

From Colocation to the Cloud

Why Hosting is more Strategic than you think

By Todd Price

Product Management – Data Center and Cloud Solutions, Bell Aliant

A strategic overview on the importance of Colocation in your Data Centre and Cloud evolution. Colocation has become a critical stepping point as customers evolve from an in house data room/data centre solution to an integrated, multifaceted hybrid cloud. Understanding the technology and key business decisions can help Enterprises move towards an optimal colocation and cloud solution. This presentation will touch on the business implications of key trends we are seeing in the Data Centre market place in 2014 and the recommended approaches for optimizing your data centre road map. It will also discuss the new Data Centre being constructed in Saint John, NB and the importance of Data Centre hosting and cloud services to the Bell Aliant portfolio of services.

Date: Sept. 17, 2015
