Year (42ch)
• BIOL 1001, BIOL 1006, BIOL 1012, BIOL 1017, BIOL 2792
• CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017
• MATH 1003
• ESCI 1001, ESCI 1012, OR PSYC 1012, PSYC 1023, OR PHYS 1071, PHYS 1072
• STAT 2263 OR STAT 2264
• Plus:
  12 ch from the list of Science and Arts electives.

Second Year (42ch)
• BIOL 2013, BIOL 2018, BIOL 2023, BIOL 2028, BIOL 2063, BIOL 2068
• CHEM 2401
• Plus 24 ch from the list of Science and Arts electives

Total credits must equal 84 ch

List of Science Electives:
BIOL 1711 (Human Anatomy I) - 4 ch
BIOL 2501 (Pathophysiology I) - 3 ch
BIOL 2513 (Pathophysiology II) - 3 ch
BIOL 2812 (Human Anatomy II) - 3 ch
BIOL 3031 (Cell Signaling) - 3 ch
BIOL 3043 (Cell Biology) - 3 ch
BIOL 3133 (Selected Topics in Biochemistry) - 3 ch
BIOL 3162 (Developmental Biology) - 3 ch
BIOL 3261 (Microbial Physiology) - 3 ch
BIOL 3311 (Immunobiology) - 3 ch
BIOL 3493 (Introduction to Virology) - 3 ch
BIOL 3593 (Introductory Histology) - 4 ch
BIOL 3673 (General Parasitology) - 3 ch
BIOL 3801 (Animal Physiology) - 3 ch
BIOL 4182 (Embryology) - 4 ch
CHEM 2111 (Analytical Chemistry I) - 5 ch

List of Arts Electives:
ADM 1015 (Introduction to Business) - 3 ch
ANTH 3502 (Medical Anthropology) - 3 ch
PHIL 3203 (Health Care Ethics) - 3 ch
PSYC 1013 (Introduction to Psychology I) - 3 ch
PSYC 1023 (Introduction to Psychology II) - 3 ch
PSYC 2703 (Foundations of Biological Psychology) - 3 ch
PSYC 3033 (Health Psychology) - 3 ch
SOCI 2375 (Sociology of Health, Illness and Medicine) - 3 ch

Pre-Professional Preparation
It is not the policy of the Science Faculty to set out rigid pre-professional programs. Each professional school has its own entrance requirements and it is necessary that the student ascertain these requirements in order to be sure of qualifying as a candidate for admission to that particular school. UNB does offer the courses necessary to qualify a student for entrance into professional programs.

Experience has shown that, where possible, it is highly desirable for the pre-professional student to obtain a bachelor’s degree before applying for entrance to the professional school.

Students interested in meeting the entrance requirements for any professional program should meet with an assistant dean for advice before selecting their courses.

PRE-PROFESSIONAL PREPARATION
It is not the policy of the Science Faculty to set out rigid pre-professional programs. Each professional school has its own entrance requirements and it is necessary that the student ascertain these requirements in order to be sure of qualifying as a candidate for admission to that particular school. UNB does offer the courses necessary to qualify a student for entrance into professional programs.

Experience has shown that, where possible, it is highly desirable for the pre-professional student to obtain a bachelor’s degree before applying for entrance to the professional school.

Students interested in meeting the entrance requirements for any professional program should meet with an assistant dean for advice before selecting their courses.
SECTION G: FREDERICTON ACADEMIC PROGRAMS

INTERDISCIPLINARY AND CONCURRENT DEGREE PROGRAMS

BACHELOR OF ARTS AND SCIENCE (BAS)

The Faculties of Arts and Science at UNB in Fredericton are co-operating to make it possible for a student to combine Arts and Science in this four-year degree program.

This Joint Program allows students to:
- experience academic work in both Faculties before committing themselves to a specialization;
- to gain a broader and more systematic exposure to disciplines outside that specialization; and
- to prepare for subsequent degree programs that permit or encourage a broader distribution of courses; such programs include the General Science Program and various preprofessional programs leading to study in dentistry, medicine, veterinary medicine, optometry, and physiotherapy.

To be admitted to the Joint Arts and Science program, students must meet the entrance requirements for the BAS as outlined in the Admission Requirements Table under Admission Regulations.

To earn a BAS degree, students must complete the requirements of a Supplementary Major in an Arts subject and a Specialization in a Science subject. The requirements for a Supplementary Major are the same as those for one subject taken as part of a Double Major.

Within Science, students can specialize in one of the following subjects: Biology, Chemistry, Earth Sciences, Mathematics and Statistics, Physics, Economics (unless already selected as an Arts program), Psychology (unless already selected as an Arts program). Within Arts, students can select a Supplementary Major in one of the following areas: Anthropology, Archaeology, Classical Studies, Classics, Economics, Economics Studies, English, French, German, German Studies, History, International Development Studies, Classics, Media Arts & Cultures, Philosophy, Political Science, Psychology, Sociology, Spanish, Gender and Women's Studies, World Literature and Culture Studies.

Programs of Study

1. ARTS 1000 Development of Western Thought.
   - 6 term lecture courses in first-year Science (MATH 1003 or 1053 included), 4 accompanied by labs. The choice of lecture and lab courses is dictated by the particular area of Science in which the student intends to specialize, and thus decisions about which lecture and lab courses a student takes should be made in consultation with a Science Faculty advisor.

2. 6 ch (in any one discipline) chosen from either Humanities (Classics, English, History, Media Arts & Cultures, Philosophy, World Literature and Culture Studies), Languages (Ancient Greek, Chinese, French, German, Japanese, Latin, Modern Greek, Russian, Spanish,) or Social Sciences (Anthropology, Archaeology, Economics, Political Science, Psychology, Sociology).

3. 6 ch (in any one discipline) chosen from either Humanities (Classics, English, History, Media Arts & Cultures, Philosophy, World Literature and Culture Studies), Languages (Ancient Greek, Chinese, French, German, Japanese, Latin, Modern Greek, Russian, Spanish,) or Social Sciences (Anthropology, Archaeology, Economics, Political Science, Psychology, Sociology).

4. OR 1. ARTS 1100 Development of Western Thought (for Academic Success)
   - 6 term lecture courses in first-year Science (MATH 1003 or 1053 included), 4 accompanied by labs. The choice of lecture and lab courses is dictated by the particular area of Science in which the student intends to specialize, and thus decisions about which lecture and lab courses a student takes should be made in consultation with a Science Faculty advisor.

5. 3 ch (in any one discipline) chosen from either Humanities (Classics, English, History, Media Arts & Cultures, Philosophy, World Literature and Culture Studies), Languages (Ancient Greek, Chinese, French, German, Japanese, Modern Greek, Latin, Russian, Spanish,) or Social Sciences (Anthropology, Archaeology, Economics, Political Science, Psychology, Sociology).

6. The discipline should be different from any of the choices taken under regulation 2, above, since first-year students may take no more than 6 ch in any one discipline.

Second Year

1. Two additional term lecture courses in first-year Science. Whether these need to be accompanied by labs depends upon the area of Science the student has chosen to specialize in, and as such, these courses should be chosen in consultation with a Science Faculty advisor.

2. 12 ch (6 ch in each of 2 disciplines) chosen from Arts, including at least one discipline from a group (Humanities, Languages, Social Sciences) not chosen in the first year.

3. At least 18 ch of Science courses chosen in consultation with and pre-approved by the Science Faculty advisor.

Students will normally select a Supplementary Major in Arts and a Specialization in Science at this time, and should discuss the options with their Arts and Science advisors.

Third and Fourth Years

The exact content of years 3 and 4 will depend upon the particular Arts and Science areas chosen. Students take advanced courses to give them a thorough understanding of their chosen subjects and prepare them for an immediate career or further work at graduate school. Students who select to take a Single Major or Honours in Arts and/or Science may extend their program beyond the four years, depending on the subjects chosen.

1. A minimum of 36 ch total in Science chosen in consultation with, and pre-approved by, the student's Science advisor. At least half of these courses must be at the 3000 or 4000 level.

2. 36 ch total chosen in consultation with, and pre-approved by, the student's Arts Major advisor, 18 ch of which must be at the 3000 or 4000 level.

Students should note that at least half the advanced-level credits counted towards the BAS degree must be from courses taken at the University of New Brunswick. Exceptions may be considered by the Deans of Arts and Science. Students should also note that, in any given year, their course load may not be evenly balanced between Arts and Science courses. Students should plan to meet with advisors from both Faculties on an annual basis to ensure that the selected courses satisfy prerequisites for upper-level courses and take account of courses offered in alternating years, and other program requirements.

Students who enter the BAS program may opt to move into the BA program, the BSc program, or the concurrent BA/BSc program at any stage. With the exception of laboratory courses, all courses taken during the first two years can be counted towards either a BA or a BSc degree (or both). Approved specialized Science laboratory courses will count towards the BSc degree or the Concurrent Degree in Arts and Science (BA/BSc).

Instead of graduating with a BAS at the end of the four-year program, students may continue for a fifth year to earn both a BA and a BSc, two degrees, with a Major (or Honours) in an Arts discipline and a Major (or Honours) in a Science discipline - for example, BA (History) and BSc (Physics). See the following section for the five-year concurrent degree program in Arts and Science.

For further details on subjects in Arts, see the Bachelor of Arts portion of the Fredericton Programs section of this Calendar.

CONCURRENT DEGREES IN ARTS AND SCIENCE (BA/BSc)

To be admitted to the Arts and Science program, students must meet the entrance requirements of both BA and BSc degrees given in the Admission Requirements Table under Admission Regulations.

The concurrent BA/BSc program is designed as a five-year program. To receive both degrees, students need a Major (or Honours) in an Arts discipline and a Major (or Honours) in a Science discipline - for example, BA (History) and BSc (Physics).

Within Science, students can major or honour in one of Biology, Chemistry, Earth Sciences, Mathematics and Statistics, Physics, or one of the Interdepartmental programs such as Biology-Chemistry. Students may also choose as their Science subject either Economics (unless already selected as an Arts program) or Psychology (unless already selected as an Arts program). Within Arts, students can major or honour in one of the following areas: Anthropology, Archaeology, Classical Studies, Classics, Economics, Economics Studies, English, French, German, German Studies, History, International Development Studies, Classics, Media Arts & Cultures, Philosophy, Political Science, Psychology, Sociology, Spanish, Gender and Women's Studies, World Literature and Culture Studies.

In addition, interdisciplinary programs in International Development Studies, Law in Society, and Gender and Women's Studies are available as part of an Arts Double Major or Joint Honours; however, students are advised that completing a Double Major or Joint Honours in Arts will require more credit hours than a Single Major or Honours.

This program is ideal for students with a strong interest in one of the Sciences and one of the Arts disciplines. It is also demanding and requires a serious commitment from the student from the outset and throughout the degree. Its breadth makes it an excellent pre-professional program to prepare for studies in dentistry, medicine, veterinary medicine, optometry, and physiotherapy.

Students who enter the concurrent BA/BSc program may opt to move into either the BA or the BSc program at any stage. With the exception of labs, all courses taken during the first two years can be counted towards either a BA or a BSc (or both). Approved specialized Science labs count towards the BSc degree.

Students in the concurrent program may count many of their courses toward the requirements of both degrees, so it is important to select courses carefully from the outset. Students must seek advice and pre-approval from departmental/Faculty advisors of both Faculties at every level from pre-entry enquiries through to graduation.

316
Program of Study (5 Years)

First Year
1. ARTS 1000 Development of Western Thought 6 ch
2. 6 term lecture courses in first-year Science (MATH 1003 or 1053 included), 4 accompanied by labs. The choice of lecture courses and lab courses is dictated by the particular area of Science in which the student intends to major or honour, and thus decisions about which lecture and lab courses a student takes should be made in consultation with a Science Faculty advisor.
3. 6 ch (in any one discipline) chosen from either Humanities (Classics, English, History, Media Arts & Cultures, Philosophy, World Literature and Culture Studies), Languages (Ancient Greek, Chinese, French, German, Japanese, Modern Greek, Latin, Russian, Spanish), or Social Sciences (Anthropology, Archaeology, Economics, Political Science, Psychology, Sociology).
   OR
1. ARTS 1100 Development of Western Thought (for Academic Success) 9ch
2. 6 term lecture courses in first-year Science (MATH 1003 or 1053 included), 4 accompanied by labs. The choice of lecture courses and lab courses is dictated by the particular area of Science in which the student intends to major or honour, and thus decisions about which lecture and lab courses a student takes should be made in consultation with a Science Faculty advisor.
3. 3 ch (in any one discipline), chosen from either Humanities (Classics, English, History, Media Arts & Cultures, Philosophy, World Literature and Culture Studies), Languages (Ancient Greek, Chinese, French, German, Japanese, Modern Greek, Latin, Russian, Spanish), or Social Sciences (Anthropology, Archaeology, Economics, Political Science, Psychology, Sociology). The discipline should be different from any of the three taken under regulation 2, above, since first-year students may take no more than 6 ch in any one discipline.

Students will select their Science Major or Honours discipline at this point. Throughout the program, advice is available on the options and course requirements. Students should have written pre-approval from the appropriate Arts and Science advisors for all programs and course selection.

Second Year
1. Two additional term lecture courses in first-year Science. Whether these need to be accompanied by labs depends upon the area of Science the student has chosen to major or honour in, and as such, these courses should be chosen in consultation with a Science Faculty advisor.
2. 12 ch (6 ch in each of 2 disciplines) chosen from Arts, including at least one discipline from a group (Humanities, Languages, Social Sciences) not chosen in the first year.
3. At least 18 ch of Science courses (certain Science programs may require more than the minimum) chosen with pre-approval from the student's Science program advisor in the respective department.

Students will select their Arts Major(s) or Honours at this time with the help of Faculty and departmental/program advisors.

Third, Fourth and Fifth Years
The exact content of years 3, 4, and 5 will depend upon the particular Arts and Science disciplines chosen. Students take advanced courses to gain a thorough understanding of their chosen disciplines and to prepare for an immediate career or further work at graduate school. Students who elect to take Honours in Arts and/or Science may extend their program beyond the five years, depending on the subjects chosen.
1. Courses in Science will be chosen in consultation with, and pre-approved by, the student's Science advisor to meet the requirement of a Science degree.
2. A total of 54 ch of courses chosen in consultation with, and pre-approved by, the student's Arts Major advisor, 36 ch of which must be upper-level courses.

Students should note that at least half the advanced-level credits counted towards a Major/Honours/Minor in an Arts subject must be from courses taken at the University of New Brunswick. The same regulation also applies to Science courses. Exceptions may be considered by the Dean of Arts and the Dean of Science, respectively.

Students should note that, in any given year, their course load may not be evenly balanced between Arts and Science courses. Students should plan to meet with advisors from both Faculties on an annual basis to ensure that the selected courses satisfy Prerequisites for upper-level courses and take account of courses offered in alternating years and other program requirements.
Transfer Credits (Complementary Studies Courses): Students admitted with advanced standing from non-university institutions must complete a minimum of 6 ch of complementary studies courses at a university. The intention is that engineering students complete at least half of their complementary studies courses (as defined by the Canadian Engineering Accreditation Board) in a university setting. A 70% minimum is required for transferring course credit from community colleges and a minimum grade of C (or 55% in the absence of a letter grade) is required for transferring course credit from another university.

Transfer Credits (other than Complementary Studies Courses): Other courses (Science, Mathematics, Computer Science, Engineering, etc.) may be accepted for transfer credit according to accepted university practice. A 70% minimum is required for transferring course credit from community colleges and a minimum grade of C (or 55% in the absence of a letter grade) is required for transferring course credit from another university.

Options in Engineering: Most engineering students do not have to choose an option within their degree program, although there are several options available for students with particular interests. Students in Geological Engineering must choose an option. All departments offer a range of electives which provide opportunity for some degree of concentration. In order to graduate, a student must satisfy all program requirements. The following options are elaborated upon in individual program descriptions on the following pages.

- Biomedical Engineering Option
- Cadastral Surveying Option
- Computer Engineering Option
- Energy Conversion Engineering Option
- Geoenvironmental Option
- Geotechnical Option
- Mechatronics Option
- Mineral Resources Option

Engineering and the Environment: Engineering practice and environmental concerns cannot be separated; therefore topics of environmental concern are fundamental to all engineering disciplines. Engineering students interested in the environment are encouraged to choose the discipline most closely related to their interest. The following list is not all inclusive, but gives some indication of possible areas of interest.

- Air and Water Quality
- Conservation and Management of Resources
- Energy Conversion
- Energy Utilization
- Environmental Geotechnics
- Environmental Impact Assessment
- Environmental Information Systems
- Forest Dynamics
- Groundwater Development & Protection
- Hazard Mapping
- Hydrology
- Instrumentation and Control
- Integrated Renewable Resource Management
- Machine/Environment Interactions
- Mapping of Land and Water Resources
- Monitoring of Topographic Change
- Pollution Control
- Recycling
- Remote Sensing of the Environment
- Resource Operations Management
- Silviculture
- Waste Disposal
- Water and Waste Water Treatment

Students with particular interest in environmental engineering topics are encouraged to pursue a Minor in Environmental Studies, which is available for concurrent study in the Faculty of Forestry and Environmental Management.

Minor in Engineering: Further to the general regulations in Section B. V of the UNB Undergraduate Calendar, engineering students may earn a minor from another engineering program. A minor consists of at least 24 credit hours of courses which are not core courses for the student's degree. The courses used for a minor shall be chosen in consultation with the academic advisor in the student’s home program and the academic adviser in the engineering program offering the minor. Students in a BScE or BScSWE program shall have the program designation of the minor shown on their transcript. Designation of the minor shall be approved by the Office of the Dean of Engineering. Minors are elaborated upon in individual program descriptions on the following pages.

Minor in Applied Science: Non-engineering students may take engineering courses from one or several engineering degree programs for a minor in Applied Science. The minor must consist of at least 24 credit hours of engineering courses which shall be approved by the Office of the Dean of Engineering and are not core courses for the student’s degree.

1st Year Program

All students who enter Engineering directly from high school are enrolled initially as undeclared students (BSE UNDC) and take a “Common First Term” of courses:

<table>
<thead>
<tr>
<th>First Term</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 1081</td>
</tr>
<tr>
<td>MATH 1003</td>
</tr>
<tr>
<td>MATH 1503</td>
</tr>
<tr>
<td>ENGG 1001, ENGG 1003, ENGG 1015</td>
</tr>
<tr>
<td>CS 1003</td>
</tr>
</tbody>
</table>
Undeclared students may apply for early enrolment into a program any time after confirming acceptance through a tuition deposit and before the end of Fall Term classes. This “Application for Early Enrolment” must be made through the Dean of Engineering Office. The Department offering the program and the Dean of Engineering approve program enrolments.

Students strongly considering software engineering are encouraged to apply for early enrolment immediately upon submitting their tuition deposit.

Students must indicate program preferences to the Dean of Engineering Office prior to the last day of Fall Term classes. Space may be limited in some programs. Enrolment to these programs will be based on space availability and competitive assessments of academic performance after first or second terms. All students who have been accepted to the Faculty are guaranteed a program of study by the end of their first year.

Students who remain BSE:UNDc for the winter semester in their first year are encouraged to seek academic advising on courses prior to the start of Winter Term.

**General Regulations**

1. The minimum requirement for an engineering degree is the accumulation of 160 credit hours. Additional requirements may be found within the descriptions of individual programs.
2. Credit hours for courses are listed with course descriptions.
3. Students should refer to Section B of this Calendar for regulations regarding academic probation and withdrawal.
4. A minimum grade of C is required for all courses used for credit towards an engineering degree.
5. The Bachelor of Science in Engineering degree must be completed within eight calendar years of initial registration in the Faculty of Engineering. Students who do not complete their program requirements within this limit will be denied further registration in Engineering. This time limit includes all time during which a student is not in attendance either by personal choice or as a result of suspension or a requirement to withdraw. Extensions will be granted for fall or winter academic terms missed due to co-op work term placements. When a student encounters special circumstances that necessitate an absence from the University for an extended period of time, the student may apply to the Faculty for an extension to the degree time limit. Students transferring into a continuing degree program will have the time limit prorated on the basis of advance credit granted.

**Engineering faculty complementary studies electives requirements:**

a. To ensure that the spirit of Complementary Studies Electives is achieved, each Engineering student must take for credit at least one 3 ch course from one of the following humanities or social science disciplines: Anthropology, Classics, Literature (English, French, German, Spanish), History, Philosophy, Political Science and Sociology.

b. No more than 3 ch of language courses, including ENGL 1103, may be used for credit as Complementary Studies Electives. Other language courses may be taken, but they would be extra to the degree.

**Regulations for Granting a Second UNB Bachelor of Science in Engineering Degree**

BScE students or graduates of UNB may apply for admission to and follow a program towards a second engineering undergraduate bachelor’s degree. The general regulations of the University and the regulations of the degree program concerned must be satisfied.

Normally, the minimum number of credit hours which must be successfully completed beyond the work required for the first degree would not be less than the normal load of the final academic year in the degree program concerned. More than the minimum number of credit hours, or courses, may be required.

The courses taken must be approved by the Dean and the Department under which the second degree falls. The final decision on the coursework requirements for a second undergraduate bachelor’s degree shall be a matter of agreement between the Registrar and the Dean after consultation with the Chairs of Departments concerned.

The general regulation that at least half the credit hours for a degree must be taken at this University will apply.

**Co-operative Education Programs in Engineering**

The UNB Faculty of Engineering seeks to provide opportunities for students and employers to develop relationships that enhance the learning experience for students and present employers with skilled, motivated employees looking to make a career connection. To achieve this, the Faculty, through its constituent departments/programs, operates a Co-operative education program based on established partnerships with selected employers.

The Co-op team, reporting to the Director of Co-operative Education and the Dean of Engineering, liaises with the academic advisor in each department/program to ensure alignment between students’ academic and professional experience objectives. Additional oversight is provided by the Faculty of Engineering Co-op Committee, which functions like a board of directors, and, as such, influences the Co-op program’s strategies and policies. The effectiveness of the Co-op program in delivering the planned professional internship experience is closely monitored and assessed by the Co-op coordinators through interactions with the students, company personnel, and the University.

Co-operative education is available within all Engineering Programs. Work terms may be 4, 8, 12 or 16 months in duration and are generally interspersed with academic study terms. Prior to applying for Co-op jobs, students will be oriented to the process and will be assisted in preparing resumes and for job interviews.

**Co-op Program Eligibility:**

1. Students must be registered as full-time students in an undergraduate engineering degree program at UNB. Students on Co-op work terms retain their full-time status.
2. Students must have completed at least two full-time study terms in engineering prior to their first Co-op work term.
3. Approval to participate in the Co-op program must be received from the Co-op Office and from the student’s department/program.
4. All students participating in the Co-op program must be in good academic standing. Students who have completed less than 70 credit hours must have an Assessment GPA of at least 2.7.

**Co-op Work Term Requirements:**

1. Students completing the first year of engineering studies will be limited to an initial summer work term of 4 months.
2. Students completing their second year of full-time engineering studies are limited to work terms of 4 or 8 months.
3. Students having successfully completed at least 100 credit hours are eligible for extended work terms of 12 or 16 months.
4. A fee is charged for each 4-month portion of a work term.
5. The final term in the student’s degree program must be a full-time engineering study term at UNB.
6. When combined the total of all work terms cannot exceed 24 months.
7. The student’s evaluation by the employer will be taken into consideration but the final assessment on whether or not a work term has been successful will be the responsibility of the Faculty of Engineering.
8. A Co-op designation is awarded upon graduation to those students who have successfully completed work terms that total at least 12 months.

**Planning and Scheduling**

1. Work terms usually commence at the beginning of January, May, and September.
2. A schedule of work and study terms is developed by each student in consultation with the Director of Undergraduate Studies or designate for the student’s specific engineering program.

More information can be obtained from the Engineering Co-op office.

General Information
Chemical Engineering is the discipline of engineering that uses physical sciences to convert raw materials into desired products and services. A chemical engineering education includes a broad background in basic sciences and mathematics and advanced knowledge in the design and operation of process equipment used to produce fuels, plastics, petrochemicals, fertilizers, electricity, pharmaceuticals, paper, etc. This degree program prepares students for direct employment in industry and provides a strong foundation for graduate degrees in engineering, business or law. Students may complete the general program or elect to concentrate their studies on one of two option programs: Biomedical Engineering or Energy Conversion Engineering.

Curriculum
A minimum of 163 credit hours (ch) is required to obtain a bachelor's degree in Chemical Engineering. Twelve of these are technical electives and twelve are complementary studies electives. The degree program may be completed in eight terms of study. Students who participate in the Co-Operative Education (Co-Op) program normally complete the program in five years. Students may opt for a program which spans a longer period of time provided all required courses are taken. Details can be obtained by contacting the Director of Undergraduate Studies.

The credit system allows considerable flexibility in designing programs of study but unless care is exercised difficulties may arise with course scheduling. Students are requested to consult with the Academic Advisor or the Director of Undergraduate Studies if they plan to follow a program that differs significantly from the timetable shown in the Program Guide issued at the time of acceptance into the program.

Core Courses
CHE 2003 Fundamentals I - Mass Balances
CHE 2004 Fundamentals II - Mass & Energy Balances
CHE 2012 Engineering Thermodynamics
CHE 2301 Transport Phenomena in Chemical Engineering
CHE 2412 Chemical Engineering Lab I
CHE 2501 General Materials Science
CHE 2506 Materials Science Laboratory
CHE 2525 Fundamentals of Chemical Process Design
CHE 2703 Fluid & Fluid Particle Mechanics
CHE 3123 Chemical Engineering Thermodynamics
CHE 3304 Heat Transfer
CHE 3324 Unit Operations I
CHE 3332 Mass Transfer
CHE 3418 Numerical Methods & Modeling in Chemical Engineering Processes
CHE 3424 Chemical Engineering Lab II
CHE 3434 Chemical Engineering Lab III
CHE 3505 Chemical Process Design
CHE 4101 Chemical Reaction Engineering I
CHE 4601 Process Dynamics & Control
CHE 4225 Process Design Project
or
ENGG 4000 Senior Design Project
CHE 4341 Unit Operations 2
CHE 4404 Chemical Engineering Lab IV
BIOL 1001 Biological Principles I
CHEM 1982 General Applied Chemistry
CHEM 1987 General Applied Chemistry Laboratory
CHEM 2401 Introductory Organic Chemistry for Non-Chemistry Majors
CHEM 3621 Physical Chemistry II
CHEM 3886 Analytical Chemistry Laboratory for Chemical Engineers
CHEM 3897 Organic Chemistry Laboratory for Chemical Engineers
CHEM 4886 Physical Chemistry Laboratory for Chemical Engineers
PHYS 1081 Foundations of Physics for Engineers
CS 1003 Introduction to Computer Programming
ECE 1813 Electricity & Magnetism
ENGG 1001 Engineering Practice Lecture Series
ENGG 1003 Engineering Technical Communications
ENGG 1015 Introduction to Engineering Design and Problem Solving
ENGG 1082 Mechanics for Engineers
ENGG 4013 Law & Ethics for Engineers
MATH 1003 Introduction to Calculus I
MATH 1013 Introduction to Calculus II
MATH 1503 Introduction to Linear Algebra
MATH 2513 Multivariable Calculus for Engineers
MATH 3503 Differential Equations for Engineers
STAT 2503 Statistics for Engineers

Electives
Technical Electives
The Chemical Engineering degree program consists of a minimum of 12 ch of technical electives chosen from the list of courses below. Technical elective courses in chemical engineering are typically designated as a 5000 level course and are offered on a rotating basis. NOTE that not every course is offered in each academic year thus students should consult with the Department for more information on planned elective course offerings. The Department also offers two option programs within its technical elective stream: Energy Conversion Engineering, and Biomedical Engineering. These options are offered to students wishing to have an area of specialization within the chemical engineering discipline. Those who successfully complete an option will receive a special notation on their university transcript upon graduation. More information on these options is given below.
CHE 1001 Introduction to Chemical Engineering (1ch)
CHE 5234 Oil & Gas Process Engineering (3ch)
CHE 5244 Enhanced Oil Recovery Processes (3ch)
CHE 5254 Polymer Reaction Engineering & Processing (3ch)
CHE 5264 Oil Sands Technology (3ch)
CHE 5313 Energy and the Environment (3ch)
CHE 5314 Chemical Process Industries (3ch)
CHE 5413 Air Pollution Control (3ch)
CHE 5416 Bioseparations Science and Engineering (3ch)
CHE 5423 Chemical Engineering Practice School (4ch)
CHE 5522 Nanotechnology (3ch)
CHE 5714 Electrochemical Engineering (3ch)
CHE 5724 Special Topics in Chemical Engineering (1 ch)
CHE 5725 Special Topics in Chemical Engineering (2 ch)
CHE 5726 Special Topics in Chemical Engineering (3 ch)
CHE 5734 Chemical Engineering Report (3ch)
CHE 5735 Thesis (6ch)
CHE 5824 Corrosion Processes (3ch)
CHE 5834 Nuclear Engineering (3ch)
CHE 5913 Pulp Production (3ch)
CHE 5923 Papermaking (3ch)
CHE 5933 Bio-refining: Principles, Processes and Products (3ch)
BIOL 2033 Biochemistry (3 ch)
CE 5421 Water Quality and Treatment (4ch)
CE 5432 Wastewater Treatment and Pollution Control (4ch)

Complementary Studies Program
Complementary studies are an important element in engineering education. The Chemical Engineering degree program consists of a minimum of 12 ch of Complementary Studies electives satisfying each of the following core categories:
- Humanities - minimum 3ch (Sociology, Anthropology, History, Classics, Philosophy, Political Science)
- Business/Management - minimum 3ch (Administration, Tech. Management and Entrepreneurship, or select Economics courses)
- Non-Language - minimum 3ch (Humanities, Business or any PSYC, RLS, ENVS, ENR, IDS, RCLP, ARTS, WLC5)
- Other Approved - minimum 3ch (course approved by the Director of Undergraduate Studies)
The Department strongly encourages its students to obtain business-related education through the complementary studies stream and to pursue a diploma in Technology Management and Entrepreneurship, which is offered by the Faculty of Engineering. For more information on integrating this diploma with the undergraduate degree in chemical engineering, please contact the Director of Undergraduate Studies.

**Distance Education**
CHE 2501 is available by distance education.

Students wishing to take courses from any outside institution as credit towards their degree must receive approval from the Director of Undergraduate Studies prior to enrolling in the course at the outside institution.

**International Exchange Program**
The Department offers an opportunity for its students to study abroad and receive course credits towards an undergraduate degree. Students interested in international study must be in good academic standing and receive prior approval from the Department for degree transfer credit. Interested students should consult with the Director of Undergraduate Studies to obtain more information.

**Energy Conversion Engineering Option in Chemical Engineering**
The chemical engineer must include environmental stewardship as a design requirement in the conversion of energy resources into commodity products and services. This option places emphasis on emerging technologies and societal issues in the energy and environment sector within chemical engineering. The directed path consists of 1 required course, 1 complementary studies elective and 3 technical elective courses (minimum total of 15 ch) selected from the approved lists below. To participate in the option students must obtain Department approval.

**Core:**
CHE 5313 Energy and the Environment

**Complementary Studies Elective:** (1 course from the following list):
ECON 3865 Energy Economics
ENVS 2003 Introduction to Environmental Studies
ENVS 2023 Understanding Environmental Issues
ENVS 4001 Environmental Impact Assessment and Management
ENVS 4002 Stakeholder Approaches to Environmental Problem Solving
ENR 2021 Natural Resource Management, Institutions, Policy, Governance
ENVS 2023 Climate Change
HIST 3025 Technology and Society

**Technical Elective:** (3 courses from the following list):

**NOTE:** Course substitutions may be permitted at the discretion of the Director of Undergraduate Studies.

CE 5421 Water Quality and Treatment (4 ch)
CE 5432 Wastewater Treatment and Pollution Control (4 ch)
CHE 5234 Oil Refining and Natural Gas Processing (3 ch)
CHE 5244 Enhanced Oil Recovery (3 ch)
CHE 5264 Oil Sands Technology (3 ch)
CHE 5314 Chemical Process Industries (3 ch)
CHE 5344 Combustion (3 ch)
CHE 5413 Air Pollution Control (3 ch)
CHE 5824 Corrosion Processes (3 ch)
CHE 5834 (3 ch) or ME 5373 Nuclear Engineering (3 ch)
CHE 5933 Biorefining: Principles, Processes and Products (3 ch)
ME 5553 Ocean Wave Energy Conversion (4 ch)
ME 5933 Industrial Ecology (3 ch)

Students with special interest in environmental studies are encouraged to pursue a minor or secondary major in this area through the university's Environmental Studies Program, administered by the Faculty of Forestry and Environmental Management. The Department also encourages interested students to pursue a Masters of Engineering degree in environmental studies after graduation.

**Biomedical Engineering Option in Chemical Engineering**
Biomedical Engineering is an exciting and growing area of specialization within the Chemical Engineering discipline. The Biomedical Engineering Option in Chemical Engineering is a study path for students wishing to pursue careers in medicine or the health sciences industry. Students who plan on attending medical school are encouraged to seek advising immediately upon entrance into the degree program.

To complete the option program, students must obtain Departmental approval and complete 12 credit hours of technical electives chosen from the list below. Only biomedical option students may use these courses towards the technical elective degree requirements.

**NOTE:** One course substitution can be made at the discretion of the Director of Undergraduate Studies.

**Required Course:**
APSC 3953 Basis of Biomedical Engineering (3 ch)

**Technical Electives:**
BIOL 2023 Biochemistry (3 ch)
BIOL 3043 Cell Biology (3 ch)
BIOL 2013 Evolutionary Genetics (3 ch)
BIOL 2073 Fundamentals of Microbiology (5 ch)
BIOL 2753 * Introduction to Human Anatomy (3 ch)
BIOL 2792 Human Physiology - Systems (3 ch)
CHEM 3003 ** Biocomputing in Drug Design I (5 ch)
CHEM 4523 Medicinal Chemistry (3 ch)
KIN 2062 * Introductory Biomechanics (3 ch)
KIN 3061 * Advanced Biomechanics (4 ch)
KIN 4163 * Workplace Ergonomic Design And Analysis (3 ch)
ME 5913 Biomechanics (4 ch)
PHYS 5993 Magnetic Resonance Imaging (3 ch)

* Some option courses require that BIOL 2753 be taken as a Prerequisite.
** Some option courses require that BIOL 1001 be taken as a Prerequisite.

Students with special interest in Biology and Biochemical Engineering are encouraged to pursue a Minor in Biology through the Faculty of Science. Such students should seek advising from the Director of Undergraduate Studies to embark upon this path as soon as possible in the degree program.

General Information
Civil Engineering deals with the systems and facilities associated with humanity's needs for shelter, work and transportation, which include: bridges, highways, airports, buildings, industrial plants, dams, housing, hydro developments, water supply, sewage and sewage disposal, and marine facilities. Civil Engineers work with other professionals to ensure that civil engineering works do not adversely affect the natural environment. The Civil Engineer can be involved in various stages of a project's life cycle, including planning, design, construction, operation, or maintenance.

Curriculum
In order to obtain a BScE degree in Civil Engineering, a minimum of 162 credit hours (ch) is required. All courses in the program must be passed with a C or better. The program consists of core courses complemented by a wide range of electives. The program is designed to be completed within eight academic terms; however, the student may arrange for a program that spans a longer time period. Although the program is flexible, care must be taken to avoid difficulties with Prerequisites and Co-requisites or with time tabling.

General Prerequisite NOTE
The following courses (or equivalents) are Prerequisites for all 3000-level or higher Civil Engineering courses: CE 1023, ENGG 1001, ENGG 1003, ENGG 1015, CS 1003, CS 1015, MATH 1003, and MATH 1503.

Areas of Specialization
Although the Department of Civil Engineering does not have formal options, students can take elective courses in addition to the required core courses in a specific area to develop a personalized program of study. For example, students interested in the environment may take up to four environmental technical electives in Civil Engineering and one Non-Civil Engineering environmental technical elective in addition to the two environmental core courses required in the program.

Core

- through the core of the Civil Engineering undergraduate program, the student is given a firm base in all aspects of Civil Engineering including the following major areas: Structural; Geotechnical; Construction; Materials; Environmental; Hydrotechnical; and Transportation. In addition to Civil Engineering studies, undergraduates are given instruction in the principles of Mechanical and Geomatics Engineering to enable them to deal intelligently with these branches of engineering in their work. Core courses are also provided by the Arts and Science faculties to give the students the necessary background in the Sciences, Mathematics, Humanities and Social Sciences. The core courses required of all Civil Engineering students are shown below.

Core Courses

- PHYS 1081 Foundations of Physics for Engineers
- CE 1023 Statics for Engineers
- CE 2023 Mechanics of Materials
- CE 2033 Structural Analysis
- CE 2113 Soil Mechanics I
- CE 2703 Introduction to Fluid Mechanics
- CE 2913 Numerical Problem Solving
- CE 2973 Civil Engineering Design I
- CE 3053 Reinforced Concrete Design I
- CE 3063 Structural Steel Design I
- CE 3123 Foundation Engineering I
- CE 3201 Transportation Engineering
- CE 3403 Environmental Engineering
- CE 3513 Materials for Civil Engineers
- CE 3603 Construction Engineering
- CE 3713 Hydraulics and Hydrology
- CE 3963 Engineering Economy
- CE 3983 Civil Engineering Design II
- CE 4993 Senior Team Design
- CHE 3901 General Materials Science
- CHE 2506 Material Science Laboratory
- CHEM 1982 General Applied Chemistry
- CHEM 1987 General Advanced Chemistry Laboratory
- CS 1003 Programming and Problem Solving for Engineers
- ECON 1073 Economics for Engineers
- ENGG 1001 Engineering Practice Lecture Series
- ENGG 1003 Engineering Technical Communications
- ENGG 1015 Introduction to Engineering Design and Problem Solving
- ENGG 4013 Law and Ethics for Engineers
- ESCI 1001 The Earth: Its Origin, Evolution & Age
- ESCI 1026 Geology Lab for Engineers
- GGE 1001 Introduction to Geodesy & Geomatics
- HIST 3925 Technology and Society
- SOC 2534 Technology and Social Change
- MATH 1003 Introduction to Calculus I
- MATH 1013 Introduction to Calculus II
- MATH 1503 Introduction to Linear Algebra
- MATH 2513 Multivariable Calculus for Engineers
- STAT 2593 Probability and Statistics for Engineers

Technical Electives

- Elective courses in four categories, as follows:
  - Category Electives: Credit Hours
    - Natural Science Elective: 3
    - Complementary Studies Elective: 6
    - Non-Civil Engineering Technical Electives: 0-4
    - Civil Engineering Technical Electives: Sufficient to bring program total to 162

Technical Electives

- The choice of Civil Engineering Technical Electives shall be subject to the approval of the Chair of the Department. Not all Civil Engineering Technical Electives may be available in any academic year.
- CE 5003 Structural Dynamics
- CE 5043 Structural Engineering
- CE 5053 Reinforced Concrete Design II
- CE 5063 Structural Steel Design II
- CE 5062 Introduction to the Finite Element Method
- CE 5073 Structural Masonry Design
- CE 5083 Structural Wood Design
- CE 5132 Foundation Engineering II
- CE 5163 Advanced Soil Mechanics
- CE 5201 Road Materials & Structures
- CE 5203 Transportation Planning
- CE 5212 Pavement Design I
- CE 5222 Traffic Engineering
- CE 5232 Transport Facility Design
- CE 5241 Infrastructure Asset Management
- CE 5411 Water Supply and Wastewater Removal
- CE 5421 Water Quality and Treatment
- CE 5432 Wastewater Treatment and Pollution Control
- CE 5463 Municipal Solid Waste Management
- CE 5503 Concrete Technology
- CE 5612 Const: Financial and Industry Issues
- CE 5623 Project Management
Non-Civil Engineering Technical Electives

The following is a partial list of acceptable Technical Electives offered by Departments other than Civil Engineering. Other courses may be elected subject to the approval of both Departments involved.

ADM 1213 Financial Accounting
ECON 5805 Transportation Economics I
ECOE 1813 Electricity and Magnetism
GGIE 2413 Mapping Concepts and Technology
GE 2022 Engineering Geology
MATH 3503 Differential Equations for Engineers
TME 3213 Quality Management
TME 3423 Technological Risk and Opportunity

Natural Science Elective

The Civil Engineering program requires 3 credit hours of approved natural science electives such as courses in Biology, Chemistry, Earth Sciences, or Physics. The following is a partial list of acceptable Natural Science Electives. Other courses may be chosen subject to the approval of both Departments involved.

APSC 2023 A Survey of 19th and 20th Century Physics
BIOL 1621 Topics in Biology I: Life on a Changing Planet
BIOL 1622 Topics in Biology II: Life on a Smaller Scales
CHEM 2421 Organic Chemistry I
ENVS 2023 Climate Change
ESCI 1012 Environmental Earth Sciences

Complementary Studies Electives

A complete Civil Engineering program requires 6 credit hours of complementary studies electives. Course selections are subject to departmental approval. At least one of the electives must be a course designated as having a substantial writing component, indicated by a [W] in the calendar description. To meet the Faculty of Engineering General Regulations for Complementary Studies requirements, at least one of the electives must be chosen from one of the following disciplines:

Anthropology, Classics, Literature, History, Philosophy, Political Science, and Sociology.

Diploma in Construction

The Department of Civil Engineering offers a Diploma in Construction. Students enrolling in the diploma program will have a wide variety of educational backgrounds, and many will possess considerable experience in the construction industry. Applicants must satisfy certain requirements for admittance to the Diploma program. The program requires a minimum total of 20 credit hours. Further details of required courses and acceptable electives may be obtained from the Department.

- Castillo-Guerra, Eduardo, BSc, MSc (UCLV), PhD (UNB), PEng, Prof - 2006

SECTION G: FREDERICTON ACADEMIC PROGRAMS

- Chang, Liuchen, BSc (N.Jiaotong), MSc (China Acad. of Railway Sciences), PhD (Qu.), PEng, Prof - 1992
- Colpitts, Bruce, BSc, MSc, PhD (UNB), PEng, Prof - 1988
- Diduch, Christopher, BSc, MSc, PhD (UNB), PEng, Prof - 1981
- Doraiswami, Rajamani, BEE (VJIT, Bombay), MEE (IIS, Bangalore), PhD (Johns H), PEng, Prof Emeritus
- Englehart, Kevin, BSc, MSc, PhD (UNB), PEng, Prof and Director Inst of Biomedical Eng -1998
- Hill, Eugene, BScE, MSCE (UNB), PhD (NC State), PEng, Hon Res Prof
- Hudgin, Bernard, BSc, MSc, PhD (UNB), PEng, Hon Res Prof
- Kaye, Mary E., BSc (UNB), MEng (Car), PEng, Prof - 1979
- Li, Howard, BEE (Zhejiang), MSc (Guelph), PhD (Wat), PEng, Prof - 2007
- MacIsaac, Dawn, BPE (McM), BEd (Qu.), BEng (McM), MSCE (UNB), PhD (UNB), PEng, Assoc Prof (Joint Computer Science -2001
- Meng, Julian, BSc, MSc, PhD (Qu.), PEng, Prof - 2002
- Narraway, John J., MSc, PhD (Cran IT), PEng, Hon Res Prof
- Parker, Philip A., BScE (UNB), MSc (St And), PhD (UNB), PEng, Professor Emeritus
- Petersen, Brent R., BEng (Car), MASc (Wat), PhD (Car), PEng, Assoc Prof - 1997
- Saleh, Sal, A.M., BSc (Bir Ziet), MSc, PhD (Memorial), P.Eng, Assoc Prof - 2011
- Sensinger, Jonathan, B.S. (UIC), MSc, PhD (Northwestern), P.Eng, Assoc Prof and Acting Director of Inst of Biomedical Eng -2013
- Scheme, Erik, BSc, MSc, PhD (UNB), P.Eng. Asst. Prof - 2016
- Shukla, Dhirendra, BEng, MSc (Bradford), MBA (Ottawa), PhD (King's College, UK), PEng, Prof - 2009
- Stevenson, Maryhelen, BEE (Ga Tech), MSEE, PhD (Stan), PEng, Prof - 1990
- Taylor, James H., BSEE, MSEE (Rochester), PhD (Yale), Professor Emeritus
- Tervo, Richard, BSc, MSc (McM), PhD (Laval), PEng, Prof - 1986
- Wilson, Adam W., BScE, MScE (UNB), PEng, Instructor - 2017

General Information

The Department of Electrical and Computer Engineering is multi-disciplinary, combining disciplines of Electrical, Computer and Software Engineering, the latter being jointly administered with the Faculty of Computer Science. The applications of Electrical and Computer Engineering are highly diversified with emphasis on the use of electrical devices and computers to solve real-world problems. Students in this program can develop expertise in renewable energy, communications, computer system design. Engineers graduated from our program experience a competitive advantage for a wide range of jobs in areas associated to industrial control, robotics, aerospace industry, cellular communication, biomedical technology, GPS systems, green power generation, smart vehicles, embedded computing, and computer games among many others. It also supports emerging research that advances technology and fosters scientific discovery.

The Department of Electrical and Computer Engineering is committed to delivering high quality programs that prepares students for successfully entering the workforce to become Professional Engineers or pursuing graduate studies. A foundation is first developed in mathematics, science and engineering. In their final year, students are then introduced to more specialized topics and broaden their knowledge by choosing a number of elective courses in Electrical and Computer Engineering or in related areas such as Biomedical Engineering, Computer Science and other Engineering disciplines. Some elective combinations can be formally recognized on the transcript through completion of an option. The program also makes available courses in cultural subjects that provide an awareness of social and professional perspectives both as individuals and as future engineers.

The Department of Electrical and Computer Engineering believes strongly in the value of relevant industrial experience. The Department endorses the Co-op program and students who wish to gain industrial experience are strongly encouraged to participate in an internship program. Student planning to take Co-op are advised to consult with a program coordinator and/or advisor.

Required Courses

A minimum grade of C is required for all courses used for credit towards the BScE degree. The following is a list of the courses that are core to the program.

Required Courses

APSC 2023 Survey of 19th and 20th Century Physics
APSC 2028 Survey of 19th and 20th Century Physics Lab
CHEM 1987 * General Applied Chemistry
CHEM 1988 * General Applied Chemistry Laboratory
CS 1003 * Programming and Problem Solving for Engineers
ECE 3242 Computer Architecture

24 ch). At least four of the electives must be ECE courses from the following degree program.

Technical Elective Courses

Each student is required to take six technical elective courses (minimum of 24 ch). At least four of the electives must be ECE courses from the following list (minimum 16 ch).

ECE 3213 Advanced Software Engineering
ECE 3242 Computer Architecture

ECE 3812 Data Communications and Networking Engineering
ECE 4133 Instrumentation Design
ECE 4143 Electronic Circuit Design
ECE 4173 Devices and Circuits for VLSI
ECE 4251 Real Time Systems
ECE 4253 Digital Communications
ECE 4261 Digital System Design
ECE 4273 VLSI System Design
ECE 4323 Modern Control Systems and Applications
ECE 4333 Robotics
ECE 4343 Haptic Robotics
ECE 4433 Safety Critical System Design
ECE 4523 Communication Systems
ECE 4531 Digital Signal Processing I
ECE 4542 Digital Signal Processing II
ECE 4553 Introduction to Pattern Recognition
ECE 4623 Advanced Electrical Machines
ECE 4633 Power System Analysis
ECE 4643 Power Electronics
ECE 4813 Electromagnetics II
ECE 4823 Communications Network Engineering
ECE 4833 Microwave Engineering
ECE 4913 Independent Project
ECE 4923 Introduction to Biomedical Engineering
ECE 4943 Topics in Computer Engineering

Students are encouraged to take combinations of electives which will permit some degree of specialization in one or more of the major fields of Electrical and Computer Engineering (see table below). Technical electives may be taken in other disciplines, subject to pre-approval by the Department. For instance, a number of courses in Math, Science, Computer Science and other Engineering disciplines are eligible; of the non-ECE electives, at least one must have second year prerequisites.

Technical Elective Combinations

The following groupings of elective courses will be of value to students who wish to concentrate in specialized areas of interest.

Control & Instrumentation (Robotics, Mechatronics)

ECE 3242 Computer Architecture
ECE 3812 Data Communications and Networking Engineering
ECE 4133 Instrumentation Design
ECE 4251 Real Time Systems
ECE 4261 Digital System Design
ECE 4323 Modern Control Systems and Applications
ECE 4333 Robotics
ECE 4343 Haptic Robotics
ECE 4433 Safety Critical System Design
ECE 4531 Digital Signal Processing I
ME 2003 Dynamics for Engineers
ME 4683 Mechatronics

ECE 3812 Data Communications Engineering
ECE 4133 Instrumentation Design
ECE 4433 Safety Critical System Design
ECE 4531 Digital Signal Processing I
ECE 4633 Power System Analysis
ECE 4643 Power Electronics
ECE 4623 Advanced Electronic Machines

Signal Processing (Filtering, Sensors)

ECE 4133 Instrumentation Design
ECE 4523 Communication Systems
ECE 4531 Digital Signal Processing I
ECE 4542 Digital Signal Processing II
ECE 4253 Digital Communication
ECE 4523 Communications Systems
ECE 4813 Electromagnetics II
ME 5283 Micro/Nano Manufacturing (3ch)*
KIN 4281
KIN 4163
KIN 4162
KIN 4161
KIN 4063
KIN 3252
KIN 3161
KIN 3081
KIN 3061
KIN 3042
KIN 2072
KIN 2062 Intro. To Biomechanics (3ch)
EE 6913
ECE 4553
ECE 4523
ECE 4531 Digital Signal Processing I
ECE 4823 Communications Network Engineering
ECE 4823 Microwave Engineering
**Biomedical Engineering Option in Electrical Engineering**
Biomedical engineering is the application of engineering principles to biological systems. This ECE option explores applications of Electrical Engineering that are ideally suited for biomedical use. The purpose of the option is to give students experience with biomedical terminology and ways of thinking, such that they are familiar with the topics they would need to learn in an advanced degree in order to work with health-care providers, biomedical companies, and solve important problems that pertain to our health and well-being.

Students may not enroll in the option until they have completed 80 ch, although they are encouraged to integrate appropriate coursework (including Prerequisites) into their broader plan. Courses chosen to count towards the option must be approved by the option coordinator. Enrollment in this option will likely result in an extra term; students must ensure coursework schedules.

The option compromises a project-based course in the area of biomedical engineering (described in section A below) along with 20 credit hours from UNB courses described in sections B-C below. Some of these courses taken as part of the option may also be used as technical electives in the EE program.

Students must complete:

A. One of the ECE 4040, TME 4025, SWE 4040, ENGG 4025 or ECE 4913 with a biomedical application.
B. One of the APSC 3953 Basis of Biomedical Engineering (3ch) or ECE 4923 Intro to Biomedical Engineering (4ch)
C. The remaining credit hours (16 or 17) must be selected from the following courses. An asterisk denotes highly recommended.

**BIO** 1719 Human Analogy (4ch)
**BIO** 2792 Human Physiology (3ch) *
**BIO** 3031 Cell Signalling (3ch)
**BIO** 4533 Bioinformatics: Computational Analysis of Genes and Genomes (4ch)
CS 3025 Human-Computer Interaction (3ch) *
CS 4725 Introduction to Artificial Intelligence (4ch) *
ECE 4133 Instrumentation Design (4ch)
ECE 4343 Haptic Robotics (4ch) *
ECE 4433 Safety Critical Design (4ch)
ECE 4531 DSP I (4ch)
ECE 4523 Communication Systems (4ch)
ECE 4553 Introduction to Pattern Recognition (4ch) *
EE 6913 Advanced Biomedical Instrumentation (3ch) *

**KIN** 2062 Intro. To Biomechanics (3ch)
KIN 2072 Introduction to Motor Control and Learning (3ch)
KIN 3042 Disability Awareness (3ch)
KIN 3061 Advanced Biomechanics (4ch)
KIN 3081 Physiological Basis for Physical Activity (3ch)
KIN 3161 Human Factors in Ergonomic Design (3ch)
KIN 3252 Functional Human Anatomy (4ch)
KIN 3282 Physical Activity, Health and Wellness (3ch)
KIN 4041 Movement Disorders (3ch)
KIN 4063 Biomedical Instrumentation and Data Acquisition (3ch)
KIN 4072 Neural Control of Human Movement (3ch)
KIN 4161 Occupational Biomechanics (3ch)
KIN 4162 Occupational Health and Safety Ergonomists (3ch)
KIN 4163 Workplace Ergonomic Design and Analysis (3ch)
KIN 4281 Measurement and Evaluation in Exercise Science (4ch)
KIN 4165 Occupational Physiology (3ch)

ME 5283 Micro/Nano Manufacturing (3ch)*
ME 5913 Biomechanics (4ch)*

**EE** 4531 Digital Signal Processing I (4ch)*

**CS** 3025 Introduction to Pattern Recognition (4ch) *
CS 4735 Intro. to Parallel Programming (4ch)
ECE 4523 Digital Signal Processing I (4ch)*
ECE 4531 Digital Signal Processing II (4ch)*
ECE 4553 Introduction to Pattern Recognition (4ch)
ECE 4621 Digital Systems Design (4ch)
ECE 4723 VLSI Systems Design (4ch)
ECE 4333 Robotics (4ch)
ECE 4403 Software Architecture and Design (4ch)
ECE 4433 Safety Critical Design (4ch)
ECE 4531 Digital Signal Processing I (4ch)*

**Section A**: One project based course: Either ECE 4040, TME 4025 or ECE 4913 with a Computer Engineering Application.

**Section B**: Select One
CS 2033 Software Design for Engineers (4 ch)
CS 2043 Software Engineering I (4 ch)
ECE 3213 Advanced Software Engineering (4ch)

**Section C**: Option Specific Courses list (select 16 Ch). One course labelled with a P is required.

*Denotes highly recommended
P Denotes a course with a major programming content.
CS 1083 Introduction to Computer Programming II (4ch)
CS 2053 Intro. to Game Development (4ch) P
CS 2063 Intro to Mobile Application Development (4ch) P
CS 2333 Computability and Formal Languages (4ch) P
CS 2383 Data Structures and Algorithms (4ch)* P
CS 3413 Operating Systems I (4ch) P
CS 3873 Net-Centric Computing (4ch)
CS 4405 Operating Systems II (4ch) P
CS 4735 Intro. to Parallel Programming (4ch)
ECE 3242 Computer Architecture (4ch)*
ECE 3812 Data Communications and Networking (4ch)*
ECE 4133 Instrumentation Design (4ch)
ECE 4251 Real Time Systems (4ch)* P
ECE 4253 Digital Communications (4ch)
ECE 4261 Digital Systems Design (4ch)
ECE 4273 VLSI Systems Design (4ch)
ECE 4333 Robotics (4ch)
ECE 4433 Safety Critical Design (4ch)
ECE 4531 Digital Signal Processing I (4ch)*
ECE 4553 Introduction to Pattern Recognition (4ch)
ECE 4823 Communications Network Engineering (4ch)
INFO 1103 Data and Information Management (4ch)
INFO 3403 Information Systems Administration (4ch)
MATH 2203 or CS 1303 Discrete Mathematics or Discrete Structures (3ch or 4ch)
SWE 4023 Software Evaluation Maintenance (4ch)
SWE 4103 Software Quality and Project Management (4ch)
SWE 4403 Software Architecture and Design (4ch) P

**Recommended Program**
The program allows completion of degree requirements in eight terms. However, a significant number of students plan to take nine or ten terms to reach graduation, using the extra time to master the material more thoroughly or to take extra courses. Students planning to take longer than eight terms are advised to plan well ahead and to consult with faculty in order to minimize problems arising from timetabling restrictions and prerequisite requirements. The General Regulations of the Faculty of Engineering, including minimum credit hour requirements that are listed under Bachelor of Science in Engineering, apply to the Electrical Engineering program.
Minor in Electrical Engineering

A Minor in Electrical Engineering is offered to students registered in degree programs in the Faculty of Engineering other than Electrical Engineering and comprises 8 courses with a minimum of 24 credit hours of ECE courses which are not core courses for the student’s degree. ECE 2214/ECE 2215, ECE 2722, ECE 3111, and one of ECE 3221, ECE 3312, ECE 3511, ECE 3612, or ECE 3821 must be taken for the minor. At least one additional course must be at the third-year level. The selection of courses to complete the remaining credit hours must be approved by the Department of Electrical and Computer Engineering in conjunction with approval of the required courses described above. ECE courses, including those from the selection above, will not be approved if they overlap substantially in content with non-ECE courses taken in the student’s primary degree. The selection may not include ECE 2412.

General Information

Geological Engineers play key roles in the exploration, protection, and responsible development of Earth’s water, mineral, and hydrocarbon resources. They also ensure that structures such as bridges, dams and buildings are designed for long term stability and safety, taking geological conditions and hazards into account. The profession is distinct amongst engineering disciplines for the opportunities it affords for travel and work in the natural environment, and for the atmosphere of adventure and discovery that accompanies geological exploration at all scales.

Geological engineers require skills and tools to “see” beneath the surface and predict the behaviour of highly variable earth materials. To this end, they draw on the field methods, powers of observation, analytical techniques, and remote sensing tools employed by geoscientists, and incorporate engineering approaches to materials testing, modelling, structural design and risk assessment. They must integrate a wide variety of data with knowledge of geological and geotechnical processes in order to make informed recommendations and decisions. As team players, frequently working with geologists or civil engineers, geological engineers also require good communication and people skills.

Examples of engineering works with significant geological engineering components include mines, dams, bridges, building foundations, highways, slope stabilization projects, landfill and wastewater treatment sites, waterways and port facilities. Geological engineers also conduct environmental impact assessments, and remediate contaminated sites. In the oil and gas and mining industries, they are responsible for locating and evaluating resources hidden far below the Earth’s surface and for developing hydrocarbon reservoirs and mineral deposits efficiently and responsibly.

Program

The Geological Engineering Program is delivered jointly by the Department of Civil Engineering and the Department of Earth Sciences at UNB and offers three options: Geoenvironmental, Geotechnical, and Mineral Resources. Each option is built on a common core of courses which provides education in the basic sciences and engineering principles required for the profession as well as exposure to important aspects of oral and written communications, engineering design, economics, law, and professional practice. Skills in field work and team work are developed through two geoscientific field schools and through a capstone team design project. Students tailor their program of study through the choice of technical and complementary studies electives and, most significantly, by their choice of a program option.

The Geoenvironmental Option involves additional environmentally-oriented courses in civil engineering, geochmistry, biology and geology. Graduates are thus better trained to work in the environmental field on projects such as environmental impact assessments, waste disposal, and the management of surface and ground water quality and supplies.

The Geotechnical Option involves additional courses on the behaviour of earth materials and their impacts on people and infrastructure. Courses designated for this option prepare the student for assessments of geological hazards and groundwater supplies and for involvement in the design of major structures such as bridges, offshore installations and waste-disposal facilities.

The Mineral Resources Option involves additional courses that address applied scientific, economic and environmental aspects of the discovery, extraction, utilization, and management of mineral deposits.

The Geological Engineering BScE degree program entails 163 credit hours for the Geoenvironmental Option, 161 credit hours for the Geotechnical Option, and 161 credit hours for the Mineral Resources Option in classes plus an additional 10 credit hours taken in the form of two field camps that are held in the spring or late summer outside the normal teaching terms. The program is intended for completion within 8 terms. Students should pay special attention to the course sequences and Prerequisites when selecting their courses for any term. Some upper year courses are offered in alternate years. Advice concerning course selection and sequencing should be sought from the Director of the Geological Engineering Program.

Graduates of this program will be eligible for registration in Canadian associations of professional engineers.

Common Core

PHYS 1081 Foundations of Physics for Engineers
CE 1023 Statics for Engineers
CHEM 1982 General Applied Chemistry
CHEM 198 General Applied Chemistry Lab
CE 2023 Mechanics of Materials
CE 2113 Soil Mechanics I
CE 2703 Introduction to Fluid Mechanics
CE 2913 Numerical Problem Solving
CE 2973 Civil Engineering Design I
CE 3713 Hydraulics & Hydrology
CE 3963 Engineering Economy
CE 3983 Civil Engineering Design II
CE 3603 Construction Engineering I
CS 1003 Programming and Problem Solving for Engineers
ENGG 1001 Engineering Practice Lecture Series
ENGG 1003 Engineering Technical Communications
ENGG 1015 Introduction to Engineering Design and Problem Solving
ENGG 4013 Law and Ethics for Engineers
GE 1026 Geology Lab for Geological Engineers
GE 2022 Engineering Geology
GE 4993 Senior Team Design
GE 5753 Engineering Hydrogeology
ESCI 1001 The Earth: Its Origin, Evolution and Age
ESCI 2131 Earth and Planetary Materials
ESCI 2142 Mineralogy and Petrology
ESCI 2211 Sedimentology I: Process, Product and Stratigraphy
ESCI 2321 Structural Geology I
ESCI 2602 Principles of Geochemistry
ESCI 2703 Field School
ESCI 3131 Origin of Igneous and Metamorphic Rocks
ESCI 3411 Rock Mechanics
ESCI 4512 Applied Geophysics II
GGE 1001 Introduction to Geodesy & Geomatics
MATH 1003 Introduction to Calculus I
MATH 1013 Introduction to Calculus II
MATH 1503 Introduction to Linear Algebra
MATH 2513 Multivariable Calculus for Engineers
STAT 2503 Probability and Statistics for Engineers

Geoenvironmental Option

1. Compulsory Courses

BIOL 2003 An Introduction to Ecology
CE 3403 Environmental Engineering
ESCI 3442 Environmental Geology
ESCI 3631 Geochemistry of Natural Waters
ESCI 3713 Environmental Geology Field School
2. Complementary Studies Electives (9 ch)
3. Technical electives (8 ch): Suggested technical electives are listed below. Other courses may be selected subject to the approval of the GE Program Director.

### Complementary Studies Electives
A complete Geological Engineering program requires 9 credit hours of complementary studies electives. Course selections are subject to Program Director’s approval, and also must meet the Faculty of Engineering General Regulations for Complementary Studies requirements. At least one of the electives must be chosen from one of the following disciplines. Anthropology, Classics, Literature, History, Philosophy, Political Science, and Sociology.

### Geomatics Engineering Department

#### Adjunct Professors
- Al-Tahir, Raid, BSc (Baghdad), MSc (OSU), PhD (OSU), Adjunct Prof - 2012
- Kim, Donghyun, BS, MS, PhD (Seoul National), Adjunct Prof - 2002
- Komijathy, Attila, Dipl. Eng. (Miskolc), PhD (UNB), Adjunct Prof - 2012
- Szostak-Chrzanowski, Anna, MSc (Warsaw), MEng (UNB), PhD (Krakow), PEng - Adjunct Prof - 2000

#### Emeritus Professors
- Chrzanowski, Adam, Dipl.Eng., MSc, PhD (Krakow), Dr.h.c (Olsztyn), Dr.h.c. (Krakow), PEng, Prof Emeritus - 1998
- McLaughlin, John D., BScE, MScE (UNB), PhD (Wis.), PEng, Prof Emeritus and President Emeritus - 1972
- Nicholas, Susan, BSc (Acad), MEng, PhD (UNB), PEng, Prof (1992), Prof Emerita - 2014
- Vanick, Petr, Geodetic Eng. PhD (Prague), PEng, Prof (1971) - Prof Emeritus - 2001
- Wells David, BScE (Mt. Alli), MScA (BrCol), PhD (UNB), PEng (1980), Prof Emeritus - 1999

#### General Information
The Geomatics Engineering program is offered by the Department of Geodesy and Geomatics Engineering. Interesting and challenging professional careers in land or cadastral surveying, engineering surveying, mapping, photogrammetry and geodesy are open to graduates. They can find positions with federal, provincial and municipal government agencies, with the oil, gas and mining industries and with numerous private organizations, such as photogrammetric mapping firms, geotechnical and geophysical exploration companies and consulting engineers, or they can be self employed as professional engineers or registered land surveyors.

A variant of the concept of cooperative education has been adopted in the Geomatics Engineering Program. Cooperative education is based upon the principle that a sound academic program combined with relevant technical experience can provide the most effective professional development during the undergraduate years. With this in mind, undergraduate geomatics students are required to obtain at least six months relevant practical experience, prior to graduation. Many geomatics organizations have agreed to participate in this program. The Department will make available to the students a list of organizations that provide the opportunity for appropriate experience. Students will then be responsible for selecting and negotiating suitable placement.

#### Curriculum
With a minimum of 120 credit hours (ch) in the program, students are required to complete:
- a. a core of Mathematics, Computer Science, General Science, and geomatics engineering (GGE) subjects;
- b. a minimum of 11 ch of approved technical electives, with at least two GGE 5000 level courses.

Credit hours for courses are listed in the course descriptions portion of the calendar.

A minimum grade of C is required for all courses to be used as credit toward the degree.

Students who have previous post-secondary educational efforts are advised to write to the Chair of the Department for information on credits that may be awarded.

Students who wish to academically prepare to become professional land surveyors, but not professional engineers, should follow the Cadastral Surveying Option outlined below.

The program has been designed to be completed in 6 terms, with reasonable course loads. Students may proceed at a slower rate but all requirements must be completed within 8 consecutive years. Detailed program information is available from the Department.

#### Courses
Descriptions of courses offered by the various Departments are given in the "Fredericton Courses" Section of this Calendar.

- **Core Courses (all required):**
  - CE 3963 Engineering Economy
  - CS 1003 Programming and Problem Solving for Engineers
  - CS 3113 Introduction to Numerical Methods
Technical Electives

- GGE 5011 Oceanography, Tides, & Water Levels
- GGE 5012 Marine Geology & Geophysics
- MATH 5022 Precision Surveying
- MATH 5042 Kinematic Positioning
- MATH 5131 Special Studies in Adjustments
- MATH 5222 Gravity Field in Geomatics
- MATH 5242 Global Navigation Satellite Systems for Geodesy
- MATH 5322 Digital Image Processing
- MATH 5341 Advanced Technologies in Remote Sensing
- MATH 5401 Geospatial Development
- MATH 5402 Geospatial Databases
- MATH 5403 Web Mapping Geospatial Web Services
- MATH 5405 Introduction to Big Data & Data Science
- MATH 5415 Real-Time Mobility Data Analytics
- MATH 5521 Survey Law
- MATH 5833 Land Use Planning for Geomatics
- MATH 5701 Special Studies in Geomatics I
- MATH 5702 Special Studies in Geomatics II
- MATH 5703 Special Studies in Geomatics III

Other technical electives may be taken in Engineering, Science, Computer Science, or Forestry, subject to Departmental approval. Students are cautioned that not all technical electives may be offered every year.

In addition to the above list, a minimum of 6 ch of complementary studies electives is also required. These require approval by the Department.

### Cadastral Surveying Option within Geomatics Engineering

Students who complete a Bachelor of Geomatics at UNB with the two specified technical electives (GGE 5521 and GGE 5833), as well as either GGE 4022 or GGE 5022, will have the following notation placed on their UNB transcripts: “COMPLETED CADAstral SURVEYING OPTION.”

This option has been accredited by the Canadian Board of Examiners for Professional Surveyors.

### Diplomas in Geomatics

The Department of Geodesy and Geomatics Engineering offers programs leading to diplomas in the areas of specialization of Cadastral Studies, Engineering and Exploration Surveying, Geodetic Surveying, Land Information Management, and Mapping and Geographic Information Systems (GIS). These programs offer an opportunity for practicing surveyors and other technical professionals to gain a thorough understanding of the theory and principles of specific applications of new technologies and methodologies. Each program area consists of selected courses as regularly offered in the undergraduate program. A total of at least 30 credit hours of specified and elective courses is required in each program. All of the courses in these programs are degree-credit courses. Those who successfully complete a diploma program and who are subsequently admitted to a degree program may receive credit for them. Students enrolled in a diploma program will be subject to all relevant university undergraduate regulations and to the General Regulations of the Faculty of Engineering.

It is recommended that applicants to the Diploma program have successfully completed a program of technology, of at least two years, which should have included or have been supplemented with courses in calculus, computer science, and probability and statistics at a level equivalent to first year university. It is important that applicants have a working knowledge of these three subject areas and have at least three years of relevant work experience (at least one of which should be as a party chief or equivalent).

### Cadastral Studies

- GGE 2501 Land Administration I
- GGE 3342 Imaging & Mapping
- GGE 4111 Introduction to Adjustment Calculus
- GGE 4122 Advanced Adjustment Calculus
- GGE 4211 Geodesy II
- GGE 4313 Airborne Mapping Systems
- GGE 4423 Advanced Geographic Information Systems
- GGE 4512 Land Administration II
- GGE 4700 Design Project and Report
- MATH 1013 Introduction to Calculus
- MATH 1003 Introduction to Calculus I
- MATH 1004 Introduction to Calculus II
- MATH 1034 Introduction to Linear Algebra
- MATH 2513 Multivariable Calculus for Engineers

### Geodetic Surveying

- GGE 3342 Imaging & Mapping
- GGE 4111 Introduction to Adjustment Calculus
- GGE 4122 Advanced Adjustment Calculus
- GGE 4211 Geodesy II
- GGE 4313 Airborne Mapping Systems
- GGE 4423 Advanced Geographic Information Systems

### Land Information Management

- GGE 3423 Introduction to Geographic Information Systems
- GGE 4222 Advanced Surveying
- GGE 4423 Advanced Geographic Information Systems
- GGE 4512 Land Administration II
- GGE 4700 Design Project and Report
- MATH 1013 Introduction to Calculus
- MATH 1003 Introduction to Calculus I
- MATH 1004 Introduction to Calculus II
- MATH 1034 Introduction to Linear Algebra
- MATH 2513 Multivariable Calculus for Engineers

### Mapping and Geographic Information Systems

- GGE 3423 Introduction to Geographic Information Systems
- GGE 4111 Introduction to Adjustment Calculus
- GGE 4122 Advanced Adjustment Calculus
- GGE 4211 Geodesy II
- GGE 4313 Airborne Mapping Systems
- GGE 4423 Advanced Geographic Information Systems
Minor in Geomatics

A Minor in Geomatics is offered to students in programs of study other than Geomatics Engineering and comprises a minimum of 24 credit hours (ch) of GGE courses. Normally a background in Calculus (e.g., MATH 1003, MATH 1013), Statistics (e.g., STAT 2593), Linear Algebra (e.g., MATH 1503, MATH 2513 or MATH 2213), and Computer Science (e.g., CS 1003 or CS 1073) would be a prerequisite to the Minor. GGE 1001 (5 ch) must be taken for the Minor. The remaining minimum of 19 ch may be chosen from other GGE courses with the following collections of courses as recommended areas of concentration. Other combinations of courses may be arranged with approval by the Department prior to starting the Minor.

**Land Administration and Information Management:** GGE 2423 or GGE 3423, GGE 2501, GGE 4512, plus at least 8 ch of approved GGE course(s).

**Mapping and Geographic Information Systems:** GGE 2012, GGE 2013, GGE 3042, GGE 4211.

**Hydrography and Oceanography:** GGE 3342, GGE 3353, GGE 5011, GGE 5012, plus at least 1 ch of approved GGE course(s).

**Positioning:** GGE 2012, GGE 2013, GGE 3042, GGE 3202, GGE 4211.

**MECHANICAL ENGINEERING**

- Hussein, Esam M.A., BSc, MSc (Alexandria), PhD (McM), PEng, Honourary Research Prof - 1984, Prof Emeritus - 2015
- Jeans, Tiger, BScE (UNB), MSc (Toronto), PhD (UNB), PEng, Associate Prof - 2010
- Kalamkarov, Alexander, BSc, MASc, PhD (Moscow), DSc (Academy of Science, Moscow), P.Eng, Adjunct Prof - 2016
- Losier, Yves G., BScE, MScE, PhD (UNB), PEng, Senior Instructor - Theoretical Engineering and Composites, 1980
- Lyon, Donald E., BS, MS, PhD (Purdue), Prof, PEng - 1991
- Mohammadi Mohsen, BSc (IUT, Iran), MSc (Sharif, Iran), PhD (Western, Ontario), Assistant Prof - 2015
- Rogers, Robert J., BSc (Calgary), MASc, PhD (Wat), PEng, Prof Emeritus - 1977
- Saha, Gobinda, BSc (Moscow), MSc (TU Delft), PhD (Dalhousie), PEng, Associate Prof - 2015
- Simioneau, Andy, BEng, MEng, PhD (McM), PEng, Associate Prof - 2009
- Sousa, Antonio C.M., ME (Lco Marques), MSc, PhD (Manc), Fellow OE (Portugal) Prof Emeritus - 1980

**General Information**

The Department of Mechanical Engineering provides instruction leading to the degree Bachelor of Science in Engineering (BScE). The program of instruction presents a curriculum suitable to the education of engineers in the art and science of Mechanical Engineering.

The curriculum includes a core of basic Mathematics, Science, Business and Humanities subjects, and is structured around a sequence of essential Mechanical Engineering subjects and design instruction. All this provides for the academic requirements of university graduates qualified to practice Mechanical Engineering professionally; it prepares the student for a career in the profession whether involved in the design, production, or operation of mechanical equipment, industrial or power plant, or the pursuit of post-graduate study.

The central theme behind an education in Mechanical Engineering is the engineered production, transformation, conversion, transmission and control of “mechanical” energy and materials. This may involve any or all aspects of the design, manufacture, fabrication, alteration, installation, selection, specification, testing, maintenance, operation, and control of single components and machines or complete and complex systems. The Department offers some specialization in order to match these extremely broad demands to the interests of its students. In particular there are two program options: Mechatronics and Biomedical Engineering. These Options are described in detail below.

**Curriculum**

**Core Courses**

Students should note the specific academic regulations in the section “General Regulations” as outlined earlier under “Engineering”. In addition to the core courses required of all engineering students, additional required courses are provided in the areas of applied mechanics, materials, thermodynamics, heat transfer, fluid mechanics, manufacturing engineering and system dynamics, as well as the application of these courses to engineering design. The program is designed to be completed in eight academic terms, however the student may arrange for a program that spans a longer time period. Typical term-by-term course sequences may be seen on the web site: http://www.me.unb.ca

The complete requirements for the degree, including the core courses recommended for the first and second terms, are listed below. A list of Technical Electives follows the program outline. All courses must be passed with a grade of C or better.

**CHE 2501 General Materials Science**

**CHE 2506 Materials Science Laboratory**

**CHEM 1982 General Applied Chemistry**

**CHEM 1987 General Applied Chemistry Laboratory**

**CS 1003 Programming and Problem Solving for Engineers**

**CS 3113 Intro to Numerical Methods (or CE 2913 or CE 3933 or CHE 2418 or CHE 3418 or MATH 3413)**

**ECE 1813 Electricity and Magnetism**

**ECE 2863 Electric Circuits and Machines (for non-electricals)**

**ECE 2701 Electric Circuits and Electronics (for non-electricals) (or ECE 2711)**

**ENGG 1001 Engineering Practice Lecture Series**

**ENGG 1003 Engineering Technical Communications**

**ENGG 1015 Introduction to Engineering Design and Problem Solving**

**ENGG 1082 Mechanics for Engineers**

**ENGG 4013 Law and Ethics for Engineers**

**MATH 1003 Introduction to Calculus I**

**MATH 1013 Introduction to Calculus II**

**MATH 1503 Introduction to Linear Algebra (or MATH 2213)**

**MATH 2513 Multivariable Calculus for Engineers**

**MATH 3503 Differential Equations for Engineers**

**ME 1312 Computer Aided Design**

**ME 2003 Dynamics for Engineers**

**ME 2111 Mechanics of Materials I (or CE 2023)**

**ME 2122 Mechanics of Materials II**

**ME 2125 Mechanics of Materials Design Project**

**ME 2143 Kinematics and Dynamics of Machines**

**ME 2145 Kinematics and Dynamics Design Project**

**ME 2352 Design Optimization**

**ME 2413 Thermodynamics**

**ME 2415 Thermodynamics Lab**

**ME 3222 Manufacturing Engineering I**

**ME 3232 Engineering Economics (or CE 3963)**

**ME 3341 Machine Design**

**ME 3345 Machine Design Project**

329
ME 3433 Heat Transfer I (or CHE 3304)  
ME 3435 Heat Transfer I Lab  
ME 3511 Fluid Mechanics  
ME 3515 Fluid Mechanics Lab  
ME 3522 Applied Fluid Mechanics  
ME 3524 Fluid Systems and Design  
ME 3613 System Dynamics  
ME 3623 Automatic Controls I  
ME 4283 Manufacturing Engineering II  
ME 4421 Applied Thermodynamics  
ME 4424 Sustainable Energy Systems Design  
ME 4613 Mechanical Vibration  
ME 4860 Senior Design Project (or ENGG 4000 or TME 4025)  
ME 4861 Mechanical Health and Safety  
PHYS 1081* Physics for Engineers  
STAT 2593 Probability and Statistics for Engineers  

Total credit hours of core courses: 145 ch  
Complementary Studies Electives: 9 ch  
Technical Electives (see section below): 10 ch  
TOTAL CREDIT HOURS FOR DEGREE: 164 ch  

* These are first year courses, most of which are accepted for credit by other engineering programs.  

General Prerequisite NOTE:  
The Department of Mechanical Engineering strictly enforces pre- and Co-requirements. Therefore, unless students have special permission from the instructor, all students not having the necessary pre- and Co-requirement(s) will be removed from the corresponding ME course after the last day to withdraw date. This policy will be strictly enforced for all ME courses.  

Electives  
Technical Elective Courses  
In addition to the core courses, the students select at least 10 credit hours of Technical Elective courses appropriate to their interests. Courses may be selected, as available, from the following list, or any other approved technical course offered outside the Department. The availability of specific technical electives varies; students should see list of planned offerings on web site: http://www.me.unb.ca. At least 7 ch must be Mechanical Engineering electives. Courses below the 3000 level are not normally considered as suitable technical electives.  
ME 4173 Robot Kinematics  
ME 4622 Human Factors Engineering  
ME 4703 Mechanical Engineering Measurements  
ME 5133 Advanced Solid Mechanics of Composites  
ME 5173 Advanced Kinematics of Manipulators  
ME 5183 Industrial Robotics and Automation  
ME 5223 Finite Element Analysis in Engineering  
ME 5243 Machining Theory and Practice  
ME 5253 Codified Design and Failure Analysis  
ME 5283 Micro/Nano Manufacturing  
ME 5353 Fracture Mechanics  
ME 5493 Internal Combustion Engines  
ME 5503 App. of Computational Fluid Dynamics to Ind. Processes  
ME 5534 Experimental Methods in Fluid Mechanics  
ME 5553 Ocean Wave Energy Conversion  
ME 5578 Low Speed Aerodynamics  
ME 5588 High Speed Aerodynamics  
ME 5643 Automatic Controls II  
ME 5653 Predictive Control and Intelligent Sensors  
ME 5713 Nondestructive Testing  
ME 5754 Steam and Gas Turbines  
ME 5813 Special Topics in Mechanical Engineering  
ME 5833 Special Topics in Mechanical Engineering  
ME 5913 Biomechanics I  
ME 5933 Industrial Ecology  

Complimentary Studies Electives  
In addition to the core courses and technical electives, students select three courses for at least 9 credit hours of Complementary Studies Elective courses. One of the courses has to be either HIST 3025 or SOCI 2534 or ICS 2001 for Saint John students or an equivalent with approval from the Department. At least 3 ch must be "humanities". A very wide range of elective courses is available. Students are encouraged to take a sequence of courses in one area rather than just entry-level courses. See the Faculty of Engineering General Regulations for restrictions in the selection of Complementary Studies Electives. A list of suggested Complementary Studies Elective courses, as well as their regulations, is available on the web site: http://www.me.unb.ca.  

Mechatronics Option in Mechanical Engineering  
Mechatronics is an integrated approach to mechanical, electronic and computer engineering for the design of “smart” products and “intelligent” manufacturing systems. This option permits interested students to increase their understanding of these subjects by a selection of core and elective courses in mechanical and electrical engineering. The option normally begins in second year but may be started later.  
In order to enter this option, students must meet the following qualifications:  
1. Successful completion of 35 ch of the regular program in Mechanical Engineering.  
2. Approval of the Department. Applications to the Mechatronics Option are normally considered in August each year. Application forms are available from the Department.  

Core Courses for Mechatronics Option:  
Compared to the standard Mechanical Engineering Program, only one technical elective is required (as opposed to two for the standard program). For the Mechatronics option, ECE 2711 (Electric Circuits) is recommended instead of ECE 2701 (Electric Circuits and Electronics for Non-electricals). Also required are: ECE 2214 (Digital Logic Design), ECE 2215 (Digital Logic Design Lab), ECE 3111 (Electronics I), ME 4673 (Introduction to Mechatronics) and ME 4683 (Mechatronics Applications). The work for the senior design project course, ME 4860, will provide appropriate experience to suit the option.  

Technical Electives for Mechatronics Option:  
The normal choice of technical electives is replaced by a directed choice of one elective from the list below.  
ECE 3221 Computer Organization (4 ch)  
ECE 4323 Industrial Control Systems (4 ch)  
ECE 4333 Robotics (4 ch)  
ECE 4343 Haptic Robotics (4 ch)  
ECE 4923 Introduction to Biomedical Engineering (4 ch)  
ME 4173 Robot Kinematics (4 ch)  
ME 4703 Mechanical Engineering Measurements (4 ch)  
ME 5183 Industrial Robotics and Automation (4 ch)  
ME 5643 Automatic Controls II (4 ch)  
ME 5653 Predictive Control and Intelligent Sensors (4 ch)  
ME 5713 Nondestructive Testing (4 ch)  

Other technical elective courses may be selected with the permission of the Chair of the Department or the Director of Undergraduate Studies.  

Biomedical Engineering Option in Mechanical Engineering  
The Biomedical Engineering Option program is available to all students in Mechanical Engineering who are approved by the Department. This option will help to prepare students for careers in Biomedical Engineering or Medicine. Students interested in pursuing a career in Medicine should consult with the Assistant Dean in the Faculty of Science about what other courses, such as Biology and Chemistry, would be required in order to apply for admission to a medical school; an appropriate individual study program would then be prepared in consultation with the Director of Undergraduate Studies in the Mechanical Engineering Dept. and the Option Coordinator.  

Requirements:  
APSC 3953, Basis of Biomedical Engineering (3 ch)  
ME 4860, or Enng 4000 or TME 4025, Senior project selected to be a biomedical engineering related project. (8 ch)  

Plus at least seven credit hours of Mechanical Engineering Electives from the list below:  
ME 4173 Robot Kinematics (4 ch)  
ME 4622 Human Factors Engineering (3 ch)  
ME 4703 Mechanical Measurements (4 ch)  
ME 5173 Advanced Kinematics of Manipulators (3 ch)  
ME 5223 Finite Element Analysis (3 ch)  
ME 5622 Human Factors Engineering (3 ch)  
ME 5653/ME6003 - Predictive Control and Intelligent Sensors (4 ch)  
ME 5913 Biomechanics I (4 ch)
undergraduate and continuing education students opportunities to Technology Management and Entrepreneurship, administered by the Dr. J. Herbert Smith Centre for more information.

DIPLOMA IN TECHNOLOGY MANAGEMENT AND ENTREPRENEURSHIP

FACULTY
- Bubbar, Kush, BSc (Waterloo), MEng (Waterloo), PEng, Assistant Prof - 2018
- Foord, David, BA (Regina), LLB (Dalhousie), PhD (UNB), Assistant Prof - 2017
- Shukla, Dhirendra, BEng, MSc (Bradford), MBA (Ottawa), PhD (King’s College, UK), PEng, Prof - 2009

General Information
The Faculty of Engineering offers a program leading to a Diploma in Technology Management and Entrepreneurship, administered by the Dr. J. Herbert Smith/ACOA Chair. The mission of the program is to provide undergraduate and continuing education students opportunities to experience the realities of entrepreneurship and management in technology-based businesses and to develop the knowledge and skills necessary to be successful in business. The Diploma program consists of three core courses and two electives, totalling 15 credit hours. In selecting courses, students will be advised to develop a curriculum that builds skills in three key areas: business management, entrepreneurship, and financial literacy.

Up to twelve credit hours of required courses for the TME diploma can be shared as credit towards a degree. Each department shall determine its own maximum allowable concurrent credit hours, which may be less than, but no greater than twelve credit hours. Students who intend to complete the diploma must obtain both department and TME program approval of the courses which will be applied towards the degree and the diploma.

Applicants are encouraged to apply to the program as early as their first year of study and begin by taking elective courses. A minimum of 80 credit hours completed, or permission of the TME program Chair, is required to enroll in TME core courses. Applicants who are not full-time students may still apply for the TME Diploma (or enroll in one or more TME courses). These applicants may be requested to submit the following documents along with their TME Diploma Application:

- High School transcript;
- transcript from post-secondary institution;
- resume/curriculum vitae;
- cover letter explaining their reasons for wanting to enroll in the TME Diploma program;
- any additional supporting documents.

The TME Diploma is granted to students achieving a grade of C or better in all of three core TME courses and two approved elective courses. It may be possible to complete some TME courses online through the College of Extended Learning’s Open Access Learning Program. Please consult the Dr. J. Herbert Smith Centre for more information.

Core Courses
TME3013 Entrepreneurial Finance
TME3113 Business Planning and Strategy in an Entrepreneurial Environment
TME3213 Quality Management
TME3313 Managing Engineering and Information Technology Projects
TME3413 Technological Creativity and Innovation
TME3423 Technological Risk and Opportunity

Students must complete three of these six Core Courses.

Electives
The Dr. J. Herbert Smith Centre has a list of pre-approved electives that relate to the mission of the program. Courses may be chosen to reflect the interests of the student, subject to approval by the Chair. TME program electives offered include:

- TME1001 Introduction to Technology Management and Entrepreneurship
- Or TME 2001 Creativity, Innovation and Value Creation
- TME3346 Marketing of Technological Goods and Services
- TME3386 Special Topics in Technology Management and Entrepreneurship
- TME3913 Experiential Learning - Technology Management and Entrepreneurship
- TME 4025 Product Design and Development

Students must complete two approved electives.
BACHELOR OF SCIENCE IN ENVIRONMENT AND NATURAL RESOURCES

General Information

The Bachelor of Science in Environment and Natural Resources (BScENR) degree gives students degree options in the interdisciplinary fields of environmental studies and natural resources. The degree offers three majors: Environmental Management, Water Resources Management, and Wildlife Conservation.

BScENR graduates will learn to solve environmental and natural resource problems from a holistic, systems perspective. They will have skills required to characterize, analyze, and predict change in natural systems. Incorporating their knowledge of land, water, air, plants, animals, and people, they will be able to develop comprehensive solutions to environmental challenges that respect multiple perspectives and demonstrate appropriate stewardship of natural resources.

The BScENR program is designed to help students to acquire the following skills and abilities:

- **Technical Outcomes**:  
  - Characterize a resource, environment or system  
  - Analyze a resource, environment or system  
  - Predict change over time in a resource, environment or system  
  - Synthesize information into comprehensive solutions

- **Professional Outcomes**:  
  - Information literacy  
  - Structured problem solving  
  - Computer literacy  
  - Communication in a professional manner  
  - Respectful social interactions  
  - Managing and completing projects independently and as a team

Regulations

Students are strongly advised to read the General University Regulations, Section B of this Calendar to obtain important information not covered in the following:

1. A minimum of 140 (Environmental Management major), 139 (Water Resources major) or 141 (Wildlife Conservation major) credit hours and completion of all core courses are required for the BScENR degree.

2. All entering students of the Faculty of Forestry and Environmental Management are required to attend the orientation program as organized by the Faculty.

3. Students must consult with the Student Services Coordinator, or other designated advisor, to receive advice on course selection. Students who wish to register for more than 22 credit hours in a term must have a GPA of 3.0 or higher in the previous assessment period and obtain permission from the Assistant Dean.

4. Students will take courses in normal sequence; exceptions require a minimum 3.0 GPA average in the preceding assessment period, and permission of the Student Services Coordinator, or other designated advisor, and the instructor of the course. Courses in which a student is deficient must be taken not later than the next academic year, except by special permission of the faculty.

5. Degree requirements must be successfully completed in not more than 16 terms during a period of 8 consecutive calendar years from the date of first registration in the program. Transfer students will have the time limit prorated on the basis of advanced credit granted.

6. A minimum assessment grade point average (GPA) of 2.0 is required at the end of each year. Assessment is in May following the completion of the spring examination period and includes the preceding intersession, Summer School and Spring Extensions.

7. A student who has been required to withdraw from the program for academic reasons once, and who reapplies for admission following the withdrawal period, may be re-admitted to the program. If re-admitted, the student will automatically be on academic probation.

Failure to meet the normal academic requirements at the next time of assessment will result in final dismissal from the program. Further applications for re-admission will not be considered.

8. C grade minimum is required for all prerequisite and core courses used for credit towards the BScENR degree.

Curriculum

The core program focuses on a wide range of environmental studies with a blend of courses in basic, biophysical, social, and management sciences. In addition, students select one major from Environmental Management, Water Resources Management, and Wildlife Conservation. Opportunity for students to pursue an education of substantial personal choice is provided by elective courses that can be organized in areas of concentration leading to minors. Students may also elect to follow minors offered by other faculties, or take a general variety of courses of personal interest.

Honours Program

Students intending to take the Honours Program must declare their intent to the Assistant Dean prior to the end of the third year of their program and have a CGPA of at least 3.0. All students in the Honours Program are required to complete ENR4991 Honours Project.

To graduate in Honours, students must meet certain minimum standards in the course work beyond second year.

1. Maintain a CGPA of at least 3.0
2. Achieve a minimum grade of B- in ENR 4991

Core (Required) Courses

**Common Core**

Core courses common to all BScENR degrees are listed below. **NOTE** that there may be alternative equivalents for introductory chemistry, geology, English, and statistics courses.

- BIOL 1001 Biological Principles, Part I
- BIOL 1006 Applications in Biology, Part I
- BIOL 1012 Biological Principles, Part II
- BIOL 1017 Applications in Biology, Part II
- BIOL 2003 Introduction to Ecology
- CHEM 1303* Environmental Chemistry
- CHEM 1303* Introduction to Environmental Chemistry
- ENR 1001 Resource Management Issues, Ethics and Communications I
- ENR 1002 Resource Management Issues, Ethics and Communications II
- ENR 2021 Natural Resource Management, Institutions, Policy and Governance
- ENR 3002 Applied Environmental Management
- ENR 4020 Management Practicum
- ENR 4973 Field Camp
- ESCI 1001* The Earth: Its Origin, Evolution and Age
- ESCI 1006* Introduction to Geology Laboratory I
- FOR 1001 Introduction to Forestry
- FOR 2006 Management of Natural Systems
- FOR 2113 Introduction to Forest Wildlife Ecology
- FOR 2505 Soils for Plant Growth
- FOR 2881 GIS with Applications in Forestry and Environmental Management
- MATH 1823 Calculus for Management Sciences
- STAT 2284* Statistics for Biology

*Alternative equivalents for course may be available with approval of the Student Services Coordinator or another designated advisor.

**Majors**

Courses required for each major in addition to the above listed common core courses are shown below.

**Environmental Management Major**

Stewardship

One of the following two:

- ECON 3755 Environmental Economics

332
ECON 3766 Economics of Climate Change
ENVS 2023 Climate Change
ENVS 4001 Environmental Impact Assessment and Management
ENVS 4002 Stakeholder Approaches to Environmental Problem Solving
ENVS 5003 Environmental Management Tools
One of the following two:
FOR 3303 Photo-interpretation, Photogrammetry, and Remote Sensing in Forestry
FOR 3281 LiDAR for Forestry and Environmental Management
FOR 3457 Forest Watershed and Water Quality Management
FOR 4545 Biodiversity and Ecosystem Management
POL S 1803 The Politics of Climate Change

**Water Resources Management Major**
BIOL 3633 Biological Oceanography
BIOL 3943 Hypothesis Testing in Biology
BIOL 4773 River and Lake Ecosystems
One of the following two:
ECON 3755 Environmental Economics
ECON 3766 Economics of Climate Change
ENR 1611 Engineering Systems in Natural Environments
ENR 2114 Water Sustainability, Pratise, and Technology
ENR 2425 Plants and Environment
ENR 2531 Introduction to Hydrometeorological Systems
ENR 3000 Indigenous Issues and Perspectives in Natural Resource Stewardship
ENR 3201 Urban Hydrology and Watershed Management
ENVS 2023 Climate Change
ENVS 4001 Environmental Impact Assessment and Management
ENVS 5003 Environmental Management Tools
One of the following two:
FOR 3303 Photo-interpretation, Photogrammetry, and Remote Sensing in Forestry
FOR 3281 LiDAR for Forestry and Environmental Management
FOR 3457 Forest Watershed and Water Quality Management

**Minimum of two courses from elective list A and two from elective List B**

**Elective List A**
ENGL 1103 Clear Writing
PHIL 1101 Critical Thinking
SOCI 1525 Introduction to Indigenous Experience
SOCI 1583 Current Social Issues
POL S 1803 Politics of Climate Change
TME 2001 Creativity, Innovation, and Value Creation
LWSO Law and Society
PHIL 2203 Ethical Issues in Business
PHIL 3208 Environmental Ethics
SOCI 3553 Sociology and the Environment
POL S Topics in Environmental History and Politics

**Elective List B**
ESCI 2211 Sedimentology
CE 2703 Introduction to Fluids
Either of the following two if the other was taken as part of the core
FOR 3303 Photo-interpretation, Photogrammetry, and Remote Sensing in Forestry
FOR 3281 LiDAR for Forestry and Environmental Management
CE 3403 Environmental Engineering
ESCI 3242 Geohydrology
BIOL 3633 Invertebrate Zoology
BIOL 4351 Climate Change and Environmental Responses
BIOL 4443 International Ecology Field Course
BIOL 4741 Fish Biology
FOR 4545 Biodiversity and Ecosystem Management
Either of the following two if the other was taken as part of the core
CE 5421 Water Quality and Treatment

**Section G: Fredericton Academic Programs**

**Wildlife Conservation Major**
Total number of credit hours from required courses (93 ch) and selections from constrained electives (27-34 ch) must equal a minimum of 119 ch, (or 125 ch with Honours Thesis). An additional 21 ch of electives is required. Minimum total credit hours needed to graduate is 140.

**Required Courses (93 ch)**
In addition to those listed in the core common to all ENR majors, required courses for the Wildlife Conservation Major include the following.
FOR 2425 Autoecology of Forest Vegetation (5ch)
BIOL 2063 Biological Diversity (3ch)
BIOL 2068 Lab in Biological Diversity (4ch)
BIOL 2013 Evolutionary Genetics (3ch)
BIOL 2018 Lab in Evolutionary Genetics (3ch)
FOR 3445 Ecology of Populations and Communities (4ch)
FOR 4545 Biodiversity and Ecosystem Management
BIOL 4191 Wildlife Management (3ch)
BIOL 4233 Conservation Biology (3ch)

**Constrained Electives (ranges from 27-34 ch, depending on courses taken)**
1 of either: ESCI 1012 and Lab 1036 OR
ESCI 1001 and Lab 1006 (both 5ch).
1 of either: ENGL 1103 OR
ENGL 1144 OR
ENGL 1145 (all 3ch).
1 of either: STAT 2263 OR
STAT 2264 (both 3ch).

**Elective List A (for 6-8 credit hours, depending on courses taken)**
2 courses from the following:
Critical Thinking (PHIL 1101; 3ch)
Hypothesis Testing (BIOL 3943; 3ch)
Field Course (other than ENR 4973), or comparable directed studies (either must be approved by counselor; 3-5ch)
Conservation Genetics (FOR 4425; 3ch)
Wildlife Techniques (FOR 4655; 3ch)
Hydrometeorology (ENR 2531; 3ch)
Math Biology (BIOL 4563; 3ch)
Population Genetics (BIOL 3293; 4ch)
Photo-Interpretation, Photogrammetry, and Remote Sensing (FOR 3303; 3 ch)
Environmental Impact Assessment (ENVS 4001; 3ch)

**Elective List B (for 5-10 credit hours, depending on courses taken)**
2 courses from the following:
Vertebrate Zoology (BIOL 3703; 5ch)
Invertebrate Zoology (BIOL 3603; 5ch)
Botany (BIOL 3083; 5ch)
Ornithology (FOR 4723; 5ch)
Mammalogy (BIOL 4732; 5ch)
Fish Biology (BIOL 4741; 3ch) or Lab Studies in Fish Biology (BIOL 4746; 2 ch)
Entomology (BIOL 3883; 5 ch)
Parasitology (BIOL 3673; 3 ch) or Applied Studies in Parasitology (BIOL 4688; 4 ch)
Ethology (BIOL 3873; 3 ch)
Wildlife Certification: Students who take a specific suite of additional courses could apply to the Wildlife Society to become a certified Associate Wildlife Biologist. The additional courses would require an extra term or two. Contact the Faculty representative for details.

**Minor Programs**
Minors in Environmental Management, Water Resources Management, and Wildlife Conservation are available. No credit hours for courses in a student’s major program may be counted towards a minor. Course substitutions may be made from time to time at the discretion of the Student Services Coordinator or designated faculty advisor.

**Minor In Environmental Management**
A grouping of courses totaling at least 24 credit hours must be taken from within from a program-specific core or required electives. Please see the Student Services Coordinator or designated faculty advisor to verify selection of courses.
Required Courses:
- ECON 3755 Environmental Economics
- ENR 2004 Social and Cultural Systems
- ENR 2021 Natural Resource Mgmt., Institutions, Policy, and Governance
- ENVS 4001 Environmental Impact Assessment

Two courses from:
- BIOL 2003 Introduction to Ecology
- ENVS 2023 Climate Change
- FOR 4545 Biodiversity and Ecosystem Management

Optional list:
- BIOL 3459 Economic Botany
- BIOL 4191 Wildlife Management
- BIOL 4233 Conservation Biology
- BIOL 4351 Climate Change and Environmental Responses
- BIOL 4773 River and Lake Ecosystems
- BIOL 4863 Environmental Biology
- CE 3403 Introduction to Environmental Engineering
- CE 5411 Water Supply and Wastewater Removal
- CHE 5313 Energy and the Environment
- ENR 2112 Environmental Physiology
- ENR 2114 Water Sustainability: Practice and Technology
- ENR 3111 Estuary and Ocean Ecosystems
- ENR 3112 Water Resource Management
- ENVS 4002 Stakeholder Approaches to Environmental Problem Solving
- ENVS 2003 Introduction to Environmental Studies
- FOR 2973 Intro to Computer Software for Data Analysis
- FOR 3313 Digital Image Processing in Remote Sensing
- FOR 4625 Integrated Management of Insects and Fungi

Choose two from:
- BIOL 3883 Entomology
- FOR 4723 Ornithology
- BIOL 4732 Mammalogy
- BIOL 4741 Fish Biology

Choose one from:
- BIOL 4191 Wildlife Management
- FOR 4655 Wildlife Investigational Techniques

Optional list:
- BIOL 2013 Evolutionary Genetics (3ch)
- BIOL 2018 Lab in Evolutionary Genetics (3ch)
- FOR 4445 Populations and Communities (3ch)
- BIOL 3083 Botany
- BIOL 2003 Introduction to Ecology
- BIOL 3541 Plant Ecology
- BIOL 3603 Invertebrate Zoology
- BIOL 3703 Vertebrate Zoology
- BIOL 3873 Ethology
- BIOL 4641 Coastal Marine Ecology
- BIOL 4746 Advanced Studies in Ichthyology
- BIOL 4746 Laboratory Studies in Fish Biology
- BIOL 4773 Aquatic Ecology
- BIOL 4851 Ecology of Marine Birds
- BIOL 4863 Environmental Biology
- BIOL 6183 River Habitats and Hydraulics
- FOR 2113 Introduction to Forest Wildlife Ecology
- FOR 3445 Ecology of Populations and Communities

Minor in Water Resource Management
A grouping of courses totaling at least 24 credit hours taken from within a program-specific core or constrained electives, including four courses from the following list:
- BIOL 4741 Fish Biology
- BIOL 4773 Aquatic Ecology
- ENR 3532 Eechydrology
- ENR 3111 Estuary & Ocean Ecosystems
- ENR 3112 Water Resources Management
- BIOL 3663 Biological Oceanography
- ENR 3201 Urban Hydrology and Water Management
- FOR 3457 Forest Watershed and Water Quality Management

Minor in Wildlife Conservation
Students must pass a minimum of 24ch (approx. 8 courses) taken from the following list of courses. A minimum of 5 courses must be selected from the required list (5 courses = minimum 17ch), as detailed below. The remaining credit hours (approx. 3 courses) can be selected from courses not already taken from the required list, or from the optional list.

Required list:
- BIOL 4233 Conservation Biology
- BIOL 2063 Biological Diversity (3ch)
- BIOL 2068 Lab in Biological Diversity (4ch)
- FOR 4425 Resource Conservation Genetics
- FOR 4545 Biodiversity and Ecosystem Management
- FOR 4625 Integrated Management of Insects and Fungi
- ESCI 1001 The earth: It's Origin, Evolution and Age
- RSS 4123 Recreation and Environment

Major Program:
A Major or Secondary Major in any of the programs (Environmental Management, Water Resources Management, or Wildlife Conservation) can be arranged between any Faculty at UNB and the Faculty of Forestry and Environmental Management, subject to the conditions given by the home faculty. Consultation and approval of the Program Directors in each faculty are required. Completion of a Major or Secondary Major usually requires between 24 to 48 credit hours of courses.
Section G: Fredericton Academic Programs

Bachelor of Science in Forest Engineering

NOTE: Admission to the Bachelor of Forest Engineering Degree Program and all related minors has been suspended effective June 1, 2010. For further information please contact the Dean of Forestry and Environmental Management.

Bachelor of Science in Forestry

The Faculty of Forestry and Environmental Management offers the degrees of Bachelor of Science in Forestry.

Faculty of Forestry & Environmental Management

General Information

Forests are a source of environmental, economic and social values for all of society. Continued maintenance of these values requires knowledge of natural dynamics at the scale of landscapes, and design skills that extend to large land areas over very long time horizons. The BScF program prepares professionals to work in complex situations where the goals of management must be determined by present society, and the actions to reach those goals must be designed for implementation over time horizons of centuries, in order that future societies will have continued enjoyment of values from forest landscapes. Graduates have the necessary skills to:

a. interact with society to define goals for the forest environment;

b. take a leadership role in the design and implementation of plans to ensure achievement of those goals;

c. help resolve social conflicts associated with issues of environmental and forested landscape management; and

d. assess changes in forested landscapes over time and present this information for public evaluation of progress and review of goals.

Regulations

Students are strongly advised to read the General University Regulations, Section B of this Calendar, for information not covered in the following:

1. A minimum of 143 credit hours is required for the BScF degree.

2. All entering students of the Faculty of Forestry and Environmental management are required to attend the orientation program organized by the Faculty.

3. Students must consult with the Student Services Coordinator to receive advice on course selection. Students may only register for 22 or more credit hours in a semester if they have a GPA of 3.0 or higher in the previous assessment period and have obtained permission from the Assistant Dean.

4. FOR 1001, FOR 2006, FOR 3006, FOR 4096, and FOR 4020 cover subject matter that is delivered in increasing degree of complexity; these courses must be taken in sequence.

5. Degree requirements must be successfully completed in not more than 16 terms during a period of 8 consecutive calendar years from the date of first registration in the program.

6. A minimum assessment grade point average (GPA) of 2.0 is required at the end of each year. Refer to the University Regulations section of this calendar, for regulations regarding the Calculation of Grade Point Averages, and standing and promotion requirements.

7. A student who has been required to withdraw from the program for academic reasons once, and who reapplies for admission following the withdrawal period, may be re-admitted to the program. If re-admitted, the student will automatically be on academic probation. Failure to meet the normal academic requirements at the next time of re-admission will result in final dismissal from the program. Further applications for re-admission will not be considered.

8. C grade minimum is required for all prerequisite and core courses used for credit towards the BScF degree.

Honours Program
SECTION G: FREDERICTON ACADEMIC PROGRAMS

Students intending to take the Honours Program must declare their intent to the Assistant Dean prior to the end of the third year of their program and have a CGPA of at least 3.0. All students in the Honours Program are required to complete FOR 4991 Honours Research Project.

To graduate in Honours, students must meet certain minimum standards in the course work beyond second year.
1. Maintain a CGPA of at least 3.0
2. Achieve a minimum grade of B- in FOR 4991

Curriculum

The core program focuses on forest ecosystem management with a blend of courses in basic, biophysical, social, and management sciences. Opportunity for students to pursue an education of substantial personal choice is provided by elective courses that can be organized in areas of concentration leading to minors. Students may also elect to follow minors offered by other faculties, or they may take a general variety of courses that does not lead to a minor. Twenty-four credit hours are required for a minor in the BSc program.

Core courses are listed below. Students are advised to incorporate electives to balance work loads to a normal load of five or six courses per term.

Observations and experimentation in a forested environment are critical to the education of professional foresters so work in natural settings is an important part of many courses. Extensive use is made of University forests which total 3,000 hectares in area, including the UNB Woodlot, adjacent to the Fredericton campus. To work in these and other areas, students are advised that they will need an approved hard hat (approximate cost $10.00) and approved safety-toed work boots (approximate cost $100.00).

Students will be required to pay for a portion of costs of extended field trips.

The Canadian Forest Service and the headquarters of the New Brunswick Department of Natural Resources and Energy are also adjacent to the campus. Scientists and managers at these institutions commonly undertake collaborative projects with students which provide opportunities for students to learn from the experience of others beyond their professors.

Core Course Requirements

- BIOL 1001 Biological Principles, Part I
- BIOL 1006 Applications in Biology, Part I
- BIOL 1012 Biological Principles, Part II
- BIOL 1017 Applications in Biology, Part II
- CHEM 1303 Introduction to Environmental Chemistry
- CHEM 1006* General Chemistry Laboratory I
- ENR 1001 Resource Management Issues, Ethics and Communications I
- ENR 1002 Resource Management Issues, Ethics and Communications II
- ENR 1611 Engineered Systems and Structures in Natural Environments
- ENR 2004 Social and Cultural Systems
- ENR 2531 Introduction to Hydro meteorology Systems
- ESCI 1012 Environmental Earth Sciences
- ESCI 1036* Geology Lab for Foresters
- FOR 1001 Introduction to Forestry
- FOR 2006 Management of Natural Systems
- FOR 2113 Introduction to Forest Wildlife Ecology
- FOR 2281 GIS with Applications in Forestry and Environmental Management
- FOR 2416 Structure and Development of Woody Plants
- FOR 2425 Auteology of Forest Vegetation
- FOR 2432 Forest Inventory and Growth
- FOR 2435 Fundamentals of Forest Tree Physiology and Genetics
- FOR 2505 Soils for Plant Growth
- FOR 2703 Forest Operations
- FOR 2803 Wood Technology
- FOR 3000 Business Management and Human Factors in the Forestry and Environmental Sectors
- FOR 3005 Silviculture and Stand Intervention Design
- FOR 3006 Forest Management
- FOR 3101 Forest Economics
- FOR 3303 Photo-interpretation, Photogrammetry, and Remote Sensing in Forestry OR FOR 5284 LiDAR in Forestry and Environmental Management
- FOR 3445 Ecology of Populations and Communities
- FOR 3456 Forest Watershed and Forest Fire Management
- FOR 4020 Management Practicum
- FOR 4096 Forest Landscape Design and Management
- FOR 4545 Biodiversity and Ecosystem Management
- FOR 4625 Integrated Management of Insects and Fungi
- FOR 4973 Forestry Field Camp II
- MATH 1823 Calculus for Management Sciences
- STAT 2254* Intro Statistics for Biology Students

*Alternative equivalents for course may be available with approval of the Student Services Coordinator or designated advisor.

Urban Forestry Major

The Urban Forestry Major is a 2+2 BScF degree program offered in conjunction with Sir Sanford Fleming College (SSFC) in Lindsay, Ontario. Students who have successfully completed the Urban Forestry Technician Program at SSFC (with a 70% or higher average grade) will be eligible to enroll in a BScF Urban Forestry Major at UNB.

Urban forestry is a specialized branch of forestry focused on the care, protection and maintenance of trees, forests, and green spaces in and around populated areas. Urban forestry emphasises the social, public, health and environmental links and interactions associated with urban and community spaces. The objective of the Urban Forestry Major is to educate professionals so they are well-equipped to interact with the public, and to design, evaluate, and implement management of forests and green spaces in urban environments.

After attaining a Urban Forestry Technician diploma at SSFC, students with a satisfactory standing must complete 82 credits at UNB. The required courses are:

- BIOL 1001; BIOL 1006 Biological Principles I + Lab
- FOR 1001 Introduction to Forestry
- FOR 2006 Management of Natural Systems
- FOR 2505 Forest Soils
- FOR 3101 Forest Economics
- BIOL 1012; BIOL 1017 Biological Principles
- ENR 1611 Engineered Systems and Structures in Natural Environments
- MATH 1823 Calculus for Management Sciences
- FOR 3006 Forest Management
- ENR 3201 Urban Watershed Management
- ENR 4785 Urban Forest Conservation and Management
- FOR 2281 GIS with Applications in Forestry and Environmental Management
- FOR 3005 Silviculture and Stand Intervention Design
- FOR 3445 Ecology of Populations and Communities
- FOR 4020 Forest Management Practicum
- FOR 4545 Biodiversity and Ecosystem Management
- FOR 4973 Forest Field Camp
- FOR 2703 Forest Operations

- FOR 4721 Urban Land Use Policy, Planning and Procedures

Minors

1. Forest Environment Minor: The Forest Environment Minor is a formal way to receive recognition for completing a concentrated, introductory study on forest issues, forest measurements, forest ecology, social values and policy, and forest management. It is available to students in all degree programs excepting BScF. It prepares students for an awareness of the multiple values that forests provide to society, as well as the processes that conserve and sustain the use of forests for habitat and biological diversity. The Minor requires 24 credit hours (approximately 8 courses) of approved courses as listed below. Credit hours of core courses in the student's major may not be counted towards the credit hour requirement of this minor. Substitutions may be made at the discretion of the faculty advisor.

Required:

- FOR 1001 Introduction to Forestry
- FOR 2006 Management of Natural Systems

Choose one of the following two:

- ENR 2004 Social and Cultural Systems
- ENVS 4002 Stakeholder Approaches to Environmental Problem Solving

Choose one of:

- FOR 2425 Auteology of Forest Vegetation
- FOR 4545 Biodiversity and Ecosystem Management

The remaining credit hours may be selected from the following list. Additional courses may be added to this list at the discretion of Faculty Advisor.

- FOR 2113 Introduction to Forest Wildlife Ecology
- FOR 2425 Auteology of Forest Vegetation
FOR 2432 Forest Inventory and Growth
FOR 2505 Soils for Plant Growth
FOR 2281 GIS with Applications in Forestry and Environmental Management
FOR 3005 Silviculture and Stand Intervention Design
FOR 2703 Forest Operations
FOR 3006 Forest Management
FOR 3101 Forest Economics
FOR 3445 Ecology of Populations and Communities
FOR 3456 Forest Watershed and Forest Fire Management
FOR 4013 Basic Woodlot Management
FOR 4412 Forest Nursery Practices
FOR 4425 Conservation Genetics
FOR 4545 Biodiversity and Ecosystem Management
FOR 4625 Integrated Management of Insects and Fungi

**Computer Applications Minor:** This minor develops a working level of computer literacy in data handling for geographic information systems and remote sensing as applied to forest inventory and management design.

**Required courses:**
One of the following four:
- CS 1073 Intro to Computer Programming I (in Java)
- CS 1003 Programming and Problem-Solving for Engineers
- FOR 3313 Digital Image Processing in Remote Sensing

In addition, students must choose 3 credit hours from among:
- CS 1083 Intro to Computer Programming II (in Java)
- CS 2685 C++ Programming for Programmers
- CS 2043 Software Engineering I
- CS 3043 Software Engineering II
- CS 3703 Multimedia Design
- FOR 4303 Optical, Thermal Infrared and Radar Remote Sensing
- FOR 4304 Image Processing Methods for Radarsat-2 and Polarimetric Images
- GGE 3423 Introduction to Geographic Information Systems

---

**SECTION G: FREDERICTON ACADEMIC PROGRAMS**

**2. Wildlife Conservation Minor:** The Wildlife Conservation Minor is a formal way to receive recognition for focusing your education on wildlife species, their biological characteristics, management, and current environmental issues; all these areas are of increasing importance to the ways society progresses. Requirements for the Wildlife Conservation Minor are listed under the Environment and Natural Resources Program.

Wildlife Certification: Students who take a specific suite of additional courses could apply to the Wildlife Society to become a certified Associate Wildlife Biologist. The additional courses would require an extra term or two. Contact the Faculty representative for details.

**3. Forest Science Minor:** The Forest Science Minor provides students the opportunity to complement their forest ecosystem management core program with courses in the general field of forest-related science. Two courses are required. Students may then select a stream of related courses or a more varied range of courses that will give insight into more than one area. Examples of areas include ecology, biodiversity, biotechnology, or the biophysical environment. Students are advised to consult their advisor for guidance in course selection.

The required courses to be taken in years 2 or 3 are:
- BIOL 2013 Evolutionary Genetics
- FOR 2345 Meteorology and Hydrology
- BIOL 1846 New Brunswick Plants and their Habitats
- BIOL 3301 Taxonomy of the Flowering Plants
- BIOL 3459 Economic Botany
- BIOL 4423 Conservation Genetics
- FOR 3425 Forest Tree Genetics and Genomics
- FOR 4303 Optical, Thermal Infrared and Radar Remote Sensing
- FOR 4466 Advanced Studies in Forest Plants and Their Environment
- FOR 4506 Advanced Studies in Forest Soils and Hydrology
- FOR 4602 Ecology of Forest Insects
- FOR 4723 Ornithology
- FOR 4911 Directed Studies in Forestry

A minimum of 17 credit hours of courses are to be selected from the following list, or approved alternatives (courses offered by the Faculties of Engineering, Forestry or Science). At least three courses are to be at the 3000 level or higher.

- BIOL 3442 Conservation Genetics
- FOR 3425 Forest Tree Genetics and Genomics
- FOR 4303 Optical, Thermal Infrared and Radar Remote Sensing
- FOR 4466 Advanced Studies in Forest Plants and Their Environment
- FOR 4506 Advanced Studies in Forest Soils and Hydrology
- FOR 4602 Ecology of Forest Insects
- FOR 4723 Ornithology
- FOR 4911 Directed Studies in Forestry
BACHELOR OF SCIENCE IN KINESIOLOGY

Faculty of Kinesiology

General Office: Kinesiology Building
Mailing Address: Faculty of Kinesiology University of New Brunswick P.O. Box 4400, Fredericton, N.B., Canada, E3B 5A3
Phone: (506) 453-4575
Fax: (506) 453-3511
Email: kin@unb.ca
Website: http://www.unb.ca/fredericton/kinesiology/

FACULTY
Dean: Wayne Albert, BSc, MA, PhD
Assistant Dean (Undergraduate Programs): Greg Duquette, BKin, MA
Assistant Dean (Graduate Programs and Research): Usha Kuruganti, BScEE, MScEE, PhD

- Albert, Wayne, BSc (Ott), MA (UWO), PhD (Qiu), Prof and Dean - 1999
- Barclay, Katherine, BSc (UNB), MSc (Wat), PhD (Guelph), Sr Teaching Assoc (Joint Biology, Nursing) - 2001
- Bouchard, Danielle, BPE (Sherbrooke), MSc (Quebec), PhD (UdeM), Assoc Prof - 2015
- Byers, Terri, BPE (Acadia), MA, PhD (DeMontfort), Assoc Prof - 2014
- Chester, Victoria, BScKIN (Guelph), MA (Laur), PhD (UNB), Prof - 2002
- Cleave, Shirley, BA, MA (UWO), PhD (Ill), Assoc Prof - 1979
- Dombrowski, Stephen, BA (Essex), MSc (Sussex), PhD, CPsychol (Aberdeen), Asst Prof - 2018
- Duquette, Greg, BKin (McM), MA (CMU), Teaching Assoc - 2008
- Edwards, Jonathan, BSM (Brock), MA, PhD (Alberta), Assoc Prof - 2012
- Hebert, Jeffrey, BA (Denver), DC (Palmer College of Chiropractic), PhD (Utah), Prof - 2017
- Kuruganti, Usha, BScEE, MScEE, PhD (UNB), Prof - 2004
- Mason, Fred, BA, BPE (MUN), MA (Ott), PhD (UWO), Assoc Prof - 2006
- McGarry, Timothy, BSc (Liv), MSc (Brad), MPE, PhD (UBC) Assoc Prof - 2000
- Mcgibbon, Chris, BSc, MSc, PhD (UNB), Prof - 2004
- McKenna, Mary, BSc (McG), MSc (Cornell), PhD (Nottingham), Prof - 1993
- Noble, Jeremy, BSc, MSc, PhD (Waterloo), Sr Instructor - 2014
- Onescu, Jacqueylin, BRM, MR (Acadia), PhD (Ottawa), Asst Prof - 2018
- Scott, David, BA, PGCE (Ulster), MA, PhD (Vic B.C.), Assoc Prof - 1997
- Seaman, Kenneth, BSc (Dal), MSc, PhD (UNB) - Sr Instructor - 2011
- Sénéchal, Martin, BSc, MSc, PhD (Sherbrooke), Asst Prof - 2015
- Shannon-McCallum, Charlene, BBA, B of Recr Mgmt (Acad.), MA, PhD (Wat), Prof - 2002
- Stacey, Cynthia, BSc (Acad.), MSc (Guelph), PhD (Ott), Assoc Prof - 1995
- Tyrowski-Gionet, Gabriela, BA, BEd, MA (UWO), PhD (Gloucestershire), Assoc Prof - 1999

General Information

The Faculty of Kinesiology offers two undergraduate degree programs: Bachelor of Science in Kinesiology and a Bachelor of Recreation and Sport Studies. The Bachelor of Science in Kinesiology (BSc(Kin)) is a four year discipline based program of study, with the focus being on applying scientific principles to the study of human movement. The program will prepare students for career opportunities in applied exercise, sport science, and health related professions (e.g. fitness consulting, athletic therapy, ergonomics, human factors) and related careers, as well as for further study in the exercise and sport science disciplines or allied health professions (nutrition, occupational therapy, physiotherapy, medicine).

Students interested in becoming elementary or secondary physical education teachers and coaches in school systems can select either the BRSS or the BScKin degree program. Students who are interested in the Arts and Humanities as a teachable subject, should select the BRSS degree program, while students who are interested in the Sciences as a teachable subject, should select the BScKin degree program.

High School applicants or first-year students interested in the BEd program at UNB should refer to the Faculty of Education Admission Advantage program in either the Admissions section of this calendar (Item J) or the Bachelor of Education section under Fredericton Degree Programs.

University Regulations

Any point not covered in the following regulations will be governed by the General University Regulations as stated in this Calendar. Questions concerning the application of regulations should be directed to the Registrar in writing.

Conditions Regarding Admission to the BScKin Program

All admissions are on a competitive basis: satisfaction of minimum requirements does not guarantee admission. Normally, no more than 100 students will be admitted to first year in the Faculty of Kinesiology in any academic year.

Transfer Students

1. Normally, a minimum session grade point average of 3.0 is required for a student to be considered for transfer into one of the Faculty's programs.
2. Normally, a student will not be allowed to transfer into the Faculty midway through the academic year.
3. In addition to scholastic record, a transfer applicant's record of participation and interest in the "Kinesiology," "Recreation," and "Sport Science" field is also considered for admission.
4. Students presently registered in the Faculty will continue to be governed by the regulations in effect when they first registered. Students who were formerly in the Faculty and apply for re-admission, if accepted, will be governed by the regulations in effect at the time of their re-admission.

Time Limitation

The maximum time period permitted between the first registration in the BScKin degree program and the completion of the BScKin degree shall normally be eight (8) years. Normally, BScKin students who are re-admitted within this time frame must complete the degree requirements in effect at the last re-admission.

BScKin as a Second Degree

In addition to the University's regulations for a second undergraduate bachelor's degree as specified in the UNB Undergraduate Calendar, the Faculty of Kinesiology requires that any student accepted into the BScKin degree program as a second undergraduate bachelor's degree be required to: (a) Complete at least thirty (30) credit hours of courses, and (b) Complete the requirements of the BScKin program.

General Regulations

Grade Point Averages

1. The method of calculating grade point averages is explained in the Calculation of Grade Point Average, section H, of this calendar.
2. To earn a BScKin degree, a student must have successfully completed a minimum 120 ch of approved courses.
3. Students should refer to the Standing and Promotion Requirements section I, of this Calendar for regulations regarding academic probation and withdrawal.

Policy on Grades

BScKin students must obtain a grade of "C" or better in required degree program courses. These courses include:

- all first year required courses
- all required core courses

NOTE: KIN1001 is considered to be Prerequisites or Co-requisites to all other KIN and RSS courses. Students receiving a final grade of "D" in KIN1001 may repeat KIN1001 as a Co-requisites to other second year KIN and RSS courses.

Repeating Courses

1. Regulations pertaining to repeating courses can be found in the Repeating Courses section of this Calendar.
2. Any required courses not successfully completed during a given year must be attempted not later than the next academic year, except by special permission of their academic advisor.

Summer Term Courses

BScKin students who wish to take Summer Term courses that are to be study courses, must be attempted not later than the next academic year, except by special permission of their academic advisor.

Practice and Directed Studies

1. Normally, students may elect a maximum of six (6) ch from practica courses, i.e., KIN 3911 (1), KIN 3912 (2), KIN 3913 (3), KIN 3914 (3) KIN 4910 (6).
2. Normally, students may elect a maximum of six (6) ch from directed study courses, i.e., KIN 4903 (3), KIN 4904 (3), KIN 4800 (6).

Approval of Elective Courses

-
Advice concerning elective courses will be provided by members of the Faculty. All elective courses require approval of the Faculty.

**Normal Workload**

The maximum student workload is considered to be 22 ch per term, or 40-44 ch per year (not including Summer Term). Permission from their academic advisor is required to exceed 22 ch per term or 44 ch in any given academic year.

**BScKin Year Designation Based On Credit Hours**

For the purposes of on-line registration and administrative operations, BScKin students shall be considered as in:

1. Second year after the student has successfully completed 30 ch toward their BScKin
2. Third year after the student has successfully completed 60 ch toward their BScKin
3. Fourth year after the student has successfully completed 90 ch towards their BScKin

**Curriculum**

**General NOTES**

1. It is the students’ responsibility to complete the degree program curriculum for the year in which they enroll.
2. In the BScKin degree program, activity lab courses are not required but may be taken as General KIN/RSS Electives up to a maximum of 6 credit hours.
3. The minimum credit hour total to graduate with a BScKin degree is 120.

**Year 1: (38 ch)**

**Required Core**

KIN 1001 Introduction to Kinesiology 3ch

One of the following three courses: 3ch

- RSS 1042 History of Sport and Recreation 3ch
- RSS 1081 Health and Wellness 3ch
- KIN 2093 Introduction to Philosophy of Kinesiology 3ch

KIN 1160 Laboratory Methods in Kinesiology 3ch

KIN 2032 Introduction to Sport and Leisure Psychology 3ch

BIOL 1001 Biological Principles, Part I 3ch

BIOL 1012 Biological Principles Part II 3ch

BIOL 1711 Human Anatomy I 4ch

BIOL 1782 Human Physiology I 4ch

MATH 1003 Introduction to Calculus I 3ch

MATH 1503 Linear Algebra 3ch

Choose 6 ch from the following: (3 ch may be taken in Year 2) 6ch

ANTH, ARCH, ECON, POLS, PSYC, SOCI

**Year 2 (36 ch)**

**Required Core**

BIOL 2812 Human Anatomy II 4ch

BIOL 2721 Human Physiology II 4ch

RSS 2203 Sociology of Sport, Physical Activity & Leisure 3ch

KIN 2062 Introductory Biomechanics 3ch

KIN 2072 Introduction to Motor Control and Learning 3ch

KIN 2082 Introductory Exercise Physiology 3ch

ENGL 1103 or ENGL 1144 or ENGL 1145 (may be taken in Year 1) 3ch

STAT 2263 or STAT 2264 or equivalent 3ch

Choose 1 of the following:

- CHEM 1001/CHEM 1006 and CHEM 1012/CHEM 1017 10ch
- PHYS 1071/PHYS 1091 and PHYS 1072/PHYS 1092 10ch

**Year 3 and 4 (46 ch)**

**Required Core to be completed in 3rd year**

KIN 3001 Introduction to Research Methods in Kinesiology 3ch

KIN 3252 Functional Human Anatomy 4ch

KIN 3282 Physical Activity, Health and Wellness 3ch

KIN Electives (Choose 24 ch)(see NOTE 1, 2 & 3 below) 24ch

Kin or Non-Kin Electives (Choose 12 ch)(see NOTE 1 & 2 below) 12ch

**TOTAL 120CH**

**NOTES:**

1. Of the 36 ch of KIN and NON-KIN electives in 3rd and 4th year at least 24 must be at the 3000/4000 level.

2. See academic advisor for suggested KIN and NON-KIN electives.

3. Laboratory Requirement - for the 5 core areas of Biomechanics, Exercise Physiology, Motor Learning/Control, Psychology of Physical Activity and Human Anatomy, students must take a minimum of 1 course in 1 core area. See academic advisor for applicable laboratory courses.

**Honours Program: BScKin**

1. The Honours program provides students with the opportunity to undertake academic research and be recognized as one of the Faculty’s top students. Upon successful completion of the program, “Honours” is printed on the student’s official academic transcript. See academic advisor for application procedures.

2. Application requirements include: minimum CGPA of 3.7, must be in one’s final year of study, must identify a faculty member willing to serve as one’s Honours Research Project supervisor.

3. Once accepted into the program, students must: outline the required deliverables and expectations of the Honours project which will be approved by the Honours supervisor before being submitted to the Assistant Dean of the Undergraduate Program no later than Oct. 15th. This outline (one or two pages) briefly describes: i) the nature of the study being conducted, ii) timelines, iii) deliverables and expectations. This outline serves as a course contract between the student and the supervisor.

4. To graduate with a BScKin Honours, students must meet the following requirements: maintain a minimum CGPA of 3.5 throughout one’s undergraduate degree; successfully complete KIN 4900 Honours Research Project.

**Pre-Professional Program in Kinesiology**

The BScKin degree program provides a variety of courses for students who are interested in pursuing a professional degree such as: Medicine, Chiropractic, Athletic Therapy, Physiotherapy, Occupational Therapy, and Massage Therapy. Experience has shown, where possible, that it is highly desirable for the pre-professional student to obtain a bachelor’s degree before applying for entrance to the professional school. Each professional school has its own specific entrance requirements and it is necessary that the student ascertain these requirements in order to be sure of qualifying as a candidate for admission to that particular school. Interested students should meet with their academic advisor before selecting their courses.

