

**CANADA'S #1
UNIVERSITY FOR
TEACHING
ENTREPRENEURSHIP**

TECHNOLOGY MANAGEMENT AND ENTREPRENEURSHIP

Accelerate your tech start-up and learn how to manage a technology-based company at Canada's most entrepreneurial university. UNB's Master of Technology Management and Entrepreneurship (MTME) program combines technological thinking and experiential learning with practical business skills to promote an entrepreneurial mindset in students with science, computer science and engineering backgrounds. Our small, collaborative classes are held in the J. Herbert Smith Centre for Technology Management and Entrepreneurship, a centre with over 25 years in the ever-changing world of technology. Through project-based work, students discover the market potential of their ideas and learn how to commercialize research with access to a machine shop, welding facilities and 3D printers. Our graduates have gone on to start successful companies of their own making. Others choose to work in Fortune 500 companies, government and not-for-profits.

DEGREES OFFERED

MTME

APPLICATION DEADLINE

March 1
(international)
May 1
(domestic)
