## Overview

BizNet was started by Business New Brunswick in 1999 as a tool to contain client lists in one database. In 2004, it was adapted for use by the Population Growth Division of the Government of New Brunswick's Department of Post-Secondary Education, Training and Labour. The BizNet database represents every Provincial Nominee Program (PNP) application entered by operations.

Each individual who applies for the Provincial Nominee Program is considered a primary applicant, and his or her application information is contained in the BizNet database. The status of the application is tracked through the application date, certificate issue (nomination) date, and landing date. The application date is when the PNP application is submitted. The certificate issue date is when the primary applicant is nominated for the program. The landing date is when the primary applicant lands in New Brunswick and attains permanent resident status.

Information about the dependants (family members) of the primary applicants are included in the database as well. However, this information is more limited because the dependants did not complete the PNP application and therefore do not have application data. The HOUSEHOLD\_ID variable indicates which household an individual is part of and will show the same value for all members of the same family/household. The DEPENDANT\_TYPE\_ID variable indicates the relation of the individual to the corresponding primary applicant (or whether the individual is a primary applicant).

The BizNet database at NB-IRDT contains a "Client and Application Data" table and a "Language Test Results" table. The "Client and Application Data" table contains information about individuals (clients) and their corresponding application information, as applicable. This table contains one record per individual. The "Language Test Results" table has language test results for individuals who completed a language test. The language tests include the Canadian English Language Proficiency Index Program (CELPIP), International English Language Testing System (IELTS), and Test d'Évaluation de Français / French Proficiency Exam (TEF). This table contains one record per language test result. The two tables can be linked together through the individual ID.

## About this Product

### Purpose of the Product

The purpose of the BizNet Database Codebook is to provide information on the linkable New Brunswick BizNet data held at the New Brunswick Institute for Research, Data and Training (NB-IRDT). This data is accessible to researchers for immigrant related research.

### Content

The BizNet database contains two tables. The names of these tables and the number of variables in each table are in the table below.

#	Name	Unit of Observation	Variables
1	Client and Application Data	Application	31
2	Language Test Results	Language Test Result	10

### Client and Application Data

The “Client and Application Data” table contains 31 variables. The names of these variables and their data types are in the table below.

#	Name	Type
1	indvid	String

## Language Test Results Table

The “Language Test Results” table has language test results for individuals who completed a language test. The language tests include the Canadian English Language Proficiency Index Program (CELPIP), International English Language Testing System (IELTS), and Test d'Évaluation de Français / French Proficiency Exam (TEF). This table contains one record per language test result.

### indvid

Unique numeric identifier for each individual; primary applicants and family members included

Note: indvid is available across all tables

### LANGUAGE\_TEST\_TYPE\_ID

Type of language proficiency test the primary applicant and/or his/her spouse took

ID	DESCRIPTION_EN	DESCRIPTION_FR
1	IELTS - International English Language Testing System	
4	CELPIP - Canadian English Language Proficiency Index Program	
21	TEF - Test d'Évaluation de Français/ French Proficiency Exam	

### TEST\_DATE\_TAKEN

Date upon which the applicant completed one of the language proficiency tests  
Format: yyyy/mm/dd hh:mm:ss

### TEST\_SCORE

Overall test score as an average of the individual components

International English Language Testing System (IELTS)

IELTS is the world's leading test of English for higher education and migration.

There is no pass or fail in IELTS. Candidates are graded on their performance, using scores from 1 to 9 for each part of the test – Listening, Reading, Writing, and Speaking.

The results from the four parts then produce an Overall Band Score.

Each band corresponds to a level of English competence. All parts of the test and the Overall Band Score can be reported in whole and half bands, e.g., 6.5, 7.0, 7.5, 8.0.

Band #	Title	Description
0	Did not attempt the test	No assessable information provided.
1	Non-user	Essentially has no ability to use the language beyond possibly a few isolated words.
2	Intermittent user	No real communication is possible except for the most basic information using isolated words or short formulae in familiar situations and to meet immediate needs. Has great difficulty understanding spoken and written English.

---

<b>3</b>	Extremely limited user	Conveys and understands only general meaning in very familiar situations. Frequent breakdowns in communication occur.
<b>4</b>	Limited user	Basic competence is limited to familiar situations. Has frequent problems in understanding and expression. Is not able to use complex language.
<b>5</b>	Modest user	Has partial command of the language, coping with overall meaning in most situations, though is likely to make many mistakes. Should be able to handle basic communication in own field.
<b>6</b>	Competent user	Has generally effective command of the language despite some inaccuracies, inappropriacies, and misunderstandings. Can use and understand fairly complex language, particularly in familiar situations.
<b>7</b>	Good user	Has operational command of the language, though with occasional inaccuracies, inappropriacies, and misunderstandings in some situations. Generally handles complex language well and understands detailed reasoning.
<b>8</b>	Very good user	Has fully operational command of the language with only occasional unsystematic inaccuracies and inappropriacies. Misunderstandings may occur in unfamiliar situations. Handles complex detailed argumentation well.
<b>9</b>	Expert user	Has fully operational command of the language: appropriate, accurate and fluent with complete understanding.