**Minor In Ergonomics**

The Minor in Ergonomics is designed for students from inside and outside the Faculty of Kinesiology interested in a coherent package of Ergonomics related courses. Students interested in the minor, must apply through the Undergraduate Degree Program. Enrolment is limited.

Students enrolled in the Minor will be required to take 18ch of required courses and 6ch of elective courses chosen in consultation, and in advance, with the Faculty of Kinesiology. A grade of C or better is required in each course used towards the Minor.

**REQUIRED COURSES (18 credits)**

1. KIN 3161 Human Factors in Ergonomic Design (3 ch)
2. KIN 3166 Cognitive Aspects of Human Performance (3 ch)
3. KIN 4161 Occupational Biomechanics (3 ch)
4. KIN 4162 Occupational Health and Safety for Ergonomists (3ch)
5. KIN 4165 Occupational Physiology (3 ch)
6. KIN 4903 Directed Study in Ergonomics (3 ch) - an ergonomics project. (see KIN 4900 below)

**ELECTIVES (6 ch) - select 6ch from the following**

1. KIN 4163 Workplace Ergonomic Design & Analysis (3 ch)
2. KIN 4900 Honours Research Project (3ch) - 3ch shall be applied in lieu of KIN 4903 above. Students cannot get credit towards the Minor for both courses.
3. RSS 5071 Careers and People Management in Recreation and Sport Organizations (3ch)
4. ADM 2815 Human Resource Management (3ch)
5. ADM 3875 Labour Relations (3 ch)
6. ADM 4826 Employment Law (3 ch)
7. ME 3232 - Engineering Economics (3 ch)
BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING

General Information
Software Engineering was established at UNB as a separate discipline in 2000. The BScSwE is administered jointly by the Department of Electrical and Computer Engineering and the Faculty of Computer Science. The program educates professionals who apply engineering techniques to the design, implementation, testing and maintenance of software products. Students graduating from the program will be eligible for registration as a Professional Engineer and an Information Systems Professional.

The BScSwE is designed as a four-year program or five years if undertaken in conjunction with the Co-op or Professional Experience Program. Students entering the program are strongly encouraged to participate in either Co-op or PEP, as it is widely recognized that the experience gained is a valuable component of a Software Engineering background. A description of these Cooperative Education Programs is found in the Bachelor of Computer Science and Bachelor of Science in Engineering degree program descriptions.

The Faculty of Computer Science also offers the following degree programs:
- Bachelor of Computer Science
- Bachelor of Information Systems
- admissions to the Bachelor of Information Systems program are currently suspended.

The Faculty of Engineering also offers the following degree program:
- Bachelor of Science in Engineering

Curriculum
The program is designed to be completed in 8 study terms. Because the BScSwE is considered an engineering degree, the General Regulations including minimum credit hour requirements that are listed under Bachelor of Science in Engineering, apply to the BScSwE program. The program consists of required "core" courses, basic science electives, technical electives and complementary studies electives. The first year of the program includes many fundamental math, science, and engineering courses common to all Engineering programs. Students transferring from New Brunswick Community Colleges will be eligible to receive up to one year of credits toward the Software Engineering degree. A minimum grade of C is required for all courses used for credit towards the BScSwE degree.

Core Courses
CHEM 1982 General Applied Chemistry
CHEM 1987 General Applied Chemistry Laboratory
CS 1073 Introduction to Computer Programming I (in Java)
CS 1083 Introduction to Computer Programming II (in Java)
CS 1303 Discrete Structures
CS 2043 Software Engineering I
CS 2263 Systems Software Development
CS 2333 Computability and Formal Languages
CS 2383 Data Structures and Algorithms
CS 2613 Programming Languages Lab
CS 3393 Algorithm Design and Analysis
CS 3413 Operating Systems I
CS 3503 Systems Analysis, Design and Project Management
ECE 1813 Electricity and Magnetism
ECE 2214 Digital Logic Design
ECE 2215 Digital Logic Design Laboratory
ECE 2412 Simulation and Engineering Analysis

Electives
Basic Science Electives
Core courses in Basic Science include PHYS 1081, CHEM 1982 and CHEM 1987. A minimum of 6 ch of other Basic Science courses must be chosen from Physics, Chemistry and the life or earth sciences. NOTE: Students with credit in APSC 1013 and APSC 2023 (or APSC 1023) will be given for credit for PHYS 1081. Students with credit in APSC 1013 and both APSC2023 and APSC2028 will be given credit for PHYS 1081 and 3ch of basic science electives.

Technical Electives
Each student is required to take 4 technical electives courses (minimum of 14 ch) chosen from the following list. Other senior level courses may be taken subject to approval by the Software Engineering Coordinator.
CS 2053 Introduction to Game Development
CS 2063 Introduction to Mobile Application Development
CS 2545 Data Science for Big Data Analytics
CS 3025 Human-Computer Interaction
CS 3043 Software Engineering II
CS 3613 Programming Languages
CS 4065 Interactive Human-centred Systems
CS 4405 Operating Systems II
CS 4415 Network Security
CS 4355 Cryptanalysis and Database Security
CS 4411 Fundamentals of Information Assurance
CS 4413 Foundations of Privacy
CS 4417 Software Security
CS 4419 Digital Forensics
CS 4545 Big Data Systems
CS 4725 Introduction to Artificial Intelligence
CS 4735 Computer Graphics
CS 4745 Introduction to Parallel Processing
CS 4815 Advanced Computer Architectures
CS 4905 Introduction to Compiler Construction
CS 4935 Advanced Algorithmic Techniques
CS 4998 Open Source Project

or CS 3113 Introduction to Numerical Methods
ECE 2701 Electric Circuits and Electronics (for non-electricals)
ECE 3221 Computer Organization
ECE 3232 Embedded Systems Design
ECE 3242 Computer Architecture
ECE 3812 Data Communications and Networking
or CS 3873 Net-centric Computing
ENGG 1001 Engineering Practice Lecture Series
ENGG 1003 Engineering Technical Communications
ENGG 1015 Introduction to Engineering Design & Problem Solving
ENGG 4013 Law & Ethics for Engineers
INFO 1103 Data and Information Management
MATH 1003 Introduction to Calculus I
MATH 1013 Introduction to Calculus II
MATH 1903 Introduction to Linear Algebra
ME 3232 Engineering Economics or CE 3963 Engineering Economy
PHYS 1081 Foundations of Physics for Engineers
STAT 2593 Probability and Statistics for Engineers
SWE 4040 Software Engineering Design Project or ENGG 4025 Multidisciplinary Design Project
or TME 4025 Product Design and Development
SWE 4103 Software Quality and Project Management
SWE 4203 Software Evolution and Maintenance
SWE 4403 Software Architecture and Design Patterns

NOTES:
1. ECE 2412 or CS 3113 may be taken interchangeably but ECE 2412 is a prerequisite for the technical elective ECE 4923.
2. CS 3873 is a prerequisite for the technical electives CS 5865.
3. Permission from program coordinator is required to take ENGG 4025 or TME 4025 in lieu of SWE 4040.

General Information

ENGG 1003 Engineering Technical Communications
ENGG 1015 Introduction to Engineering Design & Problem Solving
ENGG 4013 Law & Ethics for Engineers
INFO 1103 Data and Information Management
MATH 1003 Introduction to Calculus I
MATH 1013 Introduction to Calculus II
MATH 1903 Introduction to Linear Algebra
ME 3232 Engineering Economics or CE 3963 Engineering Economy
PHYS 1081 Foundations of Physics for Engineers
STAT 2593 Probability and Statistics for Engineers
SWE 4040 Software Engineering Design Project or ENGG 4025 Multidisciplinary Design Project
or TME 4025 Product Design and Development
SWE 4103 Software Quality and Project Management
SWE 4203 Software Evolution and Maintenance
SWE 4403 Software Architecture and Design Patterns

NOTES:
1. ECE 2412 or CS 3113 may be taken interchangeably but ECE 2412 is a prerequisite for the technical elective ECE 4923.
2. CS 3873 is a prerequisite for the technical electives CS 5865.
3. Permission from program coordinator is required to take ENGG 4025 or TME 4025 in lieu of SWE 4040.
SECTION G: FREDERICTON ACADEMIC PROGRAMS

The option comprises a project-based course in the area of biomedical engineering (described in section A below) along with 20 credit hours from UNB courses described in sections B-C below. Some of these courses taken as part of the option may also be used as technical electives in the SWE program.

Students must complete:

A. One of SWE 4040, TME 4025, ENGG 4025, SWE 4913 or ECE 4913 with a biomedical application.
B. One of APSC 3953 Basis of Biomedical Engineering (3 ch) or ECE 4923 Intro to Biomedical Engineering (4 ch)
C. The remaining credit hours (16 or 17) must be selected from the following courses. An asterisk denotes highly recommended.
   * BIOL 2792 Human Physiology (3ch)
   * CS 2545 Data Science for Big Data Analytics (3ch)
   * CS 3025 Human-Computer Interaction (3ch)
   * CS 4065 Interactive Human-centered Systems (3ch)
   * CS 4725 Introduction to Artificial Intelligence (4ch)
   * ECE 4343 Haptic Robotics (4ch)
   * ECE 4433 Safety Critical Design (4ch)
   * ECE 4553 Intro to Pattern Recognition (4ch)
   * ME 5913 Biomechanics (4ch)
   * STAT 3373 Elementary Experimental Design (3ch)
   * EE 6913 Advanced Biomedical Instrumentation (3ch)
   * BIOL 1719 Human Anatomy (4ch)
   * BIOL 3031 Cell Signaling (3ch)
   * BIOL 4533 Bioinformatics: Computational Analysis of Genes and Genomes (4ch)

CHEM 4503 Biocomputing in Drug Design (5ch)
CS 4545 Big Data Systems (4ch)
ECE 3111 Electronics I (4ch)
ECE 3122 Electronics II (4ch)
ECE 3312 Systems and Controls (4ch)
ECE 3511 Signals (4ch)
ECE 4133 Instrumentation Design (4ch)
ECE 4531 DSP 1 (4ch)
ECE 4523 Communication Systems (4ch)
KIN 2062 Intro. To Biomechanics (3ch)
KIN 2072 Introduction to Motor Control and Learning (3ch)
KIN 3042 Disability Awareness (3ch)
KIN 3061 Advanced Biomechanics (4ch)
KIN 3081 Physiological Basis for Physical Activity (3ch)
KIN 3161 Human Factors in Ergonomic Design (3ch)
KIN 3252 Functional Human Anatomy (4ch)
KIN 3282 Physical Activity, Health and Wellness (3ch)
KIN 4041 Movement Disorders (3ch)
KIN 4063 Biomedical Instrumentation and Data Acquisitions (3ch)
KIN 4072 Neural Control of Human Movement (3ch)
KIN 4161 Occupational Biomechanics (3ch)
KIN 4162 Occupational Healthy and Safety Ergonomics (3ch)
KIN 4163 Workplace Ergonomic Design and Analysis (3ch)

4. Students who successfully complete their first year with a minimum GPA of 2.0, regardless of the total number of credit hours completed, and other conditions as may be outlined for the program, will be approved for admission to the BScSWE program for the upcoming academic year.

5. Students who do not succeed in completing the program requirements may not be permitted to continue in the BScSWE Entrance program nor enter the BScSWE degree program.

6. Students can only register in the BScSWE Entrance program once.

General Notes

1. University studies courses (e.g. UNIV0101 and Academic AESL courses (e.g. AESL 1011) will not be counted for credit toward BScSWE degree program.

CS 5725 Neural Networks
CS 5865 Advanced Data Communications and Networking
ECE 4261 Digital Systems Design
ECE 4433 Safety-Critical System Design
ECE 4823 Communications and Network Engineering
ECE 4913 Independent Project
ECE 4923 Introduction to Biomedical Engineering
ECE 4943 Topics in Computer Engineering
INFO 2403 Information Security
INFO 3103 E-business Software Development
INFO 3303 Enterprise Information Systems
INFO 3403 Information System Administration
SWE 4303 Performance Analysis of Computer Systems
SWE 4913 Independent Project

Complementary Studies Electives

The program requires 9 credit hours (typically three 3 credit hour courses) of Complementary Studies Electives (CSE). The choice of courses is subject to the following restrictions:

1. Three credit hours must be a humanities and social sciences course addressing the impact of technology on society. A list of appropriate courses is available from the BScSWE program coordinator.
2. At least three additional credit hours must be in the Humanities and Social Sciences (HSS). This includes courses from Classics, Literature, History, Philosophy, Anthropology, Political Science, and Sociology.
3. The remaining credit hours may be taken from the faculties of Arts (including HSS), Business Administration, Renaissance College, or through Technology Management and Entrepreneurship (TME) subject to the approval of the program coordinator. No more than three credit hours of language courses may be used for credit toward the BScSWE Degree. ENGL 1103 is strongly encouraged.

Students are encouraged to seek out courses of interest and value to them. Other complementary studies courses may be taken subject to approval by the Software Engineering Coordinator.

Biomedical Engineering Option in Software Engineering

Biomedical engineering is the application of engineering principles in biological systems. This SWE option explores applications of engineering that are well suited for biomedical use. The purpose of the option is to give students experience with biomedical terminology and ways of thinking, such that they are familiar with the topics they would need to learn in an advanced degree or in order to work with health-care providers, biomedical companies, and solve important problems that pertain to our health and well being.

Students may not enroll in the option until they have completed 80 ch, although they are encouraged to integrate appropriate coursework (including Prerequisites) into their broader plan. Courses chosen to count towards the option must be approved by the option coordinator. Enrollment in this option will likely result in an extra term; students must ensure coursework schedules.

KIN 4281 Measurement and Evaluation in Exercise Science (4ch)
KIN 4165 Occupational Physiology (3ch)
PHYS 5992 Magnetic Resonance Imaging (3ch)
STAT 5293 Applied Statistics (3ch)

Software Engineering (BScSWE) Entrance Program

1. High School students who do not meet the admission requirements noted in the Admission Chart for direct entry to the BScSWE program but have a minimum admission average of 70% may be considered for full time admission to an Entrance Program to the extent that capacity allows.
2. Students enrolled in the BScSWE Entrance program are restricted to a maximum of 32 ch in the first year of studies. This is a prescribed set of courses as determined by the Faculty.
3. Students are required to meet with their Faculty Advisor on a semi-annual basis.

- Young, Hilary A. N., BA (Mt A), MA, PhD (Rice), LLB (Ott), LLM (Harv), Assoc Prof - 2012

The Faculty of Law offers a full-time three-year course leading to the Juris Doctor (JD) degree. Established in 1892, the Faculty has about 265 students from across the country.

For detailed information on admissions policy and procedure, a description of the school and program, please consult the Faculty of Law, Admissions Guide, available from the Law Admissions Office, Faculty of Law, PO Box 44271, Fredericton, NB, E3B 6C2. Phone: 506-453-4693. Email to: lawadmit@unb.ca or visit our website at http://www.unb.ca/fredericton/law/admissions/

For the Faculty of Law Regulations and Course Descriptions, see the Faculty of Law Calendar, available from the Law General Office, Faculty of Law, PO Box 4400, Fredericton, NB, E3B 5A3. Phone: 506-453-4669 or visit our website at http://www.unb.ca/fredericton/law/index.html.

### Course Numbers

Although the University is on a course credit system and has tended to move away from the idea of a rigid specification with respect to which year courses should be taken, yet there is some need to provide information as to the level of the course.

The various disciplines and the courses which they offer are presented in alphabetical order.

The course numbers are designated by four digits.

First Digit designates the level of the course:
1 - Introductory level course
2 - Intermediate level course which normally has Prerequisites.
3, 4 and 5 - Advanced level course which requires a substantial background.
6 - Postgraduate level course

Second and Third Digits designate the particular course in the Department, Division or Faculty.

Fourth Digit designates the duration of the course: 0 Year (or full) course normally offered over two terms. 1-9 Other than full year courses.

Departments may assign specific meanings to these digits; consult the departmental listings.

### Codes

The following codes are used in course descriptions:

- **A** - alternate years
- **R** - reading course
- **ch or cr** - credit hours
- **S** - seminar
- **C** - class lecture
- **T** - tutorial
- **L** - laboratory
- **[W]** - English writing component
- **LE** - limited enrolment
- **WS** - workshop
- **O** - occasionally given
- ***** - alternate years

For example, 6 ch(3C 1T, 2C, 2T) designates a course with 6 credit hours: 3 class lecture hours and 1 tutorial hour per week in the first term; 2 class lecture hours and 2 tutorial hours per week in the second term.

Combinations of class lectures, laboratories, seminars, etc., are indicated by a slash line, e.g., 5C/L/S.

Before registration, check all course offerings in the official Web Timetable (http://es.unb.ca/apps/timetable/). Not all courses listed are given every year.
FIRST NATIONS STUDIES
Includes courses reserved for students registered in courses administered by the Mi’kmaq-Wolastoqey Centre for First Nations Students.

ABRG1001 Essential Skills for Wolastoqey/Mi’kmaq Students 3ch (2C 3L)
Students will explore the purpose of higher education as well as the roles and responsibilities that students have in determining their own success. The course will prepare students for university by helping them to develop appropriate research, writing and reflective thinking skills while exploring the relationship between education, language, culture and identity as well as the importance of a healthy balance in one’s life as a contributor to success (for students registered in courses administered by Mi’kmaq-Wolastoqey Centre only).

ABRG1411 Finite Mathematics 3 ch
Introductory mathematics for students with a limited background in mathematics. Topics include algebra, coordinate geometry, matrices and systems of linear equations, linear programming concepts, and elementary probability (for students registered in courses administered by Mi’kmaq-Wolastoqey Centre Institute only).

ABRG1412 Elementary Calculus 3 ch
Polynomial, logarithmic and exponential functions. Limits and derivatives. Simple integration. Applications to business and economics (for students registered in courses administered by Mi’kmaq-Wolastoqey Centre only).

ABRG3055 First Nations Leadership Foundations 3 ch
Examines First Nations theories and models of leadership. Explores best practices for leadership at the individual and community levels and considers how to balance both traditional First Nations values and contemporary needs of First Nations communities.

ABRG3056 Practicing Leadership in First Nations Community Projects 3 ch
Exposes learners to leadership models in the context of diverse First Nations communities and national First Nations organizations. Prepares learners to initiate, plan, execute and close a leadership project.

ABRG3109 Independent Studies 3 ch
Students will normally be limited to 6 ch of independent study. Prerequisite: Permission of an instructor is required before registration.

ABRG3114 Introduction to Workplace 3 ch
Provides learners with an appreciation of the origins and trends in workplace learning. The course examines the workplace as a learning environment. Various approaches to adult learning within the changing context of work will be examined with specific focus on First Nations communities.

ABRG3363 Communications: Speaking Practice 3 ch
Writing and presentation of a speech. Students prepare, present, analyze and critique a variety of speeches, relating skills to classroom teaching (for students in the Bridging Year or BED for First Nations only).

ABRG3684 Aspects of Wolastoqey and Mi’kmaq Culture 3 ch
Historical and contemporary perspectives on changes that have affected Mi’kmaq and Maliseet cultures and societies since the time of contact; emphasis on issues relating to education, economic development, spirituality, self-government, land claims.

ABRG3685 Mi’kmaq Language I 3 ch

ABRG3686 Wolastoqey Language I 3 ch

ABRG3686 Wolastoqey Lutuwewakon 3 ch
‘Ciw wen ketuwokehkimsit eluwehket wolastoqey lutuwewakon, tan eitsitaq naka tan eluwehkashik. ’Ciw wen ketuwokissit naka ketuwewestaq.

ABRG3688 Contemporary Canadian First Nations Children’s Literature 3 ch
Books for primary and elementary children written by Canadian First Nations authors. Examines the Indigenous voice in Indigenous and non-Indigenous worlds in relation to traditional beliefs and current cultural concerns.

ABRG3695 Mi’kmaq Language II 3 ch
Further studies in Mi’kmaq. Prerequisites: 3 ch in Mi’kmaq Language.

ABRG3696 Wolastoqey Lutuwewakon II 3 ch
‘Ciw wen keti ankuwokokehmsit wolastoqey lutuwewakon, tahalu eluwiwakis, eluwehtumikok naka atkukwewakon. ’Ciw yukt kisi wihiqehutit ABRG 3868, 3867, kosona wolitahatok nutokehkikemit.

ABRG3696 Wolastoqey Language II 3 ch
Second-level course in Maliseet, focused on syntax, conversation, storytelling. Prerequisites: ABRG 3868 or 3687 or permission of instructor.

ABRG3922 Technology in Governance and Leadership 3 ch
Examines critically the use of software, hardware, and web-based services in First Nations community governance and leadership. The emphasis is on application of, and real-world issues surrounding, the Internet, productivity software, social media, as well as computer hardware and system maintenance in overcoming current technological and community administrative challenges.

ABRG4109 Independent Studies 3 ch
Students will normally be limited to 6 ch of independent study. Prerequisites: Permission of an instructor is required before registration.

ABRG4194 Land Claims 3 ch
Examines the reconciliation of Aboriginal rights with the modern Canadian state through the presentation of claims, and negotiation and adjudication of specific and comprehensive land claims agreements including recognition of Aboriginal self-government.

ABRG4664 First Nations Entrepreneurship 3 ch
An introduction to the theory behind successful entrepreneurship; principles and practical application of starting and maintaining a small business within a First Nations government. Guest speakers from local First Nations businesses, government agencies, funding institutions.

ABRG4685 First Nations Perspectives and Organizational Behaviour 3 ch
Introduction to the Medicine Wheel and how the values inherent in its teachings can be applied to groups, organizations, and communities. Students will relate ideas and concepts behind the Medicine Wheel to organizational structures in both mainstream and First Nations societies.

ABRG4675 Mi’kmaq Language III 3 ch
This third-level course will focus on Mi’kmaq language grammar, word and sentence formation, in speaking and listening through storytelling, conversation and songs.

ABRG4676 Mi’kmaq and Language IV 3 ch
This fourth level course will focus on Mi’kmaq vocabulary development, fluency in speech and literacy skills.

ABRG4686 Wabanaki World Views 3 ch
This course will introduce the Worldviews of the Wolastoqey, Mi’kmaq, Passamaquoddy and Penobscot Nations. The values, beliefs, and ethics of the Wabanaki people will be explored in historical and contemporary contexts. Values and beliefs embedded within language, ceremonies, traditions, and institutional structures of Wabanaki people will be examined.

ABRG4696 Wolastoqey III: Grammar 3 ch
Focus on grammar, word and sentence formation, in speaking and listening, through storytelling, conversation, and songs. Prerequisites: 6 ch in Wolastoqey Language or permission of instructor.

ABRG4696 Wolastoqey Lutuwewakon III 3 ch
‘Ciw yut wen keni ankuwi skicinuwatuwet naka wen keni piyemi woli. ’So’tok atkukhakonol, mecmiw eluwehtumikopon naka eluwehtumik, kapewi kaneyle na pilyel luntuwakon. ’Ciw yukt kisi wihiqehutit kinaq neqikotok, kosona wolitahatok nutokehkikemit.

ABRG4697 Wolastoqey II: Conversation and Composition 3 ch
Focus on vocabulary development, fluency in speech, literacy skills. Prerequisites: 9 ch in Wolastoqey Language or permission of instructor.

ABRG4697 Wolastoqey Lutuwewakon IV 3 ch
‘Ciw yut wen keni ankuwi kcihtaq skicinuwatuwewakon, pcihil eluwiwakis, wolama ‘tawi olonuwnawete. ’Ciw yukt kisi wihiqehutit kinaq neqikotokol cepahnswi, kosona wolitahatok nutokehkikemit.

ACADEMIC ESL
See beginning of Section H for abbreviations, course numbers and coding.

AESL1011 English as a Second Language for Academic Purposes 3 ch (3C) [W]
A practical course in the written and spoken use of language designed to meet the requirements of students whose first language is not English. Students are placed in groups based on placement testing results.
subsection interviews and in-class assessment procedures. Specialized curriculum is designed and delivered according to the needs of the students as assessed at the beginning of each term. Students may enroll in both AESL 1011 and AESL 1012 as they are not sequential in nature. Students are required to use only English during each three-hour class period.

Prerequisite: All students must take a placement test to determine specific language needs.

NOTE: Students who already have credit for ENGL 1011 cannot obtain credit for AESL 1012.

AESL1012 English as a Second Language for Academic Purposes

A practical course in the written and spoken use of language designed to meet the requirements of students whose first language is not English. Students are placed in groups based on placement testing results, subsequent interviews and in-class assessment procedures. Specialized curriculum is designed and delivered according to the needs of the students as assessed at the beginning of each term. Students may enroll in both AESL 1011 and AESL 1012 as they are not sequential in nature. Students are required to use only English during each three-hour class period.

Prerequisite: All students must take a placement test to determine specific language needs.

NOTE: Students who already have credit for ENGL 1011 cannot obtain credit for AESL 1012.

AESL2011 Exploration of Literary English for Non-Anglophones

More advanced than AESL 1011 and AESL 1012. Exclusively for students whose first language is not English. Encompasses examination of prose and poetry, and extensive composition. Emphasis is given to consideration of sophisticated English expression. Each student’s level of proficiency is determined through testing, subsequent interviews and in-class assessment procedures. Students may enroll in both AESL 2011 and AESL 2012 as they are not sequential in nature. Prerequisites: Successful completion of AESL 1011, AESL 1012 or equivalent proficiency. All students must take a placement test to determine specific language needs.

NOTE: Students who already have credit for ENGL 2011 cannot obtain credit for AESL 2011.

AESL2012 Exploration of Literary English for Non-Anglophones

More advanced than AESL 1011 and AESL 1012. Exclusively for students whose first language is not English. Encompasses examination of prose and poetry, and extensive composition. Emphasis is given to consideration of sophisticated English expression. Each student’s level of proficiency is determined through testing, subsequent interviews and in-class assessment procedures. Students may enroll in both AESL 2011 and AESL 2012 as they are not sequential in nature. Prerequisites: Successful completion of AESL 1011, AESL 1012 or equivalent proficiency. All students must take a placement test to determine specific language needs.

NOTE: Students who already have credit for ENGL 2012 cannot obtain credit for AESL 2012.

ANTHROPOLOGY

See beginning of Section H for abbreviations, course numbers and coding.

ANTH1001 Introduction to Socio-Cultural Anthropology

What makes us different from each other? What makes us similar? Exploring and comparing practices of kinship, politics, economics and religion in societies from around the world gives us powerful insights into the unique human capacity to create cultures, and into the ways in which culture is fundamental and essential to our shared human experience.

ANTH1002 Introduction to Archaeology and Biological Anthropology

This course considers long-term human biological and cultural change. The course introduces biological anthropology via the study evolutionary processes, the human evolutionary tree, and human diversity. This course then considers questions surrounding the evolution of culture and language. To introduce archaeology, the course presents processes of cultural change and major archaeological discoveries from paleolithic, mesolithic, pre-contact and historical cultures. Throughout, emphasis is placed on how archaeological and paleoanthropological sites are formed and studied. The course includes a variety of laboratory exercises. Students who receive credit for ANTH 1303/ARCH 1303 cannot receive credit for ANTH 1002.

ANTH1300 Archaeology Summer Camp (A)

6 ch (3S)

This course offers an overview of the hands-on components of archaeology by providing students with an introduction to experimental archaeology, human material culture, and the archaeological record, as well as basic archaeological recovery methods. These are presented in two broad components, one focused on creating and using ancient tools and technology and exploring past ways of life, and the other on excavating these with formal archaeological techniques. Students who receive credit for ARCH 1300 cannot receive credit for ANTH 1300.

ANTH2101 Foundations of Socio-Cultural Anthropology

Using ethnographic research and cross-cultural social comparison, socio-cultural anthropologists attempt to understand the lived experience of people. Using case studies drawn from classical and contemporary ethnographic accounts, this course offers a foundation in socio-cultural anthropology with a comprehensive approach to human social organization through a focus on kinship and political systems. Prerequisite: Any introductory anthropology course or permission of the instructor. Note: Students cannot obtain credit for both ANTH 2144 and ANTH 2101.

ANTH2302 Prehistoric Archaeology: Paleolithic Cultures

Introduces archaeological methods and theories through an examination of the paleolithic cultures of Africa, Europe and Asia. Prerequisite: ANTH 1002 (or equivalent) or permission of the instructor.

ANTH2303 Exploring the World of Archaeology

This course addresses central dynamic tensions in Archaeology and their impact on archaeological practice, including culture history versus cultural process; materialist versus idealist approaches to the past; processual versus post-processual archaeologies; archaeology as a study of the archaeological record versus archaeology as a study of past human culture; academic archaeology versus cultural resource management; archaeology and Aboriginal peoples.

ANTH2313 Archaeological History of New Brunswick

People have lived in what is now New Brunswick for at least 10,000 years. This course presents an archaeological perspective on the rich and fascinating past of the province, from the earliest archaeological evidence through to the nineteenth century. It is intended for a general audience, as well as students of anthropology.

ANTH2504 Introduction to Medical Anthropology

This course is designed to introduce students to the discipline of medical anthropology, which is accomplished by focusing on the ways in which illness, health, and healing are embedded within social, political, and cultural systems. Selected case studies are used to examine i) how different medical systems define health and illness, and how they treat categories of disease? ii) What happens when western medicine confronts folk understandings of illness in such a way that the two clash? ii) How anthropologists investigate and respond to the study of pain, illness, suffering, and healing in specific contexts? (v) How do seemingly local and global cultural processes shape aspects of our bodies, such as illness, sex, and death? This course also explores biomedicine as a powerful cultural belief system that is global in its scope, creates disease categories and produces authoritative knowledge. Finally, medical pluralism and pertinent case studies are examined to understand the integration of western and traditional medical systems.

ANTH2505 Biological Anthropology

Biological anthropologists attempt to reconstruct the lives of people using human remains from both forensic and archaeological contexts. In this course, students are introduced to the application of biological anthropology to past human populations through an emphasis on the rich and fascinating remains (bones, teeth and preserved soft tissues). Topics include: determining and understanding population demographics (age, sex, ancestry, and stature), health and disease, chemical and genetic analysis, and quantitative methods and population studies. Prerequisite: ANTH 1002 (or equivalent) or permission of the instructor.

ANTH3014 Issues in Anthropological Theory

Examines landmark theories and enduring debates in order to encourage students to evaluate anthropological theories and to think more critically about the nature of theory in the social sciences. Prerequisites: Any 2000-level anthropology course or permission of the instructor.

ANTH3051 Work-Study in Anthropology

This course allows students to receive university credit for experience in social science research gained under the supervision of a university-seated researcher or from a non-university organization. Registration. Students must register after making arrangements for supervision and grading with the department.

ANTH3052 Anthropological Statistics and Methods

This course addresses quantitative anthropological research design and statistical analysis. The course guides students through the process of anthropological research: formulating a research question, choosing a methodology, collecting and analysing data, and producing a project report. Students can incorporate archaeology, social anthropology and medical anthropology, research interests into their research projects. Prerequisite: Any 2000-level anthropology course or permission of the instructor.
ANTH3114 Gender, Sex and Culture 3 ch (3C) [W]
How do human gender roles vary from culture to culture and over time? How has anthropology attempted to explain these variations? What are the implications for the nature/nurture debate? Examples are drawn from archaeology, biological anthropology, and socio-cultural studies. Prerequisite: Any 2000-level anthropology course, or permission of the instructor.

ANTH3115 Anthropology of Food 3 ch (3S) [W]
Few things are more important to human beings than food. Food is profoundly cultural, which makes it a topic of interest to anthropologists concerned with the comparative study of culture and society across time and space. This course introduces the theories and methods of the field of the anthropology of food. On the one hand, what is considered edible and what is seen as good to eat is embedded in different cultural, social, economic, and political contexts. On the other hand, thinking about nutrition, energy, diet, and what is left behind opens a valuable window on societies past and present. The course goal is a practical guide to the anthropology of food, its core ideas, and its methodologies as a way to bring order and insight to diverse relationships between people and what they eat.

ANTH3116 Symbolism and Ritual 3 ch (3C) [W]
Examines a wide range of belief systems in order to introduce students to the study of religions from an anthropological perspective. Prerequisite: Any introductory anthropology course or permission of the instructor. Note: Students cannot obtain credit for both ANTH 2174 and ANTH 3117.

ANTH3117 Human Systems of Exchange: Nature and Culture 3 ch (3C) [W]
Compares and critically evaluates different approaches to human systems of exchange through a focus on economic anthropology. Covers diverse contemporary and classical topics in the field through a selection of different theoretical approaches to examine foragers, horticulturalists, pastoralists, peasants, and state societies and investigate their systems of exchange with each other and their relationships with the environment. Prerequisites: Any introductory anthropology course or permission of the instructor. Note: Students cannot obtain credit for both ANTH 2114 and ANTH 3117.

ANTH3284 Rules, Social Order, and Conflict (A) 3 ch (3S) [W]
Examines how human societies have solved disputes, regulated sexuality, and organized property, including the changes brought about under colonialism and globalization.

ANTH3301 The Prehistory of North America (A) 3 ch (3C) (LE) [W]
This course surveys the cultural history of North America through an in-depth examination of the origins and development of the Native cultures of North America, from the earliest traces to European contact. Prerequisite: ANTH 2103 or permission of the instructor.

ANTH3303 The Archaeological Traditions of North America 3 ch (3C) (LE) [W]
This course presents a detailed examination of the historical, theoretical and methodological development of Americanist archaeology. Prerequisite: ANTH 2000 or permission of the instructor.

ANTH3341 Work-Study in Museum Studies and Material Culture Analysis (O) 3 ch (3L)
This course offers an introduction to public and community-based archaeology and provides an overview of archaeology as public outreach. Topics include public engagement and education, the role of museums, universities, and field projects, and the ethical questions surrounding public archaeology. Prerequisites: ANTH 1002 (or equivalent), ANTH 2303, or permission of instructor.

ANTH3351 Work-Study in Archaeological Field Research (O) 3 ch (3L) LE
This course offers an introduction to public and community-based archaeology and provides an overview of archaeology as public outreach. Topics include public engagement and education, the role of museums, universities, and field projects, and the ethical questions surrounding public archaeology. Prerequisites: ANTH 1002 (or equivalent), ANTH 2303, or permission of instructor.

ANTH3352 Archaeological Field School I (O) 3 ch (3S) (LE) [W]
The field school offers an introduction to archaeological field techniques through participation in a field research project. This section emphasizes safety in the field, systematic approaches to research, site survey, recording, testing and excavation techniques. Prerequisites: 3 ch of 3000-level archaeology and permission of the instructor. Offered concurrently with ANTH 3353.

ANTH3353 Archaeological Field School II (O) 3 ch (3L) LE
The field school offers an introduction to archaeological field techniques through participation in a field research project. This section emphasizes recognition and recovery of archaeological materials, recording of basic field procedures and recovery of materials for technical analyses. Prerequisite: 3 ch of 3000-level archaeology and permission of the instructor. Offered concurrently with ANTH 3352.

ANTH3354 Archaeology of Northeastern North America 3 ch (Online) LE
This course considers the archaeology of New England and Atlantic Canada from the region's first peopling to the period of early European contact. This course is divided into eleven short modules designed as building blocks of regional prehistory. Each module will have at its core a series of short readings and lectures. Topics covered might include, Contemporary First Nations Communities in the Northeast, Environmental context, The Paleoindian period and the peopling of the Northeast, Early and Middle Archaic, Late Archaic, Terminal Archaic and Early Woodland, Paleoeskimos in Newfoundland, Middle Maritime Woodland and Ancestral Beothuk, Late Maritime Woodland, European contact, and the Historical archaeology in the Northeast.

ANTH33502 Medical Anthropology and Public Health 3 ch (3C) [W]
Medical anthropology is playing an increasingly important role in public health. This course builds on basic concepts introduced in ANTH 2504 with an emphasis on the contributions of medical anthropological theories and concepts towards an understanding of complex health-related behavior. This course examines why public health policies and interventions are more likely to be effective if the beliefs and behavior of people are understood and taken into account. Some examples of particular health problems are examined, such as HIV/AIDS, cancer, cardiovascular diseases, diabetes, malaria and other communicable and non-communicable diseases to show how an anthropological approach can contribute to both a better understanding of health and illness and to more culturally appropriate public health measures. Prerequisite: ANTH 2504 or permission of the instructor.

ANTH33521 Exploring the World of Primates (O) 3 ch (2C 1L) [W]
In this course students are introduced to the major primate taxa (i.e. prosimians, New World monkeys, Old World Monkeys, and apes) to illustrate the great variety in the anatomy, physiology, behaviour, and ecology within the Primate Order. The biological and social adaptations of primates are explored as well as basic evolutionary concepts, current trends and theories in primatology. The following topics are addressed:
evolutionary history, taxonomic classification, diet, predation, communication, social systems, kin selection, reproductive strategies, cognition, and conservation. Prerequisite: ANTH 1002 or permission of the instructor.

ANTH3522 Human Variation and Adaptation 3 ch (2C 1L) [W]
This course explores our biocultural evolution. It introduces students to human biological diversity, our similarities and differences and why they exist. How did humans in different parts of the world adapt and survive in their specific environments? What selective pressures were exerted on population genetics to produce modern variations? Topics include human adaptations: micro- and macro-evolution, skin pigmentation, growth and development, demography, aging and senescence, genetic variations, disease prevention and susceptibility. Prerequisite: ANTH 2505 or permission of the instructor.

ANTH3523 Forensic Anthropology (A) 3 ch (1.5C 1.5L) (W)
This course introduces the field of forensic anthropology, which involves the application of biological anthropology methods to a medico-legal context. To identify human remains, forensic anthropologists assist law enforcement by determining age, sex, ancestry, stature, and unique features from skeletal remains. Using decomposition rates, they can provide an estimate of the postmortem interval. Course topics include: establishing a forensic context, methods of scene recovery, estimating the postmortem interval, reconstruction of demographic information, and identification of bone pathology and trauma. Prerequisite: ANTH 3525 or permission of the instructor.

ANTH3524 Paleopathology (O) 3 ch (2S 1L) (W)
This course focuses on the study of ancient human diseases and their origins through examination of their remains in the archaeological record. Only a few diseases leave their marks on bone and tooth enamel, the most common remnants of ancient populations. Students are taught how to identify these abnormalities and assess their potential implications for the health of a living person/population, and to interpret the bioarchaeological evidence to gain insight into the health of past populations. Prerequisite: ANTH 3525 or permission of the instructor.

ANTH3525 Human Osteology 3 ch (1C 2L)
Human skeletal anatomy and biology are fundamental to the study of forensics and biological anthropology. This course emphasizes hands-on learning process for the identification of individual bones, and their morphological features, side, and anatomical orientation. Relevant techniques for the reconstruction of past populations and the assessment of human biological variation are introduced (age at death, sex, growth and development). Prerequisite: ANTH 2505 or permission of the instructor.

ANTH 3552 Bioarchaeology Field School I 3ch [W]
This field program, with ANTH 3553, offers an introduction to mortuary archaeology and bioarchaeological field methods through skeletal excavation. This section of the course offers training in the identification and recovery of human remains from archaeological sites, systematic approaches to field research, technical analyses of skeletal remains, and curation and storage. Prerequisite: ANTH 3525 (or equivalent) and permission of the instructor. Co-requisite: ANTH 3553 or permission of the instructor.

ANTH 3553 Bioarchaeology Field School II 3ch [W]
This field program, with ANTH 3553, offers an introduction to mortuary archaeology and bioarchaeological field methods through skeletal excavation. This section of the course offers training in the identification and recovery of human remains from archaeological sites, systematic approaches to field research, technical analyses of skeletal remains, and curation and storage. Prerequisite: ANTH 3525 (or equivalent) and permission of the instructor. Co-requisite: ANTH 3552 or permission of the instructor.

ANTH3662 Canada’s First Nations (A) 3 ch (3C) [W]
Explores the distinctiveness of Canada’s Aboriginal peoples through their varied societies and cultures and how these have withstood centuries of colonial impact to confront the many shared challenges of living in contemporary Canadian society.

ANTH3665 The Circumpolar World (A) 3 ch (3C) [W]
Nunavut has grown out of an intensive debate about Inuit self-governance. A large part of this debate has been shared with Inuit and Eskimo groups living in other parts of the Arctic whose cultures and societies often reflect similarities with Canadian Inuit, yet whose administrative and political experiences have differed widely. Here, the cultural world of the Arctic becomes the starting point for understanding the various management strategies adopted by different countries in relation to the circumpolar north and the peoples who live there.

ANTH3694 Latin America and the Caribbean 3 ch (3C) [W]
Relates specific ethnographic studies of Latin American and Caribbean societies to the analysis of colonialism, imperialism and underdevelopment.

ANTH3704 South Asia 3 ch (3C) [W]
Introduces basic concepts for the analysis of South Asian society, including class, caste, ethnic groups, local and national state and economic relations, in an historical context of colonialism and underdevelopment. Debates surrounding these issues are addressed.

ANTH4024 Anthropology and Ethics (O) 3 ch (3S) [W]
The ethical codes of many national anthropological associations recommend that teachers impress upon students the ethical challenges involved in every phase of anthropological work, as well as encouraging them to reflect upon available ethical codes. They also encourage dialogue with colleagues on these issues. This seminar provides a forum for extended discussions of complex ethical challenges that face anthropologists in their professional work. Prerequisite: Any introductory anthropology course or permission of the instructor.

ANTH4114 Culture and Environment 3 ch (3S) [W]
Examines how culture mediates the relationship between humans and their environment, including traditional ecological knowledge and/or local knowledge systems. Prerequisite: ANTH 3117 or permission of the instructor.

ANTH4202 Selected Topics in Social Anthropology (O) 3 ch (3S) [W]
Offers an in-depth analysis of one of a range of potential topics in socio-cultural studies. Prerequisite: Any 2000-level anthropology course or permission of the instructor.

ANTH4204 Gender, Kinship, and Marriage (O) 3 ch (3S) [W]
Examines the wide diversity of gender roles, kinship forms and marital arrangements in human cultures of all scales. Prerequisite: ANTH 3114 or permission of the instructor.

ANTH4224 Religion in Practice (A) 3 ch [W]
Examines the cultural and social roots of religious beliefs as well as the diversity of religious understandings and practices throughout the world. Prerequisite: ANTH 3116 or permission of the instructor.

ANTH4244 Ethnicity and Identity (O) 3 ch (3S) [W]
Identity is often as much as about politics as it is about cultural heritage. Current and classic examples of the politicization of cultural heritage and ethnic identity are explored in light of political action. Prerequisite: ANTH 2101 or permission of the instructor.

ANTH4304 Archaeology of Atlantic Canada (A) 3 ch (3S) [LE] [W]
In this seminar, students examine the 11,000 years of prehistory in the Atlantic region, emphasizing changes in material culture, ecological adaptations, and social interaction. Prerequisite: ANTH 3303 or permission of the instructor.

ANTH4305 to 4309 Selected Topics in Archaeology (A) 3 ch (3S) [LE] [W]
This course provides an in-depth examination of an archaeological topic selected by the instructor. Examples of topics that may be selected include: geoarchaeology, prehistoric human ecology, hunter-gatherer studies, consulting archaeology, or diet and subsistence. Prerequisite: ANTH 3303 or permission of the instructor.

ANTH4308 Consulting Archaeology
In-depth examinations of archaeological topics, geoarchaeology, prehistoric human ecology, hunter-gatherer studies, consulting archaeology, or diet & subsistence.

ANTH4502 Issues in Medical Anthropology (A) 3 ch (3S) [W]
A course designed to evaluate the application of medical anthropology in understanding and improving human health problems. A selection of case studies reflecting the various dimensions of medical anthropology in different cultural contexts are considered. The course begins with an introduction to the research methods used in medical anthropology. The important theoretical constructs that have influenced the field of medical anthropology and their application in research problems are examined. Prerequisite: ANTH 2504 or permission of the instructor.

ANTH4522 Human Evolution (O) 3 ch (3L) [W]
Examines the genetic basis of human evolution. With the advent of modern genetic technologies, it has been possible to compare and contrast evolutionary relationships at the genetic level. One current debate in biological anthropology surrounds the origin of anatomically modern Homo sapiens based on DNA evidence. Fossil evidence along with the genetic
picture are considered in detail. Prerequisite: ANTH 1002 (or equivalent) or permission of the instructor.

ANTH4523 Forensic Analysis of Human Teeth (O) 3 ch (2C 1L) (W)
This course provides students with a detailed introduction to the methodology used in the study of human teeth in forensics, biological anthropology, and archaeology. Students are taught how to use teeth in establishing a biological profile for human remains using anatomical aspects of human dentition as well as morphological variation, pathology, and changes with age and development. Topics selected for study represent areas of current research that address important questions in the study of forensic identification, human biological variation, bioarchaeology, and human origins. Prerequisite: ANTH 2505 or permission of the instructor.

ANTH4524 Bioarchaeology (O) 3 ch (3S) (W)
In this course students are introduced to advanced topics in the discipline of bioarchaeology, the application of biological anthropological techniques to reconstruct the lives of past populations from an archaeological context using their skeletal remains. Specific topics include patterns of subsistence, diet, disease, demography, and physical activity. Prerequisite: ANTH 3525 or permission of the instructor.

ANTH4602 Genes and People: Anthropological Applications (O) 3 ch (3L) (W)
This course introduces the basic concepts of human genetics and examines its application in anthropological research. Topics covered include: human genetic variability and its role in disease prevention and susceptibility; the use of DNA in reconstructing the biological profile of human remains from forensic contexts; and using ancient DNA to trace population migrations and resolve issues of human origins. Ethical questions and implications pertaining to the human genome project and human genetic research are also addressed.

ANTH4603 Selected Topics in Biological Anthropology (O) 3 ch (3S) (W)
This course provides an in-depth examination of a biological anthropological topic selected by the instructor. Examples of such topics include: human demography and human growth and development. Prerequisite: ANTH 1002 or permission of the instructor.

ANTH4702 Gender and Health (A) 3 ch (3S) (W)
A course designed to evaluate the gender dimension of health and disease, and addresses the articulation of gender roles and ideology with health status, the organization of health care, and health policy in a cross-cultural perspective. Gender is a cultural construct, and cultural ideas about women’s health and women’s bodies differ between social groups and historical periods. Gender issues pertain to men as well, and male gender roles and expectations are also culturally constructed. There are biomedical consequences to the cultural constructions of gender differences. The course examines how expressions of gender and power can play a role in prevention and treatment strategies. Prerequisite: ANTH 2504 or permission of the instructor.

ANTH4704 Selected Topics in Biomedical Anthropology (O) 3 ch (3S) (W)
This course provides an in-depth examination of a biomedical anthropological topic selected by the instructor. Examples of such topics include: infectious diseases and biomedical genetics. Prerequisite: ANTH 1002 or permission of the instructor.

ANTH5303 Theory and Method (Archaeology) 3 ch (3S) (LE) (W)
Students explore the research process through conducting individual archaeological research projects developed in conjunction with the instructor. Prerequisite: Open only to honours students, or with permission of the instructor.

ANTH5701 Doing Anthropology: Method and Theory 3 ch (3S) (W)
Examines contemporary theoretical approaches and develops research skills in socio-cultural anthropology. Prerequisite: Open only to anthropology honours or qualifying students, or with permission of the instructor.

ANTH5704 Biological Anthropology 3 ch (2S 1L) (W) (Theory and Method) (O)
This course explores the research process through conducting individual biological anthropology research projects developed in conjunction with the instructor. Prerequisite: Open only to honours or qualifying students, or with permission of the instructor.

APPLIED SCIENCE
See beginning of Section H for abbreviations, course numbers and coding.

APSC2023 A Survey of 19th and 20th Century Physics 3 ch (3C)
An introduction to ideas developed in Physics over the last two centuries. Topics will be drawn from Thermodynamics, Geometric and Physical Optics, Relativity, Quantum Mechanics and Atomic Physics. Prerequisites: PHYS 1091 or equivalent, MATH 1013 or MATH 1063.

APSC2028 Survey of 19th and 20th Century Physics Laboratory 2 ch (3L)
A series of laboratory exercises illustrating the ideas central to the development of Physics over the last two centuries. Co-requisite: APSC 2023.

APSC3953 Basis of Biomedical Engineering 3 ch
This course introduces the general aspects of Biomedical Engineering, which is the application of engineering principles to study biology, medicine, behaviour and health. A number of areas are covered by this broad topic, including anatomy, muscle physiology, biomedical instrumentation, biomechanics, and prosthetics. It will also introduce students to the idea of Biomedical Engineering as a career choice. Prerequisites: EE 1813, 80 ch in an engineering program, plus ENGG 1082 or CE 1023 or permission of the instructor.

ARABIC
See beginning of Section H for abbreviations, course numbers and coding.

ARAB1013 Introductory to Arabic I 3 ch (3C)
An introductory course to develop a basic knowledge of and foundation in standard Arabic writing and sound systems. Identify and produce Arabic sounds, write Arabic letters in various positions. To achieve basic proficiency in speaking, reading, writing and understanding the language. Read and comprehend simple Arabic texts, participate in simple conversations and discussions. To learn some basic aspects of Arab culture and civilization. Not open to native speakers. No Prerequisites.

ARAB1023 Introductory to Arabic II 3 ch (3C)
A continuation of ARAB 1013. Not open to native speakers. Prerequisite: ARAB 1013.

ARCHAEOLOGY
See beginning of Section H for abbreviations, course numbers and coding.

ARCH1303 The Human Past: Archaeological Approaches 3 ch (3C) (W) (Cross-Listed: ANTH 1303)
This course traces the historical development of the discipline of Archaeology from its earliest beginnings to recent advances in archaeological science, and introduces theories and methods used by archaeologists to investigate and understand past human cultures. Examples are drawn from studies of Paleolithic, Mesolithic, Neolithic, Indigenous and Historical cultures.

ARCH1323 Discovering Ancient Civilizations 3 ch (3C) (W) (Cross-Listed: CLAS 1323)
Through the lens of archaeology, students explore the sites, monuments, and artifacts of civilizations (in Mesopotamia, Anatolia, Egypt, the Indus Valley, Greece, Italy, and Roman Britain) that shaped Western society. The Tomb of King Midas, the pyramids of Egypt, the Greek theatre and Roman amphitheater are among topics covered.

ARCH2302 Prehistoric Archaeology: Paleolithic Cultures (O) 3 ch (3C) (W) (Cross-Listed: ANTH 2302)
Introduces archaeological methods and theories through an examination of the Paleolithic cultures of Africa, Europe, and Asia. Prerequisite: ANTH/ARCH 1303 or permission of the instructor.

ARCH2333 *To Dig is to Explore: Approaches to Classical Archaeology (Cross-Listed: CLAS 2333)
This course includes a brief survey of the history of archaeological investigations and the scientific methods used in identifying and excavating a site and analyzing the material remains. Representative examples that illustrate the above scientific advances are drawn from major Mediterranean civilizations: Mesopotamian, Anatolian, Egyptian, Persian, Greek, Etruscan, and Roman. A lab component includes cataloguing ‘ancient shards’ from Greece and Turkey, and copies of Greek and Roman vessels.

ARTS
See beginning of Section H for abbreviations, course numbers and coding.

ARTS1000 Development of Western Thought 6 ch
This course explores the significant concepts that have shaped the development of Western civilization from the time of Ancient Greece to the
present day. Registration for this course is limited to students in the BA degree program.

**ARTS1100 Development of Western Thought** 9 ch (2L 2T) [W]

This course shares lectures, academic content, and format with ARTS 1000, exploring the significant concepts that have shaped the development of Western civilization from the ancient world to the present day. ARTS 1100 students participate in an additional tutorial per week (beyond the usual one per week for ARTS 1000) in which critical reading and thinking and effective writing skills are strengthened through the use of small learning communities. Students work closely with tutorial leaders and peers to develop the skills necessary for further study and academic success in Arts. Students cannot obtain credit for both ARTS1000 and ARTS1100.

**ARTS3000 Faculty of Arts Internship** 6 ch (LE)

This two-term internship combines formal education with service in the larger community by providing work experience useful for the career and professional profile of individual students as well as bringing the skills and talents of Arts students to community organizations. Students are registered following a meeting with the Director of the Internship Program. Limited enrollment. Open only to students in the Faculty of Arts. Students taking ARTS 3000 cannot take ARTS 3001 or 3002.

**ARTS3001 Faculty of Arts Internship** 3 ch (LE)

This one-term internship combines formal education with service in the larger community by providing work experience useful for the career and professional profile of individual students as well as bringing the skills and talents of Arts students to community organizations. Students are registered following a meeting with the Director of the Internship Program. Limited enrollment. Open only to students in the Faculty of Arts. Students cannot take both Arts 3001 and ARTS 3000.

**ARTS3002 Faculty of Arts Internship** 3 ch (LE)

This one-term internship combines formal education with service in the larger community by providing work experience useful for the career and professional profile of individual students as well as bringing the skills and talents of Arts students to community organizations. Students are registered following a meeting with the Director of the Internship Program. Limited enrollment. Open only to students in the Faculty of Arts. Students cannot take both ARTS 3002 and ARTS 3000.

**ARTS4000 Community Learning** 6 ch (LE)

For fourth-year students in the Faculty of Arts, this course links formal education training with service in the larger community. This linkage provides work experience useful for the career and professional profile of the individual student and brings the skills and talents of Arts students into community organizations. Limited enrollment.

**ASTRONOMY**

NOTE: See beginning of Section H for abbreviations, course numbers and coding.

The following course covers basic astronomy. No university level mathematics or physics is required but high school math and science courses are an asset.

**ASTR1013 Elementary Astronomy (A)** 3 ch (3C)

Topics may include: introduction to the sky; the structure of space; properties of stars; interstellar and intergalactic space; quasars, galaxies, and a brief introduction to cosmology.

**BIOLOGY**

Students should note that in the Science Faculty the minimum acceptable grade in a course that is required by a particular program or is used to meet a prerequisite, is a "C". Any student who fails to attain a "C" or better in such a course must repeat the course (at the next regular session) until a grade of "C" or better is attained. Students will not be eligible for graduation until such deficiencies are removed. The only exception will be granted for a single course with a "D" grade that is a normal part of the final year of that program, and is being taken for the first time in the final year. NOTE: See beginning of Section H for abbreviations, course numbers and coding.

**BIO1001 Biological Principles, Part I** 3 ch (3C)

Surveys principles of biology from the molecular level to the cell. Topics include an introduction to the structure, function and synthesis of biological molecules, major cellular structures and processes such as proliferation, energy capture and metabolism, and reproduction and heredity. Examples are presented from both eukaryotic and prokaryotic cells. Students intending to major in Biology must also take BIOL 1006. Credit will not be given for both BIOL 1001 and BIOL 1009.

**BIOL1006 Applications in Biology, Part I** 2 ch (3L) [W]

Instruction and laboratory work dealing with applications of Biology at the level of biological molecules and the cell. Pre- or Co-requisite: BIOL 1001 or BIOL 1009.

**BIOL1009 Biological Principles, Part I - Online** 3 ch (3C)

This course is the online version of BIOL 1001. Students must first take BIOL 1001, or have permission of the BIOL 1001 instructor. The course surveys principles of biology from the molecular level to the cell. Topics include an introduction to the structure, function and synthesis of biological molecules, major cellular structures and processes such as proliferation, energy capture and metabolism, and reproduction and heredity. Examples are presented from both eukaryotic and prokaryotic cells. NOTE: This course is designed for science students. Students intending to major in Biology must also take BIOL 1006. Credit will not be given for both BIOL 1001 and BIOL 1009.

**BIOL1012 Biological Principles, Part II** 3 ch (3C)

Evolution provides the theoretical framework within which biologists work. Through a quantitative lens, this course 1) discusses the mechanisms of evolution and speciation; 2) surveys the biological diversity that results from these processes; and 3) describes a variety of metabolic, behavioural, and ecological processes that relate to survival and reproduction. NOTE: Students intending to major in Biology must also take BIOL 1017. Credit will not be given for both BIOL 1012 and BIOL 1019. Prerequisite: BIOL 1001 or BIOL 1009.

**BIOL1017 Applications in Biology, Part II** 2 ch (3L) [W]

Instruction and laboratory work dealing with applications of Biology at the level of organisms and their ecological interactions. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006. Pre- or Co-requisite: BIOL 1012 or BIOL 1019.

**BIOL1019 Biological Principles, Part II - Online** 3 ch (3C)

This course is the online version of BIOL 1012. Students must first take BIOL 1012, or have permission of the BIOL 1012 instructor. Evolution provides the theoretical framework within which biologists work. Through a quantitative lens, this course 1) discusses the mechanisms of evolution and speciation; 2) surveys the biological diversity that results from these processes; and 3) describes a variety of metabolic, behavioural, and ecological processes that relate to survival and reproduction. NOTE: Students intending to major in Biology must also take BIOL 1017. Credit will not be given for both BIOL 1012 and BIOL 1019. Prerequisite: BIOL 1001 or BIOL 1009.

**BIOL1621 Topics in Biology I: Life on a Changing Planet** 3 ch (3C)

This course will introduce students to the biodiversity, ecology, and evolution of life on Earth through exploration of the ever-changing nature of Earth’s ecosystems. We will address topics such as major groups of plants and animals through the history of life; responses of individual organisms, populations, and species to changing environments; climate change in past, present and future; and human impacts on the biosphere. NOTE: This course is not equivalent to BIOL 1001/ BIOL 1009 or BIOL 1012/ BIOL 1019, and is restricted to students who have not received prior credit for BIOL 1001, BIOL 1009, BIOL 1012, or BIOL 1019.

**BIOL1622 Topics in Biology II: Life on Smaller Scales** 3 ch (3C)

This course will introduce students to biological concepts that apply to everyday life. Topics will be chosen to help students understand the molecular interactions that are essential for life, the cellular processes that are required for survival and reproduction, and the importance of these to human health, industry, and the environment. NOTE: This course is not equivalent to BIOL 1001/ BIOL 1009 or BIOL 1012/ BIOL 1019, and is restricted to students who have not received prior credit for BIOL 1001, BIOL 1009, BIOL 1012, or BIOL 1019.

**BIOL1711 Human Anatomy I** 4 ch (3C) [2L (LE)]

This course is a general study of human anatomy which will include the following systems: integumentary, skeletal, muscular, nervous (including eye and ear), cardiovascular, lymphatic, urinary, digestive, respiratory, and reproductive. Limited enrollment; priority given to students in Kinesiology, Nursing and Biology-Chemistry (Pre-Health Professions stream). Biology honours, majors and minors cannot count this course as a Biology Credit, only as an elective. Co-requisite: BIOL 1011 or BIOL 1009 or permission of the instructor. Credit will not be given for both BIOL 1711 and BIOL 1719.

**BIOL1719 Human Anatomy I - Online** 4 ch (CA)

This course is the online version of BIOL 1711. Kinesiology students must first take BIOL 1711. BIOL 1719 is available to students prior to enrollment in Nursing, and current Nursing and Kinesiology students with permission of the instructor. This course is also available to other students (e.g. from Science) as an elective. The course is a general study of human anatomy which will include the following systems: integumentary, skeletal, muscular,
nervous (including eye and ear), cardiovascular, lymphatic, urinary, digestive, respiratory, and reproductive. Co- or Prerequisite: BIOL 1001 or BIOL 1019 or permission of the instructor. Credit will not be given for both BIOL 1711 and BIOL 1719.

BIOL1782 Human Physiology I 4 ch (3C 2L)
An introduction to the various systems that comprise the human body. Emphasizes the integration of these systems for maintenance of homeostasis. Limited enrolment; priority given to Nursing and Kinesiology students. Biology honours, majors and minors cannot count this course as a Biology Credit, only as an elective. Prerequisite: BIOL 1711 or BIOL 1719. Credit will not be given for both BIOL 1782 and BIOL 1789.

BIOL 1846 New Brunswick Plants and Their Habitats 4 ch (C/L)
This course is the online version of BIOL 1782. Kinesiology students must first take BIOL 1782. BIOL 1789 is available to students prior to enrolment in Nursing, and current Nursing and Kinesiology students with permission of the instructor. This course is also available to other students (e.g., from Science) as an elective. The course is an introduction to the various systems that comprise the human body. Emphasis will be on integration of these systems for maintenance of homeostasis. Prerequisite: BIOL 1711 or BIOL 1719. Credit will not be given for both BIOL 1782 and BIOL 1789.

BIOL203 Introduction to Ecology 3 ch (3C)
Ecology is the study of organisms and their interactions with the environment. We begin by introducing the physical environment as a template for evolved structures, processes, traits, and systems. The discussion then moves to adaptations of evolved systems across scales from photo/chemosynthesis to individual organisms to populations to communities to ecosystems, and emphasizing energy flow and nutrient cycling. An overall theme is the effects of human activities on ecosystem structures and functions. Students are also introduced to statistics for ecology. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012, or BIOL 1019, BIOL 1017. Co-requisite: BIOL 2008 or equivalent.

BIOL2008 Laboratory in Ecology 3 ch (1C 3L) [W]
This course is a companion course to BIOL 2003. In this course, students use laboratory experiments to investigate core concepts in energy and nutrient acquisition by terrestrial and aquatic organisms. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012 or BIOL 1019, BIOL 1017. Co-requisite: BIOL 2003.

BIOL2013 Evolutionary Genetics 3 ch (3C)
The overarching goal of this course is to provide students with an understanding of the genetic basis for evolutionary change, integrating molecular and population scales. Topics include: molecular evolution, the genetic basis for evolutionary change, population, quantitative and speciation genetics, and evolution and culture. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012 or BIOL 1019, BIOL 1017. Co-requisite: BIOL 2018.

BIOL2018 Laboratory in Evolutionary Genetics 3 ch (1C 3L)
This course is a companion course to BIOL 2013. In this course, students use laboratory experiments and computer simulations and analyses to investigate core concepts in population, quantitative and speciation genetics. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012 or BIOL 1019, BIOL 1017. Co-requisite: BIOL 2013.

BIOL2023 Introductory Biochemistry 3 ch (3C)
An overview of the processes required for life from biochemical, molecular, genetic and cellular perspectives. Major topics will include the structure and function of biological macromolecules, and the pathways and mechanisms of gene expression, enzymes, and cell signalling. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012 or BIOL 1019, BIOL 1017; CHEM 1001, BIOL 1006, BIOL 1012, BIOL 1017, or CHEM 1001, CHEM 1006, CHEM 1982, CHEM 1987. Co-requisites: BIOL 2028, Pre- or Co-requisite: CHEM 2401 or CHEM 2421 or permission of the instructor. Chemistry (Majors and Honours) and Chemical Engineering students are not required to have taken BIOL 1006 and BIOL 1017.

BIOL2028 Laboratory in Biochemistry 3 ch (1C 3L)
This course teaches experimental techniques used to investigate processes required for life from biochemical, molecular, genetic and cellular perspectives. Topics will include the quantitative analysis of biological macromolecules, gene expression, enzyme kinetics, and cell signaling. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012 or BIOL 1019, BIOL 1017, CHEM 1006, CHEM 1012, CHEM 1017, or CHEM 1001. CHEM 1006, CHEM 1982, CHEM 1987. Co-requisites: BIOL 2023. Pre- or Co-requisite: CHEM 2401 or 2421 or permission of the instructor. Chemistry (Majors and Honours) students and Chemical Engineering students are not required to have taken BIOL 1006 and BIOL 1017.

BIOL2053 Genetics 3 ch (3C)
Basic concepts of classical genetics including Mendelian genetics, gene interactions, sex linkage, linkage mapping and recombination, complementation are introduced. These are integrated with current topics including gene and chromosome structure and function, mutation, gene expression, transposable elements, extra nuclear genetics, quantitative and population genetics. Students doing an honours minor in Biology or in an interdepartmental program with Biology cannot count this course as a Biology Credit, only as an elective. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012 or BIOL 1019, BIOL 1017.

BIOL2063 Biological Diversity 3 ch (3C)
Biological diversity, life on planet Earth, is an interconnected continuum in time and space. All life is connected through genetic ancestry, but also through interactions in and with changing environments. The course provides students with a well-rounded understanding of biological diversity, including the concepts of and tools to study biological diversity, the innovations underlying the large biological diversity on our planet, a broad overview of biological diversity on our planet in the past and present, and importance of biological diversity to human health and the biosphere we inhabit. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012 or BIOL 1019, BIOL 1017. Co-requisite: BIOL 2068.

BIOL2068 Laboratory in Biological Diversity 3 ch (1C 3L)
This course is a companion course to BIOL 2063. It provides training in generating and interpreting phylogenetic trees; provides exposure to molecular and morphological data (in extant and extinct organisms) to identify organisms and test hypotheses about their relationships; provides exposure to a variety of different organisms and key innovations that have led to changes in biological diversity; and teaches techniques to study organisms and biological diversity (computer software, binomial keys, microscopy, dissection, comparative observation, and sampling and collecting). Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012 or BIOL 1019, BIOL 1017. Co-requisite: BIOL 2063.

BIOL2251 Clinical Microbiology 3 ch (3C)
This course (i) covers aspects of the biology of microorganisms from a clinical perspective, (ii) provides an introduction to the fundamental concepts of infectious disease microbiology, and (iii) discusses microbial diseases affecting the skin, nervous system, cardiovascular system, respiratory system, digestive system, and urinary and reproductive systems. NOTE: This course is not equivalent to BIOL 3261, and is restricted to students who have not received prior credit for BIOL 3261. As well, Biology honours majors and minors cannot count this course as a Biology Credit, only as an elective. Credit will not be given for both BIOL 2251 and 2259.

BIOL2259 Clinical Microbiology - Online 3 ch (3C)
This course is the online version of BIOL 2251. BIOL 2259 is available to current Nursing students with permission of the instructor. It (i) covers aspects of the biology of microorganisms from a clinical perspective, (ii) provides an introduction to the fundamental concepts of infectious disease microbiology, and (iii) discusses microbial diseases affecting the skin, nervous system, cardiovascular system, respiratory system, digestive system, and urinary and reproductive systems. NOTE: This course is not equivalent to BIOL 3261 and is restricted to students who have not received prior credit for BIOL 3261. As well, Biology honours majors and minors cannot count this course as a Biology Credit, only as an elective. Credit will not be given for both BIOL 2251 and 2259.

BIOL2289 Work Term 1 or
A written report on the scientific activities of the work term in a field of Biology as part of the Co-operative Education program in Science. Credit for the course is dependent in part on the employer’s evaluation of the student’s work. (Students must have a GPA of 2.7 or better for BIOL Co-op placement.)

BIOL2501 Pathophysiology I 3 ch (3C) [LE]
Introduces students to the study of the disruption of the normal balance of selected systems of the human body by disease and other perturbations. Limited enrolment. Nursing students and BMLS students have first priority; other students need permission of the instructor. Biology honours, majors and minors cannot count this course as a Biology Credit, only as an elective.

SECTION H: FREDERICTON COURSES

351
BIOL2509 Pathophysiology I - Online 3 ch (3C)
This course is the online version of BIOL 2501. BIOL 2509 is available to students prior to enrolment in Nursing, and current Nursing and BMLS students with permission of the instructor. This course is also available to other students (e.g., from Science) as an elective. The course introduces students to the study of the disruption of the normal balance of selected systems of the human body by disease and other perturbations. Prerequisite: BIOL 1782 or BIOL 1789. Credit will not be given for both BIOL 2501 and BIOL 2509.

BIOL2513 Pathophysiology II 3 ch (3C) (LE)
A continuation of BIOL 2501 with emphasis on perturbations to the normal functioning of organ systems. Limited enrollment. Nursing students and BMLS students have first priority; others need permission of the instructor. Biology majors and minors cannot count this course as a Biology Credit, only as an elective. Prerequisite: BIOL 2501 or BIOL 2509. Credit will not be given for both BIOL 2513 and BIOL 2519.

BIOL2519 Pathophysiology II - Online 3 ch (3C)
This course is the online version of BIOL 2513, and is a continuation of BIOL 2501 (or BIOL 2509) with emphasis on perturbations to the normal functioning of organ systems. BIOL 2519 is available to current Nursing and BMLS students with permission of the instructor. This course is also available to other students (e.g., from Science) as an elective. Prerequisite: BIOL 2501 or BIOL 2509. Credit will not be given for both BIOL 2513 and BIOL 2519.

BIOL2721 Human Physiology I 4 ch (3C 2L) (LE)
This course is a continuation of BIOL 1782/1789 with emphasis on metabolism, muscle and bone physiology, immune responses and healing. Limited enrollment: Kinesiology students have first priority. Biologyhonours, majors and minors cannot count this course as a Biology Credit, only as an elective. Prerequisite: BIOL 1782 or BIOL 1789.

BIOL2761 Human Physiology - Metabolism 3 ch (3C)
This is an introductory level course in human physiology. Selected topics covered include metabolism, muscle and bone physiology, the immune system, healing and homeostasis. Biology honours, majors and minors cannot count this course as a Biology Credit, only as an elective. Credit will be given for only one of BIOL 2761, BIOL 2769, or BIOL 2721. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006.

BIOL2769 Human Physiology - Metabolism - Online 3 ch (3C)
This course is the online version of BIOL 2761. Students must first take BIOL 2761, or have permission from the instructor. This is an introductory course in human physiology. Selected topics covered include metabolism, muscle and bone physiology, the immune system, healing and homeostasis. Biology honours, majors and minors cannot count this course as a Biology Credit, only as an elective. Credit will be given for only one of BIOL 2761, BIOL 2769, or BIOL 2721. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006.

BIOL2792 Human Physiology - Systems 3 ch (3C)
This course will introduce students to the various systems that comprise the human body with emphasis on the integration of these systems for maintenance of homeostasis. The systems that will be covered in detail are the cardiovascular system, pulmonary system, renal system, endocrine system, gastrointestinal system and the nervous system. Biology honours, majors and minors cannot count this course as a Biology Credit, only as an elective. Credit will be given for only one of BIOL 2792, BIOL 1782, or BIOL 1789.

BIOL2812 Human Anatomy II 4 ch (3C 2L) (LE)
This course is a continuation of BIOL 1711 which will study human anatomy from a regional perspective, and will expand especially upon the musculoskeletal, nervous, and cardiovascular systems. Limited enrollment: Kinesiology students have first priority. Biology honours, majors and minors cannot count this course as a Biology Credit, only as an elective. Prerequisite: BIOL 1711 or BIOL 1719.

BIOL2819 Human Anatomy II - Online 4 ch (CL)
This course is the online version of BIOL 2812, and is a continuation of BIOL 1711/ BIOL 1719. Students must first take BIOL 2812, or have permission from the instructor. The course studies human anatomy from a regional perspective, and will expand specifically on the musculoskeletal, nervous, and cardiovascular systems. Biology honours, majors and minors cannot count this course as a Biology credit, only as an elective. Credit will not be given for both BIOL 2819 and BIOL 2812. Prerequisite: BIOL 1711 or BIOL 1719.

BIOL3013 Advanced Genetics (O) 3 ch (3C)
The goal of this course is to develop knowledge about the concepts and process of genetic analysis and its applications in research, including concepts of experimental design, methodology, and interpretation of results. Using this perspective, we explore the experimental approaches used to identify and characterize the role of genes involved in biological processes and how these approaches are applied to specific examples from the research literature. Prerequisites: BIOL 2013, BIOL 2023, or equivalent.

BIOL3031 Cell Signalling 3 ch (3C)
Examines the principles of gene expression and cellular regulation. The perception of extracellular and intracellular signals, intracellular signal transduction pathways and the control of cell function will be examined while emphasizing experimental approaches. Prerequisite: BIOL 2023. Recommended: BIOL 2013.

BIOL3043 Cell Biology 3 ch (3C)
An examination of the structure and function of cells, focusing on the molecules and molecular mechanisms mediating the activities of membranes, cellular compartments, protein and vesicular transport and targeting, cytoskeletal construction and dynamics, the cell cycle, regulation of cell size, cell-cell and cell-matrix adhesion, cellular differentiation and the development of multicellular organisms. The course also focuses on how the knowledge in cellular biology was obtained, on the limits to our understanding, and on current advances. Prerequisites: BIOL 2013, BIOL 2023. Strongly recommended BIOL 2028.

BIOL3058 Genetic Analysis Laboratory 4 ch (2C 3L) (LE)
An exploration of gene inheritance, mutation, regulation of gene expression, and genetic interactions. The laboratories involve the use of model eukaryotic organisms to ask questions about physiology and development at the organismal, cellular and molecular levels. Limited enrollment. Prerequisites: BIOL 2013, BIOL 2018. Pre- or Co-requisites: BIOL 3013.

BIOL3073 Biochemistry of Gene Expression 3 ch (3C)
The structures and functions of all biological entities are dependent upon regulated gene expression. In this course, we will explore selected topics in gene expression from a molecular genetic and biochemical perspective. Topics may include: genome and gene structure, the processes of transcription and translation in prokaryotes and eukaryotes, the structures and functions of RNA polymerase and the ribosome, the fine scale structures of gene promoters, and a detailed mechanistic examination of how gene expression is regulated in the cell. Prerequisites: BIOL 2013, BIOL 2023, BIOL 2063. Recommended: BIOL 2028.

BIOL3083 Botany 5 ch (3C 3L) (LE) [W]
During the course of their lives, plants must perform all of the same functions as animals to survive: find a suitable place to live, acquire resources, find a mate, and defend themselves from enemies. However, plants are at an apparent disadvantage in comparison to most animals because they must perform all of these activities without the benefit of mobility. Yet, it is a green world and so this handicap is more apparent than real. This course explores the great diversity of plants, and examines their form in relation to function to understand how plants manage to meet the challenges faced by all organisms. Limited enrollment. Prerequisites: BIOL 2003, BIOL 2008, BIOL 2063, BIOL 2068.

BIOL3102 Somatic Cytology and Histology (O) 4 ch (2C 3L) (LE)
A study of cell structure using prepared slides. Normally offered in intersession or summer session. Limited enrollment. Prerequisites: BIOL 1001 or BIOL 1009, BIOL 1006, BIOL 1012, or BIOL 1019, BIOL 1017.

BIOL3113 Evolutionary Ecology 5 ch (3C 3L)
This lecture and lab-based course explores key ideas about ecological causes of evolutionary change. Topics will include natural and sexual selection, life histories, phenotypic plasticity, mating systems, evolutionary conflict, and co-evolution. Prerequisites: BIOL 2003, BIOL 2008, BIOL 2013, BIOL 2016.

BIOL3133 Selected Topics in Biochemistry (O) 3 ch (3C)
Principles of intermediate metabolism with particular reference to physical exercise and selected biomedical topics. Prerequisite: BIOL 2023. Recommended: BIOL 3043.

BIOL3149 Independent Studies 3 ch (R) [W]
Allows academically strong, highly motivated students to write a report on a subject of interest. The student should discuss the topic with the staff member best qualified to give approval of the subject matter and to give guidance during the year. Application is made to the Director of Undergraduate Studies (Biology Department).
An introduction to the study of molluscs and cephalopods. Emphasizes the role of molluscs in the ecosystem. Classification and identification of molluscs, including gastropods, bivalves, and cephalopods. Laboratory sessions will emphasize the use of different computer packages for the analysis and interpretation of the data encountered in mollusc classification. Prerequisite: BIOL 2013 or BIOL 2018; STAT 2264 or equivalent. Recommended: BIOL 2063, BIOL 2068, BIOL 3261. BIOL3242 Molecular Evolution 3 ch (3C) The course provides an introduction to the major events of the evolution of life on Earth, the diversity of flowering plants and their identification, description and utilization. Students are introduced to the taxonomy and ecology of the non-vascular groups most commonly represented in the fossil record, with special attention to the most recognizable and significant fossils. The course covers the fundamental features of virology including the role of viruses in animal disease and the behavior of viruses in animals. Topics include the response of bacteria to environmental factors, bacterial cell biology, including cell surface and cell wall composition, and the role of bacteria in the biogeochemical cycling of carbon and nitrogen. This course covers the fundamental features of virology including the role of viruses in animal disease and the behavior of viruses in animals. Topics include the response of bacteria to environmental factors, bacterial cell biology, including cell surface and cell wall composition, and the role of bacteria in the biogeochemical cycling of carbon and nitrogen.
A study of the invertebrate phyla, emphasizing evolutionary origins, adaptive morphology and physiology, while covering anatomical ground plans and basic developmental patterns. Laboratory exercises including numerous dissections, and students doing an anatomical atlas of an invertebrate animal of their choice. Prerequisites: BIOL 2063, BIOL 2068.

This course considers how oceans, which cover more than 70% of the earth's surface, act as a dominant environmental force. It examines the processes regulating the abundance, diversity, distribution and production of microbes, phytoplankton, zooplankton and high trophic levels. By exploring the web of physical factors (i.e., tides, waves, upwelling, light), we will see how temporal and spatial scales are critical for understanding the living ocean. Prerequisites: BIOL 2003; and CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017. Recommended: BIOL 2063, BIOL 2068.

Students planning to take the Marine Block Semester should take BIOL 3633 in advance.

The biology of parasites of humans, animals of veterinary significance, and wildlife species. This course serves to integrate parasite life history, epidemiology, molecular interactions at the host-parasite interface, mechanisms of infection, host immune responses, parasite immune evasion mechanisms, pathology, diagnostics, control strategies, and therapeutics. Prerequisite: BIOL 2023. Recommended: BIOL 2063, BIOL 2068.

Stresses interrelationships between structure and function particularly as responses to a variable environment. Considers phylogeny and classification of major groups. Limited enrollment. Prerequisites: BIOL 2063, BIOL 2068.

This course examines, at a fundamental level, the ways by which animals function, with an emphasis on physiological adaptations to the environment. Topics covered include respiration and circulation, metabolism and bioenergetics, thermal adaptation, ionic and osmotic regulation, and integrative neuroendocrine, endocrine and sensory physiology. Prerequisite: BIOL 2023 or permission of the instructor. Strongly recommended: BIOL 2063.

This course uses a comparative approach to examine hormonal regulation of ingestion, digestion, metabolism, reproduction and maintenance of homeostasis in vertebrates. Prerequisite: BIOL 2023.

Death is inevitable for all organisms; yet we are fascinated by death because, for most of us, it remains a mystery. This course will give students a foundation in the diverse field of forensic biology by examining the anatomical, physiological and biochemical basis of selected causes of death (forensic pathology), and investigating the processes and factors influencing human decomposition in a variety of conditions and environments (forensic taphonomy). It will also provide an introduction to other forensic sciences related to anthropology, ecology, entomology, and toxicology. Prerequisites: Any two of the following: BIOL (BIOL 1711 or BIOL 1717), (BIOL 1782 or BIOL 1789 or BIOL 2792), BIOL 2003, BIOL 2023, BIOL 2063, (BIOL 2721 or BIOL 2761 or BIOL 2769), ANTH 2504, ANTH 2505, ANTH 3523, or permission of the instructor.

Considers physiological foundations of behaviour and deals with topics of motivation, displacement behaviour, hormones, evolution and learning. Prerequisite: BIOL 2013.

Ecology, evolution, taxonomy, and diversity of insects, both terrestrial and aquatic. This course studies the most diverse group of animals on Earth: the Insects. Topics include insect body plans, growth, and development; major evolutionary groups of insects; ecological and economic importance of insects; insect collection and identification. Students will make and curate insect collections (this will be accomplished most easily by students who begin the summer before taking the course; interested students should contact the instructor for more information). Prerequisites: BIOL 2063, BIOL 2068, or permission of the instructor.

A study of selected physiological concepts via laboratory experimentation, with emphasis on presentation and interpretation of data in relation to the literature. Limited enrollment. Prerequisite: BIOL 2028 or permission of the instructor. Pre- or Co-requisite: BIOL 3801.

Recent advances in technology allow biologists to generate huge amounts of data in different fields such as genetics, ecology, and neuroscience. For many problems, manual data analysis is no longer possible, and biology is becoming increasingly data-intensive. In this course, you will learn how to approach biological problems using a basic toolkit including text processing, shell scripting, programming, data management, and data display. Previous programming experience is not required. Prerequisite: STAT 2264 or equivalent.

This course provides an introduction to methods that Biologists use to address, develop and test hypotheses in biology. We ask how do students, researchers, and professionals in biology set up questions for their research and/or assess evidence? How do they design their experiments? What traps and pitfalls do they know to look out for? How do we know if a scientific study is flawed? This course focuses more on ideas about why we do statistics and how to interpret them, rather than the mathematical details of different tests. Examples will range from cell biology to community ecology. Students will be exposed to a range of computer software necessary to explore, interpret and understand data and test hypotheses. This course will be important for students taking upper-year lab or field courses and Honours by thesis. Prerequisite: STAT 2264 or equivalent.

Life is a chemical phenomenon. Its maintenance requires the input of energy, acquisition of electrons and essential elements from the environment, and metabolic schemes to synthesize the biological molecules required for cellular viability and replication. This course examines the unifying biochemical concepts underlying diverse metabolic strategies utilized by prokaryotes and eukaryotes. Prerequisites: BIOL 2023, BIOL 2063, CHEM 2401 or CHEM 2421. Strongly recommended. BIOL 3031, BIOL 3043, BIOL 3073, BIOL 3261.

Honours students in Biology or in an interdepartmental program with Biology (e.g., Biology-Chemistry) who wish to undertake a thesis project in Biology are encouraged to make their wishes known to individual members of faculty. If a potential supervisor is found, the student will obtain an instruction sheet from the Undergraduate Biology office and make application to the Chair of Biology for admission into BIOL 4090 before pre-registration at the end of the third year. This course involves preparation and design and execution of a research project under the direct supervision of a member of the Department as well as the preparation of a formal thesis and defense of the thesis in a seminar presentation. NOTE: Minimum CGPA for acceptance is 3.0. A student cannot receive credit for both BIOL 4090 and BIOL 4149.

“Nothing makes sense except in the light of evolution” (Dobzhansky, 1964). Evolutionary medicine (or Darwinian Medicine) is a relatively new field at the intersection of evolution and medicine that uses evolutionary theory and approaches to (i) address questions related to the molecular and physiological mechanisms that underlie health and disease, (ii) understand why we are susceptible to disease, and (iii) explore ways to prevent and treat disease. This course provides (i) an overview of evolutionary theory and principles as they apply to the evolution of multicellularity, development and defense mechanisms, and (ii) a framework to appreciate the role of evolution in health and disease (including cancer, aging, and infectious diseases). Prerequisites: BIOL 2013, BIOL 2018. Recommended: BIOL 3043.

Gives academically strong and highly motivated students in Year IV an opportunity to do a literature or research project on a subject of interest. The student should discuss the topic with the staff member best qualified to give approval of the subject matter and to give guidance during the year. Application is made to the Biology Director of Undergraduate Studies. A student cannot receive credit for both BIOL 4090 and BIOL 4149.

This course provides students with opportunities to directly observe and independently investigate aspects of embryonic development, primarily using zebrafish embryos. The development of other species is discussed, and occasionally investigated in the lab, to provide evolutionary and theoretical context. The embryonic origins of specific organ systems and structures, developmental mechanisms underlying the processes of pattern formation, and the molecular basis of some major tissue remodeling events are studied. As well, students gain experience with advanced microscopic techniques. The course culminates with a substantive independent research project. Limited enrollment. Prerequisite: BIOL 3043. Pre- or Co-requisite: BIOL 3162.
BIOL4191 Wildlife Management 3 ch (3C) Studies biological, economic, and human factors affecting wildlife populations. Prerequisite: BIOL 2003 or permission of the instructor.

BIOL4211 Marine Research Experience 2 ch (3 L) (LE) Students enrolled in the Marine Block semester will be introduced to the research themes and practices in the laboratories of their professors. Groups of students will cycle through all of the marine research labs for hands on research experience throughout the semester. Students will be expected to compile short scientific-style reports outlining the results of their respective projects in each research laboratory experience. Limited enrollment. Normally taken in the same term as BIOL 4221, BIOL 4641, BIOL 4691 or BIOL 4851 or BIOL 4981, BIOL 4991 as part of the Marine Biology concentration.

BIOL4221 Diversity, Evolution and Ecology of Marine Plants 5 ch (C/L/S) (LE) This course will survey the diversity of marine plants (seaweed and phytoplankton) relative to one another and the other key lineages of life; exploring their diverse anatomical, cytological, life history and ecological attributes. In the laboratory students will use microscopy to explore vegetative and reproductive features of the various marine plants in our area. A significant component of the laboratory portion of the course will derive from work in the field collecting specimens for personal herbaria and completing biodiversity assessments (a cost may be associated with this trip). Prerequisite: BIOL 2063, BIOL 2065, or permission of the instructor. Limited enrollment. Normally taken in the same term as BIOL 4211, BIOL 4641, BIOL 4691, BIOL 4851, BIOL 4981, BIOL 4991 as part of the Marine Biology Concentration.

BIOL4233 Conservation Biology 3 ch (3C) An overview of the theory and practice of maintaining biological diversity at genetic, species, and ecosystem levels. The course focuses on scientific principles and technical tools in conservation biology. Pre- or Co-requisite: BIOL 2003 or permission of the instructor.

BIOL4272 Science Communication 3 ch (4S) (LE) [W] The ability to effectively communicate scientific principles to a general audience is an important skill with applications in business, education, government, and all science and healthcare-based professions. This course will focus on a variety of science communication formats to help students plan and execute approaches for communicating receipt of advancements in biology from the academic literature. Students will practice their communications skills through writing a science blog or a relate medium. Our central focus will be popular science writing, but students will also work on communicating using illustrations, presentations, and other creative works. Classes will involve discussion, writing exercises, and group work to practice clear and effective communication. The course is aimed at students in their last year of a Biology program, or an interdepartmental program that includes Biology. May only be taken by students who have completed the second-year core courses of their program. Prerequisites: BIOL 2003 and BIOL 2008, or FOR 2113 and FOR 2505, or equivalent.

BIOL4289 Work Term IV Cr A written report on the scientific activities of the work term in a field of Biology as part of the Co-operative Education Program in Science. Credit for the course is dependent in part on the employer’s evaluation of the student’s work. (Students must have a GPA of 2.7 or better for BIOL Co-op placement.) Prerequisite: Work term III in a field of Science.

BIOL4302 Microbial Biotechnology 3 ch (C/S) For thousands of years, even long before they were known to exist, microorganisms have been employed by humans to produce and preserve food and to protect human health. Today, knowledge of the biochemistry, genetics, and molecular biology of microorganisms has accelerated the development of new and improved biological products and processes. In this course we will examine the production and application of microbial biotechnology products that can solve problems in agriculture, medicine, industry, and the environment. This will include an exploration of the economic, social, and safety concerns associated with the commercialization of these products. Prerequisites: BIOL 3261.

BIOL4351 Climate Change and Environmental Response 3 ch (3C) Examines theories and patterns of climate change since the last Ice Age. A variety of paleoecological techniques applied to a number of fossil organisms will be discussed in relation to the information they yield about past environments. Prerequisites: Introductory course in anthropology, biology, or geology. May only be taken by students who have completed two years of their program.

BIOL4368 Techniques in Paleoecology and Climate Change 3 ch (3L) The principal aim of this course is to provide students with a hands-on experience in how to study past climates and environments from the historical record preserved in lake sediments. Students will learn the common coring techniques, how to recognize different sediment types, how to reconstruct past plant communities, and how to estimate quantitatively past temperatures. Pre- or Co-requisite: BIOL 4351.

BIOL4393 Trophic and Food Web Ecology 3 ch (2C 2L) (LE) As children we are told that ‘you are what you eat’, but as ecologists we learn that ‘you are what, where, when, and how you eat’. This course explores the diverse trophic ecologies observed in terrestrial, freshwater and marine consumers, and how these ecologists interact to form complex food webs in each of these biomes. The course outlines the methods by which ecologists can measure consumer trophic-ecology in addition to food web size and complexity. You will learn how to measure consumer niche width, trophic interactions and food web structure using consumer diet, stable isotope ratios and essential fatty acids. Pre-requisite examines the effects of environmental stressors such as climate change, biological invasions and land use on food web structure. Prerequisite: BIOL 2003 and BIOL 2008, or FOR 2113 and FOR 2505, or equivalent.

BIOL4423 Conservation Genetics (A) 3 ch (3C) This class will examine the application of genetic principles, concepts and biotechnologies in conservation, sustainable management and restoration of natural populations and managed populations. The topics covered include gene flow, genetic resources, genetic biodiversity and other population genetic parameters, demography, conservation, sustainable management, ecological restoration, and minimum viable population size; indicators for population viability; exploration, evaluation, utilization, and conservation of genetic resources; genetic consequences of habitat fragmentation, resource management practices, domestication, climate change, and natural disturbance; and challenges, opportunities and strategies for compatible management of genetic resources. This course is cross-listed as FOR 4425; students cannot receive credit for both BIOL 4423 and FOR 4425. Prerequisites: BIOL 2013, BIOL 2018, or permission of the instructor.

BIOL4443 International Ecology Field Course (A) 4 ch (C/L/T) (LE) This course allows students an on-site exposure and understanding of ecological interactions of soil, climate, plants and animals in a region outside of the Maritimes. A 10-14 day field trip to the region is required. Weekly seminars will be held in the period before the field trip. Students will be charged for travel and costs associated with the course. Limited enrollment. Open to biology and forestry students, with permission of the instructor.

BIOL4483 Scientific Writing 3 ch (3C/S) (LE)[W] A workshop and project-oriented course in scientific writing. The primary focus is on writing the journal paper. Enrolling students must have a research project (Honours thesis or other) advanced enough to be written up as part of the course activity, and must be able to share drafts with classmates. Limited enrollment. Prerequisite: Permission of the instructor. Credit may not be obtained for both BIOL 6463 and BIOL 4463.

BIOL4523 Phylogenetics 5 ch (3C 3L) Methods for inferring evolutionary trees and their applications to the fields of comparative biology, molecular evolution, and systematics. Topics to be covered include sequence alignment, phylogenetic inference, ancestral character state reconstruction, comparative methods, and molecular adaptation. Labs emphasize practical experience in data analysis. Credit cannot be obtained for both BIOL 4523 and BIOL 6523. Prerequisites: BIOL 2013, BIOL 2018, BIOL 2063, and BIOL 2068, or equivalents, or permission of the instructor.

BIOL4553 Bioinformatics 4 ch (2C 2L) (LE) Computational Analysis of Genes and Genomes Explores computational methods used in sequence analysis of genomes, genes, RNAs, and proteins. Topics include sequence alignment, genome database searching, gene prediction, RNA and protein structure, DNA and protein sequence comparison, and phylogenetic analysis. These topics will be integrated into the context of research in genomics and molecular biology. Limited enrollment. Prerequisites: BIOL 2013, BIOL 2018, BIOL 2023, BIOL 2028.

BIOL4563 Mathematical Biology (A) 3 ch (3C) Overview of the field of mathematical biology. Development, simulation and analysis of simple mathematical models describing biological systems. Equal emphasis is placed on developing simple models and case studies of successful models. The principal mathematical tools are differential and difference equations, finite mathematics, probability and statistics. This course is intended for students in their third or fourth year having an interest in biological research. Prerequisites: A course in statistics, MATH 2003, 355

SECTION H: FREDERICTON COURSES
SECTION H: FREDERICTON COURSES

MATH 2013 or equivalent, or permission of the instructor. This course is cross-listed as MATH 4563. Credit may not be obtained for both MATH 4563 and BIOL 4563.

BIOL4581 Eukaryotic Microbiology 5 ch (3C 2L)
Prokaryotes (microbial eukaryotes and related groups) constitute the vast majority of the known eukaryote diversity. This course examines the origin, evolution and diversification of the major prokaryote groups. Lectures include recent classification and taxonomic schemes, ecology of important lineages, and relevance to humans. Practical components of the course include the use of microscopy for identification and documentation, sampling techniques, development of cell cultures, high-throughput DNA sequencing and genome-scale analyses. At the end of the course the students will have a broad and integrative view of the microbial eukaryote diversity. Prerequisites: BIOL 2013, BIOL 2063, BIOL 2068. Recommended: BIOL 3031, BIOL 3043.

BIOL4641 Coastal Marine Ecology 5 ch (CL/S) (LE)
This course examines the ecology of shorelines, with a focus on the Atlantic Coast. Topics include the setting (continental drift, sea level, species origins, water movement), primary and secondary production, reproduction and recruitment, patterns (zonation) and processes (competition, mutualism, predation, disturbance), and main habitats (rocky shores, mudflats, salt marshes). There may be an additional charge for one-day field trips. Limited enrollment. Prerequisites: BIOL 2003, BIOL 2008, BIOL 2063, BIOL 2068. Normally taken in the same term as BIOL 4211, BIOL 4221, BIOL 4851, BIOL 4991 as part of the Marine Biology Concentration.

BIOL4688 Applied Studies in Parasitology (O) 4 ch (CL/S) (LE) [W]
Designed as a follow-up to a general lecture-based course in Parasitology, and to be offered during intersession or summer session. This course emphasizes the hands-on study of animal parasites and will incorporate both field investigations and laboratory work. Students will receive training in post-mortem examination, microscopy, histology, diagnostics (morphological, molecular, and immunological), experimental design, scientific writing and data presentation. There may be an additional charge for field trips (e.g. to aquaculture sites, domestic livestock farms). Limited enrollment. Prerequisite: BIOL 3873 or permission of the instructor.

BIOL4691 Biology of Marine Parasites 5 ch (CL/S) (LE) [W]
Nearly every life form is host to a parasite. This course emphasizes the hands-on study of parasites of invertebrate animals and marine fishes and incorporates field investigations and laboratory work. This course serves to integrate parasite diversity and life history, aspects of the ecology of parasitism, mechanisms of infection, epidemiology, host responses to infection, and pathology. Students will receive training in post-mortem examination, microscopy, parasite identification and diagnosis (morphological and molecular). Experience with experimental design, scientific writing, and data presentation will be acquired in association with independent student research projects. There may be an additional charge for field trips. Limited enrollment. Prerequisites: BIOL 2003, BIOL 2008, BIOL 2063, BIOL 2068. Normally taken in the same term as BIOL 4211, BIOL 4221, BIOL 4641, BIOL 4991 as part of the Marine Biology Concentration.

BIOL4723 Ornithology 5 ch (3C 3L) [W]
Studies birds; natural selection, morphological adaptations, migration, behaviour, and reproduction, in an ecological way. Prerequisites: BIOL 2063, BIOL 2068, or permission of the instructor. This course is cross-listed as FOR 4723. Credit may not be obtained for both FOR 4723 and BIOL 4723.

BIOL4732 Mammalogy 5 ch (3C 3L)
Studies mammals, covering taxonomy, adaptations, reproduction, populations, physiology, behaviour and ecology. Prerequisites: BIOL 2063, BIOL 2068.

BIOL4741 Fish Biology 3 ch (3C)
A comprehensive study of fishes from the Agnatha to specialized teleosts. Topics covered include phylogeny, ecology, reproduction, behaviour, physiology, functional morphology, and conservation biology. Prerequisites: BIOL 2003, BIOL 2008, BIOL 2063, BIOL 2068, or permission of the instructor. Recommended: BIOL 2008, BIOL 2013, BIOL 2020. Credit not be given for both BIOL 4741 and BIOL 4981.

BIOL4746 Laboratory Studies in Fish Biology (A) 2 ch (3L) (LE)
This course examines practical aspects of ichthyology covered in BIOL 4741. Field trips to freshwater sites focus on assessing population size, habitat preference, and species diversity. Lab exercises will include dissections, fish husbandry techniques, fish ageing, and techniques to assess fish health, behaviour and physiological status. Limited enrollment. Prerequisite: BIOL 3703 or permission of the instructor. Pre or Co-

BIOL4773 River and Lake Ecosystems (A) 3 ch (3C)
Provides a foundation of understanding of ecosystem processes in streams, lakes, and wetlands. Physical and biological components of such systems will be presented, and concepts and theories defining freshwater ecology will be discussed. Prerequisite: BIOL 2003.

BIOL4823 Life in Extreme Environments (A) 3 ch (3C)
This course will examine the morphology, physiology and (where applicable) behaviour of organisms that thrive in environments that most living organisms could not survive. Collectively referred to as "extremophiles", these organisms will be studied in relation to (1) the type of extreme environment they exist in, (2) why the particular conditions are so difficult for other life forms, and (3) how the particular extremophiles has evolved and/or adapted to allow them to exist under those conditions. Prerequisites: BIOL 2013; BIOL 2063, BIOL 2068, and one of BIOL 3261, BIOL 3801.

BIOL4851 Ecology of Marine Birds (O) 5 ch (CL/S) (LE)
This course treats seabirds as important components of marine food-webs. Fundamental adaptations (structure, function, physiology, life-history) of seabirds will be linked to the ecological processes driving them. The interrelationship of patterns (bathymetry, contour upwelling's) on seabird distribution and numbers will be explored. Through exploration of the role of seabirds as predators of other marine biota, and in nutrient transfer between marine and terrestrial systems, students will gain a thorough understanding of the roles played by seabirds in marine coastal and continental systems. Course includes an overnight field trip to Grand Manan Island, for which there may be an extra cost. Examples will be drawn from current seabird research especially in Atlantic Canada. Limited enrollment. Prerequisites: BIOL 2063, BIOL 2068, or permission of the instructor. Recommended: BIOL 3633. Offered in alternate years; normally taken in the same term as BIOL 4211, BIOL 4221, BIOL 4641, BIOL 4991 as part of the Marine Biology Concentration.

BIOL4863 Environmental Biology 4 ch (5C/L/S) (LE) [W]
Examines the effects of human activity upon the environment, both locally and globally. There may be an additional charge for field trips. Limited enrollment. Pre- or Co-requisite: BIOL 2003 or equivalent.

BIOL4953 Forensic Biology Seminar 3 ch (3S) (LE)
This course will take an in-depth look at peer-reviewed journal articles published in a wide variety of sub-disciplines under the broader topic of forensic biology. The aim of this course is to look at the existing literature in relevant areas of research with an eye to critiquing methodology, analysis, and conclusions of a variety of experiments that have potential implications in forensic science. Prerequisite: BIOL 3833.

BIOL4973 Topics in Aquatic Ecology (A) 3 ch (3C) (LE) [W]
Aquatic Ecology is concerned with freshwater, brackish and marine ecosystems. Two or three topics for a given year may be selected from lake ecosystems, estuarine ecosystems, plankton ecology, benthi ecology, wetland biology, wetland management. Arctic aquatic ecosystems. The course consists of lectures, seminars, and readings and assessments of a variety of experiments existing in the primary scientific literature. Prerequisites: BIOL 2003 or equivalent.

BIOL4981 Biology of Freshwater and Marine Fishes (A) 5 ch (CL/S) (LE)
An intensive course that combines lecture material on select taxonomic, organismal and process-oriented aspects of fish biology with laboratory and field investigations of fisheries science. Field trips to freshwater and marine sites will focus on sampling methods, assessing population size, species diversity, ecology and environmental impacts. Laboratory exercises will include ageing, fish taxonomy, development and comparative functional morphology. Work will incorporate both group study and individual projects with an emphasis on scientific analysis and interpretation of data, including a formal seminar presentation. There may be an additional charge for field trips. Limited enrollment. Prerequisites: BIOL 2003, BIOL 2008, BIOL 2013, BIOL 2063, BIOL 2068. Offered in alternate years; normally taken in the same term as BIOL 4211, BIOL 4221, BIOL 4641, BIOL 4991 as part of the Marine Biology Concentration. Credit will not be given for both BIOL 4581 and BIOL 4741 or BIOL 4746.

BIOL4991 Aquaculture in Canada 5 ch (CL/S) (LE)
Aquaculture is the aquatic equivalent to terrestrial agriculture. We are in the midst of a global transition from hunting and gathering wild aquatic organisms to farming them. This course examines the biological principles and constraints of commercial and pilot-scale aquaculture in Canada, with emphasis on the Atlantic region. Although the focus of the course is on fish culture, consideration is given to bivalves culture. Topics covered include controlled reproduction, genetics and biotechnology, nutrition and feeding, stress and disease, and sustainability. Includes an
SECTION H: FREDERICTON COURSES

overnight field trip to the Bay of Fundy to visit commercial and research facilities (a cost may be associated with this trip). Limited enrollment. Prequisites: BIOL 2063, BIOL 2068, or permission of the instructor. Normally taken in the same term as BIOL 4211, BIOL 4221, BIOL 4641, BIOL 4691 or BIOL 4851 or BIOL 4981 as part of the Marine Biology Concentration.

BIOL5473 Experimental Design and Data Analysis in Biology and Forestry
Introduces students who have previously taken a formal class in statistics to the practice and pitfalls of experimental design and data analysis in biology and forestry. It is intended for both graduate students and final year undergraduates (enrolled in an honours or senior research project). It will be jointly taught by faculty members from the Departments of Mathematics/Statistics, Biology and/or Forestry. Topics will be selected from sampling designs, experimental designs, parametric and non-parametric analysis, power analysis, and regression. The course will include discussion of examples in the literature. Students will also be analysing and interpreting data sets arising from their field of research. Prerequisite: STAT 2264 or equivalent.

BIOL6000 Series courses: (Graduate courses offered by the Department of Biology)
Graduate courses are open to undergraduates who can show that a course is of special value to them in their area of specialization. For details of courses offered consult the Calendar of the School of Graduate Studies and Research.

BUSINESS ADMINISTRATION
This section contains course descriptions for students entering the program after September 2001. For students who entered the program prior to September 2001, please contact the Faculty of Business Administration or see the 2001-2002 Web version of the Undergraduate Calendar for BA course descriptions.

Course Numbering System
The Faculty of Business Administration uses the following numbering system for courses offered by the Faculty.

a. The first digit
1 designates an introductory level course.
2 designates an intermediate level course which normally has a prerequisite specified in the course description.
3 designates an advanced level course which has one or more prerequisites specified in the course description.
4 designates an advanced level course with several prerequisites which normally is taken during the final year of studies.

b. The second digit identifies the nature of the course as follows:

<table>
<thead>
<tr>
<th>1 general</th>
<th>2 accounting</th>
<th>3 marketing</th>
<th>4 finance</th>
<th>5 organizational behavior and management</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 quantitative analysis</td>
<td>7 information technology</td>
<td>8 employment relations</td>
<td>9 independent study</td>
<td></td>
</tr>
</tbody>
</table>

c. The third and fourth digits differentiate courses in the same field. See beginning of Section H for abbreviations, course numbers and coding.

ADAM1015 Introduction to Business 3 ch (SC)
Topics include business history, forms of organizations, sources and use of business information. Introduce the functional areas of business including: accounting, financial management, marketing, production control, human resources management, and special topics. Not open to BBA students.

ADAM1165 Business Communications I 3 ch (SC)
Examines the "real" world of business communications from writing effective e-mail and business letters to planning and delivering informative presentations. Focus is on acquiring business writing and presentation skills. Other communication variables such as non-verbal messages, group dynamics, and interpersonal skills also covered. Prerequisite: Open only to BBA students. BBA students normally take this course during the first term of study. Credit will not be given for both this course and ADM2165.

ADAM1192 Business Planning and Entrepreneurship 3 ch (SC)
Introduce the fundamentals of business planning within the context of an entrepreneurial environment. This is a cross-functional and experiential project-based course that requires students to actively engage with the community.

ADAM1213 Financial Accounting 3 ch (SC)
Examines the identification, measurement, recording, and communication of financial information for managerial decision-making. Reviews basic principles and concepts to convey the conceptual framework of the accounting discipline. BBA students normally take this course in the second term of study. Credit will not be given for both this course and ADM2213.

ADAM1313 Principles of Marketing 3 ch (SC)
Provides a foundation of marketing theory and analysis necessary to approach the decision-making process and issues related to the marketing function. BBA students normally take this course in the second term of study. Credit will not be given for both this course and ADM2313.

ADAM2166 Business Communications II 3 ch (SC)
Examines contemporary strategies for successful written and oral communications in business. Theories of written and oral communication and their application to the real-world context covered with a focus on the practical applications of business contexts including: conducting interviews and surveys, writing formal business reports and proposals, and delivering persuasive arguments. Prerequisites: ADM 1165 or ADM 2165. BBA students must complete this course during the first 75 ch.

ADAM2223 Managerial Accounting 3 ch (SC)
Emphasizes the role of the accounting function in managerial decision-making. Traditional job costing and activity-based costing stressed. Appraises the use of standard costing and variance analysis as tools for managerial control. Examines flexible budgets, break-even analysis and contribution costing in decision-making. Prerequisite: ADM 1213 or ADM 2213.

ADAM2413 Principles of Finance 3 ch (SC)
Analyses the basic tools and concepts of finance and illustrates their application to practical problems faced by managers. Topics include: the time value of money, term structure of interest rates, valuation of financial securities, financial statement analysis, financial planning, working capital management and short-term and long-term sources of financing. Provides an introduction to the techniques of capital budgeting and the concepts of risk and return on options. Prerequisite: ADM 1213 or ADM 2213.

ADAM2513 Organizational Behaviour 3 ch (SC)
Introduces the contributions of the applied behavioral sciences to the study of work in organizations. Covers the fundamentals of individual and group behaviour, as well as selected topics in motivation, leadership, communication, conflict and organizational change. Prerequisites: 30 ch.

ADAM2623 Business Statistics (Cross-Listed: ECON 3601) 3 ch (SC)
Introduces the methods of data presentation and analysis, and their applications to business problems, including measures of data description, probability concepts and distributions, and statistical decision theory. Also considers sampling theorem, hypothesis testing using different techniques. Prerequisites: 30 ch, MATH 1823 and MATH 1833 or equivalents.

ADAM2624 Management Science (Cross-Listed: ECON 3602) 3 ch (SC)
Presents a variety of applications of optimization models to business problems such as allocation, blending, and scheduling. Introduces concepts of production planning, inventory control, network models and sequencing. Prerequisites: ADM 2623. BBA students must complete this course during the first 75 ch.

ADAM2815 Human Resources Management 3 ch (SC) [W]
Introduces human resource management and its role in corporate strategy. Topics include: human resource planning, recruitment and selection, employee training and development; performance appraisals; and compensation. Note: Credit will not be given for both ADM 2815 and ADM 3815.

ADAM3123 Business Law I 3 ch (SC) [W]
Examines the impact of law on business decisions and activities. Includes an introduction to the Canadian legal system, the law of contract and the law of torts. Emphasis given to the identification, evaluation, and management of legal risks in a business context. Prerequisite: 33 ch.

ADAM3124 Aboriginal Business Law 3 ch (SC)
Examines the unique aspects of business law as it applies to Aboriginals. Topics include constitutional framework; self-government; bands, band councils and reserves; commercial relations; taxation; and employment relations.
ADM3155 International Business 3 ch (3C) [W]
Examines issues and problems which arise when business operations transcend national boundaries. Topics include the dimensions of the contemporary international economy, theories of trade and foreign direct investment, the strategic and operational character of international firms and the controls adopted to achieve these goals. Prerequisites: ADM 1313 or ADM 2313, ADM 2413, and ADM 2513.

ADM3215 Intermediate Accounting I 3 ch (3C)
Presents in-depth coverage of selected topics in financial accounting. Commences with a review of the theoretical foundation for financial reporting, providing the conceptual background necessary to understand generally accepted accounting principles and alternatives to these principles. Specific emphasis given to the major asset categories found on corporate balance sheets through extensive coverage of cash, receivables, inventories, and capital assets. Prerequisites: ADM 1213 or ADM 2213, ADM 2223 and ADM 2413.

ADM3216 Intermediate Accounting II 3 ch (3C)
Continues the examination of the balance sheet commenced in ADM 3215 with extensive coverage of liabilities and shareholders’ equity. Specific emphasis directed to several current and controversial topics in accounting - corporate income taxes, earnings per share, and leases. Concludes with an overall look at financial statements and disclosure issues. Prerequisite: ADM 3215.

ADM3225 Cost Accounting 3 ch (3C)
Examines cost accounting information and its use in managerial control. Deals in detail with cost accumulation, job and process costing, standard costing, and variance analysis. Supplements the material covered in ADM 2223. Reviews the use of costing techniques in other than manufacturing situations. Prerequisite: ADM 2223.

ADM3315 Marketing Management 3 ch (3C) [W]
Covers the application of theory and analytical tools from the marketing management perspective. Focuses upon the analysis and solution of complex marketing problems in the contemporary environment. Prerequisites: ADM 1313 or ADM 2313.

ADM3316 Services Marketing and Management 3 ch (3C)
Building on basic marketing elements, introduces the unique opportunities and challenges associated with the marketing of services. Topics include service and experience design and management; service delivery and capacity management; the service encounter; service failure and recovery; customer participation in service processes; satisfaction and loyalty; and customer relationship management. Prerequisite: ADM 3315.

ADM3345 Marketing Research 3 ch (3C)
Examines the design and conduct of research for marketing decision-making. Includes problem formulation, obtaining and organizing data, advanced analytical techniques, questionnaire design, market testing, and analysis of results. Prerequisite: ADM 3315.

ADM3375 Marketing of Technological Services and Products 3 ch (3C) (Cross-Listed: TME 3346)
Provides an in-depth approach to the marketing of technology focused on industrial products and services. Includes essentials of marketing, along with aspects of product development, promotional design, distribution, pricing/budgeting determination, strategic analysis, communication skills, client/customer relations, and considerations for the small business environment. Not available for BBA degree credit.

ADM3415 Corporate Finance 3 ch (3C)
Examines portfolio theory and valuation capital, capital expenditure decisions, long-term financing decisions, cost of capital, financial structure, dividend policy, and external expansion. Prerequisites: ADM 2413, ADM 2623.

ADM3435 Financial Markets and Institutions (O) 3 ch (3C)
Examines the role of financial markets and institutions in the transfer of funds in Canada. Reviews the nature of assets and liabilities of financial institutions in the current regulatory framework. Considers the management of assets and liabilities of key depository and non-depository organizations, illiquidity risk, funding risk, default risk, and regulatory risk. Prerequisite: ADM 2413.

ADM3445 Personal Financial Planning 3 ch (3C)
Based upon the theory of financial decision-making applied to personal finance, covers the financial planning techniques used in professional practice. Topics include: financial goal setting, the life cycle model of financial planning, budgeting, tax planning, cash management, personal credit, investment choices, risk management, and retirement planning.

ADM3573 Organization Design 3 ch (3C) [W]
Examines the factors considered in the structural design of an organization. Special attention is given to the organization’s external environment and internal decision structures and processes. Prerequisite: 45 ch.

ADM3626 Managerial Decision Analysis 3 ch (3C)
Deals with the analysis of decision problems under uncertainty, partial information, risk and competition. Considers the analytic hierarchy process, outranking procedures, and multi-attribute utility theory. Examines the construction and use of indifference curves for the solution of multi-stage decision problems, and the numerical determination of stable solutions for problems with two competitors. Prerequisite: ADM 2623.

ADM3628 Advanced Statistics for Finance (Cross-Listed: ECON 3628) 3 ch
Examines theory behind statistical techniques such as analysis of variance, simple and multiple regression, non-parametric methods of estimation and hypothesis testing, and time series analysis. Examines the application of these techniques to problems in finance and other areas of business administration. Prerequisite: ADM 2623.

ADM3685 Total Quality Management 3 ch (3C)
Provides a fundamental coverage of total quality management. Includes the basic principles and practices of TQM, the tools and techniques of TQM, and case studies of the implementation of TQM in the manufacturing and service industries. Prerequisite: ADM 2623.

ADM3713 Management Information Systems 3 ch (3C)
Covers the application of different forms of computer technologies in enterprises, supply chains, and the marketplace in general; understanding of the system solution; understanding of the role of computer technologies in altering business processes in all applications, the decision-making process normally conducted by humans but now accomplished through tools like robotics and artificial intelligence. Specific emphasis will be placed on the development of data analytic skills using spreadsheet software in a lab-based teaching environment. Prerequisite: 60 ch.

ADM3875 Labour Relations 3 ch (3C) [W]
Introduces industrial relations with particular reference to unionized workplaces. Topics include: industrial relations theory; the development, structure and functions of organized labour in Canada; collective bargaining; strikes and industrial conflict; the grievance and arbitration process.

ADM4115 Management of Innovation and Technology 3 ch (3C)
Examines the strategic management of high technology and other organizations. Emphasizes innovation and the development or commercialization of intangible assets. Introduces tools and techniques for the implementation of appropriate strategies. Prerequisites: ADM 1313 or ADM 2313, ADM 3573.

ADM4125 Business Law II 3 ch (3C) [W]
Introduces the law that affects various functional aspects of a business. Topics include: law of business associations including partnerships and corporations; property including real, personal and intellectual; employment including hiring and termination; finance including debtor/creditor, banking and bankruptcy; and marketing including advertising and sales. Emphasis given to the management of legal risks. Prerequisite: ADM 3123.

ADM4143 Strategic Management 3 ch (3C)
Examines the process of strategy formation for the business enterprise as an integrated organization. Employs the problems of organizing organizational mission, analyzing the dynamics of competitive rivalry, and the determinants of success or failure for alternate types of business strategies based upon a thorough company/industry analysis. Prerequisites: 96 ch, ADM 1313 or ADM 2313, ADM 2413, ADM 3573.

ADM4165 Corporate Communications 3 ch (3C)
Appraises how an organization communicates with internal and external audiences. Introduces principles, theories, and practices used to generate and maintain positive relationships with non-consumer audiences and to handle the diverse communication challenges found in the workplace. Prerequisite: ADM 2513.

ADM4175 Venture Start-up & Entrepreneurship 3 ch (3C) [W] (LE)
Considers the problems associated with starting and operating a small enterprise. Focuses upon actual small business successes and failures. Prerequisite: 60 ch.
AdM4176 Management of New Enterprise 3 ch (3C) [W] (LE)
Focusses upon the development of a project proposal for starting a new business or a case study of an existing enterprise. Prerequisite: 96 ch.

AdM4177 New Product Development 3 ch (3C)
Examines concepts related to the management of new product development (NPD) and the role of NPD in the strategy of contemporary companies. Reviews concepts for development of winning solutions, approaches useful in organization of design process, and methods for selection/evaluation of projects. Considers concepts related to development of new services, as well as the refinement of innovative ideas and their implementation. Prerequisites: AdM 3345.

AdM4182 Outsourcing (O) 3 ch (3C)
Examines situations where outsourcing major portions of a firm’s activities makes sense and appraises how to manage the resulting contract. Topics include: measuring outsourcing relationships, measuring performance, and driving value. Prerequisite: AdM 2513.

AdM4193 Venture Assessment 3 ch (3C)
Focuses on the venture assessment process from the perspective of early stage investors. The skills students learn will be valuable within investment firms and in various other settings. It would be valuable to both start-ups and large firms that seek to launch, evaluate, or support new initiatives. Students will develop a skillset that will allow them to see value by mitigating the risks that others only see as barriers. Prerequisites: AdM4175 and AdM4435.

AdM4199 Consulting Practice 3 ch (C)
Under the supervision of a faculty member, students provide a consulting service to business, non-profit or government organization. Normally, this course involves the engagement of a group or groups of students who are responsible for the delivery of a report and formal presentation to a client organization. Prerequisites: Students must have completed 60 chs and have attached a cumulative GPA of at least 3.0 Subject to faculty supervisor and placement availability.

AdM4195 Co-operative Education 3 ch
Provides extensive practical experience in the professional world through the successful completion of 3 co-op work terms. For each work term, a report must be completed and receive a minimum grade of C. The Faculty will award the CR (credit) upon the successful completion of each work term. A student will be awarded CR (credit) for this course. Prerequisite: 2 previous successful work terms with passing work term reports.

AdM4215 Advanced Financial Accounting I 3 ch (3C) [W] (LE)
Examines the accounting and financial reporting for inter-corporate investments and business combinations, including the preparation of consolidated financial statements for parent and subsidiary entities. Also covers segmented reporting. Prerequisites: AdM 2223 and AdM 3216.

AdM4216 Advanced Financial Accounting II 3 ch (3C) [W] (LE)
Examines the accounting and financial reporting issues for the translation of foreign currency transactions and statements, non-business organizations, partnerships and businesses in financial difficulty. Also covers the conceptual framework for accounting and alternative accounting measurement models. Discusses current financial reporting issues. Prerequisites: AdM 2223 and AdM 3216.

AdM4218 Financial Statement Analysis 3 ch (3C)
Appraises the role of financial reporting in operating, financing, and investing decisions. Develops appropriate skills in the area of financial statement analysis. Reviews generally accepted accounting principles in Canada and elsewhere, as well as financial statement analysis of companies in different industries or geographic areas. Prerequisites: AdM 2223 and AdM 3415.

AdM4245 Accounting Theory 3 ch (3C) [W]
Focuses on accounting literature, especially with respect to financial reporting, and accounting standard setting. Prerequisites: AdM 2223 and AdM 3216.

AdM4275 Auditing 3 ch (3C)
Introduction to the concepts and procedures underlying contemporary auditing. Topics include ethics, legal liability, internal control, audit evidence, audit reports. Prerequisites: AdM 2223 and AdM 3216.

AdM4295 Internship in Accounting 3 ch [W]
Involves approved work for 80 hours in a term for an accounting department of an organization and under the supervision of a faculty member. Requires work on a project that is evaluated for academic assessment. NOTE: Open to Honours BBA candidates with a major in accounting. Subject to faculty and placement availability.

AdM4296 Independent Study in Accounting 3 ch [W]
Preparation of an empirical or theoretical study in accounting under the supervision of a faculty member. Application required at least 30 days prior to the term in which work will be undertaken. NOTE: Applicants must have completed 96 ch and have attained a cumulative GPA of at least 3.0.

AdM4315 Salesforce Management 3 ch (3C) [W] (LE)
Applies theory relating to salesforce management from a manager's point of view. Requires discussion and analysis of articles, which present research in the area. Entails the completion of several assignments designed to facilitate interaction with the business community. Prerequisite: AdM 3315.

AdM4316 Professional Selling 3 ch (3C)
Provides an introduction to and application of the principles of personal selling for persons pursuing any vocation, as well as those aspiring to careers in Marketing. Introduces basic concepts of professional selling including: customer analysis, communication skills, effective openings and closings, and customer relations. Emphasizes the development of selling skills via sales exercises, role-plays and presentations. Prerequisite: AdM 3315.

AdM4317 Customer Relationship Management 3 ch (3C)
Examines customer relationship management (CRM) as a key strategic process for organizations. Addresses benefits and problems of CRM strategy and implementation, culminating in the completion of a CRM strategic plan. Includes case analysis, student "expert" presentations, online discussions and applied appraisals. Prerequisite: AdM 3315.

AdM4325 Consumer Behaviour 3 ch (3C)
Appraises concepts and their interrelationships in order to develop an understanding of consumer decision-making processes. Includes basic individual determinants of consumer behaviour, environmental influences on consumers, purchase processes, post-purchase processes, market segmentation, brand loyalty, fear appeals. Prerequisite: AdM 3345.

AdM4326 Customer Satisfaction and Loyalty 3 ch (3C) (LE)
Examines issues relevant to customer satisfaction and loyalty. Topics covered include the marketing concept, continuous improvement, quality, complaint behaviour, expectations, measurement, and relationship marketing. Prerequisite: AdM 3315 or consent of the instructor.

AdM4335 Contemporary Marketing Issues 3 ch (3C) [W]
Considers contemporary issues in marketing. Taught as a seminar-based course and requires readings and detailed discussions of articles relevant to the selected topics of enquiry. Prerequisite: AdM 3315.

AdM4336 Market Orientation 3 ch (3C)
Examines theory and practice of market orientation for the creation and generation of enterprise growth or sustainability. Reviews variables that shape market orientation and appraises the value and role of the entrepreneur in development initiatives. Prerequisite: AdM 3315.

AdM4345 Integrated Marketing Communications 3 ch (3C)
Examines forms of marketing communications, emphasizing their role in the Canadian environment. Includes basic communications theory related to basic consumer behaviour theory; media availability and selection, promotion channels, personal selling, industry self-regulation, role of government regulation. Prerequisite: AdM 3345.

AdM4346 Social Media Marketing 3 ch (3C)
Examines different platforms in the social media environment. Identifies and explores online marketing opportunities for individuals, marketers, and enterprises. Prerequisite: AdM 3315

AdM4353 Export Market Entry 3 ch (3C)
Appraises how to plan and implement export tactics and strategy. In addition to the study of global marketing concepts, theories, and analytical tools, students will be expected to prepare a market entry plan. Atlantic-based organizations will participate in the course as case studies. On a competitive basis students will be selected to attend a trade mission. Prerequisite: AdM 3315.

AdM4355 Global Marketing 3 ch (3C) [LE]
Examines marketing decision-making in an international environment. Identifies and explores marketing problems facing enterprises undertaking expansion beyond domestic market boundaries. Prerequisites: AdM 3315.

AdM4385 Internship in Marketing 3 ch [W]
Involves approved work for 80 hours in a term for a marketing department of an organization and under the supervision of a faculty member. Requires work on a project that is evaluated for academic assessment. NOTE: Open
to Honours BBA candidates with a major in marketing. Subject to faculty and placement availability.

ADM4396 Independent Study in Marketing 3 ch [W]
Preparation of an empirical or theoretical study in marketing under supervision of a faculty member. Application required at least 30 days prior to the term in which work will be undertaken. NOTE: Students must have completed 96 ch and have attained a cumulative GPA of at least 3.0.

ADM4415 Working Capital Management 3 ch (3C)
Considers areas related to various components of working capital. Examines practical issues and analytical models for the efficient management of cash, accounts receivable, and inventories, along with the critical appraisal of various sources of short-term funds. Prerequisite: ADM 2413.

ADM4416 Applied Financial Management 3 ch (LE)
Employs actual and simulated corporate financial cases related to financial planning and control, working capital management and capital budgeting, cost of capital and optimal capital structure, dividend policy, mergers and acquisitions, and international financial management. Prerequisite: ADM 3415.

ADM4421 Mergers and Acquisitions 3 ch (3C)
Covers the theory and practice of mergers and acquisitions. Topics include: valuation techniques and their applications; strategic implications of mergers and acquisitions; stock market and corporate control; valuing synergies; valuing (target) firms for takeover; accounting for mergers; practical issues in mergers and acquisitions; hostile takeovers; forms of payment; M&A strategies; the role of the board of directors; best practices; empirical tests and stock market evidence of the benefits of mergers and acquisitions. Prerequisite: ADM 3415.

ADM4425 Investments 3 ch (3LE)
Covers the investment environment, basic investment concepts, analysis and strategy. Considers investors' attitudes toward risk; the Markowitz portfolio theory; capital market theory and its application; the efficient markets hypothesis; expected inflation and yields on securities; options markets; securities markets, technical and fundamental analysis. Entails simulated trading using the Internet. Prerequisites: ADM 2624 and ADM 3415.

ADM4426 Introduction to Financial Derivatives 3 ch (3C) (LE)
Covers forward contracts, futures, options and swaps. Introduces the markets for each of these financial derivatives and explains their market valuations. Illustrates the application of market valuations of derivative products through numerical problems. Also covers the use of financial derivatives in hedging risk. Prerequisites: ADM 2624 and ADM 3415.

ADM4435 Entrepreneurial Finance 3 ch (3C)
Examines the theory and practice of financing entrepreneurial firms. Topics include: financial planning and option analysis, firm valuation at different stages of development, financial fundraising with asymmetric information, fundraising alternatives and venture organization. Prerequisites: ADM 2413 and ADM 3415.

ADM4437 Principles and Practice of Value Investing 3 ch (3C)
Covers concepts and principles of fundamental analysis, financial statement analysis and common stock valuation models; examines the evidence that value investing is a viable strategy that has consistently produced above average returns. Students apply the concepts, principles and methodologies used by successful value investors to select and analyse common stocks and to make value investment decisions; practical application of value investment strategies is a significant part of this course. Prerequisite: ADM 2413.

ADM4445 Theory of Finance 3 ch (3C)
Provides theoretical underpinnings of the concepts and decision-making frameworks in corporate finance. Covers theories of choice of consumption/saving, portfolio investment, real investments, and financial structure. Also covers models of pricing risk, along with the concepts of market efficiency and inefficiency. Prerequisites: ADM 2524, ADM 3415, ADM 3628 or equivalent.

ADM4500 Student Investment Fund 6 ch (LE) [W]
Presents experiential learning of the actual financial investment process and portfolio management. Students, under the guidance of faculty advisors, manage over a $1,000,000 portion of the pension assets of the New Brunswick Investment Management Corporation (NBIMC), within the investment policies and procedures of that enterprise. Requires detailed analysis of macroeconomic, industry, and company fundamentals. Emphasizes preparation, on a regular basis, of up-to-date reports and presentations of portfolio analysis, selection, and management. Open only to BBA students. Eligible candidates are required to complete an application form and go through an interview. Prerequisites: ECON 1013, ECON 1023, ADM 2223, ADM 2624, ADM 3415, ADM 4425.

ADM4455 International Financial Management 3 ch (3C) (LE)
Reviews the concept of balance of payments, foreign exchange markets, and exchange rate systems. Examines exchange rate risk and the economics of currency exposure and the international arbitrage process. Topics include: international portfolio management, capital flows including direct investment, the financial of international enterprises, taxation and transfer pricing, capital budgeting, and the cost of capital in an international setting. Prerequisite: ADM 3415.

ADM4475 (MATH 4853) Mathematics of Financial Derivatives 3 ch (3C)

ADM4495 Internship in Finance 3 ch [W]
Involves approved work for 80 hours in a term for a finance department of an organization and under the supervision of a faculty member. Requires work on a project that is evaluated for academic assessment. NOTE: Open to Honours BBA candidates with a major in finance. Subject to faculty and placement availability.

ADM4496 Independent Study in Finance 3 ch [W]
Preparation of an empirical or theoretical study in finance under the supervision of a faculty member. Application required at least 30 days prior to the term in which work will be undertaken. NOTE: Students must have completed 96 ch and have attained a cumulative GPA of at least 3.0.

ADM4525 Leadership 3 ch (3C) [W] (LE)
Studies theoretical and practical approaches to directing people in organizations. Explores the relative effectiveness of various leadership styles in transforming organizational foci, from a managerial point of view. Prerequisite: ADM 2513.

ADM4526 Motivation and Work Behaviour 3 ch (3C)
Utilizes recent motivation theories as frameworks to analyze the effectiveness of evaluations and control methods currently found in organizations. Included is the use of information, pay administration, and participation in the design of effective organizational control systems. Prerequisites: ADM 2513 and one of ANTH 1001, POLS 1000, PYSC 1000, or SOCI 1000.

ADM4535 Ideology, Technology and Business (O) 3 ch (3C) (LE)
Examines how ideology and technology have influenced and shaped today's society. Emphasizes the development and impact of ideology and technology on government-business relations and the freedom of business to operate. Normally open only to third and fourth year students.

ADM4615 Operations Management 3 ch (3C)
Presents the concepts of production planning, inventory control, network models, facility planning, scheduling and sequencing, PERT and CPM, queuing models. Prerequisites: ADM 2623 and 2624.

ADM4634 Social Network Analysis (O) 3 ch (3C)
The course will present state-of-the-art research and practice of large social network analysis. It will provide students with a network-centric view of modern society and essential analyzing and modeling techniques for understanding and extracting information from important real-life networks arising from business, science and engineering, such as logistic/ supply chain networks, financial networks, and organization networks etc. Prerequisite: ADM 2623.

