

To work with a professional company specializing in integrated surveying and consulting in the Marine and Land Geomatics sectors. Established in St. John's and Halifax as a multi-disciplinary geodetic, surveying, mapping, consulting and positioning company, our personnel are committed to the management philosophy of providing professional, reliable and competitive service to the complete satisfaction of our clients.

To respond to the increasing demands, both domestic and international, in the marine survey sectors, Fugro has openings for personnel in the following area.

Geomatics Engineer

As a minimum, the following requirements would need to be met:

- Graduate of a recognized Engineering Program;
- Willingness to travel in Canada and abroad;
- Willingness to work in a dynamic offshore environment for extended periods;
- Valid Driver's License and any valid offshore safety training;
- Good written and verbal communication skills.

The ability to work independently or with a group is necessary. A keen interest to develop professionally in the ocean science field related to hydrographic surveys, precise sub sea construction surveys, geophysical and geotechnical surveys is a must.

Fugro's main objective is to use the latest technologies available along with highly trained personnel to provide the best solution to our Clients. We are not looking for average individuals; we are looking for highly motivated and energetic individuals to join our team and evolve into an integral component of our company.
