

FURNITURE AND RUBBISH FIRES

The Fredericton Fire Department wants you to know;

- Be safe don't engage in Furniture or Rubbish fires, you or someone you care about could suffer severe injury or death.
- A furniture or rubbish fire ties up important Fire Department resources, if we are responding to a mischief fire we may be delayed in responding to another life threatening call.
- Couch and rubbish fires produce heavy dangerous smoke. Some of the gases in this smoke have been known to cause severe health issues in those exposed.
 1. The foam in couches produces isocyanates when burned; they cause severe irritation of the lungs and can develop into asthma.
 2. Other materials such as plastics and binders are carcinogenic and have been linked to cancer.
 3. Flame retardants in couches are also carcinogenic and have been linked to certain cancers.

Remember;

It's an Offense punishable under
F-13 the Fire Prevention Act, the Canadian Criminal Code and COF Bylaw S-2.

If you see this type of activity in your neighborhood Call 911

Fredericton

Furniture and Rubbish fires are no game, someone could get injured or property damage could result. Don't waste your academic career and your future with one mistake.