ADM4635 Supply Chain Management 3 ch (3C)
Presents state-of-the-art design, control, operation, and management of supply chain systems. Focuses on the integrated management of material flow, information flow, and financial flow at three different levels: strategic, tactical, and operational. Quantitative methods and techniques necessary for the supply chain management emphasized along with case studies. Prerequisites: ADM 2623, ADM 2624.

ADM4656 Location Theory 3 ch (3C)
Provides an overview of the basic models used in location analysis. Includes median centre and covering problems. Also covers brand positioning and voting theory. Considers both discrete and continuous
models. Discussion of practical applications of location models.

Prerequisites: ADM 2623 and ADM 2624.

ADM4828 Project Management (O) 3 ch (3C)
Introduces the management tools of project selection and evaluation, the setup of a project team, and the role of a project manager. Discussion includes the quantitative techniques of managing a project in terms of time/cost estimation, scheduling, budgeting, and the other control/monitoring measures of the performance of a project. Prerequisites: ADM 2623 and 2624.

ADM4856 Independent Study in Operations Management 3 ch [W]
Preparation of an empirical or theoretical study in operations management under the supervision of a faculty member. Application required at least 30 days prior to the term in which the work will be undertaken. NOTE: Students must have completed 96 ch and have attained a cumulative GPA of at least 3.0.

ADM4715 Database Management 3 ch (3C)
An introduction to database management systems. Reviews different types of database management systems. Additional topics include data modeling, query languages, database administration, data administration, security, concurrency, control and distributed databases. Prerequisite: ADM 3713.

ADM4718 Technology, Security and Risk 3 ch (3C)
Examines security and risk from a broad perspective. Topics covered include computer security, physical security of premises, shoplifting, corporate intelligence, corporate espionage, and issues of broad social importance such as airline security and terrorism. Prerequisite: ADM 3713 or permission of the instructor.

ADM4719 Current Topics in MIS 3 ch (3C)
Examines current issues in Management Information Systems. Prerequisite: ADM 3713 or permission of the instructor.

ADM4721 IT & Supply Chain Management 3 ch (3C)
Appraises the emergence of Internet-based technologies and supply chain management. Examines the intersection of three areas: introductory supply chain management, relevant aspects of Management Information Systems (MIS) and Electronic Commerce/Electronic Business and its Internet-enabled technology complements. Prerequisite: ADM 3713.

ADM4722 Systems Analysis and Design - User Perspectives 3 ch (3C)
Examines the development of IT systems from a user perspective. Topics include the Systems Development Life Cycle, role of users and management, critical success factors and alternative development methodologies. Prerequisite: ADM 3713 or permission of the instructor.

ADM4815 Training and Development 3 ch (3C)
Examines fundamentals of training and development function in organizations. Appraises cycle from needs assessment to evaluation and explores the influence of changes in the workplace and the availability of information technology. Prerequisites: ADM 2815 or ADM 3815.

ADM4825 Compensation Management 3 ch (3C) (LE)
Introduces the strategic role played by pay and benefits in achieving organizational goals. Topics include: forms of financial and non-financial compensation; job analysis and evaluation; pay policy and external competitiveness; pay for performance; performance appraisal; and administration of the pay system. Prerequisites: ADM 2815 or ADM 3815.

ADM4826 Employment Law 3 ch (3C)
Introduces the law relating to the individual employer-employee relationship. Examines the common law governing the contract of employment from commencement to termination. Overviews statutory regulation of the employment relationship, including: employment standards; occupational health and safety; workers’ compensation; and human rights legislation. NOTE: Students in the MBA/LLB program will not be permitted to obtain credit for ADM 4826 and LAW 3683. Prerequisite: ADM 3123.

ADM4827 Workplace Health and Safety 3 ch (3C)
Based on the premise that occupational health, wellness and safety concerns impact an organization’s productivity and profitability. Provides an understanding of health and safety issues, legislation and programs. Reviews current issues and methodologies affecting the occupational health and safety standards and practices of Canadian organizations. Prerequisite: ADM 2815 or ADM 3815.

ADM4828 Performance Management 3 ch (3C)
The main purpose of the course is to help students design effective performance management systems. To accomplish this, the course is designed to help students approach performance management issues critically, to familiarize students with the many components of performance management systems, and to show how the right configuration of these components can help organizations achieve their strategic objectives.

ADM4835 Contemporary Issues in Human Resources Management (O) 3 ch (3C) [W]
Examines current issues in human resource management in North America and abroad. With latitude given to the selection of topics. Prerequisite: ADM 2815 or ADM 3815.

ADM4845 Human Resources Planning 3 ch (3C) (LE)
Examines how different organizational strategies require alternate HRM policies and practices. Examines the resource allocation issues necessary for the effective management of people within a given strategy. Prerequisite: ADM 2815 or ADM 3815.

ADM4856 International Human Resource Management 3 ch (3C)
Introduces concepts, theories and issues in international human resource management. Explores how human resource management systems in other countries differ from Canada and, secondly, how human resource management of multinational corporations differ from domestic organizations. Topics include: global staffing, global pay, performance management in multinational corporations, global human resource management strategies and global labour relations. Prerequisites: ADM 2815 or ADM 3815.

ADM4857 Human Resource Selection Systems (O) 3 ch (3C)
Explores systems used by organizations to recruit and select employees. Examines employment law, techniques to screen applicants, interviewing techniques, assessment centers, biodata, and psychological tests. Prerequisite: ADM 2815 or ADM 3815.

ADM4878 Negotiation and Dispute Resolution 3 ch (3C)
Appraises conflict, negotiation, and dispute resolution principles. Focuses on the formulation and implementation of negotiation and dispute resolution. Considers the causes and consequences of conflict, and applies contrasting approaches to negotiations and dispute resolution. NOTE: Students in the MBA/LLB program will not be permitted to obtain credit for both ADM 4878 and LAW 4103.

ADM4895 Internship in Human Resources 3 ch [W]
Involves approved work for 80 hours in a term for a HRM department of an organization and under the supervision of a faculty member. Requires work on a project that is evaluated for academic assessment. NOTE: Open to Honours BBA candidates with a major in HRM. Subject to faculty and placement availability. Prerequisite: ADM 2815 or ADM 3815.

ADM4896 Independent Study in HRM 3 ch [W]
Preparation of an empirical or theoretical study in HRM under the supervision of a faculty member. Application required at least 30 days prior to the term in which work will be undertaken. NOTE: Students must have completed 96 ch and have attained a cumulative GPA of at least 3.0.

ADM4990 Honours Thesis 6 ch [W]
Individual development and defence before a committee of a written research endeavour under the guidance of a faculty supervisor. Students are advised to consult with their intended faculty supervisor prior to the completion of 97 ch. A written request for admission to this course must be submitted to the Associate Dean, Programs, Faculty of Business Administration, no later than 1 October of a student’s final year. NOTE: Available in designated majors and open only to Honours BBA candidates who have attained a cumulative GPA of at least 3.0. Subject to faculty availability.

ADM4995 Independent Study 3 ch
Involves planning and carrying out an empirical or theoretical investigation under Faculty supervision. Wide latitude given to the selection of topics and methods of investigation. Application for approval required at least 30 days prior to the term in which work will be undertaken. May require defence of a report before a committee of appropriate Faculty members. NOTE: Applications normally approved only for senior-year students who have attained a cumulative average GPA of at least 3.0.
CHE1001  Introduction to Chemical Engineering  1 ch (1C)
Provides an overview of the chemical engineering profession and chemical process industries. The use of unit operations to convert raw materials into useful products is introduced. Students receive a foundation in unit systems, dimensional analysis, processes and process variables in the context of engineering calculations. A framework for the remainder of the program curriculum is developed. NOTE: This course may not be taken for credit if previous credit has been given for CHE 2003 (or equivalent).

CHE2004  Fundamentals II - Mass & Energy Balances  3 ch (3C 1T)
Fundamentals such as vapor-liquid equilibrium, partial saturation and real gas relationships are introduced and integrated into material balance problems. The concepts of enthalpy and energy balances on open systems. Unsteady-state and simultaneous mass and energy balance systems are modeled and solved using computer packages. Prerequisite: CHE 2003.

CHE2301  Transport Phenomena in Chemical Engineering  3 ch (3C)

CHE2412  Chemical Engineering Laboratory I  3 ch (1C 3L) [W]
Covers bomb and flow calorimetry, material and energy balance study of the University heating plant, flow mechanics experiments including flow meter calibrations and pressure drop measurements in pipes and fittings. Interpretation of experimental data, group dynamics, safety issues, report writing and oral presentations. Students work under close supervision. Prerequisites: CHE 2004, CHE 2012, CHE 2703.

CHE2501  General Materials Science  3 ch (3C)
Principles relating the properties and behaviour of engineering materials to their structure; atomic bonding forces and strength of interatomic and intermolecular bonding forces, atomic arrangement in solids, structural imperfections and atom movements in solids; principles of phase diagrams and their application to multiphase materials, with particular reference to the iron-carbon system; mechanical and electrical properties of engineering materials; semiconductors, polymers and ceramics; and their relation to internal structure. Prerequisites: CHEM 1987 and MATH 1013.

CHE2506  Materials Science Laboratory  1 ch (3L*)
Laboratory experiments are conducted to illustrate behaviour of materials and other concepts covered in CHE 2501. Prerequisite: CHEM 1987. Co-require: CHEM 2501.

CHE2525  Fundamentals of Chemical Process Design  4 ch (3C 1T) [W]
Introduces principles of chemical process design strategy and decision making. Fundamental Chemical Engineering concepts such as material and energy balances, thermodynamics, fluid mechanics, and materials science are integrated into the design process. Flowsheet preparation, chemical process safety, loss prevention, project planning, codes and standards, responsible care and environmental stewardship. Engineering economics and profitability. Prerequisites: CHE 2003, CHE 2012, ENG 1015. Co-require: CHEM 2004, CHE 2006.

CHE2703  Fluid & Fluid Particle Mechanics  4 ch (3C 1T)
Introduction to fluid practical mechanics, including fluid properties, statics and kinematics, and fluid momentum and energy. Emphasis on internal flows: laminar/turbulent flows, friction factor, loss coefficients for fittings and valves, and pipe networks. Design of piping networks and pump selection using pump curves. Motion of particles in fluids. Theory and design of industrial equipment for clarification/sedimentation and cyclone separation. Prerequisites: MATH 1013.

CHE3123  Chemical Engineering Thermodynamics  3 ch (3C)
Development of thermodynamic work functions and application to chemical and phase equilibria; chemical potential and other partial molar properties, First and Second Law applications in flow processes. Prerequisites: CHE 2012, MATH 2513.

CHE3304  Heat Transfer  4 ch (3C 1T)

CHE3324  Unit Operations I  4 ch (3C 1T)
Analysis and design procedures for mass transfer operations based on equilibrium stage concept. Graphical procedures for simple systems. Numerical stage wise procedures. Distillation, gas absorption and liquid extraction. Flow through porous media and fluidization. Prerequisites: CHE 2004 and CHE 2703.

CHE3332  Mass Transfer  3 ch (3C)

CHE3418  Numerical Methods & Modeling for Chemical Engineering Processes  3 ch (3C)

CHE3424  Chemical Engineering Laboratory II  3 ch (1C 3L) [W]
Experiments in heat transfer. Emphasis on interpretation of experimental data, group dynamics, experimental design, and report writing. Students will work under limited supervision. Co-require: CHE 3304.

CHE3434  Chemical Engineering Laboratory III  3 ch (1C 3L) [W]

CHE3505  Chemical Process Design  4 ch (3C 1T) [W]
Preliminary sizing of equipment, optimization techniques, estimation of capital and operating costs, heat-exchanger networks, pressure vessels, and computer-based process design tools. Students work individually and in teams on process design projects that draw on knowledge gained in previous courses, concepts taught in class and information available in the literature. Prerequisites: CHE 2004, CHE 2525 and CHE 2703. Co-requisites: CHE 2501 and CHE 3304.

CHE4101  Chemical Reaction Engineering  3 ch (3C 1T)

CHE4225  Chemical Plant Design  8 ch (3C 5T)
Full-year capstone course in chemical process design. Under academic and industrial supervision, students complete conceptual design of large chemical plant in simulated engineering consulting environment. Working individually and as part of a team, students must demonstrate ability to integrate fundamental, advanced and researched chemical engineering principles into innovative and practical design that produces sellable commodity. Design strategy and scheduling are stressed alongside client satisfaction. Students complete a comprehensive report that includes design specifications on equipment, engineering drawings, and economic analysis of the concept. Formal presentations of design work are required. Prerequisites: CHE 3304 and CHE 3505. Co-require: CHE 4101, CHE 4341 and CHE 4601.
CHE4341  Unit Operations 2  3 ch (3C 1T)
Theory and design of industrial equipment for drying, humidification, absorption and stripping. Adsorption, ion exchange and membranes, are covered in detail. Prerequisite: CHE 3324, CHE 3332.

CHE4404  Chemical Engineering Laboratory IV  3 ch (6L*) [W]
Experiments to characterize feedback control systems, gas absorption columns, chemical reactors, distillation columns and other unit operations, which underlie the practice of chemical engineering, will be conducted. Students will apply their knowledge of interpretation of experimental data, group dynamics, laboratory safety and report writing throughout this course. Experiments will be conducted independently. Prerequisites: CHE 3424, CHE 3434, Co-requisites: CHE 4101, CHE 4341, CHE 4601; One of CHE 3424 or CHE 3434 may be taken as a co-requisites with permission of instructor.

CHE4601  Process Dynamics and Control  4 ch (3C 1T)
Basic techniques for the dynamic analysis of elementary processes; the characteristics of controllers, control valves, measurement devices and transmitters; feedback control loops; stability of loop from the viewpoint of the roots of the characteristic equation and root locus techniques. Prerequisites: MATH 3503, CHE 2703 and CHE 3304.

CHE5124  Adsorption and Adsorption Processes  3 ch (3C)

CHE5234  Oil Refining and Natural Gas Processing  3 ch (3C)
An introduction to the physical, chemical, and engineering principles used in the processing of natural gas, petroleum, and bitumen. The nomenclature, common processes, basic designs, and relevant regulations will be covered.

CHE5244  Enhanced Oil Recovery Processes  3 ch (3C)
Overview of the secondary and tertiary enhanced oil recovery (EOR) processes commonly applied in Canada and worldwide. The fundamental EOR principles are described and examples in Canadian fields are analyzed. Some of the subjects presented include water flooding, gas flooding, miscible flooding, chemical treatments, mobility control applications, steam injection, microbial and mining operations such as oil sands production. Basic polymer concepts. Polymer structural characteristics and properties. Mechanisms, kinetics and reactors for polymerization. Polymer rheology and transport processes. Processing applications and the effect of processing on polymer behavior. Prerequisites: CHE 2501, CHE 2703, MATH 3503. Co-requisites: CHE 3304 or equivalent.

CHE5254  Polymer Reaction Engineering and Polymer Processing  3 ch (3C)
Basic polymer concepts. Polymer structural characteristics and properties, Mechanisms, kinetics and reactors for polymerization, Polymer rheology and transport processes. Processing applications and the effect of processing on polymer properties. Pre-requisites: CHE 2501, CHE 2703, MATH 3503. Co-requisite: CHE 3304.

CHE5264  Oil Sands Technology  3 ch (3C)
Fundamental principles of oil sands technology: bitumen and rock properties, origins of oil sands, types of oil sand accumulations, volumetric estimates and recoverable reserves, oil sand mining, bitumen separation and processing for production of synthetic oil, production of in-situ oil sands, description of the different processes for in-situ oil sands production currently applied or under evaluation, current research and process development, and a review of the environmental challenges of oil sands production. This course is intended for senior level students and graduate students.

CHE5313  Energy and The Environment  3 ch (3C)
Explores generation and use of energy; extraction of raw materials through product production. Includes: survey of known energy reserves, emerging technologies, discusses the thermodynamic and regulatory constraints to energy conversion. Fossil fuels, nuclear power and renewable energy sources are described. Prerequisites: CHE 2012, CHEM 1982.

CHE5314  Chemical Process Industries  3 ch (3C)
A technical overview of selected chemical industries with consideration of their impact on the environment. Emphasis is on current process technology and pollution control methods. Environmental guidelines and regulations are also presented. Five modules, each covering a specific chemical industry, taught by Chemical Engineering faculty.

CHE5413  Air Pollution Control  3 ch (3C)
Sources of air pollution; modeling atmospheric dispersions; pollution control in combustion; particulate control methods; control of gaseous emissions; industrial odour control; indoor-plant air quality. Prerequisite: CHE 3324, Co-requisite: CHE 4341.

CHE5416  Bioseparations Science and Engineering  3 ch (3C)
The first part of the course will provide basic information on biochemistry (small molecules and macromolecules) and engineering analysis, such as analysis of biological activity and purity. The second part will cover a number of separation techniques, such as extraction, crystallization and drying in a more general way. This emphasis in this part of the course will be on liquid chromatography and absorption. Co-requisite: CHE 4341.

CHE5423  Chemical Engineering Practice School  4 ch [W]
A two week industrial practice school in selected industrial process plants scheduled after spring examinations. Groups of students, with Faculty supervisors, are assigned to engineering projects to be carried out on industrial process units. Students are required to present an oral report to plant operating and technical personnel at the end of the practice session. A written report is also required. As there will be practical limitations to the number of students in any one practice school, application for positions in this course will be treated on a first-come, first-served basis. This course is strongly recommended as a technical elective for students not planning to complete either the co-op or professional experience programs. Prerequisites: CHE 2004, CHE 2412.

CHE5434  Transport Phenomena  3 ch (3C)
Fundamental analogies between fluid mechanics, heat transfer, and mass transfer, and the applications of those analogies to practice. Derivation of differential and partial differential transport equations. Turbulence: boundary layers, scaling, dispersion. Core and optional models also cover key aspects of related topics such as dimensional analysis, mixing in pipe flows, reverse osmosis, ion transport, polymer rheology, and evaporation/condensation processes. Prerequisites: CHE 3304 and MATH 2513, or equivalents.

CHE5515  Advanced Surface Characterization  3 ch (3C 1L*) [W]
This course covers the basic principles and practical aspects of several advanced surface analysis techniques which include (i) X-ray photoelectron spectroscopy (XPS or ESCA), (ii) secondary ion mass spectrometry (SIMS), (iii) confocal laser scanning microscopy (CLSM), (iv) atomic force microscopy (AFM), and (v) scanning electron microscopy (SEM). Demonstrations will be given on most of these facilities. Students will propose a research method for tackling their interested problems by using one or two surface analysis techniques they have learned from this course. Prerequisites: CHE 2501 and CHE 2506.

CHE5522  Nanotechnology  3 ch (3C)
Studies the science of Nanotechnology and surveys current and emerging applications of nanomaterials and nanodevices in many engineering disciplines. The unique physical properties of materials at the nanometer scale are discussed and explained. Fabrication methods and advanced instrumentation for the construction, manipulation and viewing of nanometer-sized materials are presented. Prerequisite: CHEM 1982.

CHE5714  Electrochemical Engineering  3 ch (3C)

CHE5724  Special Topics in Chemical Engineering  1 ch (1C)
N/A

CHE5725  Special Topics in Chemical Engineering  2 ch (2C)
N/A

CHE5726  Special Topics in Chemical Engineering  3 ch (3C)
N/A

CHE5734  Chemical Engineering Report  3 ch (6L*) [W]
The major requirement of this course is a report on a subject approved by the Department. Suitable topics include experimental studies, design projects, literature surveys, feasibility studies and computation projects. Oral presentations of the work will be required.

CHE5735  Thesis  6 ch (12L) [W]
The thesis is a research project done under the supervision of a faculty member. Progress depends largely on the initiative and diligence of the individual. A detailed report is submitted on completion of the project to gain credit for the course. An oral presentation is also required.

SECTION H: FREDERICTON COURSES
SECTION H: FREDERICTON COURSES

CHE5824 Corrosion Processes 3 ch (3C)

CHE5834 Nuclear Engineering 3 ch (3C)
Radio-active decay, fission energy, nuclear interactions, neutron scattering and absorption. Neutron diffusion elementary reactor theory, four and six factor formulae, neutron flux variation. Reactor kinetics, source multiplication, decay heat, reactor start-up and shut down. Fuel burnup, fission product poisoning, refuelling. Temperature and void effects on reactivity, reactor control. Fuel handling and waste disposal. This course is intended for senior level students. Prerequisites: CHE 2012 or ME 3413; CHE 2703.

CHE5844 Nuclear Safety and Reliability 4 ch (3C 1L)
The philosophy of safety design and operation of nuclear power reactors, responsibilities for safe operation. The role and place of regulatory agencies. The concept of risk, quantitative risk assessment. Methods for calculation of frequency and consequences of reactor accidents and evaluation of the safety level of a nuclear station. Case studies of past reactor accidents, lessons learned, and effect on future operation.

CHE5913 Pulp Production 3 ch (3C)
Wood and chip requirements; overview of pulping processes; mechanism and variables in mechanical and chemimechanical pulping, general principles of chemical pulping, kraft cooking, sulphite cooking, extended and oxygen delignification, pulp washing, pulp bleaching, recovery of pulping chemicals. Prerequisites: CHEM 2401.

CHE5923 Papermaking 3 ch (3C)
Overview of pulping and papermaking processes; pulp and paper properties; requirements for different grades of paper and board; stock preparation; applications and fluid mechanics; wet-end chemistry; dry-end operations. Prerequisites: MATH 1013, CHE 2301.

CHE5933 Biorefining: Principles, Processes and Products 3 ch (3C)
This course discusses various bio-refining processes, placing emphasis on fundamental process chemistry and biology in the conversion of biomass to engineered products. Pathways for the use of wood resources are described in detail; exemplary processes, such as gasification, pyrolysis, pre-extraction and bio-diesel production are discussed. Industrial fermentation, including sugar fermentation to produce ethanol, will be explored. The modeling concept for integrated pulp manufacturing and bio-refining will also be discussed. Prerequisites: CHEM 1982, CHEM 2401.

BRIDGING YEAR FOR FIRST NATIONS STUDENTS
See beginning of Section H for abbreviations, course numbers and coding.

For details of the Bridging Year program, see First Nations Student Services and Programs: Mi’kmag-Maliseet Institute.

Study Skills Development Courses
Non-credit courses in study skills development. Involve the use of on-campus services, non-credit training sessions, and special tutoring sessions.

BY 103N Study Skills Development I
BY 104N Study Skills Development II

Non-Credit Makeup Courses
Non-credit makeup courses in academic areas in which the student's attainments are below an acceptable standard for university study. May entail the use of provincial secondary school curricula or enrolment in secondary classes as such.

BY 105N Secondary Education I: English
BY 106N Secondary Education II: Mathematics
BY 107N Secondary Education III: Biology
BY 108N Secondary Education IV: Chemistry
BY 109N Secondary Education V: Physics
BY 110N Secondary Education VI: Economics

CHEMISTRY

Students should note that in the Science Faculty the minimum acceptable grade in a course which is required by a particular program or is used to meet a prerequisite, is a "C". Any student who fails to attain a "C" or better in such a course must repeat the course (at the next regular session) until a grade of "C" or better is attained. Students will not be eligible for graduation until such deficiencies are removed. The only exception may be granted for a single course with a "D" grade that is a normal part of the final year of that program, and is being taken for the first time in the final year.

Valid WHMIS (Workplace Hazardous Materials Information System) certification is required for all students who wish to take CHEM laboratory courses. WHMIS certification workshops will be provided. Information regarding WHMIS training will be provided during the first week of classes. NOTE: See beginning of Section H for abbreviations, course numbers and coding.

CHEM1001 General Chemistry I 3 ch (3C 1T)
An introduction to atoms and molecules, chemical equations and reactions, the periodic table, the electronic structure of atoms, and chemical bonding as well as an introduction to organic chemistry including structure and bonding, functional groups, isomers, and polymers. An adequate high school background in math, and chemistry is required.

CHEM1006 General Chemistry Laboratory I 2 ch (3L)
Topics include: measurements and statistics, inorganic and organic synthesis, qualitative and quantitative analysis, computer modeling, and molecular geometry. WHMIS certification required (see beginning of Chemistry Courses section for details). Co-requisite: CHEM 1001.

CHEM1012 General Chemistry II 3 ch (3C 1T)
An introduction to gases, thermochemistry, rates of reaction, chemical equilibrium, spontaneity of reactions, reactions in aqueous solution, acids and bases, acid-base equilibria, solubility equilibria, redox reactions, and electrochemistry. NOTE: Credit can be obtained for only one of CHEM 1012 or CHEM 1982. Prerequisite: CHEM 1001; Co-requisite: MATH 1003 or equivalent.

CHEM1017 General Chemistry Laboratory II 2 ch (3L)
Topics include: ideal gases, heats and rates of reactions, chemical equilibria, acid-base equilibria, redox titrations, and voltalic cells. WHMIS certification required (see beginning of Chemistry Courses section for details). NOTE: Credit can be obtained for only one of CHEM 1017 or CHEM 1987. Prerequisite: CHEM 1006. Co-requisite: CHEM 1012.

CHEM1303 Introduction to Environmental Chemistry 3 ch (3C)
This course examines current global environmental issues that have a basis in chemistry. The chemistry of air, water, soil and living systems is described at an introductory level, while incorporating the relevance of anthropogenic activity and impact on both the causes and solutions to these problems. Core chemical foundations, such as conservation of mass, understanding the periodic table, and molecular structure, will be discussed. NOTE: This course cannot be used as a substitute for CHEM 1001, CHEM 1012 or CHEM 1982.

CHEM1982 General Applied Chemistry 3 ch (3C 1T)
Intended primarily for non-science majors. Building on examples from environmental chemistry, polymers, fuels and corrosion, the course covers chemical material properties, solutions & solubility, kinetics & equilibrium, acids & bases, thermodynamics and electrochemistry. NOTE: Credit can be obtained for only one of CHEM 1017 or CHEM 1982. Prerequisite: 70% in Grade 12 Chemistry.

CHEM1987 General Applied Chemistry Laboratory 2 ch (3L)
Intended primarily for non-science majors students. Topics include: ideal gases, heats and rates of reactions, chemical equilibria, acid-base equilibria, redox titrations, and voltalic cells. WHMIS certification required (see beginning of Chemistry Courses section for details). NOTE: Credit can be obtained for only one of CHEM 1017 or CHEM 1987. Prerequisites: 70% in Grade 12 Chemistry. Co-requisite: CHEM 1982.

CHEM2002 Quantum Chemistry I 4 ch (3L 1T)

CHEM2009 Experience in Chemistry Research I 3 ch (3L W)
CHEM 2009 is a project based course where students conduct research under the supervision of a chosen faculty member. Students must have declared a Science Major and must have CGPA of 3.7 or better to enter after first year or a CGPA of 3.0 or higher to enter after second year. Students will be provided with a list of projects and applicants names will be forwarded to project supervisors. Project assignment will be made by the Director of Undergraduate Studies and enrolment may be limited. Students are encouraged to plan for alternative courses in the case that no suitable project is available. A minimum of at least 3 scheduled hours per
A written report on the scientific activities of the work term. A component of the grade will be based on the employer's evaluation of the student. (Students must have a GPA of 2.7 or better for CHEM Co-op placement.)

CHEM3009 Experience in Chemistry Research II 3 ch (3L) [W]
CHEM 3009 is a project based course where students conduct research under the supervision of a chosen faculty member. Students must have declared a Science Major and must have a CGPA of 3.7 or better to enter after first year or a CGPA of 3.0 or higher to enter after second year. Students will be provided with a list of projects and applicants' names will be forwarded to project supervisors. Project assignment will be made by the Director of Undergraduate Studies and enrolment may be limited. Students are encouraged to plan for alternative courses in the case that no suitable project is available. A minimum of at least 3 scheduled hours per week is required and one seminar presentation will be required at the end of the academic year, as well as a written report. WHMIS certification required (see beginning of Chemistry Courses section for details).

Prerequisites: CHEM 1001, CHEM 1006, CHEM 1012, CHEM 1017, and CHEM 2009.

CHEM3122 Analytical Chemistry II 3 ch (3C)
Principles of both equilibrium-based and basic instrumental methods of analysis. Topics include non-aqueous and complexometric titrations, analytical separations, potentiometry, analytical spectrophotometry, gas chromatography, elementary chromatography, and sample preparation and method development. Pre-requisite: CHEM 2121.

CHEM3137 Analytical Chemistry Laboratory II 2 ch (3L) [W]
Applications of both equilibrium-based and basic instrumental methods of chemical analysis. Experiments are designed to illustrate the applications of non-aqueous and advanced titration methods, analytical separations, potentiometry, analytical spectrophotometry (atomic and UV-vis), liquid chromatography (HPLC), sampling and method development. WHMIS certification required (see beginning of Chemistry Courses section for details).

Prerequisites: CHEM 2121 and CHEM 2136.

CHEM3201 Advanced Chemistry of the d-Block Elements 3 ch (3C)
Transition metals, organometallic, chemistry and catalysis. Introduction to biological inorganic chemistry. Prerequisite: CHEM 2222.

CHEM3222 Main Group Inorganic Chemistry 3 ch (3C)
Perodic trends and applications in Materials Science. Prerequisites: CHEM 2011.

CHEM3236 Inorganic Chemistry Laboratory II 2 ch (3L) [W]
Advanced preparative techniques in inorganic chemistry. Applications of IR and NMR spectroscopies. WHMIS certification required (see beginning of Chemistry Courses section for details). Prerequisite: CHEM 2237.

CHEM3421 Intermediate Organic Chemistry Mechanisms and Synthesis 3 ch (3C)
The mechanistic aspects of organic reactivity and the application of selected reactions to synthesis of organic molecules. Prerequisites: CHEM 2422.

CHEM3422 Advanced Organic Chemistry Reactions and Mechanisms (O) 3 ch (3C)
A focus on the development of mechanistic and synthetic strategies through the study of pericyclic, rearrangement, and organometallic reactions. Prerequisites: CHEM 3421.

CHEM3423 Advanced Organic Chemistry Stereochemistry (O) 3 ch (3C)
A focus on the development of mechanistic and synthetic strategies through the study of conformational analysis, stereoelectronic effects and asymmetric synthesis. Prerequisites: CHEM 3421.

CHEM3523 Medicinal Chemistry 3 ch (3C) [W]
An introduction to medicinal chemistry. Sample topics include the drug discovery process, the medicinal chemistry of enzymes, receptors, and nucleic acids, as well as modern experimental and computational approaches to drug design. Chemical aspects of current protein and nucleic acid tools will also be covered. Prerequisites: BIOL 2023 and either CHEM 3421 or CHEM 3422.

CHEM3621 Chemical Kinetics and Electrochemistry 3 ch (3C)
Elementary electrochemistry, electrochemical cells, electrolysis, electromotive forces, applications of EMF measurements. Reaction kinetics and mechanisms, uni- and, and molecular reactions, catalysis, enzyme catalysis, chain reactions, reaction dynamics, steric effects and transition state theory. Prerequisites: MATH 2003 or equivalent, CHEM 2601 (or CHE 2012 for Chemical Engineering students only).

CHEM32601 Introduction to Fundamental Classes of Organic Reactions 3 ch (3C)
The three laws of thermodynamics, thermochemical calculations, chemical equilibria, introduction to phase rule. Prerequisite: MATH 1013 or equivalent and CHEM 1012; Co-requisite: MATH 2003 or equivalent or Departmental Approval.

CHEM2882 Career Skills for Chemistry Majors 3 ch (3C)
This course is specifically designed for chemistry majors to equip students with the necessary skills to succeed in an ever-changing job market and to take advantage of a multitude of career options. Note that enrolment is restricted to students in the Chemistry and Medicinal Chemistry programs (Majors and Honours).
CHEM3622 Advanced topics in physical chemistry. 3 ch (3C)
Probability distributions, ensembles, Maxwell-Boltzmann distribution, partition functions, hard sphere collision theory, potential energy surfaces, transition state theory, reaction dynamics. Prerequisites: Math 2003 and 2213 or equivalent, CHEM 2002 and CHEM 3621.

CHEM3637 Advanced techniques and reactions in experimental organic chemistry. 2 ch (3L) [W]
Introduction to experimental physical chemistry. Topics include areas in thermochromic chemistry, kinetics and electrochemistry. Some experiments have computational chemistry components. WHMIS certification required (see beginning of Chemistry Courses section for details). Prerequisites: CHEM 2002, CHEM 2601 and CHEM 3621.

CHEM3886 Advanced topics in inorganic chemistry. 2 ch (3L)
Prerequisites: CHEM 2002 and CHEM 2601.

CHEM4013 Advanced topics in analytical chemistry. 2 ch (3L)
Applications of group theory in chemistry. Practical computational chemistry components. WHMIS certification required (see beginning of Chemistry Courses section for details). Prerequisites: CHEM 3523 or permission of the instructor.

CHEM4042 Advanced Physical Chemistry. 2 ch (2C)
Prerequisites: CHEM 3523 or permission of the instructor.

CHEM4222 Advanced topics in organic chemistry. 2 ch (2C)
Prerequisites: CHEM 3523.

CHEM4416 Advanced techniques and reactions in experimental organic chemistry. 2 ch (3L)
Prerequisites: CHEM 3582 or permission of the instructor.

CHEM4422 Directed Studies in Advanced Chemistry. 3 ch
Prerequisites: Departmental approval.

CHINESE
Courses in Chinese Language are offered at the Introductory level and occasionally at the Intermediate level if resources are available. See beginning of Section H for abbreviations, course numbers and coding.

CHNS1013 Introductory Chinese I. 3 ch (3C)
This introductory course acquaints students with some of the fundamentals of Modern Standard Chinese (Mandarin) and provides basic oral communication skills. Romanized transcription is used. Not open to students with any knowledge of Chinese.
CHNS1023 Introductory Chinese II 3 ch (3C)
This course is a continuation of Chinese I (CHNS 1013). It aims to expand the basic communicative skills, and also progressively introduces a limited number of characters for reading comprehension purposes. Not open to students to with any knowledge of Chinese. Prerequisite: CHNS 1013.

CHNS2013 Intermediate Chinese I 3 ch (3C)
This course is intended for students with limited prior background in spoken and written Chinese and is offered to consolidate oral communicative skills acquired in CHNS 1013 and CHNS 1023. Additional Characters will be introduced for the purposes of reading and writing. Not open to students with any knowledge of Chinese. Prerequisite: CHNS 1013 and CHNS 1023.

CHNS2023 Intermediate Chinese II 3 ch (3C)
This course is a continuation of Intermediate Chinese I. It aims mainly to expand the oral communicative skills. More characters will be introduced at this level for reading comprehension purposes. Not open to students with any knowledge of Chinese. Prerequisite: CHNS 2013.

CHNS3013 Advanced Chinese I 3 ch (3C)
This course is a continuation of Intermediate Chinese I and II. It aims at expanding the oral communication skills in Chinese with a focus on Chinese characters. Over 300 characters will be introduced for reading and writing purposes. This course is open to students who have mastered Chinese phonetic transcriptions of Chinese characters (Mandarin Pinyin). Prerequisite: CHNS 2023. Not open to Mandarin and Chinese dialect speakers.

CHNS3023 Advanced Chinese II 3 ch (3C)
This course is a continuation of CHNS 3013. It aims at expanding the oral and written communication skills in Chinese. More characters will be introduced for reading and writing purposes. This course is open to students who have mastered Chinese phonetic transcriptions of Chinese characters (Mandarin Pinyin). Prerequisite: CHNS 3013. Not open to Mandarin and Chinese dialect speakers.

CIVIL ENGINEERING
Prerequisites and Co-requisites are indicated for specific courses where required. Under exceptional conditions the prerequisite or Co-requisites may be waived with the consent of the instructor and the Department Chair. The following courses (Co-requisites) are Prerequisites for all 3000-level or higher Civil Engineering courses: CE1023, ENG 1001, ENG 1003, ENG 1015, CS 1003, MATH 1013, MATH 1503.

CE1023 Statics for Engineers 4 ch (3C 2L)
Forces and moments are introduced with vector algebra, followed by the application of equilibrium conditions for particles and rigid bodies. Free body diagrams (FBD’s) are used to analyze trusses and frames, as well as internal member forces (bending moment and shear force diagrams). Additional topics include friction, centroids, and moments of inertia. Prerequisite: PHYS 1081. Co-requisite: MATH 1003.

CE2023 Mechanics of Materials 5 ch (3C 3L)
Elastic and plastic stress, strain; behaviour of beams and columns; torsion; material strength. Prerequisite: CE 1023. Co-requisite: MATH 1013.

CE2033 Structural Analysis 5 ch (3C 3L)
Influence lines, calculation of deflections, flexibility analysis, stiffness analysis and approximate analysis. Prerequisite: CE 2023.

CE2113 Soil Mechanics I 4 ch (3C 3L*)
Soil properties, seepage, effective stress, consolidation, shear strength. Prerequisites: ESCI 1001, ESCI 1026, CE 2023. Prerequisite: CE 2703.

CE2703 Introduction to Fluid Mechanics 4 ch (3C 1T)
Physical properties of liquids and gases, fluid statics, kinematics of fluid flow, energy considerations in steady flow, momentum and dynamic forces in fluid flow, fluid measurements, introduction to forces on immersed bodies. Prerequisites: CE 1023, MATH 1013.

CE2913 Numerical Problem Solving 4 ch (3C 2L)
An introduction to the application of numerical methods and statistical techniques to the solution of civil engineering problems. Introduction to the systems approach and system analysis terminology. Numerical solution of civil engineering problems using root finding, interpolation, integration, and the solution of systems of algebraic equations. Introduction to the numerical solution of ordinary and partial differential equations. Techniques such as multiple linear regression, stepwise regression, time series analysis, non-parametric tests, and decision-making are applied to the design and operation of civil engineering systems. Prerequisites: CS 1003, STAT 2593, MATH 1503, MATH 2513.

CE2973 Civil Engineering Design I 3 ch (2C 2L) [W]
Continued development of communication skills used by engineers through the application of the design process to meet a well-defined set of requirements and constraints. Communication aspects emphasized include graphical representations of designs, formalized design calculations, and the development of project schedules and estimates. Design aspects emphasize the generation, iteration and analyses of alternatives. Prerequisites: ENGG1003, ENGG 1015.

CE3053 Reinforced Concrete Design I 4 ch (3C 2L)
Introduction to design of reinforced concrete structural elements by limit states design. Design of beams and one way slabs for flexure and shear, bond and development of reinforcement, serviceability limits, columns, and footing design. Prerequisites: CE 2803, CE 3113.

CE3063 Structural Steel Design 4 ch (3C 2L)
Introduction to design of steel structures using limit states design principles. Topics include an introduction to the National Building Code, steel as building material, steel shapes, tension members, compression members, beams and connections. Prerequisite: CE 2033.

CE3123 Foundation Engineering I 4 ch (3C 1T)
Lateral earth pressures, shallow and deep foundations, stability of cuts and slopes. Prerequisite: CE 2113.

CE3201 Transportation Engineering 5 ch (3C 3L)
Principles of transportation engineering: modal characteristics, travel demand functions, traffic flow theories and models, and vehicle-track principles. Highway transportation classification, elements and design principles. Laboratory work is field-oriented and involves elementary traffic studies. Prerequisite: STAT 2593.

CE3403 Environmental Engineering 4 ch (3C 3L)
Introduces the problems and principles of control or modification of the environment. Considers an environmental dimension to all planning, design and analysis functions carried out by engineers. Restricted to students with at least 60 ch completed. Prerequisite: CE 2703 or CHE 2703.

CE3513 Materials for Civil Engineers 4 ch (2C 2L)

CE3603 Construction Engineering 4 ch (3C 2T)
The management of on-site construction processes for various project objectives (e.g., time, cost, safety, quality, environment), contracting processes and common construction work processes. Application of the NB Occupational Health and Safety Commission Act and Regulations to construction is covered. Relationships of participants in the construction industry. Standard contract documents. Prerequisite: CHE 2973.

CE3713 Hydraulics and Hydrology 5 ch (3C 3L)
Water flow in pipes; computer-based analysis of pipe networks; characteristics of pumps; open channel flow. The hydrological cycle: precipitation, runoff and hydrograph analysis; return period; the rational method; groundwater flow. Prerequisite: CE 2703.

CE3963 Engineering Economy 3 ch (3C)
Basic methods of engineering economy including time value of money, compound interest models, interest and discount rates, and depreciation; critical path methods. Emphasis is placed on commonly used computational procedures. Restricted to students with at least 60 ch completed. Prerequisite: CS 1003 or equivalent.

CE3883 Civil Engineering Design II 3 ch (1C 4L) [W]
Design of a system or process to meet desired needs within identified constraints and communication of the result to a broader audience. Design topics covered include the identification and application of standards, codes and regulations, and approaches for managing a broad set of design
CE4993 Senior Team Design 6 ch (1C 3L)

Working in teams, students will complete a full year of Civil engineering design project that draws on their combined knowledge from the course courses in the program. By engaging an identified client with a design problem, student teams will work through the entire process of developing a design solution with the support of industry and academic mentors. Students will manage their projects professionally, prepare comprehensive design documentation, and present and defend all aspects of their design to the client and a broader audience. Prerequisite: Completion of all Civil Engineering core courses. Exceptions will be considered on a case-by-case, but under no circumstances will a student who is missing more than two core Civil courses be permitted into Senior Team Design.

CE5003 Structural Dynamics 4 ch (3C 2L)

Dynamic equilibrium of structural engineering problems with topics including linear dynamics, discrete and continuous systems, free and forced vibration, transient response using numerical integration and Duhamel’s integral, and model analysis of multi-degree-of-freedom systems. Practical problems exploring structures under dynamic loads such as earthquake, wind, and blast are covered. Prerequisites: CE 3053, CE 2913, and either CE 3053 or CE 3063.

CE5043 Structural Engineering 4 ch (3C 2L)

Fundamentals of the stiffness method analysis of trusses, beams and frames using the matrix stiffness method. Concepts of structural systems including common systems in buildings and bridges are introduced. Application of structural engineering computer software is introduced. Prerequisite: CE 2033.

CE5053 Reinforced Concrete Design II 4 ch (3C 3L)

Continuation of CE 3053. Includes a review of flexure and shear requirements for limit states design, serviceability limits and deflection calculations, torsion, slender columns, continuity, two-way slabs, and footing design. Consideration of prestressed concrete, strut-and-tie modeling, and comparison with ACI design code requirements. Requires a group design project. Prerequisite(s): CE 3003, CE 3053.

CE5062 Introduction to the Finite Element Method 4 ch (3C 2L)

Basic concepts and mathematical foundations of the Finite Element Method (FEM); Application of the FEM for numerical simulation of engineering problems. Students apply the FEM theories to develop basic computer programs; students are also introduced to commercial finite element software. Prerequisite: CE 5043 or permission of the instructor.

CE5063 Structural Steel Design II 4 ch (3C 2L)

The behaviour of beam-columns, plate girders, composite steel/concrete girders, and welded and bolted connections are presented and design methods are developed. The concepts of structural stability, fatigue, common structural systems in steel buildings and bridges, and application of computer in structural steel design are also introduced. Prerequisites: CE 2033, CE 3053, CE 3063.

CE5073 Structural Masonry Design 4 ch (3C 2L)

Review of structural principles and codes relating to masonry and properties of masonry components; analysis and design of components; architectural and construction considerations related to masonry. Prerequisites: CE 2033, CE 3053, CE 3063.

CE5083 Structural Wood Design 3 ch (3C)

Introduction to structural principles and codes relating to wood design. Consideration will be given to the design of individual elements (beams, columns, etc.) and systems of elements (shear walls, laminated bridge decks, etc.), as well as available computer software to assist in wood design. Prerequisite: CE 2033.

CE5132 Foundation Engineering II 3 ch (3C)

A continuation of earlier soils engineering courses dealing with shallow foundations (including design of reinforced concrete footings), deep foundations, excavations, cofferdams and factors relating to foundation design. Prerequisite: CE 3123.

CE5163 Advanced Soil Mechanics 4 ch (3C 2L)

Advanced topics in permeability and seepage; consolidation; constitutive models; triaxial testing. Laboratory component includes triaxial, consolidation, and flexible wall permeability tests. Prerequisite: CE 2113.

CE5201 Road Materials and Structures 4 ch (3C 2L)

Soil classification, compaction, and stabilization for optimum use in road construction. Structural and hydraulic aspects of small scale drainage systems for roads. Prerequisite: CE 2113, CE 3713.

CE5203 Transportation Planning 4 ch (3C 2L)

Topics focus on several aspects of transportation planning, including studies and survey methods, data collection and analysis techniques, transport models, Geographic Information Systems in transportation (GIS-T), and transportation governance and policy. Prerequisite: CE 3201.

CE5212 Pavement Design I 4 ch (3C 3L)

A study of the design and construction of highway pavements. Production and testing of bituminous materials; design of bituminous mixtures, thickness design for flexible pavements, design of rigid pavements, and construction methods. Prerequisite: CE 2113.

CE5222 Traffic Engineering 4 ch (3C 3L)

Single vehicle and traffic stream characteristics; traffic studies; surveys, and analysis; traffic control devices; operations and economics of intersections and interchanges; traffic accident studies; legal and administrative aspects. Prerequisite: CE 3201.

CE5232 Transport Facility Design 4 ch (3C 2L) [W]

Topics focus on the analysis and design of highway and rail infrastructure and incorporate the economic, environmental and operational issues associated with facility development. Prerequisite: CE 3201.

CE5241 Infrastructure Asset Management 3 ch (3C)

Basic concepts in infrastructure management; programming of investments over a network of infrastructure assets; optimization of individual level project investment; evaluation techniques; structure and manipulation of data banks for infrastructure management systems. Prerequisite: CE 3201.

CE5411 Water Supply and Wastewater Removal 3 ch (3C)

Design, operation, and rehabilitation of municipal water and sewer systems with a focus on asset management. Topics include estimation of water and wastewater flow rates, transportation and distribution of potable water, collection and conveyance of wastewater, and modelling system performance. Prerequisite: CE 3713.

CE5421 Water Quality and Treatment 3 ch (3C 2L)

Applied water chemistry, epidemiological analysis, water analysis, water treatment processes and design, water treatment systems and plant design, public health issues and case studies. The content is tailored towards drinking water quality and treatment issues. This will be supplemented by detailed design of unit operations and processes involved in the treatment of drinking water. Prerequisites: CHEM 1982 (or equivalent) and CE 3403 or CHE 2004, or permission of course instructor.

CE5432 Wastewater Treatment and Pollution Control 4 ch (3C 2L)

Applied wastewater microbiology, wastewater analysis (physical, chemical, and biological), wastewater treatment processes, industrial and municipal wastewater treatment and management, wastewater treatment systems and plant design. The course content will focus on treatment and management issues of wastewater from industrial, municipal, and domestic sources. Pollution control strategies and protocols are also examined. Prerequisites: CHEM 1982 (or equivalent) and CE 3403 or CHE 2004, or permission of course instructor.

CE5463 Municipal Solid Waste Management 3 ch (3C)

Application of systems engineering principles and techniques to problems associated with the generation, collection, processing, recycling, treatment and disposal of municipal solid wastes. Modeling and optimization of solid waste management systems using linear, integer & dynamic programming. Design of collection systems, recycling facilities and composting operations. Prerequisite: CE 3403, CE 2913.

CE5503 Concrete Technology 4 ch (3C 2L)

In this course the properties of cement and concrete materials are studied. Topics include (i) materials for concrete, such as Portland cements, supplementary cementing materials, aggregates, and chemical admixtures; (ii) procedures for mix proportioning, batching, mixing, transporting, handling, placing, consolidating, finishing, and curing concrete; (iii) precautions necessary during hot- and cold-weather concreting; (iv) causes and methods of controlling volume changes; (v) commonly used control tests for quality concrete; (vi) introduction to special types of concrete. Applicable ASTM, AASHTO, ACI, and CSA standards are discussed. Prerequisite: CE 3513.

SECTION H: FREDERICTON COURSES

constraints such as health and safety, sustainability, economic, environmental, social, constructability, operability, and ethical. Communication skills developed in this course emphasize interaction with clients and the public. Prerequisites: CE 2973, CE 3201, CE 3663.
CE5612 Construction: Financial and Industry Issues 3 ch (3C)
The course focuses on the financial aspects of construction including methods and techniques for: estimating costs of construction; project financing and managing risks; and monitoring and controlling costs. The course will also introduce current issues within the industry, primarily from the financial perspective (e.g., infrastructure management, sustainable construction, quality management, technology adoption). Restricted to students with at least 100 ch successfully completed. Prerequisite: CE 3603.

CE5623 Project Management 4 ch (3C 1T)
Application of management methods for construction projects. Emphasis on supervisory management, contracts, and management methods. Application of critical path methodology for work organization and management control, including planning and scheduling, resource management, optimization techniques and cost control methods. Restricted to students with at least 100 ch successfully completed. Prerequisite: CE 3603.

CE5721 Ecohydraulics 4 ch (3C 2L)
Covers important topics in urban engineering hydrology, including: quantification of hydrological processes relevant to watershed water management, prediction of surface runoff and stream response, mitigation of impacts of urbanization and climate change for flood and drought design flows. Prerequisites: CE 2113, CE 3713.

CE5742 Engineering Hydrology 4 ch (3C 2L) [W]
Elements of hydrometeorology, precipitation, storm analysis, stream gauging, ground water hydraulics, evaporation, runoff, hydrograph analysis, unit hydrograph techniques, stream flow routing, flood frequency analysis, snowmelt, introduction to flood forecasting. Prerequisite: CE 3713.

CE5753 Engineering Hydrogeology 4 ch (3C 3L)
Covers important topics in quantitative hydrogeology, including: principles of saturated and unsaturated groundwater flow, solutions to groundwater flow problems, well hydraulics and pumping tests, and contaminant migration and attenuation processes in groundwater. Prerequisites: CE 2113, CE 3713, ENST 1001, ENST 1026.

CE5913 Special Studies in Civil Engineering I 1 ch
(See description for CE 5933).

CE5923 Special Studies in Civil Engineering II 2 ch
(See description for CE 5933).

CE5933 Special Studies in Civil Engineering III 3 ch
With the approval of the Department Chair and under the guidance of a member of the faculty, a student may perform special studies and investigations related to the undergraduate program. The extent of the work will determine the amount of credit. Students may receive credit(s) for one of CE 5913, CE 5923 and CE 5933 only. Restricted to students with at least 110 ch.

CE5963 Research Thesis 6 ch
The research thesis is an independent project conducted under the supervision of a faculty member over a period of two sequential semesters. Students are responsible for finding a supervisor and initiating the project. Suitable projects may include experimental investigations, field investigations, design projects, computational projects, software development or feasibility studies. Deliverables include a detailed proposal, periodic progress reports, a comprehensive dissertation and an oral presentation. Co-requisites: CE 3973. Restricted to students with 100 ch completed and with a GPA of 3.3 in the previous assessment year or a CGPA of 3.3.

CLASSICS AND ANCIENT HISTORY

Below are brief descriptions for the courses which deal with material in English translation.

Descriptions of Latin and Greek language courses can be found under the GREEK and LATIN courses

See beginning of Section H for abbreviations, course numbers and coding.

CLAS1323 Discovering Ancient Civilization 3 ch (3C) [W]
Through the lens of archaeology, students explore the sites, monuments, and artifacts of civilizations (in Mesopotamia, Anatolia, Egypt, the Indus Valley, Greece, Italy, and Roman Britain) that shaped Western society. The Tomb of King Midas, the pyramids of Egypt, the Greek theatre, and Roman amphitheater are among the topics covered. NOTE: Students cannot receive credit for both ARCH 1323 and CLAS 1323.

CLAS1403 The Ancient Greeks: Gods, Heroes, Politicians and Poets 3 ch (3C) [W]
An introduction to ancient Greek civilization, including its history, religion, literature, art, architecture, and thought. Readings include selections in translation from timeless mythologies epics such as Homer's Odyssey and the first major prose work in the Western world, Herodotus' Histories. Lectures are supplemented with images of the achievements of the Greek Classical Age, such as Parthenon on the Athenian Acropolis and the Apollo from the temple of Zeus at Olympia.

CLAS1413 The Romans: Gladiators and Senators, Engineers and Emperors 3 ch (3C) [W]
An introduction to ancient Roman civilization, including its history, religion, literature, art, architecture, and thought. Readings include selections in translation from tales of gods and heroes such as Vergil's Aeneid, and the autobiography of the great emperor Caesar Augustus. Lectures are supplemented with images of Rome's spectacular achievements, from the Colosseum and Pantheon in Rome to theatres and aqueducts from North Africa and the Middle East.

CLAS1503 Introduction to Mythology: The Gods and Heroes of 3 ch (3C) Greece and Rome
A survey of the myths which helped to shape the life and thought of the classical civilizations of Greece and Rome. Emphasis will be placed on myths describing the gods and their powers, the beginnings of the world, the earliest humans, the tales of the heroes, and miraculous experiences in the lives of ordinary persons. Students who have successfully completed CLAS 3503 may not enrol in this course.

CLAS1703 Greek and Latin Roots of Scientific Terminology 3 ch (3C)
Designed for anyone with an interest in the origin of words, this course introduces the student to basic scientific terminology, especially that of the life sciences, through the Greek and Latin sources of these words. This course aids in the understanding of these modern terms by exploring the connections between these words, how they came to be created, and the rules that govern the formation of new terms.

CLAS2233 "To Dig is to Explore": Approaches to Classical Anthropology
This course introduces a brief survey of the history of archaeological investigations and the scientific methods used in identifying and excavating a site and analyzing the material remains. Representative examples that illustrate the above scientific advances are drawn from major Mediterranean civilizations: Mesopotamian, Anatolian, Egyptian, Persian, Greek, Etruscan, and Roman. A lab component includes cataloguing 'ancient shards' from Greece and Turkey, and copies of Greek and Roman vessels. NOTE: Students cannot receive credit for both ARCH 2333 and CLAS 2333.

CLAS2643 Rome: The Eternal City I (O) 3 ch (3C)
An introduction to the history of Rome from ancient times to the Renaissance. Taught on location in Italy. Students may not receive credit for both CLAS 2643 and CLAS 3643. Travel costs not included in tuition.

CLAS2645 Introduction to Spectacle in Ancient Rome (A) 3 ch (3C)
Introduces students to spectacle in Roman culture, from gladiatorial combat to political oratory, tragic theatre to comic farce, military triumph to erotic mime. Working with literary and archaeological sources, students will explore the many spaces in the city. (Colosseum, forum, circus, temples, even crossroads,) where citizens, slaves, and foreigners gathered to see and be seen. Normally taught on location. Students cannot receive credit for both CLAS 2645 and CLAS 3943.

CLAS3003 Ancient History: The Greeks from the Trojan War to Alexander the Great (A)
A survey of Greek history from its beginnings in the Bronze Age to the empire forged by Alexander the Great. Topics include the era of the Trojan War and Mycenaean palaces, the origins of the world's first democracy, the Battle of Marathon and the Persian Wars, Pericles and the Athenian Golden Age, the Peloponnesian War and the clash of Athens and Sparta, and the rise of the Macedonian warlords, Phillip and his son Alexander. Special emphasis is placed on the enduring impact Greek history and Greek civilization have had on the modern world. Students cannot receive credit for both CLAS 3003 and CLAS 3013.

CLAS3023 Ancient History: Alexander and the Hellenistic World (O)
The social and political impact of Alexander the Great, his empire and his successors on the Mediterranean world, down to the Roman conquest.
A survey of Roman history from its foundation to the fall of the Roman Empire in the west. Topics include Rome's mythological founding by Romulus and Remus, the age of the kings and the rise of the Republic, Rome's expansion to rule the Mediterranean, the violent transition from Republic to Empire under Julius Caesar and Caesar Augustus, the Pax Romana and the High Roman Empire, the Christianization of the Roman world under Constantine, and the fall of the Empire in the west. Special emphasis is placed on the enduring impact Roman history and Roman civilization have had on the modern world. Students cannot receive credit for both CLAS 3033 and CLAS 3043.

The Roman Army 3 ch (3C) [W]
Examines the development of the Roman legions, from their beginnings a peasant conscript army to their imperial conquests and fame as a professional fighting force. Topics discussed include: organization, armament, strategy and logistics, social impact; the Roman navy, auxiliary forces, and the legions' significance as a model for modern armies.

Ancient Greek Warfare (O) 3 ch (3C) [W]
This course examines the history of warfare in the ancient Greek world, from the Bronze Age to the Hellenistic period and the rise of Rome. Topics include the development of military theory and practice through the eras of heroic combat, the hoplite phalanx and naval warfare, and the innovative armies of Alexander the Great and his successors; and the social and cultural factors of importance to ancient Greek military history.

Ancient History: Jewish Civilization from the Babylonian Exile to the Great Revolt (A) 3 ch (3C) [W]
An examination of the social, cultural, intellectual and political history of the Jews during the period of the second temple (516 BCE - 70 CE).

The Byzantine Empire 3 ch (3C) [W]
A historical analysis of Byzantine civilization from its emergence from the Late Roman Empire to its medieval zenith under Basil II (r. 976-1025). Topics include the development of a distinctive Byzantine culture, its interaction with Western Europe, confrontation with Islam and its civilization role in Eastern Europe.

The Decline and Fall of the Roman Empire (A) 3 ch (3C) [W]
Traces the more important changes which overtook the Roman world from the late third to the seventh centuries AD. The course concentrates on the Roman experience at the court and in the provinces, and considers some of the dramatic upheavals that swept the empire in this period, which include the change of the principate into an autocracy, the intrusion of the government in to all aspects of life, the decline of the cities, the politicization of Christianity, and the loss of the western provinces.

Field School in Classical Archaeology (O) 3 ch (3C) [W]
This course is an introduction to archaeological field techniques through participation in a field research project in the Classical lands. It introduces students to survey, excavation, documentation/ recording of field procedures, recovery of artifacts, and their preparation for storage.

The Jewel of the East: The Art and Archaeology of Byzantium (A) 3 ch (3C) [W]
The eastern Roman empire, known today as Byzantium, flourished for over 1000 years (AD 324-1453). The art and architecture of this multi-cultural society, united under a single state religion, reflect contemporary political and religious attitudes. They tell the story of an evolving state that slowly drew away from Roman traditions to create its own identity. Clinging to its classical-Hellenic past through education, it laid a firm foundation for the development of democracy as interpreted through the archaeological record are just some of the topics covered. Students cannot receive credit for both CLAS 2303 and CLAS 3333.

Classical Archaeology: Method and Theory 3 ch (3C) [W]
In this course students examine the evolution of the discipline of classical archaeology and the scientific approaches to the study of material remains from the classical world: Mesopotamia, Anatolia, Egypt, Greece, Italy and Britain. The pottery lab component will complement this course. Students may receive credit for only one of the following courses: CLAS 2333, or ARCH 2333, or CLAS 3334.

Archaeologies of the Roman Empire: Art, Landscapes and Memories (A) 3 ch (3C) [W]
The enduring monuments of Roman art, architecture, and engineering feats such as aqueducts and baths, still in use today, are a reminder of the ingenuity of a culture that has left its imprint on the modern world. With the aid of textual sources, anthropological studies, and the sciences, the course acknowledges and the cultures that inspired the Romans (the Hellenistic kingdoms of Alexander the Great and the Etruscans) and then examines the political agenda and building programs of the Republic and the Empire. Topics include the Iron Age and the imperial period (e.g., Hadrian's Villa; the Etruscan tombs at Veii, the domed churches, the simple funerary monuments of the masses and the pompous display of statuary and monumental tombs of the wealthy; and grand temples, villas and amphitheatres (such as the Colosseum). Students cannot receive credit for both CLAS 2313 and CLAS 3343.

Pompeii and Herculeanum (A) 3 ch (3C) [W]
Buried by volcanic eruption in 79 CE, Pompeii and Herculeanum are our richest source of evidence for daily life in the Roman Empire, from public buildings to private houses, from temples to taverns to brothels, from city streets to tombs, from sculpture and paintings to graffiti and bones. By studying the archaeological remains of these cities, students learn about ancient Roman city structure, class and gender relations, political life, religious observances, hard work, and spectacular entertainment.

The Comice Theatre of Greece and Rome (O) 3 ch (3C) [W]
The development of comedy from the komos in Greece; the reading, in English translation, of an Old Comedy by Aristophanes, a satyr-play by Euripides and a New Comedy by Menander; the development of comedy in Rome through the reading of plays by Plautus and Terence. The history of the theatre, its changing structure, conventions, the production of plays and their performance and the festivals at which they were performed.

The Tragic Theatre of Greece and Rome (A) 3 ch (3C) [W]
The history of the Theatre of Dionysus in Athens and a survey of the origins of Greek tragedy; the reading in English translation of a representative sample of the plays of Aeschylus, Sophocles and Euripides; the dramatic festivals at which they were performed, the production and performance of the plays, the dramatic conventions. The role of the serious theatre in Rome; a tragedy of Seneca, in English translation, is read.

The Ancient World on Film (A) 3 ch (3C) [W]
The course aims to help students understand and enjoy the reception of Greek and Roman civilization in Hollywood and European films. History will be studied via cinematic versions (such as Troy, Alexander, Spartacus, Life of Brian, Fellini's Satyricon, Gladiator, etc.) and Greek and Latin literature in translation. Attention will be given to the ways in which filmmakers adapt historical subjects and how classical literature is recast as films, offering an exciting commentary on our relationship with our classical heritage. By introducing students to some of the literature and films about the ancient Greek and Roman worlds, it will encourage them to address questions of how they shape our views about the past. The focus will be on analyzing and discussing literature, film, and culture within a historical context.

History of Modern Greece (O) 3 ch (3C) [W]
An introductory survey course of the history of Modern Greece beginning with the Greek War of Independence in 1821 to World War II. Special attention will be paid to various events and themes (such as the arms race, Minor Catastrophe in 1922 and the Greek Diaspora, etc.) by utilizing literature and other historical sources and documentaries in order to present the society, culture and politics of Greece and gain a better understanding of the modern Greek identity. There are no Prerequisites.

Introduction to Modern Greek Literature (O) 3 ch (3C) [W]
An introductory survey course of Modern Greek literature in translation. Emphasis will be placed on the history and development of literature from the 19th and 20th centuries by examining a selection of poetry, short stories...
and novels. Included in this survey are the Nobel prize winners George Seferis and Odysseas Elytis. There are no prerequisites.

CLAS3483 Surfing the Aegean: Waves in Modern Greek 3 ch (3C) [W]
Surfing the Aegean is a holistic approach to modern Greek identity which seeks to dive beneath the surface of stereotypes and misconceptions to understand the real modern Greece. The course uses film, music and written and digital sources as well as hands-on activities to engage students to discover the cultural, historical, and social elements that form contemporary Greece.

CLAS3503 The Greek Gods and Their Cults (A) 3 ch (3C) [W]
The Greek myths of creation and the Greek gods and their mythology. The historical origins of the gods, the development of Greek religion from pre-historic times. Parallels are adduced from Middle Eastern mythologies. Major Greek religious sites are illustrated.

CLAS3513 The Trojan War: Myth and History (A) 3 ch (3C) [W]
Fought over the theft of a woman, the Trojan War has been a part of popular culture for 3000 years. It has been told and retold by poets since Homer, depicted in the arts of ancient Greece through the Middle Ages and Renaissance into modern times, sparked the romantic imaginations of early archaeologists, and most recently been interpreted on the screen in films such as Unforgiven and Troy. This course will explore the Trojan War through literature, historical texts, archaeology, the visual arts, drama and film.

CLAS3523 The Mythology and Religion of the Romans (A) 3 ch (3C) [W]
A study of the legends surrounding the foundation and growth of early Rome and of the Italian gods. Roman religion is studied under such headings as prayer, sacrifice, divination, the religious year and calendar, priests and emperor-worship. [Not open to students who received credit for CLAS 4023.]

CLAS3603 The Art and Architecture of Greece I (O) 3 ch [W]
A study of the art and architecture of Greece organized around visits to important archaeological sites and major museums in Greece. Travel costs not included in tuition.

CLAS3605 Ancient Athens (O) 3 ch [W]
A practical workshop introducing students to the Greek and Roman remains found at archaeological sites and museums in and around Athens. Taught on location. Travel costs not included in tuition.

CLAS3613 Mythology and Archaeology I (O) 3 ch [W]
The mythology and cults of the Greek gods, seen in the context of the archaeological remains of some of their major cult centres, and the Mycenaean origins of the sagas of the Greek heroes from the focus of this course. Travel costs not included in tuition.

CLAS3623 Remembering War in Ancient Greece (O) 3 ch [W]
A course taught on location in Greece that considers the phenomenon of ancient Greek warfare through onsite investigation of the topography and archaeology of several important battlefields and fortifications within central and southern Greece, as well as the art-historical and material evidence of warfare and its commemoration on display in Greek museums. In addition to reconstructing the context and events of key battles, this course considers how the realities of the battlefield and the commemoration of warfare on physical monuments shed light on ancient Greek politics, society, and culture.

CLAS3633 The Art and Architecture of Imperial Rome 3 ch [W]
A study of the art and architecture of Classical Rome organized around visits to important monuments, archaeological sites and museums in Italy. Travel costs not included in tuition.

CLAS3643 Rome: from Ancient Times to the Renaissance (O) 3 ch
A study of the ancient and medieval history of the city of Rome, through the on-site examination of the material remains. Students may not receive credit for both CLAS 2643 and 3643. Travel costs not included in tuition.

CLAS3653 Mythology and Archaeology II (O) 3 ch [W]
Directed study of selected topics in the mythology and cults of the Greek gods undertaken through the study of the archaeological remains of major cult centres in Greece. Travel costs not included in tuition.

CLAS3663 Religion in Ancient Rome (O) 3 ch [W]
A study of religion in Rome from its pagan origins to the Rise of Christianity in the late Empire, based on first-hand examination in Rome of temples, altars, churches, sculpture, inscriptions and other materials on site and in museums. Travel costs not included in tuition.

CLAS3673 Ancient Cities and Civilizations of Western Turkey: 3 ch [W]
Myth, Cult and Ancient History (O)
A study of this history and civilizations of western Asia Minor, in particular

SECTION H: FREDERICTON COURSES

the Hittite, Lydian and Graeco-Roman. Myth, cult and history are introduced in carrying degrees as appropriate to the various sites visited during the tour. Particular attention is paid to the Greek cities of the Aegean coast, their sanctuaries, public buildings and theatres. Travel costs not included in tuition.

CLAS3683 The Art and Architecture of Asia Minor: 3 ch [W]
Hellenistic, Roman, and Early Christian
A survey of the art and architecture of Asia Minor, organized around visits to important archaeological sites and major museums in Turkey, and studying selected remains from the Hellenistic, Roman and early Christian periods, including sculpture, temple architecture, and examples of the early Christian basilica. Travel costs not included in tuition.

CLAS3693 Roman Britain (O) 3 ch [W]
A study of ancient Roman presence in Britain based on firsthand examination of Roman remains, including visits to Roman cities, villa and bath complexes, museum collections in London elsewhere, Hadrian’s Wall and other military installations. Travel costs not included in tuition.

CLAS3943 Spectacle in Ancient Rome (A) 3 ch (3C) [W]
This course examines the importance of spectacle in Roman culture, from gladiatorial combat to political oratory, tragic theatre to comic farce, military triumph to erotic mime. Working with literary and archaeological sources, students explore the many spaces in the city (Colosseum, forum, circus, temples, even crossing-roads) where citizens, slaves, and foreigners gathered to see and be seen. Students will be expected to complete a research assignment when they return from Rome. Normally taught on location. Students cannot receive credit for both CLAS 2645 and CLAS 3943.

CLAS3703 Socrates and the Intellectual World of Classical Athens (O)
Examines the central intellectual, political, religious and social controversies of the Golden Age of Greece (450-350 BC), by focusing on Socrates in conflict with the citizens of Athens, the writers of comic theatre, and the new professional teachers, the “Sophists.”

CLAS3723 Ancient Science (A) 3 ch (3C) [W]
An examination of the development of scientific theory and practice among the ancient Greeks and Romans.

CLAS3733 Ancient Philosophers (A) 3 ch (3C) [W]
A survey of the various forms of philosophical literature produced in the classical civilizations of Greece and Rome.

CLAS3803 The World of Jesus (O) 3 ch (3C) [W]
Examines the social, literary, philosophical, and religious milieu of Judea in the time of Jesus.

CLAS3813 The Early Church (A) 3 ch (3C) [W]
The history of Christianity from the apostles to the fifth century: its organization and doctrinal development, and its interaction with Roman civil authority and paganism.

CLAS3818 Gender and Power in Ancient (O) Greece and Rome
By investigating interactions between gender and power in ancient Greece and Rome, this course delves into the social norms and taboos that shaped public and private life in the great cities of antiquity. Drawing on modern theoretical writings as well as ancient texts and images, students investigate ideals of femininity and masculinity in the ancient mythology and public ritual; the gendering of public and private space; licit and illicit sexual practices; love, marriage, adultery and prostitution; and gendered narratives of good and bad politicians, emperors, and those perceived to be “barbarians.”

CLAS3923 Roman Law (A) 3 ch (3C) [W]
A survey of the development and practice of the Roman legal system, upon which all modern civil law systems are based. Topics include: sources of Roman law and legal institutions; legal procedure; Roman legal concepts (persons, property, obligations, succession); equity and social change in legal reform; survival and modern revival.

CLAS3953 Ancient World, Modern Issues (O) 3 ch (3C) [W]
This course explores ancient variations on an issue facing contemporary society, with special attention paid to how the legacies of Greece and Rome continue to shape our world for better and for worse. Possible topics include imperialism and colonialism; democracy, demagogues, and populism; racism and slavery; and mass migration and refugees.
A seminar dealing with the controversial career of Caesar Augustus, from his unexpected rise to power to his establishment of the Imperial system of government at Rome, through systematic analysis of the primary sources, using the Res Gestae, Augustus' own public statement of his achievements, as a starting point. **Prerequisite:** 60 ch, or permission of the instructor.

This course traces the birth, development, and eventual decline of one of the most important city states of Greek antiquity: Athens and its environs. By exploring the archaeological and written records, students work towards an understanding of the topography and monuments of the area from the Bronze Age to Late Antiquity.

This course traces Rome's growth from a cluster of mud huts on a hilltop into one of the most magnificent cities the world has ever known. Working with archaeological and written records, students explore the topography and a monuments of the eternal city from the Iron Age to Late Antiquity. Special attention is paid to questions of ideology and cultural memory. What ideas about Roman history, and identity were built into the city's monumental landscape? Who had the power to shape this landscape, and how did they use it to reshape Roman ideas about the past, present, and the future of the city.

This course focuses on Greek and Roman dwellings from a socio-historical, archaeological, and anthropological perspective. Students will examine domestic plans, interior decoration (mosaic pavements, wall paintings, sculptural adornment, etc.) household contents, and ancient literary records in order to explore the religious beliefs of the occupants, the social dynamics of family organization (women, children, and slaves), and the role of the household within the private and public spheres.

This course examines Greek sculpture, free-standing and relief, from the Archaic period through the Classical and Hellenistic. Special emphasis will be placed on the development of the human form and the representation of pose, as well as the problems of pedimental construction. Material from contemporary arts, such as pottery, will also be used to illustrate the course. **Prerequisites:** 60 ch, or permission of the instructor.

This course looks at free-standing and monumental sculpture of Ancient Rome, both as an art form and as a socio-political phenomenon. Special attention is paid to imperial portraiture and questions of ideology in both the public and private realms. **Prerequisites:** 60ch or permission of the instructor.

This seminar course explores a specific Classical theme from a variety of perspectives, combining archaeological, literary, and historical approaches to the ancient world. Students undertake a major research project leading to a final paper and public presentation. Possible topics include political and cultural "Olden Ages"; democracies and republics; cross-cultural exchange in ancient Mediterranean; and war and peace. This course is normally required for all Classics/Classical Studies Honours students, and is strongly recommended for Majors. Open to students who have completed at least 60 credit hours.

A detailed study of a specific area of Classical Studies. Uses primary sources (in translation) to illuminate the chosen topic. **Prerequisites:** Permission of the instructor.

Students are introduced to various research methods and skills in Classical Archaeology by working in groups on a specific time period (Bronze Age, Classical, or Hellenistic periods), developing individual projects in consultation with the instructor, and delivering in-class presentations. **Prerequisites:** permission of the instructor.

See beginning of **Section H** for abbreviations, course numbers and coding.

Spain and Latin America before 1500: art, literature, music and society. A multimedia approach will be used. Conducted in English. Open to students of all years. No Prerequisites. Students who have taken WLCS 1013 or SPAN 1013 may not attain credit for CCS 1013.

Spain and Latin America after 1500: art, literature, music and society. A multimedia approach will be used. Conducted in English. Open to students of all years. No Prerequisites. Students who have taken WLCS 1014 or SPAN 1014 may not attain credit for CCS 1014.

An interdisciplinary exploration of the pivotal role which culture, media, and the arts play in shaping understandings of the world around us. By considering a variety of cultural expressions, creative and artistic practices, and media representations, both old and new, from around the globe, this introductory course invites students to open up to new ways of thinking about how new culture is created and how it is related to our present. Central to this investigation is a critical understanding of how culture shapes and is shaped by the social, economic, and political phenomena of the modern world.

A study of major texts (in English translation) of world literature written before 1900. Authors, texts and literatures studied will vary but may include The Iliad, Beowulf, Paradise Lost, Don Quixote, The Brothers Karamazov, the poetry of Walt Whitman, the poetry of T.S. Eliot, and Dostoevsky. Conducted in English. Open to students of all years. No Prerequisites. Students who have taken WLCS 1001 may not attain credit for CCS 1023.

Significant aspects of Russian culture from the 10th to the end of the 19th century. Topics include Russian Icon Painting and Architecture, Russian culture between Europe and Asia; Ivan the Terrible as cultural type; women in Russian culture; serfdom and slavery; Russia's contribution to the development of terrorism and revolution; the reforms of Peter the Great; Russian Orthodoxy, etc. Conducted in English. Open to students of all years. Students who have taken WLCS 1043, or RUSS 1043 may not attain credit for CCS 1043.

Significant aspects of Russian and Soviet culture in the 20th century. Topics include Russian avant-garde painting; the Bolshevik Revolution and apocalypticism; class and corruption; Socialist Realism; Stalin and Stalinism; women's roles under the Soviets; Eisenstein and Soviet cinema; the artificial famine and the Gulag; literature and censorship; Soviet sport and society; Glasnost and culture; etc. Conducted in English. Open to students of all years. No prerequisites. Students who have taken WLCS 1053, or RUSS 1053 may not attain credit for CCS 1053.

An introduction to China's long and rich cultural heritage with a focus on how it is embedded in living examples. Students who have taken WLCS 1073 may not attain credit for CCS 1073. No prerequisites.

A wide-ranging exploration of important aspects of Chinese culture and their continuity through time analyzed from a historical perspective. Students who have taken WLCS 1083 may not attain credit for CCS 1083. No prerequisites.

This course offers an introduction to German folklore, folktoric literature, and Germanic mythology. It considers informal cultural traditions (customs, music, crafts, etc.) and literary traditions such as folk and fairy tales, legends, and heroic poems. Students interpret folklore and folkloric literature and explore their socio-cultural function and significance. Particular attention will be paid to the enduring prevalence of the fairy tale: we will examine themes such as abandoned children, the power of love, facing fear, and more. Further topics for discussion include gender stereotypes, value systems, the presence of violence, variations of fairy tales, adaptations on stage an in film, television, and digital media, and the influence of fairy tales on the genre fantasy, and on videogames. Possible works include Till Eulenspiegel, Piper of Hamlen, Grimm's fairy tales, Andersen's fairy tales, The Lay of Hildebrand, The Nibelungenlied, The Never-ending Story. The course is offered in English and is open to students of all years. No Prerequisites. Students who have taken GER 3019 or WLCS 3019 may not obtain credit for CCS 2019.

This course introduces historical and theoretical contexts for the study of mass-mediated popular culture, from movies and TV to comic books and video games. It also explores the reciprocal relationship between creative expression and economic constraints, between the mainstream, sub-
cultural and counter-cultures, as well as familiar designations of “high-brow” and “low-brow.” Using specific media case studies, students will engage with contemporary debates about the impact of representations, the role of ideology, the agency of the audience, the meaning of fandom, and the politics of taste. While learning to analyze and evaluate their relative merits, students will learn to step back and think critically about the larger implications and the cumulative effects of our constant exposure to popular cultural texts. Students who have taken MAAC 2025 may not attain credit for CCS 2024.

CCS 2024 Culture and Dance II: So You Think You Know Dance? (C) (O) 3 ch (3C) 

A course in the development of Classical Ballet and Contemporary Modern dance styles from Renaissance court dances to present day choreography. Emphasis will be on European and North American theatrical dance traditions. Types of dance explored may include court dance, classical ballet, modern and contemporary dance, jazz dance and improvisational dance. Students will examine the cultural connections among the art of dance, music, visual arts, history, literature and other fields. When possible, the class will be coordinated with dance performances at the Fredericton Playhouse and students may be expected to attend up to 2 such performances. The course will include both academic work and experiential dance/movement components. No previous dance background necessary. Students who have taken WLCS 2024 may not attain credit for CCS 2024.

CCS 2025 Culture and Dance III: Dance in The Global Village 3 ch (3C) 

This course is an investigation of the universal language of dance in both theory and practice. Topics will be chosen from a diversity of both folk dance traditions and classical theatrical dance traditions from around the world. These may include the fundamental components of dance technique, a variety of international folk dances, social dance (tango and salsa, for example) East Indian classical dance forms, etc. When possible, the class will be coordinated with dance performances at the Fredericton Playhouse and students may be expected to attend up to 2 such performances. The course will include both academic work and experiential dance/movement components. No previous dance background necessary. Students who have taken WLCS 2025 may not attain credit for CCS 2025.

CCS 2073 German Contemporary Culture and Media (O) 3 ch [W] 

Explores the culture and creative industries of modern Germany. Students are introduced to Germany’s media landscape, cultural and educational institutions, cultural trade fairs (books, art, Interior design), film, music and theatre festivals. They discover and critically reflect on official and unofficial cultural communities, including a reviving Jewish community, and counter cultures, as well as familiar designations of “high” and “low.” Using specific media case studies, students will engage with contemporary debates about the impact of representations, the role of ideology, the agency of the audience, the meaning of fandom, and the politics of taste. While learning to analyze and evaluate their relative merits, students will learn to step back and think critically about the larger implications and the cumulative effects of our constant exposure to popular cultural texts. Students who have taken MAAC 2025 may not attain credit for CCS 2024.

CCS 2666 Celebrity and Mass Media in Latin America (O) 3 ch [W] 

This course will explore the cultural impact of the selected Latin American personalities that have had a significant influence on the notions of identity in Argentina, Colombia, Cuba, Mexico and Venezuela. We will study the personalities of Eva Peron, Pablo Escobar, Che Guevara, Frida Kahlo, Selena and Hugo Chavez through film, music, literature, print media, the Internet and television series. Students will also examine the impact of the public figures’ death both at the local and the international level. Students who have taken CCS 3555 may not obtain credit for CCS 2073.

CCS 3003 Contemporary issues in Comparative Cultural Studies 3 ch (3S) [W] 

A seminar with varying content addressing literary and cultural periods, genres or themes as expressed across cultural borders. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students who have taken WLCS 3003 may not attain credit for CCS 3003.

CCS 3011 Dreams, Desire, Delusion: Romanticism 3 ch (3C) [W] 

Romanticism is the first literary movement that crosses all European borders—from Russia to England—and filters into the New World. This course studies the major concepts and themes of Romanticism, including Napoleonism, idealism, individualism, nationalism, irony, the poet as genius, etc., in the works of German, Russian, Polish, Spanish, Latin American, and other writers. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students who have taken WLCS 3011 may not attain credit for CCS 3011.

CCS 3014 Latin America Before 1500 3 ch (3C) [W] 

A survey of pre-Hispanic civilizations of Latin America. Films and other audio-visual materials will be used. This course is also listed under International Development Studies (IDS). Open to students of all years. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who have taken WLCS 3014, or SPAN 3014 may not attain credit for CCS 3014.

CCS 3015 Topics on Latin American Culture (O) 3 ch (3C) 

Latin America after independence, placing an emphasis on the 20th Century. Films and other audio-visual materials will be used. Given in English. This course is also listed under International Development Studies (IDS). The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLCS 3015, or SPAN 3015 may not attain credit for CCS 3015.

CCS 3021 Culture Matters: Critical Approaches to Studying Culture (Cross-Listed: MAAC 3021) 3 ch (3C) [W] 

Offers critical interdisciplinary approach to understanding culture through examination of key concepts, theories and practices in the field of Cultural Studies. Required for CCS and MAAC Majors and Honours students.

CCS 3022 Imperial Vienna (O) (Cross-Listed: MUS 3022) 3 ch (3C) 

An exploration of Vienna through its musical heritage and contemporary musical culture. Composers such as Mozart, Haydn, Beethoven and Schubert all made their home in Vienna and wrote some of the most memorable and influential music known. Drawing on the city’s history, art and architecture over three centuries, we will examine Vienna’s role in the development of Classicism, Romanticism and Nationalism in music history. We will also consider the current music scene in Vienna as present in Jazz and pop festivals, street performances and events. The course will include concerts in historic halls, visits to museums/galleries, and walking tours in the Old City. Taught on location as part of the Travel Study program Vienna.

CCS 3023 Lost and Found in Translation: Popular and Counter-Cultural Studies 3 ch (3M) [W] 

This interdisciplinary course allows students to develop their understanding of key frameworks for comparative cultural studies while considering how we can compare cultures from around the globe by studying their creative, linguistic, and artistic expressions. Required for CCS and MAAC Majors and Honours students.

CCS 3024 Brecht and Theatre (O) 3 ch (3C) [W] 

This course offers an in-depth study of the life and the dramatic works of 20th-Century German playwright Bertolt Brecht as well as an exploration of the dynamics of the theatre as an art form. Students will be introduced to the concept of epic theatre, and to aspects of performance and audience studies. They will also discuss the dramatic texts. Readings may include The Threepenny Opera, Life of Galileo, The Good Person of Szechuan, Mother Courage and Her Children, and The Caucasian Chalk Circle. Texts are read in English translation. There will be opportunities to read out and, if desired, act out selected scenes. No previous experience with drama required. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students with credit for GER/WLCS 4033 may not take this course for credit. Students who have taken WLCS 3024, or GER 3024 may not attain credit for CCS 3024.

CCS 3025 Berlin Now: Building the Modern City (O) 3 ch (3C) [W] 

This course aims to explore the Berlin’s multi-faceted identity as a city, once divided by a wall, now renowned as a cultural capital with eclectic energy. Using the city as a workshop, we will examine Berlin’s architecture during Imperial Germany, learn about film history and modern art during Weimar Republic, and explore with contemporary art and street art. We will follow traces of Nazi and Cold War period on the urban landscape to conclude with considerations of post-modern architecture. Investigating how the tension between the past and the present materializes we will approach concepts such as memory culture and critical reconstruction. Students will understand and appreciate the role of architecture and art, multi-cultural communities, including a reviving Jewish community, and both public and counter culture in building modern Berlin. Taught on location as part of the Travel-study program Berlin. Students who have GER3025 and WLCS 3025 may not obtain credit for CCS 3025.
SECTION H: FREDERICTON COURSES

CCS3043 The Early Years of German Literature I

Examines a representative selection of German literary masterpieces from various periods and literary genres. Students who have taken WLCS 3043, or GER 3043 may not attain credit for CCS 3043. Prerequisites: GER 2001/GER 2002 or equivalent.

CCS3045 Twentieth-Century German Literature until 1945

Introduces students to some of the major figures and trends in twentieth-century German literature to the end of World War II. Examines different types of prose narratives, drama, and poetry in the context of the main intellectual, social, and political forces and concerns of the period. Conducted in English. Texts are read in English translation. Open to students who have completed at least 30 ch of university courses or by permission of the instructor. Students who have taken WLCS 3045, or GER 3045 may not attain credit for CCS 3045.

CCS3051 Introduction to 19th-Century Russian Literature 3 ch (3C) [W]

Includes the Golden Age of Russian Literature (Pushkin, Lermontov); the great realists (Dostoievsky, Tolstoy, Turgeniev); and the emergence of Russian Drama (Chekhov). Themes followed include the superfuous man; nihilism and politics in literature; the Russian female protagonist from Karamzin's Poor Liza to Dostoevsky's prostitute Sonya; etc. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students who have taken WLCS 3051, or RUSS 3051 may not attain credit for CCS 3051.

CCS3052 Twentieth Century Russian Literature 3 ch (3C) [W]

Includes Futurism, Symbolism, Acmeism and Russia's Silver Age; literature and Revolution; housing and homelessness in Soviet literature; women's writing; Socialist realism (boy meets girl, boy gets tractor); censorship and oppression; experimental prose of the '20s; aspects of Soviet cinema; Russia's 'New Wave' meets America's Beatniks; Bulgakov's magical fable; etc. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students who have taken WLCS 3052, or RUSS 3052 may not attain credit for CCS 3052.

CCS3053 Introduction to German Literature II

Examines a representative selection of German literary masterpieces from various periods and literary genres. Students who have taken WLCS 3053, or GER 3043 may not attain credit for CCS 3053. Prerequisites: GER 2001/GER 2002 or equivalent.

CCS3054 Crimes and Misdemeanors: Modern German Literature

An investigation of the themes of crime, murder, and justice in selected literary texts ranging from the late 18th to the 20th century. Prior and parallel to the emergence of the genre of crime fiction, authors have been represented and responded to, primarily in Literature, Memoir, and Film, but also in other cultural areas such as memorial construction and music. The complex notions of victim, perpetrator, bystander, survivor, trauma, martyrdom, memory and identity receive their most expressive and compelling formulations precisely in these kinds of texts. The geographic focus of the course is on Poland, Ukraine, Lithuania and Russia, but reference will also be made to other areas such as Czech Republic, Hungary, and Romania. Authors, directors, etc., to be studied may include Borowski, Grymburg, Szymborska, Fink, Gross, Wojda, Polanski (Poland); Meras (Lithuania); Grossman, Yevtushenko, Shostakovich (Russia and Ukraine); Kertesz (Hungary); Hrebejk (Czech); etc. The course and all readings are in English. Open to students who have completed at least 30 ch of university courses or by permission of the instructor. Students who have taken WLCS 3054, or GER 3064 may not attain credit for CCS 3054.

CCS3055 Twentieth-Century German Literature after WW II

Introduces students to some of the major figures and trends in twentieth-century German literature who have covered the period from the end of World War II to Germany's reunification. Different types of prose narratives, drama, and poetry are examined and discussed in the context of the main intellectual, social, and political forces and concerns of the period. Conducted in English. Texts are read in English translation. Open to students who have completed at least 30 ch of university courses or by permission of the instructor. Students who have taken WLCS 3055, or GER 3055 may not attain credit for CCS 3055.

CCS3056 From People to a Nation: German Culture before 1900

A survey of German civilization from the time of early European tribal migrations to the rise of nationalism in the nineteenth century. Taking a sociohistorical perspective, students will be acquainted with a selection of key developments within the German-speaking cultures, including aspects of history, literature, music, architecture, and painting. Assigned readings, lectures, and slide shows aim at raising an awareness of the interrelationship between cultural heritage, historical and cultural developments, and artistic expression. Conducted in English. Open to students of all years. No prerequisites. Credit may not be obtained for both CCS 1061 and CCS 3056. Students who have taken WLCS 3061, or GER 3061 may not attain credit for CCS 3056.

CCS3062 Love and Religion: Latin American and Caribbean Women’s Narrative from the Golden Age to the Beginning of the 20th Century

A survey of selected readings of Latin American women writers from the Golden Age to the present. We examine works of Sor Juana Inés de la Cruz, Gertrudis Gómez de la Avellaneda, Alfonso Storni, Gabriela Mistral, Luisa Valenzuela, Isabel Allende, among others, from a socio-historical perspective. The course examines key aspects of Latin American culture, from rationalism to romanticism, from the Golden Age to the beginning of the 20th century.

CCS3063 Literature of the Holocaust

Addresses questions on a selection of literary and film responses to the Holocaust in various cultures and genres. Includes the perspectives of Jewish and non-Jewish survivors, children of survivors and others more removed. Particular attention is paid to the ethical and aesthetic challenges the Holocaust poses. Topics include: victims and oppressors, and the role of stereotypes in their depictions; the possibilities and limitations of language to express unimaginable horrors; and the role and appropriateness of literature as medium to respond to the historical, cultural, and psychological complexities of the Holocaust. Texts are read in English translation. No prerequisites. Students who have taken WLCS 3053, or GER 3063 may not attain credit for CCS 3063.

CCS3064 The Holocaust: East European Representations

The Holocaust was a powerful defining experience, historically and culturally, for most of the nations and peoples of Eastern Europe. This course examines key aspects of its impact and repercussions, how it has been represented and responded to, primarily in Literature, Memoir, and Film, but also in other cultural areas such as memorial construction and music. The complex notions of victim, perpetrator, bystander, survivor, trauma, martyrdom, memory and identity receive their most expressive and compelling formulations precisely in these kinds of texts. The geographic focus of the course is on Poland, Ukraine, Lithuania and Russia, but reference will also be made to other areas such as Czech Republic, Hungary, and Romania. Authors, directors, etc., to be studied may include Borowski, Grymburg, Szymborska, Fink, Gross, Wojda, Polanski (Poland); Meras (Lithuania); Grossman, Yevtushenko, Shostakovich (Russia and Ukraine); Kertesz (Hungary); Hrebejk (Czech); etc. The course and all readings are in English. Open to students who have completed at least 30 ch of university courses or by permission of the instructor. Students who have taken WLCS 3054, or GER 3064 may not attain credit for CCS 3054.

CCS3065 The Thrill of Fear: Horror Narratives Across Cultures

Why have people in so many times and places enjoyed spooky stories? What, if any, value can we assign to tales of horror and the supernatural? Do ghost stories and monster movies differ across nations and cultures? Questions like these will guide our global study of gothic, horror and supernatural texts chosen from a wide array of media, from the geographic, to literature, to television, comic books, and video games. Topics may include visual culture and the sublime, Freud's notion of "the uncanny," Jungian archetypes, gender identity, conceptual and cultural, and the modern and the postmodern, subcultures, folklore, religion and secularization. This course is open to students who have completed at least 30 credit hours at the university level. Attendance at additional scheduled film screenings outside of lectures will be required. Students who have already completed MM 3065 for credit may not enroll in MAAC 3065. Students who have taken WLCS 3065 may not attain credit for CCS 3065.

CCS3066 Trauma and Seduction: Early German Cinema

Beginning with the earliest silent movies and concluding with National Socialist propaganda films, this course offers an introduction to a prolific and important era in German film history: the Weimar Republic and pre-
WWII period, 1918-1939. Our discussions will situate the films within larger political and cultural discourses. Emphasis will be placed on such topics as the cinematic response to the trauma of WWII; German national identity; expressionism and modernity; the politics of gender and sexuality; the impact of sound on film aesthetics; the relationship between cinema and other media; the ethics of film production. Films to be studied include features by directors such as Lang, Lubitsch, Murnau, Pabst, Riefenstahl, Wagner, von Sternberg, and Wiene. In English. Students who have taken WLC 3066, or GER 3066 may not attain credit for CCS 3066.

CCS3071  Germany Today: German Culture from 1900 to Present 3 ch (3C) [W]

Significant aspects of German culture from the beginning of the industrial revolution to the end of the 20th century. Topics will vary, but may include: German Impressionism and Expressionism, Early German Film, the Weimar Republic, Modernist Movement, Early German Homosexual Rights Movement, Weimar Culture, Nazi Art, Literature after 1945, Divided and Re-unified Germany, New German Film, and others. Conducted in English. Open to students of all years. No prerequisites. Restriction: Credit may not be obtained for both CCS 1071 and CCS 3071. Students who have taken WLC 3071, or GER 3071 may not attain credit for CCS 3071.

CCS3072  (Re)constructing National Identity: Contemporary German Cinema (A) 3 ch (3C) [W]

(Cross-Listed: FILM 3072, MAAC 3072)

Studies the major accomplishments of East and West German cinema of the postwar period, as well as cinematic trends since German unification. We will consider questions of narrative, genre, and authorship, examine filmic relationships of other media, and focus on the dynamic interaction between film history and social history. Films to be studied include features by prominent directors such as W. Fassbinder, Wenders, von Trotta, Carow, Dörrie, and Tykwer. Students who have taken WLC 3072, or GER 3072 may not attain credit for CCS 3072.

CCS3082  History of Canadian Cinema (A) 3 ch (3C) [W]

(Cross-Listed: MAAC 3082 & FILM 3082)

Foci on the first half-century of filmmaking in Canada and the nation's long struggle to develop and sustain a functioning film industry in the shadow of Hollywood. Readings and screenings trace the history of the movies in Canada from the silent era to the 1970s. Issues raised may include Canadian/American relations, national and regional identities, tensions between art and entertainment, media and cultural policy, representation of race, class, gender, and relation of Canadian film to other media (TV, radio, video) and other arts (painting, music, literature) in Canada. Open to students who have completed 45 credit hours, or with permission of the instructor. Students who have taken WLC 3082 may not attain credit for CCS 3082.

CCS3083  Seminar I: Genre (O) (Cross-Listed: GER 3083) 3 ch (3C) [W]

The development of a particular genre in German literature and an examination of various works in that genre. Students who have taken WLC 3083, or GER 3083 may not attain credit for CCS 3083. Prerequisite: Departmental approval.

CCS3022  Imperial Vienna (O) (Cross-Listed: MUS 3022) 3ch (3C)

An exploration of Vienna through its musical heritage and contemporary musical culture. Composers such as Mozart, Haydn, Beethoven and Schubert all made their home in Vienna and wrote some of the most memorable and influential music known. Drawing on the city’s history, art and architecture over three centuries, we will examine Vienna’s role in the development of Classicism, Romanticism and Nationalism in music history. We will also consider the current music scene in Vienna as present in Jazz and pop festivals, street performances and events. The course will include concerts in historic halls, visits to museums/galleries, and walking tours in the Old City. Taught on location as part of the Travel Study program Vienna.

CCS3113  Social Symbols in Latin American Literature 3 ch (3C) [W]

Examines literary characters as social symbols that reflect socio-political realities in selected translated works. Social and historical documents as well as videos and films will be used for purposes of comparison. Students who take this course to fulfill Majors or Honours requirements, will be required to write their papers in Spanish. This course is also listed under International Development Studies (IDS). The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who have taken WLC 3113, or SPAN 3113 may not attain credit for CCS 3113.

CCS3121  The New Berlin: Memory and Reinvestion (O) 3 ch (3C) [W]

The course explores the role of memory and cultural policy in the process of renewal which encompassed Berlin with an extraordinary surge of creativity and reconstruction after Germany’s reunification. Students will study Berlin’s cultural topography, examine the physical face of the city as well as living environment of its population, and investigate how places and spaces embody and narrate a story of national pasts and future. What does it mean to be German? How is history remembered or forgotten? What role do literature, film, images, media, and objects play in the practice and politics of cultural memory and cultural creation and branding? We will focus on manifestations of culture including subculture, in literature, film, architecture, memorials, museums, city design, and neighbourhoods. Topics may include: Walter Benjamin, Franz Kafka, Christa Wolf, Walther Ruttmann, Rainer Werner Fassbinder, Wim Wenders, the Brandenburg Gate, the memorialisation of the Holocaust, remnants of the GDR, Europe and Berlin, immigration and multiculturalism, Kreuzberg, Jewish culture, gay culture, music culture, youth culture. Students will be introduced to theoretical and methodological frameworks of memory culture and will carry out case studies. They can expect to obtain an understanding of the transhistorical and transnational significance of Berlin. Students who have taken WLC 3021, or GER 3021 may not attain credit for CCS 3121.

CCS3122  New York Modern (O) 3 ch [W]

A study of modern art and modernism in New York from its development as an urban centre from the late nineteenth through the first half of the twentieth century. This course makes use of cultural and artistic sources available in contemporary New York City. Students will explore visual art as well as performing arts, including modern dance, and modern music and/or experimental film and will become acquainted with ideas, aesthetic practices, and key representatives of various international art movements such as art nouveau, expressionism, cubism, dadaism, surrealism, and performance art. The course features museum visits (Newie Galerie, MoMa, Metropolitan, Whitney, and the Guggenheim), walking tours, and performances at different venues and museums including experimental art and street art, and the continuation and transformation of modernism in New York today. Normally offered on site. Students who have taken WLC 3022 may not attain credit for CCS3122.

CCS3123  Berlin to Broadway: Musical Theatre Across the Oceans (Cross-Listed: MUS 3123)

An examination of the life and work of Kurt Weill focusing on his contribution to the theatre culture of Berlin in the twenties and to Broadway in the forties. We will read selected stage works by Weill and his renowned literary collaborators such as B. Brecht, W. Anderson, and I. Gershwin, discuss their social relevance, theatrical power, and reception and explore the interplay between the various media: text, music and stage. Emphasis will be placed on the urban cultural context of Berlin, and the history of musical theatre and Broadway musical genres, including current trends. The goal of the course is to provide students with the opportunity to study a theatre composer in depth, to foster a critical appreciation of Weill’s unique place in music theatre, and to enrich their understanding of cultural and performative aspects of musical theatre. Stage works by Weill may include The Threepenny Opera, Happy End, The Rise and Fall of the City of Mahagonny, Lady in the Dark, Street Scene, Lost in the Stars. Other musicals to be discussed include Cabaret, Grendel, Do Re Mi, In the Woods, Todd, In the Woods. The course and all readings are in English. Open to students who have completed at least 30 ch of university courses or by permission of the instructor. Students with credit in GER 4033 may not take this course for credit. Students who have taken WLC 3023, or GER 3023 may not attain credit for CCS 3123.

CCS3211  Mobility, Media and Art (O) (Cross-Listed: MAAC 3211) 3 ch (3C) [W]

This course considers how artists, filmmakers, and writers use mobile media to create various forms of art, including cellphills, soundwalks, and micro-blogging. In general, mobile media art takes art of the gallery, cinema, and city and puts it into our pockets, public spaces, and rural environments. Drawing on the mobilities paradigm, we examine how mobile media artists working in screen, digital, and game spaces challenge usual forms of participation, interactivity, and accessibility. We will also analyze different mobile media art projects both within and outside of the classroom, which may include cellphills, mobile phone orchestras, soundwalks, and soundscapes. Students have the option of creating a cellphill or soundwalk for their final project.

CCS3405  Media & Environment (O) (Cross-Listed: MAAC 3405) 3 ch (3C) [W]

This course introduces students to the literature of environmental media studies. The media landscape, from television to video games, has a profound role in shaping how we think about nature, the wilderness, and the environment. The news and social media are also important sources of information about environmental issues. In addition to being crucial sources of information, however, media create many environmental problems, such as e-waste and carbon emissions. This course reflects on the production, distribution, and associated waste of digital media alongside its role in representing the environment and environmental problems. Teaching methods include lectures and seminars. Students have the
A review with selected readings of the literature of Spain from its earliest periods to the end of the Golden Age. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC5 3413, or SPAN 3413 may not attain credit for CCS 3413.

Examines Spanish Peninsular literature through representative works by major literary figures from Romanticism to the present such as José de Larra, Pérez Galdós, Unamuno, García Lorca, Lafuente, Mateu, Benet among others. Literary movements of the period under study will be examined through readings that exemplify the various genres of narrative, drama and poetry. The course will be supported by the use of videos. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC5 3412, or SPAN 3424 may not attain credit for CCS 3424.

Studies the development of Spanish American Literature from Columbus to Naturalismo. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC5 3424, or SPAN 3424 may not attain credit for CCS 3424.

Studies the development of contemporary Spanish American Literature. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC5 3424, or SPAN 3424 may not attain credit for CCS 3424.

Uses core readings and theoretical frameworks from media studies to examine the complex relationships between media, society and politics, across the 20th century and into the new millennium, and in global perspective. Topics include media ownership and regulation; media and social movements; censorship and freedom of the press; television and digital culture in emerging democracies; the politics of the popular; media arts & activism.

This course will provide students with a background in Latin American cinema, emphasizing the most productive centres such as Mexico (Paul Leduc, María Novaro, Alejandro González Iñárritu, Guillermo Del Toro), Cuba (Tomás Gutiérrez Alea, Sara Gómez, Fernando Pérez), Brazil (Walter Salles, Hector Babenco) and Argentina (Maria Luisa Bemberg, Fernando Solanas, Eliseo Subiela, Lucrecia Martel). Equal emphasis will be placed both on cinematographic and thematic analysis of the cinema, and, when appropriate, cultural and historic context will be provided. Films will be screened previous to class (most often with subtitles) and will be analyzed and discussed in class. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students taking this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC5 3455, or SPAN 3455 may not attain credit for CCS 3455.

This course will provide the students with a background in Spanish cinema, emphasizing the most productive eras such as the Surrealist Movement and the Movida of the 80s. Films to be studied include those of directors such as Luis Buñuel, Pedro Almodóvar, Alejandro Amenábar, Elías Querejeta, Mario Camus, Bigas Luna, Carlos Saura, Víctor Erice, Laura Mañá, and Icíar Bollaín. Equal emphasis will be placed both on cinematographic and thematic analysis of the cinema, and, when appropriate, cultural and historic context will be provided. Films will be screened previous to class (most often with subtitles) and will be analyzed and discussed in class. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students taking this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC5 3456, or SPAN 3456 may not attain credit for CCS 3456.

A discussion of major Spanish contemporary authors. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC5 3701 may not attain credit for CCS 3701.

The relationship between music and East Coast identity is the focus of this course. The course covers a range of music styles, regional differences, and contemporary modes. The subject also allows for a broader reflection on music's importance to identity. Topics may range from Cape Breton fiddle, through to Halifax hip-hop. Students who have taken WLC5 3774, or SPAN 3774 may not attain credit for CCS 3774.

This course will examine some of the ways in which cultural (national, regional, ethnic, class, etc.) identity is and has been expressed through music, as well as the origins, persistence, and dispersion of some of the resultant forms and genres. This will also permit us to interrogate the stability and/or fluidity of various notions of identity. Critical and theoretical readings will be employed to explore the identity of cultural groups and musical forms ranging from Tango to Blues, Opera to protest song, Flamenco to Hip Hop, from Hawaii to Russia, Canada to South Africa. The course will normally be team taught; no previous musical background is required. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students who have taken WLC5 3774, or MUS3774 may not attain credit for CCS 3774.

This course offers an exploration of dystopian literature and film from a broad cross-section of cultures over the past 100 years or so. Based on an examination of texts by authors such as Karel Capek, Evgeny Zamiatin, Paolo Bacigalupi, and Sandra Newman and films such as Stalker, Last August in the Hotel Ozone, and Battle Royale, students will consider how dystopias
reflect, respond to, and anticipate totalitarianism, environmental degradation, dehumanization, and other social, political, cultural, and technological challenges to humanity. Students who have taken WLC3 3795 may not attain credit for CCS 3795.

CCS3797 Music of Canada (O) (Cross-Listed: MUS 3797) 3 ch (3C)

Introduction to Canada's rich and diverse traditions, institutions, and industry. From the musical traditions of the First Nations peoples, through the music of the early settlers, to today's diversity of styles, Canada's music will be studied in its cultural and historical contexts. Restriction: Credit may not be obtained for both FNAT 3796 and MUS 3797.

CCS3798 The Forbidden, the Rebellious, and the Misunderstood 3 ch (3C)

Canadian Jazz, Popular, and Classical Music, 1950 to the Present (A) (Cross-Listed: MUS 3798)

This course explores the social and historical developments of music in Canada from the 1950s through the public awakening of the 1960s to the implications of the Canadian content regulations of the 1970s and up to the present with a focus on the period ending around 1980. Music will be examined in relation to such notable phenomena as the Cold War, Expo 67 and the Hippie Movement. Major musical figures, composers, and performers featured and discussed may include The Band, Oscar Peterson, Glenn Gould, Paul Anka, Buffy Saint-Marie, The Guess Who and Rush.

CCS3799 Women in Music (Cross-Listed: MUS 3799) 3 ch (3C)

Tracing the influences of women involved in music in a range of settings in the modern world, this course presents the variety of ways that women have influenced, created and performed music through the ages. Feminist perspectives will be explored through an examination of the roles of selected individuals whether they were composers, performers or patrons. As such the course will include such individuals as Nannerl Mozart, Nadezhda von Meck, and Alma Mahler, as well as composers Clara Schumann, and Fanny Mendelssohn, who were performers in their own right. Students who have taken WLC3 3799, or MUS3799 may not attain credit for CCS 3799.

CCS3877 Modern Drama (A) 3 ch (3C) [W]

A survey of major developments in 20th-century theatre. Plays will be studied with attention to their often controversial engagements with social and political issues, moral debates, and theatrical conventions, as well as their connections to movements such as realism, modernism, expressionism, and absurdism. Students who have taken WLC3 3877 may not attain credit for CCS 3877.

CCS3903 Background of Spanish Culture (O) 3 ch (3C)

A chronological examination of the forces that have shaped Spanish culture. Studies the major historical periods and their characteristics from prehistoric caves of Altamira, through medieval Arab Spain, the voyages of discovery from 1492, Golden Age, Generation of 1898 to the present.

The cultural components include: every day experiences and value systems that shaped national identity, history of the family, perceptions of race and gender and divorce in Catholic Spain. A wide variety of sources will be used: the internet, video, music and magazine articles. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC3 3903, or SPAN 3903 may not attain credit for CCS 3903.

CCS3904 Background of Latin American Cultures 3 ch (3C)

A chronological examination of the forces that have shaped the diverse Latin American cultures. This course studies major historical periods and their characteristics, from Pre-Hispanic Cultures, through the Conquest and the Colonialization, the Independence movement, the formative period of the new nations to the present. The cultural aspects to be analyzed and discussed include: Catholicism and religious syncretism, the cultural and political life of colonial life, the struggles for independence, literary expression and the role of women. The use of videos, music, the Internet and literary texts, will provide a multimedia approach to Latin American cultures. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC3 3904, or SPAN 3904 may not attain credit for CCS 3904.

CCS3909 Three Cultures in Medieval Spain (A) 3 ch (3C) [W]

For seven centuries (711 A.D. - 1492), part of the Iberian Peninsula (Spain and Portugal) fell under Muslim rule. Al-Andalus with its cultural diversity, unique architecture (Alhambra in Granada), art and intellectual activity became 'the ornament of the world.' There arose a contested state of coexistence (termed convivencia by Spanish historians) amongst Christian, Jewish and Muslim cultures. These three distinctive intellectual and religious communities bore witness to significant cultural achievements until the downfall of Al-Andalus. In this course, students will explore the multi-cultural world of Muslim Spain through the analysis of selected texts from literature and philosophy. The diversity of the artistic expression through dance, music, and architecture in all three cultures will also be studied. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course is to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC3 3909, or SPAN 3909 may not attain credit for CCS 3909.

CCS3954 Spanish American Poetry (O) 3 ch (3C) [W]

Studies selected works of some major Spanish American poets. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC3 3954, or SPAN 3954 may not attain credit for CCS 3954.

CCS3973 Latin American Narrative at the Movies (O) 3 ch (3C)

Many Latin American novels and short stories have been adapted by movie-makers around the world. In addition to studying these works as literature, this course will analyse their cinematic interpretations. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC3 3973 or SPAN 3973 may not attain credit for CCS 3973.

CCS3974 Contemporary Spanish American Narrative (O) 3 ch (3C)

Studies selected works of some major Spanish American writers. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC3 3974, or SPAN 3974 may not attain credit for CCS 3974.

CCS3975 The Nobel Laureates of Latin American Literature (O) 3 ch (3C)

Examines the literary works of some of Latin America's Nobel laureates including García Márquez, Asturias, Neruda and Vargas Llosa. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC3 3975, or SPAN 3975 may not attain credit for CCS 3975.

CCS3983 Afro-Latin American Literature (O) 3 ch (3C) [W]

Explores the literary representation and contribution of Afro-Latin American elements in Literature. This course may be taken as part of the International Development Program. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC3 3983, or SPAN 3983 may not attain credit for CCS 3983.

CCS3984 Indigenous Literatures of Latin America (O) 3 ch (3C) [W]

Explores Indigenous narratives of Latin America to bring to light the historical and cultural realities of these peoples. Using translations of texts written in Spanish, Portuguese, and Indigenous languages in many genres and artistic forms, students challenge issues of race, ethnicity, class, and religion, sexuality, as well as other vital concerns of identity as reflected in both oral and written literary traditions through the history of the Americas. It will also explore the connections between ancient and contemporary Indigenous considerations and reflect on the various influences on, and of, these traditions. Open to students who have successfully completed at least 30 credit hours at the university level.

CCS4003 Topics in Russian and Eurasian Studies 3 ch

Allows students to pursue special questions in an area of Russian and Eurasian Studies of particular interest to them. Students who have taken WLC4 4003, or RUSS 4003 may not attain credit for CCS 4003.

CCS4021 Advanced Studies in Popular Culture (A) 3 ch (35) [W] (Cross-Listed: MAAC 4021)

Seminar focusing on theoretical approaches to the study of popular culture. Topics and theories covered may rotate from year to year. Prerequisites: 60 ch and MAAC/CCS 2021, or permission of the instructor.

CCS4033 Seminar II: Author 3 ch (3C) [W]

An intensive study of the life and work of a particular author or a number of authors. Students who have taken WLC4 4033, or GER 4033 may not attain credit for CCS 4033. Prerequisites: Departmental approval.

SECTION H: FREDERICTON COURSES

377
SECTION H: FREDERICTON COURSES

CS 4043 Literature and Religion in 19th and 20th Century 3 ch (3C) (O) Russia and Spain

Studies religious works of Spanish and Russian writers such as Unamuno and Tolstoy. Examines their religious thought and their criticism of the established Spanish Roman Church and Russian Orthodox Church respectively. Outlines the situation of the Eastern Orthodox Church in Russia as well as the situation of the Catholic Church in Spain in the 19th and the 20th Centuries. Analyzes the position of these writers towards their respective Churches, and the creation of their own moral codes through the textual analysis of some of their most relevant works. Students who have taken WLC 4043, or SPAN 4043, or RUSS 4043 may not attain credit for CCS 4043.

CS 4053 Culture and Film: The Cinema of Transitional Democracies (O) 3 ch (3C) [W]

Examines a selection of important films from Germany, Latin America and the Caribbean, Poland, Russia, and Spain. The selection will be tied to questions arising from the recent movement of their cultures from various forms of autocracy to new and emerging forms of democracy. Seeing film both as a medium of artistic expression and as a carrier of social values, the course seeks to develop an understanding of the moving image not only in its aesthetic and narrative modes, but also in socio-cultural, political, and historical contexts. Screenings are in the evening. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students who have taken WLC 4053 may not attain credit for CCS 4053.

CS 4061 Russian Women Writers (O) 3 ch (3C) [W]

Despite their enormous contributions at many historical points, women writers still struggle for acceptance in the Russian literary canon. Writers to be studied include Catherine the Great, the “Russian Amazon”, Nadezhda Durovova a cross-dressing cavalry maiden during the Napoleonic campaign, the giants of the Silver Age Anna Akhmatova and Marina Tsvetaeva, ostensible socialist-realists like Vera Panova, Natalia Baranovskaya and I. Grekova, dissident figures such as Nastenia Ginzburg and Natalia Gorbanesvkaia, and older and younger contemporary writers such as Ludmila Petrushevskaya, Tatiana Tolstiaia, and Marina Pali. Works and authors will be studied in historical and cultural context, and connections to other arts, in particular visual arts, film and popular music will also be explored. The course and all readings are in English. Open to students who have completed at least 30 ch of university courses or by permission of the instructor. Students with credit for RSST 4003 Russian Women Writers may not take this course for credit. Students who have taken WLC 4061, or RUSS 4061 may not attain credit for CCS 4061.

CS 4062 Contemporary Spanish and Latin American Women Artists (A) 3 ch (3C)

This course is designed to explore the contributions of the contemporary Spanish and Latin American women artists through literary and visual arts. We will examine themes of cultural and political identity, sexual repression, class issues and racism through the various genres including literature, film, dance and music. This course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill Major/Honours requirements will write papers in Spanish. Students who have taken WLC 4062, or SPAN 4062 may not attain credit for CCS 4062.

CS 4083 20th Century Women Writers 3 ch (3C) [W]

A study of selected texts by European (primarily German, Russian, Polish, and Italian), Caribbean and Latin American women writers of the twentieth century. Through textual analysis, the course examines the conditions of women in diverse cultures as well as aspects of the cultural construction of female identity. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students who have taken WLC 4083 may not attain credit for CCS 4083.

CS 4071 Aspects of the 20th-Century Literary Avant-Garde 3ch(3C][W]

An intercultural and interlingual examination of major literary avant-garde movements from a variety of cultures and their relations to other cultural and artistic avant-gardes. Topics covered will vary but may include Expressionism (Benn and Hauptmann); Futurism and Tyranny (Russian, Polish and Italian); Magic Realism; Theatre of the Absurd (Ionesco, Becket, the Polish "Dead School"); Existentialism; etc. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students who have taken WLC 4071 may not attain credit for CCS 4071.

CS 4083 Interdisciplinary Seminar 3 ch (3S) [W]

An interdisciplinary seminar examining some aspect of the interactions of literature—whether a single text or a body of texts by one or more authors—with other cultural texts. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor. Students who have taken WLC 4083 may not attain credit for CCS 4083.

CS 4083 Nobel Laureates—German Literature 3 ch (3C)

A course designed to explore the nature of contemporary fiction of extraordinary merit as well as the cultural politics and economics of prize-winning itself. Among German-speaking recipients on the world literature stage are Elfriede Jelinek (2004), Günter Grass (1999), Heinrich Böll (1972), Hermann Hesse (1946), Thomas Mann (1929), and Gerhart Hauptmann (1912). A selection of their masterworks will be analyzed as an artistic reflection of their socio-critical thoughts on German Culture, history, and identity. Special attention will be paid on the way the Nobel prize has been awarded in specific historical situations, recognizing a political kind of voice at a given moment in history. Conducted in English. Texts are read in English translation. Open to students who have completed at least 30 ch of university courses or by permission of the instructor. Students who have taken WLC 4083, or GER 4093 may not attain credit for CCS 4083.

CS 5000 Honours Thesis 6 ch [W]

A reading and research course open to students qualifying for Honours in World Literature and Cultural Studies. To enrol in this course students must first identify two professors from different specializations to supervise their project, and then have the project and supervisors approved by the Department. The project will lead to the writing of an Honours Thesis, normally 40-60 pages in length. Students who have taken WLC 5000 may not attain credit for CCS 5000.

COMPUTER SCIENCE

See beginning of Section F for abbreviations, course numbers and coding. The “L” notation indicates that labs are held on alternate weeks. The [P] designation is used to identify courses with an extensive computer programming component. Please see the Bachelor of Computer Science degree regulations for further details. The Timetable should be used to check the term and time a course is offered. Some courses may not be offered every year. NOTE: Only undergraduates in their final year and with a CGPA of 3.0 or better are eligible to take 5th level courses.

CS 1003 Programming and Problem Solving for Engineer 4 ch (3C 3L)

Introduction to the use of digital computers for problem solving and communicating solutions. Covers use of procedures, decisions, loops and arrays focusing on scientific and engineering problem analysis, algorithm design, and program structure. Also includes organizing, tabulating, and graphing program output with different software tools to communicate results. This course is currently taught primarily in Matlab. Prerequisite: High School Mathematics. Co-requisite: PHYS 1081 or equivalent, or permission from instructor.

CS 1023 Data Structures and Algorithms for Engineers 4 ch (3C 1.5L)

Introduction to the ideas of abstraction of procedures and data. Implementation and handling of the fundamental data types: lists, stacks, queues, and graphs. Basic concepts of discrete mathematics, elements of combinatorics, aspects of complexity and recursion and algorithm development, including estimation of program resource utilization. This course is currently taught in C. NOTE: This course may not be taken for credit by BCS, BISys, or BScSw students. Prerequisite: CS 1003.

CS 1073 Introduction to Computer Programming I 4 ch (3C 1.5L 1T)[P]

(in Java)

Covers fundamental concepts such as decisions, loops, arrays, classes, methods and inheritance; focusing on problem analysis, algorithm design, program structure and readability. Introduction to the Java API libraries.

CS 1083 Introduction to Computer Programming II 4 ch (3C 1.5L 1T) [P]

(in Java)

Continues CS 1073 focusing on problem analysis, algorithm design program structure and readability. Covers recursion, sorting and searching, data extraction, encapsulation, inheritance, polymorphism, inheritance of data structures and files, testing and debugging. Prerequisite: CS 1073.

CS 1203 Overview of Computer Science 3 ch (3C 1T)

This course surveys many of the fundamental concepts and theories used throughout computer science. Topics include history of computers, computer hardware, system software, programming languages, networking, theory of computation, social issues, and other topics within computer science. Emphasis is also placed on topics relevant to various areas of study within the BCS program. Prerequisite: None. NOTE:
Intended only for first year computer science students and interested students from other Faculties.

**CS1303** Discrete Structures 4 ch (3C 1T)
Introduces topics in discrete mathematics important in computer science, including: propositional logic, predicate logic using quantifiers, direct and indirect proofs, summation and product notation, mathematical induction, elementary set theory, and counting. Students are expected to write mathematical proofs throughout the course. **NOTE:** credit will not be given for both CS 1303 and MATH 2203.

**CS2033** Software Design for Engineers 4 ch (3C 3L)
An introduction to software design and implementation in the context of a team project emphasizing object-oriented programming and modularization for building reliable and reusable system components. **Prerequisites:** CS 1023, ECE 2142 or equivalent. **NOTE:** This course may not be taken for credit by BCS, BISys, or SWE students. Credit is given for at most one of CS 2013, CS 2033, or CS 2043.

**CS2043** Software Engineering I 4 ch (3C 2L)
Introduction to fundamentals of the discipline of software engineering with focus on the software development life cycle. Topics include software development methodologies and processes, requirements analysis, modeling, architecture, design, implementation, testing, and maintenance. Basics of software management are also introduced. **Prerequisite:** CS 1083. **NOTE:** Credit is given for at most one of CS 2013, CS 2003, or CS 2043.

**CS2063 Introduction to Game Development** 4 ch (3C 1.5L) [P]
Introduces basic concepts and technologies for computer and video game development, including math and physics foundations for games, core technologies and algorithms in game development, game design and implementation, and game development environments and programming. By taking this course, students will understand various elements and phases of game development. Students will develop simple games during the course. **Prerequisite:** CS 2043 or CS 2263.

**CS2253** Machine Level Programming 4 ch (3C 2L) [P]
Introduces students to the development of application software for mobile computing platforms. Characteristics of mobile computing platforms versus non-mobile platforms. Mobile application design principles, including design of effective user interaction and factors that affect application performance. Programming common mobile application functionality such as location, orientation, and motion awareness, as well as touch, gesture, and camera input. Interacting with remote APIs. Students will gain experience creating and testing applications for a selected currently prominent mobile platform. **Prerequisite:** CS 2033 or CS 2043 or CS 2263.

**CS2283** Systems Software Development 4 ch (3C 2L) [P]
Procedural program development and supporting tools, using the C-language. Topics include: implementation of data structures and algorithms, memory management, and performance techniques. Includes software tools for program development such as compilation/linking, building, debugging, and version control. **Prerequisite:** CS 1023 or CS 1082. **NOTE:** Credit cannot be obtained for CS 2253 by students who have completed both CS 2203 and CS 2213.

**CS2333** Computability and Formal Languages 4 ch (3C 1T)
This course introduces students to some of the fundamental ideas in theoretical computer science: functions and relations, formal languages, finite automata, regular languages, context-free grammars, context-free languages, push-down automata, pumping lemmas, Turing machines, the Church-Turing thesis, recursive and recursively enumerable languages, the Chomsky hierarchy, the halting problem and other unsolvable decision problems, provability reducibility, and fundamental computational complexity classes. **Prerequisites:** CS 1073, CS 1303, and 30ch.

**CS2383** Data Structures and Algorithms 4 ch (3C 1T) [P]
Presents formal specifications of abstract data types and their data structure representations, operations, and algorithms. Includes priority queues, dictionaries, graphs, heaps, hash tables, binary search trees, balanced trees, and graph adjacency representations. Covers sorting, searching, dynamic storage handling, and fundamental graph algorithms. Asymptotic analysis of time and space complexity are taught and used throughout the course. Students are expected to implement a variety of data structures and graph algorithms. **Prerequisites:** (CS 1083 or CS 2303) and CS 1303. **NOTE:** Credit is not given for both CS 2383 and CS 3323.

**CS2545** Data Science for Big Data Analytics 3 ch (3C)
Data science enables one to bring structure to large quantities of data and make analysis possible. The purpose of the course is to introduce students to the fundamentals of data science and prepare them in dealing with the challenges of Big Data analytics. It covers basic and advanced Python programming and Python libraries for data analysis. It presents data visualization techniques and statistical methods, as well as data exploration techniques such as data cleaning and munging, manipulating data, rescaling and dimensionality reduction. It includes an introduction to machine learning and presents special data analysis topics. Also, it introduces data analysis approaches with relational databases and Big Data frameworks. **Prerequisite:** CS 1073 or CS 1103.

**CS2605** A Selected Language for Programmers 1 ch (1C) [P]
Introduces a selected programming language to students who have already been exposed to at least one programming language. This course is given in 13 1-hour lectures throughout the term. **Prerequisite:** CS 1083 or equivalent.

**CS2613** Programming Languages Laboratory 4 ch (4L) [P]
Introduces several programming languages in a hands-on-setting, with a view to preparing students for advanced courses and/or workplace projects. Students will carry out supervised laboratory exercises and independent work designed to improve programming skills, boost confidence and competence in acquiring new languages, and help choose implementation languages for future projects. Currently the course covers Python, JavaScript, Octave/Matlab, and Racket. **Prerequisite:** CS 1083.

**CS2685** C++ Programming for Programmers 1 ch (1C) [P]
Introduces the object-oriented features of C++ to programmers who have already been exposed to Java and C. This course is given in 13 1-hour lectures throughout the term. **Prerequisite:** CS 2263 or knowledge of Java and C.

**CS2999** Problem Solving for Programmers 3 ch (3L) [P]
This course entails a hands-on approach to problem solving for computer programmers. Under instructional guidance the students will work on programming problems that represent basic classes of problems found in computer science. Concepts in data structures, algorithms, geometry, and software development and testing are covered. **Prerequisite:** Experience in programming competition and permission of the instructor. **Co-requisite:** CS 2263, CS 2383.

**CS3003** Biocomputing in Drug Design I 5 ch (3C 3L)
Introduction to biocomputing in the pharmaceutical industry. Topics include molecular modeling, rational drug design, high throughput screening and combinatorial chemistry, protein modeling and 3D bioinformatics. Course includes lectures and bioinformatics laboratory projects. **Prerequisite:** CS 2043 or (CS1083 and MAAC 3102) or permission of instructor. **NOTE:** This course is also cross-listed as CHEM 4503 and may be taken for either Computer Science or Science credit. **Prerequisites:** CHEM 3523 or permission of instructor.

**CS3025** Human-Computer Interaction 3 ch (3C)
Software design for interactive computing. Topics include: human-computer interaction principles, interface design guidelines, the design and execution of usability studies. The characteristics of various styles of interaction are explored. Emphasis is on user-oriented interfaces. Students design, implement, and perform a usability study on an interactive software application. **Prerequisites:** 60 ch and (CS 2043 or MAAC 3102) or permission of instructor.

**CS3035** Building User Interfaces 3 ch (3C) [P]
Basic approaches and techniques for implementing human-computer interfaces. Basic user interface concepts, common interaction techniques and architectural approaches for constructing user interfaces. Topics include but are not limited to 2D graphics, physics of virtual objects, event-driven programming, interface widgets, design patterns for user-interface development, the use and design of layout managers, user interface builders, programming hardware for physical devices, gesture and shape recognition, and fundamentalization, and networking interactions. **Prerequisite:** CS 2043 or (CS1083 and MAAC 3102) or permission of instructor.

**CS3043** Software Engineering II 4 ch (3C 3L)
Examines software development processes and management, visual modeling and Unified Modeling Language, requirements capture, use case analysis, system design and implementation, components, forward and reverse engineering, software engineering tools, testing techniques, configuration management, and project management. **Prerequisite:** CS 2043. **NOTE:** Credit is not given for both CS 3013 and CS 3043.
SECTION H: FREDERICTON COURSES

CS3113 Introduction to Numerical Methods  3 ch (3C)
Intended for Computer Science and Engineering students. Error analysis, convergence and stability. Approximation of functions by polynomials. Numerical quadrature and differentiation. The solution of linear and nonlinear equations and the solution of ordinary differential equations. This course will emphasize the understanding of numerical algorithms and stress applications in the applied sciences, as well as the influence of finite precision and arithmetic on computational results. Credit will be given for one of CS 3113 or MATH 3413 or ECE 2412. Prerequisites: (CS 1003 or CS 1073) and (MATH 2213 or MATH 1503).

CS3383 Algorithm Design and Analysis  4 ch (3C 1T)
This course examines the characteristics of algorithms that lead to efficient computer solutions for discrete problems. A variety of different algorithm classes and design techniques, including divide and conquer, greedy, dynamic programming, and backtracking, are introduced and compared. Design and analysis of randomized algorithms is introduced, along with strategies for dealing with computationally hard problems. Normally, one or more models of parallel algorithms will be discussed. Prerequisites: CS 2333, CS 2383 and (STAT 2593 or STAT 3083). NOTE: Credit is only given for one of CS 3383, CS 3913 and CS 3933.

CS3413 Operating Systems I  4 ch (3C 1.5L) [P]
This course examines the fundamental role of an operating system in relation to the operation of applications. Essential theory of operating systems, is covered including: scheduling, processes, process synchronization, interprocess communications, process scheduling, storage (primary and secondary) management, resource sharing, security, I/O, and user interfaces. At least one of the major Unix shell languages will be covered. Prerequisite: CS 2263.

CS3503 Systems Analysis, Design and Project Management  4 ch (3C 1T) [W]
Introduces students to the life cycle of information systems. Covers techniques and tools used in systems analysis and project management. Emphasizes communication skills, both written and oral, as well as team skills. Prerequisites: INFO 1103 and 60 ch.

CS3613 Programming Languages Interpretation  4 ch (3C 1T) [P]
Building on students’ knowledge of procedural and object oriented programming, this course studies the normal syntax and semantics of programming languages, including grammars, scope, laziness, higher-order programming, state and mutation, recursion, types, and metacircularity. Prerequisites: CS 2263, CS 2333, and CS 2613.

CS3703 Multimedia Design  3 ch (3C)
Introduction to the design and production of multimedia applications. Includes issues in capture, storage, and effective use of images, sound, and video; animation; multimedia and hypermedia design principles; authoring tools. Prerequisites: CS 1073 and 60 ch.

CS3853 Computer Architecture and Organization  4 ch (3C 2L)
Introduction to computer organization and architecture, digital logic, interfacing and I/O strategies, memory architecture, functional organization, multiprocessor performance enhancements. Prerequisite: CS 2253. NOTE: Credit is not given for both CS 3853 and CS 3813.

