What's new?

Starting April 1, 2007, the following changes were made to the New Brunswick LTC system:

- Move from a cost-based to an hours-based policy with respect to home support services.
- Restoring of the maximum number of hours of home support from 170 to 215 hours per month.
- Increase of the hourly rate for home support services by 3.9 per cent to $13.13 from $12.64.
- Increase of the Level 1 rate for subsidized clients in special care homes from $38.59 to $42.59 per day on January 1, 2007 and to $74 per day on April 1, 2007.
- Increase of the Level 2 rate for subsidized clients in special care homes from $70.59 to $74 per day.
- Increase of the hours of care in nursing homes to 3.0 per day.
- Change in the Standard Family Contribution policy from a means based test to an income-based test. This means that assets are no longer considered when calculating clients' contribution to the cost of their care.
- Covering for nursing home health care costs; and residents only required to pay a maximum of $70/day for room and board.
- Repealing of the legislation that allowed nursing homes to charge private pay residents five per cent over the per diem rate.
- Increase of the Comfort and Clothing allowance for nursing home and special care home residents by five per cent.
- Increase in the maximum hours of care per month for home care up to a maximum of 215 hours, and 336 hours for individuals who require additional supports.
- Provision of a $16 a day supplement to assist special care home operators to continue to care for individuals while they await nursing home placement.

Starting December 2013, Income from Canada Pension Plan, Guaranteed Income Supplement, Old Age Security and Other sources are available as client income sources in the LTC database.

Long-Term Care Database Reference Guide

1. About this guide

This reference guide is intended for users of the Long Term Care Database. This guide provides an overview of the data, the general methodology used in its creation and important technical information. It contains operational procedures as well as table and field descriptions. The development of this document is an ongoing process that will be updated with changes that occur in the Long Term Care data.

This data product is provided 'as is', and NB-IRDT makes no warranty, either express or implied, including but not limited to, warranties of merchantability and fitness for a particular purpose. In no event will NB-IRDT be liable for any direct, special, indirect, consequential or other damages, however caused.

2. Overview

The Long Term Care database is a digital document which contains details on business processes and timestamps of situations, assessments, caseloads, and payments for serving long term care clients in the Province of New Brunswick.

Data Range

Each table in LTC data has a time stamp variable indicating which month the data was originally collected. The LTC database contains information of Long Term Care clients and business processes of the Long Term Care program during six fiscal years (April 1st 2008 until March 31st 2014).

3. About this product

Purpose of the product

The purpose of the Long Term Care (LTC) database is to provide usable and linkable New Brunswick LTC data to researchers for public health and other research as well as for the development of population estimates and projections.

Definitions and concepts

Long-Term Care Services refer to a range of personal support, physical, social and mental health services required by individuals who, because of long term functional limitations, need assistance to function as independently as possible.

'Client' refers to a recipient of long term care.

Content

This version of the Long Term Care database contains thirteen (13) groups of data, shown below:

Field	Field Name
1	Caseload-Individuals
2	Caseload
3	Situation-Individuals
4	Situation
5	Situation Referrals
6	Assessment by Clients
7	Payment
8	Service Referrals
9	Service Requisitions
10	Service Requisition Other Cost
11	Services
12	Resources
13	Legal Details

General methodology

LTC data extracted from the New Brunswick families ORACLE database and collected from the New Brunswick Department of Social Development monthly spreadsheets are prepared - direct identifiers, such as Medicare numbers, removed or scrambled – for privacy protection. This data, which is linkable to other datasets, is accessible to researchers at NB-IRDT.

Limitations

Seniors who are able to purchase long term care services without financial assistance from government, make their own arrangements with home support agencies and special care home operators, making it difficult to determine how many seniors in the province are actually receiving long-term care services.
