About this Codebook

This reference guide is intended for users of the NB Physician Billing Database. The guide provides an overview of the data, the general methodology used in its creation and important technical information. It contains operational procedures as well as table and field descriptions of data elements. The development of this document is an ongoing process and will be updated with changes that occur in the Physician Billing data.

This data product is provided 'as is,' and NB-IRDT makes no warranty, either express or implied, including but not limited to warranties of merchantability and fitness for a particular purpose. In no event will NB-IRDT be liable for any direct, special, indirect, consequential, or other damages, however caused.

Due to the operational nature of administrative data sets, there is potential for discrepancies between the names of variables and their corresponding definitions. In the case of such a discrepancy, the variable definition should be considered the most accurate representation.

Overview

The New Brunswick Physician Billing database contains administrative information on the Medicare Decision Support System (MDSS) Statistical Info in New Brunswick.

Sample Universe

This dataset contains information on services provided by physicians and non-physicians.

Date Range