CS3873 Net-centric Computing  4 ch (3C 2L)
Introduction to fundamentals of data communication and application programming in a networked environment. Topics include data transmission, data link concepts, networking concepts, network security, application protocols, net-centric computing and web programming, Prerequisites: CS 2253 or CS 2263. CS 2263 is recommended.

CS3997 Professional Practice  3 ch (3C) [W]
Covers social context of computing, professional and ethical responsibilities, risks and liabilities of computer-based systems, intellectual property, privacy and civil liberties, and professional certification. Instructs students in the preparation of technical reports in Computer Science. Involves an independent study component resulting in a technical report, typically a survey paper. Covers technical writing, oral presentation and library skills. Prerequisites: Enrollment in the BCS or BISys program and 40 ch completed.

CS4003 Biocomputing in Drug Design II  4 ch (3C 2L)
A follow-up of CS 3003/CHM 3003. Topics include pharmacophore perception, solution models, free-energy calculations, quantitative structure activity relationship (QSAR), virtual drug libraries, chemical diversity and cheminformatics. Course includes lectures and computer laboratory component. NOTE: This course is cross-listed as CHEM 4003 and may be taken for either Computer Science or Science credit. Prerequisites: CHEM 3003 or CS 3003.

CS4015 Software Architecture and Design Patterns  4 ch (3C 2L) [P]
(Cross-Listed: SWE 4403)
This course introduces concepts of software design patterns and architecture. The course covers principles of reusable object-oriented programming, as well as creational, structural, and behavioral patterns. The course also covers software quality attributes, architectural tactics and patterns, designing and documenting software architecture, architecture reconstruction, architecture evaluation, and software product lines. Students will practice applying and implementing design patterns and software architecture design and evaluation in course work by developing various software systems. Prerequisite: CS 2043 or permission of the instructor.

CS4065 Interactive Human-Centered Systems  3 ch (3C) [P]
This course will introduce current topics in the field of Human-Computer Interaction to provide a deeper understanding of human needs and capabilities, and in designing and evaluating new people-centered technologies. Foundational concepts, important challenges and technologies will be presented from several domains of application, such as: collaborative technology, information visualization, games, and input and output techniques and devices. Prerequisites: CS2043 and 75 ch, or permission of the instructor. CS 3025 is recommended.

CS 4355 Cryptanalysis and Database Security  4 ch (3C 1T)
A practical survey of the principles and practice of information security. Topics include: conventional encryption, asymmetric and symmetric cryptography, digital signatures, key exchange, authentication, electronic mail security, network management security, the common criteria, and threat risk management. Prerequisites: INFO4203 or approval of the instructor.

CS4405 Operating Systems II  4 ch (3C 1L) [P]
Covers the structure and design of operating systems. Processor management. Storage management, input/output, interprocess communication, and interrupt handling. Real-time systems, centralized systems, multiprocessor, and distributed systems. Prerequisites: CS 3413 and (CS 3853 or ECE 3221).

CS4411 Fundamentals of Information Assurance  4 ch (3C 1T)
Gives an introduction to information assurance, describes the vulnerabilities of IT infrastructures, as well as security threats faced by enterprises today. Based on the basic principles and strategies of information assurance, the course will also examine risk management, the development of security policies, guidelines, awareness programs, employment practice and policies, legal and ethical issues, as well as auditing IT security. Covers broad topics including contemporary issues in computer security, sources of computer security threats and appropriate reactions, encryption and decryption techniques; secure encryption systems; program security algorithms, trusted operating systems; database security issues and solutions, network and distributed system security models, administering security. In all listed topics, the legal and ethical security issues with respect to information assurance is also given. Prerequisite: CS3873 or approval of the instructor.

CS4413 Foundations of Privacy  4 ch (3C 1T)
Covers diverse topics on privacy preservation including basic cryptographic techniques for privacy, homomorphic encryption techniques for preserving database privacy, big data privacy, privacy in cloud, privacy in crowdsourced platforms, privacy in healthcare, privacy in vehicular ad hoc networks, privacy in social network and location privacy. In addition, privacy law and regulation will be also discussed. Emphasizes both theoretical aspects and practical applications of privacy enhancing techniques. Prerequisite: INFO2403 or approval of the instructor.

CS4415 Network Security  3 ch (3C) [P]
This course examines advanced topics in network security, including: security risks and threats, security mechanisms across OSI model layers. Students will study the analysis of systems for vulnerabilities, the implementation of security procedures and the monitoring of systems for vulnerabilities, the implementation of security procedures and the monitoring of systems for vulnerabilities, wireless network security will also be introduced. Prerequisites: INFO 2403 and CS 3873.

CS4417 Software Security  4 ch (3C 1T) [P]
Sits at the intersection of computer security and software engineering. This course is designed to give students practical experience with building a software system and securing it. It covers tools, guidelines, rules, principles, and other resources for addressing security issues in every phase of the software development life cycle (SDLC). Students will engage in a significant group-programming project to develop a novel piece of software. Emphasis will be placed on the correctness and robustness of software, and on security as part of the software engineering process. Prerequisites: (INFO2403 and CS2043) or approval of the instructor.
SECTION H: FREDERICTON COURSES

CS4419 Digital Forensics 4 ch (3C 1T)
Introduces digital forensics notions and methods. Students will gain a basic understanding and legal awareness of computer security and forensics, techniques used in the evidentiary process, various methodologies intrinsic to computer forensics with emphasis on computer incident response, and IT systems protection. Prerequisite: INFO2403 or approval of the instructor.

CS4495 Cybersecurity Capstone Project 6 ch [W]
Provides students with an opportunity to conduct a real-world cybersecurity project, from defining a realistic cybersecurity problem to applying a suitable methodology for the design, development, and evaluation of an appropriate solution to the problem. Both the problem statement for the capstone project and the datasets originate from real-world domains similar to those students might encounter within the cybersecurity industry. Students are expected to conduct a research literature review and to develop a set of hypotheses/methodologies for the research project. Involves a research proposal outlining alternative remedies to the problem and hypotheses/methodologies, as well as a final report. Students are expected to complete the capstone project with an industry partner. Prerequisites: CS4415 and CS4419.

CS4545 Big Data Systems 3 ch (3C [P])
Data systems are going through a major transition due to the challenges of Big Data processing. The outcome of this shift is the emergence of a new breed of systems that can handle data at massive scale. This course presents some of these systems, along with the principles of query processing. Specifically, it compares Relational vs. NoSQL data models and covers the foundations of query processing, including index-based access and join processing. It presents the principles of parallel databases, and the languages batch processing frameworks, as well as iterative processing frameworks. It also covers SQL interfaces over these frameworks. It introduces update-intensive systems and graph data stores. It includes the special topics of spatial and spatio-temporal data processing. Prerequisites: (INFO 1103 or CS 2545) and 75 ch or permission of the instructor.

CS4725 Introduction to Artificial Intelligence 4 ch (3C 2*L)
Introduction to intelligent agent design, problem solving using search techniques, the use of mathematical logic for knowledge representation and reasoning, decision making under uncertainty, machine learning techniques. Prerequisites: CS 2333 and CS 2383.

CS4735 Computer Graphics 4 ch (3C 3L)
Covers interactive 3-dimensional computer graphics program development using object-oriented tools. Includes keyboard and mouse interaction, callback functions, windows and viewpoints, drawing parametric curves and surfaces, affine transformations, the camera model and graphics pipeline, geometric modeling using polyhedral meshes, flying a camera, arcball scene interaction, perspective projection, and visual realism via colour, lighting and texture. Prerequisites: CS 2263, CS 2613 and (MATH 1503 or MATH 2213).

CS4745 Introduction to Parallel Processing 4 ch (3C 2L [P])
Parallel computer architectures, design and analysis of parallel algorithms, parallel programming languages, case studies, selected numerical and non-numerical applications. Prerequisite: CS 3853.

CS4765 Natural Language Processing 3 ch (3C [P])
Presents an introduction to methods for intelligently processing human language data in text form, as well as relevant linguistic background. Topics include fundamental topics in natural language processing such as n-gram language models, part-of-speech tagging, parsing, and lexical semantics, as well as applications such as spelling correction, document classification, information retrieval, and machine translation. Students are expected to implement and evaluate a working morphological and parsing method, as well as write reports describing their implementations and their performance. Prerequisites: CS 3383 and (STAT 2593 or STAT 3083)

CS4805 Embedded Systems 4 ch (3C 1T)
This course will give an overview of the characteristics and design of embedded systems. Topics include formal models and specification languages for capturing embedded system behavior; techniques for specification, exploration and refinement; tools for validation, verification, and simulation; and quality and performance metrics. Prerequisites: CS 3413 and CS 3853.

CS4865 Principles of Data Communications and Networks Modeling 4 ch (3C 2L)
Covers advanced concepts of data communications systems design: architecture, media, communication channel, routing, protocols, protocol architecture and focuses on modeling and performance analysis. Includes introduction to network simulation in ns2 and OpNet. Prerequisite: CS 3873.

CS4905 Introduction to Compiler Construction 4 ch (3C 1.5*L) [P]
Introduces the primary concepts and methodologies used to build compilers. Covers lexical analysis, predictive and LR parsing, compiler compilers and error handling. Syntax-directed translation using abstract parse trees, visitors, symbol tables and type checking. Object code generation including the activation record stack, parameter passing, intermediate representation trees, instruction selection, tree tiling and register allocation. Prerequisite: CS 2333.

CS4935 Advanced Algorithmic Techniques 4 ch (3C 1T)
This course covers advanced algorithmic techniques for analyzing and handling intractable and complicated tractable problems. Topics include NP-completeness and problem reductions, randomization, approximability, special case analysis, and network flow algorithms. Prerequisites: CS 3383.

CS4983 Senior Technical Report 2 ch (2C) [W]
Builds on the skills developed in CS 3997 through the preparation and presentation of a technical report, which is typically a critical analysis paper. Prerequisite: CS 3997.

CS4995 Topics in Computing 4 ch
A selected area of computing with a unifying theme will be explored in depth at an advanced level. This course will be offered only occasionally, with the course topic determined by the instructor and the Faculty of Computer Science. Prerequisites: Normally, enrolment in the BCS, BiSys or BSc/SW program, at least 90 ch completed, and permission of the instructor.

CS4997 Honours Thesis 4 ch [W]
This course provides the student with the opportunity to undertake a project at a depth not provided elsewhere in the curriculum. Planning the thesis is done in the term prior to completion. The project topic must have the approval of a supervisor before the start of term. The student submits detailed proposal, schedule, progress reports, and final thesis report to the thesis coordinator with the supervisor's approval. A seminar is required. Detailed guidelines available from coordinator in the preceding term. Offered as an eight month course. Prerequisites: CS 3997. Open to all CS students in their final year with a B average in the previous assessment year or a B CGPA. To receive an Honours designation please refer to the CS Curriculum regulations in the program Section of the Calendar.

CS4998 Open Source Project 4 ch [P]
An Undergraduate Capstone Open Source Project (UCOSP). Students gain hands-on experience with real-world development practices in a realistic environment while simultaneously learning and applying some core concepts of Computer Science. As part of a national initiative, senior undergraduate students from across Canada work together on open-source software projects. Students work in distributed teams with individuals from other Canadian universities. Prerequisites: Instructor approval and at least 90 ch completed.

CS4999 Directed Studies in Computer Science 4 ch
Students may pursue directed studies in specific areas and topics related to Computer Science. The content and process of each directed study will be negotiated between a student and the supervising faculty member(s). Prerequisites: Normally, Faculty approval and at least 90 ch.

DRAMA
See beginning of Section H for abbreviations, course numbers and coding.

DRAM1173 Introduction to Acting and Performance 3 ch (3 hours/wk)
(Cross-Listed: ENGL 1173) plus practical work
An introduction to acting suitable for students at all skill levels, from beginners to experienced performers. Instruction will cover the basics of voice, movement, improvisation, script analysis, and monologue and scene work, culminating in a final performance project.

DRAM2173 Acting: Body and Text 3 ch (3 hours/wk)
(Cross-Listed: ENGL 2173) plus practical work
A course suitable for both beginner and experienced actors, with a focus on monologue, movement, and script analysis, culminating in the presentation of a scene study or one-act play. Rehearsal and performance time additional to regular class hours required. NOTE: Students cannot obtain credit for both DRAM 2170/ENGL 2170 and DRAM 2173/ENGL 2173.

DRAM2174 Technical Production and Design for Theatre 3 ch (3 hours/ wk)
(Cross-Listed: ENGL 2174) plus practical work
An introduction to set construction, lighting, sound and stage management for the theatre, with instruction in basic principles of set, sound, and lighting design. As part of their work for the course, students will assist with carpentry and design work for one or more Theatre UNB mainstage productions, and act as crew members for productions. Workshop and performance time additional to regular class hours required. NOTE:
SECTION H: FREDERICTON COURSES

Students cannot obtain credit for both DRAM 2170/ENGL 2170 and DRAM 2174/ENGL 2174.

DRAM2175 Mainstage Production I 3 ch (Cross-Listed: ENGL 2175) plus practical work
Participants in this course form a theatre company and produce, rehearse, and perform a mainstage production for the Theatre UNB season, under the direction of the instructor. Rehearsal and performance time additional to regular class hours required. **NOTE:** Students cannot obtain credit for both DRAM 2170/ENGL 2170 and DRAM 2175/ENGL 2175. **Prerequisite:** Students must have either completed or be concurrently enrolled in DRAM 1173/ENGL 1173 or DRAM 2173/ENGL 2173.

DRAM3170 Advanced Drama Production 6 ch (Cross-Listed: ENGL 3170) plus practical work
A project-based course that builds on DRAM 2173/ENGL 2173 and DRAM 2174/ENGL 2174 by offering advanced training in acting, directing, and design for the theatre. Instruction centres on 1-2 full-scale theatre productions mounted by the class for Theatre UNB. Rehearsal, workshop, and performance time additional to regular class hours required. **Prerequisite:** DRAM 2170/ENGL 2170 or both DRAM 2173/ENGL 2173 and DRAM 2174/ENGL 2174, or equivalent.

DRAM3175 Mainstage Production II 3 ch (Cross-Listed: ENGL 3175) plus practical work
Building on the skills developed in DRAM/ENGL 2175, participants in this course form a theatre company and produce, rehearse, and perform a mainstage production for the Theatre UNB season, under the direction of the instructor. Rehearsal and performance time additional to regular class hours required. Permission of the instructor is required. **Prerequisite:** DRAM 2170/ENGL 2170 or DRAM 2175/ENGL 2175.

DRAM4170 Thesis Production and Independent Project 6 ch (practical work)
(Cross-Listed: ENGL 4170)
Open to students completing the final year of a Double Major or Minor in Drama. Working in groups, students produce a full-scale production for Theatre UNB. The second requirement for the course is to complete an independent project designed to further students' knowledge of a theatre discipline of their choice. Both halves of the course are completed under the supervision of the Director of Drama. **NOTE:** Students can take no more than 6 ch of DRAM 4170/ENGL 4170, DRAM 4173/ENGL 4173, and DRAM 4174/ENGL 4174 for credit. **Prerequisites:** DRAM 2170/ENGL 2170 and/or DRAM 3170/ENGL 3170 and permission of the Director of Drama.

DRAM4173 Thesis Production 3 ch (practical work)
(Cross-Listed: ENGL 4173)
Open to students completing the final year of a Double Major or Minor in Drama. Working in groups, students produce a full-scale production for Theatre UNB, under the supervision of the Director of Drama. **NOTE:** Students cannot obtain credit for both DRAM 4173/ENGL 4173 and DRAM 4170/ENGL 4170. **Prerequisites:** DRAM 2170/ENGL 2170 and/or DRAM 3170/ENGL 3170 and permission of the Director of Drama.

DRAM4174 Independent Drama Project 3 ch (practical work)
(Cross-Listed: ENGL 4174)
Open to students completing the final year of a Double Major or Minor in Drama. Under the supervision of the Director of Drama, students complete an independent project designed to further their knowledge of a theatre discipline of their choice. **NOTE:** Students cannot obtain credit for both DRAM 4174/ENGL 4174 and DRAM 4170/ENGL 4170. **Prerequisites:** DRAM 2170/ENGL 2170 and/or DRAM 3170/ENGL 3170 and permission of the Director of Drama.

EARTH SCIENCES

Students should note that in the Science Faculty the minimum acceptable grade in a course which is required by a particular program or is used to meet a prerequisite, is a "C." Any student who fails to attain a "C" or better in such a course must repeat the course (at the next regular session) until a grade of "C" or better is attained. Students will not be eligible for graduation until such deficiencies are removed. The only exception will be granted for a single course in which a "D" grade is the normal part of the final year of that program, and is being taken for the first time in their final year. **NOTE:** See beginning of Section H for abbreviations, course numbers and coding.

ESCI1001 The Earth: Its Origin, Evolution and Age 3 ch (3C)
Novas and Supernovas, Solar Nebula Theory, Catastrophism and Uniformitarianism. Earth as a heat engine. Origin, growth and main features of the Earth's crust. Origin and evolution of oceans, continents and the atmosphere. The rock cycle, seafoof spreading, plate tectonics, mountain building and deformation of the Earth's crust, earthquakes, igneous and metamorphic processes and their products. Surficial processes, hydrogeology and energy, and mineral recourses. Credit can be obtained for only one of ESCI 1001 or ESCI 1063. CCS3413

Survey of Spanish Peninsular Literature I (O) 3 ch (3C)
A review with selected readings of the literature of Spain from its earliest periods to the end of the Golden Age. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish. Students who have taken WLC5 3413, or SPAN 3413 may not attain credit for CCS 3413.

ESCI1006 Introduction to Geology Laboratory 2 ch (3L)
A laboratory course designed to accompany ESCI 1001. An introductory study covering topographic and geological maps (bedrock and surficial) and their interpretation; construction of cross sections; identification of common minerals, igneous, sedimentary and metamorphic rocks; geological structures (map analysis as a predictive tool); radiometric and relative age dating and the geological time scale; coastal processes; glaciations and glacial deposits; aspects of plate tectonics. **Pre- or Co-requisite:** ESCI 1001.

ESCI1012 Environmental Earth Sciences 3 ch (3C)
From the perspective of Earth System Sciences the course explores geologic processes active on and in the Earth, and human interactions with them. Viewing the oceans, lands, and atmosphere as an integrated system, the course examines geological aspects of plate tectonics, the development and evolution of life, processes that maintain or threaten habitability, climate change, geological hazards and theories for critical events in Earth history such as mass extinctions. The emphasis is on changes occurring during the current period of human influence with respect to development of energy and natural resources: the Anthropocene.

ESCI1017 Introductory Environmental Earth Sciences Lab 2 ch (3L)
An introductory laboratory course that provides practical laboratory experiences related to practicing Environmental Geology. The lab uses a mixture of written exercises, hands-on activities, satellite and Google Earth explorations. Specific topics may include: tectonic processes and earthquakes, earth materials and geological time, paleontology, volcanoes and volcanic hazards, river floods and groundwater, mass wasting and landslides. **Pre- or Co-requisite:** ESCI 1012.

ESCI1026 Geology Lab for Engineers 2 ch (3L)
An introductory study covering topographic and geological maps (bedrock and surficial) and their interpretation; construction of cross sections; identification of common minerals, igneous, sedimentary and metamorphic rocks; geological structures; dating and the geological time scale; coastal processes; mass wasting (especially the recognition and amelioration of hazards related to debris flows, avalanche and landslides); and glaciations and glacial deposits (especially glacial deposits in eastern Canada and their significance to engineers). **Pre- or Co-requisite:** ESCI 1012.

ESCI1036 Geology Lab for Foresters 2 ch (3L)
An introductory study covering topographic and geological maps (bedrock and surficial) and their interpretation; construction of cross sections; identification of common minerals, igneous, sedimentary and metamorphic rocks; geological structures; dating and the geological time scale; coastal processes; mass wasting (in terrane analysis, and the recognition and avoidance of hazards); and glaciations and glacial deposits (especially in eastern Canada and their relevance to foresters).

ESCI1063 Earth Systems Geology (How the Earth Works) 3 ch (3C)
Designed primarily for students in faculties other than Science, Engineering and Forestry and Environmental Management. Surveys the origin of the Earth as part of the solar system, formation of a dynamic planet, geophysical and geochemical characteristics, development and evolution of life, plate tectonics, geomorphology, rocks and minerals, deformation, sedimentation, climate change and geological hazards. Geological concepts are discussed through reference to features in parks and other famous sites across Canada. Credit can be obtained for only one of ESCI 1001 or ESCI 1063.

ESCI1703 Field School (1 week) 3 ch [W]
Introduction to field observations, traversing, sampling and mapping in the first week of May or before classes begin in the fall. Accommodation expenses (Fredericton) paid by the student. **Prerequisites:** One of ESCI 1006, ESCI 1026 or ESCI 1036 and one of ESCI 1001 or ESCI 1012 or approved equivalent or permission of the instructor.
ESCI2022  Engineering Geology  4 ch (3C 3L)
A study of geological materials and hazards for site investigation and assessment of risk and remediation; engineering classification of geological materials, properties and relationships; engineering in the existing and changing environment and exacerbation of natural processes; geological constraints for construction, foundations, tunnelling, waste disposal and mining, with case histories of geological problems in engineering projects. Prerequisite: ESCI 1001, ESCI 1026 or equivalent or permission of the instructor.

ESCI2131  Earth and Planetary Materials  4 ch (3C 3L) [W]
Appraisal of rock-forming materials for Earth and similar solid planetary bodies. Fundamentals of mineralogy, with emphasis on crustal and mantle silicates. Controls on mineral structure and composition related to temperature, pressure and chemistry. Laboratories focus on describing the physical properties of the more common minerals, their identification in hand specimen, determining their structural formulae and appraising their economic value. Pre-or Co-requisites: ESCI 1001, one of ESCI 1006, ESCI 1026 or ESCI 1036. Recommended. Co-requisite: ESCI 2211.

ESCI2142  Mineralogy and Petrology  4 ch (3C 3L)
We learn the use of polarizing microscopy techniques to identify and describe the textures of igneous, metamorphic, and sedimentary rocks, mineral and rock identification, and rock classification. Lectures also focus on concepts of mineral nucleation and growth, simple thermodynamic controls on mineral stability, and the kinetic parameters that control crystallization rates of rocks and minerals. The laboratories focus on the practical aspects of mineral and rock description and identification using polarizing microscopy techniques. Prerequisites: ESCI 2313.

ESCI2211  Sedimentology and Stratigraphy  4 ch (3C 3L)
Lectures and labs first cover the description and classification of the physical and chemical properties of sediment and sedimentary rock. This is followed by investigation into the processes (including environmental and engineering impacts) involved in the origin of sediment, such as weathering, physico-chemical, biochemical, and biogenic sediment precipitation, and processes influencing mass movements, sediment erosion, transportation, deposition, reworking, sedimentary structures, soil formation and lithification. The course concludes with an introduction to basic sedimentary facies, stratigraphic principles, and the relative and absolute dating of strata. Pre-or Co-requisites: ESCI 1001, one of ESCI 1006, ESCI 1026 or ESCI 1036. Recommended. Co-requisite: ESCI 2313.

ESCI2321  Structural Geology I  4 ch (3C 3L)
An introduction to geometrical aspects of earth sciences with emphasis on cartographic methods, geological map production and interpretation, and basic compass techniques. Geological map studies are supported by an introduction to lithological assemblages, tectonic structures (faults and fold patterns), Earth architecture and the tectonic evolution of North America. Prerequisites: ESCI 2131, ESCI 2211.

ESCI2522  Theory of the Earth  3 ch (3L)
Understanding the origin and evolution of the earth requires an interdisciplinary approach that combines traditional geology with cosmochemistry, geochemistry and geophysics. This course comprises three interlinked themes. First, the origin of the planets of our solar system with a focus on the geochemical evolution of the earth-moon system. Second, an examination of the geophysical and geochemical methods by which we determine the earth's internal and external structure, composition and mineralogy. Finally, we bring together earth chemistry and physics to explain how the earth works within the plate tectonic paradigm. Prerequisite: ESCI 1001 and either ESCI 1006 or ESCI 1026 or equivalent.

ESCI2602  Principles of Geochemistry  4 ch (3C 17) [W]
Origin of elements. Theories of the origin and chemical evolution of the earth, atmosphere, and oceans. Laws governing the distribution of elements in the earth. Application of phase diagrams to petrogenic problems of the crust and mantle. Chemical weathering. Use of stable and radioactive isotopes in geology. Geochemistry of water. Hydrothermal process and base-metal ore deposits. Prerequisites: CHEM 1012, CHEM 1017 (or equivalent), MATH 1012 or MATH 1063, ESCI 1001, and ESCI 1006, ESCI 1026, or ESCI 1036. Co-requisite: ESCI 2311.

ESCI2703  Field School (2 weeks)  5 ch (field school) [W]
Principles of stratigraphy and geological mapping. Provides two weeks supervised training in field work and preparation of stratigraphic maps, geological maps, and cross sections. At least the cost of accommodation expenses is paid by the student. Prerequisites: ESCI 2131, ESCI 2211, ESCI 2321.

ESCI3131  Origin of Igneous and Metamorphic Rocks  4 ch (2C 3L) [W]
Petology of igneous and metamorphic rocks with emphasis on their macroscopic textures, mineral associations, classification and field relations. Laboratories concentrate on the identification of the common igneous and metamorphic minerals using hand specimens and thin sections. Prerequisite: ESCI 2142, ESCI 2602.

ESCI 3271  Paleontology  4 ch (2C, 3L)
The course provides an overview of the evolution of life on Earth, its origin, diversification and its gradual expansion from sea to land. Focus is on the processes leading to fossilization and on the major events of the evolution of life. Students are introduced to the taxonomy and ecology of the invertebrate groups most commonly represented in the fossil record, with special attention for the fossilizable parts and their significance towards understanding the evolution of the total biosphere. Further emphasis is on how fossilized remains and traces of organisms can be used in the fields of stratigraphy, paleoecology and paleoclimatology. Prerequisites: One pairing of either ESCI 1001 and ESCI 1006/ESCI 1026/ESCI 1036, or ESCI 1012 and ESCI 1017. Cross-listed as BIOL 3371. Credit may not be obtained for both ESCI 3271 and BIOL 3371.

ESCI 3282  Introductory Oceanography and Paleooceanography (A)  4 ch (3C, 2L)
The oceans modulate the climate, are key regulators of biogeochemical cycles and support rich and diverse biological habitats. This course is designed to provide an overview of the role the oceans play in the modern oceans. This course also introduces students to the latest methods used in paleoceanography (i.e. the study of past oceanic conditions), a domain that has contributed considerably to our understanding of climate functioning and change. A sample of the topics covered will include the chemistry, physics, and biology of the oceans that will be discussed includes: thermohaline circulation, dynamics of upwelling zones, tides, El Niño/La Niña and other climate oscillations, biogeochemical cycles, impact of human activities on the oceans (e.g. eutrophication, acidification), tracers and proxies in marine records (e.g. biological tracers and biomarkers, geochemical tracers, etc.). Prerequisite: ESCI 3271.

ESCI 3292  Climate and Environmental Change  4 ch (3C 2L) [W]
Through Time (A)
An investigation of the turning points in Earth’s history from its formation, over the emergence/evolution of life and connected environmental changes, to the eventual appearance of humans. We discuss both paleo- and modern records, examine the mechanisms that steer climatic changes, and put the recent history of Earth’s climate into a long-term perspective. Prerequisite: ESCI 3271.

ESCI 3322  Structural Geology II  4 ch (3C 3L) [W]
Stress and strain, introduction to deformational behaviour of rocks. Origin of folds, foliations, lineations, joints and faults. Geometrical analysis. Labs will include simple experiments and advanced map problems. Prerequisite: ESCI 3231, ESCI 2703. Recommended. ESCI 2142.

ESCI 3411  Rock Mechanics  4 ch (3C 2L) [W]
Lectures and labs investigate the deformation and fracture behaviour of rocks when subjected to natural and engineering-imposed stress fields. The concepts of stress, strain, stress-strain relations, and strength are applied to geological materials in laboratory and field settings. The mechanisms involved in the failure of continuous, discontinuous, ductile, and brittle rocks are discussed. Consideration of these subjects is given in the context of various rock engineering applications, including slopes and underground excavations such as mines, tunnels, and caverns. Prerequisites: ESCI 2321, or CE 2023, MATH 1013 or MATH 1063, Recommended. PHYS 1061, PHYS 1091 or equivalent, ESCI 3322.

ESCI 3442  Geohydrology  4 ch (3C 17) [W]
An introduction to the global water cycle and water balance, catchment water balance, measurement and estimation of water balance parameters, aspects of sediment transport and erosion, monitoring the distribution of contamination by sediment sampling. Assignments focus on aspects of catchment water balance. Seminars and term papers are based on topics of regional and global importance with respect to water availability and quality. Prerequisites: ESCI 1001, ESCI 1012 and one of ESCI 1006 or ESCI 1026.

ESCI 3482  Mineral Resources, Economics, and the Environment 3 ch (3C)
This course presents various types of mineral deposit resources, integrated with economic and environmental considerations with impacts related to exploration and mining activity. Prerequisites: ESCI 1001, ESCI 1012 and one of ESCI 1006, ESCI 1026 or ESCI 1036.

ESCI 3492  Petroleum Geoscience (A)  4 ch (3C 3L)
This multi-disciplinary subject is covered by introductory lectures on: chemical composition of petroleum (particularly oil and gas); the
environment of petroleum (e.g. associated rock types and subsurface conditions, including overpressures); theories of petroleum generation; migration and accumulation of oil and gas; sedimentology and heterogeneity of reservoir rocks; structural and stratigraphic traps; exploration and development of conventional and unconventional resources (including oil sands and shale gas); development economics; Canadian and global petroleum resources and reserves; and environmental impacts (groundwater, surface, and atmospheric pollution, carbon cycle, and global warming). Lab focus on exploration methods, including geochemical fingerprinting of source rocks and spills, core analysis, and interpretation of petrophysical and seismic data. Prerequisites: ESCI 1001, ESCI 1012, and one of ESCI 1006, ESCI 1026, or ESCI 1036. Recommended: ESCI 2211, ESCI 2321.

ESCI3621 Exploration Geochemistry (A) 4 ch (3C 3L) [W]

ESCI3631 Geochemistry of Natural Waters (A) 4 ch (3C 3L) [W]
The principles of chemical equilibria, reaction kinetics and transport applied to natural water systems. Chemical weathering and diagenesis. Chemistry of surface waters, ground water and the oceans. Geochemical cycles. Applications to environmental and industrial problems. Labs include chemical analysis of water, carbonate equilibria and geochemical modeling. One Saturday field trip. Prerequisite: ESCI 2602 or permission of instructor.

ESCI3703 Field School (2 weeks) 5 ch (field school) [W]
Principles of structural geology and geological mapping. Provides two weeks supervised training in field work and preparation of an independent structural map and report of a selected area. At least the costs of accommodation expenses are paid by the student. To be taken as part of the final year. Prerequisites: ESCI 2142, ESCI 2703, ESCI 3322.

ESCI3713 Geoenvironmental Field School 5 ch (field school) [W]
Applications of geological, geochemical, geophysical and hydrological methods to an environmental site investigation. Typically includes one week of field work followed by one week for the analysis of data and preparation of a comprehensive written report summarizing the field investigation, synthesizing results, drawing conclusions, and making recommendations. A cost will be associated with this course. Prerequisites: ESCI 2703, or permission of the instructor, ESCI 3442, ESCI 3631.

ESCI3803 Work Term Report I CR
A written report on the scientific activities of the work term. Credit for the course is dependent in part on the employer's evaluation of the student's work activities. Students must be accepted into the Geology Coop program to register for this course.

ESCI4112 Igneous and Metamorphic Petrogenesis (A) 4 ch (2C 3L) [W]
Study of igneous and metamorphic rocks emphasizing the processes responsible for their formation in terms of heat, pressure and fluid effects related to tectonic setting. Laboratories primarily concentrate on the acquisition of observational skills via hand specimen and detailed petrographic work supported by interpretation of geochemical and isotopic datasets. Prerequisite: ESCI 3131.

ESCI4152 Volcanology (A) 4 ch (2C 3L)
Physical volcanology, textural, petrologic, and petrogenetic study of ultramafic to felsic volcanic systems in a variety of tectonic environments are examined. Emphasis on magma/melt properties, phase relations and composition, crystallization processes, and gas exsolution and groundwater interaction processes are key. Laboratory studies emphasize petrology of volcanic and volcanioclastic rocks in a variety of geological settings. Prerequisite: ESCI 3131.

ESCI4212 Sedimentary Environments, Landforms, and Sequences (A) 4 ch (3C 3L)
Labs cover microscopic examination of sedimentary rocks (classification, porosity, and diagenesis) and exercises relating to paleogeography and stratigraphic correlation. Lectures focus on modern and ancient sedimentary environments and facies (including rivers, lakes, deltas, estuaries, beaches, barrier islands, shallow and deep oceans), and sequence stratigraphy. Prerequisites: ESCI 2142, ESCI 2211. Recommended: ESCI 3271.

ESCI4312 Geotectonics 3 ch (3C/3/L/T)
Seminar course investigating the principles of crustal growth and recycling, plate tectonics, plate motions, plate margin processes, mantle anisotropy, and their application to Phanerozoic, Proterozoic, and Archean mantle and lithosphere evolution. Prerequisites: ESCI 3131, ESCI 3322.

ESCI4322 Flow of Rocks (A) 4 ch (2C 3L)

ESCI4401 Applied Glacial Geology 4 ch (3C 3L) [W]
Study of the mass balance of glaciers and characteristics of flow, erosion and deposition by active and stagnant ice masses, facies relationships in processes and products of glaciated terrain, and assessment of terrain from air photos, maps, geophysical and core data. Practical applications include: relevance of sample collection and analyses for geotechnical evaluation and natural prospecting, and identification of industrial resources and terrain hazards. Prerequisites: ESCI 2211, ESCI 2321 or permission of the instructor.

ESCI4412 Applied Rock Mechanics (A) 4 ch (3C 2L) [W]
Lectures and labs investigate applications of rock mechanics and rock engineering principles, using geological and geomechanical data in the open-ended design of surface and underground engineering structures sited in rocks, as well as geo-hazard mitigation. Analysis of design problems incorporates several industry standard software packages. The natural variability of geomaterials and implications for effective design solutions are discussed. Prerequisite: ESCI 3411. Equivalent to GE 4412.

ESCI4442 Mineral Resource Utilization (A) 4 ch (3C 2L) [W]
Mineral exploration, evaluation, exploitation, processing, marketing and conservation.

ESCI4452 Environment Impact Assessment (A) 4 ch (3C 1T)
Introduction to environmental impact assessment (EIA) from the Canadian perspective, covering the history, scope and need for EIA, as well as the general approach and regulatory framework used in Canada and New Brunswick. The majority of the course focuses on geosciences in environmental investigations. Topics include: goals of investigations; physical processes of dispersion in the atmosphere, surface water, groundwater and glacial systems; important geochemical concepts that influence the transport and fate of contaminants in the environment. Prerequisite: ESCI 3442.

ESCI4461 Economic Geology I 4 ch (3C 2L)
General features of mineral deposits, their origin, localization and classification, with emphasis on exploration, evaluation and development. Prerequisites: ESCI 2142, ESCI 3482, or approval of instructor.

ESCI4472 Economic Geology II (A) 4 ch (2C 2L)
Advanced features of mineral deposits, their origin, localization and classification, with emphasis on exploration, evaluation and development. Prerequisites: ESCI 2142, ESCI 3482, or approval of instructor.

ESCI4501 Applied Geophysics I (A) 4 ch (3C 3L)
Introduction to the principles, survey procedures and interpretation techniques of gravity, magnetic, and gamma radiation methods of geophysical exploration. Applications of these methods to geological mapping, mineral and hydrocarbon exploration, engineering and environmental applications. Prerequisites: MATH 1013 or MATH 1063, PHYS 1062 and PHYS 1092 or equivalent. Recommended: MATH 2513 or MATH 2313.

ESCI4512 Applied Geophysics II 4 ch (3C 3L)
Introduction to principles, survey procedures and interpretation techniques of electrical, electromagnetic, and seismic methods of geophysical exploration. Applications of these methods to from mineral and hydrocarbon exploration as well as engineering and hydrogeological-environmental investigations. Prerequisites: MATH 1013 or MATH 1063, PHYS 1062 and PHYS 1092. Recommended: MATH 2513 or MATH 2313.

ESCI4611 Physical Geochemistry (A) 3 ch (3C)

ESCI4612 Isotope Geochemistry (A) 3 ch (3C)
Lectures focus on processes active in modern sedimentary environments, landform development, and facies (e.g., rivers, lakes, deltas, estuaries, beaches, barrier islands, shallow and deep oceans), and their interpretation and successions in the geologic record (sequence stratigraphy). Labs cover microscopic examination of sedimentary diagenesis, introductory air photo/image analysis and interpretation, and exercises relating to paleogeography, sea-level-change and, (sequence-) stratigraphic
ECON1073 Economics for Engineers

An introductory course designed for students in engineering and computer science programs. Topics covered include price, production and cost theory; aggregate supply, aggregate demand; money and banking; public finances and international economics; applications to engineering and computer science students. Students who take this course may not take any other first year economics course for credit.

ECON2008 The Chinese Economy in Transition

This course surveys the working of the contemporary Chinese economy in its various aspects. Topics to be covered include the background to China’s economic reform and its process, China’s economic transition, factors contributing to China’s fastest economic growth, economic institutions, economic policy, and economic issues in contemporary China.

ECON2009 Understanding Economics through Film

This course develops a vocabulary and a set of tools to analyse films, and utilizes the motion picture to establish the context for teaching economics concepts. Plots and subplots of selected films are used to illustrate problems and issues that are amenable to economic analysis. Through a combination of readings, lectures, discussion and films, students will develop a set of skills characterized as an economic way of thinking. The course is designed for undergraduates with no previous economic training.

ECON2203 Introduction to Economic Governance

This course introduces students to the role and functions of the public sector, and the economic system. Topics include the rationale for government activities, the emergence of public/private collaborative initiatives, the impact of specific government programs, overall fiscal policy and government stabilization programs, policies designed to stimulate economic growth, and policies designed to protect the environment. These policies are considered in the context of intergovernmental fiscal relations and the inherent potential for conflict between different levels of government.

ECON3013 Intermediate Microeconomics

Microeconomics has two main purposes. First, it is a foundation course in the study of economics; it provides the essential building blocks for higher level economics and finance courses. Second, microeconomics can be directly applied to help solve the day-to-day decisions of business and government managers; issues such as pricing, production, advertising, and strategic interaction. It achieves this through extensive use of real-world examples and short case studies. Prerequisite: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or, ECON 1073), or ECON 1073.

ECON3015 The Economics of Strategic Thinking

Strategic thinking is the art of outdoing an adversary, knowing that the adversary is trying to do the same to you. All of us must practice strategic thinking at work as well as in everyday life. As a business manager, political adviser, lawyer and in the day-to-day pursuits of life (such as buying a car) you will be trying to win the competition. This unit is about the basic principles students can adopt in the attempt to become a better competitive strategist in business and daily life. The unit draws these principles from the fields of business, politics, law, sports, warfare, fiction and modern art forms such as the movies. Prerequisites: First-year microeconomics (ECON 1001, ECON 1013, ECON 1014, ECON 1073), or permission of the instructor.

ECON3016 Introduction to Development Economics

This course introduces students to economics models and concepts relevant to understanding major challenges and economic policy analysis in developing and transitional economics. The course examines the similarities and differences of economics issues in developed, developing, and transitional economies. Prerequisites: ECON 1013 and ECON 1023.

ECON3017 Canadian Economic Development

This course examines the growth and development of the Canadian economy in relation to the endowment with natural resources, changing market conditions, institutions and technology. These concepts are applied to the evolution and role of public policy in Canada and the roots of regionalism in Canada. Prerequisite: Some background in Economics, preferably ECON 1013 and ECON 1023.

ECON3023 Intermediate Macroeconomics

Macroeconomics seeks to understand the way in which national economies function, and they way they interact with each other at the international level. Key questions are: the determination of a country’s standard of living and level of growth; the causes of recessions, the unemployment, and inflation; the determinants of exchange rates and the benefits (or costs) of currency unions; and the determinants of interest rates. This course is an essential building block for higher level study in economics and finance, and is indispensable for understanding stock markets and financial investment.
SECTION H: FREDERICTON COURSES

ECON3055  Public Policy Analysis  3 ch (3C)
Introduces public policy analysis from an economic perspective. It covers both microeconomic policy (how and why governments intervene in the marketplace, and the criteria for such intervention) and macroeconomic policy (whether actual legislation is effective). It develops the necessary tools to discuss public policy, and applies them to various subjects (such as labor, taxation, government, spending, trade, monopoly, fisheries, etc.). The discussion is located in the Canadian context: the assignment of government functions in our Constitution, and fiscal federalism. Prerequisites: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014) and 3 ch of first-year macroeconomics (ECON 1002, or ECON 1023, or ECON 1024), or ECON 1073.

ECON3103  Introduction to Money and Banking  3 ch (3C)
Introduces theory of money, history of monetary systems, deposit creation, central and commercial banking, monetary policy and foreign exchange. Prerequisite: 3 ch of first-year microeconomics (ECON 1002, or ECON 1024), or ECON 1073.

ECON3203  Public Finance Analysis  3 ch (3C)
Analyzes federal, provincial, and local expenditure and taxation by governments. Both theoretical evidence (with an emphasis on Canadian institutions) are emphasized. Prerequisite: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014), or ECON 1073.

ECON3204  The Taxation of Personal Income: Principles and Practice (H)  3 ch (3C)
The taxation of personal income in Canada. Topics include the concept of taxable income; capital gains; dividends; deduction vs credits; tax rates; economic efficiency and equity; form alternative s of taxation. The Canadian tax treatment of personal income is examined in detail. Prerequisite: First-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014 or ECON 1073), or permission of the instructor.

ECON3205  The Taxation of Business Income: Principles and Practice (O)  3 ch (3C)
The taxation of corporate income in Canada. Topics include the structure of the corporate tax system; the concept of integration; typical tax planning strategies. Taxation of partnerships and trusts will be discussed briefly. The Canadian tax system is examined in detail. Prerequisite: ECON 3204.

ECON3401  International Economics: Trade  3 ch (3C)
Introduces the theory of international trade. Topics include mercantilism, comparative advantage, gains from trade, terms of trade, factor endowment and industrial organization models of trade, income distribution effects of trade, international movements of capital and labour, protectionism, trade agreements and economic development. Prerequisites: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014) and 3 ch of first-year macroeconomics (ECON 1002, or ECON 1023, or ECON 1024), or ECON 1073. ECON 3013 recommended.

ECON3412  International Economics: Finance  3 ch (3C)
Introduces the financing of trade and capital flows among nations. Topics include balance of payments, foreign exchange markets and exchange rates, macroeconomic policy under fixed and flexible exchange rates, and international monetary systems. Prerequisites: 3 ch of first-year microeconomics (ECON 1001, ECON 1013, or ECON 1014) and 3 ch of first-year macroeconomics (ECON 1002, ECON 1023, or ECON 1024), or ECON 1073; ECON 3023 recommended.

ECON3504  Regional Economic Theory and Policy  3 ch (3C)
Concerned with the general theory of regional economic disparities and economic development, and the role of governments (federal and provincial) in alleviating disparities. Emphasizes current problems and policies pertaining to Atlantic Canada. Prerequisites: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014), or ECON 1073.

ECON3505  Information Technology and the Canadian Economy  3 ch (3C)
Blends economic analysis, economic history and public policy to spotlight the role of economics in the context of the evolution in information technology. Topics include: the structural evolution of the Canadian and regional economies, the emergence of knowledge-based industries, the economic costs and benefits of education, the demographic and skill composition of Canada's labour force, the economics of technological change and the contemporary role of the information technology, the impact of information technological developments on human rights, the role of the private and public sectors in the new transnational global economy.

ECON3601  Business Statistics (Cross-Listed: ADM 2623)  3 ch (3C)
Introduces the methods of data presentation and analysis, and their applications to business problems, including measures of data description, probability concepts and distributions, and statistical design theory. Also covers sampling theory, hypothesis testing using different techniques. Prerequisites: 33 ch, MATH 1823, and MATH 1833 or equivalents. Students may not receive credit for both ECON 3601 and ADM 2623.

ECON3602  Management Science (Cross-Listed: ADM 2624)  3 ch (3C)
Presents a variety of applications of optimization models to business problems such as allocation, blending, and scheduling. Introduces concepts production planning, inventory control, network models and sequencing. Prerequisite: ADM 2623. Students may not receive credit for both ECON 3602 and ADM 2624.

ECON3628  Advanced Statistics for Finance (Cross-Listed: ADM 3622)  3 ch (3C)
Examines theory behind statistical techniques such as analysis of variance, simple and multiple regression, non-parametric methods of estimation and hypothesis testing, and time series analysis. Examines the applications of these techniques to problems in finance and other areas of business administration. Prerequisite: ADM 2623. Students may not receive credit for both ECON 3628 and ADM 3628.

ECON3665  Mathematical Economics I: Economic Analysis  3 ch (3C)
Emphasis is on use of mathematical tools in economic theory. Prerequisites: Both first-year microeconomics (ECON 1001, or ECON 1013 or ECON 1014) and first-year macroeconomics (ECON 1002, or ECON 1023 or ECON 1024) or ECON 1073, plus Mathematics requirement for Honours and "A" Majors.

ECON3702  Cost-Benefit Analysis  3 ch (3C) [W]
Principles of cost-benefit analysis including consideration of welfare economics, the treatment of intangibles, non-efficiency considerations, time discounting, evaluation criteria, uncertainty and risk. Prerequisite: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014), or ECON 1073.

ECON3705  Canada and the New Global Economy  3 ch (3C) [W]
This course will examine the Canadian economy in the context of the new global economy of the 21st century. Economic theory, economic history and public policy will be the backdrop for a discussion of the trilogy of interactive economic forces that define the new global economy: globalization, trade liberalization and the information technology and communications revolution. Prerequisite: First-year microeconomics [ECON 1001, or ECON 1013, or ECON 1014 or ECON 1073].

ECON3724  Economics of Human Resources  3 ch (3C)
How do employers recruit the best employees for the job? How important is money relative to other factors when it comes to hiring and keeping employees? Should good performance on the job be rewarded or should bad performance be penalized? The purpose of this unit is to provide the student with the economic tools of analysis to answer these questions as well as many other important questions in the area of human resource management. Topics include education and training decisions, hiring and turnover, compensation and worker incentives, measuring performance, promotions as a motivator, and team-based production. The analysis of the main issues will be reinforced and complemented with reference to a series of firm-level case studies. Prerequisite: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014), or ECON 1073.

ECON3744  Recreation Economics (O)  3 ch (3C)
Discusses applications of economic principles to outdoor recreation planning and policy decisions. Management and allocation issues are addressed with emphasis on approaches which make outdoor recreation as socially beneficial as possible at the lowest possible cost. Prerequisite: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014), or ECON 1073.

ECON3755  Environmental Economics  3 ch
Examines interaction of ecological and economic systems. Considers population growth and food supply, non-renewable resources, and population. Prerequisite: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014), or ECON 1073, or permission of the instructor.

ECON3766  Economics of Climate Change (A)  3 ch (3C)
Climate change is posing a significant challenge to world economics. This course focuses on valuing the consequences of climate change and assessing the costs of mitigation and adaptation. The efficiency of
ECON3775 The Economics of Canadian Immigration 3 ch (3C) [W]
An analysis of the role of international migration on the course of Canadian economic development. Prerequisites: Both first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014) and first-year macroeconomics (ECON 1002, or 1023 or 1024) or ECON 1073.

ECON3801 Economics of Transportation I 3 ch (3C)
Examines the role played by transportation in the location of economic activity and other aspects of economics development. Prerequisite: Both first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014) and first-year macroeconomics (ECON 1002, or ECON 1023 or 1024) or ECON 1073.

ECON3815 Introduction to Health Economics 3 ch (3C)
The course discusses applications of economic principles and empirical analysis to health and health policy. It considers such matters as the demand for health care, and the supply of health services (both through health practitioners and hospitals); the economic effects of health insurance, health economic evaluation techniques, and public policy formulation. Emphasis is on Canadian health programs and policies. Prerequisite: 3 ch of first-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014), or ECON 1073.

ECON3845 Introduction to Law and Economics 3 ch (3C) [W]
This course applies the tools of economic analysis to the study of legal rules and institutions. Topics and case studies in three core areas of the law - property, contracts, and crime and punishment - are used to illustrate and develop two related ideas. The first is that economic principles have guided significant developments in the evolution of the law in many areas, and an understanding of these economic principles will lead to a better understanding of the law as it is currently practiced. The second is that economic analysis can be used to assess and critique current law from a social perspective, leading to improved public policy evaluation and formation in all areas of civil and criminal law. Prerequisite: First-year microeconomics (ECON 1001, or ECON 1013, or ECON 1014, or ECON 1073).

ECON3865 Energy Economics 3 ch (3C)
Applies economic theory to energy issues. Demand for energy and supply of energy are explored in terms of non-renewable and renewable energy resources. Markets for energy resources are discussed. Specific attention is directed to petroleum markets and OPEC behaviour. Public policy issues associated with the energy sector such as the environment and sustainability are addressed. Prerequisite: Any first year economics course.

ECON3905 Contemporary Issues in the Canadian Economy 3 ch (3C) [W]
Examines a variety of contemporary economic issues, including inflation, unemployment, economic growth, regional disparity, monetary and fiscal policies, the new international economic order, bilateral and multilateral trade agreements. Prerequisite: Any First Year Economics Course.

ECON4013 Advanced Microeconomics 3 ch (3C)
Focuses on advanced theory of choice. Topics include choice under uncertainty, the theory of the firm, oligopoly theories, game theory, general equilibrium, and the distribution of income. Prerequisites: ECON 3013 and ECON 3605 or an equivalent to ECON 3665.

ECON4023 Advanced Macroeconomics 3 ch (3C)
Emphasizes core neo-classical theories as well as Keynesian and post-Keynesian models. Prerequisites: ECON 3665 (or equivalent) and ECON 3023.

ECON4625 Econometrics I 3 ch (3C)
Introduction to basic econometric techniques for estimating and testing economic models. Topics include: review of basic statistics, the nature of econometric models and economic data, regression analysis, hypothesis testing, and applications. Emphasis is on intuition and applications. Prerequisites: Any first year economics course and 6 ch Introductory Statistics (e.g. ECON 3601/ADM 2623 and ECON 3628/ADM 3629).

ECON4665 Mathematical Economics II 3 ch (3C)
Economic applications of optimizing techniques are considered primarily in the context of linear models. Prerequisites: ECON 3665, or MATH 2003 and MATH 2013, and ECON 3013.
Development of personal and social identity among children in First Nations students. Issues concerning the control of mergers, monopoly, predatory pricing, and collusion, resale price maintenance. The theory of industrial organization, including Canadian aboriginal cultures.

**ED 30041** The Theory and Practice of Education 3 ch
Introduces the dominant theories which influence and shape current thinking and practices in school environments today. Key ideas, their origins, teaching responsibilities, and the components of professional practice are discussed. The course is intended to orient education students to teaching as a profession.

**ED 30042** History of Educational Ideas 3 ch
A course designed to inform beginning teachers about the most significant ideas (and the people who originated them) that have influenced the development of contemporary education.

**ED 30043** Indigenous Education 3 ch
Traditional First Nations pedagogy and concepts of education in comparison with those which have shaped formal schooling. Roles and responsibilities of schools, teachers, and communities in educating First Nations students.

**ED 30044** History of Childhood 3 ch
A course that follows the changing public perception and treatment of children in western society from the Seventeenth Century to the present. Children in Maritime Canada are featured prominently.

**ED 30052** School Law 3 ch
An overview of the legal, organizational, financial and professional aspects of schools and school systems. (Only offered in Trinidad and Tobago)

**ED 30051** School Law and Organization 3 ch
An overview of the legal, organizational, financial and professional aspects of schools and school systems.

**ED 30053** Wabanaki Schools in New Brunswick 3 ch
Schools in Wabanaki communities are governed differently than provincial schools. The course will explore the governance structures of New Brunswick’s Wabanaki communities, community schools, and their relationships with Federal and Provincial governments.

**ED 30061** Students, Schools, Equity and Social Justice 3 ch
Explores the social, economic, cultural, and political contexts of learners’ lives, discourses of social difference, equity and social justice. Topics include: sexism, gender bias, racism, class oppression, homophobia, and heterosexism, harassment and violence, and the questions these issues raise for schools, curricula and classroom practice.

**ED 30063** Health Promotion in Schools 3 ch
Examines concepts and inter-relationships among nutrition, exercise, and well-being within educational contexts.

**ED 3111** Professional Ethics for Practitioners of Adult Education 3 ch
Introduction to ethical theory and philosophical approaches to reflective practice emphasizing self-consideration, decision making, and ethical standards in the field of adult education. Participants use field experience to support readings and case studies.

**ED 3015** Practicum in Adult Education 3 ch
Practical, field-based learning-based on an individualized learning contract and completed in teaching, learning or other appropriate adult education settings such as training, literacy, tutoring, curriculum development, etc. The intent of the practicum is to help learners develop observational, critical and reflective skills as well as skills appropriate to their work with adults.

**ED 3021** Human Development and Learning: An Overview 3 ch (3C)
Developmental perspectives on human growth and learning.

**ED 3022** First Nations Epistemology (Ways of Knowing) 3 ch (3C) (Cross-Listed: ABRG 4686)

**ED 3024** Understanding the Adult Learner 3 ch
Examines the characteristics of learners in formal and non-formal education settings and identifies learning processes and conditions as they influence adult learning.

**ED 3031** The Education of Exceptional Learners 3 ch
Provides the student with an introduction to the field of knowledge associated with exceptional learners.

**ED 3033** Teaching in a Cultural Context 3 ch (3C)
How teachers respond effectively to the culture of children as individuals and to the culture of their people, with regard to a variety of cultural contexts, including Canadian aboriginal cultures.

**ED 3041** The Theory and Practice of Education 3 ch
Introduces the dominant theories which influence and shape current thinking and practices in school environments today. Key ideas, their origins, teaching responsibilities, and the components of professional practice are discussed. The course is intended to orient education students to teaching as a profession.

**ED 5835** Industrial Organization: Policy 3 ch (3C)
Economics of regulation and intervention, anti-competitive policy, policy issues concerning the control of mergers, monopoly, predatory pricing, collusion, resale price maintenance. Prerequisite: ECON 5825, or at discretion of instructor.

**ED 5815** Health Economics 3 ch (3C)
The course discusses and analyses the health economics literature. A set of topics will be selected by the instructor for consideration. Likely topics will include demand theory and measurement as applied to health care markets, production and supply theory (in the context of health markets), health economic evaluation methods, managed competition approaches to health care, and public policy analysis. Other topics may be introduced in accordance with the instructor’s priorities, or the specific interests of the students. ECON 3013, ECON 3023 or the permission of the instructor. Prerequisite: ECON 3013 and ECON 3023 or permission of the instructor.

**ED 5825** Industrial Organization: Theory 3 ch (3C)
Covers welfare economics of competition and monopoly, determinants of industrial structure, theories of industrial pricing, rationalization, technological innovation, and foreign ownership. Prerequisite: ECON 3013, or at discretion of instructor.

**ED 5885** Environmental Economics II 3 ch (3C)
Applies economic theory to real-world environmental issues. The theory of environmental externalities is first explored. Then various applications are introduced such as environmental valuation techniques, computable general equilibrium modeling, and environmental accounting procedures. Such environmental issues as deforestation, urban air pollution, and water pollution will be covered. Prerequisite: ECON 3755 or permission of the instructor.

**ED 5899** Topics in Economics I 3 ch (R 18)
Directed study/reading programs. Workshops or seminars will be held as required. Students should apply to the Department of Economics in September or January for permission to take one of these courses.

**ED 5999** Topics in Economics II 3 ch (R 18)
Directed study/reading programs. Workshops or seminars will be held as required. Students should apply to the Department of Economics in September or January for permission to take one of these courses.

**EDUCATION**

ED courses are normally not available to non-education students. Exceptions are ED 4791, ED 3021, ED 3031, ED 3043, ED 3063. See beginning of Section H for abbreviations, course numbers and coding.

**ED 3011** Professional Ethics for Practitioners of Adult Education 3 ch
Introduction to ethical theory and philosophical approaches to reflective practice emphasizing self-examination, decision making, and ethical standards in the field of adult education. Participants use field experience to support readings and case studies.

**ED 3021** Human Development and Learning: An Overview 3 ch (3C)
Developmental perspectives on human growth and learning.

**ED 3022** First Nations Epistemology (Ways of Knowing) 3 ch (3C) (Cross-Listed: ABRG 4686)

**ED 3024** Understanding the Adult Learner 3 ch
Examines the characteristics of learners in formal and non-formal education settings and identifies learning processes and conditions as they influence adult learning.

**ED 3031** The Education of Exceptional Learners 3 ch
Provides the student with an introduction to the field of knowledge associated with exceptional learners.

**ED 3033** Teaching in a Cultural Context 3 ch (3C)
How teachers respond effectively to the culture of children as individuals and to the culture of their people, with regard to a variety of cultural contexts, including Canadian aboriginal cultures.

**ED 3041** The Theory and Practice of Education 3 ch
Introduces the dominant theories which influence and shape current thinking and practices in school environments today. Key ideas, their origins, teaching responsibilities, and the components of professional practice are discussed. The course is intended to orient education students to teaching as a profession.

**ED 3042** History of Educational Ideas 3 ch
A course designed to inform beginning teachers about the most significant ideas (and the people who originated them) that have influenced the development of contemporary education.

**ED 3043** Indigenous Education 3 ch
Traditional First Nations pedagogy and concepts of education in comparison with those which have shaped formal schooling. Roles and responsibilities of schools, teachers, and communities in educating First Nations students.

**ED 3044** History of Childhood 3 ch
A course that follows the changing public perception and treatment of children in western society from the Seventeenth Century to the present. Children in Maritime Canada are featured prominently.

**ED 3052** School Law 3 ch
An overview of the legal, organizational, financial and professional aspects of schools and school systems. (Only offered in Trinidad and Tobago)

**ED 3051** School Law and Organization 3 ch
An overview of the legal, organizational, financial and professional aspects of schools and school systems.

**ED 3053** Wabanaki Schools in New Brunswick 3 ch
Schools in Wabanaki communities are governed differently than provincial schools. The course will explore the governance structures of New Brunswick’s Wabanaki communities, community schools, and their relationships with Federal and Provincial governments.

**ED 3061** Students, Schools, Equity and Social Justice 3 ch
Explores the social, economic, cultural, and political contexts of learners’ lives, discourses of social difference, equity and social justice. Topics include: sexism, gender bias, racism, class oppression, homophobia, and heterosexism, harassment and violence, and the questions these issues raise for schools, curricula and classroom practice.

**ED 3063** Health Promotion in Schools 3 ch
Examines concepts and inter-relationships among nutrition, exercise, and well-being within educational contexts.

**ED 3110** Methods and Strategies in Adult Education: An Introduction 6 ch
Examines key topics in applied terms to prepare new instructors for the first year of teaching. Topics include: planning instructional segments; writing objectives; evaluating students, programs and teaching; using and assessing teaching strategies, audio-visual aids and learning resources. Students will participate in micro-teaching activities.

**ED 3113** Communication Practices for Adult Education 3 ch
Identifies general theories of and strategies for oral, written and visual communications. Students will be expected to assess their skill levels in all three areas.

**ED 3114** Introduction to Workplace Learning 3 ch
Designed to provide learners with an appreciation of the origins and trends in workplace learning. The course will examine the workplace as a learning environment. Various approaches to adult learning within the changing context of work will be examined.

<tr>
<td>ED3115</td>
<td>Methods and Strategies in Adult Education (online version)</td>
<td>3</td>
<td>This course examines methods and strategies to facilitate effective adult education programs. Topics include: planning instructional segments; writing objectives; evaluating student work, programs and teaching; using and assessing teaching strategies, and learning resources.</td>
</tr>
<tr>
<td>ED3211</td>
<td>Introduction to Art and Creative Education</td>
<td>3</td>
<td>Students will develop an understanding of how and why visual images are a powerful form of communication and creative expression. Through individual media exploration and interactive activities students will increase their visual awareness, creative thinking and art making skills. Learning how to develop meaningful creative art education programs will also be explored. Students may receive credit for ED 3211: Introduction to Art and Creative Education or ED 5209: Theories and Practices of Visual Arts Education, but not both.</td>
</tr>
<tr>
<td>ED3241</td>
<td>Music for Elementary School Educators</td>
<td>3</td>
<td>Examines methodology, skills and content for the elementary classroom educator to use in teaching music to young learners in a variety of settings. *Students may receive credit for ED 3241: Music for Elementary School Educators or ED 5242: Music for the Classroom Teacher, but not both.</td>
</tr>
<tr>
<td>ED3362</td>
<td>Access to Literacy</td>
<td>3</td>
<td>Although the teaching of reading is regarded as one of the fundamental tasks of the school system, there is relatively little attention paid to what is being read. In this course students will learn: how to find out about books; how to recognize a genuine work of imaginative literature when they encounter one; and how to talk about books among themselves and with children.</td>
</tr>
<tr>
<td>ED3415</td>
<td>Developing Numeracy</td>
<td>3</td>
<td>The study of number relationships and approaches to developing number sense in children and adults.</td>
</tr>

**SECTION H: FREDERICTON COURSES**

ED4012 Diversity and Inclusion in Adult Living 3 ch
Examines culturally-defined values, beliefs, and assumptions; how cross-cultural communication plays out in formal and informal situations, work environments, and the wider community; and how to create quality international and cross-cultural learning experiences. Develops practical strategies for ensuring meaningful inclusion and for creating safe climates that model the principle of valuing differently acquired wisdom.

ED4031 Towards Diversity in the Classroom 3 ch
Examines how schooling reproduces and produces social inequality and explores liberatory pedagogical practices, particularly in relation to dimensions such as class, *race*, gender, and sexuality.

ED4032 Adult Learners with Exceptionalities 3 ch
This course examines the nature of 'special needs' in relation to sensory, cognitive, physical, emotional and/or learning capabilities in adults, and considers various approaches and strategies for meeting the unique needs of these adult learners.

ED4042 Introduction to Adult Education 3 ch
Examines the development of adult education as a field of practice and explores the characteristics of adult education in a variety of contexts with specific emphasis on national and provincial contexts.

ED4045 Issues in Training and Development 3 ch
Explores theoretical and practical components of workplace training designed to improve organizational effectiveness and individual performance. Learners examine emergent training topics in a variety of workplace contexts. *Prerequisites: ED 3024.*

ED4089 Gifted Education: Introduction 3 ch
The identification, development and approach to the gifted and talented are examined in terms of their intellectual, social and emotional characteristics.

ED4102 Transition to Adulthood 3 ch
Explores the principles of adult learning and their application to teaching, planning, problem solving, and motivating learners who are in transition from full-time attendance in educational programs to adult work and life roles.

ED4110 Methods and Strategies in Adult Education: Theory and Practice 6 ch
Based on learners' needs, interests and experience, theoretical and practical components of instructional strategies are explored in-depth. Particular attention is paid to the integration of instructional methods and strategies with adult learning models.

ED4113 Introduction to Distance Learning in Adult Education 3 ch
Provides an opportunity to explore and become familiar with currently available learning technologies to deliver distance education programs and courses. Use of these technologies will be required throughout the course.

ED4115 Issues in Adult Literacy 3 ch
This course provides and introduction to adult literacy education as well as critically examining the research and theory about adult literacies. Adult learning principles, instructional strategies and techniques that are used to develop adult literacy skills will be examined. Course topics include, but are not limited to, digital literacy, barriers to literacy, the development of language and literacy skills in groups, as well as literacy coaching.

ED4164 Techniques of Teaching 3 ch
Students will learn to design lessons following lecture, Socratic discussion, or combination formats and learn the appropriateness of each. Classroom skills of positioning, elocution, questioning, listening, eye contact, and so on will be learned and practised in mini-teaching sessions in front of small peer groups. Causes of student behavior problems will be analyzed and strategies for dealing with disruptive students developed.

ED4191 Independent Studies 3 ch
Students will normally be limited to 6 ch of independent study. *Prerequisites: Permission of an instructor is required before registration.*
SECTION H: FREDERICTON COURSES

**ED4363** Children's Literature Singing, Poetry and Performance 3 ch
This course will introduce students to the multi model world of children's literature through the study of authors, poets and illustrators, and the art of storytelling, singing and poetry performance with young children.

**ED4451** Health Education 3 ch
Examines curriculum and pedagogy in a range of elementary, middle and secondary school programs that come under the rubric of health education. Includes analyses of underlying assumptions, the organization of knowledge, and pedagogical approaches to this subject area.

**ED4568** La littérature à l'élémentaire I 3 ch
Dans ce cours, vous aurez l'occasion de vous familiariser avec les principes et les pratiques de la littérature en français seconde à l'élémentaire. Vous explorez l'approche de la littérature équilibrée, les pratiques exemplaires et les stratégies qui favorisent l'enseignement du français et l'enseignement des matières en français. *A required course for elementary French second language specialists. Prerequisites: A French oral proficiency certificate with a minimum level of Advanced from the New Brunswick Department of Post Secondary Education, Training and Labour.

**ED4569** La littérature à l'élémentaire II 3 ch
Dans ce cours, vous aurez l'occasion d'approfondir vos connaissances de la pédagogie de la littérature en français seconde à l'élémentaire. Vous aurez l'occasion de développer et d'essayer des pratiques et des stratégies qui favorisent l'enseignement et l'évaluation du français dans divers programmes et l'intégration de la littérature dans l'enseignement des matières en immersion. *A required course for elementary French second language specialists. Prerequisites: ED 4568 and a French oral proficiency certificate with a minimum level of Advanced from the New Brunswick Department of Post-Secondary Education, Training and Labour.

**ED4621** Learning to Learn about Teaching, Social Studies and Science 3 ch
Elementary school prospective teachers will explore the notion of teaching and learning a discipline through the study of teaching social studies and science.

**ED4643** Geography of Canada 3 ch
Investigation of pedagogical approaches to settlement patterns, urbanization, resource development, land use and economic characteristics of the various regions. Attention given to applications in the New Brunswick school curriculum.

**ED4685** Treaty Education 3 ch
This course will provide students with knowledge of the Indigenous understanding of the treaties signed between Indigenous peoples and British and Canadian governments between 18th and 20th centuries and the Peace and Friendship Treaties signed in the Maritimes in the 18th century specifically. It will also help students to think about how to convey the history of treaty-making and the competing understanding of the meanings of the treaties in the classroom in a way that is respectful of Indigenous understandings of the treaties and that promotes reconciliation.

**ED4686** Teaching First Nations Learner 3 ch
Teaching methods, learning strategies, program planning, with emphasis on a particular learning level.

**ED4688** Teaching First Nations Children's Literature 3 ch
Examines the philosophy and process of teaching First Nations literature in an integrated curriculum for primary and elementary children. Includes practical classroom experience.

**ED4791** Nutrition Concepts 3 ch (3C)
An examination of nutrients in the human diet, the relationship between diet and health, nutritional assessment, nutrition education, dietary guidance, and current nutrition issues. NOTE: Credit will not be given for both ED 4791 and KIN 3481.

**ED4862** Information and Communication Technology II 3 ch
An advanced course in the integration of ICT in the classroom. Students should have previously taken ED 3862 or be able to demonstrate sufficient background knowledge in application software. Focus will also include emerging trends in educational technologies.

**ED4863** Computers in Classroom 3 ch
This course will study current research and practices in the integration of computer technology in Business Education, ICT, and other subject areas. Students are required to demonstrate best practices in the areas of using computers as a tool, tutor and tutor in education in the development and presentation of technology enriched lessons within their area of curriculum.

**ED4884** Educational Software Analysis 3 ch (3C)
This course is designed to examine current trends and research in educational software evaluation. Students will focus on both curriculum-based software as well as administrative applications intended for professional use in and out of the classroom.

**ED4973** Special Topics in Education 3 ch (3C)
Research of current and emerging trends and development in technology, Technology Education and educational/instructional technology.

**ED5000** Field Studies Practicum 15 ch
Fifteen weeks of school and classroom experience. Additional regulations are included in Education General Regulations under Field Experiences Practicum, Section F. Prerequisites: 1) Admission to the BEd (Consecutive or Concurrent program); 2) 30 ch in B.Ed. courses including: At the secondary level 9 ch in one area of concentration; At the elementary level 12 ch including ED 5424, a course in Literacy at the elementary level, ED 55111 or ED 3621 and a course in either Art, Music or Physical Education; 3) at least 90 ch of course work in the other degree for concurrent students; 4) CGPA at least 2.0; 5) Students must have been enrolled in the B.Ed. for one year from the formal date of their admission before they are eligible for an Internship. 6) Completion of ED 4001 and ED 4002 or ED 4003 and ED 4004. 7) Police Background Check (See NOTE: Section G: Field Experiences Placements and Practicum.)

**ED5001** Teaching and Learning Theories I 2 ch
This course introduces teaching as a reflective, professional practice focused upon three themes: Teaching and Learners; Establishing a Classroom Context to Support Learning; and Professional Concerns for Teachers. Field experience is central to the course with students expected to apply course ideas in classroom and reflect on that experience in seminars.

**ED5002** Teaching and Learning Theories II 2 ch
This course continues the examination of teaching as a reflective, professional practice focused upon three themes: Teaching and Learners; Establishing a Classroom Context to Support Learning; and Professional Concerns for Teachers. Field experience is central to the course with students expected to apply course ideas in classroom and reflect on that experience in seminars.

**ED5003** Teaching and Learning Theories III 2 ch
As a culmination of Teaching and Learning Theory I and II, this course will facilitate students integrating their personal backgrounds, academic and professional education through the development of a significant project. Projects will be shared with peers as well as the broader professional and public community in a senior conference.

**ED5010** Advanced Practicum in Adult Education 6 ch
A practical, field-based learning experience in which learners will apply and practice previously acquired adult education principles and practices and will monitor themselves through using mentoring, collaboration, and peer consultation. Prerequisites: Practicum in Adult Education, or its equivalent.

**ED5011** Preparing for Prior Learning Assessment 3 ch
Through the use of reflection, self-assessment and personal journals, participants will create an experience-based dossier which will describe their personal philosophy, current professional practices, and needs for further learning. Prerequisite: ED 3024 or equivalent.

**ED5013** Special Topics in Education 3 ch
In consultation with faculty advisor. (Intended for students in the DAUS.)

**ED5022** Transformative Learning 3 ch
Explores new concepts for working with adult learners. Investigates critical thinking, critical self-reflection and transformative learning. Prerequisites: ED 3024 or equivalent.

**ED5031** Creating Supportive Environments for Learning 3 ch
Examines theory and practice related to learning environments and strategies for dealing with behaviour challenges and for children with various types of special needs.

**ED5032** Inclusion from Early Years 3 ch
An examination of personal, societal and school assumptions about the meaning and importance of inclusion in life and learning from childhood. Inclusive models of education will be examined.

**ED5033** Special Topics in Education 3 ch
In consultation with faculty advisor. (Intended for students in the DAUS.)
ED5035  Inclusionary Practices 3 ch (3C)
This course is designed to enhance prospective teachers’ knowledge of diverse student learning needs and specific strategies for enhancing the learning environment for all students.

ED5043  Special Topics in Education 3 ch (3C)
In consultation with faculty advisor. (Intended for students in the DAUJS.)

ED5044  The School and Society 3 ch
Study of interrelationships between community, students and schools.

ED5045  Philosophies of Education 3 ch
A study of various contemporary formulations of the meaning, aims, methods, and purposes of education, as well as the theories of human nature from which they are drawn.

ED5046  Educating At-Risk Students 3 ch
Characteristics of the at-risk student. Psychological, social, and economic effects of dropping out. Remedial strategies involving learning, teaching, counselling, school climate, and school organization. Exemplary programs for at-risk students and for dropout prevention.

ED5050  Practicum 12 ch
In-school experience.

ED5053  Middle Level Education 3 ch
Of interest to both experienced and student teachers, this course will focus on the physical, intellectual, psychological and social characteristics of 10- to 14-year-olds and the implications for effective instruction. Additional topics will include Middle School organization, curriculum integration, and teaching.

ED5054  Changing Roles in the Education Workplace 3 ch
Reflection on professional relationships among teachers, administrators and parents. Recent changes in school law and a study of decision making processes in education will be considered.

ED5062  Cultural Constructions of Childhood 3 ch
An historical examination of cultural constructions of childhood and family and the implications of these various constructions upon the education of young children.

ED5065  Personal Growth and Helping 3 ch
This course will focus on understanding human development; particularly the development of the self and how such development may be nurtured or thwarted within the educational setting. Students will examine issues such as identity, personality, self-awareness, relationships and basic counselling skills. These issues will be regarded on two levels: as aspects of the individual self and as aspects of the learning environment.

ED5070  Cultural Contexts of Education 6 ch
This course examines history, philosophy, social contexts, and law as they relate to education. Through each of these disciplines we explore the broad contexts and impacts of policy, ethics, and equity, with connections to curriculum and pedagogy. The format will be a combination of lectures and seminars.

ED5071  Education in International Contexts 3 ch
This course examines the nature of education in a range of international contexts with a particular focus on understanding how culture and world view shape education and comparing and contrasting trends and issues for teachers and the teaching in those contexts. It is designed to provide teacher education students with a global perspective on the education profession.

ED5072  Teaching Gifted Students 3 ch (3C)
An examination of school wide enrichment models, curriculum differentiation, and the social and emotional needs of gifted learners.

ED5075  History of Education 3 ch
Current problems: aims, curriculum, teaching, administration and ideas viewed from an historical perspective.

ED5076  Religion and Spirituality in Education 3 ch
This course will examine the controversial issue of religion and spirituality in education. It will examine how faith and visions of life impact education, values and the philosophy of education, religion and the history of education, visions of life in the curriculum, faith expressions in the classroom, and teaching about religion and spirituality.

ED5078  Communication Disorders in the Classroom 3 ch
This course will provide an introduction to speech and language development in preschool children. It will also provide an overview of academic and classroom difficulties that may result from impairments in speech and/or language.

ED5086  Special Education Field Experience 3 ch
Provides a school-based experience working with students with special needs under the direction of faculty and resource teachers. Enrolment is limited. Prerequisites: ED 3031. Permission of the instructor is required before registering.

ED5091  Learning Disabilities: Introduction 3 ch

ED5096  Behavioural/Emotional Disorders 3 ch
An overview of various emotional and behavioral disorders of children and young people and the ways in which coping and management strategies can be applied to develop self-discipline and control.

ED5097  Differentiating Instruction in the Classroom 3 ch
This course will allow teachers to explore current research on differentiation: familiarize themselves with many strategies for differentiating content, process and product; develop differentiation lesson plans including pre-assessment strategies as well as classroom management strategies intended for classroom application.

ED5102  Curriculum and Evaluation in the Early Years 3 ch
Examines characteristics of early years learners and the role of the teacher as observer and curriculum developer in theory and practice.

ED5105  Connecting Home and Schooled Literacies 3 ch
This course will examine the theory and practice of connecting home and school for the development of a literate community.

ED5114  Orientation to Counselling 3 ch
This course provides an introduction to the role of the counsellor in various settings, including the public education system. Students will examine the counsellor as a person, roles of the client and counsellor, the counselling process, counselling skills, counselling theories, and counselling in the individual and group context.

ED5142  Career Guidance 3 ch
Explores the ways to stimulate career development at each level within the public education system. Topics include: definition of career guidance, theories of vocational development, career education in the curriculum, and career assessment and counseling.

ED5143  Group Theory and Skills 3 ch
Explores the theory and experiences necessary to understand group dynamics and effective group skills with applications to the public education system. Topics include: group dynamics, leadership, team building, decision-making, communication, effective use of controversy and creativity in group decision making.

ED5154  Creativity, Images and Meaning (Cross-Listed: FNAT 3703) 3 ch
Addresses the significance of creativity in image making, communication, and self-expression. Imagery as a primary form of communication provides a basis for exploring a wide variety of topics, ideas and issues. Analyzing images, exploring different visual media and communicating through visual means are key components of this course. Connections that exist between images and other forms of communication and self-expression are also explored. Prerequisites: By arrangement with instructor.

ED5156  Special Topics in Adult Education (O) 3 ch
Designed to explore areas of special interest or concern in adult education.

ED5157  Adult Education and Community Development 3 ch
Practitioners in various disciplines can build the capacity of communities to drive socioeconomic and systemic change necessary for enhanced sustainability. This course explores various adult education-related principles and strategies and enables participants to work on community development problems. (Offered every other year.)

ED5161  Curriculum Theory 3 ch
Theory, current trends, and the role of the teacher in curriculum development.
SECTION H: FREDERICTON COURSES

ED5162 Integrated Curriculum for the First Nations Learner 3 ch
Culture-based education: design, development, and implementation. Appropriate evaluation and assessment.

ED5164 Learning with Technology in Adult Education 3 ch
Utilization of a range of instructional technologies, application of educational technologies for teaching and learning. NOTE: This course may not be taken by Computer Science students.

ED5166 Cultural Studies and Critical Pedagogy 3 ch
The study of the entire range of a society's arts, beliefs, institutions, and communicative practices and its application to education.

ED5167 Interpreting Play for Curriculum Development 3 ch
An exploration of the literature on play including play as reflective pedagogy. A variety of theoretical perspectives will be brought to the interpretation of children's play. The teacher's role in creating physical and social environments that facilitate cognitive, emotional, social, spiritual and physical growth will be examined.

ED5171 Assessing Adult Learning 3 ch
Identification of the principles and techniques underlying a variety of assessment methods for learning and teaching. Students will be expected to construct instruments and apply alternative assessment strategies.

ED5173 Educational Statistics 3 ch
Statistics: descriptive and inferential. Includes central tendency, variability, normal curve, correlation and regression, probability, hypothesis testing, chi square, "t" test.

ED5174 Introduction to Standardized Testing Instruments 3 ch
An examination of selected standardized tests used in the public school system.

ED5175 Classroom Assessment 3 ch
An examination of current assessment issues, procedures, and techniques and how these can be used to improve teaching and student learning.

ED5181 Feminist Theory and Education 3 ch
Explores how feminist theories have re-thought educational practice, with specific focus on issues of knowledge, curriculum, classroom pedagogy, research, and educational policy.

ED5182 Problem Solving with Young Children (Subject, Learner Levels) 3 ch
Examines research and theory of problem solving with young children. Emphasizes teacher's role as facilitator of problem solving across the curriculum.

ED5184 Parental Involvement in Schooling 3 ch
A critical examination of the theory and practice of parental involvement in schooling. A variety of current practices will be examined to explore how professional and parental knowledge/expertise are distinguished and how power relations are constructed.

ED5191 Independent Studies 3 ch
Students will normally be limited to 6 ch of independent study. Prerequisite: Permission of an instructor is required before registration.

ED5209 Creativity and Visual Arts in Teaching and Learning 3 ch
Addresses the importance of creativity and innovation in education, explores applications in teaching, and builds creative capacity through visual and other modes of communication. It is a dynamic, interactive and cross-disciplinary course designed to increase creative, critical and divergent thinking, and art making skills in order to enhance meaning making, problem solving and self-expression. Students will also learn to design creative and innovative teaching strategies relevant and applicable to teaching visual art and related subject areas.

ED5211 Integrated Learning Through Art 3 ch
Art education theories and practices as they apply to learning across the curriculum. Prerequisites: ED 5209 or a previous course in visual art or art education.

ED5212 Curriculum Development in Art Education 3 ch
Knowledge, skills, and understanding for developing art curricula at various learning levels. Prerequisite: ED 5209 or a previous course in visual art or art education.

ED5213 Issues in Art Education 3 ch
An examination of local, national, and international issues currently being debated in art education. Prerequisites: ED 5209 a previous course in visual art or art education.

ED5241 Philosophy of Music Education 3 ch
A course rooting methodology in significant, current philosophical trends tailored to students planning to teach music at any level. Prerequisite: 9 ch in music courses or permission of the instructor.

ED5242 Music for the Classroom Teacher 3 ch
Examines various methodologies, skills and content for the elementary classroom teacher to use in teaching music in a variety of settings. Students will sing, play an instrument, listen and move to music.

ED5243 Music in the Elementary School 3 ch
Study of methods and materials current in the elementary school. Development of skills and curriculum. Study of the young learner and music. Prerequisite: 9 ch in music courses or permission of the instructor.

ED5244 Drama Across the Curriculum (Middle, Secondary) 3 ch
Prerequisite: ED 5209 or a previous course in visual art or art education. A sequel to ED 5209 that expands the focus and scope of the earlier course.

ED5272 Changing to Teaching Practice 3 ch
Examination of teaching practices in light of current pedagogical theory. Specific attention to varying teaching styles and modalities, developmental issues and student centered learning.

ED5273 Interdisciplinary Instruction 3 ch
Explores the theory and practice of interdisciplinary teaching with specific reference to each of the elementary, middle level, and secondary levels of schools.

ED5313 Cultural Studies through Theatre (Elementary, Middle, Secondary) 3 ch
Theatre practices rooted in critical theory and cultural production will engage participants in an exploration of inclusive practices. No experience necessary.

ED5314 Drama Across the Curriculum (Middle, Secondary) 3 ch
Group process drama will be employed to study in any curriculum subject, such as history, mathematics, science and social studies. No experience necessary.

ED5315 Dramatization of Literature (Elementary, Middle) 3 ch
The interpretation and understanding of literature will be studied through various theatre practices, including readers' theatre, chamber theatre, monologues, dramatic scripts, and other media such as film.

ED5352 Teaching Writing 3 ch
This course introduces discourse about and approaches to teaching and evaluating writing in schools, including traditional approaches, writing process, genre modelling and critical studies.

ED5353 Teaching Secondary English I 3 ch
Aims, materials, methods of teaching language, literature, and composition. Middle school and high school.

ED5354 Teaching Secondary English II 3 ch
A sequel to ED 5353. Emphasis on planning course units, evaluation in English, and the integration of English and other subjects. Prerequisites: ED 5353.

ED5355 Literacy Learning in Early Years 3 ch
An exploration of diverse research in literacy learning, teaching and assessment practices and the development of literacy skills in the early years.

ED5356 Literacy Learning in the Middle School 3 ch
Current theories of the nature of literacy learning and their relationship to instructional practices in the middle years.

ED5357 Poetry K-12 3 ch
Poetry is probably the most reluctantly taught subject in the school system. Yet it offers one of the most potent links with our cultural and linguistic heritage. This course provides access to texts and to a range of discussion strategies that can be used throughout the school system.

ED5358 Critical/ Cultural Literacy (Middle, Secondary) 3 ch
An examination of literature from different cultural groups using the theories and pedagogical practices of critical literacy.
ED539 Cultivating Proficient Readers 3 ch
This course provides opportunities to learn a range of reading, learning and assessment strategies that address readers’ strengths, needs and passions across content areas.

ED5361 Challenging the Authority of Texts 3 ch
English studies are predicated on textual “authority”; something “authored” and “true.” Students will be introduced to contemporary discourses which teach otherwise. Practical approaches offer alternative strategies to formalism structures bogging down English studies in schools.

ED5362 Symbolic Representation in Children’s Play, Pictures and Print 3 ch (3C)
Examines theory in practice of young children and symbolic representation as the context of their emerging literacies.

ED5422 Teaching High School Mathematics 3 ch
Focus on appropriate methodology for teaching mathematics at the high school level. 
Prerequisite: 12 ch of mathematics (MATH) or 6 ch of mathematics and 6 ch of chemistry or physics, or permission of the instructor.

ED5423 Teaching Middle School Mathematics 3 ch
Focus on appropriate methodology for teaching mathematics at the middle school level. 
Prerequisite: A previous course in math education or permission of the instructor.

ED5424 Teaching Mathematics in the Elementary School 3 ch
Focus on appropriate methodology for teaching mathematics at the elementary school level. Students must demonstrate an adequate mastery of the mathematics content underlying the curriculum prior to completion of this course.

ED5425 Indigenous Mathematics 3 ch
This course will explore how mathematics is viewed and used in indigenous cultures and communities. Numerical and geometric concepts (ex. Counting numbers, order, measurement, physical design and pattern) will be addressed with particular consideration being given to Wabanaki languages and world views.

ED5427 Trends in Mathematics Education 3 ch
Current issues in teaching mathematics, Grades K-12. 
Prerequisites: At least one previous course in mathematics education or permission of the instructor.

ED5428 Mathematics Across the Curriculum 3 ch (3C)
Explores ways in which mathematics fits into an integrated curriculum, grades K-12.

ED5429 The Role of Language in the Teaching of Mathematics 3 ch
Examines how the language of mathematics affects its acquisition and how appropriate use of writing and literature can enhance the learning of mathematics. 
Prerequisite: Completion of a math methods course or permission of the instructor.

ED5451 Special Topics in Health Education 3 ch
Explores specific areas of current interest and concern in health education, as defined by students, faculty, and classroom teachers.

ED5478 Health and Physical Education in the Elementary School 3 ch
Examines curriculum and pedagogy in elementary health and physical education programs.

ED5488 Teaching Games in Secondary Physical Education 3 ch
Introduces students to a variety of ways to effectively present and teach games to students at the middle and high school levels. 
Prerequisite: Student must have completed an undergraduate degree in physical education, kinesiology, or related field or by approval of instructor. 
Co-requisite: This course must be taken in conjunction with ED 5492.

ED5492 Introduction to the Teaching of Secondary Physical Education 3 ch
Focuses on planning and preparing the learning environment for instruction of physical education. 
Prerequisite: Student must have completed an undergraduate degree in physical education, kinesiology, or related field or by approval of instructor. 
Co-requisites: This course must be taken in conjunction with ED 5488.

ED5493 Teaching Secondary Physical Education 3 ch
Focuses on planning and preparing the learning environment for instruction for undergraduate degree in physical education, kinesiology, or related field or by approval of instructor. 
Co-requisite: This course must be taken in conjunction with ED 5488.

ED5494 Teaching Physical Education 3 ch (3C)

ED5495 Learning Through Outdoor Experiences 3 ch
This course introduces students to the theory and practice of teaching in an outdoor context. Students will be exposed to a variety of outdoor experiences and relevant teaching techniques and skills. It will culminate in an overnight camping trip.

ED5505 Teaching Science in Elementary School 3 ch
The course will focus on the mindset and methods for teaching science at the elementary school level. Students will become familiar with using their content knowledge, pedagogical skills and their specific context to adapt and teach the elementary science curricula. This course will help students prepare effective science learning environments that embody an inquiry and constructivist approach to teaching.

ED5506 The Nature of Science 3 ch
This course will answer questions about what science is, how it is conducted and what purpose it serves. The majority of this course will involve ‘doing’ science through hands-on inquiry-based exploration viewing expressions through various perspectives and engaging in discussion about scientific thought processes.

ED5507 Indigenous Perspectives in Science 3 ch
This course will examine the concept of science from Indigenous perspectives as well as identify Indigenous contributions to science history and today. Concepts such as “two-eyed seeing” and “cultural border crossings in science” will be explored and practiced. Mikmaq and Wolastoqey languages will be used to demonstrate Indigenous ways of knowing the natural world.

ED5511 Introduction to Science Education 3 ch
This course provides an introduction to the teaching of science that focuses on preparing to teach science while challenging their expectations and assumptions regarding science. The Nature of Science, lesson planning, curricular adaptation, assessment, inquiry-based learning, technology integration, and the barriers to learning science are some of the topics covered within the course.

ED5512 Science Education and the Learner 3 ch
This course will explore the ways that science is taught in relation to how students learn. Topics such as experiential learning, inquiry-based learning, constructivism, and the barriers to learning science are some of the topics covered within this course.

ED5513 Advanced Studies in Science Education 3 ch
This course is focused on the integration of Secondary science teaching components into comprehensive and holistic science teaching. Topics include but are not limited to unit planning, assessment, differentiation and technological integration within the science classroom. 
Prerequisites: ED 5511 or permission of the instructor.

ED5514 Special Topics in Science Education 3 ch
This course will require students to comprehensively engage with an area of interest or concern in science education and through a peer-support and review process engage with other students and the instructor on these topics. 
Prerequisite: ED 5511 or permission of the instructor.

ED5521 Science Education Seminar and Project 3 ch
Students who select either of the certificate programs will participate in advanced discussions concerning science education and develop projects that reflect some area of science education they would like to explore further and which demonstrate their understanding of science education.

ED5561 Évaluation et Apprentissage 3 ch
Ce cours suivra les principes et les pratiques de l’évaluation sommative (évaluation de l’apprentissage) et formative (au service de l’apprentissage) - (évaluation de l’apprentissage) et formative (au service de l’apprentissage). Les participants auront l’occasion de voir comment ces pratiques sont utilisées de façon efficace et d’apprendre comment les employer dans leur salle de classe.

ED5562 La littératie à l’élémentaire I 3 ch
Dans ce cours, vous aurez l’occasion de vous familiariser avec les principes et les pratiques de la littératie en français langue seconde à l’élémentaire. Vous explorez l’approche de la littératie équilibrée, les pratiques exemplaires et les stratégies qui favorisent l’enseignement du français et l’enseignement des matières en français. * A required course for
SECTION H: FREDERICTON COURSES

elementary French second language specialists. Prerequisite: A French oral proficiency certificate with a minimum level of Advanced from the New Brunswick Department of Post-Secondary Education, Training and Labour.

ED5563   La littérature à l’élémentaire II 3 ch

ED5564   Introduction to Second Language Education 3 ch
Examines the principles of learning and teaching a second language (SL). Emphasize the development of communicative SL activities and the creation of learner-centered lesson plans. *Required course for CTESL candidates. Students may receive credit for ED 5564 or ED 5568 but not both.

ED5565 Advanced Studies in ESL Education 3 ch
Examines communicative language teaching in the content of ESL classrooms. Emphasize varied teaching methods, curriculum development and evaluation of second language learning. Prerequisite: ED 5564 or ED 5568 or equivalent.

ED5566 Field Experience in TESL 3 ch
A practicum in the area of teaching English as a second language (TESL). This course is a requirement for students enrolled in the Certificate in TESL.

ED5567 Specialized Techniques in ESL Teaching 3 ch
The custom-designed course will provide participants with a wide range of field-tested in ESL techniques. The process will be active and interactive. Interaction will vary between small and large-group sessions.

ED5568 Français langue seconde I - Secondaire 3 ch (2C 3L)

ED5569 Français langue seconde II - Secondaire 3 ch (2C 3L)

ED5575 Reflection on Second Language Theory and Practice 3 ch
Examination of fundamental issues in second language education such as definitions and assessment of bilingualism, early and later acquisition of a second language, cognitive effects of bilingualism, evaluation of second language education programs, literacy and multi-literacy.

ED5620 Introduction to Teaching Secondary Social Studies 6 ch
Students will develop initial competence in selected aspects of social studies teaching. Prerequisites: The equivalent of an academic minor (24 ch) in subjects related to social studies (e.g. history, geography, political science, classics, economics, sociology, and anthropology). Corequisites or Prerequisites: ED 3621. Concurrent students should register for this course in the year preceding their internship.

ED5621 Introduction to Social Studies in Elementary Education 3 ch
Students will explore the nature of social studies as a school subject and develop initial competence in select aspects of teaching elementary social studies.

ED5622 Global Education 3 ch
An examination of the global education movement and its implications for curriculum and instruction. Students will be involved in a cross cultural experience, the examination of global education materials, and a curriculum development project. Prerequisite: 3 ch in teaching methods.

ED5625 Introduction to Teaching Secondary Social Studies 3 ch
Students will develop initial competence in selected aspects of social studies teaching with particular emphasis on citizenship education and geography. Prerequisite: A minimum of 18 credit hours in subjects related to social studies (e.g. history, geography, political science, classics and economics).

ED5623 Teaching Canadian Studies 3 ch (3C)
An examination of the ways in which school curricula in social studies and language arts have dealt with the question of Canadian identity and the exploration of alternative ways to treat that topic. Various conceptions of Canadian identity will be examined along with the historic, geographical and cultural forces that have given rise to them.

ED5625 Introductory to Teaching Secondary School 3 ch
Students will develop initial competence in selected aspects of social studies teaching with particular emphasis on citizenship education and geography. Prerequisite: A minimum of 18 credit hours in subjects related to social studies (e.g. history, geography, political science, classics and economics).

ED5626 Introduction to Teaching Secondary History 3 ch
Students will develop initial competence in teaching history with particular attention to professional scholarship in fostering historical thinking. Prerequisite: A minimum of 18 credit hours in subjects related to social studies (e.g. history, geography, political science, classics and economics).

ED5627 Treaties and Canadian Geography 3 ch
Issues related to the nature of and use of the land are central to both the subject of geography and understanding the place of treaties in the relationship between Indigenous and non-Indigenous peoples in Canada. This course will explore how geographically focused treaty education can help students meet critical outcomes related to geography literacy.

ED5683 First Nations Education Seminar 3 ch
Historical trends and contemporary issues in classroom practice and curriculum development.

ED5684 The Anthropology of Knowledge (Cross-Listed: ANTH 5684) 3 ch
Education is quintessentially a cultural matter. No matter what the context - be it in the formal education systems found around the world, or the many informal ways of passing on skills, knowledge, position, prestige and power - education is about culture. A systematic comparison of learning institutions and practices in a range of different cultural settings reveals a lot about our own understandings of teaching, learning and the management of knowledge as well as those from other cultures. Restricted to upper level students, or the permission of the instructor.

ED5685 Developing First Nations Languages and Literacies 3 ch
Identifies and examines the development of Mi’kmaw-Wolastoqey literacies’ concepts and the relationships with language that define First Nations literacy in primary and elementary children.

ED5691 Instructional Design Process 3 ch
Introduction to instructional systems design (ISD) and alternative new processes, used to develop e-learning and classroom materials. Students will explore ways these processes may be used and will have opportunities to implement them.

ED5698 Multimedia Studies in Education 3 ch
The theoretical and practical applications of multimedia technologies across the curriculum will be explored.

ED5699 Cultural Studies Through Multimedia 3 ch
Critical analysis of the cultural products and practices surrounding multimedia in education will be examined.

ED5873 Special Topics in Technology Education 3 ch
Research of current and emerging trends and development in technology, Technology Education and educational/instructional technology.

ED5975 Presentation Strategies in Technology Education 3 ch
Development of presentation competencies: delivery strategies, techniques, learning styles, management and resources.

ED5976 Instructional Technology Across the Curriculum 3 ch
A critical examination of the role of instructional technology across the curriculum. Technologies and strategies for integration to enhance classroom instruction will be developed and evaluated.

ED5977 Program Development in Technology Education 3 ch
Principles and practices for determining knowledge, skills, and attitudes for teaching/learning.
First Nations Bachelor of Teaching Education Program

ED5800 Teaching Literacy in the Early School Years 12 ch
Addresses the theoretical underpinnings and implementation methods of the six strands of literacy: reading, writing, listening, speaking, viewing and representing with particular emphasis on issues encountered by First Nations learners.

ED5820 Curriculum and Administration 9 ch
Enhances professional practice by providing teachers with a research-based framework for evaluating teaching, reflecting on professional experience, and planning in collaboration with colleagues to improve curriculum and professional practice. Particular emphasis is placed on successful strategies that enhance learning in public schooling for First Nations learners.

ED5830 Social Studies Education 9 ch
Focuses on the development of professional knowledge and skills that teachers require in assisting their students to be effective learners in social studies education. Emphasis is placed on an evidence based approach to teaching and learning with participants being required to demonstrate a close knowledge of the related research and to demonstrate its application in their daily planning and practice. First Nations world-views are the basis from which all topics are explored.

ED5840 Teaching Mathematics in the Early School Years 12 ch
Focuses on a framework that develops content knowledge and mathematical connections underlying curricular topics. Projects and discussions draw upon the individual context within which teachers work, especially teachers of First Nations learners.

ED5860 Science Education 9 ch
Helps teachers develop effective science teaching skills and innovative ways to integrate science with other disciplines in the curriculum. First Nations world-views and connections with nature are integrated into the content.

ED5880 Exceptional Learners 6 ch
This course is designed to enhance teachers’ knowledge of the diverse needs of First Nations students as well as knowing how to apply evidence based practices to meet their needs in the classroom. This course is open to students in the 4-year First Nations Teacher Education Program.

Bachelor of Education in Trinidad and Tobago

ED5012 Spanish 3 ch
Provides students with an introduction to the vocabulary and grammatical structures of the Spanish language. (Only offered in Trinidad and Tobago)

ED5014 Intermediate Spanish 3 ch
Provides students with the opportunity to expand their Spanish vocabulary and develop greater fluency with on-going verbal practice. (Only offered in Trinidad and Tobago)

ED5015 Teaching of Spanish 3 ch
Provides with advanced Spanish vocabulary and grammatical structures with extensive opportunity to speak and listen to the language. (Only offered in Trinidad and Tobago)

ED5020 Educational Psychology 6 ch
Addresses the theoretical underpinnings and implementation methods of the six strands in the teaching of literacy: reading, writing, listening, speaking, viewing, and visual representation. (Only offered in Trinidad and Tobago)

ED5100 Practicum 21 ch
Fifteen weeks of school and classroom experience. Prerequisite: Only students admitted to the BEEd (4 year) program in Trinidad and Tobago may register.

ED5170 Assessment in Education 6 ch
This course will deal with the what, why and how of classroom-based assessment. It will examine exemplary practices related to formative assessment (assessment for and as learning), as well as summative assessment (assessment of learning). The course will also examine the nature and purpose of large-scale assessment within education. Topics will include defining clear learning/assessment targets and standards-based assessment, designing assessment techniques, matching assessment with learning and communicating assessment results. (Only offered in Trinidad and Tobago)

SECTION H: FREDERICTON COURSES

ED5300 Literacy 12 ch
Addresses the theoretical underpinnings and implementation methods of the six strands in the teaching of literacy: reading, writing, listening, speaking, viewing and visual representation. (Only offered in Trinidad and Tobago)

ED5900 Field Studies Practicum for 4 Year BEEd 12 ch
Twelve weeks of school and classroom experience. Prerequisites: only students admitted to the BEEd (4 year) program in Trinidad and Tobago may register.

ED5902 Action Research for Teachers 3 ch
Introduces students to the field of educational research with particular attention given to action research and the role of the classroom teacher in the process. (Only offered in Trinidad and Tobago.)

ED5910 Practicum 6 ch
A practical field based professional growth experience in which learners will apply theory and monitor their praxis through mentoring and peer consultation. A portfolio will be produced that outlines best practice and professional growth. (Only offered in Trinidad & Tobago)

ED5920 Aesthetics 9 ch
Examines music, visual art, and physical education both separately and based on curricular integration. Technical skills in each area are presented along with effective ways to implement these subjects in schools. Teaching resources and issues related to arts and education in different cultures are also examined. (Only offered in Trinidad and Tobago)

ED5930 Teaching and Learning Citizenship & Social Studies 12 ch
This course has been designed for practicing teaching professionals who have responsibilities directly related to citizenship and social studies education. The focus is upon the development of professional knowledge and skills that teachers require in assisting their students to be effective learners in citizenship and social studies education. The course will emphasize an evidence based approach to teaching and learning with participants being required to demonstrate a close knowledge of the related research and to demonstrate its application in their daily planning and practice.

The course will require students to become closely acquainted with generally accepted best practice in citizenship and social studies education based on an analysis of programs in England, Australia, the United States and Canada in light of current programming priorities in Trinidad and Tobago. The course structure will address several major themes including a detailed consideration of teaching approaches that assist students in learning: detailed information, concepts, skills and values. (Only offered in Trinidad and Tobago)

ED5940 Teaching Elementary Mathematics 12 ch
Focuses on the teaching and learning of mathematics at the elementary school level. Demonstration of methods occurs within a framework that develops content knowledge and mathematical connections underlying curricular topics. Projects and discussion draw upon the individual contexts within which teachers work. (Only offered in Trinidad and Tobago)

ED5950 Curriculum and Administration 12 ch
Enhances professional practice by providing teachers with a research-based framework for evaluating teaching, reflecting on professional experience, and planning in collaboration with colleagues to improve curriculum and professional practice. Tools are presented to help teachers assume leadership positions within schools. (Only offered in Trinidad and Tobago)

ED5960 Science in Primary Schools 9 ch
An opportunity for participants to examine some of the more important educational theories directly related to teaching elementary and intermediate school science. The course will provide a series of interactive opportunities testing various methods and techniques of teaching science. (Only offered in Trinidad and Tobago)

ED5980 Inclusive Education 6 ch
This course is designed to enhance teachers’ knowledge of the diverse needs of students with special needs as well as knowing how to apply evidence based practices to meet their needs in the classroom. (Only offered in Trinidad and Tobago)

EDUC1010 Children's Literature for Primary School Teachers 6 ch
This course draws on a rich variety of children’s literature including picture books, poetry, plays, short story and non-fiction, and some Caribbean, post-colonial literature. Throughout the course students will investigate the ways literature can act as a catalyst for writing and representing in the early years. (Only offered in Trinidad and Tobago).
SECTION H: FREDERICTON COURSES

EDUC1015  Basic English  3ch
Attends to aspects of writing as a process. Students will be provided with modelled guided support of strategies to develop as strong writers. (Only offered in Trinidad and Tobago.)

EDUC1016  Trends in Mathematics Education  3ch
A survey course which will provide the reading and appreciation of a rich variety of modern short stories, essays, plays and novels, including some Caribbean post-colonial literature. The major genre studies will be fiction, although drama, poetry and nonfictional prose will be included. The chosen literature will help students understand aspects of their own experience as well as established the basis for teaching of prose and poetry. In addition, the genre of Children’s Literature (children’s picture books and popular fiction for student’s at the Primary Level) will be surveyed from the perspectives concepts, content, languages and illustrations.

EDUC1025  History, Philosophy and Sociology of Education  3ch
The aim of the course is to introduce students to a comparative-cross-cultural approach to understanding education and to encourage them to rethink the development of educational ideas, systems and practices by drawing attention to different cultural and historical contexts. In helping students question and challenge dominant ideas about education and its purposes, the module will use autobiography, literary contexts and globalization movements in education. Topics will include: purposes and processes of a comparative approach to understanding education; the development of educational ideas; their values and practices; culture and education; globalization and education; and education and the post-colonial experience. (Only offered in Trinidad and Tobago.)

EDUC1030  Mathematics for Primary School Teachers  6ch
The course will attend to aspects of content knowledge through emphasis on connections between mathematical ideas and a sense of mathematical process. Core content areas will include, number, systems and properties; operations (including alternate methods of computation); basic number theory (e.g. divisibility tests); a survey of geometry (tessellations, shapes, properties, constructions); probability and statistics; measurement; algebra and any other topics pertinent to the current primary mathematical curriculum in Trinidad and Tobago. (Only offered in Trinidad and Tobago.)

EDUC1035  Mathematics for Primary School Teachers  3ch
Attends to aspects of content knowledge through emphases on connections between mathematical ideas and a sense of mathematical process. (Only offered in Trinidad and Tobago)

EDUC1045  Caribbean History  3ch
This course of study seeks to expose students to those key themes and events that ought to be familiar to all peoples of the Caribbean. Those who are desirous of becoming teachers ought to have a strong sense of those precedents that would have shaped and fashioned education and the contexts in which they are currently working or will eventually be working. History is not a discrete discipline in the primary curriculum and ideally this course will address Caribbean history within the context of social studies education. (Only offered in Trinidad and Tobago)

EDUC1050  Science Concepts and Processes for Trinidad and Tobago Primary Teachers  6ch
This course will delve into the core science strands that underpin the Trinidad & Tobago science curriculum (organisms; ecosystems; matter and materials; structure and mechanism; energy and earth and space) and then integrate them across the levels and with each other. Particular emphasis will be placed on the processes of science: gathering objective evidence, analysis, developing inferences, drawing conclusions and making predictions. Finally, it is a fundamental goal of this course to provide willingness and confidence to embrace science as an interesting and important part of the Caribbean region. (Only offered in Trinidad and Tobago)

EDUC1055  Agricultural Science  3ch
Provides students with the necessary background to understand the significant role of agriculture and agricultural science within the context of Trinidad & Tobago. (Only offered in Trinidad & Tobago)

EDUC1065  Geography  3ch
This course of study seeks to expose students to key themes in physical and human geography, thus helping un the understanding and application of of spatial models and concepts to the study of geography. Those who are desirous of becoming teachers ought to have strong sense of geographic phenomena that have shaped and are shaping human existence. Geography is not a discrete discipline in the primary curriculum and ideally this course will address geography within the context of social studies education. (Only offered in Trinidad and Tobago)

EDUC1075  Art Education  3ch
Students will explore how Art Education can serve to inspire, motivate and promote the creative imagination among students. Teaching and learning strategies will include developing; sensitivity to the elements of Art and Craft; imaginative and conceptual abilities, manipulative skills; verbal response skills; and artistic expressions and folkways that represent the multi-ethnic society Trinidad and Tobago. (Only offered in Trinidad and Tobago)

ELECTRICAL AND COMPUTER ENGINEERING COURSES
See beginning of Section H for abbreviations, course numbers and coding.
The “*” Denotes labs which are held on alternate weeks.
A minimum grade of C is required for all Prerequisites and all core and technical elective courses used for credit towards to BScE. degree.

EDUC1813  Electricity and Magnetism  4ch (3C 1T 2L)
An introduction to the fundamentals of electricity and magnetism and applications. Covers concepts of charge, electric fields, voltage, current, power, energy, magnetic fields and the link between electricity and magnetism for the creation of machines. Includes resistors, resistance, Ohm’s law, Kirchhoff’s voltage and current laws, some electrical properties of materials. Electric sources, simple series, parallel, and series-parallel DC circuits and mesh analysis are examined. Energy conversion and simple electric machines are examined. The behaviour and use of common sensors and transducers are discussed. Prerequisite: Two years of high school physics. Co-requisite: MATH 1003.

ECE2214  Digital Logic Design  3ch (3C 1T)
An introductory course to practical aspects of digital system design. The course covers digital logic design, including basic design concepts and implementation technology, number representation, synthesis of combinational and sequential logic, and the use of HDL and computer-based tools. Prerequisite: CS 1003 or CS 1073 or equivalent. Recommended: ECE 1813. Co-requisite: ECE 2215.

ECE2215  Digital Logic Design Laboratory  1ch (2L)
This is an introductory course to practical aspects of digital system design. Course includes the design of digital circuits with CAD tools and VHDL hardware description language. Prerequisite: CS 1003 or CS 1073 or equivalent. Recommended ECE 1813. Co-requisite ECE 2214.

ECE2412  Simulation and Engineering Analysis  4ch (3C 1.5L)
An introduction to modeling and numerical methods as applied in the solution of engineering problems. The solution of nonlinear equations, polynomials, curve fitting, numerical integration and difference equations. Simulation tools such as MATLAB will be used. Prerequisites: CS 1003 or CS 1073 or equivalent; ECE 1813 or equivalent; MATH 1013; MATH 1503 or equivalent.

ECE2883  Electric Circuits and Machines  4ch (3C 1T 3L)
Network analysis including AC. Introduction to transformers, DC machines and AC machines. Cannot be used for credit by students in the Electrical Engineering and Computer Engineering programs. Prerequisites: ECE 1813 or equivalent, MATH 1013, MATH 1503.

ECE2701  Electric Circuits and Electronics  4ch (3C 3T 1L)
Network analysis including AC. Introduction to electronic devices, circuits, and motors. Cannot be used for credit by students in the Electrical Engineering and Computer Engineering programs. Prerequisites: ECE 1813 or equivalent, MATH 1013, MATH 1503.

ECE2771  Electric Circuits  4ch (3C 3T 1L)
Basic DC circuits: Network analysis and theorems. AC circuits: introduction of phasors, Network analysis and theorems applied to AC circuits. Prerequisite: MATH 1013, ECE1813 or equivalent.

ECE2722  Circuits and Systems  4ch (3C 3T 1L)
Network analysis. Transient and steady state responses. Transfer functions, complex frequencies, poles and zeros, Laplace Transforms. Frequency Response and Bode Plots. Filters (passive and active). Prerequisites: ECE 2711 and MATH 1503 or equivalent. Co-requisite: MATH 3503 or equivalent.
ECE3031 Electrical and Computer Engineering Design 4 ch (3C 1T 1.5L)
The emphasis is on application of design methodologies to electrical and computer engineering design problems in some major areas of Electrical Engineering. Topics include: design specifications and requirements, simulation and construction, laboratory measurement techniques, design verification, the implementation cycle, environmental impact, project management, economic evaluation and safety assessment. One or more design projects form an integral part of the course. Prerequisites: ECE 2722, ECE 2213 (ECE 2214 and ECE 2215, ECE 2412, ENGG 1001, ENGG 1003, ENGG 1015. Co-requisite: ECE 3111.

ECE3111 Electronics I 4 ch (3C 3T 3L)
An introduction to analog electronics using a device-based approach. The course starts with basic nomenclature and the ideal amplifier model concept. Semiconductor diodes, BJTs and MOSFETs are then introduced followed by how these devices can be used to implement single-stage small-signal amplifiers. To complement this overall analog approach, the use of both BJTs and MOSFETs in digital logic gates is also covered which in turn introduces the concept of noise margins. Prerequisite: ECE 2711 or ECE 2701.

ECE3122 Electronics II 4 ch (3C 3T 3L)
This course follows a similar approach to Electronics I (ECE 3111), however in this more advanced course, the ideal devices introduced earlier are replaced with real devices. The overall theme of this course is frequency response and feedback techniques and components as applied to small-signal amplifiers. In addition, circuit modeling using a computer is introduced and used as a design aid. Prerequisites: ECE 2722, ECE 3111.

ECE3213 Advanced Software Engineering 4 ch (3C 3L)
The methods and tools of software engineering applicable to engineering systems (such as real time or embedded systems) are considered with engineering emphasis. Topics include design tools and techniques, project management, requirements definition, specifications, testing, verification and validation, maintenance for the engineering system context. Prerequisite: CS 2033.

ECE3221 Computer Organization 4 ch (3C 1T 3L)
Register transfer systems and datapaths, microprocessors, microprocessor architecture and operation, instruction formats, assembly language programming, procedures and parameter passing, system bus timing, interfacing memory IO ports, serial and parallel data transfer, interface. Prerequisites: ECE 2213 or ECE 2214, ECE 1813. Co-requisite: ECE 2215, CS 1023 or CS 1083.

ECE3232 Embedded Systems Design 4 ch (3C 2L)
A hardware oriented course with emphasis on the components and techniques used in the design of embedded systems. Topics include system design and methodologies and techniques, microcontroller hardware design, software design using C, testing and implementation. A team project will be used to provide the opportunity to apply the content of this course to the development of an embedded application. Most lecture material will be delivered in the context of this project. Prerequisites: CS 1023 or CS 1083; ECE 2701 or ECE 2711; ECE 3221.

ECE3242 Computer Architecture 4 ch (3C 3L)
Important aspects of computer architecture will be covered with a unifying theme of computer system performance. Topics include computer evolution, system busses, main memory, cache memory, memory management, CPU structure, CPU pipelining, superscalar processors, reduced instruction set computers, 64-bit processors, and parallel processing architectures. Prerequisites: ECE 2215, ECE 3221.

ECE3312 Systems and Control 4 ch (3C 3T 3L)
Mathematical models of dynamic systems, linear systems, analysis in the time and frequency domain, stability, Routh-Hurwitz and Nyquist stability criteria, feedback and forward control, PID controllers, principles of feedback design. Prerequisites: ECE 2722, MATH 3503, ENGG 1082.

ECE3511 Signals 4 ch (3C 3T 3L)
Discrete-time (DT) and continuous-time (CT) signals. Signal characterization. Basic signal manipulation. Linear time-invariant systems and the convolution integral or sum. Signal approximation via orthogonal signals. The Fourier Series. The CT Fourier Transform (FT) and properties. Sampling and reconstruction of signals. The DTFT and its properties. The DFT. Prerequisites: ECE 2722, MATH 3503. Co-requisite: STAT 2593.

ECE3612 Electric Machines and Design in Sustainable 4 ch (3C 1T 1.5L)
Energy Systems
Covers the basic theory of, transformers, DC motors/generators and AC polyphase machines, including synchronous and induction machines. This material is augmented with the application and design of such machines utilized in Sustainable Energy systems. Prerequisites: ENGG 1082, MATH 2513, ECE 2711.

ECE3812 Data Communications and Networking 4 cc (3C 3L)
Data transmission fundamentals including signal encoding, error control, flow controls, multiplexing, switching. Protocol architectures (OS, TCP/IP). Network protocols peer to peer, medium access control, routing. Local area networks: Ethernet, wireless. Prerequisite: ECE 3221.

ECE3821 Electromagnetics I 4 ch (3C 1T 1.5L)
Transmission lines, wave equation, Maxwell’s equations, uniform plane waves, radiative waves, safety standards, introduction to antennas and propagation. Prerequisites: MATH 3503, MATH 2513, ECE 2711.

ECE4040 Electrical and Computer Engineering Design Project
Working in teams, students will complete an electrical engineering design project that draws on their knowledge and skills obtained in previous courses. Student teams will design a structure, system, or process to meet a broad range of specified constraints. The development process should consider a broad range of constraints including health and safety, sustainable development and environmental stewardship. Students will manage their projects professionally, prepare a comprehensive written report, and present their design work orally. Prerequisites: CS 1023 or CS 1083, and 52 credit hours of ECE core courses.

ECE4133 Instrumentation Design 4 ch (3C 3L)
This course considers the design of a general-purpose data acquisition system. The electronic design engineer of today can no longer be thought of as a digital or analog designer. Consequently, this course melds the analog and digital electronics areas with a unified engineering approach emphasizing the practical aspects involved. Computer aided design tools are used wherever possible. Prerequisites: ECE 3122, ECE 3221.

ECE4143 Electronic Circuit Design (O) 4 ch (3C 3L)
Considers the philosophy and practice of the design of semiconductor circuits. Prerequisite: ECE 3122.

ECE4173 Devices and Circuits for VLSI 4 ch (3C 3L)
Introduction to circuit design and layout. Basic digital gates and clocked systems. Basic RF circuits and components and devices for RF CAD tools for simulation and layout. Prerequisite: ECE 2213 and ECE 3122.

ECE4251 Real Time Systems 4 ch (3C 2L)
Real-time system design and implementation: basic concurrency theory including scheduling, mutual exclusion and process management, task synchronization and communication, operating system kernels, real-time system hardware, software for real-time embedded systems. Prerequisite: ECE 3232.

ECE4253 Digital Communications 4 ch (3C 3L)
Covers the fundamentals of modern digital communications, coding and information theory, error detection and correction, data compression, modulation and models for telecommunications and current international standards. Prerequisites: ECE 3221; ECE 3511.

ECE4261 Digital Systems Design 4 ch (3C 3L)
Advanced study of the digital system design methodology. Design methods, models and approaches including: RTL design, SOC design, and testing methodologies, Intellectual Property (IP), reuse, software/hardware co-design, hardware description languages (HDL), structural and behavioral models, design for low power. One or more design projects. Prerequisite: ECE 3232.

ECE4273 VLSI Systems Design 4 ch (3C 3L)
Methods and tools for the design of FPGA-based digital circuits with focus on large-scale systems, i.e. digital signal and arithmetic processors, microcomputers. VLSI design process, standards, constraints, implementation, technology-dependent optimization, simulation, testing, and verification. Multi-FPGA systems, FPGAs, field-programmable gate arrays, peripheral devices. One or more design projects. Prerequisite: ECE 3232.

ECE4323 Modern Control Systems and Applications 4 ch (3C 3L)
Introduces real-world applications of control theory, including system modeling (linear, nonlinear, discrete, continuous and probabilistic models) and problem definition, determining system components and architectures, dealing with limitations and constraints (nonlinearity, disturbances and uncertainties), standard and advanced controls design (linear, nonlinear, and optimal control methods) and tuning methods. Computer-aided controls engineering is emphasized (algorithms/MATLAB). Prerequisite: ECE 3312 or CHE 4601 or ME 3623.
SECTION H: FREDERICTON COURSES

**ECE4333** Robotics  4 ch (3C 2L)
This is a project based course where students design a variety of subsystems that are integrated and tested on a mobile robot. Topics include: actuators, PWM, H-bridges, position and range sensors, velocity sensors, optical sensors and switches, strain gauges, position and velocity control, electro-mechanical subsystems, planning and trajectory generation, computer software and hardware interfacing. **Prerequisite:** ECE 3221 or equivalent, ECE 3312 or equivalent.

**ECE4343** Haptic Robotics  4 ch (3C 3L)
Haptics is the science and technology of creating the sensation of touch using robotic devices. This course will cover the three interrelated domains of human physiology, mechatronics and control, to develop haptic robots that render a variety of environments. **Prerequisites:** ECE 3312 or ME 3623.

**ECE4433** Safety Critical Design  4 ch (3C 3L)
This elective covers the reliability, availability and fault tolerance of computer systems. It introduces topics related to fault-tolerant computing and software implementation of engineering systems. It includes fail-safe and fail-operate computer systems design, qualitative analysis of safety-critical systems, risk analysis, fault tolerance techniques, reconfigurability and redundancy. **Prerequisites:** STAT 2593 and ECE 3312.

**ECE4523** Communication Systems  4 ch (3C 3L)
Introduces analog and digital communication in the presence of noise. Techniques and application of basic information theory. **Prerequisite:** ECE 3511.

**ECE4531** Digital Signal Processing I  4 ch (3C 1T 3L)
Fundamentals of discrete-time processing. Difference equations and their solutions; the Z transform and its properties. Transfer function, frequency response, impulse response, and realization structures for discrete-time systems, cross-correlation and power spectral density. Discrete time filters: types, effects of pole-zero placement, the Bilinear Transform, Circular convolution and the DFT. **Prerequisites:** ECE 2213 or ECE 2214 and ECE 2215, ECE 3511.

**ECE4542** Digital Signal Processing II  4 ch (3C 3L)
Fourier Methods, Fast Fourier Transform, Filter design, Windows, State Variable Methods, Estimation. **Prerequisite:** ECE 4531.

**ECE4553** Introduction to Pattern Recognition  4 ch (3C 3L)
An introduction to pattern recognition and its applications. Topics include Bayesian decision theory and parameter estimation, feature generation and selection, parametric vs. nonparametric classification techniques, supervised vs. unsupervised, learning and clustering. **Prerequisites:** ECE 3511, STAT 2593.

**ECE4623** Advanced Electrical Machines  4 ch (3C 3L)
Covers principles of operation, controls and applications of single phase induction motors, permanent magnet machines including permanent magnet synchronous machines and brushless DC motors, servo motors, and other special electrical machines. **Prerequisite:** ECE 3612.

**ECE4633** Power System Analysis  4 ch (3C 3L)
Introduces many components of a power system. **Prerequisites:** ECE 3612, ECE 2722 and MATH 3503.

**ECE4643** Power Electronics  4 ch (3C 3L)
Deals with high current rectifiers and inverters. Design parameters and practical firing circuits are analyzed. **Prerequisites:** ECE 3111, ECE 3612.

**ECE4813** Electromagnetics II  4 ch (3C 1T 1.5L)
Electrostatics, magnetostatics, material properties, waveguides (including optical), antennas, radar and radio propagation. **Prerequisites:** ECE 3821, MATH 3503, MATH 2513, ECE 2711.

**ECE4823** Communications and Network Engineering  4 ch (3C 3L)
Advanced network architectures: RSVP, MPLS, RTP. Modeling and simulation of data networks: queuing models for media access, error control and traffic management protocols, modeling of traffic and interarrival time, performance analysis. Communication network design. Network management and security. **Prerequisites:** STAT 2593 or STAT 3083, ECE 3221 or CS 2545.

**ECE4833** Microwave Engineering  4 ch (3C 3L)
Topics related to modern microwave systems including design and measurement of passive microwave circuits. **Prerequisite:** ECE 3821.

**ECE4913** Independent Project  4 ch (3L) [W]
An independent project. Students work under the supervision of a chosen faculty member. Students are responsible for finding a supervisor and initiating the project. Deliverables include a comprehensive report detailing the work. **Prerequisite:** Successful completion of 110 ch in the engineering program.

**ECE4923** Introduction to Biomedical Engineering  4 ch (3C 3L)
Introduces biomedical concepts in the context of electrical engineering. Topics covered include basic anatomy and physiology, biopotential origination and modelling, biosignal measurement instrumentation, biosignal analysis and a survey of medical devices and health care technologies. **Prerequisites:** ECE 2412, ECE 2701 or ECE 3111.

**ECE4933** Special Studies in Electrical Engineering  1 ch
With the approval of the Department Chair and under the guidance of a member of the faculty, a student may perform special studies and investigations related to the undergraduate program. Restricted to students in their final year of study.

**ECE4943** Topics in Computer Engineering  4 ch (3C 3L)
A selected area of computer engineering with a unifying theme will be explored in depth. The topics covered are selected from one or more of the following areas: parallel processing, operating systems, concurrent system performance, network based parallel computing, embedded system issues, algorithms in real-time, computer system modeling analysis. **Prerequisite:** ECE 3232.

**ENGINEERING**
See beginning of Section H for abbreviations, course numbers and coding.

**ENG1001** Engineering Practice Lecture Series  0 ch (1C)
A guest lecture series intended to introduce students to the engineering profession. Speakers from various engineering disciplines and job functions share their career experiences and discuss exciting engineering projects underway in the region.

**ENG1003** Engineering Technical Communications  4 ch (2C, 3L) [W]
Oral, written and visual communication skills are developed as important tools used by engineers. Technical writing style is taught through the preparation of reports and summaries, and oral communication skills are improved through public speaking and the preparation of formal presentations. Computer-aided design is introduced and used to enhance visualization skills. The importance of information literacy is stressed. Various types of engineering drawings are presented and engineering unit conversions are practiced.

**ENG1015** Introduction to Engineering Design and Problem Solving  2 ch (1C, 2L)
This course introduces engineering design methodology and develops basic problem solving techniques. Under the supervision of senior students and with the guidance of industry engineers, students work both individually and in teams on real engineering design projects for the local community in a simulated engineering consulting environment. Project planning, team-building, leadership and responsible care are discussed. Laboratories are used to demonstrate problem solving techniques for analytical and openended problems, and life-long learning is emphasized by having students integrate co-requisites and researched material into a structured design process. Restricted to students with fewer than 60 ch of program credit upon first admission to the Faculty of Engineering or with permission of the instructor. **Co-requisites:** ENGG1003, PHYS 1081, MATH 1003, MATH 1503.

**ENG1082** Mechanics for Engineers  4 ch (3C 1T 2L)
Introduction to the fundamental concepts of vector analysis, and its application to the analysis of particles and rigid bodies. The static analysis of particles and rigid bodies, including practical applications such as the analysis of trusses, frames and machines. The static analysis of structural systems including the analysis of internal forces and bending moments in beams. The analysis of kinematics of particle motion along straight and curved paths. The analysis of kinetic motion for particles based on force and acceleration, and work and energy. The course topics focus on visualizing concepts in mechanics, and developing problem solving strategies. **Prerequisites:** PHYS 1081, MATH 1003 and MATH 1503 (or MATH 2213 or equivalent).

**ENG4000** Senior Design Project  8 ch (1C 2T 4L) [W]
Full-year design course (fall and winter of same academic year) which may be taken by senior students in any engineering program. Working preferably in multidisciplinary teams of three to five individuals, students design a structure, system, process or new product. Many of the projects are sponsored by outside clients. Proposed solutions involve the use of
modern engineering tools and design methods, and must meet a broad range of constraints including safety, environmental stewardship, and legal duties and liabilities. Deliverables include progress reports and presentations, a final report with appropriate engineering drawings, and if applicable, a prototype. Weekly lectures cover topics relevant to the design projects and include presentations by guest speakers. The weekly tutorial hours are designated for scheduled meetings with project co-mentors. Prerequisites: Restricted to students who have met the requirements for the capstone design course set by their engineering program and have received approval from their degree program coordinator.

ENGG4013 Law and Ethics for Engineers 3 ch (3C)
General introduction to the legal and ethical aspects of engineering practice. Social responsibilities of engineers, the engineering act and code of ethics, occupational health and safety, sustainable development, environmental stewardship, employment duties, legal duties and liabilities of the professional engineer, contracts, the tort of negligence, labour law, intellectual and industrial property, conflict resolution. Restricted to students with at least 100 ch in the engineering program. Limited enrolment; priority given to students in their final year of engineering.

ENGG4025 Multidisciplinary Design Project 3 ch (2C 2T 4L) [W]
Full-year design course (fall and winter of same academic year) which may be taken in place of the final year design course in any engineering program. Working in multidisciplinary teams of 4 or 5 students, students will work on a design project sponsored by an outside client. The proposed solution must meet a broad range of constraints including health and safety, sustainable development and environmental stewardship. Deliverables include progress reports and presentations, a final report including engineering drawings, and if applicable, a prototype. Weekly lectures will cover topics relevant to the design projects and will include presentations by guest speakers. The weekly tutorial hours are designated for scheduled meetings with project co-mentors. Prerequisites: Restricted to students who have met the requirements of the capstone design course in their program and have received approval from their degree program coordinator.

ENGLISH

General Notes on Courses
Courses whose numbers begin with the digits 3 and 4 are normally open only to students in their third and fourth years. Courses whose numbers begin with the digit 5 are normally open only to students in Honours. There is a prerequisite of 6 credit hours in English of 1000- or 2000-level for all advanced-level courses in English, unless special permission is obtained from the instructor of the advanced-level course.

Each spring the Department compiles a Handbook with detailed descriptions of courses to be offered in the following academic year. For information about instructors, texts, assignments, and examinations required etc., you should consult this Handbook, available from the Department office. For further information, consult the instructors.

Other Literatures: Consult the course listings for Classics, French, Greek, and Latin, and for Comparative Cultural Studies.

English as a Second Language: Consult the course listings for AESL (Academic ESL).

Film program: Consult the course listings for FILM.

NOTE: See beginning of Section H for abbreviations, course numbers, and coding.

ENGL1000 Introduction to Modern Literature in English 6 ch (3C) [W]
This course introduces students to a diverse range of literary works written in English, primarily from the twentieth and twenty-first centuries, including short stories, poems, plays, and novels. These works demonstrate how literature can open up new understandings about societies and histories both within and beyond our local experience. The selection of texts varies from section to section, but all sections devote one-third of class time to developing writing skills, and the course places considerable emphasis on critical reading. ENGL 1000 welcomes all students with an interest in English, and it is normally required for the English Major and Honours programs.

ENGL1103 Fundamentals of Clear Writing 3 ch (3C) [W]
A study of the basic principles of clear prose writing, focusing on essay structure and organization, paragraph structure, sentence structure, grammar, punctuation, and word choice, as well as revision and proofreading. Students will submit numerous written assignments.

