How To Add An Existing Activity To A Module In D2L Brightspace:

• Under the table of contents select the module you want to Add The Existing Activity to.
• Click the **Add Existing Activities** drop down.
• Select the tool that has the activity.

NOTE: You may create activities using other tools in the system. For example, you can go directly to the Assignments tool and create all of your assignment from there. Likewise with the Quizzes tool, Discussions tool, etc. After you create these activities you can then link to them from a learning module in the content tool.