ENGL1104 Fundamentals of Effective Writing 3 ch (3C) [W]
A further examination of the basic principles of prose writing, with special attention to larger patterns of organization and development used in prose exposition and argument. Prerequisite: A grade of C or better in ENGL 1103, or equivalent.

ENGL1144 Reading and Writing Non-Fiction Prose 3 ch (2C 1T) [W]
By studying non-fiction prose models and by writing essays, students will work to improve their writing, explore techniques to craft effective essays, and develop critical and analytical skills applicable to a wide range of disciplines. Tutorials use exercises and discussions to assist this development.

ENGL1145 An Introduction to Prose Fiction 3 ch (2C 1T) [W]
Two weekly lectures examine a variety of short stories (and perhaps one or two novels) from the nineteenth, twentieth, and twenty-first centuries. Weekly small tutorials teach critical and writing skills (such as grammar, punctuation, organization, and argumentation) applied to the course readings.

ENGL1146 An Introduction to the Novel (O) 3 ch (2C 1T) [W]
Examines a brief range of novels from the nineteenth and twentieth centuries.

ENGL1173 Introduction to Acting and Performance 3 ch (3 hours/wk (Cross-Listed: DRAM 1173) plus practical work)
An introduction to acting suitable for students at all skill levels, from beginners to experienced performers. Instruction will cover the basics of voice, movement, improvisation, script analysis, and monologue and scene work, culminating in a final performance project.

ENGL2114 Effective Professional Communications (O) 3ch(3C)(W)[LE]
“Effective Professional Communications” teaches students how to produce key business documents by practising their writing skills and applying their knowledge to Artificial Intelligence Digital Simulation Learning modules that present real-world business challenges. Through a combination of classroom discussions, presentations, and exercises, coupled with online role-played assignments and projects, (completed outside of class), students have the opportunity to produce, evaluate, and receive feedback on the documents they author and to understand the power of written word as a tool of in business communications. Using the case study model, the course engages students in the design, creation and evaluation of a variety of written and oral documents including the resume, the cover letter, the elevator pitch, internal and external routine and informational messaging (through emails, memos, and both short and long reports), business letters, and various kinds of presentations. Special attention will be paid to intercultural and interpersonal communications and the role that the written and spoken word plays in team building and effective management. This course is ideally paired with ENGL 2115 “Writing for New Media: Digital Literacies”. Pre-requisites: none. NOTE: ENGL 2114 cannot be taken for credit towards the BBA program. Credit will not be given for both ENGL 2114 and ADM 1165, ADM 1166, or ADM 2166.

ENGL2115 Writing for New Media: Digital Literacies (O) 3ch(3C)(W)[LE]
“Writing for New Media” combines theory and practice by teaching students how to understand and critically engage with new technologies and online resources and by giving students the skilils to begin to create their own content as they learn how to write for new media. Today the Internet serves as a platform for every sector in the wired world; students not only need to know how to communicate effectively on paper but must also understand that various aspects of writing and publishing content online. While the ability to write is central to online communications, attention needs to be paid to additional skills that are required to convey ideas and make arguments through new technologies including chunking content, hyperlinking, visual structure and information design, and interactive content. Assignments involve writing content and adapting it for new media contexts. The course explores wikis, video compositions, social media formats (Facebook, Twitter) blogs, and op-eds. Ultimately, students create a blog site through which they can practise and refine skills and prepare a portfolio of online writing. This course requires no prior knowledge of web design. Pre-requisites: none.

ENGL2173 Acting: Body and Text 3 ch (3 hours/wk plus practical work) (Cross-Listed: DRAM 2173)
A course suitable for both beginner and experienced actors, with a focus on voice, movement, and script analysis, culminating in the presentation of a scene study or one-act play. Rehearsal and performance time additional to regular class hours required. NOTE: Students cannot obtain credit for both ENGL 2170/DRAM 2170 and ENGL 2173/DRAM 2173.

ENGL2174 Technical Production and Design for the Theatre 3 ch (3 hours/ (Cross-Listed: DRAM 2174) wk plus practical work)
An introduction to set construction, lighting, sound, and stage management for the theatre, with instruction in basic principles of set, sound, and lighting design. As part of their work for the course, students will assist with carpentry and design work for one or more Theatre UNB mainstage performances.
productions and acts as crew members for productions. Workshop and performance time additional to regular class hours required. NOTE: Students cannot obtain credit for both ENGL 2170/DRAM 2170 and ENGL 2174/DRAM 2174.

ENGL2175 Mainstage Production I 3 ch (3 hours/wk (Cross-listed: DRAM 2175) plus practical work) Participants in this course form a theatre company and produce, rehearse, and perform a mainstage production for the Theatre UNB season, under the direction of the instructor. Rehearsal and performance time additional to regular class hours required. NOTE: Students cannot obtain credit for both ENGL 2170/DRAM 2170 and ENGL 2174/DRAM 2175. Prerequisite: Students must have either completed or be concurrently enrolled in ENGL 1173/DRAM 1173 or ENGL 2173/DRAM 2173.

ENGL2195 Creative Writing: Poetry and Drama 3 ch (3CWS) [W] (LE) Introduction to the writing of poetry and drama, with a focus on basic technique, style, and form. Combines writing exercises and lectures on the elements of writing, but also introduces the workshop method, by which students provide critiques of each other’s work and develop editorial skills. May include assigned readings.

ENGL2196 Creative Writing: Fiction and Screenwriting 3 ch (3CWS) [W] (LE) Introduction to the writing of fiction and to screenwriting, with a focus on basic narrative technique, style, and form. Combines writing exercises and lectures on the elements of writing, but also introduces the workshop method, by which students provide critiques of each other’s work and develop editorial skills. May include assigned readings.

ENGL2283 Shakespeare and Film (O) 3 ch (3C) [W] Film directors have transformed Shakespeare into one of today’s hottest cultural properties, rekindling a profitable relationship with the world’s greatest playwright that dates back to the first days of late-nineteenth-century cinema. The screen has now overtaken both the written text and the stage as the medium in which most people discover and appreciate Shakespeare. In this course we shall study some examples of this flourishing exchange between Shakespeare and film in terms of artistic expression and social practice. Required readings will include single-volume editions of the plays; a film studies handbook; and screenings of the films (at least two versions of each play).

ENGL2603 Literature of Atlantic Canada (O) 3 ch (3C) [W] An exploration of poetry, fiction, and drama written, in English, by Atlantic Canadians that emphasizes the prevalent themes explored by Maritime and Newfoundland authors, such as the search for personal and regional identity, human relations to landscape and the natural world, and the meaning of “home place.” Authors may include Alden Nowlan, Milton Acorn, Rita Joe, David Adams Richards, John Steffler, Mary Dalton, Anne Compton, Wayne Johnston, Lisa Moore, Anne Simpson, George Elliott Clarke, Sue Goyette, Michael Crummey, and Tammy Armstrong.

ENGL2608 Introduction to Contemporary Canadian Literature (O) 3 ch (3C) [W] A survey of English-Canadian fiction, non-fiction prose, poetry, drama, and film that explores major themes in contemporary Canadian literature, such as the shaping of Canadian identity, regionalism and the global perspective, class divides, eccocritical views, and other current issues. Authors may include Dionne Brand, Tomson Highway, Lynn Coady, Don McKay, Eden Robinson, Ken Babstock, and Lori Lansens.

ENGL2703 Introduction to Modern American Literature (O) 3 ch (3C) [W] An exploration of selected topics in American literature and culture. The theme of the course changes each year. In each course, students read selected works of poetry, fiction, creative non-fiction, and/or drama and may also explore the relationship between U.S. literature and other media such as film and television. Possible themes include the American West, multi-ethnic literature, U.S. presidential elections, the Beat Generation, and Hollywood films. Please see the Department of English Handbook or website for the current description.

ENGL2901 English Literature to 1660 3 ch (3C) [W] This course traces the beginnings of English literature to 1660, with a focus on love and sexuality, cultural and linguistic upheavals, religion and secularism, and the impact of imperialism. While society was structured by powerful ideas of order grounded in religion, nature, social rank, gender, ethnicity, and race, traditional thinking about these concepts was increasingly challenged, not least by contact with non-European cultures and the Scientific Revolution. As literacy rates rose, English literature found new audiences, producing highly varied and often playful works. Works by figures such as Chaucer, Shakespeare, and Milton are central to the course, but other texts will also be discussed. Genres include poetry, drama, and prose. This course is required for the English Major and Honours programs, and strongly recommended for Minors. Prerequisite: a grade of C or better in ENGL 1000 or equivalent, or permission of the instructor.

ENGL2902 English Literature 1660-1900 3 ch (3C) [W] This course picks up the story from ENGL 2901. In these centuries, trade, industrialization, wars, and Britain’s rise as an imperial power helped to shape social conflicts centring on class, race, indigeneity, gender, sexuality, politics, and religion. New genres (such as the novel) emerged and others (such as poetry) transformed; the accelerating rise in literacy rates created new audiences for literature, and also meant that people from an ever-broader range of social backgrounds were writing. Poetry and prose are the major genres here. This course is required for the English Major and Honours programs, and strongly recommended for Minors. Prerequisite: A grade of C or better in ENGL 1000 or equivalent, or permission of the instructor.

ENGL2903 Literature of the Abyss (O) 3 ch (3C) [W] An examination of literary texts that address one or more of the following: fear, suspense, and/or horror; monsters and the grotesque; criminality and detection; violence and war; love gone wrong; estrangement and alienation. The specific focus and the selection of texts vary from year to year.

ENGL2909 International Film History (Cross-listed: FILM 2909) 3 ch (3C) [W] This course introduces students to major stages in the development of film as an international art. Topics include: Silent Cinema, German Expressionism, Soviet Montage, Classical Hollywood, Italian neorealism and Modernism, French New Wave, Japanese New Wave, British New Wave, Australian New Wave, Experimental Cinema, Cinema Novo, New German Cinema, Postcolonial Cinema, Bollywood, the New Hollywood, American Independent Cinema, Dogme 95, and others. NOTE: Students who already have credit for ENGL 3194 cannot obtain credit for ENGL 2909 or FILM 2909.

ENGL3003 Old English I (O) 3 ch (3C) [W] Introduces the language, literature, and culture of the Anglo-Saxons. Emphasis is on working towards a reading proficiency.

ENGL3004 Old English II (O) 3 ch (3C) [W] Continues the study of the Anglo-Saxon period begun in Old English I. Considers a greater number of texts, and demands a more sophisticated level of literary and linguistic analysis.

ENGL3101 History of the English Language (O) 6 ch (3C) [W] (Cross-listed: LING 3010) After a brief consideration of the nature of human language, introduces students to phonetics and the International Phonetic Alphabet. Then traces the history of the English language from its Indo-European origins to its present state. Focuses on the various kinds of linguistic change: those affecting sounds, forms, and vocabulary.

ENGL3040 Chaucer & Co. (A) 6 ch (3C) [W] Examines a wide variety of medieval literature, ranging from courtly romance to bawdy fabliau to dream-vision, alliterative heroic verse, lyric poetry, verse satire, and drama. Also explores the historical and intellectual contexts of the individual works: the politics and shifting social structures of this period, the way people lived and thought, their culture and customs, and many other aspects of the Middle Ages. Precise course content varies from year to year, but usually includes selections from Chaucer’s Canterbury Tales.

ENGL3083 Literary Theory and Critical Practice 3 ch (3C) [W] A study of the development of literary theory and criticism, with some attention to critical practice. The course covers major approaches to literary interpretation, such as deconstruction, gender studies, Marxism, new historicism, postcolonial studies, and psychoanalysis. Readings will include excerpts from theorists such as Jacques Derrida, Michel Foucault, Julia Kristeva, Judith Butler, and Homi Bhabha. NOTE: Students cannot obtain credit for both ENGL 3083 and ENGL 5083.

ENGL3103 Creative Writing: Studio Course 3 ch (3WS) [W] A studio course offers students the opportunity to work on an independent creative writing project supervised by a faculty member of the English Department or by a person approved by the Director of Creative Writing and the Chair of the Department. Students wishing to take a studio course must first find a faculty member willing to supervise the project. The project may explore a single genre in depth or may be a multi-genre work. Readings will typically be assigned in addition to the writing done for the course. Students will meet regularly with the supervisor in editorial sessions to discuss the writing in detail and to discuss assigned readings. The course must not include writing done for another course or workshop.
ENGL3113  Writing in Academic and Professional Contexts  3 ch (3C) [W] (LE)

In today’s world, effective writing is an indispensable career-building skill. Focusing on transferable skills, this course explores the principles of written communication in academic and professional contexts and provides extensive practice in the application of these principles. Frequent writing assignments allow students to refine their skills in various forms of written communication, including both academic essays and career-related writing such as reports, proposals, abstracts, and other written documents. The course emphasizes class discussion, individual and group work, peer review, and workshop sessions. To succeed in this course, students must be prepared to complete numerous written assignments. **Prerequisite:** Suitable for students who have completed 60ch in any discipline.

ENGL3116  Advanced Expository Writing and Rhetoric (O)  3 ch (3C) [W]

A workshop course in expository prose, intended for those who expect writing to be an important element in their careers. There will be frequent reading and writing assignments, and discussion of student work in the class.

ENGL3123  Creative Writing: Poetry  3 ch (3WS) [W]

A creative writing course aimed at developing skills in the writing of poetry. Students will participate in workshops and discussions and will complete assigned readings and exercises as they explore the poetic possibilities of language.

ENGL3143  Creative Writing: Short Fiction  3 ch (3WS) [W]

A creative writing course aimed at developing skills in the writing of short fiction. Students will participate in workshops and discussions and will complete assigned readings and exercises as they delve into the craft of storytelling.

ENGL3153  Creative Writing: Non-Fiction (O)  3 ch (3WS) [W]

A creative writing course aimed at developing skills in the writing of non-fiction. It involves prescribed readings, exercises, workshops, and discussions.

ENGL3163  Creative Writing: Drama (O)  3 ch (3WS) [W]

A creative writing course aimed at developing skills in the writing of drama. It involves prescribed readings, exercises, workshops, and discussions.

ENGL3170  Advanced Drama Production  6 ch (3 hours/wk) (Cross-Listed: DRAM 3170) plus practical work

A project-based course that builds on ENGL 2173/DRAM 2173 and ENGL 2174/DRAM 2174 by offering advanced training in acting, directing, and design for theatre. Instruction centers on 1-2 full-scale theatre productions mounted by the class for Theatre UNB. Rehearsal, workshop, and performance time additional to regular class hours required. **Prerequisite:** ENGL 2170/DRAM 2170 or both ENGL 2173/DRAM 2173 and ENGL 2174/DRAM 2174, or equivalent.

ENGL3175  Mainstage Production II  3 ch (3 hours/wk) (Cross-Listed: DRAM 3175) plus practical work

Building on the skills developed in ENGL/DRAM 2175, participants in this course form a theatre company and produce, rehearse, and perform a mainstage production for the Theatre UNB season, under the direction of the instructor. Rehearsal and performance time additional to regular class hours required. Permission of the instructor is required. **Prerequisite:** ENGL 2170/DRAM 2170 or ENGL 2173/DRAM 2175.

ENGL3183  Creative Writing: Screenwriting for Short Formats  3 ch [W](LE) (Cross-Listed: FILM 3183)

This course guides writers through the basics of short format screenplay structure and introduces them to basic story, character, and dialogue principles. Students will be exposed to a wide range of short films in a variety of genres and forms so that they can explore the limits and possibilities of brief forms of cinematic storytelling.

ENGL3186  Creative Writing: Feature Screenplay  3 ch (LE) (Cross-Listed: FILM 3186)

This intensive course guides writers through the basics of feature screenplay structure, character principles, archetypal storytelling, writing and rewriting strategies, and ‘the biz.’ Classes are a combination of lectures, discussion, and workshops. **Prerequisite:** ENGL 3183/FILM 3183 or equivalent writing experience, with permission of the instructor.

ENGL3260  Shakespeare  6 ch (3C) [W]

A study of selected plays.

ENGL3263  Shakespeare’s Predecessors and Contemporaries (A)  3 ch (3C) [W]

A study of English medieval and Renaissance drama, excluding Shakespeare.

ENGL3269  Shakespeare’s Now (O)  3 ch (3C) [W]

After we read Facebook or Twitter to find out what’s happening, we turn to Shakespeare to make sense of it. This course will look at urgent twenty-first-century issues interpreted through Shakespeare’s plays and related contemporary criticism and performance. Such issues might include political tyranny, war, trauma, race, sexual harassment, gender, queerness, disability, body-type discrimination, colonialism, environmentalism, animal-human relations. **Note:** Students cannot obtain credit for both ENGL 3260 and ENGL 3269.

ENGL3283  Early Renaissance Poetry and Prose (A)  3 ch (3C) [W]

Examines a wide variety of sixteenth-century poetry and prose, including sonnets and other lyric poetry, allegorical epic, early prose fiction, statements on literary theory, and contemporary commentary on political events, as well as early translations of a few major works of the European Renaissance. Also explores the historical and intellectual contexts of the works, and the politics and social structures of this age of exploration and experimentation.

ENGL3284  Poetry and Prose of the Later Renaissance (A)  3 ch (3C) [W] (Including Milton)

Examines a wide variety of non-dramatic poetry and prose from the end of the reign of Elizabeth I to just after the Restoration (1660). The course explores the poetry of Donne and the Metaphysical poets, Jonson and the Cavalier poets, Marvell, and the gradually more numerous women writers; it also examines the new forms of prose and includes a selection of Milton’s works.

ENGL3343  The British Novel I (A)  3 ch (3C) [W]

A study of the early development of the novel, from the beginnings to the early nineteenth century, including such novelists as Defoe, Richardson, Sterne, Burney, Henry and Sarah Fielding, and Austen. Some attention will be paid to the social contexts of the emerging genre, and to its roots in such forms as the letter, the newspaper, and broadsheet criminal biography.

ENGL3385  Restoration and 18th-Century Literature (A)  3 ch (3C) [W]

A study of selected works of eighteenth-century literature. The emphasis in the course (whether it focuses on drama, poetry, or prose) will depend upon the instructor.

ENGL3400  The Romantic Period (A)  6 ch (3C) [W]

A study of English literature written between 1789 and 1832 in the context of intellectual, social, political, and religious forces. The course will focus on the Romantic poets but will include a selection of prose texts from the period. **Note:** Students cannot obtain credit for both ENGL 3400 and ENGL 3406.

ENGL3406  The Romantic Period (O)  3 ch (3C) [W]

A study of English literature written between 1789 and 1832 in the context of intellectual, social, political, and religious forces. The course will focus on the Romantic poets but may include a brief selection of prose texts from the period. **Note:** Students cannot obtain credit for both ENGL 3406 and ENGL 3400.

ENGL3410  Victorian Literature (A)  6 ch (3C) [W]

This course studies selected British Victorian authors, such as Thomas Carlyle, Robert Browning, Elizabeth Barrett Browning, Emily Brontë, Alfred Tennyson, George Eliot, Charles Dickens, D.G. Rossetti, Christina Rossetti, Matthew Arnold, and John Ruskin. Although the course may include some fiction, its main focus is on poetry and essays. The literature will be studied in its historical context, with substantial attention paid to the rich historical and cultural developments of this eventful era. **Note:** Students cannot obtain credit for both ENGL 3416 and ENGL 3410.

ENGL3416  Victorian Literature (O)  3 ch (3C) [W]

Studies selected British Victorian authors, such as Robert and Elizabeth Barrett Browning, the Brontës, Tennyson, Eliot, Dickens, and Ruskin. Although the course may include some fiction, its main focus is on poetry and/or essays. **Note:** Students cannot obtain credit for both ENGL 3410 and ENGL 3416.

ENGL4343  The British Novel II (A)  3 ch (3C) [W]

A study of major novels from the mid nineteenth century to the early twentieth century.
This course explores a variety of British poems from the twentieth and twenty-first centuries, including examples of traditional artistic concerns, technical innovations, war protest, social criticism, whim, emotional turmoil, and political commentary. The primary focus is on the detailed examination of a small number of selected works.

This exploration of ten British novels from the twentieth and twenty-first centuries reveals the period’s wide range of both social concerns and literary techniques. The varied selection of the course offers intriguing stories that display the complexities of human relationships and social conventions as well as possibilities of technical experimentation. A sense of the overall development of the modern novel is provided by the inclusion of both early representatives and novels published within the last few years.

Many genres are dominated, at least initially, by men. However, women are the hear of almost any history of the novel. This is certainly the case for modern and postmodern British novels, in which reimagines the rules of both genre and gender; these authors even question the category of “woman” itself. Possible course authors include Virginia Woolf, Stevie Smith, Jean Rhys, Angela Carter, Jeanette Winterston, A.S. Bryant, Sarah Waters, and Zadie Smith.

Many visceral notions— that is, ideas about bodies—may seem new to us, transgender, mental health, feminism, anti-racism, and bioethical concerns come to mind. Yet modern British texts anticipate many of these fields and often do so with scant emphasis on social accessibility. Our course will focus on bodily matters as they appear in modern British poetry, drama, and prose: desire, illness, technology, emotion, gender, race, species, suffering, pleasure, etc.

A survey of Canadian non-fiction prose, poetry, and drama from the turn of the century to 1900, examining key cultural and historical moments in the development of Canada as a nation. Authors may include Jacques Cartier, Samuel de Champlain, Joseph Brant, Oliver Goldsmith, Susanna Moodie, Anna Brownell Jameson, Catherine Parr Traill, George Copway, Mary Ann Shadd, Louis Riel, E. Pauline Johnson, Charles G.D. Roberts, Sara Jeannette Duncan, Bliss Carman, and Archibald Lampman. NOTE: Students cannot obtain credit for both ENGL 3608 and ENGL 3610 or for both ENGL 3608 and ENGL 3640.

A survey of English-Canadian non-fiction prose, poetry, and drama from the turn of the century to 1900, with a focus on the development of Realism and Modernism in Canada. Authors may include Jessica Tone, Stephen Leacock, L.M. Montgomery, Robert Service, Frederick Philip Grove, E.J. Pratt, F.R. Scott, A.M. Klein, Dorothy Livesay, P.K. Page, Sinclair Ross, Sheila Watson, Elizabeth Smart, Al Purdy, and Chief Dan George. NOTE: Students can obtain credit for one course in each of the following pairs: ENGL 3610/ ENGL 3688, ENGL 3640/ ENGL 3688, ENGL 3684/ ENGL 3688.

A survey of English-Canadian fiction, poetry, drama, and non-fiction prose from 1900 to 1970. Authors may include Margaret Atwood, Michael Ondaatje, Northrop Frye, Margaret Laurence, Robert Kroetsch, Alice Munro, Leonard Cohen, Rudy Wiebe, Maria Campbell, Rohinton Mistry, M. NourbeSe Philip, Thomas King, Miriam Toews, and Joseph Boyden. NOTE: Students can obtain credit for only one course in each of the following pairs: ENGL 3610/ ENGL 3684, ENGL 3610/ ENGL 3698, ENGL 3640/ ENGL 3698, ENGL 3684/ ENGL 3698.

A survey of American poetry and prose from colonial times to the early nineteenth century, examining key cultural and historical moments in the development of the United States as a nation. The course will introduce students to the major historical and cultural developments, and the earliest published work by Native- and African-American writers. NOTE: Students cannot obtain credit for both ENGL 3703 and ENGL 3707.

A survey of American poetry and prose from colonial times to the early nineteenth century, examining key cultural and historical moments in the development of the United States as a nation. Texts will vary from year to year, but will include poetry, drama, fiction, and/or non-fiction written primarily by British, American, and Canadian women. Attention will also be paid to relationships between women’s writing and history, contemporary feminist and gender theory, and social issues such as identity, sexuality, class, and race.

A survey of major developments in twentieth-century theatre. Plays will be studied with attention to their often controversial engagements with social and political issues, moral debates, and theatrical conventions, as well as their connections to movements such as realism, modernism, expressionism, and absurdism.

A study of women’s writing in English from a range of historical periods. Texts will vary from year to year, but will include poetry, drama, fiction, and/or non-fiction written primarily by British, American, and Canadian women. Attention will also be paid to relationships between women’s writing and history, contemporary feminist and gender theory, and social issues such as identity, sexuality, class, and race.

This course introduces students to the major debates in the field of film theory, including (but not limited to) Early Silent Film Theory, the Soviet Montage-Theorists, Russian Formalism and the Bakhtin School, the Historical Avant-gardes, French Auteur Theory and its Americanization, Third World Film and Theory, Genre and Authorship, Marxist film theory, Spectatorship, Feminist Film Theory, Cognitive and Analytic Theory, Postcolonial Film Theory, Race and Ethnicity in Cinema. NOTE: Students who already have credit for ENGL 3193 cannot obtain credit for ENGL 3903 or FILM 3903.

This course explores the relationship between the screen and cityscape within the context of a range of films, genres, historical periods, and urban locations in order to show that cinema is fundamental to the development of urban space and that cinema has shaped our view of the city. Grounding our discussion of the ‘cinematic city’ in film theory and urban theory (Benjamin, Kracauer, Baudrillard, Foucault, Deleuze, Lacan, Lefebvre, and others), we will examine the cinematic forms most significantly related to the city, including early cinema, documentary film, film noir, science fiction, the New Wave, migrant and diasporic cinema, and postmodern cinema. Possible films to be screened: Metropolis, Things to Come, Man with the Movie Camera, Berlin: Symphony of a Great City, The Maltese Falcon, The Blue Dahlia, Dark Passage, Manhattan, Annie Hall, Street of Crocodiles, Taxi Driver, Boyz N the Hood, Three Colors: Red.
ENGL 4174 /DRAM 4174
Introduction to Theatre UNB.

ENGL 4176
Independent Drama Project 3 ch (practical work)
(Cross-Listed: DRAM 4174)

ENGL 4177
Thesis Production 3 ch (practical work)
(Cross-Listed: DRAM 4173)

ENGL 3903
Zombies in Film (O)
(Cross-Listed: FILM 3903)

ENGL 1000 (or equivalent) or permission of the instructor.

ENGL 3908
Zombie films make up one of the longest living sub-genres of horror through representations of zombies who have evolved from exoticized monstrous figures from Haiti to cannibalistic brain eaters and eventually to infectious bodies carrying epidemics. This course will explore the evolution of zombies from studio pictures starring Bela Lugosi to B-movies featuring fighting ninjas nad murdering cheerleaders through to modern film zombies who look uncannily like the unconscious bored populace and/or become loving family pets. Zombies are never simply undead; they always reflect something about our changing lives and fears. These films also permit us to explore the murky spaces between high and low culture, the history and development of horror films as a genre, and the aesthetics of fear. Pre-requisite: ENGL 1000 or permission of the instructor.

ENGL 3916
Canadian Film since 1967 (O)
(Cross-Listed: FILM 3916)

ENGL 3919
National Cinemas (A) 3 ch (3C) [W]
Each course in the National Cinemas series explores significant historical periods, movements, styles, film theories, directors, and topics in the development of particular national and/or transnational cinemas. Possible topics include Classical Hollywood Cinema, American Cinema of the 1960s and 70s, post-1989 European cinema, the French New Wave, Canadian Auteurs, Contemporary American Cinema, post-War Italian Cinema, Race and Gender in American Cinema, Contemporary French Cinema, and others. NOTE: Students who already have credit for ENGL 3966 cannot obtain credit for ENGL 3916 "National Cinemas: Canadian Film."

ENGL 3937
Film Genre (O) 3 ch (3C) [W]
The Film Genre course explores the history, iconography, and socio-cultural significance of one particular film genre by means of a number of examples. The specific focus of the course varies from year to year. Pre-requisite: ENGL 1000 (or equivalent) or permission of the instructor.

ENGL 4173
Thesis Production 3 ch (practical work)
(Cross-Listed: DRAM 4173)
Open to students completing the final year of a Double Major or Minor in Drama. Working in groups, students produce a full-scale production for Theatre UNB, under the supervision of the Director of Drama. NOTE: Students cannot obtain credit for both ENGL 4173/DRAM 4173 and ENGL 4170/DRAM 4170. Prerequisites: ENGL 2170/DRAM 2170 and/or ENGL 3170/DRAM 3170 and permission of the Director of Drama.

ENGL 5004
Old English II (O) 3 ch (3C) [W]
Continues the study of the Anglo-Saxon Period begun in Old English I. Considers a greater number of texts, and demands a more sophisticated level of literary and linguistic analysis. In addition to the regular course work for ENG 3004, a seminar presentation and a paper based on it will be required. NOTE: Students cannot obtain credit for both ENGL 3004 and ENGL 5004. Prerequisite: ENGL 3003.

ENGL 5083
Literary Theory and Critical Practice 3 ch (3C) [W]
A study of the development of literary theory and criticism, with some attention to critical practice. Required for the Single and Joint Honours programs. NOTE: Students cannot obtain credit for both ENGL 3083 and ENGL 5083.

ENVIRONMENTAL STUDIES
See beginning of Section H for abbreviations, course numbers and coding.

ENVS 2003
Introduction to Environmental Studies 3 ch (3 C/S)
This course broadly covers issues relating to the impact of human activity on air, water and soil environments. It covers the causes and effects of pollution, challenges to remediation, and suggests courses of action for reducing human impact. In addition to formal lectures, the course will include guest lectures, special projects, debates and advocacy efforts to improve the environment.

ENVS 2023
Climate Change 3 ch (3C)
This course begins with an overview of the science of climate change and its historical/projected impacts on environmental, social, and economic systems. Then, mitigation and adaptation policy options that are available to Canada and other countries will be investigated. Particular issues that may be addressed include the role that humans play in creating climate change, the uncertainty involved in making future climate change projections, and municipal plans to adapt to climate change.

ENVS 4001
Environmental Impact Assessment and Management 3 ch (3C)
This course focuses attention on the implementation of environmental problem solving techniques. Students will learn many practical methods for assessing problems and justifying solutions. These may include such activities as preparing media pieces and briefing notes to government officials, setting up environmental impact assessments and audits, testing for water/soil/air contamination, and surveying the public/industry on various issues. Throughout these activities, students are expected to critically examine the social, political, philosophical, economic, and ecological outcomes of their activities.

ENVS 4002
Stakeholder Approaches to Environmental Problem Solving 3 ch (3 C/S)
Most environmental issues have many sides including scientific, social, political, and economic, and comprise multiple players and stakeholders promoting divergent points of view. This course is designed to explore these elements in detail. Current national, regional and local problems will be brought to the class by a number of guest speakers in order to help students critically analyze the roots of the problems and possible solutions. The problems discussed will include such issues as environmental scope, biodiversity decline, climate changes, air and water quality, population and consumption per capita, biotechnology and genetically altered foods.

ENVS 4286
Geographic Information System (GIS) for Environment 3 ch (3C)
Upon successful completion of this course, students will be able to create and edit spatial data, work with attribute tables, find information within a geographic information system (GIS) data base, and present spatial data in the form of maps. The course is based on state-of-the-art GIS software
The course will also cover basic political theory, with a focus on the underpinnings of resource management (e.g. property rights, religious traditions). The course will also cover basic political theory, with a focus on the underpinnings of resource management (e.g. property rights, religious traditions).

ENV 9003 Environmental Management Tools 3 ch (3C)

Enrollees with a wide array of tools used to assess and manage activities that impact the environment. Tools considered may include environmental indicators, measurement, environmental risk assessment, life-cycle assessment, environmental management systems, sustainable forest management certification, and others. Presentations will be given by faculty members, students, and working professionals who demonstrate the use of these environmental management tools and identify issues associated with them. Credit cannot be obtained for both ENVS 5003 and ENV 6003.

ENVIRONMENT AND NATURAL RESOURCES

The section contains course descriptions for students entering the Bachelor of Science in Environment & Natural Resources program.

See beginning of Section H for abbreviations, course numbers and coding.

ENR 1001 Resource Management Issues, Ethics and Communication I 4 ch (3C 2L)

Environmental and resource management problems and issues are, by definition, interdisciplinary in nature. This course is designed to both expose students to a variety of contemporary resource management and environmental challenges, from local to global scales, and to help them harness the tools and develop requisite skills to describe, characterize, and explain these challenges. Fundamentals of ethics will be presented and related to contemporary topics and issues in resource management. Thus, in addition to learning course material, students will be provided with a forum in which to critique, develop and practice both oral and written presentation skills. Analysis of policy documents, press releases, editorials, science writing, will be integrated with production of these types of communications tools of these types of communication tools by the students themselves.

ENR 1002 Resource Management Issues, Ethics and Communication II 4 ch (3C 3L)

Following on Resource Management Issues I, this course will increase a student’s ability to detect and describe breadth, depth, and complexity of contemporary resource management and environmental issues. This course, in addition to building on oral and written communication skills, will provide students with opportunities to explore the use and abuse of a variety of communication tools: visual media, the role of art in contemporary environmental discourse, writing and producing video documentaries, doing radio spots, and interacting with journalists. Focus will be on the theoretical and technical aspects of environmental communication. Ethical issues in science, social science, communications and resource management will be presented. Prerequisite: ENR 1001.

ENR 1611 Engineered Systems and Structures in Natural Environments 3 ch (2C 2L)

This course introduces students to the design process when designing structures and developing production associated with natural resources and the environment. Structures examined may include forest roads, small water management structures such as culverts and earthen dams, retaining walls, and landfills. Production processes may include forest harvesting, mineral extractions, and factory activities such as wood processing and seedling production. Impacts engineered structures and production on the natural environment and ways to mitigate those effects are essential elements of these design processes.

ENR 1973 Fall Field Camp 2 ch

An introduction to fieldwork, technical skills and issues associated with natural resource management -- forests, water, environment and wildlife. Each day will focus on a particular skill needed to assess an aspect of natural resources. Included will be demonstrations, field trips and discussion that will highlight current research or areas of current controversy. The intersection between natural resource systems will be stressed.

ENR 2004 Social and Cultural Systems 3 ch (3C)

In this course students will learn how to describe and measure the structure and function of human communities; and determine how different social and ethnic groups perceive and relate to the physical environment. We will discuss major environmental movements and describe social values, how they change, what influences them and how they result in policy reform and behavioral change. We will cover basic sociological theory including topics such as institutions, the nature of capitalism, and the philosophical underpinnings of resource management (e.g. property rights, religious traditions). The course will also cover basic political theory, with a focus on democracy and democratic processes. This course draws on methods and readings from a variety of disciplines, including social ecology, environmental sociology, rural sociology, social network theory, history, and anthropology.

ENR 2021 Natural Resource Management, Institutions, Policy and Governance 3 ch (3C)

This course examines how resource and environmental management systems and tools are developed in cultural and institutional contexts and how these contexts shape the definitions of problems and the management systems proposed as solutions. Included will be analysis of different management regimes and decision-making processes: technocratic, community-based, co-management, network governance, etc. In each case, we will examine the scale of the management issue (local, regional, national, international) and in that context, who has authority, legitimacy, power, accountability, and why; how they obtain and maintain them; and implications of each in terms of different management contexts (e.g. common pool resources). Traditional policy-making models will be presented, as well as analytical tools for policy evaluation. Students will develop, defend, and critique a variety of different types of natural resource management plans that involve large-scale environmental changes (including water, air, and land issues), and develop adaptive management strategies that simultaneously account for human and natural systems.

ENR 2114 Water Sustainability: Practice and Technology 3 ch (3C)

The theme of this course is how humans impact the environment with our developing technologies. The course examines how aquatic ecosystems are altered by the activities of agriculture, forestry, aquaculture, solid waste disposal, our demands for industry, e.g., pulp and paper, manufacturing, and mining, and our basic needs for clean drinking water, e.g., water and sewage treatment. The course appraises evolving, alternative technologies, with visits to some of these operations to learn how new technologies are reducing impacts and protecting water resources for the future.

ENR 2425 Plants and Environments 3 ch (3C 3L)

Students learn to identify plants using keys and to recognize assorted plants of forests, fields, meadows and wetlands. They learn the requirements for growth, development and persistence mechanisms of various kinds. Prerequisite: A basic university course in Biology (e.g. BIOL 1001) or Botany. NOTE: This course parallels FOR 2425 for the first 8 weeks of term and is completed at the end of the 8th week. Thus it is assigned fewer credits than for FOR 2425.

ENR 3000 Indigenous Issues and Perspectives in Natural Resource Stewardship 3 ch (1C)

This course introduces students to Indigenous culture, knowledge and worldviews as these relate to both Indigenous and western traditions of natural resource management. The course will cover Indigenous understanding of their relationships with nature and a basic introduction to institutional and policy issues. The course will treat the dynamics of Indigenous institutions and how these relate to and interact with institutions of western society.

ENR 2531 Introduction to Hydro meteorology Systems 3 ch (2C 3L)

This course provides an introduction to the principles of environmental hydro meteorology. Topics to be covered include energy transfer, radiation laws, energy balance, wind generation, evaporation and precipitation, climatology, snow cover and snow melt processes, the hydrological cycle and water budget, surface runoff, flow routing, and atmosphere-land surface processes associated with land use. These are addressed from small, localized to regional scales. Prerequisites: ESCI 1063, ESCI 1036.

ENR 3002 Applied Environmental Management 4 ch (3C 3L)

This course is designed to help students strengthen their skills in: (a) environmental management decision-making, (b) problem-solving, (c) teamwork and project management, and (d) articulating environmental awareness, with strong commitment to environmental sustainability. The course builds on professional and natural resource balance and management competencies developed in earlier courses and will focus on decision making by examining financial, political, and stakeholder acceptability factors, as well as conducting environmental risk assessment and trade-off analyses making appropriate use of models. Prerequisites: For 2006.

ENR 3111 Estuary & Ocean Ecosystems 3 ch (3C)

A course focusing on the structure of the juncture of rivers and oceans, the animals that live there, how they are adapted to the highly variable and necessarily unpredictable conditions of water depth, direction of movement, salinity, temperature and water chemistry. Estuaries serve also

...
as corridors for the exchange of nutrients, energy and pollutants between inland areas and the ocean. Estuaries and the coastal environment are where most of us live and work and we are the largest single impact on estuarine and coastal ecology. These impacts, how coastal environments are being changed by them, how we measure these changes and what can be done to mitigate these impacts will be examined by students through individual and team projects, debates, and presentations. Prerequisites: BIOL 1001, BIOL 1006, BIOL 1012, BIOL 1017.

**ENR3112 Water Resources Management** 3 ch (3C)  
An introduction to Integrated Water Resources Management, this is a broad examination of critical concepts and knowledge needs including essential human and institutional capacities. Topics include: impacts of anthropogenic alterations on the water cycle; changes and impacts that occur as a result of land use change and development; aquatic ecosystem health and impact assessment; water use (quality and quantity studies); wastewater issues including impacts, methods of treatment and mitigation, the urban water cycle and methods to evaluate and choose appropriate technologies; governance and capacity building in communities; and building and maintaining water management infrastructure. Prerequisites: BIOL 1001, BIOL 1006, BIOL 1012, BIOL 1017, ENR 1532.

**ENR3201 Urban Hydrology and Water Management** 3 ch (2C 3L)  
This course focuses on hydrological theories and tools needed for urban water and management, involving water supply, conservation and treatment. Topics include storm-water retention on and flow through porous and impervious surfaces, and subsequent run off generation. Students will learn about urban water management systems and best management approaches dealing with flood control and point to non-point residential, industrial and traffic-induced pollution issues.

**ENR3532 Ecolhydrology** 3 ch (3C)  
An expansion of the introduction to hydrological principles and processes offered in first year. Students develop their comprehension of the hydrological cycle, and dynamics and prediction of flow of water in rivers, lakes, and as groundwater. Hydrological processes at the landscape level are emphasized to demonstrate the connections among hydrology, biology, and the exploitation of water resources by humans. Prerequisites: ESCI 1001 or ESCI 1063, ESCI 1036.

**ENR3888 Individual Project I** 3 ch  
Credit for an individual project can be granted. The student arranges each project with a client and a Faculty advisor. Your Programme Director must approve each project prior to beginning. A signed agreement including assessment criteria amongst the student, client, Faculty Advisor and Programme Director is required.

**ENR4020 Management Practicum** 8 ch (3C 3L)  
The course provides students with an opportunity to pool their resources and demonstrate their expertise. Working in multidisciplinary teams, students will develop and integrate solutions to a real world environmental or natural resource management problem. In addition, students will learn how to manage work plans, projects and planning process. Prerequisite: ENR 3002.

**ENR4111 Fisheries and Aquatic Sciences Techniques** 3 ch (3C)  
Students will gain knowledge in techniques used commonly in fisheries and aquatic science, getting practical experience in various sampling and analysis techniques, including: water quality assessment, macroinvertebrate collections, fish collections (e.g., seineing, trapping, electrofishing), and laboratory methods for sample preparation and analysis. All field collections will be followed by appropriate data evaluation learning database management techniques, descriptive and analytical statistics, and summary report writing. Prerequisites: BIOL 1001, BIOL 1006, BIOL 1012, BIOL 1017.

**ENR4888 Individual Project II** 3-5 ch  
Credit for an individual project can be granted. The student arranges each project with a client and a Faculty advisor. Your Programme Director must approve each project prior to beginning. A signed agreement including assessment criteria amongst the student, client, Faculty Advisor and Program Director is required. Number of credit hours will be determined by the Faculty and based on the nature, duration, and complexity of the project. Credit hours assigned to the course must be determined prior to the student initiating the project.

**ENR4973 Field Camp** 2 ch (6 Days)  
An intensive 6-day series of field exercises, site visits, and on-site discussions before the start of Fall term courses. This course involves low student/faculty ratios and is designed to improve integrative, observational, and descriptive skills with respect to environmental conditions, including water, wildlife, and forest resources, and the social context in which they are valued and used. Evening sessions provide opportunity for debate and discussion of challenging contemporary environmental issues. Students are charged for food, lodging and part of travel costs. Prerequisite: Completion of least 80 credit hours of course courses.

**ENR4991 Honours Project** 6 ch [W]  
ENR honours students must complete a thesis project that is approved by the Faculty and supervised by a Faculty member. This course involves subject to a detailed report and an academic defense in a seminar-style presentation. Students should consult with a faculty advisor prior to the end of third year to discuss project requirements and potential topics. NOTE: Minimum CGPA for acceptance is 3.0

### FAMILY VIOLENCE ISSUES

See beginning of Section H for abbreviations, course numbers and coding.

**FVI2001 Introduction to Family Violence Issues** 3 ch  
Introduction to current theories, research and practice in family violence issues. Topics will include: themes of violence; dynamics of violence; gender relations; attitudes, myths, and realities surrounding family violence; public versus private nature of family violence. Research from various perspectives will be evaluated. Prerequisite: Admission to the Certificate Program or permission of the instructor.

**FVI2002 Antecedents and Patterns of Family Violence Issues** 3 ch  
Provides a historical and current overview of the societal catalysts/contributors to, and the patterns of, family violence. Explores why members of marginalized groups (e.g., the poor, women, children, immigrants, First Nations persons, gays, lesbians, transgendered) are often at especially high risk of being victimized by violence in intimate relationships. Prerequisite: Admission to Certificate Program or permission of the instructor.

**FVI2003 Violence and Society** 3 ch  
Cross Listed: SOCI 2563  
Introduces a broad range of crimes and violence from sociological perspectives. Includes a survey of political violence such as genocide, holocaust, state and anti-state terrorism; analysis of hate crimes and different types of homicide such as serial murder, mass murder, and thrill killings; examination of various manifestations of violence against women such as mass and date rape; exploration of kinds of assault such as physical assault, spousal battery, and child abuse; and robbery. NOTE: Students cannot obtain credit for both SOCI 2563 and FVI 2003.

**FVI3002 The Social and Psychological Contexts of Abuse** 3 ch  
An examination of the psychological and social dynamics of abuse, and the consequences of these dynamics for the ways in which survivors present themselves to members of helping professions, e.g., health care workers, employers, educators, lawyers, clergy, social workers, therapists, alcohol and drug workers. Review of the necessity for and characteristics of a ‘whole person’ approach to survivor assessment. Prerequisite: Six credit hours from FVI 2001, FVI 2002, FVI 2003 (or SOCI 1563) or permission of the instructor.

**FVI3003 Counselling Interventions in Response to Family Violence** 3 ch  
Overview of strategies essential to crisis counselling and other forms of counselling that are relevant to family violence. Topics include: the impact of violence on family members; methods of effective assessment and crisis intervention; homicide/suicide prevention; counselling orientation and models; individual, family and group approaches to counselling; ethical considerations; counselling children and teens; responding to ‘hidden victims’; and making appropriate referrals. The crisis counselling section will include a skill development component. Prerequisite: Six credit hours from FVI 2001, FVI 2002, FVI 2003 (or SOCI 1563) or permission of the instructor.

**FVI3004 Inter-disciplinary Responses and Obligations** 3 ch  
Identification of common signs and symptoms of abuse. Methods of assessment. Provision of a safe environment. Reporting, referring, and follow-up care. Topics include: techniques for specific situations (e.g., women, children, the elderly); conflict resolution; safety; requirements for use as evidence in justice system; responsibilities of professional workers; cognitive interviewing; audio and video taping of witnesses and survivors; liability; confidentiality. Prerequisite: Six credit hours from FVI 2001, FVI 2002, FVI 2003 (or SOCI 1563) or permission of the instructor.

**FVI3005 Family and Criminal Legal Systems** 3 ch  
An overview of: family violence legal issues pertaining to: (a) family law - e.g., custody; access; mediation; supervised visitation; requirements to report abuse; legal aid; peace bonds; police protection; enforcement of family court orders; separation and divorce; (b) the criminal justice system - e.g., implications of criminalization of abuse; role of police; mandatory charging; informing spouse about release of abuser; process through justice system of survivor; witness impact statements; role of probation
SECTION: FREDERICTON COURSES

OFFICER; PROBATION PERIOD. Prerequisite: Six credit hours from FVI 2001, FVI 2002, FVI 2003 (or SOCI 1563); or permission of the instructor.

FVI3006 Intervention Strategies and Programs for People who Batter (Cross-Listed: SOCI 3006) This course will examine the major theories related to violence in intimate relationships and explore the different intervention strategies and programs which have evolved from those theories. Credits cannot be obtained for both FVI 3006 and SOCI 3006. Prerequisite: 3 ch from any SOCI 1000-level course; or permission of the instructor.

FVI3007 Religion and Violence (O) (Cross-Listed: SOCI 3007) This course examines issues pertaining to violence in religious families and the role of faith communities (and their leaders) in responding to violence in the family context. It will consider relevant data, theories, and strategies for change. Normally taught online.

FVI4002 Multidisciplinary Approaches to Family Violence 3 ch Presents strategies which will assist professionals in coordinating their efforts to help survivors through creation of ‘whole person’ community approaches. Topics include: helping agencies’ diverse and overlapping mandates; referral processes; inter-agency communication; support and debriefing; team dynamics; community resources; empowerment of victims. This course is required for the FVI Certificate. Prerequisite: Six credit hours from FVI 2001, FVI 2002, FVI 2003 (or SOCI 1563); or permission of the instructor.

FVI4005 Individual Studies 3 ch An individualized study of a topic of interest to the student, in consultation with instructor/mentor and approval of the Director of the Muriel McQueen Ferguson Centre for Violence Research. Prerequisite: Six credit hours from FVI 2001, FVI 2002, FVI 2003 (or SOCI 1563); or permission of the instructor.

FILM See beginning of Section H for abbreviations, course numbers and coding.

FILM202 The Art of Film (Cross-Listed: MAAC 2022) 3 ch (3C) (W) Introduces students to the language of motion pictures and to critical tools for discussing and writing about the 7th art—the art of film. By studying how movies function aesthetically, and how they become meaningful to audiences, students will acquire critical and formal analytical skills that will both enhance their appreciation for cinema and serve them more broadly as consumers and/or producers of visual culture. Topics will include mise-en-scène, framing, image composition, photographic space, colour, editing, sound, and narrative structure.

FILM2909 International Film History (Cross-Listed: ENGL 2909) 3 ch (3C) (W) This course introduces students to major stages in the development of film as an international art. Topics include: Silent Cinema, German Expressionism, Soviet Montage, Classical Hollywood, Italian Neorealism and Modernism, French New Wave, Japanese New Wave, British New Wave, Australian New Wave, Experimental Cinema, Cinema Novo, New German Cinema, Post-Modern Cinema, Bollywood, the New Hollywood, American Independent Cinema, Dogme 95, and others. NOTE: Students who already have credit for ENGL 3194 cannot obtain credit for ENGL 2909 or FILM 2909.

FILM2998 Digital Film Production I (Cross-Listed: MAAC 2998) 3 ch (3C) An introduction to the fundamental concepts and procedures of visual and audio production, including the techniques and aesthetics of shooting, lighting and editing. This course is designed to familiarize students with the use of the creative and technical requirements of the camera, editing, and sound in making film. Prerequisite: FILM/ENGL 3999 or permission of the instructor.

FILM2999 Digital Film Production II (Cross-Listed: MAAC 2999) 3 ch (3C) This second course in the production sequence puts emphasis on applications of skills learned in MAAC 2998 by focusing on production of several short projects in various formats. Group work and analysis of student productions constitute the main course activities. Taught cooperatively with the New Brunswick Filmmakers’ Co-op. NOTE: Students who have received credit for MAAC/FILM 3998 may not take this course for credit.

FILM3086 Trauma and Seduction: Early German Cinema (Cross-Listed: CCS 3066, and MAAC 3066) Beginning with the earliest silent movies and concluding with Nazi Propaganda films, this course offers an introduction to a prolific and important era in German film history: the Weimar Republic and pre-WWII period, 1918-1939. Our discussions will situate the films within larger political and cultural discourses. Emphasis will be placed on such topics as the cinematic response to the trauma of WWI, German national identity, expressionism and modernity; the politics of gender and sexuality; the impact of sound on film aesthetics; the relationship between cinema and other media; the ethics of film production. Films to be studied include features by directors such as Lang, Lubitsch, Murnau, Pabst, Riefenstahl, Sauter, von Sternberg, and Wiene. Taught cooperatively with the New Brunswick Filmmakers’ Co-op. NOTE: Students who have taken WLCS 3066, or GER 3066 cannot obtain credit for FILM 3066.

FILM3072 (Re) Constructing National Identity: Contemporary 3 ch (3C) (W) German Cinema (A) (Cross-Listed: CCS 3072, and MAAC 3072) Studies the major accomplishments of East and West German cinema of the post-War period, as well as cinematic trends since German unification. We will consider questions of narrative, genre, and authorship, examine the relationship of the film to other media, and focus on the dynamic interaction between film history and social history. Films to be studied include features by prominent directors such as Wolf, Fassbinder, Wenders, von Trotta, Carow, Dorrie, and Tykwer. Students who have taken WLCS 3072, or GER 3072 cannot obtain credit for FILM 3072.

FILM3075 Framing Reality: Theory and Practice of 3 ch (3C) Documentary Film (Cross-Listed: MAAC 3075) This course surveys the history and aesthetics of non-fiction filmmaking from the birth of cinema to the digital age. It will examine epistemological and ethical questions raised by documentary’s encounter with reality and its attempt to present “the truth.” Films screened are drawn from an array of nations and range from the personal to the political as well as more experimental and avant-garde works. The course includes a film production component as students apply what they have learned in class by producing a short non-fiction film as a final project. This course is open to students who have completed at least 30 credit hours at the university level.

FILM3082 History of Canadian Cinema (Cross-Listed: CCS 3082 and MAAC 3082) 3 ch (3C) (W) Focuses on the first half-century of filmmaking in Canada and the nation’s long struggle to develop and sustain a functioning film industry in the shadow of Hollywood. Readings and screenings trace the history of the movies in Canada from the silent era to the 1970s. Issues raised may include Canadian-American relations, national and regional identities, tensions between art and entertainment, media and cultural policy, representation of race, class, gender, and relation of Canadian film to other media (TV, radio, video) and other arts (painting, music, literature) in Canada. Open to students who have completed 45 credit hours, or permission of the instructor. Students who have taken WLCS 3082 cannot attain credit for FILM 3082.

FILM3138 Creative Writing: Screenwriting for Short Formats 3 ch (LE) (Cross-Listed: ENGL 3138) This course guides writers through the basics of short format screenplay structures and introduces them to basic story, character, and dialogue principles. Students will be exposed to a wide range of short films in a variety of genres and forms so that they can explore the limits and possibilities of brief forms of cinematic storytelling.

FILM3186 Creative Writing: Feature Screenplay (Cross-Listed: ENGL 3186) 3 ch (LE) This intensive course guides writers through the basics of feature screenplay structure, character principles, archetypal storytelling, writing and rewriting strategies, and ‘the biz.’ Classes are a combination of lectures, discussion, and workshops. Prerequisites: FILM 3183, ENGL 3183, or equivalent writing experience with permission of the instructor.

FILM3204 Music and Cinema (Cross-Listed: MUS 3204) 3 ch A practical and theoretical examination of the role in music in cinematic narrative from the silent film to the 21st century. The course will examine the origins of the music-cinema relationship from the misnamed “silent film era”, through the development of synchronized sound-film systems and the use of music in a selection of genres including film-noir, musical, science fiction, romantic comedy and suspense films. Music video production processes will be explored including the use of narrative storytelling techniques, as well as animation, Claymation, multimedia and experimental methods of creating images to synchronize with existing soundtracks.

FILM3903 Film Theory (Cross-Listed: ENGL 3903) 3 ch (3C) (W) This course introduces students to the major debates in the field of film theory, including (but not limited to): Early Silent Film Theory, the Soviet Montage-Theorists, Russian Formalism and the Bakhtin School, the Historical Avant-gardes, French Auteur Theory and its Americanization, Third World Film and Theory, Genre and Authorship, Marxist film theory, Socialist Realism, Feminism in Film, Postmodernism, Film Theory, Postcolonial Film Theory, Race and Ethnicity in Cinema. NOTE: Students
who already have credit for ENGL 3193 cannot obtain credit for ENGL 3903 or FILM 3903.

FILM3907 Film Genre (O) (Cross-Listed: ENGL 3907) 3 ch (3C) [W]
The Film Genre course explores the history, iconography, and socio-cultural significance of one particular film genre by means of a number of examples. The specific focus of the course varies from year to year. Pre-requisite: ENGL 1000 (or equivalent) or permission of the instructor.

FILM3908 Zombies in Film (O) (Cross-Listed: ENGL 3908) 3 ch (3C) [W]
Zombie films make up one of the longest living sub-genres of horror through representations of zombies have evolved from exoticized monstrous figures from Haiti to cannibalistic brain eaters and eventually to infectious bodies carrying empires. This course will explore the evolution of zombies from studio-oriented slasher films (Lugosi to B-movies featuring fighting ninjas and murdering cheerleaders through to modern film zombies who look uncannily like the unconscious bored populace and/or become loving family pets. Zombies are never simply undead. They always reflect something about changing lives and fears. These films also permit us to explore the murky spaces between high and low culture, the history and development of horror films as a genre, and the aesthetics of fear.

FILM3916 Canadian Film Since 1967 (O) (Cross-Listed: ENGL3916) 3 ch (3C) [W]
Through the study of various representatives Canadian filmmakers and prevalent genres, this course will explore the popular, regionalism, commercialism, and independent filmmaking play in defining national identity about Canadian cinema and film audiences. This course concurrently traces developments in Canadian film production, policy, funding, distribution, and use since the creation of Telefilm (formerly the CFDC) and how these funding and cultural policies have affected and responded to the central themes and issues facing the Canadian filmmakers and audiences. NOTE: Students who already have credit for ENGL 3965 cannot obtain credit for FILM 3916 and ENGL 3916. Pre-requisite: ENGL 1000 (or equivalent) or permission of the instructor.

FILM3917 National Cinemas (O) (Cross-Listed: ENGL3917) 3 ch (3C) [W]
The National Cinemas course explores significant historical periods, movements, styles, film, theories, and directors, and topics in the development of particular national and/or transnational cinemas. The specific focus of the course varies from year to year. Pre-requisite: ENGL 1000 (or equivalent) or permission of the instructor.

FILM3918 The French New Wave (O) 3 ch (3C) [WS]
One of the most exciting movements in cinema, the French New Wave radically altered film, influencing and informing new kinds of cinema around the world and changing how we talk about and study films. The films of filmmakers like Francois Truffaut, Claude Chabrol, and Jean-Luc Godard continue to inspire contemporary filmmakers and critics. Through watching and analyzing their first films, reading their writings in Cahiers du Cinema, and exploring how film historians interpret this period now, we will attempt to understand the artistic, social, economic, and historical forces that shaped the film movement and filmmaking in the decades to follow. Pre-requisites: ENGL 1000 (or equivalent) or permission of the instructor.

FILM3999 Editing and Post Production (A) (Cross-Listed: MAAC 3999) 3 ch (3CWS) (LE)
This course introduces students to the processes and technical aspects of video production. Topics include: videography fundamentals, digital camera techniques, location sound recording, lighting for video, scriptwriting for documentary and dramatic productions, post-production picture editing and finishing. Various scriptwriting, shooting and editing exercises are done in a small group environment. Taught cooperatively with the New Brunswick Filmmakers Co-op. Note: Students who already have credit for ENGL 3999 “Film and Video Production” cannot obtain credit for FILM 3999.

FILM4001 Advanced Production (Cross-Listed: MAAC 4001) 3 ch (3CWS) (LE)
Students produce more complex films, developing a project from beginning to end, working on each other's projects, and gaining hands-on experience in a variety of skilled positions on a film's crew. Prerequisites: FILM 2999, or permission of the instructor.

FINE ARTS
See beginning of Section H for abbreviations, course numbers and coding.

FNA12703 Visual Arts I (Studio) 3 ch [W]
Same as ED 3218. Studio Practicum in one or more visual arts.

FNA13703 The Power of Images (Cross-Listed: ED 5154) 3 ch [W]
Same as ED 5154. The integral relationship between visual images and other areas of study. Analyses and interpretations of a variety of images from pop culture, western and non-western art, children's books, film, video, family photos, and advertisements, as these influence knowledge and understanding of oneself and others. Prerequisites: previous course in visual art, art education, or media.

FNA13704 Readings in Contemporary Art Theory 3 ch
A seminar-based approach to the in-depth consideration of contemporary art theory and practise. Individual research projects to include written, oral and visual presentations.

FORESTRY
A minimum grade of C is required for prerequisite courses.

FOR1001 Introduction to Forestry 4 ch (3C 3L)
This course provides students with an overview of field forestry skills through collection and analysis of basic stand-level inventory data. Emphasis is on developing basic mensuration and computation skills through a series of laboratory exercises and solving practical problems. Students learn how to quantify stand structure and to use basic quantitative information to make forestry decisions.

FOR1285 Introduction to GIS 3 ch
An online course, covering basic and advanced GIS functionality using ArcView 3.x across a range of forestry applications. Emphasizes forest inventory data and its use in characterizing timber and non-timber values of forests.

FOR2006 Management of Natural Systems 4 ch (3C 3L)
Introduces management design issues and practices for a variety of natural systems so that students can effectively work across related disciplines. Objectives: (a) quantitatively design and evaluate strategies aimed at producing a desired set of outcomes for natural systems, including forests, wildlife populations, and hydrological networks; and (b) communicate technical information clearly and succinctly in written format. Prerequisite: ENR 1001. Co-requisite: ENR2004 or permission of the instructor.

FOR2113 Introduction to Forest Wildlife Ecology 3 ch (3C)
Emphasizes interdependence of forest organisms and the terrestrial and aquatic components of their environment, especially in the context of industrial forestry. Introduces an ecological approach to impacts of harvesting on forest ecosystems and the major groups of wildlife inhabiting forests, including species at risk. Covers identification and habitat requirements of selected wildlife species, and applicable legislation.

FOR2205 Quantitative Methods (O) 3 ch (2C 3L)
Applications in collection, organization, and analysis of basic forestry, biological and other environment-related data. Emphasis on the use of statistics as a problem-solving and decision-making tool through basic numerical and visual statistical techniques, iterative computer graphics, and programming.

FOR2281 GIS with Applications in Forestry and Environmental Management 3 ch (2L)
This course introduces students to core GIS terminology, tools and workflows using practical examples before proceeding to more advanced spatial analysis techniques. Material is presented in an online platform, with lab-based tutorial sessions and assumes no prior GIS knowledge.

FOR2286 GIS in Forestry III 2 ch
For students who wish to extend their GIS expertise with special analytical possibilities afforded by rasters using the latest ArcGIS software. This web-based course introduces the Spatial Analyst extension, and the ModelBuilder, highlighting applications in forestry involving reclassification, overlay, and distance and connectivity functions. Prerequisite: FOR 2281.

FOR2345 Meteorology and Hydrology (A) 4 ch (3C 3L)
Introduces basic aspects of meteorology, hydrometeorology, and hydrology at global, regional and local scales. Emphasis is given to soil-vegetation-atmosphere interactions. Topics include energy balances, thermal, wind, and precipitation regimes, and phenomena associated with the hydrological cycle.
FOR2416  Structure and Development of Woody Plants  3 ch (2C 3L)
Development of woody-plant structure from embryo to maturity. Topics include morphogenesis and basic anatomy, development of crown architecture, interrelationships between crown and stem development, wood and elements of wood quality, mechanisms of asexual and sexual reproduction. For each topic, differences among major genera will be considered. Prerequisite: FOR 2425.

FOR2425  Autecology of Forest Vegetation  5 ch (3C 3L)
Recognition and identification of species, environmental requirements, and persistence mechanisms of various life-forms of forest vegetation; interpretation of silvical characteristics of tree species; analysis of stands of trees in relation to general site conditions and relative stage of development; and evaluation of interrelationships among components of forest vegetation over time, including likely responses to perturbation or to interventions of various kinds. Prerequisite: A basic university course in Biology or Botany; Co-requisite: FOR 2435.

FOR2432  Forestry Inventory and Growth  4 ch (3C 3L)
This course focuses on the design and analysis of forest-level inventories. Concepts of stratification and multistage sampling are presented. Approaches to modelling and predicting stand growth and inventory updates are explored.

FOR2435  Fundamentals of Forest Tree Physiology and Genetics  3 ch (2C 3L)
The course will deal with fundamentals of forest tree physiology and genetics, especially basic physiological processes and their genetic environmental control underlying growth, development, functioning, acclimation and adaptation of forest trees. The laboratory sessions will focus on reaffirming selected concepts and material taught in the class through practical experiments and demonstrations.

FOR2505  Soils for Plant Growth  4 ch (2C 3L)
Students examine relationships between soils and plants, and related roles of water and nutrients. Factors that restrict root growth, and processes that influence soil development are revealed through field exercises and laboratory work. Effects of natural and anthropogenic disturbances on forest soils and subsequent plant responses are emphasized.

FOR2703  Forest Operations  3 ch (2C 3L)
This course introduces the major tree harvesting concepts in eastern Canada to students. Emphasis is on the felling, off road transport, and processing functions. A variety of machine types and functions are introduced and students explore the relationship between productivity and equipment costing and how these activities impact unit cost over time.

FOR2803  Wood Technology  3 ch (2C 3L)
Molecular, cell wall and anatomical structure of wood. Relative density, dimensional changes and moisture effects. Measuring industrial wood products (for example pulpwood, sawlogs, chips, pulp and lumber), Wood biodeterioration.

FOR2946  Bioethics, Emotional Intelligence, and the Nature of Spirituality  3 ch (3C)
This course is aimed at bringing together the three notions cited in the title with respect to actions taken and decisions made as life interacts among individuals and groups in today’s world. Emphasis will be placed primarily on the disciplines of Forestry and Biology. The course will include: a) an introduction to principles and systems of ethics and what light these cast on human behavior; b) emotional intelligence and its usefulness in understanding basic human interactions; and c) spirituality in terms of a common element in human nature. With this background, consideration will then be given to dynamics of decision-making, individually as well as collectively, concepts and assumptions about the environment, the rights of nature, conflicting values about nature implicit in anthropocentrism and biocentrism, and the need for interdisciplinary dialogue in the formulation of policy, laws, and regulations.

FOR3000  Business Management and Human Factors in the Forestry and Environmental Sectors  3ch (3C)
This course provides students with basic skills and abilities needed to effectively manage the business and human aspects of environmental and forest management. Students will acquire basic abilities to budget and monitor projects, conduct financial analyses to evaluate management alternatives, evaluate financial statements, promote motivation, and facilitate effective communication and teamwork.

FOR3005  Silviculture and Stand Intervention Design  5 ch (3C 6L)
Takes a design-based approach to silviculture. Students develop stand intervention plans for the main stages of stand development integrating the biology of growing trees, engineering of conducting operations, and economics of costing operations.

FOR3006  Forest Management  4 ch (3C 6L)
Upon successful completion of this course, students will be able to design, evaluate, and explain management strategies for forest management problems of moderate complexity aimed at satisfying multiple social, economic, and environmental objectives. Students will employ forest estate analytical software and will prepare professional technical reports summarizing their analysis and results. Prerequisites: FOR2006, FOR3005, or permission of instructor.

FOR3101  Forest Economics  3 ch (3C)
This course applies economic tools to help make informed forestry decisions that will most effectively meet private and social goals. Prerequisites: Some experience with regression analysis.

FOR3303  Photo-Interpretation, Photogrammetry and Remote Sensing in Forestry  3 ch (3L)
Provide interpretation of aerial photographs of forested areas for stand and site characterization. Remote sensing products other than aerial photographs, such as digital optical images, thermal infrared, and radar images will be introduced. Basics in digital image processing will be covered to address the conversion of remote sensing images to GIS layers. It is a self-paced, web-based course without scheduled lectures. UNB campus students do labs during scheduled sessions. Labs are self-paced and web-based for Open Access Learning Program students. Le cours est aussi disponible en français. NOTE: Students cannot receive credit for both FOR 3305 and FOR 3313.

FOR3313  Digital Image Process in Remote Sensing  3 ch
To initiate students to the processing of digital images as acquired by Earth’s Observation Satellites like LANDSAT-TM, SPOT-HRV and NOAA-AVHRR. Course topics include characteristics of digital images, image display, pre-classification processing, image correction, image classification, and spatial image processing and analysis. The course is fully web-based. (The course does not deal with photo-interpretation.) Le cours est aussi disponible en français. Este curso tambien est disponible en español. NOTE: Students cannot receive credit for both FOR 3313 and FOR 3303.

FOR3425  Forest Tree Genetics and Genomics (A)  3 ch (3C)
Principles of variation and inheritance in forest trees will be introduced. Then, various genetics, genomics, biotechnology and breeding concepts and principles and their applications in tree biology, tree improvement, silviculture, conservation of genetic resources and sustainable forest management, will be discussed. The topics will include: basic principles of quantitative, molecular, population and conservation genetics; genetic variation, differentiation and evolution of populations; reproductive biology; ecophysiological genetics of adaptation, tree improvement concepts, methods and programs; silvicultural practices and genetic resource conservation; discovery and functional analysis of genes; organization and mapping of genomes; marker-assisted selection and molecular breeding; and genetic engineering of forest trees. Prerequisite: BIOL 2053 or permission of instructor.

FOR3445  Ecology of Populations and Communities  4 ch (3C 3L)
To understand and link processes acting on individuals, populations, and communities in space and time. To predict the response of individuals, populations, and communities to disturbance and to understand the implications of such responses for management of populations, communities, and ecosystems. Prerequisites: FOR 2113 or permission of the instructor.

FOR3456  Forest Watershed and Forest Fire Management  3 ch (2C 3L)
Emphasizes the principles of management of watersheds and fire at the stand and landscape level. Influences of climate, topography/terrain, and stand and fuel types are covered. Concepts of watershed conservation are introduced as well as principles and models dealing with water retention and flow, and carbon and nutrient cycling in primary forest watersheds. Fire management concepts deal with the Fire Weather Index system, the Fire Behaviour Prediction system, fire ecology, and fire management strategies, tactics and operations. Prerequisite: FOR 3445 or permission of instructor.

FOR3457  Forest Watershed and Water Quality Management  3 ch (2C 3L)
Emphasizes the principles of management of watersheds and fire at the stand and landscape level. Influences of climate, topography/terrain, and stand and fuel types are covered. Concepts of watershed conservation are introduced as well as principles and models dealing with water retention and flow, and carbon and nutrient cycling in primary forest watersheds. The course provides lectures and laboratory exercises dealing with chemical, biochemical, and biological water quality enhancement and pollution issues.
FOR3885 Non-Timber Forest Products 3 ch (3C)
Provides an overview of the diversity of non-timber forest products (NTFPs) in Canada and North America. Introduces major classes of NTFPs including medicinal plants; maple and birch products; mushrooms, fiddleheads and other edible plants; and essential oils. Introduces the science behind the production and commercial use of selected NTFP examples. Discusses issues of stewardship, sustainability and certification of non-timber forest products, emphasizing management of forest lands for multiple products and values.

FOR4013 Basic Woodlot Management (O) 3 ch (3C)
Introduction to basic woodlot management, covering such topics as planning, harvesting, silviculture, Christmas trees, maple products, wildlife and recreation, economics, owner characteristics and organization, government programs and policies and industry relations as they relate to small woodlots. Prerequisite: Open to 4th- and 5th-year Faculty of Forestry and Environmental Management students, or permission of instructor.

FOR4020 Management Practicum 8 ch (1C 3L)
Practical exercise in forest landscape management, designed to provide an opportunity to integrate skills and knowledge gained throughout the program. Working with a client and/or the public, students will develop goals and objectives, design and gather inventory data (if required), then develop an integrated landscape management plan at the strategic, tactical and operational levels. Learning modules will be provided specific to the needs of the project. Additional topics include project management, conflict resolution, professional practice and forestry associations. The project requires completion of a group report and presentation. Prerequisites: FOR 2281, FOR 3005, FOR 3006, FOR 3456. Co-requisite: FOR 4096.

FOR4096 Forest Landscape Design and Management 5 ch (3C 3L)
Upon successful completion of this course, students will be able to design and evaluate strategic forest management strategies aimed at meeting a variety of environmental, social, and economic forest values. Strategy design will require students to combine skill in use of state-of-the-art forest estate planning systems with an understanding of natural disturbance dynamics, forest certification, and forest land zoning concepts. The course builds on student abilities acquired in prerequisites courses FOR2006 and FOR3006. Prerequisites: FOR 2006 and FOR 3006, or permission of instructor.

FOR4206 Forest Biometry II (A) 3 ch (2C 2L)
Additional topics in data collection and analysis, including multiple linear regression, analysis of covariance, basic principles of experimental design, analysis of factorial arrangements of treatments, analysis for some special-purpose designs. Prerequisite: STAT 2253, or permission of instructor.

FOR4303 Optical, Thermal Infrared and Radar Remote Sensing 3 ch (3C)
An introduction to remote sensing methodologies for observing the Earth's surface from different vantage points (from the ground, from airplanes, and from space). The course is fully web-based. It allows for a quantitative understanding of optical, thermal infrared, and radar images as acquired by Earth's observation satellites like LANDSAT-TM, SPOT-HRV, NOAA-AVHRR and RADARSAT. Remote sensing applications are taken from the fields of forestry, agriculture, geology, oceanography, hydrology, and environmental studies. It does not deal with photo-interpretation. The course is recommended for students intending to do a forestry senior thesis in remote sensing. Le cours est aussi disponible en français.

FOR4304 Image Processing Methods for Radarsat-2 and Polarimetric Images 3 ch
Introduction to image processing methods for RADARSAT-2 images (with a particular reference to polarimetric images). The course is fully web-based. It allows the quantitative understanding of the nature of radar images and polarimetric images and how they can be processed to extract relevant information. It includes applications in forestry, agriculture, geology, oceanography, hydrology, and environmental studies. Le cours est aussi disponible en français.

FOR4412 Forest Nursery Practices (A) 3 ch
Students become familiar with the full range of topics related to seedling production for forestry. Students learn greenhouse techniques by growing seedlings from seed.

FOR4425 Conservation Genetics (A) 3 ch (3C)
This class will examine the application of genetic principles, concepts and biotechnologies in conservation, sustainable management and restoration of natural and managed resources. The topics will include: concepts of genetic resources, genetic biodiversity and other population genetic parameters, demography, conservation, sustainable management, ecological restoration, and minimum viable population size; indicators for population viability; exploration, evaluation, utilization, and conservation of genetic resources; genetic consequences of habitat fragmentation, resource management practices, domestication, climate change, and natural disturbance; and challenges, opportunities and strategies for conservation and sustainable management of genetic resources. Prerequisite: BIOL 2053 or BIOL 2143 or permission of instructor.

FOR4437 Methods in Tree Physiology Research (A) 3 ch (3L)
Introduction to experimental physiology. Hands-on training in use of equipment including u/v specrophotometry, tissue culture and general procedures. Prerequisite for students intending to do FOR 4992/5991 in physiology Prerequisites: BIOL 1012, BIOL 1017, FOR 2420, 2435, or permission of instructor.

FOR4466 Advanced Studies in Forest Plants and Their Environment 4 ch (3C 3L)
The course addresses ecophysiological relationships within forest stands (energy capture, respiration, photosynthetic allocation, transportation, etc.) integrated to the stand level. Specialized topics include tree nutrition (nutrient deficiencies, diagnosis, meditative action), ecotoxicology (role of heavy metals) and reactions of trees to air pollutants (SO2, oxone) and climate change.

FOR4506 Advanced Studies in Forest Soils and Hydrology 4 ch (3C 3L)
Advanced studies addressing impacts of forest management of forest soils and streams. Topics include sustainability of soil quality, site preparation effects on soil moisture, nutrient supply, soil temperature, water balance, snowmelt, water quality, role of riparian buffer zones.

FOR4545 Biodiversity and Ecosystem Management 4 ch (3C 3L)
To learn concepts and measurements about biophysical landscape dynamics, strategies for the maintenance of biodiversity, and ecosystem based forest management. To use contemporary examples of management of ecosystems. Prerequisite: Prior ecology course.

FOR4578 Forest Hydrology and Aquatic Habitats 3 ch (3L)
This course helps students to develop analytical skills for solving hydrological problems under varying hydro thermal conditions pertaining to best forest management practices and operations. Topics include hydrometric data generation, hydrograph analyses, and the modelling of peak flow of extreme events. The course also introduces tools to assess land-use impacts on slopes, soils, streams and lakes, to protect water quality and aquatic habitats.

FOR4586 Fire Management (A) 3 ch (2C 2L)
Topics covered include fuels and fire behavior, fire danger rating, prevention, prediction, detection, suppression, and overall planning and fire management systems.

FOR4602 Ecology of Forest Insects (A) 3 ch (3C)
Evaluates factors influencing insects in forest communities with emphasis on predator-prey, parasitoid-host and insect-plant interactions as well as natural selection, physiological constraints, behaviour and population dynamics.

FOR4615 Insect Management 3 ch (2C 3L)
Taxonomy, importance and ecology of major insect families; damage assessments, insect population dynamics and control strategies and tactics.

FOR4625 Integrated Management of Insects and Fungi 4 ch (3C 3L)
Presents a common approach to management of insects and fungi and their interactions at the stand/population and landscape levels. Major concepts to be discussed are: monitoring, pest management and risk; damage prediction based on organism population dynamics; management strategies and tactics including acquisition and deployment of resources, control methods and cost benefit analyses. Taxonomy of major families of insects and diseases will be covered in laboratory sessions. Prerequisites: FOR 3445, FOR 3455, and FOR 3006, or permission of instructor.
FOR4655  Wildlife Investigational Techniques (A) 3 ch (3C/L)
Designed to introduce techniques available for conducting investigations in support of management objectives. Labs will provide hands-on experience from radio telemetry to necropy techniques. Prerequisites: Substantial completion of Year 3, BSCF, or permission of instructor.

FOR4723  Ornithology 5 ch (3C 3) W
Studies birds; natural selection, morphological adaptations, migration, behaviour, and reproduction in an ecological way. Prerequisite: BIOL 2093, or BIOL 2063, 2068, or permission of the instructor. This course is cross-listed as BIOL 4723. Credit may not be obtained for both FOR 4723 and BIOL 4723.

FOR4721  Urban Land Use Policy, Planning and Processes 3 ch (3C)
Examines the administrative, political, and decision-making structure of urban communities. Considers how these factors affect the allocation of land and resources among the built and natural environments. Examines the processes used to enhance urban green spaces and forest landscapes.

FOR4785  Urban Forest Conservation and Management 4 ch (3C 3L)
Examines the planning and management of trees and forests associated with urban areas with a focus on protection and enhancement. Includes tree/forest resource inventories, techniques to determine the values of urban residents concerning trees and forests, assessment of the benefits and procedures for urban watershed protection, and techniques to maintain or increase the health of trees and forests in urban green spaces.

FOR4910  Directed Studies in Forestry 6 ch
With approval of the Faculty, a student may carry on directed studies of specific problems or areas in forestry.

FOR4911  Directed Studies in Forestry 4 ch
With approval of the Faculty, a student may carry on directed studies of specific problems or areas in forestry.

FOR4973  Forestry Field Camp II 2 ch (8D)
An intensive 6-day series of field exercises, starting before the Fall Term, involving low student/faculty ratios, and designed to improve integrative and quantitative-forecasting skills. Evening sessions provide overviews of the scope of forest ecosystems, management, and research, and in relation to the specific field-camp situation. Students are charged for food and lodging and part of travel costs. Prerequisites: Substantial completion of Years 1-3 core.

FOR4912  Directed Studies in Forestry 3-5 ch
With approval of the Faculty, a student may carry on directed studies of specific problems or areas in forestry. Number of credit hours will be determined by the Faculty and based on the nature, duration, and complexity of the undertaking.

FOR4991  Honours Research Project 6 ch [W]
Forestry honours students must complete a research project that is approved by the Faculty and supervised by a Faculty member. This course involves submitting a detailed project report and an oral defense in a seminar-style presentation. Students should consult with a faculty advisor prior to the end of third year to discuss project requirements and potential topics. NOTE: Minimum CGPA for acceptance is 3.0

FOR4994  Senior Technical Report 3 ch
A technical description and analysis of a study, employment project, or literature review conducted under the guidance of a faculty member. Available only to students in their fourth year or by permission of the instructor.

FOR5281  Introduction to GIS for Forestry & Environmental Management 3 ch
The course introduces GIS via the industry-standard ArcGIS suite and emphasizes learning GIS through applied environmental management scenarios; specifically, applications in land base inventory and mapping using data for the UNB Woodlot.

For the introductory module provides basic GIS concepts and ArcGIS using general examples. The second (primary) learning module consists of two lessons: Environmental Asset Inventory and Environmental Asset Mapping. The Environmental Asset Inventory lesson introduces ArcGIS application in inventory, including creating and using geodatabases to store forest inventory, road & stream data and other managed assets. Students are exposed to the array of digital data typically found in forest inventories and transportation networks and how they are stored, accessed, displayed, and manipulated using GIS. The Environmental Asset Mapping lesson introduces the power of ArcGIS in composing maps commonly used in environmental management, including map layer, thematic maps, and application maps. The two lessons also expose you to basic geoprocessing techniques, data editing and updating and map overlay.

FOR5284  LiDAR for Forestry and Environmental Management 3 ch
This course provides an introduction to LiDAR technology, including sensor types, platforms and acquisition parameters before springing in to the use of airborne laser scanning (ALS) data for environmental management and planning. Students will use ArcGIS and LAStools software to explore 3D point cloud data and generate useful derivative surfaces and analysis workflows including point cloud measurement & reclassification, DEM and DSM creation, point cloud stratification for landscape modelling and habitat suitability, trail planning, flooding potential, etc. Prerequisite: FOR 2281 or FOR 5281 or permission of the instructor.

FOR5282  Advanced GIS for Forestry & Environmental Management 3 ch
The course teaches advanced GIS via the industry-standard ArcGIS suite and emphasizes learning GIS through applied environmental management scenarios; specifically, applications in land base inventory and mapping using data for the UNB Woodlot.

The introductory module provides an accelerated refresher on core assumed GIS knowledge. The second (primary) learning module consists of three lessons: Forest Inventory Analysis, Landscape Analysis, and Non-Timber Forest Values. The lessons are not presented as an exhaustive treatment of their topics, but simply ones that present some obvious applications in forestry, in logical groupings. Forest Inventory Analysis introduces forest reclassifying and characterizing concepts and broadly applicable geoprocessing methods. Landscape Analysis and Non-Timber Forest Values, on the other hand, are theme-based lessons that employ the array of spatial analysis techniques introduced in Forest Inventory Analysis. Prerequisite: FOR 2281 or FOR 5281 or permission of the instructor.

FOR5982  Forestry in Atlantic Canada (A) 2 ch (3C)
This course is designed for students new to Atlantic Canada. The course provides an overview of forest history, plant distribution, forest utilization, forest conservation, and current forest management issues in Atlantic Canada. Guest lectures, small group discussions, and field tours will be used. Prerequisite: This course is reserved for 3+1+1 forestry students, or by permission of instructor.

FOR5983  International Forest Studies 3 ch
This course focuses on the biophysical, historical, social and economic factors influencing forest management in a region outside of Canada. A 10 to 14-day field trip to the region is required. Prominent forestry professionals from across Canada will join with the students. Each year a new region is selected. Students will be charged for travel costs associated with this course. Limited enrolment.

**FRENCH**

Students taking a French course at UNB for the first time must consult the Department of French. Please see “General Information” in Section G - FRENCH of this Calendar.

NOTE: See beginning of Section H for abbreviations, course numbers and coding.

FR1014  Français Fondamental I 3 cr (3C)
Développement des habiletés langagières axé sur l’emploi du vocabulaire et la construction des phrases. Exercices oraux et écrits. Destiné aux étudiant.e.s n’ayant pas suivi un cours de français cadre après la dixième année.

FR1014  Basic French I 3 ch (3C)
Development of language skills, use of vocabulary and sentence structure. Speaking and writing practice. For students who have not taken French beyond grade 10 (Core). NOTE: Not open to students educated in French, students who have participated in in immersion programs, and students who have completed grade 12 (Core) French. May not be taken for credit by students who have successfully completed any other courses offered by the Department of French.

FR1015  Français fondamental II 3 cr (3C)
Suite du FR 1014. Destiné aux étudiant.e.s n’ayant pas suivi un cours de français cadre après la dixième année. Préalable: FR 1014.

FR1015  Basic French II 3 ch (3C)
Continuation of FR 1014. Not open to students educated in French, students who have participated in immersion programs or students who have completed grade 12 (Core) French. Note: May not be taken for credit by students who have successfully completed any courses offered by the Department of French other than FR 1014. Prerequisites: FR 1014.
FR1034 Communication orale et écrite I 3 cr (3C)
Développement des habiletés d'écoute, d'expression orale ainsi que des stratégies de lecture et d'écriture. L'accent est placé sur la communication orale. Révision de la grammaire. Cours pour finissant.e.s du programme cadre: Fermé aux francophones et aux étudiant.e.s ayant participé à un programme d'immersion en milieu scolaire.

FR1034 Oral and Written Communication I 3 ch (3C)
Develops language proficiency in all four skills: listening, speaking, reading and writing. Emphasis is on oral communication. Review of selected grammatical points. Designed for students who have completed high school French. Not open to Francophones or to students who have participated in immersion programs in school. NOTE: May not be taken for credit by students who have successfully completed any courses offered by the Department of French other than FR 1014 or FR 1015.

FR1044 Communication orale et écrite II 3 cr (3C)
Approfondissement des notions grammaticales de base. Préalable: FR 1034 ou l'équivalent.

FR1044 Oral and Written Communication II 3 ch (3C)
Emphasis on the reinforcement of basic grammatical concepts. NOTE: May not be taken for credit by students, who have successfully completed any courses offered by the Department of French other than FR 1014, FR 105, FR 1034. Prerequisite: FR1034 or equivalent.

FR1124 Aspects du monde francophone 3 cr (3C)
Exploration du monde francophone et de ses contextes culturels à travers une série d'exercices de lecture, d'écriture et de discussion. Travaux pratiques écrits. Réservé aux étudiant.e.s scolarisé.e.s en français.

FR1124 Aspects of the Francophone World 3 ch (3C)
Aims to explore the Francophone world and its cultural contexts through a series of oral and written exercises. Reserved for students educated in French. Francophone students and students educated in French take FR2154 when FR1124 is not offered.

FR1144 Cours pour francophones II 3 cr (3C)
Amélioration de l'expression écrite, apprentissage de règles et sensibilisation aux principales difficultés de la langue. Étude de textes choisis, exercices d'apprentissage et de rédaction. Réservé aux étudiant.e.s scolarisé.e.s en français.

FR1144 Course for French Speakers II 3 ch (3C)
Aims at improving the student's command of written French, and at imparting a systematic knowledge of the rules and main difficulties of the language. Study of selected texts; written exercises and composition. Reserved for students whose schooling was in French.

FR1184 Langue et littérature I 3 cr (3C)
Révision de grammaire et examen de divers styles d'écriture visant l'apprentissage de méthodes efficaces de rédaction. Initiation à la littérature d'expression française et aux genres littéraires. Normalement réservé aux diplômé.e.s de programmes d'immersion.

FR1184 Language and Literature I 3 ch (3C)
Review of grammar and study of various writing styles for the learning of efficient writing techniques. Introduction to Literature in French and literary genres. NOTE: Normally for graduates of French Immersion. May not be taken for credit by students who have successfully completed FR 1124, FR 1194 or FR 2154.

FR1194 Langue et littérature II 3 cr (3C)

FR1194 Language and Literature II 3 ch (3C)
Continuation of FR 1184. NOTE: May not be taken for credit by students who have successfully completed FR 1124 ou FR 2154. Prerequisites: FR 1184.

FR2034 Communication orale et écrite III 3 cr (3C)
Développement des habiletés d'écoute et d'expression verbales spécifiques à la vie quotidienne et au monde du travail. Perfectionnement des stratégies de lecture et d'écriture. Révision de la grammaire. Enrichissement du vocabulaire. Fermé aux étudiant.e.s scolarisé.e.s en français et aux étudiant.e.s ayant participé à un programme d'immersion en milieu scolaire.

FR2034 Oral and Written Communication III 3 ch (3C)
Emphasizes the development of listening and speaking skills needed for social and work situations. Reinforcement of reading and writing strategies.

FR2054 Communication orale et écrite IV 3 cr (3C)
Approfondissement des notions grammaticales et des stratégies d'écriture. Préalable: FR 2034 ou l'équivalent.

FR2054 Oral and Written Communication IV 3 ch (3C)
Emphasis on the reinforcement of grammatical concepts and the development of writing strategies. NOTE: May not be taken for credit by students who have successfully completed FR 1124, FR 1194, FR 2054 or FR 2154. Prerequisites: FR 2034 or equivalent.

FR2154 Lecture et écriture 3 cr (3C)
Analyse approfondie d'aspects grammaticaux et stylistiques; enrichissement du vocabulaire et sensibilisation aux registres; exercices de rédaction. Préalable: FR 1194.

FR2154 French Reading and Writing 3 ch (3C)
Extenive analysis of grammatical and stylistic aspects of French; vocabulary enrichment and critical study of various language registers; writing practice. Prerequisites: FR 1194 or equivalent.

FR2164 Initiation à la littérature française 3 cr (3C)
Survol d'auteurs importants de la littérature française. Examen plus approfondi de textes choisis. Apprentissage de l'explication de texte et de la dissertation.

FR2164 Introduction to French Literature 3 ch (3C)
Survey of major authors in French literature. In-depth study of selected texts. Introduction to textual analysis and essay writing.

FR2174 Le français au XXe siècle 3 cr (3C)
Description du français contemporain. Français standard et variantes régionales, mots et tournures à la mode, expressions idiomatiques. On abordera les principales difficultés du français.

FR2174 French in the 21st Century 3 ch (3C)
A description of contemporary French. Standard French and regional variants, trendy expressions, idiomatic expressions. Discussion of common difficulties of the French language

FR2184 Cultures francophones du Canada 3 cr (3C)

FR2184 Francophone Cultures of Canada 3 ch (3C)
Multidisciplinary study of the French-speaking cultures of Canada: history, politics, literature, cinema and recent events. Historical survey of French presence in North America. Consideration of the distinct character of Quebec and the important minority regions of francophone Canada (Acadie, Ontario, Western Canada). Reflection on the stakes of language rights, multiculturalism and globalization. Intended primarily for graduates of French Immersion programs and for students schooled in French.

FR3034 Perfectionnement de l'expression orale I 3 cr (3C)
Développement de l'expression orale et de la compréhension de la langue par l'écoute d'enregistrements, notamment de bulletins radiophoniques d'information, et débats sur des sujets d'actualité. Fermé aux étudiant.e.s scolarisé.e.s en français et aux étudiant.e.s ayant participé à un programme d'immersion en milieu scolaire.

FR3034 Advanced Oral French I 3 ch (3C)
Develops oral expression by discussion of topical subjects and oral comprehension through recordings, including broadcasts. Not open to Francophones and, normally, not open to students who have participated in immersion programs in school.

FR3044 Grammaire et stylistique - niveau avancé 3 cr (3C)
Étude de structures grammaticales et de leurs applications stylistiques.

FR3044 Advanced Grammar and Stylistics 3 ch (3C)
Study of advanced grammatical structures and their stylistic applications.

SECTION H: FREDERICTON COURSES

Review of grammatical points. Vocabulary development and enrichment. NOTE: Not open to Francophones and graduates of French Immersion. May not be taken for credit by students who have successfully completed FR 1124, FR 1194, FR 1194, FR 2054 or FR 2154.

FR4004 Communication orale et écrite IV 3 cr (3C)
Approfondissement des notions grammaticales et des stratégies d'écriture. Préalable: FR 2034 ou l'équivalent.

FR4004 Oral and Written Communication IV 3 ch (3C)
Emphasis on the reinforcement of grammatical concepts and the development of writing strategies. NOTE: May not be taken for credit by students who have successfully completed FR 1124, FR 1194, FR 2054, or FR 2154. Prerequisites: FR 2034 or equivalent.

FR4114 Introduction to French Language 3 ch (3C)
Survey of major authors in French literature. In-depth study of selected texts. Introduction to textual analysis and essay writing.

FR4114 Le français au XXe siècle 3 cr (3C)
Description du français contemporain. Français standard et variantes régionales, mots et tournures à la mode, expressions idiomatiques. On abordera les principales difficultés du français.

FR4174 French in the 21st Century 3 cr (3C)
SECTION H: FREDERICTON COURSES

FR3054 Rédaction I 3 cr (3C)
Fournit aux étudiant.e.s les outils permettant de s’exprimer par écrit dans un français correspondant à leur niveau.

FR3054 French Composition I 3 ch (3C)
Aims at giving students the tools to express themselves in written French at a level appropriate to their standing.

FR3064 Français langue des affaires 3 cr (3C)

FR3064 Business French 3 ch (3C)
Principles of communication and writing in the workplace. Emphasis is on the acquisition of terminology and language structures specific to commercial, banking and business contexts. Prerequisites: FR 2054 or FR 2154.

FR3074 Advanced French Reading (A) 3 ch (3C)
This course helps students improve their reading skills in French through the study of literary and scholarly short texts.

FR3074 Lecture avancée du français (A) 3 cr (3C)
Ce cours aide les étudiants à accroître leurs aptitudes à la lecture en français à travers l’étude de courts textes littéraires et savants.

FR3204 Stylistique comparée (français/anglais) 3 cr (3C)
Mise en opposition et analyse de divers aspects de chaque langue. Dégager les problèmes précis que pose la transposition du français en anglais et vice versa. Éléments de théorie de la traduction.

FR3204 Comparative Structure 3 ch (3C)
Contrastive study of the principal grammatical structures of English and French emphasizing the differences in structure which exist even though the same concepts are being expressed.

FR3524 Roman et cinéma 3 cr (3C)
Étude d’œuvres françaises et québécoises, de leurs adaptations cinématographiques et des problèmes posés par le passage du langage littéraire à celui du cinéma.

FR3524 The Novel and Film 3 ch (3C)
Comparative study of selected French and French-Canadian novels, and their adaptation in film. Study of problems arising from the passage from literary language to that of the screen.

FR3534 Écrits de femmes 3 cr (3C)
Survol de la littérature féminine contemporaine académienne, québécoise, africaine et française. Approche: critique féministe. (Cf. cet annuaire sous Gender and Women’s Studies.)

FR3534 Women’s Writings 3 ch (3C)
Selected texts by Acadian, Québécois, African and French women authors, studied in the context of feminist issues in literary scholarship. (See Calendar entry under Gender and Women’s Studies.)

FR3536 Histoire de la littérature des femmes en France 3 cr (3C)
Panorama historique de la littérature des femmes en France de Moyen Âge à nos jours. Étude d’auteure.s importantes, de Marie de France à Annie Ernaux.

FR3538 A History of Women’s Writing in France 3 ch (3C)
A survey of women’s writing in France from the Middle Ages to the present day. Study of major female authors, from Marie de France to Annie Ernaux.

FR3544 Swiss and Belgian Literature in French (A) 3 ch (3C)
Examines the diverse production of modern and contemporary Belgian and Swiss literature written in French. Belgian authors may include Georges Rodenbach, Maurice Maeterlinck, Michel de Ghelderode, Georges Simenon and Amélie Nothomb. Swiss authors may include Jean-Jacques Rousseau, Isabelle de Charnière, Blaise Cendrars, Philippe Jacottet, Albert Cohen and Agota Kristof.

FR3544 Littérature belge et suisse (A) 3 cr (3C)

FR3554 Survol de la littérature noire d’expression française 3 cr (3C)
Vue d’ensemble d’œuvres africaines et antillaises. Principaux axes de réflexion: le mouvement de la négritude, le colonialisme et la tentation du "masque blanc."

FR3554 Introduction to Black Literature Written in French 3 ch (3C)
Introduces students to the study of African and Caribbean works. Emphasis falls on the "négritude" movement, colonialism and the temptation of the "white mask."

FR3564 Folie et littérature 3 cr (3C)
Étude des rapports entre les auteurs, leurs oeuvres et la folie en littérature.

FR3564 Madness and Literature 3 ch (3C)
Study of the representation of madness in selected literary texts.

FR3574 Le roman populaire 3 cr (3C)
Étude de récits centrés sur l’intrigue et l’exploitation de codes narratifs propres à différents genres populaires, tels la science-fiction, la fantasy et les romans sentimental policier, terifiant et pour le jeune.s.

FR3574 Popular Fiction 3 ch (3C)
A study of plot-driven fictional works written with the intent of fitting into specific literary genre, such as science-fiction, fantasy, romance, crime, horror, and young adult fiction.

FR3584 Non Francophone Writers Writing in French 3 ch (3C)
The unification of Europe coincides with an increased number of works written in French by non Francophones. We will describe this recent phenomenon using sociological, literary and formalist approaches of works by Agota Kristof (Hungary), Milan Kundera (Czech Republic), André Makine (Russia) and Nancy Huston (Canada). Classes to be held in French; students not registered in French Majors or Honours Program may submit their assignments in English.

FR3594 Paris en fête (O) (Inscrit ailleurs sous WLCS 3594) 3 cr (3C)
Sujet d’inspiration des poètes et romanciers ou simple cadre de leurs œuvres, la ville de Paris occupe une place essentielle en littérature française. Les étudiants iront et étudieront des œuvres qui mettent en évidence Paris et la capitale régionale de Poitiers. Le cours comprendra des visites aux musées, aux résidences, aux cafés et aux sites culturels décrits dans les œuvres au programme. Le cours est normalement enseigné en France; NOTE: Les cours se donne en français. Les étudiants qui s’inscrivent à WLCS 3594 peuvent choisir de lire les œuvres en traduction et remettre leurs travaux en anglais.

FR3594 Paris in Literature (O) (Cross-Listed: WLCS 3594) 3 ch (3C)
Paris has played a key role in French literature. The city has inspired numerous poets and novelists and it has been described by countless others. Students will read and study a number of works that highlight Paris and the regional capital of Poitiers. There will be visits to museums, residences, cafés and cultural sites where the authors lived and wrote, and where their novels take place. Normally taught on location in France. NOTE: Classes will be conducted in French. Students who choose to read the novels in translation and submit their assignments in English must register for WLCS 3594.

FR3624 Littérature française de la Renaissance à l’Âge classique 3cr (3C)
Survol des mouvements littéraires ayant marqué le XVie et le XVie siècle français; étude d’auteurs représentatifs de diverses pratiques littéraires telles que le roman (La Fayette), l’essay (Montaigne), le théâtre (Racine), la poésie (Ronsard).

FR3624 French Literature from Renaissance to Classicism 3 ch (3C)
Survey of major literary movements in the 16th and 17th centuries in France; study of writers representing various literary genres: novel (La Fayette), essay (Montaigne), drama (Racine), poetry (Ronsard).

FR3634 Littérature française des Lumières 3 cr (3C)
Survol de l’évolution des idées et de la philosophie au XVIIIe siècle en France; étude de textes représentatifs de diverses pratiques littéraires in the context of feminist issues in literary scholarship. (See Calendar entry under Gender and Women’s Studies.)

FR3652 Dégager les problèmes précis que pose la transposition du français en anglais. Éléments de théorie de la traduction.

FR3652 Comparative Study of Selected French and French-Canadian Novels, and Their Adaptation in Film. Study of Problems Arising from the Passage from Literary Language to That of the Screen.

FR3652 Comparative Study of Selected French and French-Canadian Novels, and Their Adaptation in Film. Study of Problems Arising from the Passage from Literary Language to That of the Screen.

FR3652 Comparative Study of Selected French and French-Canadian Novels, and Their Adaptation in Film. Study of Problems Arising from the Passage from Literary Language to That of the Screen.

FR3652 Comparative Study of Selected French and French-Canadian Novels, and Their Adaptation in Film. Study of Problems Arising from the Passage from Literary Language to That of the Screen.
telles que l'autobiographie (Rousseau), le roman (Graffigny, Diderot), l'essai (Voltaire).

**FR3564** French Literature in the Enlightenment 3 ch (3C)
Survey of the evolution of thought and philosophy in 18th Century France; study of texts representing various literary genres such as autobiography (Rousseau), novel (Graffigny, Diderot), essay (Voltaire).

**FR3654** Littérature française 1800-1850 3 cr (3C)
Aspects of Romanticism, marked by a new awareness of the role of the artist and the triumph of the novel (Constant, Balzac, Gautier, Stendhal) and of the poésie lyrique (Hugo, Nerval, Lamartine).

**FR3654** French Literature 1800-1850 3 cr (3C)
Aspects of French Romanticism, marked by a new awareness of the role of the artist and the triumph of the novel (Constant, Balzac, Gautier, Stendhal) and of lyrical poetry (Hugo, Nerval, Lamartine).

**FR3664** Littérature française 1850-1900 3 cr (3C)
Le réalisme, le naturalisme, l'art pour l'art, le Decadentisme, découlant tous du romantisme, tentent de situer l'individu face au progrès. Étude des textes de Flaubert et Zola, Sand et Maupassant, Baudelaire, Verlaine et Mallarmé.

**FR3664** French Literature 1850-1900 3 cr (3C)
Realism, Naturalism, Art for Art, the Decadent; these literary movements are all rooted in Romanticism and attempt to answer the questions haunting the individual in an increasingly technological world. Works by Flaubert and Zola, Maupassant and Sand, Baudelaire, Verlaine and Mallarmé will be analyzed.

**FR3665** Littérature française 1900-1950 3 cr (3C)
Dada, surréalisme, existentialisme, théâtre de l'absurde... Étude d'un demi-siècle marqué par deux guerres mondiales et une conjoncture de crise permanente. Panorama critique de la vie littéraire qui se concentre aussi sur les principaux enjeux du contexte social et idéologique du temps (essor de tendances radicales, rupture avec l'ordre traditionnel, appel à l'engagement de l'intellectuel). Vise à habiliter les étudiant. e.s à la lecture et à l'analyse des œuvres d'auteur e.s importants tels Artaud, Breton, Camus, Cocteau, Gide, Giraudoux, Sarthe et Yourcenar.

**FR3665** French Literature 1900-1950 3 cr (3C)
Dada, Surrealism, Existentialism, Theatre of the Absurd... Study of the first half of a century shaped by two World Wars and a climate of ongoing crisis. Literary survey that also focuses on the social and ideological context (growth in radical tendencies, break from traditional structures, public involvement of the intellectual). Aims to provide students with analytical tools for the study of works by major authors such as Artaud, Breton, Camus, Cocteau, Gide, Giraudoux, Sarthe and Yourcenar.

**FR3674** Le roman français a contemporain 3 cr (3C)
Une lecture attentive de quelques romans représentatifs du début du 21e siècle. Les courants intellectuels, les préoccupations esthétiques, politiques, sociales et morales qui se dégagent de ces œuvres seront abordées.

**FR3674** The Contemporary French Novel 3 cr (3C)
Examines selected novels from the beginning of the twenty-first century. Explores intellectual contexts of the novels, as well as, the aesthetic, political, social and moral concerns outlined in them.

**FR3684** Théâtre français 3 cr (3C)
Du marivaudage à l'absurde, de la satire à la burlesque, le théâtre se révèle un art de l'interpellation. Étude des formes dramatiques dans des pièces de Molière, Marivaux, Beaumarchais, Rostand, Ionesco.

**FR3684** French Theatre 3 cr (3C)
From "marivaudage" to the absurd world of Ionesco, from satire to burlesque, French drama showcases an art of interpellation. Technical aspects of dramaturgy will be analyzed in plays by Molière, Marivaux, Beaumarchais, Rostand and Ionesco.

**FR3694** Littérature française de 1950 a 2000 (O) 3 cr (3C)
Le Nouveau Roman, le théâtre de l'absurde, les Hussards, l'Oulipo, le féminisme, le postmodernisme, l'autofiction. Étude d'un demi-siècle marqué par la mise à mal de la littérature engagée, par de grandes mutations sociales et de multiples secousses politiques.

**FR3694** French Literature (O) 3 cr (3C)
The New Novel, Theatre of Absurd, the Hussards, Oulipo, feminism, postmodernism, autofiction. A study of the second half of a century marked by the undermining of literature engage ("committed literature"), by major social changes and multiple political upheavals.

**FR3814** Poésie du Canada français 3 cr (3C)
Étude des courants poétiques les plus marquants du Canada français: symbolisme, régionalisme, surréalisme, nationalisme, contre-culture, formalisme et féminisme. Analyse du langage poétique, de la versification et des figures de style.

**FR3814** Poetry of Canada 3 cr (3C)
Important poetic movements of French Canada: symbolism, regionalism, surrealism, nationalism, counter-culture, formalism, and feminism. Study of the language of poetry, versification, and figures of speech.

**FR3824** Littérature de la Renaissance acadienne (O) 3 cr (3C)
Étude des éléments historiques, culturels et littéraires de la Renaissance acadienne à partir de la traduction d'Évangeline par Paulmophile LeMay en 1870 jusqu'à la poésie de Napoléon Landry en 1955. Des extraits de romans, de pièces de théâtre et de poésie de l'époque nationaliste seront analysés sous une perspective idéologique et mythanalytique.

**FR3824** Literature of the Acadian Renaissance (O) 3 cr (3C)
A study of historical, cultural and literary elements of the Acadian Renaissance from the translation of Evangeline by Paulmophile LeMay in 1870 to the poetry of Napoleon Landry in 1955. Excerpts of novels, plays and poetry from the national period will be analyzed through an ideological and mythanalytical lens.

**FR3834** Écrivaines québécoises contemporaines 3 cr (3C)
L'analyse de l'évolution de la pensée féministe dans le roman féminin québécois. (Cf. Cet anneau sous Gender and Women's Studies).

**FR3834** Contemporary Quebecois Women Writers 3 cr (3C)
Studies the evolution of feminist thought in novels written by Québécois women. (See Calendar entry under Gender and Women's Studies).

**FR3844** Écriture migrante au Québec 3 cr (3C)

**FR3844** Immigrant Writing in Quebec 3 cr (3C)
Since the 1980s, a rise in immigration in the urban centres of Quebec has led to the development of transcultural or immigrant literature. Main focus on exile, fantasy of return, identity and acculturation. Study of issues of writing and its various forms, including fiction, poetry and drama, in a minority setting.

**FR3854** Littérature acadienne 3 cr (3C)
Introduction à la littérature acadienne dans ses diverses manifestations. Une attention particulière sera portée aux textes contemporains. Principaux axes de réflexion: quête d'identité, début de modernité.

**FR3854** Acadian Literature 3 cr (3C)
Introduction to Acadian literature in its diverse aspects. Special attention will be paid to contemporary works. Concentration on search for identity, beginnings of modernism.

**FR3864** La littérature canadienne-française du XIXe siècle 3 cr (3C)
À partir de quelques œuvres représentatives, la formation d'une écriture romanesque et poétique, spécifique au Canada français; son évolution de la rébellion de 1837 jusqu'à la fin du XIXe siècle, ses qualités et ses défauts. Étude de l'influence prédominante du contexte socio-culturel: lutte entre rouges et ultramontains, thèse du messianisme compenseur, censure et autocensure.

**FR3864** French Canadian Literature of the XIX Century 3 cr (3C)
Based on certain representative works, study of the birth of a specific and distinct style of writing in the poetry and novel of French Canada, its evolution from the rebellion of 1837 to the end of the XIXth century, its qualities and shortcomings. Study of the predominant influence of the socio-cultural context: the struggle between the Tories and the "ultramontains," the thesis of compensating messianism, censorship and self-censorship.

**FR3874** Le roman canadien-français de 1900 à 1960 3 cr (3C)
Pendant la première moitié du XXe siècle se propage au Canada français une idéologie qu'appuie l'éite au pouvoir et qui lie à la survie du peuple canadien-français, à la religion et à l'agriculture. En littérature, plusieurs écrivains épousent cette idéologie. Ils célèbrent la patrie de même que les
séductions de la campagne québécoise: terre, clocher, etc. Étude de l'évolution de cette littérature qui se voulait représentative du mode de vie et des idéaux canadiens-français.

FR3874 The French-Canadian Novel from 1900-1960 3 ch (3C)
The first half of the twentieth century bears witness to an ever popular ideology favoured by those in power, linking the survival of the French Canadian people with religion and agriculture. In literature, many writers promote this ideology. They celebrate the qualities of the Québec countryside, the soil, the Church, the homeland. What are the evolution of this literature which saw itself as representing the lifestyle and ideals of French Canadians.

FR3884 Théâtre du Canada français 3 cr (3C)
Lecture de grandes oeuvres dramatiques du Canada français. Étude de la dramaturgie, de la mise en scène et de la théâtralité.

FR3884 The Theatre of French Canada 3 ch (3C)
Reading of major works by French Canadian playwrights. Study of dramaturgy, production, and theatricality.

FR3894 Le roman canadien-français contemporain 3 cr (3C)
Le roman canadien-français depuis 1960 est marqué par l'urbanisation, la contestation et l'éclatement des valeurs traditionnelles. Étude des œuvres représentatives de ce refus global du passé et de cette quête d'un prochain épisode libérateur tant du point de vue politique que de celui de l'illustration d'une nouvelle forme laïcisée du mythe national ancré dans la modernité et l'espace américain.

FR3894 The Contemporary French-Canadian Novel 3 ch (3C)
Since 1960, the French Canadian novel has been marked by a thrust towards urbanization, by the rejection and disintegration of traditional values, and by the search for a new freedom. Representative works of this era will be studied both from a political point of view and as illustrating a new type of national, secular myth anchored in modernism and the North American continent.

FR4034 Perfectionnement de l'expression orale II 3 cr (3C)
Amélioration de l'expression orale. Présentations, discussions et débats sur des sujets d'actualité. Fermé aux étudiant.e.s scolarisé.e.s en français.

FR4034 Advanced Oral French II 3 ch (3C)
Aims at perfecting competence in oral French through presentations, discussions, debates on current topics. Not open to students who attended French-language school.

FR4054 Révision II 3 cr (3C)
Amélioration de l'expression écrite. Révision de textes suivis.

FR4054 French Composition II 3 ch (3C)
Aims at developing competence in writing structured full-length texts.

FR4054 Étude d'un auteur important 3 cr (3C)
Exploration de l'univers littéraire d'un auteur important de la francophonie.

FR4054 Study of a French Major 3 ch (3C)
Study of the works of a major literary author of the French speaking world.

FR4524 Cinéma québécois (A) 3 cr (3C)
Survol historique et esthétique du cinéma québécois. Exploration des traits majeurs de l'imaginaire cinématographique québécois. Analyse de la présence, depuis la Révolution tranquille, de deux trames narratives principales liées à la question identitaire: la tragédie et l'émacipation.

FR4524 Quebecois Film (A) 3 ch (3C)
Historical and aesthetic survey of Québecois film. Exploration of the major characteristics of the Québécois cinematic imagination. Analysis of the presence, since the Quiet Revolution, of two major narrative frameworks linked to the question of identity: tragedy and emancipation.

FR4534 Cinéma français (A) 3 ch
Cours qui explore l'histoire et l'évolution du cinéma en France, du cinéma muet ou surréaliste jusqu'aux plus jeunes générations de cinéastes français.

FR4534 French Cinema (A) 3 ch
Explores the history and the development of the French cinema, from the early silent or the Surrealist film to the youngest generations in French filmmakers.

FR4574 Lecture dirigée en littérature française/ Directed Reading in French Literature 3 ch (3C) [W]

A detailed study of a specific topic in French studies. Working under the direction of a member of the Department or an associate of the Department, the student will complete directed readings and written assignments. Prerequisite: permission of the instructor and the Department.

FR4824 Littérature acadienne au 21e siècle/ Acadian Literature in the 21st Century 3 ch (3C)
Etude de la littérature acadienne du nouveau millénaire (depuis 2000), un intérêt particulier étant porté à la langue d'expression et aux thèmes traités des auteurs tels que France Daigle, Rose Després, Herménégilde Chiasson, Jean Babineau et Georgette LeBlanc.

Study of Acadian literature in the new millennium (since 2000), with particular focus on the language of expression and main themes in the works of authors such as France Daigle, Rose Després, Herménégilde Chiasson, Jean Babineau and Georgette LeBlanc.

FR4900 Mémoire de spécialization 6 cr (R)
Travail sous la direction d'un(e) professeur-e du Département. Réservé aux étudiant-e-s faisant une 'Spécialisation simple.'

FR4900 Honours Report 6 ch (R)
Individual study, under the supervision of a member of the Department, leading to a report. Reserved for Single Honours students.

FR3675 Le roman en France des origines a nos jours 3 cr (O) (3C)
Etude de l'évolution du roman en France du Moyen Age au XX siècle, incluant le roman de chevaliers, le roman épistolaire, le roman réaliste et naturaliste et le Nouveau Roman.

FR3675 The Novel in France from Its Origin to the Present Day 3 ch (O) (3C)
Study of evolution of the French novel from the Middle Ages to the twenty-first century, including chivalric romance, epistolary novels, Realist and Naturalist novels, and Nouveau Roman.

FR4554 Alterité dans les littératures francophones de l'Afrique et des Caraïbes 3 cr (O) (3C)

FR4554 Otherness in Francophone Literatures from Africa and 3 ch (3C) the Caribbean
Discover the African and Caribbean literary traditions through a reflection on “Otherness”. What is the Other? The gaze? Exoticism? How does the question of Otherness allow us to re-analyze francophone texts treating of colonization, slavery, racism and genocide? Study of various literary genres, including a selection of essays, poems, novels and travel journals written by authors from Martinique, Haiti, Algeria and the Ivory Coast.

FR/LING3404 Introduction à la linguistique 3 cr (3C)
Étude d'aspects phonologiques, morphologiques et syntaxiques, à partir d'exemples tirés du français.

FR/LING3404 Introduction to Linguistics 3 ch (3C)
Introduction to various sub-disciplines of linguistics (phonology, morphology, and syntax) exemplified through French.

FR/LING3414 Sociolinguistique 3 cr (3C)

FR/LING3414 Sociolinguistics of French 3 ch (3C)
An introduction to the empirical study of language as it is used in its social context. Topics include: social and stylistic variation, dialects and the "standard," linguistic attitudes, language and gender, bilingualism. Prerequisite: FR/LING 3404 or equivalent; FR/LING 3414 may be taken concurrently with FR/LING 3404.
Examines the major linguistic features of French spoken in Canada, in particular Acadian and Québécois French. Prerequisite: Two courses in FR/LING.

FR/LING4414 French canadien 3 cr (3C) Examen de traits caractéristiques du français parlé au Canada, notamment du franco-acadien et du franco-québécois. Préalables: deux cours FR/LING.

FR/LING4444 Canadian French 3 cr (3C) Examines the major linguistic features of French spoken in Canada, in particular Acadian and Québécois French. Prerequisite: Two courses in FR/LING.

GENDER AND WOMEN'S STUDIES

Required Courses

GWS1003 Introduction to Gender and Women's Studies I 3 ch [W] This general interest course provides an introduction to the study of gender and women’s equality and examines how current social, political, and economic realities intersect to structure gender relations. Topics may include gender, gender as a spectrum, gender-based and diversity analysis, gendered violence, feminism, hegemonic masculinity, missing and murdered Indigenous women, patriarchy, pay equity, rape culture, sexism, sexual assault, sexualities, stereotyping, the third wave women’s movement, trans issues, unpaid work, the wage gap, women in politics, and work-life balance.

GWS2003 Introduction to Gender and Women's Studies II 3 ch [W] This entry-level course, which is recommended for both first- and second-year students, explores the study of gender and women’s equality issues with particular focus on women’s activism from the 19th century to the present. It also examines the diverse theoretical approaches within feminist scholarship to outline broad terms of debate, and investigates specific feminist arguments in regard to written and visual representations and explores various socio-political issues. Topics covered will be viewed through multiple lenses (race, class, gender, sexual orientation) with a primary focus on sexual and reproductive health, paid and unpaid labour, political institutions and the status of women, the wage gap and female poverty, violence and family relations.

GWS4004 Seminar in Gender and Women's Studies 3 ch [W] Critically examines the assumptions underlying existing disciplines as they relate to the study of women and men, and explores new theoretical and methodological perspectives for studying the gender-based aspects of society. Prerequisites: GWS1003 or GWS 2003.

GWS4900 Honours Thesis in Gender and Women's Studies 6 ch Involves directed reading and research leading to an Honours thesis on a topic in Gender and Women's Studies. Students will consult with the Coordinator in finding a suitable topic and thesis supervisor. Prerequisites: Either GWS 1003 or GWS 2003 and GWS 4004.

GEODESY AND GEOMATICS ENGINEERING

The courses presently offered in the Geomatics Engineering Program by the Department of Geodesy and Geomatics Engineering are described below.

The first digit of the identification number indicates the level of the course. A "5" indicates an elective course, normally done in the final year.

The second digit normally indicates the subject area as follows:

0 measurement, positioning and navigation
1 applied analysis
2 geodesy
3 imaging and mapping
4 information management, modelling and visualization
5 land administration
6 synthesis and design
7 technical communication, complementary studies
8 service course for other disciplines

415
SECTION H: FREDERICTON COURSES

9 general (geodesy or geomatics or both)

The third digit carries the course sequence identification integer where "0" refers to the first course, "1" to the second course, and so on.

See beginning of Section H for abbreviations, course numbers and coding.

As stated below, a course may have prerequisite courses or Co-requisites course or both. It is expected that students will have completed at least the prerequisite courses prior to doing a course in order to be adequately prepared to deal with the material of that course. Those who have not completed those courses can expect to spend additional time acquiring this background knowledge on their own and should budget more time for that course. Nonetheless, a course instructor has the right to insist that students may take her/his course only if they have met the prerequisite or Co-requisites stipulations or both.

The credit hour weighting of a course is also an indication of the amount of time that may have to be spent on a course. Generally, the number of hours per week (including all scheduled class time) could be from 2 to 3 times the number of credit hours. As an example, a course is shown as being "2C, 3L" 4 ch. This means that a student might spend up to 8 to 12 hours per week, including the scheduled 5 hours of lectures (C) and lab (L). Students who have not completed the Prerequisites can expect to spend more time than this.

For list of core courses and technical elective courses, see Section G.

NOTE: See beginning of Section H for abbreviations, course numbers and coding.

GGE1001 Introduction to Geodesy and Geomatics 5 ch (3C 3L)

GGE2012 Advanced Surveying 4 ch (2C 3L)

GGE2013 Advanced Surveying Practice 4 ch
Two weeks of practical exercises following spring examinations. Management of occupational health safety issues. Prerequisites: GGE 2012, STAT 2593.

GGE2413 Mapping Concepts and Technology 5 ch (3C 3L)
Introduction to computer-based systems and processes for creating, managing, analyzing and visualizing spatial information. Introduction to geographic information systems (GIS), spatial data structures and 2-dimensional spatial transformations. Comparative overview of alternative spatial data collection technologies. Systems-based approaches to desktop mapping, cartographic production and map analysis. Basic properties and applications of common map projections. Prerequisites: CS 1003 or CS 1073, MATH 1503 or equivalent introduction to matrices and systems of linear equations.

GGE2501 Land Administration I 4 ch (3C 1L) [W]
Introduction to the principles of cadastral systems and survey law with a focus on Canadian jurisdictions. Includes basic land administration concepts, management of land tenure, systems for land registration and survey, and legal aspects of cadastral surveying. An extensive reading list supplements the lecture material, along with practical exercises reinforcing the course topics and building communication and analytical skills.

GGE3022 Survey Design and Analysis 5 ch (3C 3L)

GGE3023 Surveying Design Practice 4 ch
Two weeks of practical exercises following spring examinations. Management of occupational health and safety. Prerequisites: GGE 3022.

GGE3042 Introduction to Global Navigation Satellite Systems 5 ch (3C 3L)
Principles of space geodesy. The celestial sphere, its coordinate systems, and variations in coordinate systems. Time keeping. Satellite based positioning systems, especially the Navstar Global Positioning System (GPS) including observations, development of mathematical models, static and dynamic positioning, error analysis, software structure, and processing considerations. Real Time Kinematic (RTK) GNSS positioning. Prerequisites: MATH 1503. Co-requisite: MATH 2513.

GGE3111 Introduction to Adjustment Calculus 5 ch (3C 3L)
Calculation of variations; quadratic forms; least-squares principles; least-squares method, weight matrix, variance factor; parametric, condition and combined adjustment. Prerequisites: MATH 1503, MATH 2513, STAT 2593.

GGE3122 Advanced Adjustment Calculus 4 ch (3C 2L)
Quality control, uni- and multivariate statistical testing; approximation, prediction, filtering in observation and frequency domains; constraint functions; weighted parameters; nuisance parameters; sequential adjustment; Kalman filtering. Prerequisites: GGE 3111, MATH 2513; Co-requisite: CS 3113.

GGE3202 Geodesy I 4 ch (2C 3L)
Introduction to the subject of geodesy; kinematics, gravity field, and size and shape of the Earth; temporal deformations of the Earth. Geodetic control in Canada. History of geodesy. Geodetic heighting. Prerequisites: PHYS 1081, ENGG 1082, MATH 1503, MATH 2513. Co-requisite: MATH 3543.

GGE3342 Remote Sensing 5 ch (3C 3L)
Overview and physical basis of remote sensing. Space- and air-borne sensor systems, active and passive sensors. Fundamental geometry of photogrammetry. Image statistics. Rectification of digital imagery. Image enhancement, spectral and spatial filtering. Multi-spectral transformations. Thematic information extraction, classification and accuracy assessment, change detection. Credit will be given for only one of GGE 3342 or GGE 5342. Prerequisite: GGE 2423 or GG 3243 or permission of instructor.

GGE3353 Ocean Mapping 5 ch (3C 3L)
Introduction to hydrography: geomatics aspects, trends and prospects, role in offshore management. Depth determination: seabed and seawater properties, non-acoustic methods, underwater acoustics, vertical and oblique incidence methods, bathymetric and imaging methods.

GGE3423 Introduction to Geographic Information Systems 4 ch (2C 3L)
Introduction to GIS technology; Application of GIS: understanding the nature of geographic data, from geographic data to geographic information (GI), Information Systems (IS), and GIS; earth size and shape; tracing and mapping entities on the earth; geographic data sources and collection methodologies; evaluating the quality of the data sources; representing geographic data in the GIS; loading and managing geographic data in the GIS; analyzing geographic data, solving geographic related problems using GIS; interpreting the results of that analysis using GIS, and publishing the results of the analysis on the web. Program credit cannot be given for both GGE 4232 and GGE 2423. Prerequisite: MATH 1503 or equivalent introduction to matrices and systems of linear equations; or permission of the instructor.

GGE4022 Precision Surveying 4 ch (2C 3L)
Measurements, processing, and analysis in densification surveys. Control surveys for photogrammetry and construction. Introduction to mining and tunneling surveys, deformation measurements and analysis, and industrial metrology. Related issues of occupational health and safety and their management. Prerequisites: GGE 3022, GGE 3023, GGE 3122.

GGE4211 Geodesy II 4 ch (3C 2L)
Terrestrial, celestial and orbital coordinate systems; coordinate transformations; positioning in 3 dimensions, on the ellipsoid and on a conformal mapping plane. Height systems. Temporality of geodetic parameters. Earth observation systems. Prerequisites: GGE 3202.

GGE4313 Airborne Mapping Systems 5 ch (3C 3L)
GGE4423 Advanced Geographic Information Systems 5ch (3C 3L)
Mapping concepts and Geographic Data Management and Analysis: (a) Mapping concepts: colour and visual perception, map symbols, cartographic generalization and multiple representation, map projections and spatial reference systems, representation of the terrain (DEM/DTM), map design and interactive visualization; (b) Geographic Data Management and Analysis: database design theory, conceptual models (entity relationship model, UML), logical models (relational, object and object relational model), physical models, spatial index structures, algorithms for analysis of geographic data, introduction to XML and XML-based languages for GIS, geographic data integration and sharing (GI standards). Prerequisite: GGE 2423 or GGE 3423 or permission of the instructor.

GGE4512 Land Administration II 3ch (2C 1L) [W]
Introduction to modern issues in land tenure and administration from Canadian and international perspectives. Includes boundary disputes and uncertainties, aboriginal rights, land information management, reform of cadastral systems, coastal zone management, law of the sea, and delimitation of maritime boundaries. Prerequisite: GGE 2501 or permission of instructor.

GGE4700 Design Project and Report 8ch (2C 2L)
A full year course (fall term then winter term) involving the design and implementation of a geomatics project or project and a report on the results and outcome. All under the direct supervision of a faculty member equivalent in industry. Lecture topics include: engineering economics and business management issues specific to geomatics; financial decision making in geomatics. Must be done in the student’s final year of the program. 

GGE5011 Oceanography, Tides, and Water Levels 4ch (3C 1L)
Descriptive and theoretical introduction to physical oceanography, focusing on the coastal zone and the continental shelf. Components of physical oceanography that affect the accuracy and operational conduct of hydrographic surveying. Detailed studies of the controls on sound speed structure (seawater properties, propagation and refraction). Detailed studies of the controls on surface water level (tides, waves and swell, vertical reference surfaces). Constituent extraction from tidal observations and prediction of tides. Discrete and continuous tidal zoning, including an introduction to coastal hydrodynamic models.

GGE5012 Marine Geology and Geophysics 4ch (3C 1L)
Descriptive marine geology including all ocean depths, but focusing on the coastal zone and continental shelf. Components of surficial sedimentology that affect the accuracy and operational conduct of hydrographic surveying. Detailed studies of the controls on seafloor processes (deposition and erosion) and bottom backscatter strength (sonar performance, geomorphology, sediment classification). Descriptive and introductory-theoretical marine geophysics including single-channel, 2D multi-channel and 3D multi channel reflection seismic surveying. Marine refraction seismology.

GGE5022 Precision Surveying 4ch (2C 3L)
Measurements, processing, and analysis in densification surveys. Control surveys for photogrammetry and construction. Introduction to mining and tunnelling surveys, deformation measurements, and analysis, and industrial metrology. Related issues of occupational health and safety and their management. Prerequisite: GGE 3122

GGE5042 Kinematic Positioning 5ch (3C 3L)
Performance requirements, mathematical models, observation methods, processing strategies, uncertainties and other characteristics associated with moving marine, land airborne, and space vehicle positioning, orientation and attitude applications, using autonomous, terrestrial, satellite, and acoustic methods. Prerequisites: GGE 3042; GGE 3122; GGE 3353, GGE 4211.

GGE5131 Special Studies in Adjustments 4ch (3C 3L]
Hilbert space techniques; sequential techniques; digital filtering; interpolation and approximation; large system techniques. Prerequisite: GGE 3122.

GGE5222 Gravity Field in Geomatics 4ch (2C 3L)

GGE5242 Global Navigation Satellite Systems for Geodesy 4ch (3C 3L)
Review of coordinate systems. Orbital dynamics. GPS for high precision positioning and navigation. Major practical lab in GPS positioning. Prerequisites: GGE 3202, GGE 4211.

GGE5322 Digital Image Processing 4ch (3C 3L)
Image data formats; software code for input and output images; writing, compiling and running software code; advanced image processing and computer vision algorithms and software programming; includes advanced edge detection, mathematical morphology, image segmentation, texture, skeletonization, image restoration, wavelets, image matching, fuzzy logic. Prerequisites: GGE 3342 and experience in programming, preferably in C/C++.

GGE5341 Advanced Technologies in Remote Sensing 4ch (3C 2L)
An introduction to the concept and basic theory of Artificial Neural Network (ANN), Wavelet Transformation (WT), and Fuzzy Logic (FL); literature review of remote sensing applications or other applications which used one or more of these modern technologies; and seminar presentations on the applications and techniques learned from literature. Prerequisite: GGE 3342 or permission of the instructor.

GGE5401 Geospatial Development 3ch (2C 2L)
Programming skills required in the geospatial industry. Development of standalone programs, use of geospatial libraries, and extension of the functionality of geomatics software systems. Prerequisites: CS 1003 and GGE 3423 or permission of the instructor.

GGE5402 Geographic Databases 3ch (2C 2L)
This course focuses on both the theoretical and practical issues related to the development of geographic databases and the extraction of knowledge from geographic data collections. Special attention will be given to recent technological developments and research directions. A series of Lab Sessions will run in parallel, using commercial and open source s/w tools, such as PostgreSQL/PostGIS DBMS, Oracle Spatial DBMS, MongoDB, Protégé, Quantum GIS s/w, WEKA Data Mining s/w, and other prototype s/w packages. Prerequisite: GGE 4423 or permission of the instructor.

GGE5403 Web Mapping and Geospatial Web Services 3ch (2C 2L)
This course focuses on both the theoretical and practical issues related to the dissemination of mapping/geographic content on the web and the development of map mashups and geospatial web services. Students will learn how to design and implement web mapping applications and geospatial web services using free software tools. Prerequisite: GGE3423 (Introduction to GIS) or equivalent or permission of the instructor.

GGE5405 Introduction to Big Data & Data Science 3ch (2C 2L) [LE]
Offers an overview of key techniques and technologies in big data analytics, and how data science is different from related fields. Through a combination of lectures and hands on exercises using R, MongoDB, and D3 visualization tools, students will learn to explore, clean, refine, analyze and visualize geospatial, streaming, unstructured and structured types of big data.

GGE5415 Real-Time Mobility Data Analytics 3ch (2C 2L) [LE]
Focuses on teaching the principles, methods and tools of descriptive analytics (mapping what is moving), diagnostic analytics (mapping why something is moving), predictive analytics (mapping what will move), and prescriptive analytics (mapping how we can make it move). Explores real-world case studies through lectures and hands on exercises to allow students to replicate the analytics when facing similar data. Prerequisite: GGE 5405.

GGE5521 Survey Law 4ch (3C 3L)
Review of common and statute law affecting property, boundaries, and surveys. Role of a land surveyor in resolving boundary disputes and as an expert witness. Various types of legal surveys. Professional responsibilities, ethics. Case studies. Prerequisites: GGE 2501, GGE 3022, GGE 3023, GGE 3122, GGE 4211, GGE 4512.

GGE5833 Land Use Planning for Geomatics 4ch (3C 3L) [W]
Introduction to urban and site planning and related environmental management issues. The evolution of cities, community planning and municipal administration, principles of land use, and the administration and enforcement of planning regulations. In the three modern technologies: site analysis and the physical, social, and environmental impacts of development on a site and its surroundings. The economics of land development. Restricted to students in their final year. Co-requisites: GGE 4512 and GGE 5521, or permission of their instructor.

GGE5901 Special Studies in Geomatics I 1ch (1T 1L)
SECTION H: FREDERICTON COURSES

Directed study in an approved topic in geomatics. Supervision by a faculty member. Normally done in a student’s final term. Credit will be given for only one of GGE 5901, GGE 5902, or GGE 5903.

GGE5902 Special Studies in Geomatics II 2 ch (1T 3L)

Directed study in an approved topic in geomatics. Supervision by a faculty member. Normally done in a student’s final term. Credit will be given for only one of GGE 5901, GGE 5902, or GGE 5903.

GGE5903 Special Studies in Geomatics III 3 ch (1T 5L)

Directed study in an approved topic in geomatics. Supervision by a faculty member. Normally done in a student’s final term. Credit will be given for only one of GGE 5901, GGE 5902, or GGE 5903.

GEological Engineering

NOTE: See beginning of Section H for abbreviations, course numbers and coding.

GE1028 Geology Laboratory for Geological Engineers 2 ch (3L)

An introductory study covering topographic and geological maps (bedrock and surficial) and their interpretation; construction of cross sections; identification of common minerals, igneous, sedimentary and metamorphic rocks; geological structures (map analysis as a predictive tool); dating and the geological time scale; coastal processes; mass wasting (especially the recognition and delineation of hazards related to deltas, fluvial and fluvial/lacustrine and landslides); and glaciations and glacial deposits (especially glacial deposits in eastern Canada and their significance to engineers).

GE2022 Engineering Geology 4 ch (3C 3L)

A study of geological materials and hazards for site investigation and assessment of risk and remediation; engineering classification of geological materials, properties and relationships; engineering in the existing and changing environment and exacerbation of natural processes; geological constraints for construction foundations, tunneling, waste disposal and mining, with case histories of geological problems in engineering projects. Prerequisites: ESCI 1001, ESCI1026 or equivalent or permission of the instructor. Equivalent to ESCI 2022.

GE4401 Applied Glacial Geology 4 ch (3C 3L)

Study of the mass balance of glaciers and characteristics of flow, erosion and deposition by active and stagnant ice masses, facies relationships in processes and products of glaciated terrain, and assessment of terrain from air photos, maps, geophysical and core data. Practical applications include: relevance of sample collection and analyses for geotechnical evaluation and mineral prospecting, and identification of industrial resources and terrain hazards. Prerequisites: ESCI 2211, ESCI 2321 or permission of the instructor. Equivalent to ESCI 4401.

GE4412 Applied Rock Mechanics 5 ch (3C 2L)

Lectures and labs investigate applications of rock mechanics and rock engineering principles, using geological and geomathematical data in the open-ended design of surface and underground engineering structures sited in rocks, as well as geo-hazard mitigation. Analysis of design problems incorporates several industry standard software packages. The natural variability of geomatics and implications for effective design solutions are discussed. Prerequisite: ESCI 3411, or equivalent. Equivalent to ESCI 4412.

GE4993 Senior Team Design 8 ch (1C 2T 4L) [W]

Working in teams, students will complete a full year Geologic engineering design project that draws on knowledge and skills obtained in previous courses. With support from academic and industry mentors, student teams will design a structure, system, process or resource management plan to meet a broad range of specified constraints for an identified client. Students will manage their projects professionally, prepare comprehensive design documentation, and present and defend all aspects of their design to the client and broader audience. Prerequisites: Restricted to students in their final year of the program, or with permission of the instructor.

GE5753 Engineering Hydrology 4 ch (3C 3L)

Covers important topics in quantitative hydrogeology, including: principles of saturated and unsaturated groundwater flow, solutions to groundwater flow problems, well hydraulics and pumping tests, and contaminant migration and attenuation processes in groundwater. Prerequisites: CE 2113, CE 3713, ESCI 1001, ESCI 1026.

GE5943 Research Project 4 ch (1C 6L) [W]

Each student will work on an approved research project. The student will: present a proposal which will serve as the basis for the project; carry out work on the project with the guidance of an approved supervisor; submit written progress reports at specified times; write a final report at the completion of the project; present the subject of the report orally; and attend similar presentations by colleagues. Prerequisite: Restricted to students in the final year of the program, or with permission of the instructor.

GERMAN

See beginning of Section H for abbreviations, course numbers and coding.

GER1001 Introductory German I 3 ch (3C)

Closed to students with any knowledge of German. Enables students to understand, speak, read and write simple, idiomatic German by introducing them to the sounds, word forms, sentence structures and basic vocabulary of German. Sections of German 1001 may use different texts and approaches. No prerequisite.

GER1002 Introductory German II 3 ch (3C)

Continuation of GER 1001. Prerequisite: GER 1001, or equivalent.

GER1003 Berlin: Immersive Introduction to German 3 ch (3C) (O)

This course provides students with the opportunity to explore German culture and language in an intensive format in Germany’s capital. Students are introduced to sounds, word forms, sentence structures, and basic vocabulary in the context of hands-on projects, field trips, and conversation groups. At the end of the course they should be able to engage in with German texts and produce elementary, idiomatic German phases. Students are exposed to everyday cultural situations, but are also presented with more complex topics such as German history and politics. This course is designed for students with little or no prior exposure to the German language (A1/A2). No Prerequisites. Open to students of all years. Taught on location as part of the Travel Study program Vienna.

GER1011 German for Business, Co-op and Exchange I 3 ch (3C)

This course is intended for business students and students across all faculties who seek a functional proficiency in German for career planning, work/internship or exchange programs in a German-speaking country. The course is designed to develop oral and written communication skills necessary in travel, university and professional contexts and provides knowledge of the cultures of German business, higher education and the working world. Special emphasis is placed on interactive situations and activities with German speakers in professional and everyday environments. No previous knowledge of German is expected or required. NOTE: Not open to students who have taken GER 1001 or equivalent.

GER1022 German for Business Co-op, and Exchange II 3 ch (3C)

Continuation of GER 1011. Prerequisite: GER 1011 or equivalent. NOTE: Not open to students who have taken 1002 or equivalent.

GER1033 Reading German for Beginners I 3 ch (3C)

Closed to students with any knowledge of German. Designed to enable students to read German texts in their respective fields of interest. Based on contrastive grammar, it requires no previous knowledge of German. Students soon learn to understand German texts in their disciplines. No prerequisite. Students who are taking or have previously taken GER 2001 and 2002 or equivalent (e.g., GER 2013 and GER 2023) cannot take this course.

GER1043 Reading German for Beginners II 3 ch (3C)

Continuation of GER 1033 (Reading German for Beginners I). Designed to enable students to read more sophisticated German texts than the ones they dealt with in GER 1033. Prerequisite: Only students who have passed GER 1033 with grades of B+ and above should consider taking GER 1043. Students who have passed GER 1043 with a grade of B or above may take second year language courses.

GER2001 Intermediate German I 3 ch (3C)

Starting with a review of the fundamentals of GER 1001 and 1002, this course develops a larger vocabulary and deals with more complex sentence structures. It enables the student to read and write German with greater ease and to understand and speak the language more competently. Prerequisite: 6 ch of first year German or departmental approval.
A reading course designed to strengthen skills in the reading of ancient GRK 3213

Prerequisite to begin the development of skills in the reading of ancient Greek texts from

An intensive intermediate second GRK 2205 or equivalent.

GRK 1213

citizens of classical Athens.

An introduction to the ancient Greek language GRK 1203

See beginning of GER 4073

Prerequisite GER 4023

Development of advanced skills in oral and written expression.

Continuation of GER 3011.

GER 2001 and equivalent.

GER 3011

Modern German Usage I 3 ch (3C)

By discussing contemporary topics, both in the classroom and assignments, the students’ competence in German is improved and their skills in idiomatic and written usage are developed. Prerequisites: GER 2001 and GER 1002 or equivalent.

GER 3022

Modern German Usage II 3 ch (3C)

Continuation of GER 3011. Prerequisite: GER 3011 or equivalent.

GER 4013

Advanced German Usage I 3 ch (3C)

Development of advanced skills in oral and written expression. Prerequisite: Departmental approval.

GER 4023

Advanced German Usage II 3 ch (3C)

Prerequisite: GER 4013 or departmental approval.

GER 4073

Literary Texts 3 ch (3C) [W]

Reading and discussion of a selection of German literary texts. Prerequisite: GER 3011 may be taken in conjunction with GER 3022.

GREEK

See beginning of Section H for abbreviations, course numbers and coding.

GRK 1203

Introductory Ancient Greek I 3 ch (3C)

An introduction to the ancient Greek language spoken and written by the citizens of classical Athens. This introduction presupposes no previous knowledge of the language. This course is conducted in English.

GRK 1213

Introductory Greek II 3 ch (3C)

A continuation of the introduction to ancient Greek. Prerequisite: GRK 1203 or equivalent.

GRK 2205

Intermediate Ancient Greek 3 ch (3C)

An intensive intermediate second-level course in ancient Greek language designed to prepare the successful student for the reading of ancient Greek texts from classical literature. Prerequisite: GRK 1213 or equivalent

GRK 3205

Beginning Ancient Greek Reading 3 ch (3C)

An intensive course designed to complete the study of basic grammar and to begin the development of skills in the reading of ancient Greek texts. Prerequisite: GRK 2205 or equivalent.

GRK 3213

Reading Ancient Greek Authors I 3 ch (3C)

A reading course designed to strengthen skills in the reading of ancient Greek texts. Prerequisite: GRK 3205 or equivalent.

All Courses

Introductory Level Courses

HIST 1001

Past into Present (O) 3 ch (3C) [W]

History starts here, with the news and public debates of today. This general interest course examines how our understanding of the world we live in is shaped by our knowledge of history. The course is divided into two or three modules (depending on available instructors), which will vary from year to year, and will range in focus from world crises to popular culture.

HIST 1002

The World Since 1945 (A) 3 ch (3C) [W]

This general interest course examines major themes in global history since the end of the Second World War. Topics to be examined include the origins, evolution, and end of the Cold War; the emergence of new nations in Africa and Asia; comparative social change; cultural revolutions and the status of women; and recent responses to globalization and armed conflict.

HIST 1004

War in the Modern World (A) 3 ch (3C) [W]

This general interest course analyzes the history of a current conflict by exploring the domestic and international contexts and options for ending the conflict. Combines lectures, discussion and simulations, to examine the role of allies, armies, paramilitaries, agents provocateurs, multinational corporations, non-government organizations and the United Nations.

HIST 1007

History of the Body (O) 3 ch (3C) [W]

This general interest course examines how the body has been imagined, experienced, controlled, and understood, both historically and today, by art, medicine, technology, religion, science and popular culture. Considers the sexualized and pregnant body, the sinful and diseased body, the aesthetic and the medicalized body, and the body as machine from Galen and Descartes to the age of the computer, the cyborg and the gene.

HIST 1008

Religion, Magic and Witchcraft in the Medieval World (O) 3 ch (3C) [W]

This general interest course introduces students to the complex and fascinating realm of religious and scientific beliefs and magical practices maintained by people living during the high and late Middle Ages in Europe and the Middle East, from about 1200 AD to 1600 AD. Considerable attention will be paid to the development of the Inquisition against heresy, the growing fear over supposed diabolical conspiracies and the development of the diabolical witch stereotype in the fifteenth and sixteenth centuries.
SECTION H: FREDERICTON COURSES

HIST1009
Epidemic Disease from the Middle Ages to the Present (O)
This general interest course explores the changing perceptions of epidemic disease from the fourteenth century through to the present day. By focusing on infectious illnesses such as plague, smallpox, cholera, and influenza, this course considers the various socio-cultural, medical, and government responses to epidemics throughout this lengthy period of history. Particular attention is given to both change and continuity over time, posing (and seeking answers to) questions such as: how have responses to epidemic disease changed over time? how have they remained the same?

HIST1133
Rome: The Eternal City II (O)
This general interest course provides an introduction to the history of Rome from the Baroque period to the modern age. Normally taught on location. May not be taken by students who have taken HIST 2133 or HIST 3133.

HIST1135
Italy Today (O)
An introduction to the politics, society, and culture of Italy since 1945. Normally taught on location. May not be taken by students who have take HIST 3135.

HIST1305
Prohibition and Run-Runnning in Canada, 1827-1948 (O)
This general interest course introduces the historical method while exploring the controversial theme of prohibition. Examine both the protagonists in the struggle: prohibitionists, whose ideology was rooted in evangelical religion and an early strain of feminism, and the “Rummers” who fought to preserve a recreational drinking culture and the economic opportunities that it made possible.

HIST1315
Canadian History on Film (O)
This general interest course introduces the challenges of studying history on film by examining selected themes in Canadian history and their representation in documentary and dramatic films.

HIST1325
Canada since 1945 (O)
This general interest course addresses the major issues of contemporary Canadian history, including post-war reconstruction, the emergence of the welfare state, the Quiet Revolution in Quebec, Canadian external relations, immigration policy, regional disparity, political leadership, and national identity. Restriction: Not available for credit to students who have taken HIST 2325.

HIST1415
“Cowboys and Indians?”
A History of Native People in Canadian and American Popular Culture (O)
This general interest course examines the conflict between Native people and the Canadian and US settler societies by focusing on how Native people have been and are still being portrayed within the popular culture of those settler societies through film, television, literature, music, material culture, sports, etc. This course will examine the underlying beliefs and values of these portrayals and how they have changed over time as well as the various responses by Native people. The course also explores the concept of “popular culture”, the relationship between stereotypes and racism, the romanticization of Native cultures, and the extent to which the “Cowboys and Indians” ideology continues to manifest itself in the rhetoric of resource development. Normally taught online.

HIST1615
Resist, Rebel, Revolt: A Global History of Uprisings (O)
This course explores the forms, causes, and outcomes of resistance, rebellion, and revolution in a variety of different historical contexts. Beginning with pre-modern forms of insurrection and extending to present-day revolutionary activity, we will examine how historical actors mobilized or confronted categories of race, ethnicity, gender, and class. We set out to answer the following questions: How do people overthrow their rulers? Do radical upheavals require violence and terror? Do the outcomes of resistance ever match initial expectations? What does the act or revolt or rebellion tell us about power in a given historical moment? With a particular focus on histories of uprisings in Global South countries, we will examine how resistance, rebellion, and revolution not only mark transitions in world history, but also show continuities in histories, ideas, and national mythologies through their legacies and impact.

HIST1625
The Spy In History (O)
This general interest course considers the history of spying. It traces the evolution of espionage from the Middle Ages to contemporary times. In this class we will focus on some of the world’s most infamous spies, and we will chronicle the role that these men and women played in our [his]stories.

HIST1715
Looking at the Past (O)
This general interest course is designed to acquaint students with the use of visual sources as historical evidence. Studies a broad range of visual culture, from paintings to advertisements to television, according to their historical meanings. Considers how historical images accrue meaning for the contemporary. Restriction: Not available for credit to students who have taken HIST2715.

HIST1815
Military History from Plato to NATO (O)
This general interest course provides an introduction to the study of tactics, technology, battle control, logistics and management. Developments will be examined by studying selected campaigns and battles. Restriction: Not available for credit to students who have taken HIST2815.

Foundation Level Courses

HIST2013
Medieval History Part I: Europe to 1200 (O)
This entry-level course, which is recommended for both first-and second-year students, provides a survey of Western Europe from the end of the Roman Empire and the appearance of the German peoples until the end of the twelfth century. Focuses especially on the major political and social developments of medieval Europe, such as feudalism, the revival of towns, the conflict between Popes and Emperors, the crusades, the flourishing of medieval thought and the role of both women and men in medieval society. Restriction: Not available for credit to students who have completed HIST1010 or HIST1005.

HIST2014
Medieval History Part II: Europe 1200-1500 (O)
This entry-level course, which is recommended for both first-and second-year students, continues the survey of the history of Medieval Europe, beginning c. 1200 and ending with the Renaissance. Focuses especially on the several crises facing Europeans during the later Middle Ages: popular uprisings, famine, the Black Death, the 100 Years War, Papal schism and the new heretical and intellectual challenges to orthodoxy. Restriction: Not available for credit to students who have completed HIST1010 or HIST1006.

HIST2023
Early Modern Europe Part I, 1300-1600 (O)
This entry-level course, which is recommended for both first- and second-year students, surveys Western European history by examining aspects of the Italian and Northern Renaissances, early contact with Non-Western peoples, the Protestant and Catholic Reformations and the growth of nation states. Emphasizes developments in the economy and society, education, religion, culture and government. Restriction: Not available for credit to students who have completed HIST1020.

HIST2024
Early Modern Europe Part II: 1600-1800 (O)
This entry level course, which is recommended for both first- and second-year students, continues the survey of Western European history by examining aspects of the rise of absolutist states, the Scientific Revolution, the Witch Hunts, the Enlightenment, overseas expansion and the French Revolution. Stresses developments in the economy and society, government, secular thought, culture, international relations and war. Restriction: Not available for credit to students who have completed HIST1020.

HIST2103
Modern Europe Part I: 1789-1914 (A)
This entry level course, which is recommended for both first- and second-year students, surveys European history from the era of the French and Industrial Revolutions to the eve of the First World War. Topics to be covered include: the French Revolution and Napoleon; the Industrial Revolution and the rise of the working class; evolving political ideologies and movements; the forging of new nation states; changing class and gender relations; cultural upheaval; the motives for imperialism; the origins of the First World War. Not available for credit to students who have taken HIST1100 or HIST2100.

HIST2104
Modern Europe Part II: 1914 to Present (A)
This entry level course, which is recommended for both first- and second-year students, surveys European history from the First World War to the present. Topics to be covered include: the First World War; the Russian Revolution; interwar cultural and social change; the Great Depression and political upheaval; the origins and course of the Second World War; Europe and the Cold War; social change after 1945; the impact of decolonization; the rise of the European Union; European debates over national identity. Not available for credit to students who have taken HIST1100 or HIST2100.
This entry level course, recommended for either first- or second-year students, begins the survey of Canadian history since Confederation, explored through the prism of Indigenous/Settler relations with a particular focus on Canada's evolution as a nation. The course will examine wide-ranging topics and themes, including the Confederation debates, the settlement of and rebellions in the west, the numbered treaty system, changing patterns of immigration, the industrial revolution, residential schools and reservation system, the rise of the welfare state, Canada's role in foreign affairs and northern sovereignty, regional tensions and competing nationalisms within Canada as a multicultural society, and the rise of neoliberalism within resource economies. Not available for credit to students who have completed HIST 1300 or HIST 2300.

HIST2302 Indigenous and Settler Canada, Part 2 (O) 3 ch (2C 1T) [W]
This entry level course, recommended for either first- or second-year students, continues the survey of Canadian history since Confederation, explored through the prism of Indigenous/Settler relations with a particular focus on Canada's evolution as a nation. The course will examine wide-ranging topics and themes, including the Confederation debates, the settlement of and rebellions in the west, the numbered treaty system, changing patterns of immigration, the industrial revolution, residential schools and reservation system, the rise of the welfare state, Canada's role in foreign affairs and northern sovereignty, regional tensions and competing nationalisms within Canada as a multicultural society, and the rise of neoliberalism within resource economies. Not available for credit to students who have completed HIST 1300 or HIST 2300.

HIST2403 Understanding 'America': The United States to the Civil War (A) 3 ch (2C 1T) [W]
This entry-level course, which is recommended for both first-and second-year students, surveys American history from the earliest European settlement through the Civil War. Topics include exploration and expansion, the European-Aboriginal encounter, colonization and Christianity, revolutionary ideas and independence, the early Republic, the frontier experience, slavery and resistance, antebellum culture, and sectional discord and conflict.

HIST2404 Understanding 'America': The United States since the Civil War (A) 3 ch (2C 1T) [W]
This entry-level course which is recommended for first-and second-year students, surveys the modern history of the United States. The course considers national reconstruction following the Civil War, late nineteenth century industrial and geographic expansion, social unrest and progressive reform in the early twentieth century, the "roaring twenties", the "dirty thirties", the New Deal, the "Good War" of the 1940s, the Cold War, the Civil Rights Movement, liberalization and conservatism, the "Bad War" in Vietnam, the rebellions of the sixties, the Reagan era and beyond. Completion of HIST2403 recommended but not required.

HIST 2603 The Caribbean: from Caribs to Castro Part I (A) 3ch (2C 1T) [W]
This survey course introduces students to a history of the Caribbean region from the indigenous era, beginning around 6000 BC, to the late-eighth century. Topics covered include: indigenous politics, cosmology, and culture; European conquest and indigenous responses and resistance to conquest; Variations in politics and culture between empires; the Middle Passage; plantation and urban slavery; the everyday lives of the enslaved.

HIST2604 The Caribbean: from Caribs to Castro Part II (A) 3 ch (2C 1T) [W]
This survey course introduces students to a history of the Caribbean from the Haitian Revolution in the late eighteenth century to the Cuban Revolution and rise of Fidel Castro in the mid-20th century. Topics covered include: the abolitionist movement; slave emancipation and struggles to define freedom; Indian indentureship; nationalist and independence struggles; the U.S. occupation of Cuba and Puerto Rico; Afro-Atlantic civil rights movement; Che Guevara; the Caribbean and international affairs.

Advanced Level Courses

European History

HIST3001 West Meets East in the Middle Ages, 1050-1450 (O) 3 ch (3C) [W]
Examines contact and conflict among the Latin Kingdoms of Europe, the Byzantine Empire and the Islamic Empire. Considers the crusades, crusader states, the position of the Jews, and the role of trade and intellectual development in the period.

HIST3006 Sixteenth-Century Europe: The Age of Reform (A) 3 ch (3C) [W]
The sixteenth century was one of the most tumultuous eras in European history. With the Reformations dividing Europeans into warring ideologies, Pope Paul IV, at the height of French and religious dissenters facing widespread discrimination and persecution. This course will examine the religious, social and political transformations of Europe and Britain throughout the century. It will explore how Europeans wanted to reform their religious beliefs and institutions and how they went about it. Reform was applied also to political, economic, and medical beliefs and systems. Ordinary folk also sought reform, leading to the so-called "Peasants' War of 1525" and the Anabaptist kingdom of Münster, 1534-35, as well as to the destruction of religious art during the iconoclastic fury. The course concludes with how the religious passions unleashed by the Reformation led to new religious sects, new attitudes toward religious diversity and tolerance, and to the intensification of anti-Semitism and the revival of witch hunting.

HIST3011 Age of Empires (O) 3 ch (3C) [W]
Examines the expansion of European imperial power during the nineteenth century, focusing upon developments in Asia and Africa. Explores the reasons for the renewal of European imperialism with a focus on the role of exploration, profit, technology, profit, and the role of Asian and African responses to European imperial expansion, and the impact that colonial rule had on structures of class, gender, and race. Restriction: Not available for credit to students who have taken HIST3008.

HIST3012 Empires in Crisis (O) 3 ch (3C) [W]
Examines challenges to European colonialism during the twentieth century. Explores structures of colonial rule and how they affected class, gender, and race relations in Africa, Asia, and the Middle East. Analyses the rise of anti-colonial movements and their challenges to colonial rule, within the context of the global crises of the years between 1914 and 1945. Concludes with examinations of the struggles for national independence after the Second World War, and the legacies of colonialism. Prerequisites: Prior completion of HIST3011 is an asset but not required. Restriction: Not available for credit to students who have taken HIST3008.

HIST3015 Racism in the West from Antiquity to the Enlightenment (O) 3 ch (3C) [W]
Explores how many populations, including the ancient Greeks, Romans, medieval and early-modern Europeans, molded their particular identities by constructing negative images of the "foreigner" or "other" based on perceived religious or ethnic differences. It examines in particular the formation and dissemination of religious and racial stereotypes and the inflaming of prejudicial passions that have led to violence. Particular emphasis will be placed on the long history of anti-semitism, and comparisons will be made with Byzantine and Muslim cultures. While it will focus on the subject primarily as a historical problem, the course will be interdisciplinary in approach, involving specialists from a range of disciplines.

HIST3016 Racism in the West from the Enlightenment to Today (O) 3 ch (3C) [W]
Building upon HIST 3015, this course explores how, in the era of the Scientific Revolution, the Enlightenment, the growth of religious tolerance, the rise of nationalism, and the increasing secularization of western society, racism and anti-semitism continued not only to spread, but to be given a pseudo-scientific foundation, resulting in a variety of conspiracy theories and ultimately leading to the horrific Holocaust and racial and ethnic cleansing of the twentieth century. While it will focus on the subject primarily as a historical problem, the course will be interdisciplinary in approach, involving specialists from a range of disciplines.

HIST3025 History and Sexuality: Europe and the World (O) 3 ch (3C) [W]
This course offers students a transnational history of the changing ideas, identities, and practices associated with sexuality in the modern era, c. 1750 - present. Topics will include: religious belief and moral regulation, science, medicine, and the construction of homosexual, heterosexual and inter-sexual identities, the legal regulation of prostitution, birth control, and abortion, and sexual violence in war and genocide. We will consider the effects of competing ideologies (capitalism, communism, fascism, imperialism) on sexual life and highlight the complex interplay between gender, race, class, and intimate practices. Not available for credit to students who have completed HIST 3325.

HIST3033 France in the Twentieth Century (A) 3 ch (3C) [W]
Examines the political, social, and cultural history of France during a century of upheaval. Topics to be covered include the Dreyfus Affair; the First World War; culture and society between the wars; the Great Depression and the era of the Popular Front; the rise of French fascism; the Second World War and the Vichy regime; collaboration and resistance; postwar social and cultural change; intellectuals and politics; the government of General de Gaulle; and recent debates over immigration and identity. France's role as a colonial and postcolonial power is also a central theme in the course.

HIST3034 The Viking World 3 ch (3C) [W]
Examines the Scandanavian culture and society that produced arguably the most feared and respected warriors of the medieval period: the Vikings.
As the decades of faith in Enlightenment reason gave way to the emotional world of the late nineteenth century, and Rome's emergence as the capital of the Catholic Reformation on Baroque Rome, the emphasis shifted from the social and cultural impact of the Cold War; the significance of the Cold War for Africa and Latin America; the rise of fascism and the propaganda of the Third Reich, and the Nazi "Final Solution to the Jewish Problem" in Occupied Europe.

HIST3053 Berlin: From Empire to Republic (O) 3 ch (3C) [W]
This course uses the city of Berlin to examine Modern German history. In visits to key historical sites, we will discuss the royal history of the Imperial period, soldiers and civilians in the two world wars, cultural innovation in the Weimar Republic, and the crimes of National Socialism. We will use the city landscape to tell the story of communism and capitalism during World War II, the rise and fall of the Berlin Wall, and the challenges and opportunities of European Union in the twenty-first century. Normally taught on location.

HIST3063 History of Modern Greece (O) 3 ch (3C) [W]
An introductory survey course of the history of Modern Greece from the Greek War of independence in 1821 to the Second World War. Special attention is paid to the impact of events such as the Balcans Minor and the Dodecanese in 1912 and the Greek Diaspora by utilizing literature and other historical sources and documentaries in order to present the society, culture and politics of Greece and gain a better understanding of the modern Greek identity. There are no Prerequisites.

HIST3065 The Generation of the Second World War (A) 3 ch (2C 1T) [W]
Examines the Second World War from a social and political perspective and in an international context. Topics to be covered include: the origins of the war in Europe and Asia, home fronts, the experience of occupation, collaboration and resistance, wartime atrocities and genocide, the diplomacy of the war, and the impact of the war on social relationships and political systems in Europe and Asia.

HIST3085 Modern Germany 1871-1945 (O) 3 ch (3C) [W]
Beginning with the 1871 unification of Germany, and ending with the Third Reich's defeat in the Second World War, this course explores numerous themes, including: political and cultural innovation, diplomacy, violence, gender relations, everyday life under democracy and dictatorship, memory and commemoration, war and genocide, and the changing place of Germany within Europe. We discuss the fractures and divisions within Imperial German society, the home and fighting fronts of the First World War, the short-lived but influential Weimar Republic, the rise of Adolf Hitler and the Volksgemeinschaft of the Third Reich, and the Nazi "Final Solution to the Jewish Problem" in Occupied Europe.

HIST3095 Modern Germany, 1945 to the Present (O) 3 ch (3C) [W]
This course examines German history from the end of the Second World War to the present. Beginning with the Allied occupation of Germany in 1945, the course investigates the formation of two separate states: the German Democratic Republic and the Federal Republic of Germany. Using the tools of social, cultural, political, and gender history, the course considers themes such as: everyday life under communism and capitalism, Cold War politics, protest and terrorism, the memory of Holocaust crimes, the fall of the Berlin Wall in 1989, and the many challenges facing Germany in the post-unification era.

HIST3125 The Cold War: An International History (O) 3 ch (3C) [W]
Examines the evolution of the Cold War from 1945 to 1991. Topics to be examined include: the debate over the origins of the Cold War; the creation of opposing alliance systems in Europe; the Asian dimensions of the Cold War; the significance of the Cold War for Africa and Latin America; the rise and fall of detente; the end of the Cold War and the collapse of the Soviet bloc. Attention is paid to the social and cultural impact of the Cold War.

HIST3133 Rome: from the Baroque to the Modern Era (1527 to the Present) (O) 3 ch (3S) [W]
Studies the impact of the Catholic Reformation on Baroque Rome, the end of Papal Rome with the unification of the Italian nation, the urban expansion of the late nineteenth century, and Rome's emergence as the capital of Mussolini's New Empire. The creation of the Vatican City State is studied, and contemporary Roman life and politics will be examined. Normally taught on location.

HIST3134 Romanticism and Revolution in Rome (O) 3 ch (3S) [W]
As the decades of faith in Enlightenment reason gave way to the emotional world of the late nineteenth century, and Rome's emergence as the capital of Mussolini's New Empire. The creation of the Vatican City State is studied, and contemporary Roman life and politics will be examined. Normally taught on location.

HIST3135 Contemporary Italy (O) 3 ch (3S) [W]
Examines the politics, society and culture of Italy from 1945 to the present. Normally taught on location.

HIST3136 Rome and the Papacy in the Age of the Reformation (O) 3 ch (3S) [W]
Beginning with an examination of the late medieval and Renaissance papacy, this course focuses on the role of the papacy in and its response to the Protestant and Catholic Reformations. The course gives special attention to Rome as the catalyst, locus and expression of reform. Normally taught on location.

HIST3203 Early Modern London (O) 3 ch (3S) [W]
Early modern London was an exceptional city in many ways and it played a unique and pivotal role in the emergence of eighteenth- and nineteenth-century Rome, this course considers literature, music, art and philosophy as forces of innovation that helped shape the experience of social and cultural transformation. By visiting, seeing, reading and listening to the new styles of expression embodied by Romanticism, we explore the political issues central to the new urban experience, that is, illness, poetry and politics in Rome's Revolution of 1848. Normally taught on location.

HIST3215 Early Modern British History Part 1: 1485-1688 3 ch (3C) [W]
Examines the Second World War from a social and political perspective and in an international context. Topics to be covered include: the origins of the war in Europe and Asia, home fronts, the experience of occupation, collaboration and resistance, wartime atrocities and genocide, the diplomacy of the war, and the impact of the war on social relationships and political systems in Europe and Asia.

HIST3216 Early Modern British History Part 2: 1688-1830 3 ch (3C) [W]
Examines the political, social and cultural themes of British history for the period 1688-1830. Explores religious, political, dynastic, economic, intellectual, and social transformations in England (and, to a lesser extent, Wales, Scotland and Ireland) during the Tudor and Stuart eras. Topics include: the rise of the Tudor state; the nature of English society; the English Reformation; overseas exploration, trade, and settlement; the coming of the Stuart monarchy; the Scientific Revolution; the Civil Wars and Interregnum; the Glorious Revolution. Not available for credit to students who have taken HIST3170, 3202, 3204, or 3242.

HIST3226 Medicine and Society in the Early Modern British World (O) 3 ch (3C) [W]
Examines the social history of health and medicine in the early modern British world, c. 1500 -1800. Focuses on the relationship between medicine and society to explore how social, cultural, intellectual, and political factors shaped experiences of health, illness, and healing in early modern Britain and its Empire. The perspectives of patients will be considered alongside those of practitioners in the investigation of topics such as: early modern notions of the body, health, and environment; the role of religion, medical knowledge, authority, and the marketplace; the nature of the patient-practitioner exchange; public health responses; military and imperial medicine; the rise and function of medical institutions; medical ethics and professionalization. Evaluates such topics in relation to both continuity and change over the course of three centuries.

HIST4001 Heretics and Witches in Europe, 1350-1650 (A) 3 ch (2C 1T) [W]
Examines popular religion and magic in Late Medieval and Early Modern Europe in individuals efforts to transform the "devil into a saint". Emphasizes the medieval invasions against heresy (twelfth to fifteenth centuries) and especially the phenomenon of European witch-hunting (fifteenth to seventeenth centuries). Explorations of the causes of the witch-hunt, its victims and eventual decline are highlighted.

HIST4002 Europe in the Renaissance (O) 3 ch (3C) [W]
Studies society and culture in Europe, especially Italy, from the mid fourteenth century to about 1530. This was one of Europe's greatest periods of intellectual and cultural ferment and creativity, marked by great achievements in commerce, education (humanism) and the arts. It was also a period of considerable upheaval, including the plague, political intrigue, warfare, economic and social crises, witch-hunting and the devastating effects of the plague on the Americas. The course will also examine the lives of women and men in the urban environment.
HIST4003 Women in the Early Modern Atlantic World (O) 3 ch (3C) [W]
Examines the ways in which the lives of women from Europe, Africa, and the Americas were shaped by "Atlantic World" experiences from the sixteenth through early nineteenth centuries. Considers how race and socioeconomic/legal status influenced female experiences of patriarchy, sexuality, work, and agency by placing them into the broader social, cultural, political, and religious contexts of the early modern Atlantic World.

HIST4006 The Mental World of Europeans, 1600-1800 (O) 3 ch (2C 1T) [W]
This course explores the fresh emphasis that early modern Europeans placed on learning, the exploration of nature, and new critiques of the societies in which they lived. The Scientific Revolution, social activism (such as the antislavery movement and early feminism), and the rise of republicanism are examined in the light of contemporary thought and social currents.

HIST4007 The French Revolution and Napoleon (O) 3 ch (2C 1T) [W]
Examines the history of Revolutionary and Napoleonic France. Topics include: the origins of the Revolution; the fall of the French monarchy; the Great Terror; Revolutionary culture; the impact of the Revolution upon women, religion, and slavery; the rise of Napoleon; and the impact of the Revolutionary and Napoleonic War upon Europe.

HIST4012 Home Fronts at War (A) 3 ch (3C) [W]
Focuses on the European home fronts of the First World War, a conflict that George Kennan termed the seminal catastrophe of the twentieth century. Historians increasingly refer to the First World War as the first "total war", as entire societies were scaled toward supporting the massive armies on the fighting fronts. The course takes students deep into the everyday experiences of European men and women on the home fronts.

HIST4013 The Holocaust: Victims, Perpetrators, Bystanders (O) 3 ch (3C) [W]
Provides a thematic survey of the Nazi destruction of the European Jews. Examines the ideological underpinnings of the genocide, the policies leading up to and including the so-called "Final Solution" of the "Jewish problem", perpetrator motivations, Jewish responses to persecution and survival strategies in the camps. Also explores how the Holocaust unfolded in various European countries and the responses of nations, institutions and individuals to the mass murder of the Jews. Considers the examination of the post-war trials of war criminals and considers the definition of genocide after the Holocaust. Primary documents are discussed in the lectures, and several on-going historiographical are debates examined during class discussions.

HIST4015 The Origins of the Second World War (O) 3 ch (3C) [W]
Examines the international history of the period between 1919 and 1941. Topics to be covered include the Paris Peace Settlement of 1919; the attempt to rebuild the international system in the 1920s; the impact of the Great Depression; the evolution of alliances in the 1930s; the role of ideology in international relations; military and strategic influences on foreign policy; and the significance of both intelligence-gathering and public opinion. The course will focus on the foreign policies of Great Britain, France, Fascist Italy, Nazi Germany, the Soviet Union, Japan, and the United States.

HIST4105 Italy in the Twentieth Century (O) 3 ch (2C 1T) [W]
From the crisis of Liberal Italy in the First World War, this course studies the rise and decline of Mussolini's Fascism and the establishment of the Christian Democratic hegemony after 1945. The challenge of Italian Communism is examined as are the policies of the Vatican in the twentieth century.

HIST4247 Eighteenth-Century British Society and Culture (A) 3 ch (3C) [W]
Examines the changing meanings and representations of social status in Britain during the 'long eighteenth century,' circa 1688-1832. Considers whether (and to what degree) Georgian Britons may be regarded as 'a polite and commercial people'. Topics include: rank and status; gender roles; manners, politeness, and emulation; consumerism and consumption; mercantilism, trade, and the pursuit of wealth; the 'middling sort' and the rise of the middle class; urbanization and non-landed elites; early industrialization.

Canadian History

HIST3316 Immigration and Identity in Canadian History 3 ch (2C 1T) [W]
Examines the changing pattern of immigration to Canada from the early seventeenth century to the present, and the contribution of the various immigrant groups to the creation of a sense of Canadian identity.

HIST3326 Gender, Health and Medicine (A) 3 ch (3C) [W]
Examines the social history of health, disease, caregiving, and medical practice from a gender perspective. Will focus on nineteenth- and twentieth-century Canada and the United States. Classes will be arranged to allow for the thematic discussions on the topics such as changing beauty ideals and their link to "wellness", notions of physical "fitness" and health promotion, the medicalization of life cycle events such as puberty and child bearing/rearing, as well as the gendered experiences of a wide variety of health-care providers and patients involved in clinical encounters over the last two centuries. Intended for a multi-disciplinary cohort of students.

HIST3327 Science, Medicine and Health Care in Canada (A) 3 ch (3C) [W]
This course explores the history of health and health care in Canada, from the era of the First Nations' initial contact with Europeans, to the present day. Topics include: Aboriginal and European conceptions of health and illness; the impact of Western infectious diseases on First Nations society; the health implications of rapid industrialization in the nineteenth century; the role of the state in sanitary reform and public health; the emergence of the medical and nursing professions; Canadian scientific research in medicine; the Canadian eugenics movement; and the origins and development of universal health care in the twentieth century. Race, class, gender, alternative medicine, and regional inequality will feature in small group discussions.

HIST3331 The Canadian Worker to 1914 3 ch (3C) [W]
The working-class experience in the age of Canada's industrial revolution, focusing on the transformation of the workplace and the rise of the labour question.

HIST3332 The Canadian Worker since 1914 3 ch (3C) [W]
The working-class experience in Canada since the time of the Great War, focusing on the changing relationships between labour, capital and the state.

HIST3335 Nature, Culture and the Canadian Environment (O) 3 ch (3C) [W]
Examines the relationship of humans in their environment from the end of the last glacial period to the late 20th century. Topics include the impact of climate on the development of Canadian society, the evolution of human-animal relationships, changing ideas about nature, and political discourse on and regulatory solutions to pollution and other forms of environmental degradation.

HIST3336 History of Canadian-American Relations (O) 3 ch (3C) [W]
Surveys the evolving relationship between Canada and the United States from the American Revolution to the Free Trade Agreement. Stresses the twentieth century when Canada gained autonomy over external affairs. Beside the major political and economic components of the relationship, the course also examines cultural, social and environmental issues. Restriction: Credit may not be obtained for both HIST 3364 and POLS 3242 (Canadian-American Relations).

HIST3337 Truth & Reconciliation in Canada: Working to Overcome the Legacy of the Residential Schools (O)
Situating the truth and reconciliation process in Canada within the similar efforts in other countries such as Rwanda and South Africa, this course focuses on the work of Canada's Truth and Reconciliation Commission to bring to light the nature and extent of the policies aimed at promoting the assimilation of Indigenous peoples into the Canadian settler society since the mid-19th century - particularly through the residential schools - and the varied and often harmful impact that these policies have had. The course also examines the diversity of reactions to the work of the commission, the extent of the success in implementing the commission's of 94 "Calls to Action," and the potential of these Calls to Action to meet the challenges currently facing Indigenous people in Canada.

HIST3378 First Nations and Canadian Settler Society I: Pre-Contact to the 1876 Indian Act (O)
Examines the complex relationship between First Nations and Canadian settler society, including in New France, in British North America, and during the first years after Confederation. Emphasizes the efforts of First Nations people to preserve their cultures and languages in the face of an increasingly powerful colonial state. Topics include pre-contact First Nation and European societies, early contact, the fur trade, treaties of peace and friendship, the Royal Proclamation of 1763, land surrender treaties, and the policy of the assimilation of First Nations people into Canadian settler society. Restriction: Not available for credit to students who have taken HIST3374.

HIST3379 First Nations and Canadian Settler Society II: The 1876 Indian Act to the 2008 Apology for Residential Schools (O)
Examines the complex relationship between First Nations and Canadian settler society, and emphasizes the federal government's attempts to assimilate First Nations people into Canadian settler society and the resistance by First Nations people to these efforts through such means as court cases, protests, and cultural revitalization movements. Topics include the Indian Act and subsequent amendments, Indian residential schools, and representations of social status in Canada during the 'long eighteenth century,' circa 1688-1832. Considers whether (and to what degree) Georgian Britons may be regarded as 'a polite and commercial people'. Topics include: rank and status; gender roles; manners, politeness, and emulation; consumerism and consumption; mercantilism, trade, and the pursuit of wealth; the 'middling sort' and the rise of the middle class; urbanization and non-landed elites; early industrialization.
government agricultural policies, First Nations political organizations, the 1969 White Paper, the push for First Nations rights and self-government, land claims, and the federal government's apology for residential schools.

Restriction: Not available for credit to students who have taken HIST3374.

HIST3413  A History of Women in Canadian Society  3 ch (2C 1T) [W]
A course in social history focusing on the changing roles of women in the public and private spheres in the nineteenth and twentieth centuries, with special emphasis on the role of women in the work force.

HIST3426  Revolutionary and Loyalist Era Medicine  3 ch (3C) [W]
Examines the impact of immigrant cultures, struggles for empire, the development of a cultural mosaic, the emergence of distinctive provincial societies and the forces that led to union.

HIST3442  History of the Atlantic Provinces after Confederation  3 ch (2C 1T) [W]
Surveys the history of the region from Confederation to the present day, with focus on the vicissitudes of the Maritimes within Confederation and movements for social, economic and political reform.

HIST3451  New Brunswick, 1784-1880  3 ch (2C 1T) [W]
Focuses on the social and administrative history of New Brunswick. Topics include the establishment of government (especially administrative and legal systems); Loyalists, British, Acadian and Native interaction; church-state relations; education and schooling; management of Crown lands and the economy; family, household and society. (This course is recommended for students in the Law in Society Program.)

HIST3452  New Brunswick, 1850 to the Present  3 ch (2C 1T) [W]
Examines the role of government in provincial life. Topics include the background of Confederation; religion, language and education; transformations in local government; the politics of railways, energy and highways; transfer payments and social welfare; the growth of the provincial bureaucracy; and the emergence of Acadian and Native issues. (This course is recommended for students in the Law in Society Program.)

American History

HIST3402  The American Revolution (A)  3 ch (3C) [W]
Examines the causes, results and nature of the American Revolution. Themes include imperial relations, the internal development of the colonies and states, the development of revolutionary ideas, and the formation of the federal government.

HIST3403  The Loyalists (A)  3 ch (3C) [W]
Studies the American Loyalists before, during and after the American Revolution. The first half deals with their emergence, 1763-1776, their role in the War of Independence, their treatment by the rebels, and the Peace Treaty of 1783. The second half deals with their exile in Britain, Sierra Leone, the West Indies, the Bahamas, Bermuda and what became Canada, to about 1814. An epilogue traces their myths, revivals and long-term effects down to the present.

HIST3407  The United States: Civil War and Reconstruction (A)  3 ch (3C) [W]
Deals with the political, economic, diplomatic, and military dimensions of the civil War. Discusses the development of reconstruction policies both during and after the war and their implementation in the South.

HIST3408  American Radicalism and Reform (A)  3 ch (3C) [W]
A survey of American social and political movements for change from the founding of the United States to the present. Considers the radical legacy of the revolutionary era, the women's suffrage and abolitionist movements, utopianism, populism, progressivism, radical unionism, anarchism, socialism, communism, African American struggles for civil rights, the new social movements of the sixties, identity politics, and recent resistance to capitalist globalization.

HIST3413  African America (O)  3 ch (3C) [W]
A survey of African American history from slave times to the present, the course will focus on culture and politics. Among the themes we explore are ideologies of racism, systems of domination, the nature of resistance, movement building, liberation strategy, African American identity, and the intersection of racial, class, and gender politics.

HIST3414  Imperial America (O)  3 ch (3C) [W]
Examines the foreign relations of the United States from its emergence as a world power late in the nineteenth century to its current global pre-eminence. Topics include the "New Imperialism", Wilsonian idealism, inter-war isolationism, the "Good War", the Cold War, Vietnam, "realpolitik", the "New World Order", globalization, and the "War on Terror".

HIST3415  America at the Movies (O)  3 ch (3C) [W]
An exploration of films as reflections of American history and of American history as it is projected in films. Students learn to "read" films as historical documents and consider the role of films in shaping understandings of history. The course will concentrate on a small number of themes, genres, and problems, and endeavour to illuminate these through the critical analysis of select films in historical context.

HIST3416  Urban North America  3 ch (3S) [W]
Addresses developments within and among North American cities and explores changes in the conceptions of cities in North American thought and culture. Using New York City as a case study, examines some historical literature of cities and enters the debates among historians over the significance of class, ethnicity/race, gender and region in urban history. Also studies the live of urban dwellers, and chart shifts in the way people organized their lives in cities. Major themes for this course include the changing physical structure and form of cities over time; processes of urbanization and sub-urbanization; city planning; the economies of cities; urban institutions; urban populations; and city politics. Normally taught on location.

HIST3417  Dark Artifacts: Film Noir and the Other America, 1940-1965 (O)
Dark artifacts is a social and cultural history of the United States using visual culture, especially film noir, as a means of exploring a set of themes that were central to the period. It will include lectures, readings, discussion, and public service films focused on such themes as race, class, gender, infidelity, organized crime, and nuclear bomb anxiety. Each week a film noir from the period will be watched and discussed. This is not a film course per se; nor is it designed to showcase the best films of the so-called 'noir' cycle. The films have been chosen for their articulation of alternative viewpoints and/or the anxieties of the post-war decades. Most of the films that will be shown provide a counter-narrative to the prevailing view of America projected by mainstream Hollywood, the establishment press, and the government.

HIST3418  North American Slavery (O)  3 ch (3C) [W]
Examines the cultures and economies of Black slavery in North America and the Caribbean, and the role of the American Revolution in creating a slavery diaspora in such disparate locations as Nova Scotia, London, Sierra Leone, and Australia. Particular attention is given to slavery in Canada, including Canada’s role in the Underground Railroad movement, and the larger legacy of slavery and anti-Black racism in Canada and in North America more generally. A central theme is slave resistance, embodied in such actions as talking back, running away, committing arson, and participating in slave revolts and insurrections.

HIST3419  New York City: From Colony to World Capital (O)  3 ch (3S) [W]
Examines the development of New York City from its establishment by the Dutch as New Amsterdam in the 1600s, through its development as one of a handful of “world” cities whose influences extend around the globe today. Will consider such historical themes as urban form and architecture, city people and populations, culture and recreation, city politics and social movements, the environment, and economics of cities. Will explore the history of New York City in comparative perspective, using this city as our main case study. Normally taught on location.

HIST3455  The Harlem Renaissance (O)  3 ch (3C) [W]
 Begins by considering some of the major themes, controversies and personalities in African American history, 1865-1920, in an attempt to contextualize the surge of Black cultural production known as the Harlem Renaissance. The course then focuses on the Renaissance itself, and particularly on the racial, class and gender politics that informed the creation of literature, music and art by African Americans in New York City in the 1920s and 1930s. Normally taught on location in New York City. Restriction: Students cannot obtain credit for both HIST 3455 and HIST 4455.
HIST3457
Culture and Modernity in Twentieth-Century America (O)
3 ch (3C) [W]
Explores the emergence and spread of modern American culture in historical context. In addition to considering cultural forms and practices such as music, literature, film, television, the visual arts, comedy, advertisement, shopping, driving, dating, playchildrener, exercise, and nightlife, the course will examine such pervasive themes as the rise of a culture of consumption, the 'therapeutic' culture, culture and violence, the cult of personality, construction of gender, minority and resistance cultures, culture and ideology, and culture globalization.

HIST3475
Removal, Allotment, Termination
Self-Determination: American Indian Policy, 1824-2004 (O)
3 ch (3C) [W]
Examines the nature and evolution of American policies toward the Native peoples within its borders. Topics include the forcible seizure of Indian lands through war, the treaties and the cession of reserves, the drastic reduction of the reserves by the mid-20th century through “allotment,” subsequent federal government attempts to end its trusteeship of Indian lands and relocate Native people to the cities, and how – beginning in the 1960s – Native people began to assert significant control over their lives and lands. Restriction: Not available for credit to students who have taken HIST3375.

HIST4452
The Vietnam War (O)
3 ch (3C) [W]
The Vietnam War is one of the most controversial subjects in American history. Scholars and activists had their own visions of this watershed decade continue to shape American culture and politics? Pre-requisite: HIST 2404 or permission of the instructor.

HIST4495
America in the 20th Century (O)
3 ch (3C) [W]
An examination of the most tumultuous period in the recent history of the United States. Topics include the Cold War, the African American freedom movement and Black Power, the sexual revolution, the new left and the counterculture, the psychedelic movement, women’s liberation, Vietnam and the anti-war movement, the conservative backlash and the sixties in myth and memory. The central focus of the class is how the events of this watershed decade continue to shape American culture and politics?

Global and Thematic History

HIST3615
History of Slavery (O)
3 ch (3C) [W]
Studies ways in which Western slavery and emancipation were experienced, perceived, explained, symbolized and related to European attitudes. Focuses on the lives of African slaves.

HIST3616
Caribbean History to 1886 (O)
3 ch (3C) [W]
This course is a survey of the history of the Caribbean region from the indigenous era, beginning around 6000 BC, to the final abolition of slavery in Cuba in 1866. Topics include the society, politics, and culture of the indigenous Caribbean; European trade and settlement; indigenous responses and resistance to conquest; variations in European imperial systems; the transatlantic slave trade; slave law; creolization, plantation slavery and slave society; the politics and culture of the enslaved; enslaved resistance; the Haitian Revolution; agriculture and society beyond the plantation; and slave emancipation.

HIST3825
Disability History (A)
3 ch (3C) [W]
This course uncovers a history of disability in North America from pre-conquest to the twentieth century. It traces the experiences of individuals and communities of people with a wide range of visible and invisible conditions now understood as "disabilities." Rather than treating disability as merely a medical impairment, we will explore the historical and cultural variability of disability. Topics covered include: indigenous notions of ability and disability; disability and colonialism; education and institutions; gender, sexuality, and race; eugenics; freak shows; social welfare and charitable programs; disability and war; the Deaf community; and the disability rights/independent living movement.

HIST3851
Growing up: Histories of Children, Youth and Family (A)
3 ch (3C)
Explores various historical aspects of childhood, adolescence and family life that may include education, health, child labour, child migration, juvenile delinquency, amusements, and/or institutionalization. Discusses changes over time in both adult perceptions of childhood and the lived experience of growing up, as well as the intersections of race, class, gender, and age-based identities. Not available for credit to students who have completed HIST 3351.

HIST4608
Beastly Histories: Humans and Other Animals (O) 3 ch (3C) [W]
What defines a human? What defines an animal? Throughout the course of human history, people have interacted with other animals, not only using them for food, clothing, labour and entertainment, but also associating with them as pets and companions, and even appreciating their behaviours intrinsically. Non-human animals have been our symbols and models, and they have even channelled the sacred for us. This course will explore the interactions of humans with other animals from roughly the fifteenth to the nineteenth century. A key theme in this course is the use of animality as a trope to justify the subjugation and dispossession of certain groups of peoples.

HIST4625
Gender and Slavery in the Atlantic World (O)
3 ch (3C) [W]
This course examines the relationship between gender and the experience of slavery, abolition, and post-emancipation in different societies in the Atlantic World from the early 17th century to the late 19th century. Geographic regions covered include Brazil, the Caribbean, Spanish America, the U.S. South, West Africa, and Western Europe. The course discusses themes relating to the impact of slavery and emancipation on the social construction of race, gender identities, class relations, and political authority in several slaveholding and slavery-based Atlantic world societies. Gender’s impact on labour and familial experiences in slaveholding and slavery-based societies is also a major focus. The course is designed to give students transnational, trans- and comparative insights into how slavery and gender have shaped relations within and between communities in the Atlantic region.

History of Art and Music

HIST3701
The Cultural Turn: Cultural Studies in Historical Context (O) (Cross-Listed: CCS 3701)
Traces the history of cultural studies from its debated foundation through the Birmingham school in post-war Britain, to its reshaping by post-Marxist, postcolonial, feminist, poststructural, and diasporic perspectives. Analyzes the key debates in cultural studies at the onset of the twenty-first century, which include the field’s reorientation towards the study of popular culture, activism through cultural politics, the politicization of knowledge and of the academy, and “the cultural turn” of the humanities and social sciences.

HIST3725
Baroque Art and Culture in Rome (O)
3 ch (3C) [W]
Explores the art and architecture of the 15th to the 17th centuries in Rome. Through visits to churches, palaces, galleries, museums, and public spaces such as fountains, monuments, and piazzas, participants consider a range of key issues including artistic styles and techniques, the display of religious belief, the assertion of social and political authority, the status of female artists, and the representation of the body. Normally taught on location.

HIST3735
The History of Modern Art (O)
3 ch (3C) [W]
Examines the development of painting, sculpture and architecture from 1863 until approximately 1950 in Europe and the United States.

HIST3736
Art for a Nation?
Visualizing Twentieth-Century Canada (O)
3 ch (3C) [W]
Examines the production, diffusion, and consumption of visual and material culture in Canada from the end of the nineteenth century to the present day. Topics include the role of art for nation-building; modernity and antimodernism; indigenous self-representation and sovereignty; the intersections of public history with cultural “difference” and racialization; video art and cultural performance as a site of resistance; and the framing of the local through artistic practice. From year to year, this course draws on such visual resources as the permanent collection and temporary exhibitions of the Beaverbrook Art Gallery and documentary film and video art.

HIST3745
Visual Cultures and Colonialism (O)
3 ch (3C) [W]
This course examines visual culture produced in the context of colonial and imperial histories. Students consider twentieth- and twenty-first century interpretations of colonialization from non-European perspectives. We will focus on art and film, but will also draw upon literary, political, and theoretical texts.

HIST3765
History of Music in Medieval and Renaissance Periods (A) (Cross-Listed: MUS 3765)
Introduction to music between 800 and 1600, studying representative styles and periods, with emphasis on the development of musical form and style. Functions of music among the literate and non-literate, the religious and the secular. Historical context. In addition to considering cultural forms and practices such as fountains, monuments, and piazzas, participants consider a range of key issues including artistic styles and techniques, the display of religious belief, the assertion of social and political authority, the status of female artists, and the representation of the body. Normally taught on location.

HIST3775
History of Music in the Late Baroque and Classical Period (A) (Cross-Listed: MUS 3775)
Beginns with an examination of the stylistic background of music of the Baroque Period, and follows the development of musical form and style through the late Baroque, the Classical, and the Romantic periods (1600 - c. 1850). Some attention will be given to the role of the musician in the context of the social history of the time.
HIST3785 History of Music in the Romantic Era (A) 3 ch (3C) [W]
(Cross Listed: MUS 3785)
Traces musical development in nineteenth century Europe in its cultural-historical milieu, mainly in France and Germany. Examines the development of the symphony, the sonata, the concerto, and the French and Austro-German contribution to that development, the role of nationalism in music and the role of the opera.

HIST3795 A History of Music in the Twentieth Century (O) 3 ch (3C) [W]
(Cross Listed: MUS 3785)
 Begins with an examination of the Post-Romantic composers, particularly Mahler and Strauss. Studies Debussy and the Impressionists, the Second Viennese School (Berg, Schoenberg, Webern) and its impact on twentieth-century music and the tonalist composers of the first half of the century. Examines music as an art form in North America.

HIST3796 History of the Music Dramas (O) 3 ch (3C) [W]
of Richard Wagner (Cross Listed: MUS 3796)
An examination of the theoretical constructs behind Wagner's music dramas, the compositional histories of some of the dramas of the 1840's, and then of the Ring Cycle itself. Some attention will be given to the performance history of the dramas as well.

HIST4705 Art, Tourism and Modernity (O) 3 ch (3C) [W]
Considers the relationship between artistic practice, tourism, and modernity. Examines objects of art and culture as they intersect with the structuring of social relations, such as those between centre and periphery, First and Third Worlds, "developed" and "developing" areas, metropolis and countryside. Makes significant use of historical film and contemporary video art as visual resources. NOTE: a field trip may be required. Cost varies to a maximum of $30.

Military History

HIST3803 War Through Film (A) 3 ch (3C) [W]
Examines how selected themes in the history of war have been represented in both documentary and dramatic films, how film has shaped our understanding of the nature of war, and how it is used as an historical document by military historians.

HIST3805 Master and Commander - Royal Navy History 3 ch (3S) [W]
Through its Ships, Museums and Archives (O)
This course introduces students to Royal Navy history through touring the surviving ships and dockyards, study of naval artifacts in museums, and archival research. Tours will be supported by a limited amount of classroom instruction in London. Normally taught on location.

HIST3806 The Mediterranean in the Second World War: 3 ch (3C) [W]
Strategic Crossroads of a Global War (O)
Introduces the military and diplomatic history of the Second World War through an in-depth look at the Mediterranean campaigns, intrigues and deception conducted by the Western Allies against Italy and Germany. These campaigns in North Africa, Sicily, Italy and the Balkans generated a mixture of tension and compromise between American, British and Russian decision makers as well as the 27 separate contributing nations from Commonwealth Canada and India to free Poland, France and lesser known Brazil and Palestine. Focuses on the formulation of grand strategy, the links between civil and military war objectives, the problems of multi-national coalition warfare, and the planning and execution of combat operations in some of the most difficult and rugged terrain of the war.

HIST3810 The Second World War in Italy (O) 6 ch (6S) [W]
This team-taught course explores the rise of Fascist Italy, its alliance with Nazi Germany and the bitter struggle waged against them by the Allies and anti-fascist Italians from 1943-45. Will be taught on location throughout Italy, and centres on visiting historic sites, monuments and battlefields. Italy's unique geography made the campaign especially difficult for its participants and provides students with the subject for much of their study. Although the course addresses the campaign as a whole, special attention is paid to the highly successful, yet little-known, Canadian contribution to the battles at Ortona, the Liri Valley and the Gothic Line.

HIST3811 Unconventional War in the Modern World (O) 3 ch (3C) [W]
This course explores the rise to prominence of unconventional warfare since 1945. It discusses the reasons for dominance of these forms of warfare and the implications of it for governments, military forces and civilian populations. The course introduces students to the concepts of revolutionary war, guerrilla warfare, terrorism, covert action, and counter-insurgency, the theories and their theorists. These themes will be illustrated through a series of case studies, from the insurgencies of the post-1945 anti-colonial period to the ethnic conflicts and genocides of the post-Cold War era.

HIST3812 War and Diplomacy in the Middle East, 1914-84 (A)
3 ch (3C) [W]
Examines the sources and conduct of warfare in the modern Middle East from the First World War to the Persian Gulf Conflict, against the background of emerging nationalism and new states, and great power intervention and diplomacy.

HIST3814 Conventional War since 1945 (O) 3 ch (3C) [W]
This course examines the causes, conduct, and consequences of the major conventional wars fought since 1945. It will explain reasons for the shift of war from Europe to the non-European world; changes in the way war has been conducted; with particular emphasis on technological change and the impact on the battlefield and on non-combatants; and changes in the way military forces are created, commanded and used. These themes will be illustrated through a series of case studies from the Korean War to the war in Iraq.

HIST3825 The Nature and Limits of Military Power, 1500-2000 (O) 3 ch (3C) [W]
Explores the uses, abuses and development of military power within Western society since 1500. Focuses on how military power is shaped and limited by the technological, social, political, ideological and economic factors of the day. Restriction: Credit will not be given for both HIST 1004 and HIST 3825; and this course is not available for credit to students who have taken HIST 2825.

HIST3835 Canada and the Experience of War, 1600-2000 (O) 3 ch (3C) [W]
Examines how Canadian history has been shaped by military action or the threat of it. Studies Canada as a battleground for European empires in the colonial period, later as an element of British imperial defense policy against the United States, and finally Canada's emergence as an independent player in the major conflicts of the twentieth century. Restriction: Not available for credit to students who have taken HIST 2835.

HIST4801 War and Society in the Age of Black Powder 1550-1865 (O) 3 ch (2C 1T) [W]
Examines the nature of warfare in Europe and North America in the Early Modern period.

HIST4803 The First World War (O) 3 ch (2C 1T) [W]
A military history of the First World War, relating events on the various fronts to their social, political and strategic contexts and looking at tactical, technological and doctrinal developments in the use of arms.

HIST4804 The Second World War: The Sea, Land and Air Campaigns (O) 3 ch (2C 1T) [W]
Examines the campaigns, their technical and tactical developments, and principal personalities.

HIST4807 History of the Canadian Forces, 1867-1953 (A) 3 ch (2C 1T) [W]
After sketching the period of British military responsibility, this course traces the development of Canadian defence policy and the emergence of Canada's military forces from Confederation to the Korean War. The primary focus of the course is on the way in which hastily mobilized citizen armies fought the two world wars of the twentieth century and developed a high degree of professionalism in the process.

HIST4808 History of the Canadian Forces, 1953-Present (A) 3 ch (2C 1T) [W]
This course traces the evolution of Canadian defence policy and the Canadian Forces through the Cold War and its aftermath. Special attention is paid to Canada's role in conflict zones around the world as part of the United Nations, NATO and other international coalitions, and to the often vexed relationship between Canada and its professional Armed Forces.

HIST4815 Seapower and Empires, 1400-1850 3 ch (2C 1T) [W]
The use of seapower as an instrument of state policy during the period 1500 to ca. 1850. Examines institutional, theoretical, economic, political, social, and technological factors that shaped seapower over the period, with particular attention to Britain's experience.

HIST4825 Seapower and World War Two 3 ch (2C 1T) [W]
Focuses on the use of seapower and navies as instruments of state policy in the modern world since 1850. Emphasis will be placed on technological, political and strategic use of the sea in peace and war, with particular concentration on the use of seapower in the two world wars of the twentieth century.

HIST4835 Soldiering Through the Ages (A) 3 ch (3C) [W]
Examines the military experience of the soldier from the Greek hoplite to the modern warrior. Focuses on such subjects as recruitment, training and
preparation for battle and wartime experience, through the vast primary literature that chronicles the life of the soldier.

HIST4841 The Spy in History: Intelligence in War and Diplomacy (A)
3 ch (2C 1T) [W]
Examines the growth and function of national intelligence communities in Britain, the United States, and the Soviet Union in the twentieth century. Explores the tactics of intelligence and its impact on decision-makers, on military operations, and on diplomacy.

HIST4851 Law and War (O)
3 ch (3S) [W]
Examines legal restraints on armed combat since circa 1500. Explores, among other topics, the recent influence of international legal regimes on military strategy, on land, sea and air action, and on peace-keeping.

HIST4861 Terrorism in History (O)
3 ch (3C) [W]
This course examines the use of terrorism as an agent of political change and repression in history. It introduces students to the debates over the definition and nature of terrorism and over the causes of the phenomenon. It explores the use of terrorism by institutional and state apparatus and by non-state groups, and the theories and theorists which underpinned its use. The course also discusses the impact on victims and societies, and efforts by nation-states and the international community to deal with the issue. Cases used to illustrate the course themes will cover the span of history, but will concentrate primarily on the 20th century.

History of Science

HIST3925 Technology and Society (A)
3 ch (3C) [W]
Examines contemporary ideas about how technology shapes and is shaped by society and culture, historically and today. Considers theories of technological determinism, technology and religious thought, the role of innovation in industrialization and economic growth; the problems of regulating risky technologies; the impact of Information Technology, and the shaping of Canadian science and technology policy. Restriction: Not open to students who have taken HIST 2925.

HIST3975 History of the Life Sciences (A)
3 ch (3C) [W]
Explores the struggle between vitalistic and mechanistic conceptions of life in the development of biology, the emergence of evolutionary theory and its social and religious consequences, and the technological influence of the life sciences on the rise of modern medicine and genetic engineering. No scientific background expected. Restriction: Not available for credit to students who have taken HIST 2915.

Directed Readings and Practicums

HIST3550 Directed Reading Course/Practicum
6 ch (3C) [W]
A detailed study of a specific historical topic. Working under the direction of a member of the Department or an associate of the Department, the student will complete directed readings, written assignments and/or practicum requirements. Prerequisite: Permission of the instructor and the Department.

HIST3554 Directed Reading Course/Practicum
3 ch (3C) [W]
A detailed study of a specific historical topic. Working under the direction of a member of the Department or an associate of the Department, the student will complete directed readings, written assignments and/or practicum requirements. Prerequisite: Permission of the instructor and the Department.

HIST4550 Directed Reading Course/Practicum
6 ch (3C) [W]
A detailed study of a specific historical topic. Working under the direction of a member of the Department or an associate of the Department, the student will complete directed readings, written assignments and/or practicum requirements. Prerequisite: Permission of the instructor and the Department.

HIST4554 Directed Reading Course/Practicum
3 ch (3C) [W]
A detailed study of a specific historical topic. Working under the direction of a member of the Department or an associate of the Department, the student will complete directed readings, written assignments and/or practicum requirements. Prerequisite: Permission of the instructor and the Department.

HIST5007 Gender and Sexuality in Twentieth-Century Europe (O)
3 ch (3S) [W]
Discusses themes and theories in the history of gender and sexuality in twentieth-century Europe. Examines such topics as “deviant” sexualities at the fin-de-siècle; gender upheaval in the First World War; the “New Woman” of the 1920s; gender and race in Nazi Germany and Fascist Italy; sexual violence in war and genocide; the evolution of the homosexual rights movement; prostitution and the international sex trade; and debates over birth control and maternalism in modern society.

HIST5011 Reform and Revolt in Europe, 1500-1555 (A)
3 ch (3S) [W]
Examines the motives behind and relationships between the various movements of reform and popular revolt which convulsed Northern Europe in the sixteenth century. Topics include the learned reform proposals of Erasmus of Rotterdam, Martin Luther and Jean Calvin; the transmission of ideas of the sixteenth century; the rise of popular movements of reform; the role of women in early reform agitation; the Peasants’ Revolt of 1524-26; the beliefs of the radical reformers (Anabaptists and Spiritualists) and their suppression; the rise of Catholic Counter-Reformation movements; and the political developments leading to the Peace of Augsburg in 1555. Not available for credit to students who have taken HIST 5010.

HIST5012 The Late Reformation and the Rise of Witch-hunting in Europe, 1550-1648 (A)
3 ch (3S) [W]
Focuses on the broader effects of the European Reformation(s) upon religion, society and the beliefs and practices of people in the second half of the sixteenth century. Examines in particular the relationship between the religious changes and conflict of the Reformation and developments in the governance and regulation of religion, views about women, new ideas about science and magic, the increase in the fear of the devil, and the rise of witch-hunting. Not available for credit to students who have taken HIST 5010.

HIST5028 Fascism (A)
3 ch (3S) [W]
Examines the rise of fascist movements and the development of fascist regimes in twentieth-century Europe. Topics to be covered include: the social and cultural roots of fascism, the impact of the First World War, the structures of dictatorship, society and culture under the fascist regimes, racial policy, foreign policy and war, and neo-fascism after 1945. While the course pays particular attention to Italian Fascism and German Nazism, other movements and regimes will be considered. Students who have taken HIST 5026 and HIST 5027 may not take this seminar for credit.

HIST5032 France in Crisis, 1930 - 1945 (O)
3 ch (3S) [W]
Examines the history of France during the “Dark Years”, when the country was beset with sharp political divisions and faced Nazi invasion and occupation. Topics to be covered include: political conflict in the 1930s; explaining the defeat of 1940; the rise of the Vichy Regime and the National Revolution; collaboration with the Third Reich and the persecution of minorities; the lives of women and men under foreign occupation; the fate of the French colonial empire; the rise of the Resistance; and the Liberation of France and its aftermath.

HIST5035 The Holocaust (A)
3 ch (3S) [W]
A study of “the Final Solution to the Jewish Problem”, the program of genocide developed by German National Socialists against the Jews of Europe from 1933 to 1945.

HIST5010 The Mental World of Europeans, 1300-1600 (O)
3 ch (3S) [W]
Examines the "mental world" of late medieval/early modern Europeans using the most recent research in the field. Introduces students to the latest studies of popular culture, mentality, and the "new social history", as applied to Europe. Topics of interest include: the debate over popular vs. elite culture; the universe as conceived by both learned and unlearned; the differences between "popular" Christianity and official religion; the relationship between magic, religion and science; beliefs about illness, health and medicine; views of death and the afterlife; and others.

HIST5103 Gender, Race and Disease in the Early Modern Atlantic World (O)
3 ch (3S) [W]
Investigates early modern gender, race and disease through the movements, interactions, and exchanges between peoples of the Atlantic World (specifically, Europe, Africa, and the Americas) during the seventeenth and eighteenth centuries. Themes include: disease and "the body"; climates and geographies of ill health; trade, empire, and disease environments; constitution, complexion and "race"; gender and sexuality.
### HIST5104 Atlantic Revolutions, 1763-1848 (O) 3 ch (3S) [W]
Between 1763 and 1848 social and political upheavals - including the American Revolution, the French Revolution, the Haitian Revolution, and revolutions in the Spanish and Portuguese Empires - shook the Atlantic World. Slave revolts in the Caribbean and North America fed debates on slavery, and reformers in British North America debated local democracy and responsible government. This course focuses on the revolutions and reform movements that transformed the Americas, the imperial circumstances that engendered them, and the diverse communities and constituencies that shaped them and were in turn shaped by them: rebels and loyalists, reformers and conservatives, indigenous nations, and enslaved Africans and their descendants.

### HIST5275 Health and Medicine in Early Modern England (O) 3 ch (3S) [W]
Investigates the social, intellectual, and economic dimensions of early modern English health and medicine, circa 1500-1800. Themes include: knowledge and practice; medical expertise (lay and commercial); the medical marketplace; patient-doctor relationships; the role of the hospital. Considers how factors such as age, gender, and socio-economic status, as well as family and community, shaped various aspects of health and healthcare in England from the sixteenth to the eighteenth centuries.

### HIST5312 Native Peoples and Canadian American State Policy, 1824-1982 (O) 3 ch (3S) [W]
Examines the different ways in which the Canadian and American governments have attempted to deal with Native peoples living inside their borders. Particular attention is paid to the ideological underpinnings of government policy, the various legislative acts defining the relationship between the immigrant societies and Native peoples, and the responses of Native peoples to government initiatives.

### HIST5331 Film and History in Canada (O) 3 ch (3S) [W]
Examines the uses of visual history in the representation and popularization of the Canadian past. Case studies involve both documentary and feature productions from several periods in the history of Canadian film.

### HIST5335 A History of the Canadian Left 3 ch (3S) [W]
A course in social, political, and intellectual history examining the history of the left in Canada from the eighteenth century to the present. Topics include the origins of the radical tradition, utopian and cooperative reform, socialism and feminism, the Communist Party, the Cooperative Commonwealth Federation, the New Democratic Party, the New Left and other alternatives.

### HIST5342 Environmental History of North America (O) 3 ch (3S) [W]
Examines the interaction of the peoples of Canada and the United States with the natural environment. Topics include the theory and methodology of environmental history, changing patterns of land use, resource depletion and industrial migration, the environmental implications of urbanization, and the intellectual and institutional development of the conservation/environmental movement.

### HIST5345 Natural Resources, Industrialization and the Environment in Atlantic Canada (A)
Examines the political, economic, and environmental implications of the dependence on natural resources in Atlantic Canada, through an examination of the historical development of the forest, fishing, agricultural and mining industries from the eighteenth century to the post-Second World War period.

### HIST5353 Canadian Women's History (A) 3 ch (3S) [W]
This seminar is designed to encourage students to think about relevant topics and approaches to the history of women in Canada. Using both primary and secondary materials, the seminar focuses on themes drawn from the 19th and 20th century. Themes include, but are not limited to: major approaches to Canadian women's history; historiography; women's work and family lives; women and politics, migration/immigration; aboriginal women's lives; women's experiences of war; social reform movements; women in professions; women and health; feminism.

### HIST5381 Health and Disease in Historical Perspective (O) 3 ch (3S) [W]
Focuses on nineteenth and twentieth century understandings of health and disease in North America. Stresses how gender, class, race/ethnicity affect historical understandings of disease.

### HIST5388 Understanding the Virtual Past; Making Digital History (A) 3 ch (3S) [W]
Introduces students to the emerging fields of digital history and virtual museum studies by combining theoretical readings with practical content on the creation and maintenance of digital archives and web design. At the end of this course students will be familiar with the ways in which historical documents, artifacts and other materials can be framed and reframed digitally to allow for new readings and interactions between them. Depending on enrollments from year to year, this course will have students digitize historical sources; create interactive websites; and prepare written assignments on the digitization process and the ways in which new media create and shape historical consciousness.

### HIST5403 The Loyalists 3 ch (3S) [W]
Studies the Loyalists during the American Revolution and in exile in British North America, Great Britain, Sierra Leone, Bermuda, the Bahamas, the British West Indies and Central America. Also considers their long-term political and social role particularly in Canada, including the Loyalist myth. One week devoted to local Loyalist remains such as - houses, and museum and art gallery holdings, etc.

### HIST5445 The United States in the Progressive Era, 1890-1920 3 ch (3S) [W]
Examines themes in the history of the United States at the turn of the nineteenth century, including the development of Populism, Progressivism, imperialism, anti-imperialism, and the impact of America's entry into the First World War. Explores the social, cultural, and political consequences of industrialization and modernization. Prerequisites: HIST 2404 or permission of instructor.

### HIST5459 Watergate: Political Scandal in Contemporary America 3 ch (3S) [W]
Teaches about the American political scandal Watergate, which erupted in July 1972, resulting in the resignation of President Richard M. Nixon in August 1974. It focuses on the scandal's causes, implications for democracy, and the nature of American political culture in the 20th century.

### HIST5475 Modernist Manhattan (O) 3 ch (3S) [W]
Explores the innovations and institutions that made New York City the epicentre of North American modernism. Considers a range of cultural products and processes, including bohemia, literary and visual culture, the cross-fertilization of "black" and "white" forms and traditions, improvisation and the jazz scene, the grounding of critical authority, the politics of authenticity, and the interplay between the avant-garde and the popula.

### HIST5555 Directed Research Seminar (O) 3 ch (3S) [W]
This Honours Seminar provides an in-depth introduction to primary source research in a field of history using a body of documents from the professor's area of specialization and of his or her choosing.

### HIST5605 Freedom on Trial: Slavery, Violence, and the Law (O) 3 ch (3S) [W]
This course explores histories of slavery and the law throughout the Caribbean and North America from European conquest in the fifteenth and sixteenth centuries to the abolition of slavery in the nineteenth century. We will read primary sources, including slave laws, trial transcripts, treaties, and first-person narratives. Topics include: indigenous forced labour relations; slave laws; crime and punishment; manumission; the legal position of free persons of African descent; abolition and the meaning of freedom; the transatlantic slave trade and international law; and the origins of human rights.

### HIST5606 The African Diaspora and the Atlantic World, 1492-present (O) 3 ch (3S) [W]
What is the African Diaspora? What is the Atlantic World? How do these approaches to the histories of colonialism, slavery, and trade complement and/or differ from each other? Is the Black Atlantic synonymous with the African Diaspora? This Honours seminar will engage with critiques of the concepts of the 'Atlantic World' and 'Black Atlantic' and question whether such terms are useful in conceptualizing blackness in transnational and global terms. The course will introduce students to thinking about the relationship between historiography on the one hand, and the context for the production of that historiography: 20th- and 21st-century political struggles and the race, class, and gender transformations of academia.

### HIST5607 The Haitian Revolution (O) 3 ch (3S) [W]
This honours examines the Haitian (Saint Domingue) Revolution (1791-1804), the largest and arguably only successful anti-colonial slave rebellion in the western hemisphere, which transformed the French Colony of Saint Domingue, the richest colony in the Caribbean, into the independent state of Haiti. It places the Haitian Revolution within the "Age of Revolutions" (1776-1848), while re-centering it within its own narrative, not as an echo of those that preceded it. By reading a combination of primary and secondary sources, we will trace how the revolution unfolded and the ideologies that inspired it, including anti-colonialism, anti-slavery, and anti-slavery.
The advanced seminar allows select students to participate in one oneto-one interaction with a professor with whom the student is enrolled in a 3 or 6 ch seminar. The seminar is available for credit to students who have completed HIST 5900.

Fourth Year Reading/Research (O) 6 ch (3S) [W]
This course is compulsory for third year Single Honours students. It explores the key points of controversy surrounding the origins, personalities and conduct of the war on the Western Front. Particular attention will be paid to the role of the British Expeditionary Force, of which the Canadian Expeditionary Force was an increasingly important part.

The Art of Public History (A) 3 ch (3S) [W]
Reviews the key events and issues of the military campaigns of the Second World War, and wrestles with how historians and writers of memoirs have portrayed them. Provides a survey of the major historical problems surrounding the conduct of the war, including: the collapse of the West; the German invasion of Russia; the Japanese attack on Pearl Harbour; area bombing; Normandy; and the bombing of Hiroshima and Nagasaki.

Seapower 3 ch (3S) [W]
Theatricality studies the role of naval power in shaping the modern world.

Themes in naval history. Uses selected problems to explore the role of naval power in shaping the modern world.

Explores major themes relating to the history of war and diplomacy in the region in the twentieth century, including: Zionism; pan-Arabism; decolonization; the super powers; the Palestinians; and fundamentalist Islam.

HIST515
Fourth-Year Advanced Seminar 3 ch (3S) [W]
The advanced seminar allows select students to participate in one of the seminars offered to History graduate students for Honours credit. Normally open to History Honours students in the final year of their studies with the approval of the course instructor and the Department.

Honours Thesis 6 ch (R) [W]
A reading and research course open to exceptional Honours students in their fourth year which should be used to produce an Honour Thesis. Permission to take this course must be sought from the professor in the desired field and the project must be approved by the Department. This course may be used as an alternative to a seminar in the fourth year. It requires a CGPA of at least 3.6 in History courses for admission.

INFORMATION SYSTEMS
See beginning of Section H for abbreviations, course numbers and coding.

The *L notation indicates that labs are held on alternate weeks.

HIST5920
Honours Thesis 6 ch (R) [W]
A researich and reading course open to exceptional Honours students in their fourth year which should be used to produce an Honour Thesis. Permission to take this course must be sought from the professor in the desired field and the project must be approved by the Department. This course may be used as an alternative to a seminar in the fourth year. It requires a CGPA of at least 3.6 in History courses for admission.

INFO1003
Foundations of Information Systems 4 ch (3C 2L)
This course is designed to introduce students to contemporary information systems and demonstrate how these systems are used throughout global organizations. The focus of this course will be on the key components of information systems - people, software, hardware, data, and communication technologies, and how these components can be integrated and managed to create competitive advantage. This course also provides an introduction to systems and development concepts, technology acquisition, and various types of enterprise information systems such as Enterprise Resource Planning (ERP), Supply Chain Management (SCM), Customer Relationship Management (CRM), and decision support systems. Prerequisite: None. NOTE: Normally intended for first-year BISyS students and interested students from other degree programs. Credit is not given for both INFO 1003 and ADM 3713.

INFO1103
Data and Information Management 4 ch (3C 2L)
Topics include: History and motivation of information systems; database system components; relational data model; relational algebra; SQL language; data integrity, security and privacy; data modeling and logical database design; indexing and physical database design; rapid application development; user interface design; data validation and exception handling; accessing a database using an API (such as ADO.NET and JDBC); stored procedures and triggers; introduction to web development, three layered architecture, and XML. NOTE: Credit is only given for one of CS 2513, CS 2533, INFO 1103 and INFO 2103. Prerequisite: CS 1073.

INFO2403
Information Security 4 ch (3C 1T)
This course gives an introduction to information security. It examines the fundamentals of the modern threat landscape, introducing the concepts of malware and denial-of-service attacks. The course covers security mechanisms such as intrusion detection, authentication, access control, and cryptography. Students will also study the basics of security planning, including risk assessment and incident response. Prerequisites: INFO 1103, CS 2263, and (MATH 1833 or CS 1303 or equivalent) and INFO 4103, and CS 2533.

INFO3103
Programming on the Web 3 ch (3C) [P]
Modern web techniques and technologies. Exposes students to traditional web page technologies, but focuses on the dynamic web, including structure and communication between server and client, whether it be machine-to-human, machine-to-app or machine-to-machine, using web services. Topics will include transport protocols and data representation for mobile computing and machine-to-machine communication, as well as client technologies to support dynamic web pages. Prerequisites: INFO 1103 and (CS 2033 or CS 2043). CS 2613 recommended.

INFO3103
Enterprise Information Systems 4 ch (3C 2L)
Topics include: Information systems within an enterprise environment; Decision support systems; data warehousing; reporting systems and OLAP; data mining applications; e-Business models and strategies; information privacy and security policy; enterprise resource planning; customer relationship management; supply chain management; collaboration systems. Prerequisites: INFO 1103 and 60ch. NOTE: Credit will not be given for both CS 3513 and INFO 3303.

INFO4023
Information System Administration 3 ch (3C)
Topics include: Enterprise Information Systems 4 ch (3C 2L)
Topics include: Information systems within an enterprise environment; Decision support systems; data warehousing; reporting systems and OLAP; data mining applications; e-Business models and strategies; information privacy and security policy; enterprise resource planning; customer relationship management; supply chain management; collaboration systems. Prerequisites: INFO 1103 and 60ch. NOTE: Credit will not be given for both CS 3513 and INFO 3303.

INFO4303
Information System Administration 3 ch (3C)
Topics include: enterprise information systems 4 ch (3C 2L)
Topics include: internal database structure; query evaluation and optimization; transaction management and concurrency control; database recovery; distributed and parallel database architectures; physical database design; performance tuning and capacity planning; database administration; technical architecture design and systems integration. Prerequisites: INFO 1103 and 60 ch (CS 3413 recommended).
**SECTION H: FREDERICTON COURSES**

**INFO4900 Information System Design Project**  6 ch (6L) [W]
An information design and implementation experience involving a medium to large group. Students prepare requirements, specification, analysis and design documents as a team toward development of an information system and use the documentation to implement and test the system. Students manage their projects professionally, present their design work orally, and demonstrate formally that the product meets its requirements. **Prerequisite:** CS 2043, CS 3503, 90 ch and permission of the instructor. Students may not take both SWE 4040 and INFO 4900 for credit.

**INTERNATIONAL DEVELOPMENT STUDIES**
See beginning of Section H for abbreviations, course numbers and coding.

**IDS1103 Introduction to Development Studies: Global**  3 ch (3C) [W]  **Perspectives on Human Inequality**
Poverty, inequality and injustice are present features on our world. This foundational course sets out to answer the following questions: How did things get this way? What has been done about it? And, what progress is being made? As these questions are explored we survey many of the salient issues in the field of international development studies including climate change, war, debt, global trade rules, foreign aid, hunger and malnutrition, habitat destruction, rural and urban livelihoods, and population growth.

**IDS2103 Institutions, Practices, and Perspectives on**  3 ch (3C) [W]  **International Development**
This course is a sequel to IDS 1103. It explores i) how actors including international organizations, states, non-governmental organizations, and community-based groups have struggled to achieve greater economic, political, and social justice ii) how social scientists, development practitioners, and community activists have assessed the key practices and debated the key theories of international development. Students cannot obtain credit for more than one of the following: IDS 2103, IDS 3002 or IDS 3003.

**IDS3903 Independent Study in International Development Studies**  3 ch (R) [W]
Upon application through the Coordinator of the International Development Studies program, students in IDS may undertake independent studies with a faculty member of the program. It is expected that students will have a clear idea of their intended area of study and must submit a written proposal justifying it as an independent studies course. No student will be allowed to take more than 3ch of independent study in completing the IDS requirements for a Joint Honours or Double Major program. Independent studies courses will not count as meeting the Honours thesis requirements.

**IDS4003 International Development Studies Practicum**  3 ch
This course integrates learning with a community based service project on an overseas international development initiative. The aim is to enrich students' education by providing a unique opportunity for acquiring firsthand skills and experiences. Students must consult with the IDS Coordinator to develop their Practicum prior to registration. The course is graded on a Credit/No Credit basis. **Prerequisite:** Any one of the following: IDS 1103, IDS 2003, IDS 2103, IDS 3003 or permission from the instructor.

**IDS4103 Advanced Topics in International Development Studies**  3 ch (3S) [W]
This course explores evolving perspective and schools of thought in the field of International Development Studies ranging from earlier modernization theory through to recent ‘grassroots postmodernism.’ Specific subjects covered may include the movement of peoples, the legacy of failed states and protracted regional conflicts, agrarian transformation, and the impact of infrastructural projects, the question of sustainable development, global development organizations, and political resistance. **Prerequisite:** Any one of the following: IDS 2103, IDS 3002, IDS 3003, or permission from the instructor.

**IDS4203 Development Project Design**  3 ch (3S) [W]
This course considers the practical and transferable management skills necessary to plan, implement, monitor and evaluate development projects, using group discussions, realistic project scenarios, and exercise simulations. **Prerequisites:** Any one of the following: IDS 2103, IDS 3002, IDS 3003, or permission from the instructor.

**IDS4900 Honours Thesis in International Development Studies**  6 ch R [W]
This course is compulsory for Honours students. The student conducts an independent research project on an important issue concerning international development studies under the direction of a member of the IDS program. **Prerequisite:** Any one of the following: IDS 2103, IDS 3002, IDS 3003, or permission from the instructor.

**JAPANESE**
Courses in Japanese Language are offered at the Introductory Level and occasionally at the Intermediate Level if resources are available. See beginning of Section H for abbreviations, course numbers and coding.

**JPNS1013 Introductory Japanese I**  3 ch (3C)

**JPNS1023 Introductory Japanese II**  3 ch (3C)
Continuation of JPNS1013. Focuses on communicative aspects as well as practice of reading and writing in Hiragan. Katakana and basic Kanji, the other writing system in Japanese, are introduced. Not open to native speakers.

**JPNS2013 Intermediate Japanese I**  3 ch (3C)
Develops the communicative skills necessary for a wide range of everyday situations. Focuses on both conversation and writing systems, developing vocabulary and sentence structures. One hundred Kanji characters are introduced and practiced. **Prerequisites:** JPNS 1013 and JPNS 1023.

**JPNS2023 Intermediate Japanese II**  3 ch (3C)
Continuation of JPNS2013. The textbook “Genki I” is completed with this course and students reach the level of Level IV Japanese Proficiency Test. **Prerequisite:** JPNS 2013.

**KINESIOLOGY**
See beginning of Section H for abbreviations, course numbers and coding.

**General Information**
KIN 1001 is considered to be a prerequisite or co-requisites to all other Kinesiology (KIN) and Recreation (RSS) courses for students enrolled in one of the degree programs offered by the Faculty of Kinesiology. Recreation and Sports Studies (RSS) courses are grouped together and listed in their own section of this calendar.

**NOTE:** See Standard Courses Abbreviations for abbreviations, course numbers and coding.

**POLICY ON NON-FACULTY OF KINESIOLOGY STUDENTS TAKING KIN AND/OR RSS COURSES**
Due to the extensive number of KIN and RSS courses full with a waitlist, and to the highly competitive nature of upper-year admissions, the number of KIN and RSS credit hours that a student not registered in a degree program offered by the Faculty of Kinesiology may register for is limited. Students not registered in a degree program offered by the Faculty of Kinesiology, and wishing to register for KIN and/or RSS courses shall be governed by the following:

1. A student not registered in a degree program offered by the Faculty of Kinesiology must have permission of the course instructor to register in any KIN and RSS course.
2. Normally, all students must have successfully completed all required **Prerequisites** to a KIN or RSS course prior to admission to KIN and RSS courses. **Waiver of Prerequisites** is permissible only with consent of the Instructor.
3. In all KIN and RSS courses students registered in a degree program offered by the Faculty of Kinesiology, and wishing to register for KIN and/or RSS courses will be given priority.
4. Normally, KIN 1001 shall be restricted to students in the degree programs offered by the Faculty of Kinesiology.
5. Normally, KIN 1001 is the *Prerequisites* to all 2000, 3000 and 4000 level KIN and RSS courses.
6. Normally, students not registered in a degree program offered by the Faculty of Kinesiology shall be limited to twelve (12) credit hours of KIN/RSS courses.

**KIN1001 Introduction to Kinesiology**  4 ch (3C 1T) [W]
This course is designed as a thematic introduction to the academic discipline of Kinesiology. The course surveys the basic concepts, theories and analytical methods of Kinesiology and their application to the study of human movement in recreation, sport, exercise and physical activity. Weekly sessions include three lectures and one tutorial. KIN 1001 is restricted to students registered in the Faculty of Kinesiology.

**KIN1160 Laboratory Methods in Kinesiology**  4 ch (2C 2L)
This laboratory based course introduces the student to the basic laboratory techniques and methods for the collection of kinesiological data.
Experience will be gained through a series of laboratory sessions in each of the exercise science disciplines (motor control, exercise physiology, biomechanics, and sport psychology). Instruction pertaining to the application of the introduced techniques will accompany each laboratory session.

KIN2032 Introduction to Sport and Leisure Psychology 3 ch (3C)
Provides an introduction into the psychological influence of sport, physical activity, and leisure on the individual. Current social psychological theory about sport, physical activity and leisure behaviour will be examined through a wide variety of sport, leisure, and exercise psychology topics.

KIN2051 Prevention and Care of Athletic Injuries 4 ch (3C 1.5L)
Covers principles and procedures for the recognition and management of injuries and disorders in physical activity, athletics and sport programs. Prerequisite or Co-requisite: BIOL 1711.

KIN2062 Introductory Biomechanics 3 ch (3C)
This is an introductory course covering the anatomical factors and physical laws that govern human movement. The course focuses on quantitative techniques for analysis of full-body and multi-segment human motions, and the force systems that cause and resist these motions. Students will gain the necessary background and skills for understanding and applying biomechanical concepts in practice, by developing the skills required to translate problems in human movement into a biomechanical framework for quantitative analysis, and applying biomechanical concepts to solve problems in the rehabilitation and sport sciences. Prerequisites: BIOL 1711 and MATH 1003 or MATH 1503.

KIN2072 Introduction to Motor Control and Learning 3 ch (3C)
Introduces the student to the principles of motor skill acquisition and performance as well as the conditions that influence these processes. Topics include information processing, attention, perception, decision-making, motor programs, and feedback. The role of motivation, anxiety, concentration, observational learning and mental practice in motor performance and learning will be examined. Practical applications for sport, physical activity, industry, and the performing arts will be discussed. Lectures only.

KIN2082 Introductory Exercise Physiology 3 ch (3C)
This is a course in applied human physiology that focuses on developing a conceptual model to explain how the nervous, muscular, and cardiorespiratory systems function together to allow human movement. In this course the student will examine the cellular and systemic changes that take place within the body during the performance of physical work in a variety of modalities, intensities and durations. Prerequisite: C grade or better in BIOL 2721 Human Physiology II. NOTE: Credit will not be given for both KIN 2082 and KIN 3081.

KIN2093 Introduction to Philosophy of Kinesiology 3 ch (3C)
This course will conduct a philosophical analysis in to the nature of sport, exercise, and recreation by asking questions about the fundamental value and purpose of these activities. Prerequisite: KIN 1001 or consent of the instructor.

KIN2252 Functional Human Anatomy 4 ch (3C 1L)
This course is designed to introduce the concepts of functional human anatomy with a focus on how the anatomy interacts and supports various human movements. Practical movement assessment skills are taught, such as: anatomical movement assessments, postural assessment, muscle length and strength testing and movement screening. Prerequisites: C grade or better in BIOL 1711.

KIN3001 Introduction to Research Methods in Kinesiology 3 ch (3C)
Introduces basic concepts in research methods and experimental design relevant to the area of kinesiology including recreation and leisure studies. It is also designed to create a better understanding of the principles, concepts, terminology, and instruments used in measurement and analysis in the various sub-domains of kinesiology. The course will focus on the scientific method, with both quantitative and qualitative research being discussed. Topics include: different methods of knowledge, strategies of discovery, ethical issues, observation (systematic and self-report observational methods), measurement (validity, reliability, objectivity), and experimental design (randomized and non-randomized designs, survey design and subject selection), and data analysis (descriptive and inferential statistics). Finally, research reporting and the A.P.A. format will also be examined. Prerequisite: STAT 2263 or STAT 2264 or equivalent.

KIN3031 Exercise Psychology 3 ch (3C)
An introduction to the study of behaviour in the exercise environment. The course will focus on how psychological factors effect physical performance, how exercise effects psychological development, and on the development of strategies to encourage exercise participation. Prerequisite: KIN 2032 or consent of instructor.

KIN3032 Sports Psychology 3 ch (3C) [W]
Examines how the principles of psychology are applied in the sport setting to enhance performance. Involves an analysis of the current findings in psychological research into sport with special attention to personality theory, cohesion, goal setting, cohesiveness, and spectator behaviour. The course will be based on theoretical considerations and will involve a practical component. Prerequisite: KIN 2032 or consent of the instructor.

KIN3041 Disability Awareness 3 ch (3C)
This course aims to introduce students to the issues and challenges faced by persons with disabilities by exploring: disability concepts from a social, medical and political perspective; the impacts of disability on the person, family unit and labor force; disability issues in movement activities, from daily living to sport and recreation skills. Disability awareness training includes an introduction to appropriate terminology, knowledge of specific disorders that cause disability, and experience working with disabled individuals in the community.

KIN3061 Advanced Biomechanics 4 ch (3C 2T) [W]
Examines, through lecture and laboratory experiences, the theoretical and applied aspects of the biomechanics of human performance. Prerequisite: C grade or better in KIN 2062 and MATH 1503.

KIN3093 Ethics and Kinesiology 3 ch (3C) [W]
This course examines the fundamental principles of ethics, and their application to selected ethical issues in sport, recreation, exercise and other dimensions within kinesiology. Through intensive reading, open dialogue, critical reflection, and writing, students will be challenged to develop their philosophic ability, knowledge, and skills in evaluating an ethical dimension of relevant issues. Prerequisite: Students must have completed at least 27 credit hours of their degree program.

KIN3131 Psychological Intervention in Sport and Exercise (A) 3 ch (3C)
Introduction to psychological consulting in the areas of sport and exercise. The course will provide the student with the basic knowledge needed to develop mental skills training programs and will introduce practitioner-athlete consulting process. Prerequisite: KIN 2032, KIN 3032, or KIN 3031, or consent of instructor.

KIN3161 Human Factors in Ergonomic Design 3 ch (3C) [W]
This course introduces the physical, biomechanical, psycho-social and cognitive demands on workers in both office and industrial settings. Through lectures, student projects and review of current research, the role of proper human factors as a component of the improvement of health and well-being of the worker are explored. The understanding of human physical and psychological capabilities and limitations are incorporated in proper ergonomic design of the workplace environment.

KIN3166 Cognitive Aspects of Human Performance 3 ch (3C)
This course will examine the cognitive processes that underlay human performance. Mental processes such as perception, attention, memory, information processing, decision-making, and response execution will be examined as they relate to human motor performance. The effects of these cognitive factors on performance will be examined in a variety of settings including the workplace, sport, exercise and activities of daily living. A particular emphasis will be on how to improve human performance based on the cognitive factors examined in the course. Prerequisite: KIN 2072 or permission of instructor. Co-requisite: KIN 3001 or permission of the instructor.

KIN3201 Exercise Prescription 4 ch (2C) [2L]
A basic exercise prescription course applying concepts obtained in introductory kinesiology courses to ask, assess, advise, agree and assist active or inactive clients for acquisition of health and well-being outcomes across all ages. This course will use guiding principles of exercise prescription through the application of movement, exercise, and programming for health. Pre-requisites: C grade or better in KIN 2032, KIN 2062, KIN 2072, and KIN 2082 and KIN 2252.

KIN3202 Movement Awareness 3 ch (3C)
The aim of this course is for the student to develop greater awareness of the movement experience. Three approaches are utilized to examine movement: 1) Review of selected literature related to body, mind, and movement; 2) Production of a movement autobiography that details the effects of movement experiences; 3) Participation in movement activities including Hatha Yoga, Tai Chi, Aikido, Zen meditation and Somatic exercises.
SECTION H: FREDERICTON COURSES

KIN3282 Physical Activity, Health and Wellness 3 ch (3C)
Provides an introduction to holistic health through integrating the concepts of physical activity, fitness, and wellness. The focus will be on the impact that physical activity and physical inactivity have upon the major diseases and disabilities which affect overall health and wellness in industrial and technological based societies. This will be accomplished through summarizing and critically assessing the epidemiological and physiological research evidence. Prerequisite: C grade or better in KIN 3001 and KIN 2082.

KIN3291 Coaching Healthy Behaviours 3 ch (3C)
This course will examine individuals’ attitudes and behaviours towards healthy and active living, with a focus on individual health-related behaviour change. Techniques for identifying strategies and overcoming barriers to changing health behaviours will be examined, developed and practiced within the framework of health education and behaviour change. Course participants will be challenged and empowered to make their own positive lifestyle changes in regards to healthy behaviors, and will be prepared to begin working with others in this realm. Prerequisite: KIN 3061; Only open to students with 57 ch towards their degree.

KIN3382 Pedagogic Exercise Science 3 ch (3C) [W] (O)
To develop an understanding of the physiological, medical, and physical performance implications associated with changing activity patterns in today’s youth. Examines the influence of physical activity on normal growth and development, exercise and fitness related secular trends, issues related to pediatric exercise science, and activity program development. Prerequisite: BIOL 2721.

KIN3481 Nutrition for Healthy Living 3 ch (3C)
The science of the nutrients and their role in the body and in health, factors influencing food intake, dietary assessment and guidance, nutrition and physical activity, and current nutrition issues. NOTE: Credit will not be given for both ED 4791 and KIN 3481.

KIN3482 Bioenergetics of Exercise 3 ch (3C)
An in-depth integrative and applied study of the conversion of carbohydrates, fats, and proteins into biologically useable forms of energy. Topics include: basic chemistry and biochemistry involved in the process, the biochemical pathways, the metabolic responses to energies and exercise, and the neuroendocrine regulation of exercise metabolism. Prerequisite: KIN 2082 or equivalent.

KIN3911/3912/3913 Practicums I 1 ch (1L)/2ch (2L)/3 ch (3L)
Relates theory to practice through professional career and field experiences. Faculty approval is required prior to any service commitment or registration procedures. Prerequisites: must have completed 48ch and have an AGPA of at least 2.5.

KIN3914 Practicums II 3 ch (3L)
Relates theory to practice through professional career and field experiences. Faculty approval is required prior to any service commitment or registration procedures. Prerequisites: Must have completed 48ch and have an AGPA of at least 2.5.

KIN3950 Athletic Therapy Practicum 6 ch (6C/L) [W]
Involves Athletic Therapy internships only. Relates theory to practice through professional career and field experiences. Faculty approval is required prior to any service commitment or registration procedures. Prerequisites: B grade or better in KIN 2051 and permission of the instructor.

KIN4041 Movement Disorders 3 ch (3C) (A)
This course introduces students to the biomechanics of movement disorders using state-of-the-art techniques in motion analysis. Topics include instrumentation, clinical gait analysis, data interpretation, and treatment effectiveness. Prerequisite: KIN 3061; Only open to students with 57 ch towards their degree.

KIN4063 Biomechanical Instrumentation and Data Acquisition 3 ch (3C) (A)
Introduces advanced concepts in instrumentation and data acquisition relevant to the area of human motion analysis. The student will be introduced to motion analysis systems, electromyographs, and force platforms through laboratory sessions. Emphasis will be placed on accuracy and reliability of equipment. Students will also be introduced to the Matlab programming language and various data analysis techniques in biomechanics (i.e. filtering, joint angle computation). Prerequisite: KIN 3061; Only open to students with 57 ch towards their degree.

KIN4085 Matlab and Biomechanics 3ch (1C 2L)
This course introduces students to the Matlab programming language with specific applications to the field of biomechanics. Topics include vector manipulations, joint angle computations, and matrix mathematics. All lectures are conducted in computer labs using the Matlab software. Matlab is a popular language used in academia and various industrial applications. Students will learn how to create computer programs that perform mathematical operations and analysis using biomechanical data. Prerequisite: KIN 3061, MATH 1503, or permission of the instructor.

KIN4072 Neural Control of Human Movement 3 ch (3C) (A)
The aim of this course is to provide the student with a fundamental understanding of the neural processes that underlie the control of voluntary action. The mechanism, structure and function of the human nervous system will be presented at various levels of analysis, from the cellular level to the behavioural level. Specific topics to be addressed include the mechanism of information transmission; the mechanism of skeletal muscle contraction; the use of surface electromyograms; mechanisms of excitatory and inhibitory control; reflexes; pre-programmed reactions; simple brain anatomy, structures and pathways; postural control, locomotive control and single and multi-joint movements. Prerequisites: KIN 2072 and KIN 2082.

KIN4074 Human Gait and Balance 3 ch (3L)
This course will provide a detailed understanding of the biomechanics and motor control of standing posture, stepping, walking, and running under normal and perturbed conditions. Measurement techniques, processing data, and the interpretation of total body and limb synergies will be emphasized from a biomechanical and neural control perspective. The problems of the elderly and the assessment of those with pathologies will also be examined. Prerequisites: KIN 2072 and KIN 3061.

KIN4082 Advanced Exercise Physiology 3 ch (3C) [W] (A)
Through lecture and course assignments, the adaptive responses of the physiological systems to exercise will be studied through an integrative physiological lens. The specific topics of adaptation to various means of endurance and resistance training programs will be examined. Prerequisite: KIN 2082 or equivalent.

KIN4083 Seminar on Health Care Ethics 3 ch (3C) [W]
This course will explore the area of health care. Through intensive reading, open dialogue, and critical reflection, students will be challenged to develop knowledge and skills in analyzing the dimensions of health and health care. Prerequisite: KIN 3093 or consent of the instructor.

KIN4161 Occupational Biomechanics 3 ch (3C) [W]
This course will examine topics in applied ergonomics and occupational biomechanics. Lectures will be used to present ergonomic assessment tools and present current research directives in the area of occupational biomechanics and prevention of workplace musculoskeletal injuries. Development of the skills required to identify occupational ergonomic concerns, perform biomechanical analyses of musculoskeletal demands and modifications of work tasks to reduce musculoskeletal demands will be emphasized through practical experiences. Prerequisites: KIN 2062 and KIN 3161, or consent of the instructor.

KIN4162 Occupational Health and Safety for Ergonomists 3 ch (3C)
This course will provide an overview of the occupational health and safety field and its relationship to workplace ergonomics. An introduction to occupational health and safety legislation will be provided and the major health and safety hazards in a variety of work environments will be examined. Emphasis will be placed on how to eliminate and reduce hazards and risks associated with several work processes, including the physical working environment, adaptation of tools and the workplace to the worker, and equipment design. The roles and responsibilities of workers and their employers will also be covered. Prerequisite: KIN 3161. Credit will not be given for KIN 4162 and ME 5283.

KIN4163 Workplace Ergonomic Design and Analysis 3 ch (3C)
The focus of this course is on the theoretical background and practical knowledge required to create functional ergonomic designs and provide comprehensive ergonomic analyses of industrial or service workplaces using work measurement and task analysis methodologies. Industrial and human factors engineering techniques together with the principles of occupational biomechanics are applied to investigate human / machine interactions, job design, and workstation layout. Work Measurement and Task Analysis methodologies are used to derive and design safe work standards, physiological task loads and the elements of manual and mental activities in human / machine work systems. Laboratory exercises provide the opportunity to apply the theory to actual workplace situations. Prerequisite: Completion of 96 ch in Kinesiology / Engineering, KIN 3161, or consent of instructor.

KIN4165 Occupational Physiology 3 ch (3C) (A)
This course will investigate issues related to the physical requirements, program design, the measurement of physical demands, and factors related to fatigue and injury in the workplace from a physiological
perspective. It will also examine issues related to safety and completion of job specific tasks in the workplace. The standards and job requirements for an occupation will be examined using the "Bona Fide Occupational Requirements (BFOR)*. Prerequisite: Completion of 96 ch in Kinesiology, KIN 2082, or consent of the instructor.

KIN4252 Advanced Functional Anatomy 4 ch (3C 1L)
This course is designed to build upon the concepts and theories learned in KIN 3252 - Functional Human Anatomy, with a focus on mastery of hands-on assessment techniques and methodologies, assessment interpretation techniques, identification of movement impairments, and the development of appropriate movement correction exercise intervention programs based upon the interpretations of the assessments. This course will focus on the application of advanced theories of anatomical systemic integration. Prerequisite: KIN 3252.

KIN4281 Measurement and Evaluation in Exercise Science 4 ch (1C 3L)
An advanced course examining the theory and developing practical skills for measuring body composition and cardiovascular, neuromuscular, and metabolic function during exercise. Students will learn about the equipment commonly used in Exercise Science and the principles of using these instruments including the influence of calibration and signal processing amplification, filtering and sampling. They will also learn computer based data acquisition, the pros and cons of various measurement approaches, and gain experience in screening subjects for exercise testing, data analysis and interpretation of test results. Prerequisite: Minimum grade of “C” in KIN 2082.

KIN4383 Physical Activity and Aging 3 ch (3C)
The study of the aging processes and the effects of exercise and lifestyle factors on the health and fitness of the aging adult. Students will receive theoretical knowledge and will apply that knowledge to real life situations. Students will learn common fitness tests for older adults and will test and interpret fitness levels of older adults. Prerequisite: KIN 2082.

KIN4481 Exercise and Sport Nutrition 3 ch (3C) (A)
An in-depth examination of the role which nutrition plays (especially ergogenic aids) in exercise and sport performance. Approached from an applied biochemistry and physiology perspective through lecture and seminar. Co- or Prerequisite: KIN 2082 or equivalent.

KIN4800 Directed Studies in Kinesiology 6 ch (6C)
Provides opportunities to explore in detail a number of special areas in Kinesiology. Faculty approval is required prior to registration. Title of the topic will appear on the student's transcript. Open only to students with at least 57 ch completed towards their degree.

KIN4900 Honours Research Project 6 ch (3C)
BScKin Honours students must complete a research project under the supervision of a faculty member. The project can take the form of a thesis, report, or case study as determined by the faculty member. A presentation is required. Prerequisite: Students must be accepted into the BScKin Honours program (see Honours program degree requirements).

KIN4903 Directed Studies in Kinesiology 3 ch
Provides opportunities to explore in detail a number of special areas in Kinesiology. Faculty approval is required prior to registration. Title of the topic will appear on the student's transcript. Open only to students with at least 57 ch completed towards their degree.

KIN4904 Directed Studies in Kinesiology 3 ch
Provides opportunities to explore in detail a number of special areas in Kinesiology. Faculty approval is required prior to registration. Title of the topic will appear on the student's transcript. Open only to students with at least 57 ch completed towards their degree.

KIN4910 Advanced Practicum 6 ch (8C/L)
Continuation of KIN 3913/KIN 3914. Prerequisites: Must have completed 48ch and have an AGPA of at least 2.5.

KIN4950 Advanced Athletic Therapy Practicum 6 ch (6C/L) [W]
Prerequisite: KIN 3950.

KIN4993 Selected Topics in Kinesiology 3 ch
Selected topics of special interest from the area of kinesiology are examined in detail. Special emphasis will be placed on current issues. Topics will be specified by the Faculty. Title of topic chosen will appear on the student's transcripts. Open only to students who have completed 57 ch or more.

KIN4994 Selected Topics in Kinesiology 3 ch
Selected topics of special interest from the area of kinesiology are examined in detail. Special emphasis will be placed on current issues. Topics will be specified by the Faculty. Title of topic chosen will appear on the student's transcripts. Open only to students who have completed 57 ch or more.

KIN5031 Applied Sports Psychology 3 ch (3C) [W] (A)
This course will focus on psychological skills and methods in sport and exercise, and how sport psychologists, coaches, therapists, and athletes use these skills and methods to positively affect sport participation, performance, motivation, and enjoyment. More specifically, the psychological skills and methods which were presented and discussed in KIN 2032, 3031, 3032, and 3131 will be applied in the sport setting. This will involve working with teams, teaching mental skills in group sessions, and being available for individual consultations. Prerequisites: KIN 2032, KIN 3032, KIN 3131, KIN 3031.

KIN5032 Research in Sport and Exercise Psychology 3 ch (3C) [W] (A)
Designed to permit analysis and discussion of theoretical developments and recent research findings in the areas of sport and exercise psychology. The seminar format will allow students to critically appraise research and permit them to express their own ideas. Recent research articles will provide the basis for discussion and presentations. Prerequisites: KIN 2032 and KIN 3131, KIN 3032 or KIN 3031 or consent of instructor.

KIN5072 Advanced Motor Control and Learning 4 ch (3C 2L) (A)
The aim of this course is to explore concepts of information processing within motor control. Each week specific attention will be paid to a seminal paper on this topic. Issues that arise for motor control from these papers will be presented and discussed in seminar format. To gain a practical understanding of these issues, the student will undertake and write-up a series of laboratory experiments on these aforementioned papers. Prerequisites: KIN 2072 and KIN 3001 and STAT 2263 or STAT 2264 or equivalent.

KIN5282 Advanced Exercise Prescription for High Performance 4ch (3C, 1.5L)
A combination of advanced theory and practical experience, in the areas of periodization, exercise program design, and advanced training methods will be studied. Upon completion of this course, students will be able to develop strength and conditioning programs for high performance individuals such as athletes, or highly physical occupations. Prerequisite: KIN 4281 or KIN 4428.

KIN5481 Advanced Exercise Prescription for Chronic Diseases 4 ch (3C 2L)
Advanced theoretical knowledge and experiential learning related to physical activity, fitness, and lifestyle assessment, counselling, and exercise prescription for people living with chronic condition. This course prepares students for certification as a Certified Exercise Physiologist (CEP) by the Canadian Society for Exercise Physiology. Prerequisite: KIN 4281 or KIN 4428.

LATIN
See beginning of Section H for abbreviations, course numbers and coding.

LAT1103 Introductory Latin I 3 ch (3C)
An introduction to the Classical Latin language spoken and written by Ancient Romans. This introduction presupposes no previous knowledge of the language, and students should be aware that this course is conducted in English.

LAT1113 Introductory Latin II 3 ch (3C)
A continuation of the introduction to Classical Latin. Prerequisite: LAT 1103 or equivalent.

LAT2105 Intermediate Latin 3 ch (3C)
An intensive intermediate course in Classical Latin language designed to prepare the successful student for the reading of Latin texts from classical literature. Prerequisite: LAT 1123 or equivalent.

LAT3105 Beginning Classical Latin Reading 3 ch (3C)
This course is intended for students who wish to continue the study of Latin to the Advanced level. Prerequisite: LAT 2105 or equivalent.

LAT3113 Reading Classical Latin Authors I 3 ch (3C)
A reading course designed to strengthen skills in the reading of Classical Latin texts. Prerequisite: LAT 3105 or equivalent.

LAT3123 Reading Classical Latin Authors II 3 ch (3C)
N/A

LAT3133 Advanced Latin I 3 ch (3C)
N/A
SECTION H: FREDERICTON COURSES

LAT3143  Advanced Latin II  3ch (3C)  N/A
LAT3153  Directed Reading in Latin  3 ch
By arrangement with the department, students who have completed LAT 3103 and an additional 12ch of advanced courses in Latin may register for this course after consulting with the directing Faculty Member on the selections to be read.

LAW IN SOCIETY

See beginning of Section H for abbreviations, course numbers and coding.

LWSO 2003  Law and Society  3ch
Introduction to the Canadian legal system and the role of law in organizing social relations and structure. The course surveys the foundation, forms and functions of legal institution, the law-making process, and actors in the legal system. Theoretical perspectives on the role of law in society are introduced through discussion of contemporary issues. Exclusion: Students who have taken LWSO 4003 before September 2018 will not receive credit for LWSO 2003.

LWSO4003  Seminar in Law and Society  3 ch
This seminar engages in an advanced in-depth analysis of contemporary topics in the field of socio-legal studies. The focus of the course will vary from year to year. Prerequisite: LWSO 2003.

LWSO 5000  Honours Thesis in Law and Society  6ch [W]
Directed reading and research leading to an Honours thesis on a topic in Law and Society. Students will consult with the Coordinator in finding a suitable topic and thesis supervisor. Prerequisite: LWSO 2003; Pre/co-requireite LWSO 4003. Limited to students admitted to the LWSO Joint Honours program.

LINGUISTICS

See beginning of Section H for abbreviations, course numbers and coding.

LING2401  Introduction to Language  3 ch (3C) [W]
Basic concepts, language structure and change.

LING3006  Linguistic Introduction to Canadian English (A)  3 ch (3C) [W]
Introduces various ways of describing the structure, especially syntactic, of language. English, specifically Canadian English, is used as a model. Assumes some acquaintance with linguistic analysis; students will normally have taken either LING 2401 (Introduction to Language) and 3411 (Phonetics and Phonemics) or ENGL 3010 (History of the English Language).

LING3010  History of the English Language (O)  6 ch (3C) [W]
(Cross-Listed: ENGL 3010) After a brief consideration of the nature of human language, introduces students to phonetics and the International Phonetic Alphabet. Then traces the history of the English language from its Indo-European origins to its present state. Focuses on the various kinds of linguistic change: those affecting sounds, forms, and vocabulary.

FR/LING3404  Introduction à la linguistique  3 cr (3C)
Étude d'aspects phonologiques, morphologiques et syntaxiques, à partir d'exemples tirés du français.

FR/LING3404  Introduction to Linguistics  3 ch (3C)
Introduction to various sub-disciplines of linguistics (phonology, morphology, and syntax) exemplified through French.

FR/LING3414  Sociolinguistique  3 cr (3C)
Initiation à l'étude empirique des interactions entre la langue française et son contexte social. Thèmes: variation sociale et stylistique, dialectes et norme, attitudes linguistiques, féminisation du discours, bilinguisme. Prerequisite: FR/LING 3404 or the equivalent; FR/LING 3414 et FR/LING 3404 peuvent être suivis simultanément.

FR/LING3414  Sociolinguistics of French  3 ch (3C)
An introduction to the empirical study of language as it is used in its social context. Topics include: social and stylistic variation, dialects and the "standard," linguistic attitudes, language and gender, bilingualism. Prerequisite: FR/LING 3404 or equivalent; FR/LING 3414 may be taken concurrently with FR/LING 3404.

FR/LING3424  Phonétique et phonologie  3 cr (3C)

LING3424  Phonetics and Phonology of French  3 ch (3C)
The concepts and methods of phonetics and phonology. The basic French sound system and its various phonetic realizations depending on dialects and sociolects. Prerequisite: FR 3404.

FR/LING3444  La créativité lexicale  3 cr (3C)
The vocabulary is a system dynamic, capable of being modified to respond to the needs of society. This course consists of the study and analysis of the structure of the lexicon, the creative mechanisms of the language, and the various types of word formations, including derivation, neology, loanwords and metaphors. Prerequisite: FR/LING 3404.

FR/LING3444  Lexical Creativity  3 ch (3C)
The vocabulary of a language is a dynamic system constantly evolving to meet the changing needs of society. This course consists of the study and analysis of the structure of the lexicon, the creative mechanisms of language, and the various types of word formations, including derivation, neology, loanwords and metaphors. Prerequisite: FR/LING 3404.

FR/LING3454  Histoire de la langue française  3 cr (3C)
A study of the evolution of French from its roots in Latin to the present. Old, Middle and Modern French will be sketched: the phonology, morphology, syntax and vocabulary of each period will be studied. Prerequisites: FR 3404.

FR/LING3464  Syntax  3 cr (3C)

FR/LING3464  Syntax  3 ch (3C)
A study of sentence structure in the framework of generative grammar. Phrase structure and transformational rules will be studied and some classical problems of French syntax will be presented. Prerequisites: FR 3404.

FR/LING3484  Questions de psycholinguistique  3 cr (3C)
Approche pluridisciplinaire du comportement verbal. Étude de l'acquisition et de la pathologie du langage par rapport aux théories linguistiques et neurolinguistiques.

FR/LING3484  Issues and Trends in Psycholinguistics  3 ch (3C)
Pluridisciplinary approach to language as behaviour. Developmental and pathological issues are discussed in relation to linguistic and neurolinguistic theories.

FR/LING3494  Mythes et réalités sur le langage  3 cr (3C)
Discussion of widespread myths about language, aiming to shed light on questions of general interest. Topics include: language acquisition and language learning, language and thought, origin of languages, feral children, communication among animals, deterioration of language quality, orthographic reforms, sign languages, primitive languages, grammatical complexity pidgins and creoles, slang and jargons, artificial language. Students enrolled in the Linguistics Program may write their papers in English. Prerequisite or Co-requireit: LING/FR 3404 or equivalent.

LING3411  Phonetics and Phonemeics  3 ch (3C) [W]
Articulatory phonetics and phonology. Prerequisites: Previous experience in linguistics. May be taken concurrently with LING 2401.

LING3422  Morphology and Syntax  3 ch (3C) [W]
Structure of meaningful elements; syntax. Prerequisites: LING 3411.
LIN3903 Independent Studies in Linguistics I 3 ch
Studies in linguistics. The topic and the content are to be chosen jointly by the student and the instructor. The course must be approved by the Director of Linguistics.

LIN3904 Independent Studies in Linguistics II 3 ch
Studies in linguistics. The topic and the content are to be chosen jointly by the student and the instructor. The course must be approved by the Director of Linguistics.

FR/LING4414 Français canadien 3 cr (3C)
Examen de traits caractéristiques du français parlé au Canada, notamment du franco-acadien et du franco-québécois. Préalable: deux cours FRLING.

FR/LING4444 Canadian French 3 ch (3C)
Examines the major linguistic features of French spoken in Canada, in particular Acadian and Québécois French. Prerequisite: Two courses in FRLING.

FR/LING4444 Sémantique 3 cr (3C)

FR/LING4444 Semantics 3 ch (3C)
An introduction to the study of meaning and reference. Historical survey of the field, and its place within general linguistics and amongst other fields of human sciences; fundamental notions for the examination of meaning relations; componential analysis. Prerequisite: FR/LING 3404.

FR/LING4464 Théorie linguistique 3 cr (3C)

FR/LING4464 Linguistic Theory 3 ch (3C)
Presents fundamental concepts in modern linguistics. Examines the relation between form and meaning, the nature of grammatical representations, and their relevance. Prerequisite: FR 3404.

FR/LING4465 Morphologie generative 3 cr (3C)

FR/LING4465 Generative Morphology 3 ch (3C)
Introduction to basic principles and rules governing word formation. Presents and examines recent trends in contemporary morphological theory. Prerequisite: FR 3404.

MATH1003 Introduction to Calculus I 3 ch (4C)
Functions and graphs, limits, derivatives of polynomial, log, exponential and trigonometric functions. Curve sketching and extrema of functions. NOTE: Credit may be obtained for only one of MATH 1003, MATH 1053 or MATH 1823. NOTE: Part-time students will be charged a course fee for the MATH 1003 credit. Prerequisite: A minimum grade of 60% in New Brunswick high school courses: Pre-Calculus A 120 and Pre-Calculus B 120, or equivalent courses.

MATH1013 Introduction to Calculus II 3 ch (4C)
Definition of the integral, fundamental theorem of Calculus, Techniques of integration, improper integrals. Ordinary differential equations. Taylor polynomials and series. NOTE: Credit may be obtained for only one of MATH 1013 or MATH 1063. Prerequisites: MATH 1003 or MATH 1053. NOTE: That MATH 1823 does not fully prepare students for MATH 1013; consult the Department of Mathematics and Statistics for advice.

MATH1053 Enriched Introduction to Calculus 3 ch (4C)
The syllabus is similar to that for MATH 1003, with more emphasis placed both on the theory of calculus and interesting applications. The course will be of special interest to students with strong mathematical backgrounds. Any interested student (with or without high school calculus) is encouraged to consult with the Mathematics Department. NOTE: Credit may be obtained for only one of MATH 1003, MATH 1053 or MATH 1823. Prerequisites: Superior grades (at least 95% recommended) in each of Pre-Calculus A 120 and Pre-Calculus B 120; or a grade of 85% or higher in a Grade 12 Math course that contains some Calculus; or consent of the Department of Mathematics and Statistics.

MATH1063 Enriched Introduction to Calculus II 4 ch (4C)
The syllabus for this course is similar to that of MATH 1013. As with MATH 1053, more emphasis is placed on theory, mathematical rigor and interesting applications. NOTE: Credit may not be for only one of MATH 1013 or MATH 1063. Prerequisites: A grade of B or higher in MATH 1053, or MATH 1003 with consent of the Department of Mathematics and Statistics.

MATH1503 Introduction to Linear Algebra 3 ch (3C)
Lines and planes, the geometry and algebra of vectors, systems of linear equations, matrix algebra, linear independence, linear transformations, determinants, complex numbers, eigenvectors, diagonalization, rotation matrices, quadratic forms, least squares. Prerequisites: A minimum grade of 60% in New Brunswick high school courses: Pre-Calculus A 120 and Pre-Calculus B 120, or equivalent courses. NOTE: Credit will not be given for both MATH 1503 and MATH 2213.

MATH1823 Calculus for Management Science 3 ch (3C 1T)
Polynomial, logarithmic and exponential functions. Limits and derivatives. Extreme values and related rates. Basic linear programming. Simple integration and differential equations, with stress on applications to business and economics. NOTE: Credit may be obtained for only one of MATH 1003, MATH 1053 or MATH 1823. Prerequisites: A minimum grade of 60% in New Brunswick high school courses: Pre-Calculus A 120 and Pre-Calculus B 120, or equivalent courses.

MATH1833 Finite Mathematics for Management Science 3 ch (3C 1T)
Matrices and systems of linear equations. Linear programming concepts; graphical solution of two variable problems. Permutations and combinations. Elementary probability. Matrices of finite, ordered. NOTE: Credit for MATH 1833 will not be given if the student has previously taken either MATH 1503 or MATH 2213. Prerequisites: A minimum grade of 60% in New Brunswick high school courses: Pre-Calculus 110 or Foundations of Mathematics 120, or an equivalent course.

MATH 2003 Intermediate Mathematics I 3 ch (3C 1T)
Analytic geometry and vectors. Parametric curves. Polar, cylindrical and spherical coordinates. Functions of several variables, partial derivatives, applications to max-min, double and triple integrals. Prerequisites: MATH
MATH2013 Intermediate Mathematics II 3 ch (3C 1T)

MATH2203 Discrete Mathematics 3 ch (3C)
Logic, methods of proof, mathematical induction, elementary set theory, functions and relations. NOTE: This course is designed for students desiring a good grounding in the foundations of mathematics. Theorems and proofs are an important part of the course. Credit will not be given for both MATH 2203 and CS 1503. Students majoring in Mathematics must take MATH 2203. Prerequisite: MATH 1013 or permission of instructor. NOTE: It is strongly recommended that students should have at least a grade of B in MATH 1013 or MATH 1063 to take this course.

MATH2213 Linear Algebra I 3 ch (3C)
This course introduces the basic concepts of linear algebra, mainly in finite dimensional real vector spaces. Systems of linear equations, vector and matrix algebra, bases and dimension of subspaces, row and column spaces, linear transformations and matrix representations, inner products, determinants, eigenvectors and diagonalization. Applications as time permits. Prerequisites: MATH 1013, or MATH 1053, or both MATH 1823 and 1833. This course may also be taken with the consent of the instructor. Interested first year students are encouraged to enquire. NOTE: Credit will not be given for both MATH 1503 and MATH 2213.

MATH2513 Multivariable Calculus for Engineers 4 ch (4C)
Functions of several variables, partial derivatives, multiple integrals, vector functions, Green's and Stokes' Theorems. Prerequisites: MATH 1013 and MATH 1503. NOTE: Credit may not be obtained for both MATH 2003 and MATH 2513.

MATH2623 Introduction to Mathematical Thinking 3 ch (3C)
An introduction to mathematical thinking. Content varies, and is focused on presenting mathematics as a living, creative discipline. A sample of topics: patterns and symmetry, tiling, non-Euclidean geometry, chaos and fractals, planetary motion, binary numerals, prime numbers, Fibonacci numbers, hyperbolic, elliptic and parabolic equations. Prerequisites: MATH 1013 and MATH 1833. Credit will not be given for both MATH 1503 and MATH 2213 or MATH 1503 or consent of the instructor.

MATH2633 Fundamental Principles of Elementary School Mathematics 3 ch (3C 1L)
This course is intended for students who anticipate a career as an elementary or middle school teacher. The course focuses on topics taken from the K-8 curriculum with extensions beyond classroom topics to show the 'how' and 'why' behind school mathematics. The major topics are problem solving, number concepts, number and relationship operations, patterns and relations, shape and space, as well as data management and probability. Intended for students registered in arts programs. Not available for credit to students who would have 6ch of Level 1000 mathematics in their degree program. Antirequisite: MATH 3633. Prerequisite: Successful completion of at least one year of a university program.

MATH3003 Applied Analysis 3 ch (3C)
Vector spaces of functions, convergence in normed linear spaces, orthogonal polynomials, Fourier series, Fourier transform, Fast Fourier transform, introduction to wavelets, and selected applications. Prerequisites: MATH 2013 or MATH 3503, and MATH 2213 or MATH 1503 (MATH 3213 recommended). NOTE: Credit will not be given for both MATH 3003 and MATH 3113.

MATH3033 Group Theory 3 ch (3C)
Groups are the mathematical objects used to describe symmetries. This course covers the fundamentals of group theory, together with applications selected from geometry, advanced algebra and physical sciences. Prerequisites: MATH 2203 or CS 1303, and MATH 2213 or MATH 1503 (MATH 3213 recommended). Other interested students are encouraged to seek consent of the instructor.

MATH3043 Ordinary Differential Equations 3 ch (3C)
First order equations, linear systems, variation of parameters, method of undetermined coefficients, Laplace transforms, power series solutions, fundamental matrix solution. Existence and uniqueness of solutions, properties of linear systems, eigenvalue problems, vector fields, phase-plane analysis, Liapunov method. Prerequisites: MATH 2013 or MATH 2513. NOTE: Credit cannot be obtained for both MATH 3043 and MATH 3503.
Computer Science, Management Science, Political Science, Social Science, and Computer Science students or any student with a minor in such disciplines, in particular those in the Mathematics/Statistics-Economics option. **NOTE**: this course is cross-listed as ECON 4673. Students cannot obtain credit for both MATH 3373 and ECON 4673 (or 5673). **Prerequisites**: MATH 1823 and MATH 1833; or MATH 1003 and MATH 1013; or MATH 1053 and MATH 1063; or ECON 3013; or permission of the instructor.

MATH3383 Introduction to Mathematical Logic 3ch (3C)
The course introduces the basic concepts of mathematical logic, including the Axiom of Choice and its equivalents; propositional logic; languages and structures, axioms and theories, models; elements of model theory (Completeness, Compactness, Löwenheim-Skolem theorems, nonstandard models); theory of computability (Church-Turing Thesis, recursive functions and sets, recursively enumerable sets, decision problems, the Halting Problem); Gödel's Incompleteness Theorems. **Prerequisites**: MATH 1013; and either MATH 1503 or MATH 2213; and either MATH 2203 or CS 1303.

MATH3413 Introduction to Numerical Methods 3 ch (3C)
Intended for Mathematics, Science or Engineering students. Error analysis, convergence and stability. Approximation of functions by polynomials. Numerical quadrature and differentiation. The solution of linear and nonlinear equations and the solution of ordinary differential equations. This course will emphasize the understanding of numerical algorithms and stress applications in the applied sciences, as well as the influence of finite precision and arithmetic on computational results. Credit will not be given for both MATH 3413 and CS 3113. **Prerequisites**: CS 1003 or CS 1073; and MATH 1063 or MATH 1053; and MATH 2213 or MATH 1503.

MATH3463 Special Relativity (A) 3 ch (3C)
The course provides an introduction to the physical principles (Lorentz invariance, constancy of the speed of light, equivalence of mass and energy) and the mathematical underpinnings (Minkowski space-time, tensors) of the theory of special relativity. This course is cross listed PHY 3912. Credit cannot be obtained for both MATH 3463 and PHYS 3912. **Prerequisites**: MATH 2003, PHYS 1062 or equivalent, or permission of the instructor. **Co-requisites**: MATH 2013, PHYS 2311.

MATH3473 Mathematical Modelling (A) 3 ch (3C)
This course is intended to develop skills in translating a problem in the real world to a well formulated mathematical problem. The basic techniques and tools for model formulation, model analysis, numerical simulation and model interpretation will be offered. Project topics will be chosen from Biology, Physics, Chemistry, Mechanics, Engineering, Economics and elsewhere. **Prerequisites**: MATH 1013 and permission of the instructor.

MATH3503 Differential Equations for Engineers 3 ch (3C) 1T
Nonhomogeneous differential equations, undetermined coefficients, variation of parameters, systems of 1st and 2nd order ordinary differential equations, Laplace transforms, Fourier series. **Prerequisites**: MATH 1003 or MATH 2213. **Co-requisites**: MATH 2513 or MATH 2003. **Note**: Credit cannot be obtained for both MATH 3503 and MATH 3043.

MATH3543 Differential Geometry for Geomatics Engineers 3 ch (3L) 1T
Basic analytic geometry, spherical trigonometry, geometry of curves in space, measurements on surfaces, Gaussian surface geometry. **Prerequisite**: MATH 2513.

MATH3623 History of Mathematics (A) 3 ch (3C) [W]
A non-technical survey of the development of mathematics from prehistory through Babylonian, Egyptian, Greek, Indian and Islamic cultures. More especially on recent (post-1940) history. An attempt is made to discuss each new mathematical contribution in light of both past mathematics and social scientific forces of the day. Some background in Mathematics necessary. **Pre-requisite**: 12 ch in Math and/or Stat.

MATH3633 Fundamental Principles of School Mathematics I. 3 ch (3C)
A course for undergraduate students who anticipate a career as teachers. Topics build around the K-12 syllabus, with extensions beyond the classroom, to show the 'how' and 'why' behind school mathematics. Mathematical language, real numbers and other mathematical structures; Euclidean geometry; functions; mathematical connections; problem solving. **Prerequisite**: 6 ch of university mathematics.

MATH3803 Introduction to Mathematics of Finance 3 ch (3C)
Measurement of interest, compound interest, annuities, amortization schedules and sinking funds, bonds. **Prerequisite**: MATH 1013 or a grade of B or better in MATH 1823.

MATH3813 Mathematics of Finance II (O) 3 ch (3C)
A more advanced study of the topics in MATH 3803 including varying and continuous annuities and yield rates. **Prerequisite**: MATH 3803 with a grade of B or better.

MATH3843 Introduction to Life Contingencies 3 ch (3C)
Survival distributions, general life insurances and life annuities, reserves. Joint annuities and last survivor annuities. **Prerequisite**: One term of statistics and MATH 3803.

MATH4023 Functional Analysis 3 ch (3C)
Normed spaces, the Hahn-Banach theorem, uniform boundedness theorem. The contraction mapping theorem. Existence and uniqueness for nonlinear differential equations. Further topics may include Wavelets or Banach spaces. **Prerequisites**: Any two of MATH 3003, MATH 3103, MATH 3113, or permission of the instructor.

MATH4043 Advanced Algebra (A) 3 ch (3C)
Prime fields and characteristic, extension fields, algebraic extensions, theory of finite fields, Galois theory, and topics which may include some of: rings, topological algebra, multilinear and exterior algebra, quadratic forms. **Prerequisite**: MATH 3033.

MATH4063 Advanced Geometry (O) 3 ch (3C)
A deeper investigation of Euclidean and Non-Euclidean spaces of any dimension. Topics selected from: axiom systems, linear and affine transformations, conformal and linear models for Euclidean and hyperbolic spaces and their isometry groups, basic theory of convexity, combinatorial properties of polytopes. **Prerequisite**: One of MATH 2213, MATH 2003, MATH 2513 or MATH 3063.

MATH4100 Honours Project 6 ch [W]
Mathematics Honours students must complete a project under the supervision of a faculty member. The project is to include a written report and an oral presentation. Prior to being admitted into MATH 4100, the student must have been admitted to the Honours Program and have submitted an acceptable project proposal to the department. Normally students would begin preparation and research for the project during their third year of study, submit the proposal by October of their fourth (final) year of study, and complete the written and oral presentation by the end of the winter term, to graduate in May of that year. Honours students in an interdepartmental program with mathematics may choose to complete their honours project in mathematics.

MATH4103 Measure Theory and Wavelets (O) 3 ch (3C)
Brief review of Riemann integration. Algebras of sets, outer measure, measure, measurable sets, measurable functions, the Lebesgue integral, properties of the Lebesgue integral, abstract measure spaces, integrals and derivatives, sequences of integrals, Fubini's theorem. Properties of Fourier transforms, multiresolution analysis, Daubechies wavelets. **Prerequisite**: One of MATH 3003, MATH 3103, or permission of the instructor.

MATH4123 Advanced Linear Algebra (A) 3 ch (3C)
The theory of vector spaces and linear transformations, dual spaces, multilinear maps (including tensors and determinants); further topics chosen from canonical forms, metric vector spaces, algebras, etc. **Prerequisite**: MATH 3213.

MATH4142 Introduction to Dynamical Systems (O) 3 ch (3C)
Many of the processes studied in science, engineering and economics are described by nonlinear differential equations. This course introduces qualitative methods to find essential information about the solutions of nonlinear equations without necessarily attempting to find the solution completely. Topics include flows, stability, phase plane analysis, limit cycles, bifurcations, chaos, attractors, maps, fractals. Applications throughout. **Prerequisite**: MATH 3043, or both MATH 2513 and MATH 3503, or permission of the instructor.

MATH4153 Topology (O) 3 ch (3C)
A continuation of the topological concepts introduced in MATH 3103. Basic results in point-set topology. **Prerequisite**: MATH 3103.

MATH4173 Fluid Mechanics (O) 3 ch (3C)
**MECHANICAL ENGINEERING**

Note: See beginning of Section H for abbreviations, course numbers and coding.

All courses must be passed with a grade of C or better. All pre- and co-requisites are strictly enforced.

L* = Laboratory periods on alternate weeks.
T* = Tutorial periods on alternate weeks.

* = Engineering electives. Not all offered every year. Consult Department as to availability of courses from year to year at web site: http://www.me.unb.ca.

**ME1312** Computer Aided Design 4 ch (2C 3L I)

Introduces the technology of 3D parametric geometric modeling to design and model mechanical engineering parts, assemblies and devices. Geometric variables and their interrelationships will be covered by projects involving the design of mechanical components, assemblies and machines to meet functional requirements. Manufacturing requirements including Geometric Dimensioning and Tolerancing. The use of the model for analysis, optimization and simulation will be stressed. Presentation of the model through engineering drawings and pictorial renderings. Animation of mechanisms. A comprehensive commercial CAD program will be utilized.

Prerequisite: ENGG 1003. Co-requisite: MATH 1503.

**ME2003** Dynamics for Engineers 4 ch (3C 2L 1T)

The dynamic analysis of linear particle systems based on momentum. The analysis of centroids and moments of inertia for rigid bodies. Introduction to the rotation of a rigid body about a fixed axis, motion of a rigid body in a plane. The dynamic analysis of a rigid body with general planar motion using Newton’s second law, work and energy, momentum and angular momentum. Prerequisites: ENGG 1082. MATH 1013. Co-requisite: MATH 1503, or MATH 2213, or equivalent.

**ME2111** Mechanics of Materials I 3 ch (3C 1T)

Basic concepts, uniaxial stress and strain, Hooke’s law, tension, pure bending, bending design, shear flow, transverse loads, stress and strain transformation, Mohr’s circle, strain measurement. Co-requisite: ME 2003 or APSC 1023.

**ME2122** Mechanics of Materials II 3 ch (3C 2T*)

Fatigue, yield criteria, thin-wall pressure vessels, strength and deflection of beams, buckling of columns, instability, indeterminate beams, energy methods, Castigliano’s theorem. Prerequisite: ME 2111 or ME 2121 or CE 2023.

**ME2125** Mechanics of Materials Design Project 1 ch (2L* [W])

Analysis of the strength of a mechanical device. Shapes and materials will be modified to meet deflection and stress limits. Written reports will document choices made and assessment of design. Group oral reports. Prerequisite: ME 2111 or ME 2121 or CE 2023. Co-requisite: ME 2122.

**ME2143** Kinematics and Dynamics of Machines 3 ch (3C 2T*)

Fundamental concepts of linkages; displacement, velocity and acceleration analysis using graphical and analytical methods. Static and dynamic force analysis of linkages. Design of cams, gears and gear trains. Balancing rotating masses. Simple gyroscope effects. Prerequisite: ME 2003 or APSC 1023. Recommended: CS 1003 or other introductory programming course.

**ME2145** Kinematics and Dynamics Design Project 1 ch (2L* [W])

Student groups to design and build working model of planar linkage mechanism, based on a mechanical application. Cooperation and project management skills. Written reports to document choices made; evaluation of working model performance; and position, velocity, acceleration and forces. Group oral reports. Prerequisites: ME 2003, APSC 1023. Co-requisite: ME 2143. Recommended Co-requisite: ME 2352 or ME 3352.

**ME2352** Design Optimization 4 ch (3C 2L)

Optimization of any design is essential either to remain competitive or to improve product efficiency and quality. Several optimization methods are presented through a variety of mechanical design and industrial engineering problems. Topics include: single and multi-variable unconstrained optimization, linear programming, transportation, assignment and network problems. Other topics such as constrained and global optimization are introduced. Prerequisites: CS 1003 and MATH 2513. Recommended Co-requisite: ME 2143.

**ME3232** Engineering Economics 3 ch (3C)

Application of engineering economic analysis to mechanical and industrial engineering systems. Major emphasis will be given to decision-making
based on the comparison of worth of alternative courses of action with respect to their costs. Topics include: discounted cash flow mechanics, economic analyses, management of money, economic decisions. Restricted to students with at least 60 ch.

**ME3341 Machine Design** 3 ch (3C 2T)

**ME3345 Machine Design Project** 2 ch (4L*)[W]
Applies many topics of first 2 years in mechanical engineering. Practical aspects of detailed machine design project in team environment. Student groups to design, build and test a mechanical device for a client. Written reports will document choices made and assessment of design. Group oral reports. Prerequisites: ME 1312, ME 2122, ME 2145. Co-requisite: ME 3341.

**ME3433 Heat Transfer I** 3 ch (3C 1T)
Conduction: One-dimensional steady conduction and applications. Thermal properties. The differential equations of conduction; analytical and numerical solutions to two-dimensional problems and applications. Unsteady conduction lumped and differential approaches with applications. Temperature measurement. Convection: Dynamic similarity and dimensional analysis; boundary layer theory and applications to flow over heated/cooled surfaces; laminar and turbulent flow-free convection. Heat transfer with change of phase. Radiation: the laws of black body radiation; Kirchhoff's law and gray body radiation. Combined modes of heat transfer: heat exchanger design; augmentation of heat transfer; fins and thermocouples. Environmental heat exchange. Equivalent to CHE 3304. Prerequisites: (ME 2413 or ME 3413), (ME 2415 or ME 3415), (ME 3511 or ME 3513).

**ME3435 Heat Transfer I Laboratory** 1 ch (3L*)[W]
Laboratory experiments and measurements related to Heat Transfer I. Laboratory reports and readings are assigned. Prerequisites: (ME 2415 or ME 3415) and ME 3515) or CHE 2412. Co-requisite: ME 3433 or CHE 3304.

**ME3511 Fluid Mechanics** 3 ch (3C)
The principles of fluid mechanics are introduced and methods are presented for the analysis of fluid motion in practical engineering problems. Specific topics include: fluid statics; integral balances of mass, momentum, angular momentum and energy; boundary layer theory and introduction to the Navier-Stokes equations; dimensional analysis; and liquid flow in piping networks with pumps and turbines. Pressure and flow measurement and experimental uncertainty. Prerequisite: ME 2003 or APSC 1023. Co-requisite: MATH 2513.

**ME3515 Fluid Mechanics Laboratory** 1 ch (3L*)[W]
Laboratory experiments and measurements related to Fluid Mechanics I. Laboratory reports and readings are assigned. Co-requisite: ME 3511.

**ME3522 Applied Fluid Mechanics** 2 ch (2C 1T)
The performance and selection of hydraulic pumps and turbines, the lift and drag on immersed objects, and compressible flow in piping and nozzles. Prerequisites: (ME 2413 or ME 3413), (ME 3511 or ME 3513), ME 3515.

**ME3524 Fluid Systems and Design** 2 ch (1C 1L)[W]
Students work in groups to design projects that apply fluid mechanics. Examples include: pump and turbine selection; piping for conveyance of gases and liquids; gas and steam nozzles; lift and drag on air and water craft, land vehicles and projectiles; fluid forces on solid structures. Prerequisites: (ME 2413 or ME 3413), (ME 3511 or ME 3513), ME 3515. Co-requisite: ME 3522.

**ME3613 System Dynamics** 4 ch (3C 1L* 1T)
System concepts. Development and analysis of differential equation models for mechanical, electrical, thermal, and fluid systems, and for some sensors. Systems are primarily analyzed using Laplace transforms and computer simulation methods. Analysis concepts cover first, second, and higher order differential equations, transient characteristics, transfer functions, stability, dominance, and frequency response. Properties of systems: time constant, natural and damped frequency, damping ratio. Prerequisites: APSC 1023, (CS 1003 or CS 1073), (ECE 1013 or ECE 1813 or EE 1013 or EE 1813), MATH 3503. Recommended: ECE 2701 or EE 2701.

**ME3623 Automatic Controls I** 4 ch (3C 1L* 1T)
Philosophy of automatic control; open loop, sensitivity, components of a control loop; closed loop control, error analysis. Design of PI, PI, and PID-controllers based on closed-loop specifications. Stability criteria. Routh-Hurwitz, Lead/lag controller design using Root Locus and Bode diagrams. Sensor frequency response to classical inputs. Application of electronics and sensors to control systems based on frequency response. Basic digital analysis including digitization, sampling, aliasing, A/D and D/A devices, and phase loss due to time delays. Prerequisite: ME 3613.

**ME4173* Robot Kinematics** 4 ch (3G 2T*)
Structure and specification of robotic manipulators. Homogeneous transformations and link descriptions. Manipulator forward and inverse displacement solutions. Jacobians in the velocity and static force domains. Singular configurations and workspace analysis. An introduction to trajectory planning and manipulator dynamics. Lab experiments explore several robotic manipulators. Prerequisites: MATH 2513 and ME 2143.

**ME4283 Manufacturing Engineering II** 4 ch (3C 3L*)
Principles and physical phenomena of the basic manufacturing processes. A review of the attributes of manufactured products will precede lectures on forging, sheet metal working, machining and joining. Material behaviour during manufacturing. Processing of polymers, particulate metals and ceramics is presented. Design of manufacturing systems and the design of components based on criteria and constraints of manufacturing systems and equipment is included in each topic area of the course. A combination of lectures and experimental labs round out the course content. Prerequisites: (ME 2121 or ME 2212) and (ME 2222 or ME 3222).

**ME4421 Applied Thermodynamics** 2 ch (2C 1T)

**ME4424 Sustainable Energy Systems Design** 2 ch (1C 2L)
Project oriented course dealing with the design of energy systems that meet regional and global energy needs in the 21st century in a sustainable manner. A combination of conventional and renewable energy technologies will be presented, including topics on resources, extraction, conversion, and end-use. The impact of engineering design on the environment, society, and sustainability will be discussed. Projects will focus on the improved design of both conventional and renewable energy systems with the aim of improving overall efficiency while minimizing the environmental and social impact. Prerequisites: Finish two out of the three sets: ME 2413 or ME 3415, (ME 2415 or ME 3415), (ME 3433 + ME 3435), (ME 3522 + ME 3524). Co-requisite: ME 4421.

**ME4613 Mechanical Vibration** 4 ch (3C 3L*)
Review of single degree-of-freedom vibration: free response, damped, forced response. Multiple-degree-of-freedom systems. Design for vibration suppression. Distributed parameter systems; wave propagation. Vibration testing and experimental modal analysis including transducers and FFT analysis. Prerequisites: ME 3613 and MATH 3503.

**ME4622* Human Factors Engineering** 3 ch (2C 3L*)
An interdisciplinary study of the interaction of humans and their workspace. Physiological principles of work and energy. Anthropometrics. The ergonomics of workplace and job design. Work/rest schedules and nutrition. The physiological and psychological effects of human noise, vibration, lighting, vision, and the workspace environment. Lab periods include seminars and practical design exercise applying human factors and ergonomic theory to workspace problems. Prerequisite: Restricted to students with at least 65 credit hours.

**ME4633 Vibration of Continuous Systems** 3 ch (3C)
The free and forced vibration solutions for distributed parameter system models are covered in detail. Specific system models considered include strings/cables, rods, beams, plates, membranes and shells. Prerequisite: ME 4613.

**ME4673 Introduction to Mechatronics** 4 ch (2C 3L)
Mechatronics is an integrated approach to mechanical, electronic and computer engineering for the design of "smart" products and "intelligent" manufacturing systems. Fundamentals of mechatronics design, with emphasis on product design and fabrication. Examples of mechanical systems utilizing sensors and actuator technologies, including use of signal
ME4800: Senior Design Project 8 ch (1C 2T 4L) [W] A mechanical engineering design is developed and documented in the form of a technical report. Students normally work in approved teams. Industrial projects are developed in cooperation with industry and may require some period of time on site. University-based projects are developed in cooperation with university faculty. The first stage of this process involves definition of the project topic, background studies, and development of a conceptual design. An oral examination is conducted towards the end of the first term, and a written preliminary report is submitted. In the second term, a detailed design is prepared, the project is completed and orally examined, and a final report is submitted. One of the laboratory weekly hours is designated for a scheduled meeting with project advisor(s). Workshops involve practice exercises, relevant to student projects; on problem definition and formulation, project planning, teamwork, information and communication; conceptual, parametric and configuration designs; and professional, environmental, social, human factors, and safety aspects of design. Restricted to students who have completed at least 110 ch in their program. Prerequisite: ME 3341 and ME 3345. Recommended Prerequisite: ME 3524. Co-requisites: ME 4861. Prerequisite for Mechatronics Option students: ME 4673.

ME5113: Advanced Solid Mechanics of Composites 4 ch (3C 2L*) Introduction to stress analysis that deals with anisotropy of stress and general equations of the theory and elasticity. The elastic equilibrium and boundary value problem formulations are considered. Introduction to the modelling of inhomogenous composite solids, the effective moduli theory and the elasticity of laminated and fiber enforced composites, as well as, nanostructured composite theories are covered. Pre-requisites: ME 2122, ME 3222, and MATH 2513.

ME5173*: Advanced Kinematics of Manipulators 4 ch (3C 3L*) Various methods for solving the forward and inverse displacement problems are described. Particular emphasis is made on the use of screw theory for the derivation of the Jacobian matrix. The selection of alternate frames of reference for describing the Jacobian are also discussed. Methods used in the solution of the inverse displacement problem and the inverse and forward velocity problems for kinematically redundant manipulators are discussed. Prerequisite: ME 4173. Recommended Co-requisite: ME 2352.

ME5183*: Industrial Robotics and Automation 4 ch (3C 2L*) Brief introduction to robot kinematics including forward and inverse displacement and velocity solutions. An introduction to trajectory planning. Description of common uses of robotics in the manufacturing industry. Description and differences between soft and hard automation particularly in material handling systems. Fundamentals of sensors, actuators and controllers. Examples of automated machinery conveyer systems, feeder systems and packaging systems. Lab introduces different components of a flexible manufacturing system. Graduate students enrolling in this course must submit an additional project in order to receive credit for this course. Prerequisites: CS 1003, MATH 1503, ME 2143 and (ECE 2701 or ECE 2711).
include aerfoils of infinite span, wing of finite span, aerodynamic design considerations, and high lift devices. Other applications include the aerodynamics of wind-turbines and submarine hydrodynamics. An introduction to computational aerodynamics will also be given. **Prerequisite:** ME 3522.

**ME558**  
High Speed Aerodynamics 3 ch (3C)  
The principles of thermodynamics and fluid mechanics will be applied to describe external flow of compressible gases. Applications include two dimensional aerfoils, slender wings, aircraft and ballistics. **Prerequisite:** ME 3522.

**ME564**  
Automatic Controls II 4 ch (3C 2L*)  
The first half of the course is an introduction to digital control. Emphasis is placed on understanding the relationships between analog and digital techniques. The second half concentrates on developing the basic mathematical framework for state space control. Several powerful abstract mathematical tools such as the projection theorem are introduced. **Prerequisite:** ME 3623 or ECE 3312 or EE 3312.

**ME565**  
Predictive Control and Intelligent Sensors 4 ch (3C 3L*)  
Study on the design and practical implementation of model predictive controllers and intelligent sensors for industrial type processes. Topics to be studied include sensor selection and instrumentation, signal processing and conditioning, process modelling, identification, interfacing, predictive control, optimization techniques, algorithm design and intelligent sensor modelling. The course is project oriented and includes the use of Matlab and LabWindows CVI software. **Prerequisite:** ME 3623 or CHE 4601 or ECE 3312 or EE 3312.

**ME571**  
Nondestructive Testing 4 ch (3C 3L*)  
Principles of nondestructive evaluation, acoustic emission techniques, ultrasonics, microwave methods, electromagnetic probes, penetrating radiation. **Prerequisite:** A first year course in Physics or APSC 1023 or ENGG 1082. Restricted to students with at least 100 credit hours.

**ME581**  
Special Topics in Mechanical Engineering 1 ch  
Provides selected students an opportunity to complete an independent project or association with an undergraduate course within the department. Permission of both the instructor of the associated course and the director of undergraduate studies is required. Students may register for this course only once during their degree.

**ME583**  
Special Topics in Mechanical Engineering 3 ch  
Provides selected students an opportunity to complete an independent or group-based course of study within the department. Permission of both the instructor of the associated course and the director of undergraduate studies is required. Students may register for this course only once during their degree.

**ME591**  
Biomechanics I 4 ch (3C 2S)  
A number of topics in biomechanics are examined. Of particular interest is the mechanics of joints, and relation of the internal mechanics of joints to externally applied loads. Analysis techniques are introduced to facilitate analysis of the problems addressed in the course. **Prerequisite:** 100 credit hours.

**ME593**  
Industrial Ecology and Sustainable Engineering 3 ch (3C)  
The goal is to develop awareness and knowledge on forward-looking thinking of interaction of technology with human induced transformation of materials and energy from the perspectives of environment and sustainability. Topics include: humanity and technology; concept of sustainability; key questions of industrial ecology and sustainable engineering; status of resources; technology and risk assessment; introduction to life cycle assessment (LCA); LCA impact assessment and interpretation; streamlining the LCA process. **Prerequisite:** Available to all students across engineering disciplines who have completed at least 100 credit hours in their engineering programme.

**ME512**  
Advanced Solid Mechanics 3 ch (3C)  
Introduction to stress analysis that deals with anisotropy of stress and flow processes. Second law and reversibility: entropy, applications of the second law to non-flow and flow processes. Analysis of thermodynamic cycles. **Prerequisite:** CHEM 1982, MATH 1013. **Co-requisite:** MATH 2513.

**ME214**  
Thermodynamics Laboratory 1 ch (3L*) [W]  
Laboratory experiments and measurements related to Thermodynamics I. **Co-requisite:** ME 3413 or ME 2413.

**MEDIA ARTS AND CULTURES**

**MAAC1001**  
Understanding Media I: Technology and Culture 3 ch  
Provides an introduction to the study of media, technology and culture. Surveys a variety of contemporary media forms, from print to radio to film, television and the internet. Considering their history, their impact on modern culture, and their present state in the digital age. Course may be taken on its own but is designed to be combined with MAAC 1002 for a complete introduction to the study of media and culture. Students who have already completed MM 1001 for credit may not enrol in MAAC 1001.

**MAAC1002**  
Understanding Media II: Power and Pleasures 3 ch (LE)  
Complementing material covered in MAAC 1001, this course presents a more hands-on approach to critical media studies by introducing students to basic concepts in media semiotics and close analysis of media texts. Lectures will cover notions of signs and signification, the way codes and conventions contribute to socially-constructed meaning, as well as the personal, political and cultural implications embedded in all media constructions. Students will learn to break down and analyze magazines and television ads, music clips and movie posters, websites and viral videos, isolating how each of these texts convey messages and reflect the values and assumptions of the world that produced them. In addition to tests and written assignments, students will complete individual projects that will apply in some way what they have learned to communicate critically and creatively via digital media. Students who have already completed MM 1002 for credit many not enrol in MAAC 1002.

**MAAC1021**  
Introduction to Culture, Arts, and Media 3 ch (3C) [W]  
(Cross-Listed: CCS 1021)  
An interdisciplinary exploration of the pivotal role which culture, media, and the arts play in shaping understandings of the world around us. By considering a variety of cultural expressions, creative and artistic practices, and media representations, both old and new, from around the globe, this introductory course invites students to open up to new ways of thinking about how culture is created and continually contested, and is ultimately central to how we experience our lives. Required for CCS Majors and Honours students.

**MAAC1023**  
Media, Technology, and Creativity 3 ch (3C) [W]  
The complex interplay of arts, culture, and technology supplies the subject matter for a critical exploration of how creativity and contemporary digital culture. Students are introduced to key concepts in media studies through a series of topical modules while also working individually and in groups in a creative environment with an array of digital media tools used in the wider Media Arts & Cultures curriculum.

**MAAC2021**  
Popular Culture (Cross-Listed: CCS 2021) 3 ch (3C) [W]  
This course introduces historical and theoretical contexts for the study of mass-mediated popular culture, from movies and TV to comic books and video games. It also explores: the reciprocal relationship between creative expression and economic constraints, between the mainstream, subcultures, and counter-cultures, as well as familiar designations of “high-brow” and “low-brow.” Using specific media case studies, students will engage with contemporary and expository debates about the impact of representations, the role of ideology, the agency of the audience, the meaning of fandom, and the politics of taste. While learning to analyze and evaluate their relative merits, students will learn to step back and think critically about the
SECTION H: FREDERICTON COURSES

larger implications and the cumulative effects of our constant exposure to popular culture texts. Students who have already completed MM 2021 for credit may not enrol in MAAC 2021.

MAAC2022 The Art of Film (Cross-Listed: FILM 2022) 3 ch (3C) [W]
Introduces students to the language of motion pictures and to critical tools for discussing and writing about the 7th art - the art of film. By studying how movies function aesthetically, and how they become meaningful to audiences, students will acquire critical and formal analytical skills that will both enhance their appreciation for cinema and serve them more broadly as consumers and/or producers of visual culture. Topics will include mise-en-scène, framing, image composition, photographic space, colour, editing, sound, and narrative structure.

MAAC2095 Introduction to Video Games (O) 3 ch (3C) [W]
An introduction to the study of games as interactive electronic and digital media. Topics may include the history of computer games and videogames, genre studies, the current structure of the games industry, and an overview of game studies as an academic field. Assignments may include both written work and creative media projects. No previous experience with digital games is required.

MAAC2797 Rock and American Popular Music (Cross-Listed: MUS 2797)
This course is a survey of the history of Rock music from its origins in the late nineteenth century to the present day. Topics addressed include: the effects of technology in the music industry, role of African-American music in the development of rock music, the developments of Jazz, R&B, consumption of early Rock and Roll, and the “white appropriation” of African-American music. The course finishes with a survey of recent trends of disco, new wave, heavy metal, rap and alternative music. Restriction: Credit may not be obtained for both FNAT 2792 and MAAC 2797.

MAAC2998 Digital Film Production (Cross-Listed: FILM 2998) 3 ch (3C)
An introduction to the fundamental concepts and procedures of visual and audio production, including the techniques and aesthetics of shooting, lighting, and editing. Over the course of the term, students will engage in a series of short exercises covering a variety of styles, genres and modes. Taught cooperatively with the New Brunswick Filmmakers’ Co-op. NOTE: Students who have received credit for MAAC/FILM 3998 may not take this course for credit.

MAAC2999 Digital Film Production 3 ch (3C)
This second course in the production sequence puts emphasis on application of skills learned in MAAC 2998 by focusing on production of several short projects in various formats. Group work and analysis of student productions constitute the main course activities. Taught cooperatively with the New Brunswick Filmmakers’ Co-op. NOTE: Students who have received credit for MAAC/FILM 3998 may not take this course for credit. Prerequisite: MAAC 2998, or permission of the instructor.

MAAC3001 Media Arts (A) 3 ch
Surveys artists’ engagement with electronic and digital media, as well as media institutions, from the early 20th century avant-garde to the present. Topics may include Dada, Surrealism, Andy Warhol, experimental cinema, video art, modernism, postmodernism, electronic music, remix culture, and public space, and new media art. In addition to traditional assignments and tests, students will complete individual and group creative projects. Students cannot obtain credit for both MM 3001 and MAAC 3001. Students who have already taken MAAC 2001 may not obtain credit for MAAC 3001.

MAAC3003 Click Here! Interactivity on the Web 3 ch (LE)
The use of web applets that advertise, entertain or inform is ubiquitous, and a lexicon of good practice is developing. The course introduces the problem of designing web-browser-based interactive modules that are human-friendly. Through the completion of individual projects, students will use Flash® or HTML5 to display text, images, and computer-generated graphics as well as techniques to control the presentation of material in response to how people interact with it. Open to students who have completed 45 credit hours, or with permission of the instructor. Students who have already completed MM 3003 for credit may not enrol in MAAC 3003.

MAAC3021 Culture Matters: Critical Approaches to Studying Culture (Cross-Listed: CCS 3021)
Offers critical interdisciplinary approaches to understanding culture through examination of key concepts, theories and practices in the field of Cultural Studies. Required for CCS and MAAC Majors and Honours students.

MAAC3055 Gender and Media (A) 3 ch (3C)
Investigates key issues and theoretical approaches in the study of gender and media, with a particular focus on the ways in which the popular media texts construct and communicate gender and sexuality. Using theories from media studies, cultural studies, queer studies, and gender studies, this course explores processes and practices of gender in media representations, media production, and audience consumption, in the readings, class discussions, presentations, and projects, students gain insight into the way in which gender and its interactions with sexuality, race, ethnicity, class, ability, age, and many other dynamics significantly impacts our cultural formations and media experiences. Open to students who have completed 45 credit hours, or with permission of the instructor.

MAAC3057 Advertising and Consumer Culture (O) 3 ch (3C)
Traces the origins, transformations, and current landscape of consumer culture, especially in relation to the role and impact of advertising as a form. Topics may include postmodern culture, consumer identity, gender and representation, viral marketing, activism, and resistance. Open to students who have completed 45 credit hours, or with permission of the instructor.

MAAC3065 Horror Access Media & Culture (A) (Cross-Listed: CCS 3065)
Why have people in so many times and places enjoyed spooky stories? What, if any, value can we assign to tales of horror and the supernatural? Do ghost stories and monster movies differ across nations and cultures? Questions like these will guide our global study of gothic, horror and supernatural texts chosen from a wide array of media, from literature and cinema, to television, comic books, and video games. Topics may include visual culture and the sublime, Freud's notion of "the uncanny," the gothic archetypes, gender identity, conceptions of ritual and myth, the modern and the postmodern, subcultures, folklore, religion and secularization. Open to students who have completed 45 credit hours, or with permission of the instructor. Students who have already completed 3065 may not enrol in MAAC 3065. Students who have taken WLCS 3065 may not attain credit for MAAC3065.

MAAC3066 Trauma and Seduction: Early German Cinema (A) 3 ch (3C) (Cross-Listed: CCS 3066, FILM 3066)
Beginning with the earliest silent movies and concluding with National Socialist propaganda films, this course offers an introduction to a prolific and important era in German film history: the Weimar Republic and pre-WWII period, 1918-1930. Our discussions will situate the films within larger political and cultural discourses. Emphasis will be placed on such topics as the cinematic response to the trauma of WWII; German national identity; expressionism and modernity; the politics of gender and sexuality; the impact of sound on film aesthetics; the relationship between cinema and other media; the ethics of film production. Films to be studied include features by directors such as Lang, Lubitsch, Murnau, Riefenstahl, Sagan, von Sternberg and Wiene. In English. Students who have taken WLCS 3065, or GER 3066 may not attain credit for MAAC3065.

MAAC3072 (Re)constructing National Identity: Contemporary German Cinema (A) (Cross-Listed: CCS 3072, FILM 3072)
Studies the major accomplishments of East and West German cinema of the post-war period, as well as German unification. We will consider questions of narrative, genre, and authorship, examine film’s relationship to other media, and focus on the dynamic interaction between film history and social history. Films to be studied include features by prominent directors such as Wolf, Fassbinder, Wenders, von Trotta, Carow, Dörrie, and Tykwer. Students who have taken WLCS 3072, or GER 3072 may not attain credit for MAAC3072.

MAAC3075 Framing Reality: Theory and Practice of Documentary Media (A) (Cross-Listed: FILM 3075)
This course surveys the history and aesthetics of non-fiction filmmaking from the birth of cinema to the digital age. It will examine epistemological and ethical questions raised by documentary’s encounter with reality and its attempt to present “the truth.” Films screened are drawn from an array of nations and range from the personal to the political as well as more experimental and avant-garde works. The course includes a film production component as students will apply what they have learned in class by producing a short non-fiction film as a final project. Open to students who have completed 45 credit hours, or with permission of the instructor. Students who have already completed MM 3075 for credit may not enrol in MAAC 3075.

MAAC3082 History of Canadian Cinema (A) 3 ch (3C) (Cross-Listed: CCS 3082, FILM 3082)
Focuses on the first half-century of filmmaking in Canada and the nation’s long struggle to develop and sustain a functioning film industry in the shadow of Hollywood. Readings and screenings trace the history of the movies in Canada from the silent era to the 1970s. Issues raised may include Canadian/American relations, national and regional identities, tensions between art and entertainment, media and cultural industries, representation of race, class, gender, and relation of Canadian film to other media (TV, radio, video) and other arts (painting, music, literature) in Canada. Open to students who have completed 45 credit hours, or with

442
MAAC3085 Television Studies (A) 3 ch (3C) [W]
This course explores the different approaches used by scholars to understand the cultural role of television in contemporary North American life. Special attention is paid to the impact of new technologies like colour broadcasting, satellite and cable systems, HDTV and the internet. Topics may include TV genres from sitcoms to soap operas, the rise of reality TV, fatherhood and family values, advertising aesthetics, Saturday morning cartoons, Hockey Night in Canada®, and the ethics of the evening news. Open to students who have completed 45 credit hours, or with permission of the instructor. Students who have already completed MM 3085 for credit may not enrol in MAAC 3085.

MAAC3087 Serials, Franchises and Fandom 3 ch (O) [W]
This course explores the history of storytelling and fandom throughout the 20th and 21st centuries. Topics include "serialitis" during the silent era of film, merchandising and serial promotion, transmedia franchises, fan-made texts, and the building of fan-communities through ongoing narratives. Media discussed may include dime novels, comic books, film, radio, television, video games, anime, podcasts, and online forums. Open to students who have completed 45 credit hours, or with permission of the instructor.

MAAC3095 Digital Game Studies (A) 3 ch (3C) [W]
Digital games are a major cultural and artistic force in the contemporary media landscape. In this course, students will have the opportunity to consider digital games of various kinds and how they might both relate to and be distinct from the other forms of media. Using critical readings, class discussion and gameplay projects, we will consider competing notions about the nature of games, gaming practices, gameplay, and gaming cultures. No previous experience with digital games is required. Open to students who have completed 45 credit hours, or with permission of the instructor.

MAAC3101 Media Design I 3 ch (LE)
Explores strategies for creative visual expression across media, working within the constraints of the design paradigm. Topics will include formal design theory, colour theory, basic typography, image construction, and an introduction to visual communications using lectures, assignments, readings, in-class seminars, group discussion and critique. Open to students who have completed 45 credit hours, or with permission of the instructor. Students who have already completed MM 2002 for credit may not enrol in MAAC 3103.

MAAC3102 Media Design II 3 ch (LE)
Provides an opportunity for students to develop further skills and broaden their understanding of visual communication. Topics will include organizing efficient design systems, producing eloquent moving image typographies and developing consistent visual identity programs. The work and design strategies of leading contemporary practitioners will be examined. Prerequisites: MAAC 3101. Students who have already completed MM 3001 for credit may not enrol in MAAC 3102.

MAAC3113 Music, Computers and Technology (Cross-Listed: MUS 3113) 3 ch (3C)
The use of computers in music from a practical and historical perspective. Topics include the study of music technology for use, and developments in computer music. The course covers the use of computers in music theory, composition, and interactive media applications. Project based with work in current software applications. Open to students who have completed 30 credit hours, or with permission of the instructor.

MAAC3211 Mobility, Media, and Art (O) 3 ch (3C) [W]
(Cross-Listed: CCS3211)
This course considers how artists, filmmakers, and writers use mobile media to create various forms of art, including, cellphilsms, soundwalks, and micro-blog. In general, mobile media art takes art of the gallery cinema, and city and puts it into our pockets and, public spaces, and rural environments. Drawing on the mobilities paradigm, we examine how mobile media artists working in screen, digital, and game space challenge the usual forms of participation, inaccessibility, and accessibility. We will also analyze different mobile media art projects both within and outside of the classroom, which may include cellphilsms, mobile phone orchestras, soundwalks, and/or soundscapes. Students will have the option of creating a cellphilm or soundwalk for their final project.

MAAC3212 Lens Media I 3 ch (LE)
Examines the principles of still image construction using digital technology. Covers the general theories of light in natural and artificial environments. Introduces notions of colour, form, line and texture as they relate to photographic image making. Workshop activity will provide students with skills in making still images in the studio and the natural environment.

MAAC3213 Lens Media II 3 ch (LE)
Explores the construction of a single image from multiple still photographs, and the concepts of aspect ratio and information density in image making. Students will examine how these images may be used to build immersive environments, and experiment with presentation technologies that expose consideration of physical and social presence in these environments. Prerequisites: MAAC 3212, or permission of the instructor. Students who have already completed MM 3213 for credit may not enrol in MAAC 3213.

MAAC3362 Sound Design 3 ch (LE)
Sound design, though often overlooked, is an essential aspect of much contemporary media. Course focuses on creativity and technology for recording, editing and mixing sound for audiences in film, video, drama and multimedia production. Topics include: technical and artistic application of sound design for film with regards to specific genres, Foley artistry, animation, game audio, soundscapes design and sound motif. Open to students who have completed 45 credit hours, or with permission of the instructor. Students who have already completed MM 3362 for credit may not enrol in MAAC 3362.

MAAC3401 Digital Culture 3 ch (3C) [W]
Examines major theories of digital culture and contemporary media. Using examples from a broad range of social, artistic, and cultural practices, the course analyzes the development of digital technologies and their impact on today's culture. Topics and approaches may include cyborg theory, the information economy, convergence, media ecology, virtual worlds, remix culture, and new media aesthetics. Open to students who have completed 60 credit hours, or with permission of the instructor. Note: Students who have received credit for MM 3107 may not take MAAC 3401 for credit.

MAAC3405 Media & Environment (O) 3 ch (3C) [W]
(Cross-Listed: CCS 3405)
This course introduces students to the literature of environmental media studies. The media landscape, from television to video games, has a profound role in shaping how we think about nature, the wilderness, and the environment. The news and social media, are also important sources of information about environmental issues. In addition to being crucial sources of information, however, the media create many environmental problems, such as e-waste and carbon emissions. This course reflects on the production, distribution, and associated waste of digital media alongside its role in representing the environment and environmental problems. Teaching methods include lectures and seminars. Students have the option of creating an environmental media project, e.g. a media campaign or short documentary, for their final project.

MAAC3431 Global Media, Politics, and Power (O) 3 ch (3C) [W]
(Cross-Listed: CCS 3431)
Uses core readings and theoretical frameworks from media studies to examine the complex relationships between media, society, and politics, across the twentieth century and into the new millennium and in global peripheries. Topics include media ownership and regulation; media and social movements; censorship and freedom of the press; television and digital culture in emerging democracies; the politics of the popular; media arts and activism. Students who have taken WLCS 3431 may not attain credit for MAAC 3431.

MAAC3435 Media Culture and Change (O) 3 ch [W]
This course examines the relationship between residual, in-use, and emergent media technologies, with a focus on the influence of these interactions on culture and identity. Drawing from works by Indigenous, anti-racist, queer, feminist, and environmental media scholars, we will discuss the frequent association of media technologies with major societal upheaval. This course looks at various media, including the ipuq and printing press, video games, and twitter, to examine key moments when changing media ecologies influence wider social, political and economic spheres. Topics may include orality, colonialism, innovation, technological determinism, medium theory, and speed. A key aim of the course is to analyze the materiality of medium and to fulfill this goal, we will participate in a series of in-class activities and experiments, which may include storytelling, using photosensitive paper, creating flipbooks, or other residual technologies.

MAAC3501 to 3509 Individual Studies in Media 3 ch
Courses of independent study in a topic of special interest to the student, to be taken under the supervision of a Faculty member. Topics will be specified in a written proposal and approved in advance by the Director of Media Studies. Students who have completed a MM 3501-9 course for credit may not enrol in the matching MAAC 3501-9 course.
MAAC3601 Game Design I 3 ch (3C)
The fundamental challenges of creating interactive gameplay are the subject of this course that introduces students to the processes employed by designers for the creation of a game. Students will interrogate notions of ‘gameplay’ and the evolution of the medium, compare and re-design a variety of existing games, workshop ideas, and create their own game designs. This course is open to students who have completed at least 45 ch at the university level.

MAAC3602 Game Design II 3 ch (3C)
Building on skills learned in Game Design I, students work in groups to conceptualize and implement a digital game while examining more advanced issues in game design and development from a variety of perspectives. Prerequisites: MAAC 3601 or permission of the instructor.

MAAC3793 East Coast Music (O) 3 ch (3C)
(Cross-Listed: CCS 3793, MUS 3793)
The relationship between music and East Coast identity is the focus of this course that covers a range of music styles, regional differences, and contemporary modes. The theme unifying the various case studies is the importance of music to the region(s). The subject also allows for a broader reflection on music’s importance to identity. Topics may range from Cape Breton fiddle, through Halifax hip-hop.

MAAC3795 Dark Futures: Visions of Dystopia since (O) 3 ch (3C)
World War I (Cross-Listed: CCS 3795)
Offers an exploration of dystopian literature and film from a broad cross-section of cultures over the past 100 years or so. Based on an examination of texts by authors such as Karel Capek, Evgeny Zamiatin, Paolo Bacigalupi, and Samuel R. Delany, and films such as Stalker, Battle Royale, and the Hotel Ozon, and Battle Royale, students will consider how dystopias reflect, respond to and anticipate totalitarianism, environmental degradation, dehumanization, and other social, political, cultural and technological challenges facing humanity.

MAAC3881 Screen Acting (O) 3 ch (1.5C/1.5WS) (LE)
(Cross-Listed: FILM 3881)
Explores the relationship between actor, director, script and camera. Workshop exercises allow students to explore various modes of working with actors on a film set and during the rehearsal and audition process in order to realize the development of character within the setting of story and script. Limited to 20 students. NOTE: Students who already have credit for ENGL 3980 or FILM 3980 cannot obtain credit for FILM 3881.

MAAC3998 Film Production (Cross-Listed: FILM 3998) 3 ch (3C/WS) (LE)
This course introduces students to the processes and technical aspects of motion picture film production. Topics include: 16mm film camera, analog and digital sound recording, lighting for film, film crew roles, budgets, casting and rehearsals, locations, script breakdowns and film forms, and advanced editing. Students will participate in both the production of a short, small-group 16mm film project, and a larger, full-class Super 16mm film project produced as an industry-model film. Taught cooperatively with the New Brunswick Filmmakers’ Co-Op and the Film Industry of New Brunswick. Limited to 20 students. NOTE: Students who already have credit for ENGL 3990/3991 or the FILM 3998/3999 “Film and Video Production” cannot obtain credit for MAAC 3998.

MAAC3999 Editing and Post Production (A) 3 ch (3C/WS)
(Cross-Listed: FILM3999)
An intensive hands-on course in the theory and application of post-production techniques for digital filmmaking and video production, with a focus on editing for narrative film. The course covers history of film editing, basic techniques, best practices, and changing technologies. Grading is principally based on creative assignments that grow out of engagement with this material.

MAAC4000 Digital Film Production III 6 ch (6WS)
(Cross-Listed: FILM 4000)
This full year course takes students through the entire process of production of a professional quality short film, from fundraising, budget planning, and pre-production work through the shoot to the final edit and on to the marketing and submission of the film to festivals. Students work together as a production team, taking on a variety of responsibilities while supervised by the instructor. Prerequisites: MAAC /FILM 2999 or permission of the instructor.

MAAC4001 Advanced Production 3 ch (3C/WS) (LE)
(Cross-Listed: FILM 4001)
Students produce more complex films, developing a project from beginning to end, working on each other’s projects, and gaining hands-on experience in a variety of skilled positions on a film’s crew. Prerequisite: MAAC/FILM 2999 or MAAC/FILM 3998, or permission of the instructor.

MAAC4021 Advanced Studies in Popular Culture (A) 3 ch (3S) [W]
(Cross-Listed as CCS 4021)
Seminar focusing on theoretical approaches to the study of popular culture. Topics and theories covered may rotate from year to year. Prerequisites: 60 ch and MAAC/CSS 2021, or permission of the instructor.

MAAC4401 Animation Principles (A) 3 ch (LE)
Examines animated image making across a variety of media (film, TV, games), all of which rely on the Phi Phenomenon identified in Gestalt theory. Small project assignments will introduce students to some common animation tools and course discussions will focus on the application of animation concepts to storytelling. Prerequisite: Students will normally have completed 60 ch. Students who have already completed MM 4401 for credit may not enrol in MAAC 4401.

MAAC4402 Animation Methods (A) 3 ch (LE)
Considers the practical aspects of storytelling using 3D model-building tools. Students will gain practical experience using current digital animation software such as Autodesk Maya®. Topics considered include modelling, skinning, texturing, lighting, animation, and rendering. Prerequisite: MAAC 4401, or permission from the instructor. Students who have already completed MM 4402 for credit may not enrol in MAAC 4402.

MAAC4404 Mobile Media (A) 3 ch (3S)
This course explores the impact and influence mobile devices have had, and continue to have, on patterns of life, work and play. Examines the unique media forms and characteristic experiences emerging from the use of smart phones, tablets and other handheld digital devices. Discussions, readings and assignments encourage critical reflection on the relationship between technology and culture in a mobile world. Prerequisite: 60 ch, or permission of the instructor.

MAAC4405 Creative Mobile App Design (A) 3 ch (3C)
The course provides an overview of principles of human interface design associated with creating, designing, and prototyping applications for the iPod®/iPhone® & iPad®. Topics covered may include gaming, augmented reality, creative play, or information presentation. Students will explore practical problems associated with planning game-play scenarios, integrating computer-generated imagery, or creating seamless integration displays for mobile devices. Individual and group project work will focus all the steps needed to produce a finished prototype for the app. Mobile devices will be provided for classroom use. Open to students who have completed 75 credit hours, or with permission of the instructor.

MAAC4951 Professional Practice 3 ch
Individual internship consisting of 80 hours of work in one term on a project for an organization in the community that involves skills and/or ideas directly related to the Media Arts & Cultures program. A faculty member will supervise the progress of the student and a final report on the project undertaken will be evaluated for academic assessment. Subject to faculty and placement availability. The final course grade will be reported as CR/NCR. Prerequisites: MAAC 3101, and at least 75 ch completed.

MAAC4952 Professional Practice 3 ch
An internship consisting of 80 hours of work in one term on a project for an organization in the community that involves skills and/or ideas directly related to the Media Arts & Cultures program. A faculty member will supervise the progress of the student and a final report on the project undertaken will be evaluated for academic assessment. Subject to faculty and placement availability. The final course grade will be reported as CR/NCR. Prerequisites: MAAC 3101, and at least 75 ch completed.

MAAC4982 Topics in Media Arts & Cultures (O) 3 ch (3S)
An advanced seminar in theory of Media Cultures and/or practice of Media Arts. Topics will vary from year to year. Prerequisites: 75 ch, and MAAC 3401, or permission of the instructor. NOTE: Students who already have credit for MM 4992 may not enrol in MAAC 4992.

MAAC5000 Honours Thesis 6 ch [W]
A reading and research course open to students qualifying for Honours in Media Arts & Cultures. To enrol in this course, students must first arrange for a professor to supervise their project. The course will result in the writing of an Honours Thesis, normally 40-60 pages in length. Student may not enroll in both MAAC 5000 and MAAC 5980.

MAAC5980 Honours Project 6 ch [W]
A reading, research and creative practice course open to students qualifying for Honours in Media Arts & Cultures. To enrol in this course, students must first arrange for a professor to supervise their project. The course will result in the creation of a Media Arts Project along with a 10-15 page Project Paper. Students may not enroll in both MAAC 5000 and MAAC 5980.
MODERN GREEK

See beginning of Section H for abbreviations, course numbers and coding.

GRKM1003 Modern Greek I 
3 ch (3C)
Introduces language skills which will enable students to speak, read and write the language of modern Greece.

GRKM1013 Modern Greek II 
3 ch (3C)
Further develops Modern Greek language skills as introduced in GRKM 1003. Prerequisite: GRKM 1003

GRKM2003 Intermediate Modern Greek I 
3 ch (3C)
A course designed to build and develop reading, writing, listening and oral skills acquired at the introductory level. Prerequisite: GRKM 1013 Modern Greek I or equivalent.

GRKM2013 Intermediate Modern Greek I 
3 ch (3C)
A course designed to further develop comprehension and oral skills and improve speaking and writing ability. Prerequisite: GRKM 2003 Intermediate Modern Greek I or equivalent.

GRKM3003 Beginning Advanced Modern Greek 
3 ch (A) (3C)
A beginning advanced course for students who wish to improve their language skills in Modern Greek. The course offers a balanced practice of oral, aural, reading and writing skills, allowing students to consolidate and extend their prior knowledge of the language. Prerequisite: GRKM 2013 or a placement test. Students who successfully complete the course will be in a position to take the A1 level of the common European Framework of Reference (CEFRR) to acquire an official certification in the Greek Language.

GRKM3013 Advanced Modern Greek 
3 ch (A) (3C)
An advanced course for students who wish to improve their language skills in Modern Greek. The course offers a balanced practice or oral, aural, reading, and writing skills so that student can acquire a deeper sense of the Greek languages, extend their vocabulary and practise their language acquisition skills using material (TV series, e-press, songs, and everyday documents). Prerequisite: GRKM 3003 or a placement test.

MUSIC

See beginning of Section H for abbreviations, course numbers and coding.

MUS1001 Music Through the Ages 
3 ch (3C)
This course examines the role of music in the social, ceremonial, spiritual, and everyday lives of people in the western world over the last two millennia. It provides an overview of how people in successive eras have experienced music and the influences that initiated changes in and perceptions of music. Many of the great musicians, composers, and styles of western music culture are studied. The course is designed to lay a foundation for further studies in music and music history. Normally this course is taught online.

MUS1002 Music of the World (A) 
3 ch (3C) [W]
This course allows students to develop an understanding of world cultures through the musical traditions and habits of people in different parts of the globe. Students will investigate the development and historical background of world music traditions and the typical musical instruments and representative musicians in various regions. Students are also encouraged to develop their perspective on the relationship between music and society. No prerequisite. Normally this course is taught online.

MUS2113 Introduction to Music 
3 ch (3C) [W]
An introductory course investigating music theory and performance, for students with limited or no music background. Content includes notation in treble and bass clef, rhythmic notation, basic music theory, music terminology and various aspects of performance. May require concert attendance. No prerequisite.

MUS2114 Introduction to Music Appreciation 
3 ch (3C)
Introductory course in music appreciation for the classical music lover with little or no music background. This course covers elements of music, performing media, and historical music periods from the Middle Ages to the Twentieth Century. The student will be introduced to music terminology, important composers and will develop listening skills. May require attendance to a symphony and additional lab fee. Restriction: Credit may not be obtained for both FNAT 2123 and MUS 2123.

MUS2123 Music Theory I 
3 ch (3C) [W]
Introductory course in music theory for those students with some musical background. Content includes notation, time values, major and minor scales, intervals, chords, simple time, transposition, terms and signs, music

SECTION H: FREDERICTON COURSES

analysis, ear-training and rhythm studies. Restriction: Credit may not be obtained for both FNAT 2123 and MUS 2123.

MUS2124 Music Theory II 
3 ch [W]
This is a second-level course on the fundamentals of music. Content includes rhythmic subdivisions, non-harmonic tones, harmonizing of melodies, secondary chords, principles of chord progression, seventh chords and elementary modulation. Restriction: Credit may not be obtained for both FNAT 2124 and MUS 2124.

MUS2797 Rock and American Popular Music 
3 ch (3C)
(Cross-Listed: MAAC 2797)
This course is a survey of the history of Rock music from its origins in the late nineteenth century to the present day. Topics addressed include: the history of technology in the music industry, role of African-American music in the development of popular music, the developments of jazz, R&B, and early Rock and Roll, and the "white appropriation" of African-American music. The course finishes with a survey of recent trends of disco, new wave, heavy metal, rap and alternative music. Restriction: Credit may not be obtained for both FNAT 2792 and MUS 2797.

MUS3000 Studio Work 
6 ch (6C)
Practical work in some aspects of music. Students must seek permission of the Director of Music before registering. Restriction: Credit may not be obtained for both FNAT 3000 and MUS 3000.

MUS3001 Studio Work/Directed Study 
3 ch
Practical or academic work in various aspects of music. Usually project-based in consultation with the Director of Music. Students must seek permission of the Director of Music before registering.

MUS3003 Studio Work: Private Lessons I 
1.5 ch (1.5C)
Practical work in some aspect of music, often in the form of one-on-one lessons to develop knowledge, musicianship and skills on an instrument or voice. Students must seek permission of the Director of Music before registering. Most students will complete both MUS 3003 and MUS 3004. Students who have received credit for MUS 3001 cannot receive credit for MUS 3003.

MUS3004 Studio Work: Private Lessons II 
1.5 ch (1.5C)
Practical work in some aspects of music, often in the form of one-on-one lessons to develop knowledge, musicianship and skills on an instrument or voice. Students must seek permission of the Director of Music before registering. Most students should expect to take all three of MUS 3005, MUS 3006, and MUS 3007.

MUS3005 Studio Work: Music Ensemble 1 
1 ch (1C)
Practical work in one area of music, to develop musicianship through participation in directed ensembles such as band, choir or orchestra. Students must seek permission of the Director of Music before registering. Most students should expect to take all three of MUS 3005, MUS 3006, and MUS 3007.

MUS3006 Studio Work: Music Ensemble 2 
1 ch (1C)
Practical work in one area of music, to develop musicianship through participation in directed ensembles such as band, choir or orchestra. Students must seek permission of the Director of Music before registering. Most students should expect to take all three of MUS 3005, MUS 3006, and MUS 3007. Students who have received credit for MUS 3002 cannot receive credit for MUS 3007.

MUS3007 Studio Work: Music Ensemble 3 
1 ch (1C)
Practical work in one area of music, to develop musicianship through participation in directed ensembles such as band, choir or orchestra. Students must seek permission of the Director of Music before registering. Most students should expect to take all three of MUS 3005, MUS 3006, and MUS 3007. Students who have received credit for MUS 3002 cannot receive credit for MUS 3007.

MUS3113 Music, Computers and Technology 
3 ch (3C)
(Cross-Listed: MAAC 3113)
The uses of computers in music from a practical and historical perspective is identified and studied. Early uses in notation, composition, presentation, interactive and multimedia applications are explored. Project based with work in current software and applications. Open to students who have completed 30 credit hours, or with permission of the instructor.

MUS 3022 Imperial Vienna (O) 
3ch (3C)
An exploration of Vienna through its musical heritage and contemporary musical culture. Composers such as Mozart, Haydn, Beethoven and Schubert all made their home in Vienna and wrote some of the most memorable and influential music known. Drawing on the city's history, art and architecture over three centuries, we will examine Vienna's role in the
development of Classicism, Romanticism and Nationalism in music history. We will also consider the current music scene in Vienna as present in Jazz and pop festivals, street performances and events. The course will include concerts in historic halls, visits to museums/galleries, and walking tours in the Old City. Taught on location as part of the Travel Study program Vienna.

MUS3023 Musical Composition 3 ch (3C) [W]
A course in basic elements of composition for students with some musical background and literacy. This course addresses both technical issues and the creative nature of composing music. Musicians who cannot read music are welcome but must have permission from the instructor. Restriction: Credit may not be obtained for both FNAT 3123 and MUS 3123.

MUS 3204 Music and Cinema (O) 3 ch
A practical and theoretical examination of the role of music in cinematic narrative from the silent film to the 21st century. The course will examine the origins of the music-cinema relationship from the misnamed “silent film era”, through the development of synchronized sound-film systems and the use of music in a selection of genres including film-noir, musical, science fiction, romantic comedy and suspense films. Music video production processes will be explored including the use of narrative storytelling techniques, as well as animation, claymation, multimedia and experimental methods of creating images to synchronize with existing soundtracks.

MUS3123 Berlin to Broadway: Musical Theatre Across the Oceans (Cross-Listed: CCS 3123)
An examination of the life and work of Kurt Weill focusing on his contribution to the theatre culture of Berlin in the twenties and to Broadway in the forties. We will read selected stage works by Weill and his renowned collaborators such as B. Brecht and W. Anderson and I. Gershwin, discuss their social relevance, theatrical power, and reception and explore the interplay between the various media: text, music and stage. Emphasis will be placed on the urban cultural context of Berlin, and the history of musical theatre and Broadway musical genres, including current trends. The goal of the course is to provide students with the opportunity to study a theatre composer in depth, to foster a critical appreciation of Weill’s unique place in music theatre, and to enrich their understanding of material, cultural and performative aspects of musical theatre. Stage works by Weill may include The Threepenny Opera, Happy End, The Rise and Fall of the City of Mahagonny, Lady in the Dark, Street Scene, Lost in the Stars. Other musicals to be discussed may include Cabaret, Guys and Dolls, Sweeney Todd. In the Woods. The course will be taught in English. Open to students who have completed at least 30 ch of university courses or by permission of the instructor. Students with credit in GER 4033 may not take this course for credit. Students who have taken WLC 3023, or GER 4033 may not attain credit for CCS 3123.

MUS3133 Conducting 3 ch (3C) [W]
Basic conducting techniques as applied to wind, string, and vocal ensembles and the interpretation of various types of music. Permission of the Director of Music required before registering. Restriction: Credit may not be obtained for both FNAT 3133 and MUS 3133.

MUS3204 Music and Cinema (Cross-Listed: FILM 3204) 3 ch
A practical and theoretical examination of the role in music in cinematic narrative from the silent film to the 21st century. The course will examine the origins of the music-cinema relationship from the misnamed “silent film era”, through the development of synchronized sound-film systems and the use of music in a selection of genres including film-noir, musical, science fiction, romantic comedy and suspense films. Music video production processes will be explored including the use of narrative storytelling techniques, as well as animation, claymation, multimedia and experimental methods of creating images to synchronize with existing soundtracks.

MUS3765 History of Music in Medieval and Renaissance (3 ch (3C) [W])
Periods (A) (Cross-Listed: HIST 3765)
Introduction to music between 800 and 1800, studying representative styles and putting this music in a historical perspective.

MUS3775 History of Music in the Late Baroque and Classical Period (A) (Cross-Listed: HIST 3775)
Begins with an examination of the stylistic background of music of the Baroque Period, and follows the development of musical form and style through the late Baroque and Classical eras, i.e. from c. 1700–c. 1830. Some attention will be given to the role of the musician in the context of the social history of the time.

MUS3785 History of Music in the Romantic Era (A) (Cross-Listed: HIST 3785)
Traces musical development in nineteenth century Europe in its cultural-historical milieu, mainly in France and Germany. Examines the development of the orchestra, and the French and Austro-German contribution to that development, the role of nationalism in music and the role of the opera.

MUS3793 East Coast Music (O) 3 ch (3C)
(Cross-Listed: CCS 3793, MAAC 3793)
The relationship between music and East Coast identity is the focus of this course that covers a range of music styles, regional differences, and contemporary modes. The theme uniting the various case studies is the importance of music to the region’s culture(s). The subject also allows for a broader reflection on music’s importance to identity. Topics may range from Cape Breton fiddle, through to Halifax hip-hop.

MUS3794 Music and Cultural Identity (O) 3 ch (3C)
(Cross-Listed: CCS 3794)
This course will examine some of the ways in which cultural (national, regional, ethnic, class, etc.) identity is and has been expressed through music, as well as the origins, persistence, and dispersion of some of the resultant forms and genres. This will also permit us to interrogate the stability and/or fluidity of various notions of identity. Critical and theoretical readings will be employed to explore the identity of cultural groups and musical forms ranging from Tango to Blues, Opera to protest song, Flamenco to Hip Hop, from Hawaii to Russia, Canada to South Africa. The course will normally be team-taught; no previous musical background required. Open to students who have completed at least 30 ch of university courses or by permission of instructor.

MUS3795 A History of Music in the Twentieth Century 3 ch (3C) [W]
(Cross-Listed: HIST 3795)
An examination of the theoretical constructs behind Wagner's music dramas, the compositional histories of some of the dramas of the 1840's, and then of the Ring Cycle itself. Some attention will be given to the performance history of the dramas as well.

MUS3796 History of Music Dramas of Richard Wagner 3 ch (3C) [W]
(Cross-Listed: HIST 3796)
An introduction to the music dramas of Richard Wagner with an emphasis on the Ring Cycle itself. Some attention will be given to the performance history of the dramas as well.

MUS3797 Music of Canada (Cross-Listed: CCS 3797) 3 ch (3C)
(Cross-Listed: CCS 3797)
Introduction to Canada's rich and diverse traditions, institutions, and industry. From the musical traditions of the First Nations peoples, through the music of the early settlers, to today's diversity of styles, Canada's music will be studied in its cultural and historical contexts.

MUS3798 The Forbidden, the Rebellious and the Misunderstood: Canadian Jazz, Popular and Classical Music, 1950 to the Present (A) 3 ch (3C)
(Cross-Listed: CCS 3798)
This course explores the social and historical developments of music in Canada from the 1950s through the public awakening of the 1970s to the present with a focus on the period ending around 1980. Music will be examined in relation to such notable phenomena as the Cold War, Expo 67 and the Hippie Movement. Major musical figures, composers and performers featured and discussed may include, The Band, Oscar Peterson, Glenn Gould, Paul Anka, Buffy Saint-Marie, The Guess Who and Rush.

MUS3799 Women in Music (Cross-Listed: CCS 3799) 3 ch (3C)
Tracing the influences of women involved in music in a range of settings in the western world, this course presents the variety of ways that women have influenced, created and performed music through the ages. Feminist perspectives will be explored through an examination of the roles of selected individuals whether they were composers, performers or patrons. As such the course will include such individuals as Nannfer Mozart, Nadazhda von Meck, and Alma Mahler, as well as composers Clara Schumann, and Fanny Mendelssohn, who were performers in their own right.

NURSING

Nursing courses in the BN, BN ASP programs are not open to students unless they are enrolled in one of these programs. Exceptions to this are NURS 1324, NURS 3052, and NURS 3092.

NOTE: See beginning of Section H for abbreviations, course numbers and coding.
NURS1014 Introduction to the Canadian Health Care System 2 ch (2C)
Explores the structure of the Canadian healthcare system. Examines current service delivery issues as they influence nursing and the health of Canadians.

NURS1121 ASP Introduction to Nursing and Health 4 ch (4C)
Introduction to foundations of nursing as a profession including nursing roles, values, and practices. Explores concepts of wellness, health, and illness within the context of the profession of nursing, primary health care and the Canadian Health Care System.

NURS1131 ASP Helping Relationships 3 ch (2C 1L/T)
Explores the helping relationship within the context of nursing practice. Students will develop counseling skills. Includes required labs and/or tutorials. Prerequisite: NURS 1135 and NURS 1136.

NURS1135 ASP Enhancing Well-Being in Situations of Chronicity 4ch (4C)
Explores the experiences of people living with chronic physical and mental/psychiatric conditions and the impact on their capacity to achieve well-being. Examines nursing therapeutics to support and enhance well-being. Pre- or Co-requisites: NURS 1121 and NURS 1136.

NURS1136 ASP Practicum: Wellness and Chronicity 4 ch (4L)
Complements and supplements NURS 1135 and NURS 1142. Application of wellness concepts as they relate to clients living with chronic conditions. Involves health assessment and application of relevant nursing therapeutics and roles in the institutional setting. Pre- or Co-requisites: NURS 1121; NURS 1135 and NURS 1142.

NURS1142 ASP Health Assessment 4 ch (3C 1L)
Designed to establish the foundation required for health assessment. Expands the concept of health, health promotion and health lifestyle choices as they apply to health assessment, including health assessment techniques and data interpretive skills. The lab component focuses on the practical application of health assessment. Co-requisites: NURS 1135 and NURS 1136.

NURS1225 Health and Wellness 3 ch (3C)
Explores social, physical, emotional, and intellectual aspects of health, wellness and illness within the framework of primary health care. Prerequisite: NURS 1012.

NURS1235 Clinical Practicum: Nursing and Wellness 3 ch (3L)
Within various clinical settings, explores the concepts of wellness, health, and illness within the framework of primary health care. Pre- or Co-requisite: NURS 1225.

NURS1305 Introduction to Health Assessment 4ch (3C 1L)
Addresses physical and psychosocial assessment throughout the lifespan. Includes lab experiences. Prerequisite: NURS 1012.

NURS1306 Introduction to Helping Relationships 5ch (4C 1L)
Explores the helping relationship within the context of nursing practice. Students will develop counseling skills. Includes required labs and/or tutorials. Prerequisite: NURS 1012.

NURS1324 Indigenous Perspectives on Health and Wellness 3 ch
The focus of this course is to build an understanding of Indigenous health, community wellness and cultural safety, to promote equitable health care practice and policy. In this course, students will examine Indigenous models of health and healing, storytelling and tools for allyship.

NURS2063 Concentrated Clinical Practice I 3 ch (3L)
This integrative practice experience will further enhance development of abilities to assess, intervene and evaluate nursing practice while supporting clients and their families experiencing child-bearing, or those living with chronic health or mental health challenges. Pre-requisites: NURS 2155 and NURS 2187.

NURS2132 Pharmacotherapeutics 3 ch (3C)
Includes theory and principles of pharmacology as they apply to nursing. Provides requisite knowledge to administer medications, provide patient education, and assess potential for adverse events related to drug and lifestyle issues. Theory will include basic legal and safety issues related to drug administration by the nurse. Prerequisite: NURS 1235, BIOL 1782 or equivalent.

NURS2133 ASP Pharmacotherapeutics 3 ch (3C)
Includes theory and principles of pharmacology as they apply to nursing. Provides requisite knowledge to administer medications, provide patient education, and assess potential for adverse events related to drug and lifestyle issues. Theory includes basic legal and safety issues related to

SECTION H: FREDERICTON COURSES

NURS2135 Chronic Health Challenges 3 ch (3C)
Focuses on the impact/influences of long term health challenges on clients. Examines rehabilitative and supporting nursing practice. Prerequisite: NURS 1235.

NURS2145 Mental Health Challenges 3 ch (3C)
Explores the experiences of persons living with mental illness and examines related nursing therapeutics. Prerequisite: NURS 1235.

NURS2155 Clinical Practicum I 4 ch (4L)
In various clinical settings, students will be provided opportunities to assess, implement and evaluate care with young families, clients living with mental health challenges or chronic health issues. Pre- or Co-requisites: NURS 2135 or NURS 2177; NURS 2145.

NURS2171 ASP Young Families Health 3 ch (3C)
Explores the factors influencing the ability of young families to achieve health as they define it. Covers the processes involved in establishing and maintaining health of young families particularly as they undergo transitions such as childbearing. Prerequisite: NURS 1136. Co-requisites: NURS 2172 and NURS 2173.

NURS2172 ASP Clinical Practicum 5 ch (5L)
This clinical course has two foci: one with young families, the other with clients living with mental health challenges. In each component the students will have opportunities to explore, develop, and support behaviors, in partnership with clients. This course is designed to provide students, in partnership with clients, opportunities to explore family processes, and develop and implement strategies to support health behaviours of young families and clients living with mental health challenges. Prerequisite: NURS 1136; Co-requisites: NURS 2171 and NURS 2173.

NURS2173 ASP Pediatric Community Clinical Practicum 2 ch (2L)
This integrative practice experience will provide students an opportunity to apply concepts of growth and development, family centered care, health promotion, and communication with children, adolescents, and their families (the client). Co-requisites: NURS 2171 and NURS 2172.

NURS2177 Young Families’ Health 3 ch (3C)
Focuses on promoting the health of childbearing families. Encompasses the childbearing experience. Co-requisite: NURS 2155 or NURS 2187.

NURS2187 Clinical Practicum II 3 ch (3L)
In institution and community settings, students will develop and implement strategies to explore, develop, and support positive health behaviours of young families, individuals living with mental health challenges, or chronic health issues. Pre- or Co-requisites: NURS 2135 or NURS 2177; NURS 2145.

NURS3031 Helping Relationships 3 ch (2C 1L/T)
Explores the helping relationship within the context of nursing practice. Students will develop more advanced counseling skills. The use of labs and/or tutorials may vary with the teaching sites. Co-requisite: NURS 3073 or NURS 3074 or with permission of instructor.

NURS3053 The Canadian Health Care System 2 ch (2C)
Explores the structure of the Canadian healthcare system. Examines current service delivery issues as they influence nursing and the health of Canadians.

NURS3065 Community and Population Health Nursing 4 ch (4C)
Focuses on the role of the nurse in the community and public health nursing, using the population health framework. Addresses principles of community assessment and development, program planning, and other strategies that are supported through a population health perspective, with particular emphasis on populations, and social, political and economic determinants of health. Prerequisite: NURS 2063 or (NURS 2172 and NURS 2173). Co-requisites: NURS 3066 or NURS 3068.

NURS3068 Clinical Practicum: Community and Population Health Nursing 5 ch (5L)
Using a population health focus students will apply principles of community assessment, planning and development when working in community settings with diverse populations. Prerequisite: NURS 2063. Co-requisite: NURS 3065.

NURS3072 Acute Health Challenges 3 ch (3C)
Examines the client’s experience of acute health challenges, with the focus on nursing therapeutics. Prerequisites: NURS 3065 and NURS 3066 or NURS 3068. Co-requisites: NURS 3073 and NURS 3074.
SECTION H: FREDERICTON COURSES

NURS3073 Clinical Practicum: Acute Health Challenges 5 ch (5L)
In this clinical practice experience, students will have the opportunity to care for clients and families in acute care environments. Pre-requisite: NURS 3072.

NURS3074 Clinical Practicum: Acute Health Challenges 4 CH (4L)
In this clinical practice experience, students will have the opportunity to care for clients and families in acute care environments. Pre-requisite: NURS 3072.

NURS3082 Theoretical Foundations of Nursing 3 ch (3C)
Explores the theoretical foundations of nursing practice and research, including clinical analysis of theories and concepts related to nursing. Prerequisites: Completion of first year or permission of the instructor.

NURS3092 Nursing Research 3 ch (3C)
Critically examines the purpose, processes, and utilization of nursing research. Explores the interaction between theory and evidence-informed practice. Prerequisites: STAT 2263 or equivalent, completion of second year.

NURS3103 Concentrated Clinical Practice II 3 ch (3L)
An integrative practice experience with clients and families in the acute care setting. Prerequisite: NURS 3074.

NURS4113 Families within Populations 3 ch (3C)
Explores the experiences of families living with complex health challenges from a population health perspective. Focuses on nursing therapeutic strategies with further development of independent clinical judgement and decision making appropriate to primary health care. Prerequisite: NURS 3073 (or NURS 3103). Co-requisites: NURS 4121 and NURS 4123, 4124 or 4125.

NURS4121 Nursing in Complex Situations 3 ch (3C)
Explores the client’s experience of complex health challenges. Examines related nursing therapeutic strategies with an emphasis on clinical judgment and decision making appropriate to primary health care. Prerequisite: NURS 3073 (or NURS 3103). Co-requisites: NURS 4113 and NURS 4123, NURS 4124 or NURS 4125.

NURS4124 ASP Clinical Practicum: Nursing Families in Complex Situations 6 ch (6L)
This course is designed to provide students with the opportunity to care for families who have at least one member experiencing an acute or chronic illness. Students will be expected to care for families in multiple settings, including their home and hospital. Students will integrate and apply the theory examined in NURS 4113 and NURS 4121 in this practice setting. Pre-requisites: NURS 4113 and NURS 4121.

NURS4125 Clinical Practicum: Nursing Families in Complex Situations 5 ch (5L)
This course is designed to provide students with the opportunity to care for families who have at least one member experiencing an acute or chronic illness, as well as consideration of the health of populations. Students will be expected to care for families in multiple settings, including their home and hospital. Students will integrate and apply the theory examined in NURS 4113 and NURS 4121 in this practice setting. Pre-requisites: NURS 4113 and NURS 4121.

NURS4153 Preceptorship 12 ch (12L)
A preceptorship clinical experience developed in collaboration with the student. Prerequisite: NURS 4125 (or NURS 4124). Co-requisite: NURS4185.

NURS4185 Integrated Nursing Care 2 ch (2C)
Further explores the experiences of a population living with complex health challenges from a population health perspective. Focuses on nursing therapeutic strategies with further development of independent clinical judgement and decision making appropriate to primary health care. Prerequisite: NURS 4123. Co-requisite: NURS 4175

NURS4185 Trends and Leadership in Nursing 3 ch (3C)
Explores trends in the Nursing Profession. Examines organizational theory and leadership roles of nurses. Explores the foundations of professional development and practice. Prerequisite: NURS 4124 or NURS 4125. Co-requisite: NURS 4153

NURS4234 Independent Study 3 ch (3C/L)
An independent study program under the guidance of a faculty member is pursued on the basis of student interest in any area of nursing. Faculty approval required.

NURS4242 Nursing Theory for Exchange Students 3 ch (3C)
The content of the course will be determined by the needs of the visiting student. Nursing students who come on exchange have special needs for theory. This course will provide an avenue for these needs to be covered within a single course.

NURS4252 Clinical Nursing Experience for Exchange Students 3 ch (3L)
The content of this course will be determined by the needs of the visiting student. However, it will be developed around a clinical experience in the hospital or community. Nursing students who come on exchange have special needs for clinical experiences. This course will provide an avenue for these needs to be covered with a single course.

PHILOSOPHY
See beginning of Section H for abbreviations, course numbers and coding.

PHIL1101 Critical Thinking 3 ch (3C) [W]
Improves the ability to analyse and evaluate arguments and assertions met in everyday life, and hence sharpens skills of reasoning to sound conclusions from available evidence. Does this by studying the classic fallacies that people often commit and using elementary formal logic to explore differences between deductive and inductive reasoning.

PHIL1201 Ethics of Life and Death 3 ch (3C) [W]
Introduces various ethical theories and examines moral problems including abortion, euthanasia and capital punishment.

PHIL1202 Tyranny, Violence, and Liberty 3 ch (3W)
This course examines the nature of tyranny as it has developed in Western Culture, and how rational minds have responded to its influence on wester society. Texts such as The Apology, The Prince, The Social Contract, Civil Disobedience, Letter from Birmingham Jail, After Ten Years as a selection of readings produced by the White Rose group will be examined.

PHIL1301 Introduction to the History of Philosophy I 3 ch (3C) [W]
This course offers a general survey of philosophy from the Pre-Socratics to Scholasticism. It will concentrate upon issues central to ancient and medieval philosophy through a look at such figures as Parmenides, Plato, Augustine and Aquinas.

PHIL1302 Introduction to the History of Philosophy II 3 ch (3C) [W]
This course offers a general survey of philosophy from Rationalism to German Idealism. It will concentrate upon the concerns of modern philosophy by looking at the philosophies of such figures as Descartes, Hume, Kant, Hegel and Marx. Designed to bridge the gap for upper year students.

PHIL1401 God, Mind and Freedom 3 ch (3C) [W]
This course provides an introduction to three important, interconnected issues in metaphysics. Questions concerning the definition and existence of free will, the nature of the mind and its relation to the brain, as well as whether or not there are good reasons to believe in God, will be explored.

PHIL1501 Monsters and Philosophy 3 ch [C] [O]
As a category, Monsters challenge our understanding of the normal, the natural, the intelligible and the ethical. In so doing, the study of monsters provides an opportunity to explore the perennial questions of philosophy in a new and interesting way. This course will use monsters as a tool to explore aspects of the three main branches of philosophy: metaphysics, ethics and epistemology. Some of the topics to be discussed will include human nature, the conditions of knowledge, the mind-body problem, artificial intelligence, ethical dilemmas and theories, the metaphysics of identity, and good and evil.

PHIL2201 Introduction to Ethics 3 ch [W]
This course investigates core problems and key authors in ethical theory. The main focus of the course is to treat the rival theories of eudaemonism, deontology and utilitarianism as they are expressed both in contemporary ethical literature and in their historical context by Aristotle, Immanuel Kant, and John Stuart Mill. We also give some attention to those figures that have influenced their development, such as Plato, Niccolò Machiavelli, Thomas Hobbes, Jeremy Bentham and Jean-Jacques Rousseau. In the last part of the course, we turn to another alternative—the work of Friedrich Nietzsche and his influential critique of much of the Western ethical tradition that preceded him.

PHIL2203 Ethical Issues in Business 3 ch (3C) [W]
An introduction to moral problems arising in business. The course is designed to introduce the student to ethical theory and its relevance for business decision making. Prerequisite: Students enrolled in the Faculty of Business Administration must have completed 30ch, including ECON 1013 and ECON 1023.
PHIL2206 Environmental Ethics 3 ch (3C) [W]
This course covers a range of thinking on a variety of issues concerning the environment. Specific issues addressed are: Do species other than human beings have value in themselves, or only because humans value them? Do non-organic entities possess value? What problems beset attempts to formulate an environmental ethic? Open to 2nd year students and above.

NOTE: Students cannot receive credit for both PHIL 2206 and PHIL 3206.

PHIL2207 "Online Only" Ethics For Engineers (O) 3C [W]
The course is directed at individuals who are currently qualified engineers, or to those who have permission of the instructor. It provides a problem-centred approach to engineering ethics, as well as the conceptual and theoretical tools basic to developing the skills for recognizing and addressing ethical issues in the engineering field. Topics include: engineering as a profession, design safety and risk, accidents, confidentiality, conflicts of interest, intellectual property, professional conscience, whistle-blowing, engineering and the environment, computer ethics, and the ethics of engineering research. These concerns are developed in part through analysis of wide ranging, real-life scenarios. PHIL 2207 cannot be used for any credit in the Faculty of Engineering at the University of New Brunswick.

PHIL2208 Military Ethics (O) 3 ch [W]
This course examines the questions in military ethics from a philosophical perspective. Is it possible to pursue peace through war? What, if anything, justifies killing? How can post-war activities of victors secure or precarious peace? Do nations have an obligation to defend foreign populations threatened by “crimes against humanity”? Do ordinary ethical imperatives apply to combatants who are not aligned with traditional nation-states? Are ambushes ethically permissible? How should ethics account for emerging technologies, like drone warfare? Is espionage ethically permissible? These questions will be considered in dialogue with classical and contemporary texts.

PHIL2209 Health Care Ethics in Canada 3 ch (3C) [W]
An examination of the ethical issues raised by problems in Bioethics, such as experimentation with human subjects, euthanasia, assisted suicide and cessation of medical treatment, patients’ rights, informed consent, and tissue transplantation. Open to 2nd year students and above. NOTE: Students cannot receive credit for both PHIL 2303 and PHIL 3203.

PHIL2251 Applied Professional Ethics 3 ch (3C) [W]
Administrators can be found in for-profit businesses, NGOs, schools and universities, hospitals, the armed forces, government, etc. The course strives to address two key questions: “What responsibilities do decision makers in organizations have to others?” and “Why do they have such responsibilities?” Analytical tools presented in the course to help answer these questions will include such approaches as Rawls’ “disguised justice,” Harsanyi’s utilitarianism, and Gauthier’s morals by agreement, among many others. Students will be expected to understand the justification for each of these tools, apply them to cases discussed in class, and ultimately be able to recommend and defend what actions administrators ought to take according to each method of analysis. In conjunction with the above analytical tools, the course will also introduce a variety of “thinking methods,” such as formal logic, thought experiments, and game theory, which underlie the tools. Prerequisite: 3ch in Philosophy, or permission of the instructor. NOTE: Students cannot receive credit for both PHIL 2251 and PHIL 3251.

PHIL2501 Philosophy and Film 3 ch [C] [O] [W]
Film is an incredible medium. Many issues in Philosophy can be explored and explained through the medium of film. This course will examine some philosophical problems occasioned by great films. Some of the topics to be discussed might include free will and determinism, the mind-body problem, just war theory, human nature, and/or ethical theories.

PHIL3101 Introduction to Symbolic Logic 3 ch (3C)
The techniques of natural deduction, including conditional proof, indirect proof and separation of cases. Emphasizes applications in sentence logic and in the logic of quantification up to the logic of relations. Prerequisites: PHIL 1101 or an equivalent with permission of the instructor.

PHIL3205 Contemporary Ethical Theory (O) 3 ch (3C)
This course provides a select treatment of some methodological and substantive problems in twentieth-century and more recent ethical theory. The topics range from the challenge of normativity (Moore, Gewirth, Searle, and Koorsgaard), intuitionism (Strawson, McMahon), and egoism (Sidgwick, Parfit) to recent versions of the consequentialist and non-consequentialist debate (Fry, Hooker, Narreson; Thomas Hill, Francis Kamm). We then situate contemporary virtue ethics (especially Nussbaum, Foot, Hurthousse) within the latter debate and consider related discussions of moral luck and situationism as well as their implications for some of these theories. We conclude by surveying some of the emerging literature in experimental philosophy and its contribution to ethical theory. Open to 2nd year students and above.

PHIL3301 Early Greek Philosophy (A) 3 ch (3C)
The period of philosophy beginning with Thales and culminating with Plato. Stresses the development of certain key themes and problems in this period and their influence on later philosophical thought. Half the course is devoted to examining philosophical thought prior to Plato; the other half focuses on Plato’s thought. Prerequisite: A course in Philosophy or permission of the instructor. Open to 2nd year students and above.

PHIL3302 Later Greek Philosophy (A) 3 ch (3C) [W]
Focuses on Aristotle and subsequent developments in Greek philosophy. Half the course examines different aspects of Aristotle’s thought, the other half considers post-Aristotelian schools of thought. Prerequisite: A course in Philosophy or permission of the instructor. Open to 2nd year students and above.

PHIL3303 Modern Philosophy I (A) 3 ch (3C)
Introduction to some of the philosophical issues of 17th-century philosophy, such as: philosophical method; the nature, scope and limits of knowledge; the nature of reality; the question of the nature and existence of God. Reference is made to selections from some of the important philosophers of the era—e.g., Descartes, Locke. Prerequisite: A course in Philosophy or permission of the instructor. Open to 2nd year students and above.

PHIL3304 Modern Philosophy II (A) 3 ch (3C) [W]
Introduction to some of the philosophical issues of 18th- and 19th-century philosophy, such as: philosophical method; the nature, scope and limits of knowledge; the nature of reality; the question of the nature and existence of God. Reference is made to selections from some of the important philosophers of the era—e.g., Leibnit, Hume. Prerequisite: A course in Philosophy or permission of the instructor. Open to 2nd year students and above.

PHIL3305 Capitalism vs. Communism 3 ch (3C) [W]
This course focuses primarily on the philosophical works of Adam Smith, a founder of capitalism, and Karl Marx, a founder of communism. The socio-political-economic structures they envisioned for society are defined, and the justificatory arguments they provide for their structures are examined. The philosophical foundations of anarchism, feudalism, Liberalism, libertarianism, mercantilism, and socialism may also be studied for comparison purposes, time permitting. Open to 2nd year students and above.

PHIL3306 Kierkegaard, Nietzsche, and the Roots of the Postmodern Tradition 3 ch (3C) [W]
Examines the major themes of existential philosophy developed in the nineteenth and twentieth centuries such as the self, existence, freedom, and relationships with others, and shows how this helped to form the basis of contemporary postmodernism. References are made to selections from the works of the postmodern philosophers (e.g., Kierkegaard, Nietzsche, Sartre, Simone West, Camus, Arendt, Heidegger), and to important postmodern thinkers (e.g., Derrida, Foucault).

PHIL3307 Husserl's Pure Phenomenology 3 ch (S) [W]
This course introduces students to the philosophical method of phenomenology. Developed by the German philosopher Edmund Husserl, the method of what he called “pure phenomenology” has determined the character of Continental Philosophy throughout the 20th century. Emerging as a radical break with the philosophy of the 19th century, Husserl’s thought provided the method that would determine the course of 20th century existential philosophy and serve as the point of departure for postmodernism. The course will be concerned with the main features of Husserl’s thought, particularly his theory of the intentional structure of consciousness, his critique of traditional epistemology, and the foundations and crises of the sciences, as well as his views on the “natural attitude,” the “irreality” of “the world,” and the “life-world.”

PHIL3308 Plato’s Republic (O) 3 ch [W]
This course provides an in-depth study of Plato’s most important and influential dialogue—his masterpiece on justice, the Republic. We shall cover all of its major philosophical problems through a close reading of the dialogue, also taking the role of the dramatic element of the dialogue for understanding those problems. Open to 2nd year students and above.

PHIL3311 Nietzsche on Socrates’ Death-Wish 3 ch [W]
Friedrich Nietzsche saw the beginning of western philosophy as the birth of a cultural death-wish glorified in the suicide of Socrates. This course looks at Nietzsche’s portrait of Socrates in order to access his perception of
ancient Greek philosophy, tragic poetry and culture. In so doing, the course will clarify Nietzsche’s attacks on Christianity and Modernity as sources of the nihilism he believed was promoting the death-wish of “Socrates.” The course will also give some consideration to Nietzsche’s confrontation with nihilism in terms of his conceptions of the Will to Power, the Ubermensch, the Revaluation of all Values, the Master Race, and Eternal Recurrence. Open to 2nd year students and above.

PHIL3312 Infinity: Emmanuel Levinas’ Encounter with the Other 3 ch [W]
This course will concentrate on the philosophy of Emmanuel Levinas (1906-1995). Initially influenced by Edmund Husserl and Martin Heidegger, Levinas’ philosophical path diverged in the direction of Ethics as a radical critique of the traditional view of human beings as “knowing” or “rational” subjects. This course will look at Levinas’ ethics both as a critique of traditional and contemporary theories of knowledge and existence, as well as a post-modern critique of western philosophy. These concerns are developed through Levinas’ descriptions of our encounter with the “Other” in terms of his investigations into the human face, desire, gift, language, the concern for justice, and God. Open to 2nd year students and above.

PHIL3313 Reason vs. Faith: The Philosophy of Kierkegaard 3 ch [W]
This course approaches Kierkegaard’s philosophy through his text Philosophical Fragments. Written by one of the foremost of continental philosophers, this text explores the possibility of something we rarely hear spoken of these days: the possibility of a relationship with absolute, eternal truth. This text will serve as a means to clarifying some of the central features of Kierkegaard’s thinking such as: the relationship between reason and faith, the status of the self as a rational identity, the significance of human life within history, the aesthetic, ethical and religious modes of existence, and indirect communication. Open to 2nd year students and above.

PHIL3315 Hannah Arendt and Simone de Beauvoir 3 ch [W]
This course examines Hannah Arendt’s Eichmann in Jerusalem: A Report on the Banality of Evil and Simone de Beauvoir’s The Ethics of Ambiguity. Through a close reading of these texts, the class will look at how both Arendt and de Beauvoir explore the politics of hate. Coming to their investigations via different European experiences of mechanized mass murder and the routine events of terror and evil during World War II, these philosophers attempt to speak not only to their own generation but to ours as well. Prerequisite: Open to students 2nd year and above. Prerequisite: Open to 2nd year students and above.

PHIL3317 Jean-Paul Sartre’s Philosophy of Freedom 3 ch [W]
The popular view of the “existentialist” owes much to Jean-Paul Sartre—the most well known philosopher of post WW II Europe. Having studied with Edmund Husserl, who exposed him to the method of “pure phenomenology,” Sartre would apply this method in his descriptions of human freedom as "dread," "bad-faith," "the look," and "desire," to mention just a few of the themes found in his philosophical texts, plays, and novels. The course will concentrate primarily on his Being and Nothingness, to explore how Sartre recognizes the intentional structure of human consciousness in relation to ourselves, our bodies, human relationships, atheism, and the world. Open to 2nd year students and above.

PHIL3331 Michel Foucault’s Discipline and Punish: The Birth of the Prison. (O) 3 ch [W]
This course concentrates on two central themes: the first is Foucault’s perception of the “genealogy” of the social sciences in relation to the practices of incarceration and punishment in mid-eighteenth century Europe. The second follows his perception of contemporary interpretations of self-identity as they have been generated by: the continued growth of penal institutions, the social sciences as disciplines of “subjectivity”, the distinction between formal and punishment, and subjective vs. objective surveillance. Open to 2nd year students and above.

PHIL3332 Philosophists and the Nazis (A) 3ch [W]
This course examines philosophical responses to tyranny during the Nazi period, considering anti-Nazi thinkers (such as Hannah Arendt, Winthrop Bell, Dietrich Bonhoeffer, Albert Camus, Dietrich von Hildebrand, Gustav Hübener, Edmund Husserl, Aurel Kolnai, Bertrand Russell, Jean-Paul Sartre, Edith Stein, the Rose Rose) and pro-Nazi philosophers (Martin Heidegger, Carl Schmitt). We will also consider classical political philosophical critiques of tyranny, and ask whether it is legitimate to blame 19th century German philosophy and other modern philosophical tendencies for inspiring Nazism.

PHIL3401 Introduction to the Philosophy of Kant 3ch 3S [W]
Immanuel Kant’s philosophy is influenced by David Hume and the Scientific Method. This course will examine these influences on his philosophy by reading one of Kant’s seminal texts. In the light of this reading he asks questions such as “Can we ever know first principles?”, “How can we know the world?”, “How can we understand such concepts such Time and Space?”, “Does God exist?” and “How can we moral beings?” will be explored. Open to students who have taken at least 6 credit hours on Philosophy or with permission of the Instructor.

PHIL3402 Introduction to the Philosophy of Hegel (O) 3ch [W]
The course is concerned with the structure of the Self in relation to Hegel’s Dialectic. Through a reading of one of Hegel’s major texts, students will come to understand his argument, his method and in particular his method of dialectic. The course will clarify why Hegel could have such a profound influence on philosophers as diverse as, for example, Marx, Freud, Weber, Kierkegaard, Lukacs, and Sarte. Prerequisite: 6 ch in Philosophy or permission of the instructor.

PHIL3404 Aquinas and Dante (O) 3 ch [C] [W]
Thomas Aquinas (1225-1274) wrote widely in the fields of metaphysics and ethics as well as in theology. Furthermore, Aquinas was a well-read philosopher who had an extensive knowledge of the Bible, the writings of the early Church Fathers, and other philosophers and theologians including thinkers from Ancient Greece, Judaism, and Islam. Aquinas’ writing are reflected in the poetry of Dante Alighieri (1265-1321), especially in the structure and events of his Divine Comedy. In this course, we will examine Dante’s poetry as an introduction to the thought of Aquinas and as a way of understanding some of his philosophical ideas.

PHIL3421 Philosophy of Mind 3 ch [W]
What is a human being? Are human beings simply material objects? Are they a combination of matter and soul? What is consciousness and how can it be explained? In this class students will be introduced to these questions and will explore various answers to these questions from the history of philosophy and from contemporary discussions. Students will engage the answers provided in class as a means of formulating their own understanding of the connection between mind and brain and mind and body. Open to 2nd year students and above.

PHIL3422 Philosophy of Science 3 ch [W]
Kuhn’s Structure of Scientific Revolutions, challenged traditional conceptions of science and scientific progress and precipitated much of contemporary discussions in philosophy of science. Focusing on the history of science, Kuhn argued that logical reconstructions of science were inadequate. His argument encouraged philosophers of science to construct relativistic accounts of science and scientific progress. Beginning with the Logical Positivists, this course will trace different accounts of science, with special attention to the debate between realist and anti-realist conceptions of science. Open to 2nd year students and above.

PHIL3431 Philosophy of Religion 3 ch [3C]
Explores some of the traditional issues associated with belief in God, including: the arguments for God’s existence, the problem of evil, the meaningfulness of religious language, and how the divine attributes are to be understood. Prerequisite: A course in Philosophy or permission of the instructor. Open to 2nd year students and above.

PHIL3434 Concept of Miracle (A) 3ch [W]
This course examines the philosophical issues associated with the concept of miracle. Questions of whether miracles need to be defined as violating the laws of nature, how the laws of nature should be conceptualized, and the possibility of testimonial evidence ever being sufficiently strong to justify belief in a miracle are examined through the reading of classic and contemporary texts. Prerequisite: A course in Philosophy or permission of the instructor. Open to 2nd year students and above.

PHIL3435 Science vs God? 3 ch [W]
This course examines the relationship between science and religious belief. Questions of whether design is a legitimate scientific concept, whether methodological naturalism is a prerequisite of scientific inquiry, and whether ‘God of the gaps’ arguments are ever legitimate will be examined, as will be various models of how God is conceived as working within nature. Prerequisite: Permission of the instructor.

PHIL3501 Contemporary Metaphysics 3 ch [3C] [W] [A]
This course is a seminar in contemporary analytic metaphysics. Topics to be discussed may include personal identity, identity over time, causation, free will, and ontology. Prerequisites: PHIL 1101, PHIL 1301, and PHIL 1302 or permission of instructor.

PHIL3801 Liberalism and its Critics (O) 3 ch [W]
This course provides a contemporary treatment of key themes in liberal political theory, especially the work of John Rawls. We will pay special attention to his conception of freedom (both its worth and extent), equality, as well as their compatibility and role in justice. The second half of the course considers some important communitarian critics of liberal political theory, including Alisdair MacIntyre, Michael Sandel and Charles Taylor. Open to 2nd year students and above.
PHIL4401 Introduction to the Philosophy of Kant 3ch 3S [W]
Immanuel Kant's philosophy is influenced by David Hume and the Scientific Method. This course will examine these influences on his philosophy by reading one Kant's major texts. In the light of this reading his answer to questions such as "Can we ever know first principles?"; "How can we know the world?"; How can we understand such concepts such Time and Space?"; "Does God exist?" and "How can we be moral beings?" will be explored. Open to students who have taken at least 6 credit hours on Philosophy or with permission of the instructor.

PHIL4402 Introduction to the Philosophy of Hegel (O) 3C [W]
The course is concerned with the structure of the Self in relation to Hegel’s Dialectic. Through a reading of one of Hegel’s major texts, students will come to understand his argument, his method, and in particular his method of dialectic. The course will clarify why Hegel could have such a profound influence on philosophers as diverse as, for example, Marx, Freud, Weber, Kierkegaard, Lukács, and Sartre. Prerequisite: 6 ch in Philosophy, or permission of the instructor.

PHIL4341 Direct Divine Agency and the World (A) 3 ch [W]
The concept of direct Divine action is inseparable from that of a personal God. Such a God does not simply hold creation in existence, but is actively involved in its history. Hence religious believers speak of divine agency not just in terms of "general providence," i.e., an overall teleological order of the universe in which God works indirectly via created secondary causes, but also in terms of "special providence," i.e. instances in which God works directly in creation to achieve particular purposes. Critics argue that there are strong philosophical reasons for thinking that "special providence" is impossible, improbable or improper. This course examines these charges and the responses made to them. Prerequisite: A previous Philosophy course or permission of the instructor.

PHIL4342 Evil: From Job to Leonard Cohen (O) 3 ch [W]
The subject of evil is both philosophically perplexing and experientially significant. This course will examine the subject of evil from a variety of perspectives and sources, including narrative, music, journal articles. Prerequisite: A course in Philosophy of permission of the instructor. Open to 2nd year students and above.

PHIL4436 Models of Divine Agency (O) 3 ch [W]
Various models of how God might be conceived to act in the physical universe are explored and evaluated. These include Nancey Murphy’s quantum indeterminacy model, John Polkinghorne’s chaos theory model, and Arthur Peacocke’s top down causality model. Prerequisite: A previous course in philosophy or permission of the instructor.

PHIL4601-9 Individual Studies in Philosophy (O) 3 ch (T) [W]
Courses of independent study of specified texts or topics in Philosophy under the supervision of a member of the Department. These courses will normally be given only between May and August inclusive and with the agreement of the supervisor. They require the approval of the Chair of the Department and the Dean of the student's Faculty, and are subject to the regulations for individual Studies published in the Intersession/Summer Session Calendar. Prerequisite: 30 ch, including at least 6 in Philosophy.

PHYSICS

Students should note that in the Science Faculty the minimum acceptable grade in a course which is required by a particular program or is used to meet a prerequisite, is a "C". Any student who fails to attain a "C" or better in such a course must repeat the course (at the next regular session) until a grade of "C" or better is attained. Students will not be eligible for graduation until such deficiencies are removed. The only exception will be granted for a single course with a D grade that is a normal part of the final year of that program, and is being taken for the first time in the final year.

NOTE: See beginning of Section H for abbreviations, course numbers and coding.

Not all courses are offered every year. Consult with the Department concerning availability of courses from year to year.

PHYS 1061, PHYS 1062, PHYS 1091, PHYS 1092 are prerequisites for second year physics courses. PHYS 1071 may count in place of PHYS 1061 and PHYS 1072 in place of PHYS 1062. NOTE: That credit can only be obtained for one of PHYS 1061 and PHYS 1091, PHYS 1071 and PHYS 1091 or PHYS 1081. However, for students wishing to transfer from engineering PHYS 1081 and EE 1813 may replace First Year Physics I (PHYS 1061, PHYS 1062, PHYS 1091, PHYS 1092) (or equivalently PHYS 1071, PHYS 1072, PHYS 1091, PHYS 092).

Courses with a 5 for the first digit are advanced courses, which may be taken only with the permission of the instructor.

PHYS1061 Introductory Physics - I 3 ch (3C 1T) (Physical Science Interest)
This course is an introduction to the branch of physics called mechanics. Mechanics is the study both of how objects move and why they move the way they do. Describing the motion of objects requires understanding the basic kinematics quantities position, displacement, velocity and acceleration, as well as the connection between them. Understanding the causes of motion can be achieved by considering the forces acting on the object and/or by focusing on the conserved properties of the system (momentum, energy, angular momentum). Mechanics applies to a wide range of phenomena, essentially to anything that moves, but this course will highlight ties to and applications in the physical sciences. Co-requisite: MATH 1003 or MATH 1053. Credit can be obtained in only one of PHYS 1061, PHYS 1071 or PHYS 1081.

PHYS1062 Introductory Physics - II (Physical Science Interest)
This course introduces the students to wave phenomena and to electricity and magnetism. Throughout, the concepts related to motion learned in the previous course are used to describe and explain new phenomena. The study of waves introduces the student to propagating, periodic disturbances. In addition to their importance in mechanical phenomena (e.g. seismic waves), waves form the basis of both optics and acoustics. The study of electricity and magnetism introduces the student to the concept of charge and to the effects of charges on their surroundings (fields and forces). This course will highlight ties to and applications in the physical sciences. Co-requisites: PHYS 1061, PHYS 1071 or PHYS 1081, MATH 1003 or MATH 1053. It is recommended that students intending to take Physics courses beyond Introductory Physics should take MATH 1013 or MATH 1063 as a co-requisite to this course. NOTES: Credit can be obtained in only one of PHYS 1062 or PHYS 1072.

PHYS1071 Introductory Physics - I (Health & Life Science Interest)
This course is an introduction to the branch of physics called mechanics. Mechanics is the study both of how objects move and why they move the way they do. Describing the motion of objects requires understanding the basic kinematics quantities position, displacement, velocity and acceleration, as well as the connection between them. Understanding the causes of motion can be achieved by considering the forces acting on the object and/or by focusing on the conserved properties of the system (momentum, energy, angular momentum). Mechanics applies to a wide range of phenomena, essentially to anything that moves, but this course will highlight ties to and applications in the health and life sciences. Co-requisite: MATH 1003 or MATH 1053. NOTES: Credit can be obtained in only one of PHYS 1061, PHYS 1071 or PHYS 1081.

PHYS1072 Introductory Physics - II (Health & Life Science Interest)
This course introduces the students to wave phenomena and to electricity and magnetism. Throughout, the concepts related to motion learned in the previous course are used to describe and explain new phenomena. The study of waves introduces the student to propagating, periodic disturbances. In addition to their importance in mechanical phenomena (e.g. seismic waves), waves form the basis of both optics and acoustics. The study of electricity and magnetism introduces the student to the concept of charge and to the effects of charges on their surroundings (fields and forces). This course will highlight ties to and applications in the health and life sciences. Co-requisites: PHYS 1061 or PHYS 1071, MATH 1003 or MATH 1053. It is recommended that students intending to take Physics courses beyond Introductory Physics should take MATH 1013 or MATH 1063 as a co-requisites to this course. NOTES: Credit can be obtained in only one of PHYS 1062 or PHYS 1072.

PHYS1081 Foundations of Physics for Engineers 5 ch (3C 3L)
An introduction to the fundamentals of mechanics. Vector analysis and its application to the analysis of the motion of particles and rigid bodies. Newton's three laws of motion. The kinematics and dynamics of particle motion along straight and curved paths. Work, energy, impulse and momentum of particles and rigid bodies. An introduction to the rotation of a rigid body about a fixed axis, moments of inertia, angular momentum. Simple harmonic Motion (MATH 1003 or MATH 1053), (MATH 1503, or MATH 2213, or equivalent). NOTES: Credit can be obtained in only one of PHYS 1061 and PHYS 1091, PHYS 1071 and PHYS 1091 or PHYS 1091.

PHYS1091 Experiments in Introductory Physics - I 2 ch (3L) [W]
This course provides the student hands-on experience with concepts covered in PHYS 1061 or PHYS 1071. Co-requisite PHYS 1061 or PHYS 1071.
PHYS1092  Experiments in Introductory Physics - II 2 ch (3L) [W]
This course provides the student hands-on experience with concepts covered in PHYS 1062 or PHYS 1072. Prerequisite: PHYS 1091 or PHYS 1081. Co-requisite: PHYS 1062 or PHYS 1072.

PHYS1803  Physics and Society (O) 3 ch (3C) [W]
This course aims to investigate the two way interaction between society and physics. The ideas of physics have percolated into the collective consciousness both as scientific knowledge and as cultural points and various new technologies can be identified as originating in physics research. However, physics also has to deal with how it is perceived as a discipline and how physicists are perceived as trustworthy authorities. Open to students in all faculties. No mathematics beyond high school algebra and geometry is needed. Content: Introduction to the philosophy of science and the scientific method, introduction to the major scientific ideas that have shaped our society and the world.

PHYS2311  Mechanics I 4 ch (3C 1T)
Role within programme and connections to other courses. This course is an important - and big! - first step away from the tremendously simplified problems we have dealt with both in introductory university physics and in high school. We introduce the integration of greater mathematical sophistication in the treatment of physical situations, showing that comfort with a variety of mathematical techniques will allow us to study a greater range of - and more interesting - problems. Furthermore, this course serves to make us more familiar with the powerful Newtonian tool chest, which have been using since high school, allows us to approach complicated, realistic situations with confidence. The inclusion of special relativity challenges us to think beyond the familiar. Content: Special relativity (including elements relevant to the development of the theory), and Newtonian kinematics and dynamics (translational and rotational), conservation principles, oscillatory motion, mechanics in non-inertial reference frames. Prerequisites: MATH 1003 or MATH 1053 and MATH 1013 or MATH 1063 plus PHYS 1061, PHYS 1062, PHYS 1091, PHYS 1092 or equivalent. Co-requisite: MATH 2003 or equivalent.

PHYS2312  Mechanics II 3 ch (3C)
Role within programme and connections to other courses. This course introduces an entirely new approach to mechanics that is more compact and more powerful but less intuitive than the Newtonian approach to which we have been exposed thus far. This is the last compulsory mechanics course, and, therefore, includes the classical mechanics background for the quantum mechanics stream. Some computational exercises are included (e.g. the use of numerical differential equation solvers). Content: Calculus of variations, Lagrangian mechanics, two-body, central force problems (orbital motion), rotational motion of rigid bodies, coupled oscillators and normal modes, an introduction to Hamiltonian mechanics. Prerequisites: PHYS 2311, MATH 2003 or equivalent. Co-requisite: MATH 2013 or equivalent.

PHYS2327  Circuits & Elementary Electronics 5 ch (4CL)
Role within programme and connections to other courses. Understanding circuits and basic electronics is essential for any physicist who will develop or simply use measuring devices. This course moves beyond the simple DC circuits involving resistors and capacitors seen in introductory physics. It introduces the basic elements of the many electronic devices which we use every day, then shows how to combine these elements when designing simple circuits. This topic is particularly well-suited to hands-on learning. The course is experiential in design with more time devoted to manipulations than to lecture. Through the experimental work involved in learning about basic electronics, we are introduced to and become comfortable with essential measurement apparatus (multimeters, oscilloscopes, etc.). The understanding of basic electronics and measuring devices gained from the course is essential to enhance all future laboratory work: the equipment will not distract us from the physical phenomena which we are studying and we will understand how to best use the equipment and appreciate its limitations. This course also introduces some computational techniques for circuit analysis, e.g., in the solution of simultaneous equations. Content: AC circuits, operational amplifiers, diodes and other pertinent topics. Prerequisites: PHYS 1061, PHYS 1062, PHYS 1091, PHYS 1092 or equivalent, PHYS 2331. Co-requisite: MATH 2013 or equivalent.

PHYS2331  Research Skills 3 ch (3C) [W]
Role within programme and connections to other courses. This course helps us to acquire skills needed to do research. These include two different aspects: (1) how to deal with experimental limitations (2) how to read and write scientific documents. The skills acquired in this course are subsequently applied in other courses. In all future experimental work, we will treat experimental limitations properly and fully. In all future courses involving reports, written work will meet or exceed the standards established in the Research Skills course. The title of this course emphasizes the fact that the programme does more than fill us with physics facts. This is also an opportunity to review other skills, which are developed by the programme (problem solving strategies, approximation, presentation skills, etc.), and which we would generally apply in physics & beyond. Content: Uncertainty analysis, Data processing and analysis, Reading and understanding technical literature, Technical writing. Prerequisites: PHYS 1061, PHYS 1062, PHYS 1091, PHYS 1092 or equivalent, MATH 1003, MATH 1013 or equivalent. Co-requisite: MATH 2003 or equivalent.

PHYS2341  Thermal Physics 3 ch (3C)
This course includes some experimental work that supports the lecture material. Role within programme and connections to other courses. This course furnishes us with classical thermodynamics and a little about properties of materials. We have heard that "energy is conserved" and even have an appreciation of how important this principle is, but in first year mechanics energy is often apparently lost, and only non-mathematical considerations allow us to put this right. At last, we introduce a complete formulation for energy conservation, comparing the work defined in first year with heat as a means of energy transfer. We discuss transformations of energy in a variety of processes, then go on to explain that not all of the energy is available for doing mechanical work. The theoretical framework of classical thermodynamics is beautifully self-contained, but this course also emphasizes the link between the microscopic world of the kinetic theory (drawing on Newtonian mechanics as it does so) and the macroscopic world of the everyday, in preparation for the statistical thermodynamics to follow. Content: Gases (ideal and real) and pressure, phases and phase diagrams, the state of a system, what is energy?, heat and work, first, second and third laws of thermodynamics, entropy, enthalpy and free energies, heat engines, refrigerators, heat pumps and efficiency, phase transitions, introduction to kinetic theory. Prerequisites: PHYS 1061, PHYS 1062, PHYS 1091, PHYS 1092 or equivalent, MATH 1003, MATH 1013 or equivalent. Co-requisite: MATH 2003 or equivalent.

PHYS2351  Quantum Physics 3 ch (3C)
This course includes some experimental work that supports the lecture material. Role within programme and connections to other courses. This course lays the necessary foundations for talking about phenomena on very small spatial scales. This course calls on many concepts learned in introductory physics: position, momentum, energy, angular momentum, vibrations, waves. It casts many of them in a new light, at times requiring modification of the classical definition of these quantities. Quantum Physics serves as the foundation for the more in-depth learning of the tools of quantum mechanics presented in the Quantum Mechanics trio of courses and the courses which follow from these. In addition, Quantum Physics is essential background for the study of astrophysics and atmospheric physics. Content: Particle properties of waves: blackbody radiation, photoelectric effect, Compton effect; wave properties of particles: de Broglie waves, Davission-Germer experiment, the uncertainty principle; old atomic theory: atomic spectra, Rutherford's model, Bohr's model,/spontaneous and stimulated transitions, lasers; quantum mechanics: the Schrodinger equation, mathematical tools; quantum mechanical examples: square wells and barriers, quantum tunnelling and its applications; quantum theory of atoms. Prerequisites: PHYS 1061, PHYS 1062, PHYS 1091, PHYS 1092 or equivalent, MATH 1003, MATH 1013 or equivalent. Co-requisite: MATH 2003 or equivalent.

PHYS2372  Waves 3 ch (3C)
This course includes some experimental work that supports the lecture material. Role within programme and connections to other courses. Oscillations and waves are key elements to understanding many subfields and applications of physics. Acoustics, optics and electromagnetism (telecommunications) are obvious examples, but waves are also essential to understanding quantum mechanics (the Schrödinger formalism), some atmospheric phenomena, seismic phenomena and fluid mechanics. Content: Waves, applications to optics and acoustics. Prerequisites: PHYS 2331, MATH 2003 or equivalent. Co-requisite: MATH 2013 or equivalent.

PHYS2603  Work Term Report I 1 CR
A written report on the scientific activities of the work term. A component of the grade will be the employer's evaluation of the student. (Student's must have a GPA of 2.7 or better for PHYS COOP placement.)

PHYS2703  Physics Outreach & Education (O) 3 ch (3C) [W]
Role within programme and connections to other courses. This course is meant to help us develop the skills needed to communicate with non-specialists concerning physics. Given that most physics research is ultimately paid for by the public, it behooves physicists to communicate effectively with those who are funding their work, for the benefit of both parties. The goal of such communication is two-fold: (1) to ensure that the general public is physics literate and therefore able to enter into a discourse about the science, and (2) to insure that the next generation of university students is exposed to physics in such a way that they can make an informed choice about whether or not their academic and career paths
should include physics. Content. Topics may include: science journalism, science museums and exhibits, outreach to schools and other groups, physics education and physics education research. Prerequisites: PHYS 1061, PHYS 1062, PHYS 1091, PHYS 1092 or equivalent and one year of university physics.

PHYS2902 Environmental Physics (O) 3 ch (3C) Role within programme and connections to other courses. With the population of the planet increasing and the natural resources decreasing, it is more important than ever to understand the manner in which those resources can and are being used as well as the environmental impacts of those uses. In addition, part of understanding those impacts is understanding how measurements of impacts are made. By focussing on applications of physics to environmental matters, this course contributes to the synthesis of concepts and models learned in other courses. Content. The course will focus on the development of critical thinking skills. This course provides an understanding of the natural environment and conservation of natural resources. It will contribute to the development of critical thinking and the ability to evaluate scientific data. The course will also provide an understanding of the role of science in society. Prerequisites: PHYS 1061, PHYS 1071 or PHYS 1081.

PHYS3322 Electromagnetism I 3 ch (3C) Role within programme and connections to other courses. This course will be our first major foray into the formalism of electromagnetic theory. A thorough examination of the nature of vector fields and the forces they cause, and scalar fields along with their relationship to energy, will form a connection to earlier discussions started in Mechanics I. The tools studied previously in Intermediate Calculus (vector operations and calculus) and Methods of Theoretical Physics (particularly special functions like Legendre polynomials and spherical harmonics, delta functions, and tensor calculus) will play a significant role here. Content. Interactions between point charges, the nature and calculation of the electric and magnetic fields, the distribution of electric and magnetic fields in space (flux, Gauss’ law, Ampère’s law), reactions of charges and dipoles to applied fields, electrostatic scalar potential and magnetic vector potential, elementary gauge theory, energy storage in static electric and magnetic fields, elementary treatment of fields in materials, fields across boundaries, time dependence of electromagnetic fields, displacement current, the final form of Maxwell’s equations, electromagnetic waves. Prerequisites: PHYS 2311, PHYS 3331, MATH 2013 or equivalent.

PHYS3331 Methods of Theoretical Physics. 4 ch (3C 1T*) Role within programme and connections to other courses. In the course of an undergraduate physics programme we employ a variety of theoretical techniques. This course exposes us to theoretical ideas that are widely applicable in electromagnetism, quantum mechanics, classical mechanics and relativity. Special emphasis will be placed on demonstrating the general nature of the topics considered. Content. Non-orthogonal, non-normalised bases, tensors, special functions (general solutions to second order differential equations) and expansions in special functions, integral transforms (Fourier, z-transform, Laplace transform). Prerequisites: MATH 2213 or equivalent, approved second year physics.

PHYS3336 Experimental Physics I 3 ch (3L) Role within programme and connections to other courses. Various courses contain experiments that are directly related to the material addressed in the lectures, however, in the interest of promoting an understanding of connectivities (avoiding compartmentalisation) and refining research skills, this synthesis course will contain a variety of experiments, many of which integrate concepts learned in diverse courses. Content. The experiments include topics in mechanics, electromagnetism, quantum physics, thermal physics and optics. Prerequisite: PHYS 2331, PHYS 2327 or permission of the instructor.

PHYS3338 Independent Study 3 ch (3R) Role within programme and connections to other courses. Every physics honours student is required to complete one independent study course, to allow the development of critical reading and thinking skills. This course shall be taken no sooner than the beginning of his/her third year and no later than the penultimate term of his/her degree (i.e. the student must know a sufficient amount of physics to allow for a challenging independent study course, and the student should complete this course before working on his/her Advanced Research Project so that the skills developed during the independent study course are of use during the thesis project). Content. The student will choose among the list of topics for which supervision has been offered or can choose some other topic of interest if (s) he can convince a faculty member to supervise the course. Prerequisite: approved 2000-level or 3000-level courses.

PHYS3342 Statistical Physics 3 ch (3C) Role within programme and connections to other courses. This course builds from the bottom up (molecules → continuous phases) what Thermal Physics describes from the top down (macroscopic properties → kinetic theory). We reinforce the idea (from Quantum Physics and Quantum Mechanics I) that our macroscopic observations can be based on underlying probabilities, rather than strict determinism. Content. The ensemble basis for statistical mechanics. Statistical systems, the Laws of Thermodynamics (from a microscopic standpoint), classical and quantum statistical distributions, applications of Maxwell-Boltzmann statistics, kinetic theory of gases revisited, applications of quantum statistics. Prerequisite: PHYS 2341.

PHYS3351 Quantum Mechanics I 4 ch (3C 1T) Role within programme and connections to other courses. The need and qualities of quantum mechanics have been clearly established in Quantum Physics. This course begins to put quantum mechanics on a formal footing. The approach in QM I is expected to include both wave and matrix techniques. Content. Mathematical structure of quantum mechanics, Hilbert space, operator algebra; postulates of quantum mechanics, symmetries and conservation of energy, it’s fundamental applications of angular momentum, coupling of angular momenta, irreducible tensor operators, Wigner-Eckart theorem; analytical solution of the hydrogen atom; identical particles; spin and statistics, the Pauli exclusion principle and many electron atoms. Prerequisites: PHYS 2051, PHYS 2312, approved second year mathematics. Co-prerequisite: PHYS 3331.

PHYS3603 Work Term Report II CR A written report on the scientific activities of the work term. A component of the overall evaluation of the work term. Students must have a GPA of 2.7 or better for PHYS COOP placement.) Prerequisite: Work Term Report I in a field of science.

PHYS3752 Atomic and Molecular Physics (O) 3 ch (3C) Role within programme and connections to other courses. For an undergraduate student, atomic and molecular physics is one of the most fundamental applications of quantum mechanics in the curriculum. The course provides a firm grounding in quantum angular momentum theory, including spin and angular momentum coupling, and makes extensive use of the matrix approach to quantum physics calculations. The course is linked to all courses in the quantum mechanics stream, and to optics. Content. Quantum angular momentum concepts, including orbital angular momentum, spin, and angular momentum coupling, the hydrogen atom, including spin-orbit and hyperfine interactions, methods and approaches to multi-electron atoms, topics in molecular physics, including development of the Hamiltonian, the Born-Oppenheimer approximation, and the structure of molecular spectra. Usually offered on rotation with Subatomic Physics and Solid State Physics. Prerequisites: PHYS 3322, PHYS 3351.

PHYS3852 Subatomic Physics (O) 3 ch (3C) Role within programme and connections to other courses. The study of nuclear and particle physics draws mainly on quantum physics but, due to the semi-empirical nature of many of the nuclear models used, it also draws heavily on basic electromagnetism and other branches of physics. An understanding of nuclear physics is essential for work related to radiation therapy, in the nuclear energy sector, and in some branches of astrophysics. As for particle physics, as well as being a field in its own right, it has become inextricably linked to research in cosmology. Content. Some overlap of topics with environmental physics and medical physics is to be expected, but the approximate balance will depend greatly on the instructor’s discretion. The course will be at the instructor’s discretion allowing the course to focus sometimes more on applications of nuclear physics, sometimes more on particle physics, etc. Usually offered on rotation with Atomic & Molecular Physics and Solid State Physics. Prerequisite: PHYS 3351.

PHYS3883 Atmospheric Physics (A) 3 ch (3C) Role within programme and connections to other courses. Atmospheric events and processes have an impact on and are impacted by human activity, making atmospheric physics a topic of great societal relevance. The study of the atmosphere requires consideration of a wide range of spatial scales – from radiation transfer at the atomic level to phenomena on the global level – and a wide range of time scales – from seconds to centuries. Making headway requires an understanding of what processes can and cannot be ignored depending on the scales under consideration. In addition to providing an introduction to the field of atmospheric physics, this course contributes toward the overall goal of the physics programme by calling on us to combine knowledge from a variety of subfields of physics. Knowledge acquired in thermal physics, in mechanics and in quantum physics (blackbody radiation, spectral lines) must be brought together to develop an understanding of basic atmospheric physics. Content. Structure of the atmosphere, the global energy balance, atmospheric thermodynamics, physics of weather patterns, observational techniques and instrumentation. Usually alternates with Astrophysics. Prerequisites: PHYS 2312, PHYS 2341, PHYS 2351.

PHYS3882 Medical Physics (A) 3 ch (3C) Role within programme and connections to other courses. This course introduces our students to a field where there are many opportunities for
SECTION H: FREDERICTON COURSES

stimulating and satisfying careers. Medical physics is an application of physics to the particular — and particularly complex — system which is the human body. This course requires an introductory course in optics, quantum physics, nuclear physics, electromagnetism, mathematics, etc. Content: Radiation therapy, medical imaging. Usually alternates with Biophysics. Prerequisite: PHYS 2351.

PHYS3911 Mechanics III (O) 3 ch (3C)
Role within programme and connections to other courses. This third, elective mechanics course can afford to take a more philosophical approach to Hamiltonian mechanics, while Mechanics II will, of necessity, be more pragmatic. In addition, our tools can now be used in a variety of very sophisticated circumstances. Content: Topics might include Hamiltonian mechanics with greater reach, canonical transformations, Hamilton-Jacobi theory, action-angle variables, collision theory, non-linear mechanics and chaos, continuum mechanics (Lagrangian and Hamiltonian formulations, in contrast to the Continuum and Fluid Mechanics course). Prerequisite: PHYS 2312.

PHYS3912 Special Relativity (A) 3 ch (3L)
Role within programme and connections to other courses. The Special Theory of Relativity is one of the foundations of modern physics. It underlies our understanding of particle physics and gravitation. This course builds beyond the introduction begun in the Physics course Mechanics I. It is recommended for all physics and mathematics students who wish to pursue the study of particles, fields and gravitation. Content: The course provides an introduction to the physical principles (Lorentz invariance, constancy of the speed of light, equivalence, of mass and energy) and the mathematical underpinnings (Minkowski spacetime, tensors), of the theory of special relativity. This course is cross listed MATH 3463. Credit cannot be obtained for both MATH 3463 and PHYS 3912. Prerequisites: MATH 2003, PHYS 1062 or equivalent, or permission of the instructor. Corequisites: MATH 2013, PHYS 2311.

PHYS3952 Solid State Physics (O) 3 ch (3C)
Role within programme and connections to other courses. Solid state physics, also referred to as condensed matter physics, is the study of matter in which a large number of atoms (10^23 cm^-3) are bound together forming a dense solid aggregate. It is a fundamental field of physics that leads to such areas and topics as material science, nanotechnology, and superconductivity. In this course, the student will study the structure of solids and how this structure affects such things as their mechanical properties, their thermal properties, and their electronic properties. This course builds on concepts introduced in thermodynamics and statistical physics, as well as quantum mechanics, with links to electromagnetism (e.g. van der Waals forces). Content: Lattice structure and dynamics, electron kinetics and dynamics, applications (e.g. semiconductors, superconductors, magnetic resonance). Usually offered on rotation with Atomic & Molecular Physics and Subatomic Physics. Prerequisites: PHYS 3351, PHYS 3342.

PHYS3983 Astrophysics (A) 3 ch (3C)
Role within programme and connections to other courses. In addition to providing an introduction to the field of astrophysics, this course contributes toward the overall goal of the physics programme by calling on us to combine knowledge from a variety of subfields of physics. Knowledge acquired in introductory physics (conservation principles, forces, optics) and in quantum physics (blackbody radiation, spectral lines) must be brought together to develop an understanding of basic astrophysics. In addition, elements of statistical physics will be introduced as required. Content: Observational tools (telescopes and detectors), stars: properties, formation, and evolution, galaxies: structure and evolution, large-scale structure and cosmology. Usually alternates with Atmospheric Physics. Prerequisite: PHYS 2351 or permission of the instructor (some combinations of engineering courses may be suitable preparation for Astrophysics).

PHYS3993 Biophysics (A) 3 ch (3C)
Role within programme and connections to other courses. The study of biophysics offers a new perspective on physics through application to the biological sciences. It involves the integration of diverse concepts seen in introductory physics as well as elements of thermodynamics, quantum mechanics and fluid physics. It highlights the usefulness of physical thinking and a physicist’s perspective in the study of biological phenomena. Content: Biomechanics, the optics of vision, sound, hearing & echolocation, fluids in motion, the thermodynamics of life, physics at the cellular level, electricity and magnetism in biological systems. Usually alternates with Medical Physics. Prerequisites: PHYS 1061, PHYS 1062, PHYS 1091, PHYS 1092 or equivalent plus MATH 1003 or MATH 1053, MATH 1013 or MATH 1063, BIOL 1001, BIOL 1012.

PHYS4321 Electromagnetism II 4 ch (3C, 1T)
Role within programme and connections to other courses. This second course on the formalism of electricity and magnetism extends the material from Electromagnetism I, and adds mathematical rigor and sophistication to a toolbox of techniques for solving electromagnetic problems. This course requires a strong understanding of Methods of Theoretical Physics is made, including Fourier methods and spherical harmonics. At the culmination of this course, we will have been exposed to all of the core ideas in E/M theory except for relativistic effects. The latter and applications will follow in Electromagnetism III. Content: Fields in materials (D and H), polarization and magnetization vectors, polarizability and susceptibility tensors, types of magnetization, gauge theory, and its uses in solution of electromagnetic problems, conservation laws in electromagnetic theory, Poisson’s theorem, the Maxwell stress-energy tensor, the Lagrangian for a charged particle in an electromagnetic field, radiation from accelerated charges, retardation effects, generation and propagation of E/M waves, the breakdown of classical electromagnetism theory. Prerequisites: PHYS 2311, PHYS 3322, PHYS 3331.

PHYS4332 Computational Physics 3 ch (3C)
Role within programme and connections to other courses. This is a capstone course to demonstrate the use of numerical and simulation techniques in a range of situations taken from across the programme. For instance, numerical solutions to differential equations might be used to look at some examples of chaotic behaviour or Monte-Carlo simulations might be used to look at percolation problems. Computational techniques have great importance in the modern physical sciences to the extent that some have described it as of equal importance to experimental and theoretical physics (although computational physics may also be considered to have elements of both the two other branches of physics, of course). The skills acquired in this course can subsequently be applied in other advanced courses, in particular the Advanced Research Project. Content: Numerical techniques, modelling techniques. Prerequisites: Approval second year mathematics and third year physics, CS 3113 or equivalent.

PHYS4338 Advanced Research Project 8 ch [W]
All physics students are required to complete a research project, under the supervision of a member of the department. Honours students in an interdepartmental program with physics may choose to complete their honours project in physics. Non-honours students may complete a research project as an elective. The Advanced Research Project course includes a formal written report and an oral defense, both of which are assessed by committee. Prerequisites: PHYS 3336, PHYS 3338, permission of the department.

PHYS4351 Quantum Mechanics II 4 ch (3C, 1T)
Role within programme and connections to other courses. The second QM course is not required for the majors programme, but furnishes our honours students with a range of tools allowing them to move beyond hydrogen-like atoms and to explore the applications of quantum mechanics to many other branches of physics. Time independent perturbation theory, non-degenerate and degenerate cases, the Stark effect, fine structure, the Zeeman effect; the variational method, helium atom; the WKBJ method; time-dependent perturbation theory; Fermi’s golden rule; harmonic, potential and the adiabatic approximation, the Berry phase, a charged particle in EM field, gauge transformation, Landau levels, the Aharonov-Bohm effect; scattering theory: the Lippmann-Schwinger equation, optical theorem, partial wave expansion, phase shifts, effective range expansion, resonances, scattering between identical particles, Coulomb scattering. Prerequisite: PHYS 3351.

PHYS4371 Optics 3 ch (3C)
This course includes some experiments that support the lecture material. Role within programme and connections to other courses. Optics is both a field of research in its own right and a topic the tools of which are used by many other branches of physics. This course builds on the basic concepts of wave optics introduced in Waves. It also provides a brief introduction to some concepts of quantum mechanics, the quantum treatment of light. Contents: Advanced geometrical optics (e.g. the transition between geometrical and physical optics, the thick lens, Jones’ matrices), Fourier optics. Prerequisite: PHYS 2372, PHYS 3322.

PHYS4603 Work Term Report III CR
A written report on the scientific activities of the work term. A component of the grade will be the employer's evaluation of the student. (Students must have a GPA of 2.7 or better for PHYS COOP placement.) Prerequisite: Work Term Report II in a field of science.

PHYS4722 Signal & Image Processing (A) 3 ch (3C)
Role within programme and connections to other courses. Many physics career paths involve signal and image processing of some kind, e.g. seismic data processing, medical imaging, remote sensing (defense, forestry, mining), observational astrophysics, etc. As a result,
PHYS4823 Advanced Electronics (A) 3 ch (3C)
Role within programme and connections to other courses. The world of experimental physics is an electrifying blend of theory and hands-on measurements which relies heavily on a wide array of complex electronic devices. This course builds on Circuits & Elementary Electronics and introduces electronics and instrumentation we encounter through a physics career. The requirement to design and build electronic equipment, to integrate and control multiple components, and to efficiently operate complex instrumentation is fundamental to experimental physics. The goal of this course is to furnish the tools we need to meet these challenges. It includes topics in electronic design, interfacing and control, sensors and detectors, and data acquisition. Content: Multi-component design, amplifiers, filters, PCB design, integrated circuits, digital logic and programmable devices, radio frequency design, interfacing and control, transducers, detectors and receivers, solid state sensors. Usually alternates with Signal & Image Processing. Prerequisite: PHYS 2327.

PHYS4838 Research Project 4 ch [W]
A one-term research project, supervised by a member of the department, assessed on the basis of the research work carried out and a report. NOTE that no defense is involved (in contrast to the Advanced Research Project). Prerequisite: PHYS 3336.

PHYS4872 Plasma Physics (A) 3 ch (3C)
Role within programme and connections to other courses. Plasmas are sometimes referred to as the fourth state of matter. In a plasma, charge separation between electrons and ions gives rise to electric fields, and the movements of these charged particles result in currents and magnetic fields. Understanding the behaviour of plasmas involves mechanics, electromagnetism, and thermodynamics, and thus a plasma physics course contributes toward the overall goal of the physics programme by calling on us to combine knowledge from a variety of subfields of physics. Plasmas are found in many branches of physics (e.g., particle physics, condensed matter, astrophysics) and so the knowledge gained in this course will be of great value in many fields. Content: Single particle motion, trajectories and drift, plasmas as fluids (electron fluid and ion fluid, single fluid magnetohydrodynamics), waves in a fluid plasma. Usually alternates with Continuum & Fluid Mechanics. Prerequisites: PHYS 2341, PHYS 2372, PHYS 4321.

PHYS4922 Electromagnetism III 3 ch (3C)
Role within programme and connections to other courses. This course pursues high level extension and application of electromagnetic theory. It connects to and extends relativistic mechanics (started in Mechanics I), and illustrates ideas from atomic/molecular physics, plasma physics and other fields. Content: Magnetohydrodynamics, relativistic four-vectors and four-tensors, force and Minkowski force, covariant formulation of E/M fields, an E/M perspective on quantum field theory. Prerequisites: PHYS 4321, PHYS 335.

PHYS4933 Special Topics in Physics 3 ch (3C)
This “course” is included in order to allow for ad hoc courses that might be offered only once. For instance, a visiting professor may have some expertise that s/he could share with the Department, or the student body may request a course about a particular topic that intrigues them. Prerequisite: Permission of the department.

PHYS4982 Experimental Physics II (O) 3 ch (3L)
Role within programme and connections to other courses. Various courses will contain experiments that are directly related to the material addressed in the lectures. However, in the interest of promoting an understanding of connectivities (avoiding compartmentalisation) and refining research skills, this synthesis course will contain a variety of experiments, many of which integrate concepts learned in diverse courses. Content: The experiments will cover a wide variety of topics. Prerequisite: PHYS 3336

PHYS4983 Introduction to Quantum Field Theory 3 ch (3C)
Content: Relativistic quantum mechanics. The negative energy problem. Classical field theory, symmetries and Noether's theorem. Free field theory and Fock space quantization. The interacting Field LSZ reduction formula, Wick's theorem, Green's functions, and Feynman diagrams. Introduction to Quantum electrodynamics and renormalization. This course is cross-listed as MATH 4443. Credit cannot be obtained for both MATH 4443 and PHYS 4953. Prerequisites: MATH 3003, PHYS 3351, MATH 3463/PHYS 3912 and one of MATH 3043, MATH 3503, PHYS 2312, PHYS 3331, or permission of the instructor.

PHYS4972 Continuum & Fluid Mechanics (A) 3 ch (3C)
Role within programme and connections to other courses. The emphasis of this course will be on how we know what Newtonian mechanics is carried over into a continuum. This approach helps to emphasise that the tools and knowledge we have already developed can be used to great effect in new situations. In addition to the portability of physical concepts, we will also be able to see some generally useful mathematical tools in a new context (vector calculus in velocity fields being a key example). Content: Volume and surface forces, stress and strain, Hooke’s Law, equation of motion for an elastic solid, longitudinal and transverse waves in a solid, fluid properties, fluid motion. Usually alternates with Plasma Physics. Prerequisites: PHYS 2312, PHYS 3331.

PHYS4983 Introduction to General Relativity (A) 3 ch (3C)
Role within the programme and connections to other courses. Along with quantum theory, general relativity is one of the central pillars of modern theoretical physics with wide-ranging implications for astrophysics and high energy physics. The essential idea is that gravitation is a manifestation of the curvature of spacetime rather than a force in Newtonian sense. This course will provide students with a basic working understanding of general relativity and an introduction to important applications such as black holes and cosmology. Content: Review and geometric interpretation of special relativity; foundations of general relativity; linearized gravity and classical tests; black holes; cosmology. This course is cross-listed MATH 4483. Credit cannot be obtained for both MATH 4483 and PHYS 4983. Prerequisites: MATH 3463/PHYS 3912, MATH 4473 or permission of the instructor.

PHYS5992 Quantum Mechanics III (O) 4 ch (3C 17)
Role within programme and connections to other courses. This advanced quantum mechanics course introduces relativistic quantum mechanics and a variety of modern applications of quantum mechanics. Content: Relativistic quantum mechanics: the Klein-Gordon equation, Lorentz transformation, the Dirac equation, the Dirac solution of the hydrogen atom; quantum theory of radiation: radiation-matter interaction, decays, absorption, stimulated emission, scattering of photons by atoms, the Casimir effect; path integral formulation; quantum entanglement, the EPR paradox, dense coding, quantum teleportation, the Bell inequality. Prerequisite: PHYS 45.

PHYS5993 Magnetic Resonance Imaging (O) 3 ch (3C)
Role within programme and connections to other courses. This advanced course draws upon electromagnetism, quantum mechanics and statistical thermodynamics to provide a capstone topic tied to the department's research interests. Content: Principles of Magnetic Resonance Imaging, survey of imaging techniques, modern applications of MRI in medicine, biology and materials science. Prerequisite: Permission of the instructor.

POLITICAL SCIENCE
See beginning of Section H for abbreviations, course numbers and coding.

POL1103 North American Politics 3 ch (3C) [W]
Introduces students to the major issues and concepts involved in the study of political science through a comparison of politics in Canada, the United States, and Mexico. The course is built around an exploration of the links between the institutions and processes of government (executives, legislatures, courts and elections) and the political society of each country (its values, cultures, ideologies, and social conflicts).

POL1203 Political Issues that Divide Canadians 3 ch (3C) [W]
Examines contemporary and enduring issues within the context of the Canadian political system. Topics may include: Quebec and national unity, aboriginal self-government, cultural and regional diversity, class conflict, and electoral reform.

POL1303 Pivotal Political Events 3 ch (3C) [W]
Considers the political origins and long-term political impact, as well as the effect on the field of political science, of crises which have shaped the contemporary world, such as the Russian Revolution, the Holocaust, the dropping of the atomic bomb, the Cold War, the rise of the welfare state, the UN Declaration of Human Rights, and the fall of the Berlin Wall.

POL1403 Contemporary Political Ideas and Ideologies 3 ch (3C) [W]
Introduces students to the important political ideas and movements of the past century that shape present day society. Tracing the development and thinking about political life in the twentieth century, this course examines such diverse ideologies as: liberalism, social Darwinism, existentialism, feminism, ecologism, and post-modernism.

POL1503 Law, Power, and Politics 3 ch (3C) [W]
Introduces students to some of the main concepts of political science, including: constitutionalism, the rule of law, rights, citizenship, obligation,
authority, and legitimacy. Students will also study the concrete applications of these principles in specific circumstances by examining selected political problems, public policies, and legal procedures.

POL2103  Politics of Globalization  3 ch (3C) [W]
The term 'globalization' has quickly become one of the most popular, yet least understood, words in the contemporary political vocabulary. This course introduces students to the key issues involved in the study of globalization. Topics examined may include: militarization and warfare, the rise of the global neo-liberal order, the end of the Cold War, international ecological politics, transnational corporations, the condition of women in the global economy, changing relations between North and South, and the impact of globalization on the role of the nation-state.

POL2103  Issues in World Politics  3 ch (3C) [W]
This course investigates the most pressing issues in contemporary world politics with a particular focus on conflict and security challenges which have arisen since the end of the Cold War. Debates over war and terrorism, international law and human rights, and humanitarian intervention are considered, along with new challenges connected to economic development, population growth and environmental pressures.

POL2103  Politics of Climate Change (A)  3 ch (3C) [W]
This course surveys the politics of climate change in a global context. In the coming decades, climate change will drive politics at the international, national, and sub-national levels. Specific topics include climate change itself, international treaties to reduce greenhouse gas emissions, humanitarian crises and climate change refugees, climate change and the media, and climate change deniers.

POL2013  Introduction to Political Economy  3 ch (3C) [W]
This course surveys the basic themes of Political Economy analysis. Themes include the nature of capitalism, the work experience, class and class struggle, political organizations and parties, business associations and unions, corporations, poverty, inequality, environmental degradation, the role of the state, militarization, and imperialism.

POL2202  Canadian Politics  3 ch (3C) [W]
An introductory course in Canadian government and politics, dealing with the following topics: the constitution and civil liberties; federalism, with some focus on Quebec; the legislative, executive and judicial branches of government; political parties and interest groups; representation and electoral behaviour; nationalism in Canada. Students cannot hold credit for both POLS 2200 and POLS 2202.

POL2303  Politics of the Developing World  3 ch (3C) [W]
This course introduces students to key political issues facing developing countries using a comparative politics approach. Key themes include state formation; sovereignty, democracy and accountability; economic strategy; impact of globalization.

POL2503  Women and Politics  3 ch (3C) [W]
This course maps the rise of the Second Wave feminist movement in North America, examining women's engagement with politics on issues concerning citizenship, the economy, legal status, the division of public and private, and bodily autonomy.

POL2603  Comparative Politics of the Industrialized World (A)  3 ch (3C) [W]
This course introduces students to similarities and differences in the political culture, political institutions and public policies of countries in the industrialized world (Western Europe and North America primarily).

POL2703  Introduction to International Relations  3 ch (3C)
A general introduction to the theory and practice of international relations. Issues examined include: war, the global economy, international organizations, and the environment.

POL2811  European Imperialism, 1815-1914  3 ch (3C) (Cross-Listed: HIST 3011)
Examines the evolution of European imperialism in Africa and Asia from the end of the Napoleonic Wars to the outbreak of the First World War. Topics to be covered include: causes of the revival of imperialism; the French conquest of Algeria; British expansion in South Africa; the evolution of British rule in India, French rule in Indochina, and Dutch rule in Indonesia; the European powers and informal imperialism in China; the expansion of European control in Africa; theories and practices of colonial rule; the role of explorers and missionaries; race, gender, and class in colonial societies; the promotion of imperialism in popular culture; and resistance to imperialism.

POL2812  European Imperialism, 1914-1975  3 ch (3C) (Cross-Listed: HIST 3012)
Examines the evolution of European Imperialism after the outbreak of the First World War, and ends with a detailed examination of post-1945 decolonization. Topics to be covered include: the impact of the First World War on European empires; gender, race, and class relations in colonial societies; cultures of imperialism in the 1920s and 1930s; the evolution of imperial systems of control; the rise of anti-colonial nationalist movements; the impact of the Second World War; counter-insurgency and colonial wars after 1945; the causes and dynamics of decolonization; and the legacies of empire. Prerequisites: Prior completion of HIST 3011 an asset but not required.

POL2813  Rights in Conflict in North America  3 ch (3C) [W]
Investigates competing visions of rights in contemporary North American politics in historical, ethical and theoretical perspective.

POL2814  African American Politics (O)  3 ch (3C) [W]
This course surveys African-American history and politics from Reconstruction to Barack Obama. Specific topics include segregation, repression, civil rights, and the changing politics of race in America.

POL2815  American Politics (A)  3 ch (3C) [W]
Surveys the American political experience with a focus on the post-1945 period. Topics include the paranoid tradition in American politics, the New Deal consensus, the Cold War, the Civil Rights movement, the Second Wave feminist movement, the war against Vietnam, the rise of the New Right and post-9/11 American Foreign policy. Students cannot hold credit for both POLS 2101 and POLS 3105.

POL2821  Canadian Governance in the Global Era  3 ch (3C) [W]
Introduces students to the complex mechanisms through which governance has taken shape, with a particular emphasis on recent policy shifts.

POL2822  Topics in Provincial Public Administration  3 ch (3C) [W]
Focuses on the study of selected aspects of the structure and process of provincial public administration.

POL2823  Capitalism, Canada and Class  3 ch (3C) [W]
This course examines the shifting class structure of Canada from the standpoint of the evolution of global capitalism. Topics covered include the decline of the established worker, the growth of non-standard work, migrant labour, unemployment, the deregulation of labour law, the minimum wage debate, and the gendering of low-wage sphere.

POL2824  Issues in Canadian Public Policy (O)  3 ch (3C) [W]
Major issues in Canadian public policy-making and related approaches to policy analysis are examined from the perspective of political science. Topics will include health policy, economic policy, and cultural policy. Students cannot hold credit for both POLS 2203 and POLS 3215.

POL2825  Poverty, Governance, and Citizenship in Canada  3 ch (3C) [W]
This course explores the relationships between poverty policy, governmental forms, and conceptions of citizenship. Students will critically evaluate major documents from Confederation to contemporary policy debates. The central objective is to map out shifts, turning points, and transformations in governing practices and sensibilities.

POL2826  Empire and Resistance in New York City:  3 ch (3C) [W]
This course explores the dynamic relationship between New York City and the contradictions of the American Empire—NYC as the centre of global financial and industrial capital! Themes explored may include its status as the financial capital of the world, its place in the history of American capitalism, the city’s importance as a site of political science, the 9/11 tragedy and its far-reaching repercussions, New York’s continuing prestige as a destination for both tourists and immigrants, its illicit economy, its stark contrasts between wealth and poverty, the city’s artistic, ethnic, and cultural richness, and its role as home to the United Nations. To explore these themes, we will visit museums, art galleries, monuments, political organizations, media outlets, neighbourhoods, governmental organizations, and other related sites around the five boroughs. Normally taught on location.

POL2827  The Politics of Memory in Canada and the United States  3 ch (3C) [W]
What gets remembered and how it gets remembered are necessarily political. This course will examine specific aspects of the national memory in Canada and the United States from the late nineteenth-century through to the present. Topics will include the Native in the North American imagination, the commemoration of slavery, the commemoration of military
events (for example, the Great War in Canada, the Vietnam War in the United States), and history and the tourist gaze.

POL3241 Canadian Foreign Policy 3 ch (3C) [W]
An analysis of the foreign policy formulation process and a consideration of sectors other than the Canadian-American relationship.

POL3242 Canadian-American Relations 3 ch (3C) [W]
An analysis of the political aspects of sectoral relations between Canada and the United States. Restriction: Credit may not be obtained for both POLS 3242 and HIST 3364 (History of Canadian-American Relations).

POL3247 Trudeau’s Canada 3 ch (3C) [W]
This course will focus on Canadian and Quebec politics in the Trudeau era. Topics will include the Quiet Revolution, constitutional renewal, the 1980 referendum and the Charter of Rights and Freedoms. The course will also focus on the Charter era through an examination of key legal decisions. Finally, the course will examine Trudeau as a cultural icon in English Canada.

POL3251 Canadian Federalism 3 ch (3C) [W]
Considers theories of federalism, the development of the Canadian federal system, and the impact of current issues.

POL3257 Law and Politics in Canada 3 ch (3C) [W]
Analyzes the relationship between law and politics in Canada, with an emphasis on the impact of judicial decisions on Canadian politics. Topics covered include the Rule of Law in the Canadian Constitution, the judicial process, the Canadian Court system, judicial recruitment and selection, judicial independence, judicial review, and judicial decision-making.

POL3263 Canadian Provincial Politics 3 ch (3C) [W]
Designed to provide the student with an overall grasp of the nature of government and political processes in the Canadian provinces.

POL3267 Quebec Politics and Government 3 ch (3C) [W]
A survey of the political and social evolution of Quebec from the 17th century to the present day. Emphasis is placed on 20th century events and on the nationalist dimension of Quebec politics, particularly its modern incarnation in the period since 1960. Recommended prior course: POLS 2202.

POL3271 Community Culture in Canadian Politics 3 ch (3C) [W]
A consideration of the impact of cultural and regional differences on prospects for political unity and political change in Canada. Topics will include: English-French differences in political culture and their policy implications; Indian and Inuit culture and its relevance for the political process; the growth and political impact of regionalism and provincialism; the politics of Canadian multiculturalism in comparative perspective.

POL3282 The Canadian Political System 3 ch (3C) [W]
An analysis of the Canadian political system with emphasis on the constitution, federalism, parliamentary government, and the Canadian political culture.

POL3284 The Concentration of Power in Canadian Politics (A) 3 ch (3C) [W]
In recent years, there has been considerable focus on the role of Prime Minister in Canadian politics. Many believe power has become excessively concentrated in the hands of the Prime Minister and a handful of close advisors, with important implications for the democratic quality of our political system. This course examines the concentration of power in Canadian politics, looking at both theoretical and historical dimensions of the issue, as well as its manifestation in current political debates.

POL3292 Self-Government and Aboriginal Community 3 ch (3C) [W]
A systematic analysis of the principles, structures and institutions of traditional and contemporary Indian self-government in Canada.

POL3312 Political Sociology (Cross-Listed: SOCI 3312) 3 ch (3C)
Examines the relations between society and the state by comparing traditional political sociology with the contemporary approach. Issues include the nation state as the center of political activity, how power is exercised through institutions, social groups, class, the production of identity or subjectivity, how globalization and social movements de-center state political activity, the impact of these changes on citizenship and democracy.

POL3313 Political Psychology (A) 3 ch (3C) [W]
This course examines theories and perspectives from the field of psychology that provide insight into a wide range of political phenomena, including political participation, political communication, ethnic group relations, public policy design and foreign policy decision-making. Particular emphasis is placed on seminal thinkers and core ideas from the domains of cognitive psychology, social psychology and personality psychology that challenge the “rational actor” model often used in political science analysis.

POL3323 Cities in the ‘Urban Century’ 3 ch (3C) [W]
In the 21st century, half of the world’s population will be urban dwellers. The importance of enhancing our knowledge of cities has never been greater. This course will address cities within the context of globalization, economic change, state reform, citizenship, and social justice. While emphasis will be placed on Canadian examples, comparisons with other countries also will be made.

POL3367 Theories of Comparative Politics (A) 3 ch (3C) [W]
This course offers a survey of some of the major theoretical questions and perspectives in the field of comparative politics. Topics covered include the rise of the modern state, revolution, democratization, ethnic conflict, and economic development and underdevelopment. Particular attention is given to the use of the comparative method - focused comparisons of two or more states - to study variations in political development and shed light on theoretical debates.

POL3391 Governance 3 ch (3C)
Investigates shifts that are occurring in the rationales, strategies, and practices of governance, with a particular focus on contemporary transformations. Students will be introduced to traditional tools of public administration analysis as well as new analytical tools that have emerged at the turn of the 21st century. They will also be asked to explore how new governing mechanisms take shape through shifting discourses, programs, and techniques.

POL3392 Comparative Public Administration 3 ch (3C) [W]
A detailed study of contemporary public administration in selected countries in Europe and North America with the emphasis on a comparative study of selected issues and topics.

POL3410 Survey of Political Thought 6 ch (6C) [W]
A survey of the most important writers and the main currents of political thought from Ancient Greece to the beginning of the 20th century.

POL3413 Modern Theories of the State 3 ch (3C) [W]
Examines the emergence of the modern conception of the state, and discusses some of the important theoretical arguments concerning the scope and justification of the state.

POL3415 Liberalism (D) 3 ch (3C) [W]
The historical and textual foundations of the liberal tradition and its contemporary varieties. Central concepts and problems in the development of liberal thought to be examined will include: rights, property, liberty, tolerance, and political participation.

POL3418 Politics and Protest Music (A) 3 ch (3C) [W]
This course surveys political protest music. Themes covered may range from Mozart’s “The Magic Flute” to the ballads of Woody Guthrie through to anti-war songs over the last century.

POL3423 The Politics of Repression 3 ch (3C) [W]
Examines a variety of thinkers and movements that are concerned with the question of repression. Attempts to answer such questions as: what is repression and what causes it? Are some groups in society particularly repressed? What are the varieties of repression?

POL3433 Late Modern Political Thought 3 ch (3C) [W]
This course surveys recent political thinkers from the celebrated critic of modernity Friedrich Nietzsche to the post-modernist Jean-François Lyotard. It coheres thematically by focusing on their implicit and explicit responses to the three grand questions of the 20th century: What is wrong with modernity? What happened to the proletarian revolutions of Europe? How can the Holocaust be explained? Other thinkers examined include Lukács, Weber, Gramsci, Cassirer, Horkeimer, Arendt, de Beauvoir, Voegelin and Foucault.

POL3441 Women Political Thinkers 3 ch (3C) [W]
Examines women’s contributions to the history of Western ideas on politics, rationality, autonomy and the body, and violence and war. Key women thinkers include Mary Wollstonecraft, Virginia Woolf and Simone de Beauvoir.

POL3443 Feminist Issues in Political Thought 3 ch (3C)
Examines critical issues in feminist theory. Its central focus is on the understanding of women’s political and social roles found in the history of
SECTION H: FREDERICTON COURSES

**POLS3446**

Subjects, Citizens, Individuals: Politics of the Early Modern World (O)

3 ch (3C) [W]

Upheaval, change and disorder, a “world turned upside down”: these are all terms associated with political life in seventeenth-century England. How did political writers, from Thomas Hobbes and Margaret Cavendish, to the Levellers and John Locke, conceive of this flux, and what roles did they envision for subjects, citizens and individuals in the early modern world? In this lecture/seminar course, we will map the rise of modern liberalism, individualism, notions of property, the state and the body.

**POLS3447**

Gender, Race and Global Politics

3 ch (3C) [W]

This course takes an intersectional approach to investigating the global politics of gender and ‘race’. Questions considered will include: Why are there gendered, racialized inequalities in the global distribution of power and resources? How have gender and race issues been addressed - and ignored - in international relations theory and practice? How do international organizations, international law, and transnational social movements seek to address gender and inequalities, and how do these global activities shape loval lived experiences? How do gender and racialization (and their corollaries, sexism, racism and colonialism) influence our experiences of global phenomena such as migration, armed conflict, health/disease, and trade?

**POLS3461**

Public Policy Analysis

3 ch (3C) [W]

A critical examination of the institutions that form public policy, as well as the policy process in relation to a number of selected areas.

**POLS 3471**

When Bards are Brothed: Political Critique in Literature (O)

3ch (3C) [W]

Examines the nature of political critique found in literature. It surveys different literary genres and forms, including tragedy, comedy, satire, poetry, the essay, the short story, and the novel. Some of the authors discussed may include Aristophanes, Sophocles, Thomas More, Daniel Defoe, Jonathan Swift, and more recent writers such as Aldous Huxley, George Bernard Shaw, George Orwell, Virginia Woolf, and John Steinbeck.

**POLS3473**

Alternative Political Communities

3 ch (3C) [W]

Surveys the organization, political and social rationale, and critiques of alternative political communities, especially those that have responded to the alienating conditions of modernity by ‘dropping out’ of the mainstream world. Communities covered may include the utopian socialist, anarchist, and religious societies of the nineteenth century, the Israeli kibbutzim, European co-operative networks, alternative agricultural associations, and global counter-cultural movements down to the present.

**POLS3475**

The Political Left (A)

3 ch (3C) [W]

This course surveys the dominant currents on the political left after Marx and the International Workingmen’s Association. Lecture focus is on the 2nd International, the Comintern, the permutations of Trotskyism, Marxist humanism, the social democratic tradition and socialist realism, the New Left, eco-socialism, World Social Fora and the politics of Occupy.

**POLS3531**

Political and Policy Writing (A)

3 ch (3WS) [W]

This course familiarizes students with various writing styles relevant to the study and practice of politics with the goal of expanding and enhancing written communication skills. In addition to academic essay writing, styles and formats suited to public policy analysis, political advocacy and journalistic commentary are covered. Classes typically follow a workshop format emphasizing practical exercises, class discussion and peer feedback. Open to students from all disciplines.

**POLS3533**

Research Methods in Political Science

3 ch (3C) [W]

Intended to familiarize students with processes, methods and techniques of inquiry in political science. Required for all Honours students. Strongly recommended for Majors students.

**POLS3614**

Ethics and International Politics (O)

3 ch (3C) [W]

The course explores the importance of moral values, ethical reasoning, and reflection in international relations. It presents the concepts, theories, methods, and traditions of ethical analysis, and applies them to a wide range of transnational and global issues such as political reconciliation, human rights, war, foreign intervention, and economic sanction. It also examines the justice of international structures, institutions, and rules, as well as their impact on issues such as the moral obligation on the part of wealthy states to provide economic assistance to poor nations or to admit a large number of refugees, the challenge of climate change and energy conservation, and the prosecution of crimes against humanity. Normally taught online.

**POLS3615**

International Relations Theory (O)

3 ch (3C) [W]

Introduces students to the intellectual history of North America IR, through in-depth exploration of some of the most significant work of IR theory. Theories explained will include: realism; liberalism; constructivism; Marxism; feminism; post-colonial theory. Contemporary issues in IR (e.g. war, migration, the environment) are examined through these theoretical lenses.

**POLS3635**

The Critical Study of War (O)

3 ch (3C) [W]

Explores the nature of war in terms of the social relations of class, race, gender, ethnicity and sexual orientation. Particular focus is given to WWI, WWII, the Vietnam War, the Afghan War, the Iraqi Wars of 1991 and 2003, and the war on terror.

**POLS3637**

Capitalism and War (A)

3 ch (3C) [W]

This course examines the scholarly literature on the link between warfare and world capitalism over the last century. Themes raised may include the extent of US arms spending, Western military doctrines, the Cold War, regional warfare, humanitarian crises and UN intervention. Specific focus is given to the wars in Vietnam, Central America, the Horn of Africa, Iraq and Afghanistan. (Students cannot obtain credit for both POLS 3637 and POLS 4637.)

**POLS3643**

United Nations (A)

3 ch (3C) [W]

Examines international organizations and law in the contemporary period with a particular focus on the UN. Topics addressed include the direction and operation of UN reform, the role of international organizations in the global economy, human rights groups, the World Court, and the European Community.

**POLS3645**

Society, Politics, and War In 5th Century Greece

3 ch (3C) [W]

An examination of the socio-political aspects of the late archaic and early classical periods in Greece. Themes surveyed include endemic class struggles, the social dimension of 5th-century BCE tragedy and comedy, the open political conflicts between the forces of democracy and the forces of oligarchy, the rise of Athenian imperialism, and the general sway of cultural criticism. Specific topics will range from mythological representations of war on the temples and the politics of Pericles ambitious building program to the peace plays of Aristophanes or the devastating plague of Athens at the outset of the Peloponnesian War. This course will be taught only in the Travel Study program and is designed to take advantage of the various site visits.

**POLS3647**

Democratic Disengagement

3 ch (3C) [W]

Examines the sources of democratic discontent and declining political participation in Canada and other established democracies, along with potential remedies. Topics covered include civil society and social cohesion, the changing role of political parties and the merits of institutional changes such as electoral reform and direct democracy. Recommended prior course: POLS 2202 or POLS 2603.

**POLS3711**

Political Economy of Development in Africa

3 ch (3C) [W]

This course explores the political economy of development in sub-Saharan Africa, focusing on challenges in the last two decades and drawing on several case studies from the region to explore how they have unfolded in specific countries. The course emphasizes the role of states, corporations, and international institutions in the development process. It examines several recent challenges for the continent such as food, poverty reduction, agriculture and rural development, urbanization and informalization, and HIV/AIDS. Recommended prior course: POLS 2303, POLS 2703, or IDS 2001.

**POLS3712**

Globalization and Everyday Life (A)

3 ch (3C) [W]

The course examines the globalization of production, work and consumption as localized changes that affect people on a daily basis. The course explores their transnational links by utilizing one case study a year (such as clothing, toys, food products or footwear) and emphasizing North-South relationships. Recommended prior course: POLS 2303, POLS 2703 or IDS 2001.

**POLS3713**

The Global Economy: Production, Profit, Power and People

3 ch (3C) [W]

Surveys the primarily theoretical and empirical literature on the global political economy. Issues addressed include imperialism, dependency, U.S. hegemony, the internationalization of production, global finance, and the evolution of the Fordist production regime. Recommended prior course: POLS 2303, POLS 2703 or IDS 2001.

**POLS3714**

Imperialism and Crisis (A)

3 ch (3C) [W]

This course examines the analytical writings on capitalist imperialism down to the 2008 global crisis. Classical and contemporary writers surveyed may include Marx, Luxemburg, Hilleldef, Lenin, Baran, Amin, Wood, Harvey and Callinicos. Topics addressed will range from militarism and warfare
through to dependency, underdevelopment, cultural homogenisation, and 21st-century austerity.

POLS3715 Work in the World Economy (A) 3 ch (3C) [W]  
This course surveys the social relations of power in the workplace in the 21st century. Topics covered may include the global division of labour, workplace restructuring, the feminisation of work, global unemployment and underemployment, migrant labour, falling rates of unionisation, low-wage work, contract work, temp work, precarious labour, homework and employment in the informal sector.

POLS3717 The Politics of Nationalism 3 ch (3C) [W]  
A general examination of nationalism as an ideology and political force, with some focus on specific nationalist movements in both the developed and developing worlds. Topics include: competing definitions of nations and nationalism, the underlying causes of nationalist unrest and secessionism, and methods of conflict management in ethnically divided societies. Recommended prior course: POLS 2303 or POLS 2603.

POLS3718 International Security in Theory and Practice (A) 3 ch (3C) [W]  
Critically examines one of the most central and contested concepts in International Relations theory and practice: security. Questions considered include: what does it mean to be secure? What causes various forms of insecurity? How should we identify security threats: what 'counts' as an international security problem? What happens when issues are framed as security problems? The course examines theoretical approaches to security in IR including national, human, feminist, and critical security theories and considers contemporary challenges that have been identified as international security problems, including terrorism, health/disease, climate change and migration.

POLS3721 The Politics of Drinks: from Rum to Coffee to Bottled Water 3 ch (3C) [W]  
This course explores the politics of international development by investigating the historical development of international processes and markets for beverages such as coffee, tea, cola, juice, wine, rum and water. The course uses these case studies to ground theoretical analysis of development strategies, trade institutions, corporate practices, worker struggles and consumer initiatives.

POLS3725 The Political Economy of Latin American Society (O) 3 ch (3C) [W]  
Surveys the social and economic foundations of South and Central American politics. Specific issues examined include the relationship of the region to the global economy, state/military relations, state repression, U.S. regional hegemony, political reform and revolutionary movements.

POLS3900 Independent Study in Political Science 6 ch (6C)  
Upon application through the co-ordinator of honours and majors programs, students pursuing an honours or majors degree in Political Science may undertake independent studies with a member of the department. It is expected that students will have a clear idea of their intended area of study and will submit a written proposal justifying it as an independent studies course. No student will be allowed to take more than 6ch of independent study in completing the requirements for a majors or honours degree in political science. Independent studies courses will NOT count as meeting the honours thesis requirements.

POLS3903 Independent Study in Political Science 3 ch (3C)  
Upon application through the co-ordinator of honours and majors programs, students pursuing an honours or majors degree in Political Science may undertake independent studies with a member of the department. It is expected that students will have a clear idea of their intended area of study and will submit a written proposal justifying it as an independent studies course. No student will be allowed to take more than 6ch of independent study in completing the requirements for a majors or honours degree in political science. Independent studies courses will NOT count as meeting the honours thesis requirements.

POLS3905 Independent Study in Political Science 3 ch (3C)  
Upon application through the co-ordinator of honours and majors programs, students pursuing an honours or majors degree in Political Science may undertake independent studies with a member of the department. It is expected that students will have a clear idea of their intended area of study and will submit a written proposal justifying it as an independent studies course. No student will be allowed to take more than 6ch of independent study in completing the requirements for a majors or honours degree in political science. Independent studies courses will NOT count as meeting the honours thesis requirements.

SECTION H: FREDERICTON COURSES

POLS4000 Directed Reading and Research in Political Science 6 ch (6C) [W]  
A compulsory reading and research course for fourth year honours students. The student prepares a research program in consultation with a professor in the field concerned and is expected to present a research essay after regular consultations with the professor concerned who will be assigned to the student by the chair of the department.

POLS4416 Canadian Political Thought 3 ch (3S) [W]  
Historical and comparative examination of the various strands of thought that make up the Canadian political tradition: liberalism, conservatism, socialism and nationalism. (Students cannot earn credit for this course and POLS 3416).

POLS4483 Eros and Leadership: The Philosophy of the Good Ruler Through the Ages (A) 3 ch (3S) [W]  
This course surveys the intellectual and philosophical criteria for political leadership as they were established by past thinkers. Some of the intellectual material addressed may include the assessment of Pericles by the ancients, Plato's nations of philosophical rule, Aristotle's conception of class rule, Plutarch's biographies, Marcus Aurelius reflections, Machiavelli's counsels, Marx's critique of bourgeois rule, Lenin's conception of vanguardism, Weber's observations regarding charisma and Gramsci's defence of the organic intellectual. Throughout the course the standards set in the past are applied to current political leaders, and the concerns raised by contemporary intellectuals like Christopher Lasch and Neil Postman are broached and assessed. (Students cannot earn credit for this course and POLS 3463).

POLS4483 Hegel & Marx (A) 3 ch (3S) [W]  
Examines the theories of history and the historical process in Hegel and Marx, paying particular attention to the question of the causes of historical change. It then discusses these theories in their relation to Hegel's and Marx's political thought. (Students cannot earn credit for this course and POLS 3483.)

POLS4485 Gender and War: Historical and Contemporary Perspectives (O) 3 ch (3S) [W]  
Exploring a range of topics from women's experiences as soldiers to the social construction of masculinities to suit the war system, and drawing upon a range of sources, including historical writings by women on war, drama, poetry and fiction, as well as recent political theorizing and analysis, this course provides a gendered aspect of war under the microscope. Writers considered include Margaret Cavendish, Virginia Woolf, Sara Ruddick, Judith Butler, R.W. Connell and Michael Kimmel.

POLS4498 Thucydides: War and Empire (A) 3 ch (3S) [W]  
This course will examine The History of the Peloponnesian War as the founding text of International Relations. The course will also focus on the various readings of the History.

POLS4534 Quantitative Approaches in Political Science (A) 3 ch (3S) [W]  
This course provides a basic grounding in methods of quantitative commonly used in political science. In addition to statistical theory and techniques, the course also focuses on interpretation of quantitative political science literature and provides students with instruction in conducting statistical analysis using public opinion and election data sets. Recommended prior or concurrent course: POLS 3533. (Students cannot earn credit for this course and POLS 3534.)

POLS4703 Seminar in Contemporary Issues in World Politics (A) 3 ch (3S) [W]  
This course deals with current trends and developments on the international science including the global balance of power relations between the superpowers, ideological conflicts, the Third World and North-South tensions: war, revolution and coups d'etat as these occur. (Students cannot earn credit for this course and POLS 3703.)

POLS4713 The Future of Work (O) 3 ch (3S) [W]  
With a focus on Canada, this seminar investigates structural features of the contemporary global economy as they affect prospects for work, employment and income. Topics may include emerging and declining industries, employment security, as well as the impact of education, income support, migration and unpaid work. Students cannot work obtain credit for both SOCI 4325 and POLS 4713.

POLS4722 Women, Gender and Development (A) 3 ch (3S) [W]  
This course introduces students to critical issues in the study of women, gender and socio-economic development. The course presents contending theoretical approaches, and applies them through case studies that explore how women are affected by and in turn shape socio-economic development.
processes in Asia, Africa, Latin America and the Caribbean. (Students cannot earn credit for this course and POLS 3722).

POL54723 The Rise of the Far Right (O) 3ch (S) [W]
Recent years have witnessed the rise of various political parties and movements of the far right in both Europe and North America. This course will examine these organizations and the broader political environment in which they have emerged in order to better understand the causes and consequences of this troubling trend.

POL54724 Topics in Environmental History and Politics (O)
This course surveys topics in North American environmental politics and history, including climate change, resource development, and water management. It examines the role of governments, the environmental movement, and industry. Finally, it examines how the environment as an idea has changed over time.

POL54727 The Politics of Global Health 3 ch (3S) [W]
This course considers challenges in contemporary global health governance by examining the global response to a specific disease/health issue, focusing on how the global South is implicated in this governance and disease response. Questions will we explore include: how is health global? What is the relationship between the 'global' and the 'local' in global health governance? How effective are various global health strategies, programs and frameworks, and in what ways do they have uneven effects on different populations and regions? What are the power relations between actors including states, international and multilateral organizations, social movements, and the private sector, and how are structural and political drivers of health inequity? Recommended prior course: POLS 2303, POLS 2703, IDS 2001, IDS 2003 or permission of course instructor.

POL55345 Natural Resources, Industrialization and the Environment in Atlantic Canada (Cross-Listed: HIST 53445)
Explores the political, economic and environmental implications of the dependence on natural resources in Atlantic Canada, through an examination of the historical development of the forest, fishing, agricultural and mining industries from the eighteenth century to the post-Second World War Period.

PSYCHOLOGY

NOTE: See beginning of Section H for abbreviations, course numbers and coding. Students should consult the Timetable for the latest listing of courses to be offered in each term.

PSYC1013 Introduction to Psychology I 3 ch (3C)
A general survey of perspectives and methods in selected areas of psychology including perception, memory, cognitive and biological psychology. Students will be asked to participate in various learning and research activities. Some course credit may be earned by participation in these activities.

PSYC1023 Introduction to Psychology - II 3 ch (3C)
A general survey of perspectives and methods in selected areas of psychology including personality, developmental, clinical and social psychology. Students will be asked to participate in various learning and research activities. Some course credit may be earned by participation in these activities.

PSYC2103 Quantitative Research Methods 3 ch (3C) [W]
This course provides an introduction to experimental Psychology as an empirical science. Students learn about the steps involved in research, such as designing and conducting experiments. Basic applications of statistical methods are broached. Additionally, students learn how to report formally on their research projects. Students are involved in a research project as participants and as researchers. This course is required for students planning to Minor, Major or Honours in Psychology. Prerequisite: Introductory Psychology (6 ch). Please note that no more than three of PSYC 3033, PSYC 3043, PSYC 3053, PSYC 3063 and PSYC 3073 may be counted toward a Major or Honours In Psychology.

PSYC2113 Introduction to Statistical Methods in Psychology 3 ch (3C) [W]
An introduction to statistical analysis for psychologists. Topics include analysis techniques relevant to correlational, observational and experimental research designs; relevant statistical theory; and hypothesis testing. Required for students planning to Major or Honour in Psychology. Prerequisite: Introductory Psychology (6 ch) and PSYC 2103/PSYC 2123.

PSYC2203 Foundations of Developmental Psychology 3 ch (3C) [W]
Covers physical, cognitive, language, and social/emotional development from a variety of theoretical perspectives. The interrelatedness of these domains also will be discussed. Several themes which underlie the study of development (e.g., nature/nurture; continuity/discontinuity) will be reviewed and students will explore how these themes permeate developmental research. Prerequisite: Introductory Psychology (6 ch).

PSYC2311 Foundations of Clinical Psychology 3 ch (3C) [W]
An introduction to the main theories, research approaches, and intervention perspectives of clinical psychology. Topics dealt with include classification in clinical psychology, concepts and history of abnormality, assessment and diagnosis of psychological disorders, research perspectives in clinical psychology, and modes of psychotherapy. The course is intended to expose the student to the basic concepts, theories and issues in psychopathology and psychotherapy for more advanced courses in the clinical domain. Prerequisite: Introductory Psychology (6 ch).

PSYC2403 Foundations of Social Psychology 3 ch (3C) [W]
Examines individual personality and behaviour in relation to other individuals, society and culture. Topics include social perception, conformity and obedience, prejudice and discrimination, aggression and violence, etc. Prerequisite: Introductory Psychology (6ch).

PSYC2515 Foundations of Learning 3 ch (3C) [W]
Examines the psychological theories of learning, including cognitive, social and behavioural theories of learning. These are discussed in terms of their interrelatedness and the research supporting each. Topics include principles of conditioning, operant conditioning, associative learning. Prerequisite: Introductory Psychology (6ch). Students who have received credit for PSYC 2613 cannot receive credit for PSYC 2515.

PSYC2603 Foundations of Memory and Cognition 3 ch (3C)
An introduction to the fundamental principles of human memory, cognition and information processing in the laboratory and everyday world. Topics include basic cognitive processes, the representation and organization of knowledge, reasoning, problem solving, etc. Prerequisite: Introductory Psychology (6 ch).

PSYC2703 Foundations of Biological Psychology 3 ch (3C) [W]
An introduction to basic neurophysiology, neurochemistry and neurology for humans and other animals. The course will cover the methods used to discover the fundamental processes underlying neural function and provide basic knowledge for an understanding of how the nervous system is able to produce and control behaviour. Prerequisite: Introductory Psychology (6 ch).

PSYC3033 Health Psychology 3 ch (3C)
This course introduces students to the biopsychosocial approach to health and disease including prevention, development, course, and adaptation to illness. Students will develop an understanding of the mind/body connection, the influence of social and physical environments on our health, cognitive processing of health information, health belief models, and the relations between personality traits and health. Psychological approaches to the promotion of health and behaviour change will be examined. A personal health promotion program will be required. Prerequisite: Introductory Psychology (6 ch). Please note that no more than three of PSYC 3033, PSYC 3043, PSYC 3053, PSYC 3063 and PSYC 3073 may be counted toward a Major or Honours In Psychology.

PSYC3043 Human Sexuality 3 ch (3C) [W]
Provides a broad introduction to the psychology of human sexuality, including examination of such specific topics as sexual anatomy, sexual behaviour throughout the lifespan, sexual response, sexual dysfunction and therapy, sexual variation, and pregnancy and childbirth. Emphasis on placing empirical findings within physiological, personal, interpersonal and social frameworks. Prerequisite: Introductory Psychology (6 ch). Please note that no more than three of PSYC 3033, PSYC 3043, PSYC 3053, PSYC 3063 and PSYC 3073 may be counted toward a Major or Honours In Psychology.

PSYC3053 Personality 3 ch (3C) [W]
An introduction to classic and contemporary theoretical and scientific approaches to the study and assessment of personality, with a focus on developing an integrated understanding of human personality within its biological, social, historical and cultural contexts. Prerequisite: Introductory Psychology (6 ch). Please note that no more than three of PSYC 3033, PSYC 3043, PSYC 3053, PSYC 3063, and PSYC 3073 may be counted toward a Major or Honours In Psychology.

PSYC3083 Psychology and the Internet 3 ch (3C)
In this course we will examine the unique psychological features of cyberspace and how human behaviour is shaped in this new social realm. Topics related to human interaction, children and the Internet, sexuality on the Internet, computer-mediated communication, Internet addiction, and global consciousness, etc. will be covered. Prerequisite: Introductory

460
This course serves as an introduction to the field of performance psychology. The course provides an overview of the theoretical and empirical roots of contemporary performance psychology. Throughout the course, students will discuss how research informs practice and, where relevant, the possible difficulties in applying research findings in real-world settings. Emphasis is placed on how psychology is being applied to enhance the performance of a wide range of groups including athletes, musicians, CEOs, and educators. The course exposes students to the various psychological factors that threaten elite performance and the interventions that have been developed to mitigate against these factors. 

Pre-requisites: Introductory Psychology (6 ch). Please note that no more than three of PSYC 3033, PSYC 3043, PSYC 3053, PSYC 3063, and PSYC 3073 may be counted toward a Major or Honours In Psychology.

PSYC3113 Introduction to Statistical Inference in 3 ch (3C 1L) (LE) Experimental Psychology

Introduces experimental design and statistical inference in psychological research. Design decision-making and computational procedures up to analysis of variance are presented. Labs involve collection and analysis of psychological data. PSYC 3113 is required of Honours students in Psychology. Prerequisites: PSYC 2103/PSYC 2123 and PSYC 2113 or PSYC 2103/PSYC 2123 and PSYC 2903.

PSYC3123 Introduction to Measurement Theory 3 ch (2C 2L) (LE) Introduces traditional problems in the measurement of psychological concepts. Labs will involve the development and evaluation of student designed tests and measures. Prerequisites: PSYC 2103/PSYC 2123 and PSYC 2113.

PSYC3151 Basic Research Seminar I 3 ch (3S) (LE) [W] Involves active participation in several of the activities related to an empirical research project including planning and development of research, conducting a study, and collection and analysis of data. Students will be required to prepare a formal research paper. The actual program will be determined by the student and a faculty supervisor. Normally restricted to students in their third year whose academic performance would allow them to enter the Honours program during their fourth year. Prerequisites: PSYC 2103/PSYC 2123 and PSYC 2113 and two Psychology foundation courses, permission of a faculty supervisor and Basic Research Coordinator, and a cumulative grade point average of at least 3.3 in Psychology courses.

PSYC3152 Basic Research Seminar II 3 ch (3S) (LE) [W] Involves active participation in several of the activities related to an empirical research project including planning and development of research, conducting a study, and collection and analysis of data. Students will be required to prepare a formal research paper. The actual program will be determined by the student and a faculty supervisor. Normally restricted to students in their third year whose academic performance would allow them to enter the Honours program during their fourth year. Prerequisites: PSYC 2103/PSYC 2123 and PSYC 2113 and two Psychology foundation courses, permission of a faculty supervisor and Basic Research Coordinator, and a cumulative grade point average of at least 3.3 in Psychology courses.

PSYC3213 Language Development 3 ch (3C 1T) Examines current views on language development and discusses the interaction between cognitive, social, and linguistic development. Possible topics include critical period for language, preverbal communication, gestural communication, and vocabulary and grammar development. Prerequisite: PSYC 2203.

PSYC3215 Development of Individuals with Exceptionalities 3 ch (3C) [W] A discussion of issues that may arise for individuals with various exceptionalities at different points in the lifespan. Topics may include prenatal testing, academic/vocational placement, independent living, and parenting. The causes, characteristics, and challenges of specific cognitive, language, sensory, and physical exceptionalities may be reviewed. Prerequisite: PSYC 2203. NOTE: Credit may not be obtained for both PSYC 3215 and PSYC 4215.

PSYC3233 Social Development 3 ch (3C) [W] A review of theories and research examining how various social contexts contribute to individual development. The role of family, peers, and individuals' involvement in school, paid or unpaid work, and community settings will be explored. Content may focus on social development in children and adolescents, adults, the elderly, or across the lifespan, depending on the expertise of the instructor. Prerequisite: PSYC 2203.

PSYC3243 Cognitive Development 3 ch (3C) Examines cognitive development from a variety of theoretical perspectives. Topics covered include mental representation, attention, memory, and perception. Content may focus on cognitive development in children, adults, the elderly, or across the lifespan, depending on instructor availability. Prerequisite: PSYC 2203.

PSYC3253 Family Processes 3 ch (3C) [W] Examines the theoretical and empirical research on family relationships, the factors that influence functioning, and how families change over time. Topics include intimacy relationships, transgenerational processes, family rituals and rules, and interpersonal communication and boundaries. Relevant case examples are discussed to illustrate the complexity of family relationships and the stressors that families may face. Prerequisite: PSYC 2203.

PSYC3263 Psychology of Women 3 ch (3C) [W] A lifespan approach to the lives of girls and women, examined in the context of traditional and alternative roles, life events, and status in society. Provides an overview of theories and research on female development, behaviour, and personality. Prerequisite: PSYC 2203 or permission of instructor.

PSYC3273 Adolescent Development 3 ch (3C) [W] A review of theories and research examining physical and psychological development during adolescence. Specific topics include puberty, identity, sexuality, and health. Emphasis is placed on normative behaviour and how adolescents' characteristics interact with their contexts (e.g., family, school, peers) to shape development. Prerequisite: PSYC 2203.

PSYC3313 Psychological Testing 3 ch (2C 1T) [W] The creation of tests that measure psychological phenomena is a major endeavour within the discipline of psychology. The administration, scoring and interpretation of psychological tests is a significant aspect of the work of researchers and practicing clinical psychologists. This course examines existing tests that measure phenomena such as cognition and personality. The course introduces principles of psychological testing, relevant statistical concepts, and the methods by which tests are developed. Prerequisites: PSYC 2113 and PSYC 2313.

PSYC3315 Applications of Cognitive Behavioural Techniques 3 ch [W] Empirically based cognitive behavioural techniques derived from the clinical psychology and psychiatric traditions are explored in detail and applied to the management of anxiety and fear, treatment of medical and psychological disorders, and the management of home and classroom environments. A self-management project is required. Prerequisite: PSYC 2313 or PSYC 2603. Students who have received credit for PSYC 3615 cannot receive credit for PSYC 3315.

PSYC3323 Approaches to Psychotherapy 3 ch (3C) [W] Surveys prevailing theories and methods of psychotherapy, such as psychoanalysis, client-centred therapy, Gestalt therapy, cognitive-behavioural therapy, and family therapy. Emphasis is on the techniques used in psychotherapy, and various techniques will be contrasted. Each theory and method is evaluated in terms of research examining therapeutic process and outcome. Prerequisite: PSYC 2313.

PSYC3343 The Psychology of Crime 3 ch [W] The purpose of this course is to provide an overview of the area of the psychology of crime with a special focus on Clinical Criminology, also referred to as Forensic Psychology. Issues pertaining to the following topics will be explored: 1) the nature and definition of the crime, 2) the development of the offender (theoretical perspectives), 3) the intersection of crime and mental health, and 4) the victim. Prerequisite: PSYC 2313.

PSYC3355 Topics in Behaviour Assessment 1 ch Focus on research literature related to conducting functional behaviour assessments. Topics include indirect and direct behaviour assessments, functional analysis, and needs assessment. Pre-requisites: Either PSYC 3665 or PSYC 3515. Offered online only. Available only to students enrolled in the certificate program. Students who have received credit for PSYC 3325 cannot receive credit for PSYC 3535.

PSYC3355 Adult Abnormal Psychology 3 ch (3C) [W] This is an advanced course which adopts a scientist-practitioner perspective on the understanding, assessment, and treatment of adult psychological disorders. Topics include psychological theories and treatment of depression, anxiety disorders, schizophrenia, eating disorders, substance use disorders, stress and physical health, dissociative disorders and personality disorders. The course will take an integrative, problem-oriented approach by simultaneously examining the theory, research and treatment literature that is pertinent to each disorder. Prerequisite: PSYC 2313.
This course provides an overview of the psychology of close relationships and friendships. The major theories of close relationships are emphasized, including examinations of evolutionary, attachment, and cognitive approaches, with a strong emphasis on empirical evidence. Research related to topics such as attraction, love, shyness, relationship formation and maintenance, common problems (jealousy, conflict, deception), satisfaction, commitment and well-being are explored, with methodological concerns discussed within the context of each topic. 

**Prerequisite:** Introductory Psychology (6 ch).

**PSYC3515 Introduction to Applied Behaviour Analysis** 3 ch (3C) [W]

This course is an introduction to the basic principles of applied behaviour analysis (ABA) and its various applications. The first part of the course gives students a foundation in the basic principles of learning. The second part of the course covers how these principles can be used to explain and modify human behaviour. Topics areas include autism and intellectual disabilities, psychiatric disorders, school psychology, organizational behaviour management, sports, and large-scale social issues. 

**Prerequisite:** Introductory Psychology (6 ch). Students who have received credit for PSYC 3663 cannot receive credit for PSYC 3515.

**PSYC3545 Topics in Behaviour Intervention** 1 ch

Focus on the research literature pertaining to advancements in behaviour interventions to decrease aberrant behaviour and increase appropriate behaviour. Topics include antecedent intervention strategies, consequence based intervention strategies, and group contingencies. **Prerequisites:** Either PSYC 3663 or PSYC 3515. Offered online only. Available only to students enrolled in the certificate program. Students who have received credit for PSYC 3335 cannot receive credit for PSYC 3545.

**PSYC3555 Skills in Applied Behaviour Analysis** 1 ch

This course complements the material covered in other certificate courses by offering hands-on training and practice in the applications of Applied Behaviour Analysis. Students learn how to conduct various behaviour assessments and implement intervention strategies through instruction, demonstration, practice. **Prerequisites:** Either PSYC 2613 or PSYC 2515 and either PSYC 3663 or PSYC 3515. Offered online only. Available only to students enrolled in the certificate program. Students who have received credit for PSYC 3345 cannot receive credit for PSYC 3555.

**PSYC3613 Laboratory in Learning, Memory and Cognition (O)** 3 ch (3L)

Empirical investigation of current issues in Learning and Memory. Open to Upper Level students Majoring or Honouring in Psychology. **Prerequisite:** PSYC 3623

**PSYC3623 Cognition** 3 ch (3C)

 Covers the basic cognitive processes of memory, problem solving and reasoning, concept formation, and decision making. **Prerequisite:** PSYC 2603.

**PSYC3633 Motivation and Emotion** 3 ch (3C) [W]

A critical examination of contemporary theory and research on motivation and emotion as explanatory concepts for key aspects of personal and social human function. Topics covered include the motivational and emotional determinants of approach and avoidance behaviour, incentive decision making, intrinsic and extrinsic aspects of control, stress and coping, emotional dysfunction, prosocial behaviours, emotion regulation, happiness and positive well-being. **Prerequisite:** PSYC 2603.

**PSYC3643 Adult Developing and Aging** 3 ch (3C) [W]

This course considers the study of adult development and aging. Possible topics include the changes in physical development, learning, memory, cognition, personality, and social cognition that are associated with aging. **Prerequisite:** PSYC 2603 or permission of the instructor.

**PSYC3713 Physiological Psychology** 3 ch (3C) [W]

Examines the physiological bases of behaviour as determined by genetic, neurophysiological, neurochemical and neuroanatomical experimentation. **Prerequisite:** PSYC 2703.

**PSYC3723 Physiological Psychology Laboratory** 3 ch (3L) [W]

Use of psychophysiological methods, instrumentation and techniques (e.g., event-related potential brain recordings, behavioural observation) in the study of the physiological bases of behaviour in humans and other animals. Students will conduct research experiments and learn the basics of human electro-physiological recording, data collection, and analysis. **Prerequisite:** PSYC 3713.

**PSYC3733 Neuropsychopharmacology** 3 ch (3L)

Basic principles of the study of drugs that influence neural systems and induce changes in behaviour. The course will address psychotropic drug assessment, from molecular and biochemical characterization, to behavioural effects in animal test paradigms and finally to clinical applications. **Prerequisite:** PSYC 2703.
PSYC3743  Drugs and Behaviour  3 ch (3C)
Examines sedatives, hypnotics, stimulants, anaesthetics, analgesics, paralytics, psychotogics and psychotherapeutics. Includes history of use, presumed mechanisms of action, and effects on human and animal behaviour. Emphasis on how drugs affect the quality of human experience through relief of pain, addiction, treatment of mental illness, etc. Prerequisite: PSYC 2703 or permission of instructor. Students who have received credit for PSYC 3023 cannot receive credit for PSYC 3743.

PSYC3745  Survey of the Senses  3 ch (3C) [W]
Provides a broad introduction to the five major senses and the necessary background for PSYC 3753 or PSYC 4743. Emphasizes issues relevant to psychophysical measurement, as well as physiological and perceptual processes underlying vision, hearing, touch, smell and taste. Discussion is in the context of the central traditions of perceptual research such as empiricism and Gestalt. Prerequisite: PSYC 2703.

PSYC3753  Laboratory in Vision and Hearing  3 ch (3C)
Individual laboratory exercises in visual and auditory processes. To familiarize the student with the experimental methodology of sensory psychology, and the introductory assessment of sensory deficits (visual defects, hearing loss, etc.). Prerequisite: PSYC 3745.

PSYC3773  Experimental Human Neuropsychology  3 ch (3C) [W]
Emphasis will be on studies that help us to understand the relationship between behaviourally observable phenomena and corresponding brain function. The course will examine what has been revealed about human brain function through the use of specialized types of psychological tests and measures, through biophysical imaging techniques that give us a view of human brain function, and finally through damage to the human nervous system and research on its effects. Prerequisite: PSYC 2703.

PSYC3783  Experimental Neuropsychology Laboratory  3 ch (3L) [W]
Current issues in research in neuropsychology will be examined. Prerequisite: PSYC 3773.

PSYC4003  Topical Seminar in Psychology (O)  3 ch (3S) [W]
An advanced seminar on a topic not represented by one of the Teaching Areas in Psychology. Open to Upper Level students Majoring or Honouring in Psychology. Prerequisite: permission of instructor. Please note that students should consult the Department for current offerings.

PSYC4053  History of Psychology  3 ch (3C)
Critically examines the content, concepts, techniques and issues of the historical antecedents of modern psychology. Primary as well as various secondary sources are consulted.

PSYC4103  Special Topics in Quantitative Psychology (O)  3 ch (3S) [W]
An advanced course on a topic in Quantitative Psychology. Open to upper level students in the Majors or Honours programs in Psychology. Prerequisite: PSYC 2103/PSYC 2123 and PSYC 2113, and PSYC 3113 or permission of instructor. Please note that students should consult the Department for current offerings.

PSYC4110  Honours Research Seminar  6 ch (3S 3S) (LE)
Organization and discussion of Honours Thesis research projects. Normally available only to students who have been admitted to a Psychology Honours Program and who are in their final year. Required of Honours students in Psychology during their fourth year. Prerequisites: PSYC 3151 or PSYC 3152, permission of a faculty supervisor and Honours Research Coordinator, and a cumulative grade point average of at least 3.6 in Psychology courses.

PSYC4123  Special Topics in Qualitative Psychology (O)  3 ch (3S) [W]
An advanced course on a topic in Qualitative Psychology. Open to upper level students in the Majors or Honours programs in Psychology. Prerequisite: PSYC 2113 and permission of the instructor. Please note that students should consult the Department for current offerings.

PSYC4203  Topical Seminar in Developmental Psychology (O)  3 ch (3S) [W]
Discussion of current issues in Developmental Psychology. Open to Upper Level students Majoring or Honouring in Psychology. Prerequisites: PSYC 2203 and permission of instructor. Please note that students should consult the Department for current offerings.

PSYC4223  Topical Seminar in Sex and Gender  3 ch (3C) [W]
Provides a critical appraisal of the theories and research methods in the area of sex and gender differences and similarities. Specific topics include processes, stereotypes, feminist perspectives, role of the media, scientific method, and epistemological tendencies. Examines the construction of knowledge, and the development of positions, with regards to sex and gender. Prerequisite: PSYC 2203 or PSYC 3263 or permission of instructor.

PSYC4303  Topical Seminar in Clinical Psychology (O)  3 ch (3S) [W]
Discussion of current issues in Clinical Psychology. Open to Upper Level students Majoring or Honouring in Psychology. Prerequisites: PSYC 2313 and permission of instructor. Please note that students should consult the Department for current offerings.

PSYC4403  Topical Seminar in Social Psychology  3 ch (3S) [W]
Discussion of current issues in Social Psychology. Open to Upper Level students Majoring or Honouring in Psychology. Prerequisites: PSYC 2403 and permission of instructor. Please note that students should consult the department for current offerings.

PSYC4515  Advanced Applied Behaviour Analysis  3 ch (3S) [W]
Focus on special considerations in providing ABA services. Topics will include ethical and professional conduct issues, special considerations in intervention strategies, supervision and oversight of behaviour services, and systems of behaviour change. Prerequisites: Either PSYC 2613 or PSYC 2515 and either PSYC 3663 or PSYC 3515. Students who have received credit for PSYC 3673 cannot receive credit for PSYC 4515.

PSYC4525  Applied Behaviour Analysis Practicum I/Independent Study I  6 ch
This practicum is a field placement for students, they are required to complete 250 hours of practical service experience in Applied Behaviour Analysis. These placements combine formal education with community service by providing work experience useful for their career and professional profile. Open only to students in the certificate program. A Board Certified Behaviour Analyst supervises a total of 10% of the hours either in individual or group format to meet the BCaBA clinical requirements. Distance based student receive transfer credit upon completion of a 500 hour supervised independent field placement pre-approved by the Faculty Representative of the Applied Behaviour Analysis Certificate program. Note: Available only to students enrolled in the certificate program. Students who have received credit for PSYC 4313 cannot receive credit for PSYC 4525.

PSYC4535  Applied Behaviour Analysis Practicum/Independent Study II  6 ch
This practicum component is a field placement for students, they are required to complete 250 hours of practical service experience in Applied Behaviour Analysis. These placements combine formal education with community service by providing work experience useful for the career and professional profile. Open only to students in the certificate program. A Board Certified Behaviour Analyst supervises a total of 10% of the hours either in individual or group format to meet the BCaBA clinical requirements. Distance based students receive transfer credit upon completion of a 500 hour supervised independent field placement pre-approved by the Faculty Representative of the Applied Behaviour Analysis Certificate program. Prerequisite: Either PSYC 4313 or PSYC 4525. Available only to students enrolled in the certificate program. Students who have received credit for PSYC 4323 cannot receive credit for PSYC 4535.

PSYC4603  Topical Seminar in Learning, Memory and Cognition (O)  3 ch (3S) [W]
Discussion of current issues in Learning, Memory and Cognition. Open to Upper Level students Majoring or Honouring in Psychology. Prerequisites: PSYC 2603 and permission of instructor. Please note that students should consult the Department for current offerings.

PSYC4713  Topical Seminar in Physiological Psychology (O)  3 ch (3S) [W]
An in-depth exploration of current issues in Physiological Psychology. Open to Upper Level students Majoring or Honouring in Psychology. Prerequisite: One of PSYC 3713, PSYC 3743, PSYC 3773 or permission of instructor. Please note that students should consult the Department for current offerings.

PSYC4743  Topical Seminar in Sensation-Perception (O)  3 ch (3S) [W]
Coverage of various issues in Sensation and Perception in a seminar format. Emphasis is on visual and auditory processes, with some coverage of taste, smell, and touch. Laboratory work is included. Open to Upper Level students Majoring or Honouring in Psychology. Prerequisites: PSYC 2703 and permission of instructor. Please note that students should consult the Department for current offerings.

PSYC4773  Topical Seminar in Neuropsychology (O)  3 ch (3S) [W]
Current issues in research in Neuropsychology will be examined. Open to Upper Level students Majoring or Honouring in Psychology. Prerequisites: PSYC 2703 and permission of instructor. Please note that students should consult the Department for current offerings.
SECTION H: FREDERICTON COURSES

PUBLISHING

NOTE: See beginning of Section H for abbreviations, course numbers and coding. Students should consult the Timetable for the latest listing of courses to be offered in each term.

PUB2103 The Evolving Publishing Environments 3 ch (3C) [W]
An overview of the publishing industry, this course examines various technological, economic, legal, and cultural pressures acting on the publishing environment today, including the movement from print to electronic publishing and the shift from brick and mortar stores to online shopping carts. Students will explore the evolving roles of writers, agents, editors, and designers and will consider some of the legal and intellectual property matters at play in the contemporary publishing environment. They will also learn about the business side of publishing, including the roles that marketing, advertising, sales, finances, and online content can play in deciding what will be published. The course ends with a look at the rise of self-publishing, the use of social media in publishing, the preservation of Canadian cultural content in a global age, and some current debates on diversity, economics, and the problems created by an abundance of published content. NOTE: Enrolment limited to 20, with priority given to students admitted to the Certificate in Publishing program.

PUB3000 Publishing Internship 6 ch (LE)
This two-semester internship combines formal education with experiential learning and skills development at organizations with significant publishing activities. It provides unpaid work experience useful for the career and professional profile of individual students, and brings their skills and talents to local organizations involved in the publishing of books, academic journals, cultural magazines, other print materials, or digital/online content. NOTE: Limited enrolment. Open only to students enrolled in the Certificate in Publishing program. Students taking PUB 3000 cannot take PUB 3001 or PUB 3002. Prerequisites: At least 3ch of PUB core courses and permission of the instructor.

PUB3001 Publishing Internship 3 ch (LE)
This one-semester internship combines formal education with experiential learning and skills development at organizations with significant publishing activities. It provides unpaid work experience useful for the career and professional profile of individual students, and brings their skills and talents to local organizations involved in the publishing of books, academic journals, cultural magazines, other print materials, or digital/online content. NOTE: Limited enrolment. Open only to students enrolled in the Certificate in Publishing program. Students cannot take both PUB 3001 and PUB 3000. Prerequisites: At least 3ch of PUB core courses and permission of the instructor.

PUB3002 Publishing Internship 3 ch (LE)
This one-semester internship combines formal education with experiential learning and skills development at organizations with significant publishing activities. It provides unpaid work experience useful for the career and professional profile of individual students, and brings their skills and talents to local organizations involved in the publishing of books, academic journals, cultural magazines, other print materials, or digital/online content. NOTE: Limited enrolment. Open only to students enrolled in the Certificate in Publishing program. Students cannot take both PUB 3002 and PUB 3000. Prerequisites: At least 3ch of PUB core courses and permission of the instructor.

PUB3103 Assessment, Acquisition, & Editing 3 ch (3C) [W]
This course provides students with knowledge of and hands-on experience with three key processes in publishing: assessing, acquiring, and editing manuscripts. It will begin with an overview of assessment and acquisition models used by various sectors in the industry, the pros and cons of peer review, and the many factors at play in the decision to acquire a manuscript. Students will review how decisions are made at professional journals and then examine such topics as the two major online submission systems in publishing today, how assessors are obtained, and the various editing stages that a manuscript can go through (initial revision, developmental/substantive editing, copyediting, and proofreading), as well as grammatical and other editorial considerations. They will practice working as different kinds of editors, learn how to set up and use needed editorial tools, and develop skills to manage the editorial process. NOTE: Enrolment limited to 20, with priority given to students admitted to the Certificate in Publishing program.

PUB3104 Production & Management Fundamentals for Print & Digital Publishing 3 ch (3C) [W]
This course will focus on some of the technical and administrative skills needed in publishing. The main focus will be on gaining a basic knowledge of software that can be used in book and magazine production (e.g., InDesign, Photoshop, OJS). But students will also learn about financial management, fulfillment and distribution, working with a printer, and the importance of marketing, promotion, and discoverability. They will look at some of the software programs (e.g., FilemakerPro, Excel) and online platforms (e.g., Instagram, Wordpress) that can be used by publishers. The course also acquaints students with some of the considerations and challenges specific to digital publishing. NOTE: Enrolment limited to 20, with priority given to students admitted to the Certificate in Publishing program.

RECREATION AND SPORTS STUDIES

NOTE: KIN 1001 is considered to be a prerequisite or co-requisites to all RSS and KIN courses for students enrolled in one of the degree programs offered by the Faculty of Kinesiology.

RSS1042 History of Sport and Recreation 3 ch (3C) [W]
This course is designed as an introductory examination of the historical roots of sport, recreation and human movement in western civilization. Significant events and personalities will be highlighted to provide an overview of the sub-discipline of the history of human movement phenomena. Prerequisite: KIN 1001 or consent of the instructor.

RSS1081 Health and Wellness 3 ch (3C)
An examination of health behaviours of individuals, encompassing social, physical, emotional, and intellectual aspects of health and wellness. The course will use health research to address health concerns, trends, risks, and repercussions associated with health decision-making. Credit cannot be received for both RSS 1081 and NURS 1225.

RSS1213 Leisure, Recreation and Sport Concepts 3 ch (3C)
This course will examine the meanings of and relationships among leisure, recreation, and sport in society. Ideas and philosophies that have shaped contemporary society related to time use, work, and associated concepts will be explored. Prerequisite: KIN 1001.

RSS2011 Management of Sport, Recreation and Wellness Organizations 3 ch (3C) [W]
Introduces the students to the concepts and skills required to successfully manage current and future sport, recreation and wellness organizations in a variety of settings in the public, private, and not-for-profit sectors. Includes both theoretical and practical perspectives to help the students understand not only the WHAT and HOW of management, but also the WHY.

RSS2023 Sociology of Sport, Physical Activity & Leisure 3 ch (3C)
This course encourages students to explore sport, physical activity, and leisure as social phenomena and important aspects of modern society. We will examine many of the same sociological issues within the framework of sport, physical activity, and leisure that exist in society as a whole. More specifically, we will consider the cultural aspects of sport, physical activity and leisure, how they are related to social institutions (such as education, politics, and economics) and how they affect and are affected by social inequalities.

RSS2032 Recreation and Sport Programs and Events 3 ch (3C) [W]
Provides students with an understanding of some theoretical concepts related to programming and the techniques and procedures used to develop and implement programs and events in the recreation and sport context. Deals with the underlying principles of planning recreation programs and events and the techniques and procedures used to develop and implement these, and relates these principles to a variety of recreation settings to meet the needs of different interest levels. Prerequisite: RSS 1213 or permission of the instructor.

RSS2052 Foundations of Tourism 3 ch (3C) [A]
Presents both the conceptual and the operational aspects of the tourism industry from a number of points of view including motivations for travel, economic impact, product development, market analysis and future trends.

RSS2061 Recreation and Sport Delivery Systems 3 ch (3C) [W]
This course will examine the structures, processes and issues that are associated with the delivery of recreation, leisure and sport services in the public, not-for-profit, and commercial sectors. Particular attention will be paid to identifying similarities and differences among the sectors and the relationships that exist among them.

RSS2062 Psycho-Social Aspects of Leisure 3 ch (3C)
This course will examine current social psychological theory about leisure behaviour and experience. In other words, how do people's personalities and social situations that they encounter during their daily lives shape their perceptions, experiences, and responses to leisure, and how does leisure influence personality development and social roles in different life domains. This course will provide an opportunity to examine the influence of psychological and sociological impact of leisure on the individual. Specifically, this course will examine, with regard to leisure, the following areas: gender, race, violence, disability, mass media,
politics, attitudes, crowd effects, youth sport, coaching leadership, and student athletes. Prerequisite: KIN 1001 or consent of the instructor.

RSS2233 Community Development 3 ch (3C)
This course is an examination of the nature of community and the concept and practice of community development in relation to sport and recreation behaviour and services. It reviews differing interpretations and approaches to community development and investigates current initiatives and projects that encourage citizen engagement and community mobilization. Attention is also given to potential problems and common strategies for addressing the challenges.

RSS3001 Assessment and Evaluation in Recreation & Sport 3 ch (3C)
This course focuses on the concepts and methods relevant to the collection and analysis of data needed to address criteria and make informed decisions about the worth or improvement of systems, services, programs and facilities. Topics include understanding context, community and stakeholders, measuring user satisfaction, determining needs, attitudes, opinions and interests. Both qualitative and quantitative methods are considered and applied to actual situations. Prerequisite: Completion of 57 ch towards BRSS or BScKin degrees or with instructor’s permission.

RSS3042 Physical Literacy and Education 3 ch (3L)
This course is designed to introduce the key components of Physical Literacy that lead to building a foundation for participating in sport and activity at both a recreational and high performance level. Using Fundamental Movement Skills (FMS) and Movement Education frameworks, students will gain skills and understanding on the most effective ways to develop a physically literate person. Upon completion of this course, students will be comfortable in leading and assessing FMS for people of all ages.

RSS3043 Coaching Pedagogy and Teaching 3 ch (3L)
This course is designed to provide knowledge and experience in the instruction of physical education activities that are delivered in a variety of environments. Utilizing the foundational knowledge and experience students received in RSS 3042, students will engage in the planning, delivery, and assessment of a physical education program that encourages and develops skills for life long participation and enjoyment of physical activity and sport. Upon completion of this course, students will have a level of comfort in delivering skill and age appropriate activities for youth. Prerequisite: RSS 3042, or permission of the instructor.

RSS3051 Advanced Management of Sport and Recreation (A) 3 ch (3C) [W]
This course takes a critical approach to understanding management in sport and recreation through examining trends and contemporary issues in the industry. An advanced perspective of management as a complex phenomenon is employed requiring students to challenge existing management practices and seek solutions to organizational problems that are ethical, equitable and effective considering multiple stakeholders. Prerequisite: RSS 2011, or permission of the instructor.

RSS3062 Recreation, Sport and the Law 3 ch (3C) [A]
This course provides an introduction to the law of negligence with emphasis on professional liability and risk management, as well the course includes an introduction to criminal law and contracts. Studied through lecture, case law and selected readings all related to recreation and sport. Prerequisite: RSS 2011.

RSS3100 Professional Internship 12 ch [W]
A full-time, full-term placement in a professional position with a community agency. An opportunity for the student to relate theory to practice through professional career and field experiences. Students must complete a minimum of 87 ch prior to placement with an agency.

Management Option: Prerequisites include: ADM 1313, RSS 1061, RSS 2011, RSS 3001, 12ch of Business Minor, and successful participation in all preparatory activities preceding the internship.

Wellness Option: Prerequisites include: BIOL 1711, BIOL 1782, KIN 2082, KIN 3282, KIN 3481, RSS 1081, RSS 1213, RSS 2011, RSS 2032, RSS 3001, KIN 3983, and RSS 4063 or RSS 4083.

RSS3213 Leisure Education and Facilitation Techniques 3 ch (3C) [A]
This course is designed to introduce students to leisure education concepts, theories, and related facilitation techniques. Various leisure education models, assessment tools, and intervention strategies will be explored. Consideration will be given to different settings in which leisure education can be implemented. Prerequisite: RSS 2032 or permission of instructor.
This course involves the application of marketing and sponsorship concepts, theories, and strategies with regards to sport and recreation in the private, commercial, voluntary and public sectors. Marketing and sponsorship policies, strategies and tactics in terms of product, price, place, promotion, and public relations will be explored. Prerequisite: ADM 1313 or permission of instructor.

This examination of community and societal factors that influence health, including: income and social status, social support networks, education and literacy, employment and working conditions, social and physical environments, health services, gender, and culture. Prerequisite: RSS 1081 Health and Wellness.

This course is intended as an integrating and culminating experience for senior students in Recreation and Sport Studies. It will involve class discussions, guest speakers, case studies, etc. that will enable students to draw on their knowledge and experience to critique current issues, trends and challenges in the field. Students will be responsible for helping to identify issues to be discussed and for preparing and presenting issues in class. Prerequisites: 90 ch and a C or better in all required 1000 and 2000 level RSS/KIN courses. Completion of the 2-day Conference Requirement.

Provides opportunities to explore a number of special topics in recreation and sport. Faculty approval is required prior to registration. Title of the topic will appear on the student's transcript. Prerequisite: Completion of 57 ch towards BRSS degree.

Provides opportunities to explore a number of special topics in recreation and sport. Faculty approval is required prior to registration. Title of the topic will appear on the student's transcript. Prerequisite: Completion of 57 ch towards BRSS degree.

Selected topics of special interest in the areas of recreation and sport are examined in detail. Special emphasis will be placed on current issues. Topics will be specified by the Faculty. Title of the topic chosen will appear on the student's transcript. Faculty approval is required prior to registration. Open only to students in third year and above.

Selected topics of special interest in the areas of recreation and sport are examined in detail. Special emphasis will be placed on current issues. Topics will be specified by the Faculty. Title of the topic chosen will appear on the student's transcript. Faculty approval is required prior to registration. Open only to students in third year and above.

This course will focus on recent theoretical and empirical research on, and the relationship among gender, sport, and leisure. Topics to be covered include an analysis of men's and women's experiences, attitudes, constraints, challenges and behaviours related to leisure and sport. Emphasis will be placed on understanding ways in which gender relations and gender roles affect and are affected by sport and leisure. Prerequisite: Must have completed 57 ch.

Provides opportunities to explore a number of special topics in recreation and sport. Faculty approval is required prior to registration. Title of the topic will appear on the student's transcript. Prerequisite: Completion of 57 ch towards BRSS degree.

BRSS Honours students must complete a research project under the supervision of a faculty member. The project can take the form of a thesis, report, or case study as determined by the faculty member. A presentation is required. Prerequisite: Students must be accepted into the BRSS Honours program (see Honours program degree requirements).

Continuation of RSS 3913/RSS 3914. Prerequisites: Must have completed 48ch and have an AGPA of at least 2.5.
RCLP2001 Practicing Leadership in Community Projects 3 ch
Students study and practice leadership in the context of diverse communities and national organizations. Initiating, planning, executing, controlling and closing a leadership project in an organization of the students’ choice as well as continuous reflection on and evaluation of this project are at the core of this course. The course focuses on developing student skills in project management, communication, and cooperation.

RCLP2014 Democracy and Public Policy in Canada 3 ch
The course explores the different roles that government, law and civil society play in addressing significant social and political problems in Canada. By focusing on a specific current public policy issue, students will examine the interplay between institutions, groups and norms, and develop a critical perspective on democratic life in Canada.

RCLP2020 Formative Learning Portfolio II 2 ch
Portfolio II enhances students understanding and use of learning portfolios as they apply self-analysis to their growth and competency in each of the six Renaissance College Learning Outcomes relative to their developing understanding of leadership. Students create formative learning portfolios using evidence from their RC courses, disciplinary minor, extracurricular activities, Canadian internship, and their informal learning activities. RC faculty members assess portfolios and a mark of CR/NCR is awarded in the second term of the second year. Prerequisites: RCLP 1010.

RCLP2023 Canadian Internship 12 ch
A full-time 12 to 16 week placement in an organization located in Canada where students observe leadership in action, develop their leadership skills, and test their interest and aptitude for a career. With guidance from a mentor at UNB and in the organization, students complete assignments designed to enable them to apply their academic knowledge and critical thinking skills in a work environment while enhancing their professional development. A presentation during the subsequent fall term concludes the internship. Prerequisite: RCLP 1001, RCLP 1010, RCLP 1011, RCLP 1021, RCLP 1052, RCLP 1062, RCLP 1111, RCLP 1112, or permission of the instructor.

RCLP2042 Science and Society 3 ch
This course introduces students to scientific knowledge and thinking via an interdisciplinary approach that takes into account the ways science and society interact and inform one another. Topics such as: science and politics, philosophical challenges, science and inequality in society, scientific literacy, and issues around science and society on a local and global scale are addressed throughout the course.

RCLP3002 Leadership in Cross-Cultural Contexts 3 ch
Students study leadership in global and cross-cultural contexts. They engage in cross-cultural projects and reflect on the impact of cultural differences and diversity on leadership processes. The course focuses on developing skills in cross-cultural communication and cooperation.

RCLP3015 Democracy and Global Policy 3 ch
This course explores the different role that states, international organizations and civil society play in addressing global social problems. By examining a current global governance issue, students will be introduced to the key institutional and economic features of the international order. They will evaluate opportunities for collective action and develop a critical perspective on systematic challenges to global cooperation.

RCLP3030 Integrated Learning Portfolio 3 ch
Students graduating from the Bachelor of Integrated Studies are required to construct personal learning portfolios to demonstrate achievement in each of the program’s articulated learning outcomes. This course integrates the learning outcomes, the theory and practice of experiential learning, and reflective writing, as students work toward constructing their understanding of the role and purpose of a personal learning portfolio. May be taken only by students registered in the BIS program or the Certificate in Leadership Studies.

RCLP3046 International Internship 12 ch
This is a cross-cultural educational experience where students travel in small teams to countries where the culture differs from theirs. For a minimum of 10 weeks they immerse themselves in the communities and complete full-time placements with local non-profit organizations. Students contribute to community efforts in order to: observe and learn with and from local people and communities; appreciate multiple perspectives on issues; understand how others experience situations and decisions; and, evaluate how leadership functions in other cultures and societies. A rigorous preparation and re-entry process as well as a set of assignments help students go through a structured process of inquiry and reflection to build knowledge and experience. A presentation during the subsequent fall term concludes the internship. Prerequisites: RCLP 2023 and RCLP 3002, or permission of the instructor.

RCLP3053 Gender and Leadership 3 ch (O)
An inter-disciplinary examination of the impact that gender has on people’s experience and success in leadership roles, and on the ideal of good leadership itself. This course will explore the causes of unequal representation in positions of power in business organizations and in politics, and it will consider possible ways to close the gender gaps. Other topics examined will include: leadership and the public vs. private dichotomy; masculinity and the leadership ideal; gendered division of labor; gendered barriers to leadership in politics, corporate structures and other organizations.

RCLP3054 Mindfulness 3 ch (O)
Mindfulness training cultivates the innate ability to be present; develops calm, concentration, insight and fosters personal growth. Students will examine the theory of mindfulness and engage experientially in a range of practices. They will become increasingly familiar with wisdom of their own minds and bodies, the larger environment in which they live, and the ways mindful leadership may be applied and integrated into their daily, academic and professional lives.

RCLP3701 Special Topics in Leadership 3 ch
An in-depth examination of a specific leadership topic. Each topic will be given an appropriate title that will appear on the student’s transcripts. Each course will also help students develop competence in one or more of the Renaissance College Learning outcomes. Students may take more than one topic for credit.

RCLP3775 Science & Religion - Understanding Through Dialogue 3 ch (O)
This course seeks to develop a deeper understanding and appreciation of the relationship between science and religion through dialogue. Students examine major paradigm shifts and philosophical beliefs and assumptions held by both disciplines. Significant light will be shed on certain major issues through the mutually enriching dialogue between science and religion. The course focuses largely, but not exclusively, on Western science and religion in the modern period.

RCLP4001 Directed Studies In Interdisciplinary Leadership 3 ch
Individualized study of a topic of interest to the student developed in consultation with a faculty member. And with approval of the Dean. This course engages students in applied or basic research activities.

RCLP4002 Leadership for Social Innovation 3 ch
This course focuses on social innovation from a leadership perspective. With emphasis on self-directed learning, students apply innovative approaches to exploring social problems and their potential solutions in the context of several case studies. Students will develop their understanding of and competencies within topic areas such as: frameworks for social innovation; leadership and social entrepreneurship; social value proposition; change leadership frameworks and change management; organizational alternatives; lean canvas methodology; business planning; design thinking; critical perspectives and impact assessment.

RCLP4028 Community Problem-Solving and Research Project 6 ch
Students and faculty collaborate with government agencies and community-based organizations on joint problem-solving in a project-based environment. This two-term course helps students to utilize the knowledge and skills acquired in their previous learning as well as their critical thinking and research skills. Further, students develop confidence as change-makers while also exploring innovative ideas for pressing social, environmental and economic challenges.

RCLP4031 Images and Insight 3 ch
Questions surrounding how images educate, how they make visible emotional and intellectual content, the effects of the visual on human beings, and the visual as an interdisciplinary approach provide a philosophical basis from which the relationship of visual literacy to leadership is explored and developed. There may be a nominal studio fee associated with this course.

RCLP4040 Summative Learning Portfolio III 2 ch
For this course, students submit a summative learning portfolio to demonstrate their growth and competency in the RC Learning Outcomes and connect this with their long range career and life plans. Final presentations highlight their learning using all course work and other experiences including the Canadian and international internship programs. RC faculty members assess the Final Summative Portfolios and a mark of CR/NCR is awarded in the second term of the third year. Prerequisite: RCLP 2020.
SECTION H: FREDERICTON COURSES

RCLP4997 Leadership Practicum I 2 or 3 ch
The opportunity to gain leadership skills, training and experience through significant involvement in leading, directing, coaching and/or managing groups or individuals in the community or on campus. Each credit hour requires at least 40 hours of leadership and learning activities. Students must receive Dean’s approval.

RUSSIAN

NOTE: See beginning of Section H for abbreviations, course numbers and coding.

For a description of an interdisciplinary major/minor program in Russian and Eurasian Studies see the “Russian and Eurasian Studies” section found in the Faculty of Arts program information contained in Section Q of this calendar.

RUSS1013 Introductory Russian I 3 ch
Closed to students with any knowledge of Russian. Sound system of Russian and elementary structures. Emphasis on the four basic skills of listening, speaking, reading, and writing. Prerequisite: No prerequisite.

RUSS1023 Introductory Russian II 3 ch
Continuation of RUSS 1013. Prerequisite: RUSS 1013.

RUSS1043 Russian Culture I 3 ch (3C) [W]
Significant aspects of Russian culture from the 10th to the end of the 19th century. Topics include Russian Icon Painting and Architecture, Russian culture between Europe and Asia; Ivan the Terrible as cultural type; women in Russian culture; serfdom and slavery; Russia’s contribution to the development of terrorism and revolution; the reforms of Peter the Great; Russian Orthodoxy, etc. Conducted in English. Open to students of all years.

RUSS1053 Russian Culture II 3 ch (3C) [W]
Significant aspects of Russian and Soviet culture in the 20th century. Topics include Russian avant garde painting; the Bolshevik Revolution and apocalypticism; class and corruption; Socialist Realism; Stalin and Stalinism; women’s roles under the Soviets; Eisenstein and Soviet cinema; the artificial famine and the Gulag; literature and censorship; Soviet sport and society; Glasnost and culture; etc. Conducted in English. Open to students of all years. No Prerequisites.

RUSS2013 Intermediate Russian I 3 ch
More complex grammatical structures and more advanced texts. Prerequisite: RUSS 1023.

RUSS2023 Intermediate Russian II 3 ch
Continuation of RUSS 2013. Prerequisite: RUSS 2013.

RUSS3013 Advanced Russian I 3 ch
Through the study of advanced grammar, oral discussion of contemporary topics and written assignments, the students’ competence in Russian is improved and their skills in idiomatic and written usage are developed. Prerequisite: RUSS 2023 or equivalent. Offered in alternate years.

RUSS3023 Advanced Russian II 3 ch
Continuation of RUSS 3013. Prerequisite: RUSS 3013 or equivalent. Offered in alternate years.

RUSS3051 Introduction to 19th-Century Russian Literature in Translation (Cross-Listed: WLC5 3051) 3 ch (3C) [W]
Includes the Golden Age of Russian Literature (Pushkin, Lermontov); the great realists (Dostoevsky, Tolstoy, Turgenev); and the emergence of Russian Drama (Chekhov). Themes followed include the superfluous man; nihilism and politics in literature; the Russian female protagonist from Karamzin’s Poor Liza to Dostoevsky’s prostitute Sonya; etc. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor.

RUSS3052 Introduction to 20th-Century Russian Literature in Translation 3 ch (3C) [W]
Includes Futurism, Symbolism, Acmeism and Russia’s Silver Age; literature and Revolution; housing and homelessness in Soviet literature; women’s writing; Socialist Realism (boy meets girl, boy gets tractor); censorship and oppression; experimental prose of the ’20s; aspects of Soviet cinema; Russia’s ‘New Wave’ meets America’s Beatniks; Bulgakov’s magical fable; etc. Conducted in English. Open to students who have completed at least 30 ch of university courses or by permission of instructor.

RUS33083 Seminar I: Genre 3 ch [W]
The development of a particular genre in Russian literature and an examination of various works in that area. Prerequisite: Departmental approval.

RUS34003 Topics in Russian and Eurasian Studies 3 ch
Allows students to pursue special questions in an area of Russian and Eurasian Studies of particular interest to them.

RUS34043 Literature and Religion in 19th and 20th Century Russia and Spain (O) 3 ch (3C) [W]
Studies religious works of Spanish and Russian writers such as Unamuno and Tolstoy. Examines their religious thought and their criticism of the established Spanish Roman Catholic Church and Russian Orthodox Church respectively. Outlines the situation of the Eastern Orthodox Church in Russia as well as the situation of the Catholic Church in Spain in the 19th and the 20th Centuries. Analyzes the position of these writers towards their respective Churches and the creation of their own moral codes through the textual analysis of some of their most relevant works. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students who take this course to fulfill a Major or Honours requirement in Spanish will submit a required work in Spanish.

RUS34053 Seminar II: Author 3 ch [W]
An intensive study of the life and work of a particular author or a number of authors. Prerequisite: Departmental approval.

RUS40061 Russian Women Writers 3 ch (3C) [W]
Despite their enormous contributions at many historical points, women writers still struggle for full acceptance in the Russian literary canon, witness special sections even today in most Russian bookstores for “Feminine Literature”. This course will examine the work of a range of better and lesser known Russian women writers from the late 18th to the early 21st centuries, in poetry, prose, drama and memoir. Writers to be studied include Catherine the Great, the “Russian Amazon”. Nadezhda Durova a cross-dressing cavalry maiden during the Napoleonic campaign, the giants of the Silver Age Anna Akhmatova and Marina Tsvetaeva, ostensible socialist-realists like Vera Panova, Natalia Baranskaja and I. Grekova, disdained figures such as Evgenia Ginzburg and Natalia Gorbanevskaja, and older and younger contemporary writers such as Ludmila Petrushevskaja, Tatiana Tolstaia, and Marina Palei. Works and authors will be studied in both historical and cultural context, and connections and other arts, in particular visual arts, film and popular music will also be explored. The course and all readings are in English. Open to students who have completed at least 30 ch of university courses or by permission of the instructor. Students with credit for RSST 4003 Russian Women Writers may not take this course for credit.

SCIENCE

NOTE: See beginning of Section H for abbreviations, course numbers and coding.

SCI1001 Professional Skills for Science Students 0 ch (1C, 0.5L)
This course is designed for entering Science students to equip them with the skills to help master first year University.

SCI1002 Science in Context 1 ch (1C, 0.5L)
This course is designed for entering Science students to develop career skills in science. Topics include library research skills, tab report writing, teamwork skills, identifying junk science, ethics in science, as well as exploring career & degree options.

A written and oral report on the scientific activities of the Work Integrated Learning (WIL) experience. Faculty approval is required prior to any placement. A component of the grade will be the supervisor’s evaluation of the student. Prerequisite: Students must have completed 32 ch and have a GPA of 2.7 or better.

SCI2611 Life Science For Educators (Grades K-6) 3 ch (3C 3L)
This course is designed for undergraduates preparing for entrance to an elementary teacher education program. It is an introductory level course for students having a limited science background. The topics selected are based on the Atlantic Provinces Science Curriculum, 1995. Included are: properties of living things, life processes and organization of living things, populations, energy flow and cycling within systems, the earth and its atmosphere. This course is not open to science majors.

SCI2822 Physical Science for Educators (Grades K-8) 3 ch (3C 3L)
This course is designed for undergraduates preparing for entrance to an elementary teacher education program. It is an introductory level course for
SOCIOLOGY

See beginning of Section H for abbreviations, course numbers and coding.

SOCI1503 Sociological Perspectives 3 ch [W]
Introduces the basic concepts, theories, perspectives, and approaches of sociology and their application to the study of society and the relationship between the individual and society. Specific topics used to illustrate these sociological perspectives will include some combination of issues concerning socialization, sex and gender, family, community, population and aging, urban life, religion, race and ethnicity, work and occupations, inequality, education, environment, globalization, politics and social movements, technology and social change.

SOCI1513 Picturing Society: Image, Meaning, and Memory in the Photographic Era 3 ch [W]
How do photographs affect the way we think of ourselves (e.g., our body image) and of others (e.g., the " primitives" pictured in National Geographic)? How do photographs create desire (e.g., in advertising and pornography)? Why do people take photographs of friends and family but rarely photograph complete strangers? These questions explore the nature of "a picturing society," one where individuals are surrounded by photographic images and, as a result, the ability to capture realistic representations of the world around us influences image, meaning, and memory. The term "picturing society" also refers to the process of using visual information to understand the characteristics of society - social class and gender divisions, social structure, the process of social change, etc. Photographs from a wide variety of contexts - personal, commercial, scientific, artistic, and others - will be used to explore both aspects of picturing society.

SOCI1523 Youth Culture and Society 3 ch
This course provides an introduction to the sociological imagination by allowing you to make the sociological connections between your personal world and the social world. Sociological perspectives and approaches are introduced through examination of such aspects of youth in contemporary Western societies as identity and sub-cultures, sexual behaviour, music, consumerism, religion, in schools, employment, crime and violence, and other issues affecting youth and their transitions to adulthood.

SOCI1543 Men and Women - Then and Now 3 ch [W]
Life is gendered from the moment of birth. Throughout the various developmental stages, girls and boys are exposed to a variety of messages that in some ways are represented by the fairy tales read in childhood. Adolescents learn the price of deviating too far from the roles or expectations placed upon young men and women in our culture through formal and informal sanctions upon their behaviour. The choices, opportunities, and obstacles that we face as adults, are in large measure built upon the gender messages of childhood. Strategies for identifying the gendered nature of work, leisure, advertising, parenting, and aging will be amongst the topics discussed.

SOCI1583 Current Social Issues 3 ch [W]
Focuses on selected social issues in such areas as Aboriginal/non-aboriginal relations, the environment, and gender; inequality and poverty; the media; racism, ethnic relations, and language; schooling and jobs; cities; urbanization; deviance and crime; as well as globalization.

SOCI1593 Hooked on Religion 3 ch [W]
Whether it is a prayer said in times of sorrow, grace at a meal, a religious ritual to celebrate adolescence, fasting, advice from a faith leader, or a spiritual blessing for a long-term intimate relationship, contact with religion comes in many different forms. Some Canadians "believe without belonging" while others belong to religious organizations but are unsure of their beliefs. Topics include patterns of spirituality in Canadian society, new religious movements, gender and family issues within contemporary religions, violence, and the impact of immigration and multiculturalism on the journey of faith. The impact of changing socio-cultural conditions on religion in Canadian society will be highlighted.

SOCI1603 Introduction to Criminology 3 ch [W]
This course explores the subject matter of criminology and its relationship to other academic disciplines. Examines different concepts and terms commonly used in criminology, the specificity of criminology, relationships between theory and practice, the history and evolution of criminological thought, and the methods of investigation into criminal behaviour. The practical applications of criminology and the foundations of a modern criminal justice policy will also be discussed cannot obtain credit for both SOCI 1603 and SOCI 3603.

SOCI2022 Introduction to Data in the Social Sciences 3 ch [W]
This course is open to students from all faculties and disciplines who are interested in learning the very basic and techniques of understanding, analysing, and reporting data in the social sciences. This course is equally divided between qualitative and quantitative approaches to different types of social science data. Note: This course is not equivalent to SOCI 3103 Research Design or STAT 2263 Statistics for Non-Science Majors.

SOCI2223 Introduction to Mass Communications and the Media 3 ch
A critical overview of mass communications within Canadian society: media institutions and audiences; processes and the impact of the media; media control and policy; social problems and the media; and social issues in an information society.

SOCI2303 Sociology of Families 3 ch
Examines sociological perspectives on marriage and family life: changing forms and functions of the family in the context of the growth of capitalism and industrialism in Western society, women, liberation and the family, patterns and ideologies of family formation and dissolution, changes in family law, and future prospects and alternatives.

SOCI2313 Sociology of Women I 3 ch
Focuses on the role of women within a historical and contemporary context, including women's position in the family, and in educational, political, and economic institutions. The nature, perpetuation, consequences, and the ideology of sexism in capitalist and non-capitalist societies will also be examined.

SOCI2345 Sociology of Aging 3 ch [W]
An introduction to the basic physical, psychological, and demographic changes which occur in aging. Emphasis is given to understanding the everyday world of the young old, their participation in family life, personal life style and community activities after retirement, and with the restrictions created by limited financial resources.

SOCI2365 Sociology of Dying and Death 3 ch
Examines the process of dying and death through a consideration of the cultural and institutional expectations and interpretations which surround this final stage in the human experience. The focus is on the North American context although other social and historical contexts will provide insights and background to the course work.

SOCI2375 Sociology of Health, Illness and Medicine 3 ch [W]
Examines the social nature and consequences of health and illness and looks at medicine as an institution and a form of social control. Areas to be covered include the delivery of health care, the social construction of medical knowledge, social inequality and its impact on health and disease, the medical profession, the medical industrial complex, and sexism and patriarchy in the medical system.

SOCI2403 Contemporary Canadian Issues 3 ch
An introduction to current social issues in Canada such as social inequality, regionalism, unemployment, media concentration, the role of multinationals, and the state of the Canadian economy. The impact of these in shaping our everyday actions and beliefs will be examined.

SOCI2433 Social Problems (O) 3 ch [W]
This course is designed to provide students with an opportunity to develop an understanding of various sociological approaches to the study of social problems and to focus on a selection of substantive issues such as the role of social movements in the construction of social problems.

SOCI2503 Social Movements and Social Revolutions 3 ch [W]
An analysis of twentieth century social movements and revolutions from a sociological perspective. Emphasis is on a critical understanding of why they arise, why some fail, and why others succeed.

SOCI2533 Information Society 3 ch [W]
Investigates "the information society" debate by focusing on the major contributors who argue that the information society is new and revolutionary. Other scholars accept the important role of information technologies in contemporary society but maintain that these technologies help broaden and extend existing social, cultural, economic, and political relations.

SOCI2534 Technology and Social Change 3 ch [W]
Examines the relationship between technology and social change, such as the sources and effects of technical change, the control of technology, and the origin and nature of controversies involving modern technologies.

</tr>
</tbody>
</table>
patterns of industrialization, urbanization, changing class structure including its relation to the state.

SOCI3533 Social Stratification 3 ch [W]
Examines the nature of social stratification from both a historical and a comparative perspective. Attention is given to current controversies in this area.

SOCI3543 Sociology of Gender Relations 3 ch [W]
Examines the social construction of masculinity, femininity, and changes in gender relations over time and in different societal contexts. Prerequisites: 3 ch from any SOCI course.

SOCI3553 Sociology and the Environment 3 ch [W]
A sociological examination of the way humans perceive and relate to their physical environment. Potential topics include: environmentalism as a social movement, the social dynamics of environmental controversies, and public policy toward the environment.

SOCI3563 Global Perspectives in Environmental Health (O) 3 ch [W]
Explores the broad conditions that shape environmental health, with special emphasis on both sociological analysis and political ecology. We will examine questions of science, public policy and social justice. This course will bridge the gap in understanding between policy and social perspectives and examine emerging strategies, from community-based monitoring to international negotiations concerning health and environment.

SOCI3613 Theories and Perspectives in Criminology 3 ch
An examination of the historical development of criminological theory and the causes of crime. Deals with criminal causation theories and with an evaluation of the theories and purposes of punishment. Prerequisites: SOCI 3603 or with permission of the Department. Students who completed SOCI 3610 or its equivalent may not receive credit for SOCI 3613.

SOCI3623 White Collar Crime 3 ch
Emphasizes that organizations, not just individuals, act and therefore can commit deviant acts. An analysis of the organized abuses of institutionalized power, particularly on the part of corporations and governments. The problem of controlling corporate and governmental deviance will also be discussed, as organizations pose prevention and control problems differently from individual deviants.

SOCI3634 Violence Against Women 3 ch
Examines issues pertaining to violence against women in Western society, including gender socialization, gender dynamics in dating and family relationships, private versus public, the contributions of social institutions (e.g., sports; the media; schools; the workplace; the military; the medical, legal and criminal justice systems) and the special vulnerability of women in marginalized groups. Prerequisites: 3 ch from any SOCI course.

SOCI3635 Conflict Resolution 3 ch
The course explores the nature of social and professional responses to conflict and conflict resolution. It critically assesses, contrasts, and compares theoretical literature and research studies on processes such as adjudication and arbitration, negotiation, restorative justice, circle sentencing, and mediation in the context of gender, culture and social-economic power. Students will have an opportunity to explore how conflict-resolution processes, and the skills and techniques associated with them, affect how conflict is perceived and resolved.

SOCI3636 Restorative Justice 3 ch
This course examines the paradigms of both restorative and transformative justice. Reviews criminal justice systems in post-industrial societies with a focus on punishment as the principal response to crime. Compares restorative justice with the current paradigm of retributive justice. Discusses victims, offenders, and the community within the context of the failure of the retributive system in meeting its responsibilities towards them. Critically analyzes prisons, limitations of restorative justice models and programs, and aboriginal traditions in community justice.

SOCI3666 Icons of Non-Violence I (Cross-listed: CCS 3665) 3ch [W]
Examines the religious, philosophical and ethical justifications from the perspectives of different religious traditions for non-violence as a tool for social change in the contemporary world. We will study the concepts and theories of non-violence that may include selected writings of the 14th Dalai Lama, Cesar Chavez and Wangari Maathai in their religious, cultural, social and historical backgrounds.

SOCI3703 Social Demography 3 ch
An examination in both historical and contemporary settings of the demographic correlates of urbanization and industrialization. Attention will be given to how patterns of fertility, mortality, and migration both reflect and influence social change.

SOCI3801 Food Studies in a Sociological Context 3 ch (O) [W]
This course provides students with a general understanding of the role of food in contemporary societies by exploring the socio-cultural aspects of food production and consumption in a cross-cultural context. It also analyzes the economic and political landscape of farming in an international context by examining food politics over regulatory measures in food labelling and safety, genetically modified food, organic and sustainable agriculture, and the future of the world food system.

SOCI4004 Pathways in Social Theory 3 ch [W]
This course conducts a systematic analysis of important readings in social theory relevant to both the social sciences and humanities. Topics covered may include, but are not limited to, such areas as the historical development of social theory (e.g. the Ancient Greeks, the Enlightenment), the theoretical foundations of research methodologies (e.g. positivism and constructionism), key debates in sociology (e.g. subject/object, agency/structure), and in-depth focus on the approaches of major social theorists. Prerequisites: SOCI 3004 and SOCI 3014, or by the Instructor's permission.

SOCI4011 Qualitative Research Methods for the Social Sciences 3 ch [W]
This course offers an in-depth learning experience with qualitative methodological approaches and qualitative research methods in the social sciences. It introduces students to qualitative methodology and its usage in the field, and highlights important ethical considerations and concerns. Students will explore how to develop qualitative research designs; how to define a research question and how to answer it by developing a research protocol. This course offers students the ability to learn how to choose analytical methods for their data and how to interpret the results obtained from it. Prerequisite: Students must have passed an introductory research method course prior to enrolling in this course, or have the Instructor's permission.

SOCI4022 Quantitative Research Methods for the Social Sciences 3ch [W]
This course offers an in-depth learning experience with quantitative methodological approaches and quantitative research methods in the social sciences. This course covers the foundations of research design, data collection, and data analysis. In this class, students will learn how to develop quantitative research designs to answer a research question. They will learn about sampling, primary data collection with standardized instruments, and data analysis with descriptive and inferential statistical methods. Students will be able to learn from the course how to prepare a standardized questionnaire and interviews, as well as to choose between statistical analytical methods for their primary and secondary data. Finally, students will learn and practice how to interpret and write about their results. Prerequisite: It is required for students to have passed an introductory research method course prior to enrolling in this course, or by the Instructor's permission.

SOCI4113 Sociological Research 3 ch
Discussion and evaluation of issues in contemporary sociological methods with exercises to develop skills in selected research procedures. Directed to the needs of individual students. Prerequisites At least 3 ch in methodology or approval of the Department.

SOCI4122 Answering Questions with a Statistical Package for Social Sciences 3 ch
SPSS and Stata are statistical software packages largely used in the social sciences. If applied to analyze large scale secondary data, they provide students and researchers with a powerful tool to answer critical questions on phenomena, trends, and relationships in a variety of disciplinary areas. Most textbooks and courses at the undergraduate and graduate level tend to combine the teaching of substantive topics in methodology and methods with practical applications of this software package. This course tries to contribute twofold. Practically, it aims at offering students and faculty an opportunity to learn about one software package (either SPSS or Stata), its tools, and its challenges independently from content coverage on methods and statistics. While maintaining a substantial coverage of analytical and statistical topics, the course will focus on how to design and implement data.
### SECTION H: FREDERICTON COURSES

Analysis with SPSS or Stata syntax commands rather than on teaching statistics.

### SOFTWARE ENGINEERING

**NOTE:** See beginning of Section H for abbreviations, course numbers and coding.

- **L** - Laboratory periods on alternate weeks.
- **A** - Engineering electives. Not all offered every year. Consult Department as to availability of courses from year to year.

#### SWE4040 Software Engineering Design Project 7 ch (1C 6L) [W]

A software design and implementation experience involving a medium to large group. Students prepare requirements, specification, analysis and design documents as a team toward development of a useful software product and use the documentation to implement and test the product. The development process should consider a broad range of constraints including non-functional requirements to the software product, health and safety, sustainable development and environmental stewardship. Students manage their projects professionally, present their design work orally, and demonstrate formally that the product meets its requirements. 

**Prerequisites:** CS 3503 or at least 2 terms of co-op and 100 ch in the software engineering program or permission from the instructor. Students will not get credit for SWE4040 in place of ECE 4040 without prearranged permission from the ECE program coordinator.

#### SWE4103 Software Quality and Project Management [A]

4 ch (3C 3L) [W]

Software Quality: Emphasizes testing, verification and validation, techniques. Introduces formal specification languages, statistical software reliability engineering, software development process monitoring and maturity models, and process and product metrics. Software Project Management: Emphasizes software project tracking, planning and scheduling, organizing and managing software development teams, introduces factors influencing productivity and success, risk analysis and planning for change. 

**Prerequisite:** CS2503 or CS 2043 or permission from the instructor.

#### SWE4203 Software Evolution and Maintenance [A]

**Prerequisites:** CS 2033 or CS 2043 or permission from the instructor.

#### SWE4403 Software Architecture and Design Patterns 4 ch (3C 2L) [P]

(Cross Listed: CS 4015)

This course introduces concepts of software design patterns and architecture. The course covers principles of reusable object-oriented programming, as well as creational, structural, and behavioural patterns. The course also covers software quality attributes, architectural tactics and patterns, designing and documenting software architecture, architecture reconstruction, architecture evaluation, and software product lines. Students will practice applying and implementing design patterns and software architecture design and evaluation in course work by developing various software systems. 

**Prerequisites:** CS 2043 or permission from the instructor.

#### SWE4913 Independent Project 4 ch [W]

An independent project or literature survey. Students work under the supervision of a chosen faculty member. Students are responsible for finding a supervisor and initiating the project or literature survey. Deliverables include a comprehensive report detailing the work. 

**Prerequisite:** Successful completion of 100 ch in an undergraduate program in the Faculty of Engineering or Faculty of Computer Science.

### SPANISH

See beginning of Section H for abbreviations, course numbers and coding.

#### SPAN1201 Intensive Spanish I 3 ch (3C)

Students will acquire and develop listening, oral and writing skills in an intensive cultural immersion setting. Videos, music, dance, cooking and other cultural activities will facilitate the learning process. This course will normally be offered in either the Spring or Summer session, and follows a two-week total immersion format. Closed to students with any knowledge of Spanish.

#### SPAN1203 Introductory Spanish I 3 ch (3C)

Gives students solid background in the fundamentals of the Spanish language by engaging them in both classroom and computer laboratory settings in communicative use of the four language skills: listening, speaking, reading and writing. Multimedia materials will be used to provide
This course will provide the students with a background in Spanish cinema, from the press and other visual materials will also be used. Students will build on the materials covered in Spanish 2203; students have insight into grammatical structures of the language, are able to sustain a conversation in real life situations and are able to discuss aspects of the Hispanic world. Multimedia materials will be used to provide a background in Hispanic culture. Prerequisite: SPAN 1204 or SPAN 1304.

SPAN2204 Intermediate Spanish II 3 ch (3C)
A continuation of SPAN 2203, this course aims to further enhance students’ linguistic proficiency and provide the concrete knowledge of more complex grammatical structures. Prerequisite: SPAN 2203.

SPAN2303 Intermediate Business Spanish 3 ch (3C)
The main course objective is to continue introducing students to the main requirements for successfully conducting business in Spanish: 1. the cultural and practical aspects of business in Spain and Latin America, and 2. the vocabulary and structures needed to communicate in a business setting. In addition to a basic text, role-playing and case studies, the study of authentic documents will be used to advance both knowledge and skills in areas such as preparing a resume, communicating by phone, fax, letter, matters concerning banking, advertising, marketing and other topics of interest to business institutions as well as the household budget. Prerequisite: SPAN 1204 or SPAN 1304.

SPAN3202 Advanced Oral Spanish I 3 ch (3C)
This course will build vocabulary, increase fluency and enhance the style and accuracy of spoken Spanish through continued development and intensive use of oral Spanish skills. Students who have participated in any Spanish language study abroad program, are native speakers, or who have other immersion experience are not eligible. Prerequisite: SPAN 2204 or permission of the instructor.

SPAN3203 Advanced Spanish I: Advanced Grammar 3 ch (3C)
Intended for students who have successfully completed Intermediate Spanish. The main objective of the course is to improve linguistic competency (acquired by speaking and writing) through the exploration of issues in the contemporary Hispanic world. A variety of language models, including newspapers, magazine articles, interviews and classroom discussions will set the stage for the assimilation of the conversational function of the language. Audio-visual materials will also be used. Prerequisite: SPAN 2204.

SPAN3204 Advanced Spanish II: Conversation and Composition 3ch (3C)
Normally taken (as with SPAN 3203) with the first literature courses, thus complementing each other in improving the student’s written and oral fluency through different types of class participation and assignments. Prerequisite: SPAN 3203.

SPAN3205 Advanced Translation (O) 3 ch (3C)
Intensive translation from and into colloquial and more formal language for the acquisition of written and translating fluency. Besides the translation of a play from English into Spanish, it includes selection in both languages from the press and other sources, and practice of interpretation. Prerequisite: SPAN 2204.

SPAN3456 The Cinema of Spain (O) 3 ch (3C)
This course will provide the students with a background in Spanish cinema, emphasizing the most productive eras such as the Surrealist Movement and the Movida of the 1980s. Films to be studied include those of directors such as Luis Buñuel, Pedro Almodóvar, Alejandro Amenabar, Elias Querejeta, Mario Camus, Bigas Luna, Carlos Saura, Víctor Erice, Laura Madrid, and Icíar Bollaín. Equal emphasis will be placed both on cinematographic and thematic analysis of the cinema, and, when appropriate, cultural and historic context will be provided. Films will be screened previous to class (most often with subtitles) and will be analyzed and discussed in class. The course will be offered in English and is open to students who have successfully completed at least 30 credit hours at university level. Students taking this course to fulfill a Major or Honours requirement in Spanish will submit required work in Spanish.

Prerequisite: A New Brunswick high school mathematics course, either Pre-Calculus 110 or Foundations of Mathematics 120, or equivalent. 

NOTE: Credit can be obtained for only one of STAT 2043, STAT 2253, STAT 2263, STAT 2264, or STAT 2593.

STAT2264 Statistics for Biology 3 ch (3C)

An introductory course in statistics. Probability, Bayes’ Theorem, applications of probability to genetics, random variable, expectation, binomial and normal random variables, confidence intervals for means and proportions, prediction intervals, tests of hypotheses, paired data, two independent samples, frequent introduction to analysis of variance, regression, correlation, contingency tables, examples drawn from medicine and biology, use of a statistical computer package. 

Prerequisites: MATH 1053 or MATH 1054. NOTE: Credit can be obtained for only one of STAT 2043, STAT 2253, STAT 2263, STAT 2264, or STAT 2593.

STAT2593 Probability and Statistics for Engineers 3 ch (3C)

Probability spaces: combinatorial probability; conditional probability and independence. Random variables: discrete distributions; continuous distributions; expectation, variance, and covariance; linear combinations. Statistics: descriptive and graphical statistics; sampling distributions. Inference: point estimation; confidence intervals; hypothesis tests; paired data designs; two sample inference. Prerequisite: MATH 1013. NOTE: Credit can be obtained for only one of STAT 2043, STAT 2253, STAT 2263, STAT 2264, or 2 STAT 593.

STAT3043 Statistics for Social Scientists II 3 ch (3C)

Topics from survey statistics: stratified sampling; cluster sampling. Questionnaires: construction, administration, interpretation and reporting. Topics from basic statistics: regression; one way and two way analysis of variance. Prerequisite: STAT 2043. Not to be taken for credit by CS, MATH or STAT majors. NOTE: Credit can be obtained for only one of STAT 2253, STAT 2263, STAT 2264, STAT 2593, or STAT 3043.

STAT3083 Probability and Mathematical Statistics I 3 ch (3C)

The first half of a two-part sequence covering various topics in probability and statistics. This course provides an introduction to probability theory and the theory of random variables and their distributions. Probability laws. Discrete and continuous random variables. Means, variances, and moment generating functions. Sums of random variables. Joint discrete distributions. Central Limit Theorem. Examples drawn from engineering, science, computing science and business. Prerequisite: MATH 1013. NOTE: Credit can be obtained in only one of STAT 2593 or STAT 3083.

STAT3093 Probability and Mathematical Statistics II 3 ch (3C)

The second half of a two-part sequence covering various topics in probability and statistics. This course provides an introduction to essential techniques of statistical inference. Samples and statistics versus populations and parameters. Brief introduction to method of moments and maximum likelihood. Tests and intervals for means, variances and proportions (one and two-sample). Multiple regression, residual plots. Analysis of variance, brief introduction to experimental design. Chi-squared tests. Examples drawn from engineering, science, computing science and business. Use of a statistical computer package. Prerequisite: STAT 3083. Students with exceptional standings in STAT 2593 may seek permission from the instructor.

STAT3303 Methods of Operations Research I 3 ch (3C)

Linear programming, the simplex method, post optimal analysis, derivation of dual theorem, game theory, network analysis. Various applications will be discussed. Prerequisites: MATH 2003 or equivalent and MATH 2213.

STAT3373 Elementary Experimental Design 3 ch (3C)

Randomization, one and two way classifications. Latin squares, factorial experiments, nesting, incomplete blocks, linear regression. Emphasis on applications. Extensive use of a statistical computer package. Prerequisites: STAT 2263, STAT 2264, STAT 2593, or STAT 3083, MATH 1503 or 2213.

STAT3383 Introduction to Stochastic Processes (A) 3 ch (3C)

Exact contents may vary from year to year, e.g.: counting processes and Poisson processes; renewal processes (discrete); finite state Markov chains; stationary covariance processes. Prerequisites: STAT 2593 or STAT 3083 and one of MATH 2013 or MATH 2213.

STAT4043 Sample Survey Theory 3 ch (3C)

Simple random sampling; stratified sampling; systematic sampling; multi-stage sampling; double sampling; ratio and regression estimates; sources of error in surveys. Prerequisite: STAT 3093.

STAT4053 Regression Analysis 3 ch (3C)

Simple and multiple linear regression. Regression diagnostics. Prediction and model testing. Qualitative variables as predictors. Transformation of variables. Analysis of collinear data. Variable Selection and model reduction procedures. Data analysis using software. Not to be taken for credit by STAT 4053 or ECON 4625. Prerequisites: MATH 2593 and one of MATH 1503 or MATH 2213.

STAT4073 Categorical Data Analysis 3 ch (3C)

Logistic regression models for binary response variables, log-linear models for contingency tables, Poisson regression models for count response variables, multinomial regression models for categorical response variables, and the deviance; classification and regression trees; general tree models and model selection, some special topics in linear models. Emphasis will be on computer implementation and applications in social sciences, psychology, education, medicine, sciences and engineering. Prerequisite: STAT 3093 or the permission of the instructor.

STAT4083 Introduction to Multivariate Statistics 3 ch (3C)

Multivariate normal distribution; estimation of the mean vector and covariance matrix; partial and multiple correlation coefficients; multiple regression; the T2 statistics; tests of hypotheses; discriminant analysis; principal components; factor analysis. Prerequisites: 6 ch of Calculus, 3 ch of Linear Algebra and STAT 3093.

STAT4100 Honours Project 6 ch [W]

Statistics Honours students must complete a project under the supervision of a faculty member. The project is to include a written report and an oral presentation. Prior to being admitted into STAT 4100, the student must have been admitted to the Honours Program and have submitted an acceptable project proposal to the department. Normally students would begin preparation and research for the project during their third year of study, submit the proposal by October of their fourth (final) year of study, and complete the written and oral presentation by the end of the winter term, to graduate in May of that year. Honours students in an interdepartmental program with statistics may choose to complete their honours project in statistics.

STAT4293 Statistical Computing 3 ch (3C)

Introduction to the R statistical computing language. Use of data frames and lists. Simulation of data. Advance graphics. General Statistical routines. Coding of new procedures. Bootstrapping and cross-validation. Prerequisites: STAT 2593 or both of STAT 3083, STAT 3093.

STAT4303 Stochastic Models In Operations Research 3 ch (3C)

Discusses various models involving decision making under uncertainties. Topics include: queuing theory, Markovian decision process, reliability and quality control, simulation. Prerequisite: STAT 2593 or STAT 3083. Co-require: STAT 3303.

STAT4333 Queuing Theory (A) 3 ch (3C)

Introduction, queuing models. Single and multiserver queuing models. Analysis of queuing models using differential difference equation, generating functions, distribution of busy periods. Transient behaviour, introduction to bulk queuing and other queuing models. Prerequisite: STAT 2593 or STAT 3083.

STAT4443 Time Series Analysis and Applications (A) 3 ch (3C)

Discrete time series and stochastic processes; autocorrelation and partial correlation functions; white noise; moving averages; autoregressive, mixed and integrated processes; stochastic models, fitting, estimation and diagnostic checkout; forecasting; forecasting in seasonal time series; applications would include problems from Economics, Engineering, Physics. Prerequisite: STAT 3093.

STAT4903 Independent Study in Statistics 3 ch

Advanced topic in Statistics to be chosen jointly by student, advisor, and Department Chair. May be taken for credit more than once. Title of topic chosen will appear on transcript. Prerequisite: Permission of Department.

TECHNOLOGY MANAGEMENT AND ENTREPRENEURSHIP

See beginning of Section H for abbreviations, course numbers and coding.

TME1001 Introduction to Technology Management and Entrepreneurship 3 ch (3C)

Provides students an opportunity to be introduced to TME topics and will serve as a foundation for subsequent TME courses. Topics addressed may vary based on faculty expertise and emergent issues.
TME2001 Creativity, Innovation and Value Creation 3 ch (3C) [W]
Introduction to the roles of creativity, value creation and entrepreneurship in the innovation process. Students will learn about idea generation, ways to enhance individual and group creativity, value creation and entrepreneurship in its various forms. Students will develop the skills and competencies that contribute to innovation including: curiosity and creativity, accepting and managing risk, ability to link innovation to value creation (in a societal context), the ability to link societal value to entrepreneurship, communication skills, the ability to work on the boundaries of disciplines and the ability to work within interdisciplinary teams. Students will analyze, social, environmental and cultural aspects of creativity, value creation and innovation, including contemporary ideas about the innovation shapes and its shaped by society and culture, and the relationship between innovation and social change.

TME3013 Entrepreneurial Finance 3 ch
An introduction to fundamentals of finance in new ventures and/or high growth technology-driven businesses. Students will learn how to interpret and analyze financial statements and develop proforma financial statements. The course will enable students to enhance their knowledge of sound principles of finance and alternative sources of finance. Students will learn about venture capital financing and initial public offerings (IPO) and the role they play in financing high growth, high tech businesses. Students will also develop skills in financing negotiations. Prerequisite: 80 credit hours of approved courses, or permission of the TME program Chair.

TME3113 Business Planning and Strategy in an Entrepreneurial Environment 3 ch [W]
An introduction to business planning and strategy concepts in start-up and early stage technology-driven businesses. The course addresses a wide spectrum of functional activities in a dynamic business enterprise including finance, operations, human resource management, change management, sales/marketing, and customer relationship management. Business analysis, communication, and planning skills are developed and students are introduced to shifting business paradigms in the global, digital economy. Prerequisite: 80 credit hours of approved courses, or permission of the TME program Chair.

TME3213 Quality Management 3 ch
Designed to prepare participants for the management practices which they might expect to encounter in a progressive organization. Many of these practices involve the standardization and continuous improvement of business processes. The course explores implementation of Lean and Six Sigma, as well as -ISO 9000, the international standard on quality management. It also focuses on the use of continuous improvement and Statistical Process Control (SPC) concepts, which lead to fundamentally new ways of thinking about innovation and problem solving. Prerequisite: 80 credit hours of approved courses, or permission of the TME program Chair.

TME3313 Managing Engineering & Information Technology Projects 3 ch
The future of most organizations depends on successful projects. The participants will gain an understanding of the principles of project management including organizing, planning, scheduling and controlling projects to achieve a set of objectives. The course will enhance knowledge and skills of project managers in such topics as project management skills, managing project risks, controlling project changes and systems thinking. Emphasis is placed on technology-intensive projects which tend to have a high degree of specialized human resources skills/knowledge requirements. Prerequisite: 80 credit hours of approved courses, or permission of the TME program Chair.

TME3346 Marketing of Technological Goods and Services 3 ch (Cross-Listed: ADM 3375)
Provides an introduction to the marketing of technology focused on industrial goods and services. Includes essentials of marketing, such as product development, promotional design, distribution, pricing/budgeting determination, strategic analysis, communication skills, client/customer relations, and considerations for the small business environment. Prerequisite: 36 credit hours of approved courses, or permission of the TME program Chair.

TME3386 Special Topics in Technology Management and Entrepreneurship 3 ch
Provides selected students an opportunity to complete an independent project course of study. Permission of both the instructor of the associated course and the program Chair is required. Students may register for this course only once during their degree. Prerequisite: 80 credit hours of approved courses, or permission of the TME program Chair.

TME3396 Special Topics in Management and Entrepreneurship 3 ch
Provides selected students an opportunity to complete an independent or group-based course of study. Permission of both the instructor of the associated course and the program Chair is required. Students may register for this course only once during their degree. Prerequisite: 80 credit hours of approved courses, or permission of the TME program Chair.

TME3413 Technological Creativity and Innovation 3 ch
An introduction to technological entrepreneurship from two perspectives: Creativity (the production of new technology-based business ideas/opportunities by entrepreneurs) and Innovation (the implementation of those ideas). Students will be presented entrepreneurship as a career alternative, the entrepreneurial process, creativity and its components, management of creativity and innovation in organizations, evaluation of entrepreneurial opportunities and the linkages between entrepreneurship, creativity and innovation, as well as the economic and social impacts of technology on society. Students generate new venture ideas or ideas for a social enterprise, evaluate the feasibility, pitch the merits, and create a business plan that they defend in a contest. The course is particularly aimed at students who aspire to launch their own startup, those who would like to investigate startup as a career option, or those who wish to familiarize themselves with the concepts, issues, and techniques of new venture creation and entrepreneurship to better prepare for the changing business environment. Prerequisite: 80 credit hours of approved courses, or permission of the TME program Chair.

TME3423 Technological Risk and Opportunity 3 ch
An introduction to mature and emerging technologies and the entrepreneurial opportunities arising from these technologies. Topics include the evolution of technological trends and assessment of technological risk from an entrepreneurial perspective and the economic and social impacts of technology on society. Prerequisite: 80 credit hours of approved courses, or permission of the TME program Chair.

TME3913 Experiential Learning - Technology Management and Entrepreneurship 3 ch
An opportunity for experiential learning related to the management of technology and/or technological entrepreneurship. Students co-design, develop and implement a project in collaboration with an external organization or a designated mentor. The project must be jointly supervised by a representative of the external organization or mentor, and a designated faculty member. Prerequisite: 80 credit hours of approved courses, normally 6 credit hours of TME courses and approval by the TME Chair of the project (prior to registration in the course).

TME4025 Project Design and Development 8 ch (2C 2T 4L) [W]
Full-year Product Design and Development course (fall and winter of same academic year) which may be taken in place of the final-year design course in most engineering program. The cornerstone is a project in which teams of 4 or 5 students conceive, design and prototype a product. The proposed solution would use modern tools and methods for product design and development, and should meet a broad range of constraints including health and safety, sustainable development and environmental stewardship. Weekly class sessions are conducted in lecture or workshop mode and employ cases and hands-on exercises to reinforce the key ideas. Topics include identifying customer needs, concept generation, product architecture, industrial design, and design-for-manufacturing. Prerequisites: Restricted to students who have met the requirements of the capstone design course in their engineering program, and have received approval from both their degree program coordinator and the TME program Chair. NOTE: TME 5025 is an 8 ch course and if the final-year design course in your degree program is assigned less than 8 ch, the additional credit hours may only be used to meet degree program requirements subject to approval of your program coordinator. Please consult your degree program coordinator for the position of your Department on this course.

UNIVERSITY STUDIES
UNV0101 University Skills 0 ch (2C 1T)
This course is designed to promote and enhance student success at UNB. Stress access to campus resources and provides practical demonstrations of effective study practices. Includes formal lectures as well as small group tutoring. Students normally enrol in the section oriented to their specific faculties. Degree credit for the course is at the discretion of individual faculties.
